FINANCIAL & MANAGERIAL ACCOUNTING

Second Edition

WILEY

ACCOUNT CLASSIFICATION AND PRESENTATION

Account Title	Classification	Financial Statement	Normal Balance
A			
Accounts Payable	Current Liability	Balance Sheet	Credit
Accounts Receivable	Current Asset	Balance Sheet	Debit
Accumulated Depreciation—Buildings	Plant Asset—Contra	Balance Sheet	Credit
Accumulated Depreciation—Equipment	Plant Asset—Contra	Balance Sheet	Credit
Administrative Expenses	Operating Expense	Income Statement	Debit
Advertising Expense	Operating Expense	Income Statement	Debit
Allowance for Doubtful Accounts	Current Asset—Contra	Balance Sheet	Credit
Amortization Expense	Operating Expense	Income Statement	Debit
B			
Bad Debt Expense	Operating Expense	Income Statement	Debit
Bonds Payable	Long-Term Liability	Balance Sheet	Credit
Buildings	Plant Asset	Balance Sheet	Debit
C			
Cash	Current Asset	Balance Sheet	Debit
Common Stock	Stockholders' Equity	Balance Sheet	Credit
Copyrights	Intangible Asset	Balance Sheet	Debit
Cost of Goods Sold	Cost of Goods Sold	Income Statement	Debit
D			
Debt Investments	Current Asset/Long-Term Investment	Balance Sheet	Debit
Depreciation Expense	Operating Expense	Income Statement	Debit
Discount on Bonds Payable	Long-Term Liability—Contra	Balance Sheet	Debit
Dividend Revenue	Other Income	Income Statement	Credit
Dividends	Temporary account closed to Retained Earnings	Retained Earnings Statement	Debit
Dividends Payable	Current Liability	Balance Sheet	Credit
E			
Equipment	Plant Asset	Balance Sheet	Debit
F			
Freight-Out	Operating Expense	Income Statement	Debit
G			
Gain on Disposal of Plant Assets	Other Income	Income Statement	Credit
Goodwill	Intangible Asset	Balance Sheet	Debit
I			
Income Summary	Temporary account closed to Retained Earnings	Not Applicable	(1)
Income Tax Expense	Income Tax Expense	Income Statement	Debit
Income Taxes Payable	Current Liability	Balance Sheet	Credit
Insurance Expense	Operating Expense	Income Statement	Debit
Interest Expense	Other Expense	Income Statement	Debit
Interest Payable	Current Liability	Balance Sheet	Credit
Interest Receivable	Current Asset	Balance Sheet	Debit
Interest Revenue	Other Income	Income Statement	Credit
Inventory	Current Asset	Balance Sheet (2)	Debit

Account Title	Classification	Financial Statement	Normal Balance
L			
Land	Plant Asset	Balance Sheet	Debit
Loss on Disposal of Plant Assets	Other Expense	Income Statement	Debit
M			
Maintenance and Repairs Expense	Operating Expense	Income Statement	Debit
Mortgage Payable	Long-Term Liability	Balance Sheet	Credit
N			
Notes Payable	Current Liability/ Long-Term Liability	Balance Sheet	Credit
P			
Patents	Intangible Asset	Balance Sheet	Debit
Paid-in Capital in Excess of Par— Common Stock	Stockholders' Equity	Balance Sheet	Credit
Paid-in Capital in Excess of Par— Preferred Stock	Stockholders' Equity	Balance Sheet	Credit
Preferred Stock	Stockholders' Equity	Balance Sheet	Credit
Premium on Bonds Payable	Long-Term Liability—Adjunct	Balance Sheet	Credit
Prepaid Insurance	Current Asset	Balance Sheet	Debit
R			
Rent Expense	Operating Expense	Income Statement	Debit
Retained Earnings	Stockholders' Equity	Balance Sheet and Retained Earnings Statement	Credit
S			
Salaries and Wages Expense	Operating Expense	Income Statement	Debit
Salaries and Wages Payable	Current Liability	Balance Sheet	Credit
Sales Discounts	Revenue—Contra	Income Statement	Debit
Sales Returns and Allowances	Revenue—Contra	Income Statement	Debit
Sales Revenue	Revenue	Income Statement	Credit
Selling Expenses	Operating Expense	Income Statement	Debit
Service Revenue	Revenue	Income Statement	Credit
Short-Term Investments	Current Asset	Balance Sheet	Debit
Stock Investments	Current Asset/Long-Term Investment	Balance Sheet	Debit
Supplies	Current Asset	Balance Sheet	Debit
Supplies Expense	Operating Expense	Income Statement	Debit
T			
Treasury Stock	Stockholders' Equity	Balance Sheet	Debit
U			
Unearned Service Revenue	Current Liability	Balance Sheet	Credit
Utilities Expense	Operating Expense	Income Statement	Debit
<p>(1) The normal balance for Income Summary will be credit when there is a net income, debit when there is a net loss. The Income Summary account does not appear on any financial statement.</p> <p>(2) If a periodic system is used, Inventory also appears on the income statement in the calculation of cost of goods sold.</p>			

The following is a sample chart of accounts. It does not represent a comprehensive chart of all the accounts used in this textbook but rather those accounts that are commonly used. This sample chart of accounts is for a company that generates both service revenue as well as sales revenue. It uses the perpetual approach to inventory. If a periodic system was used, the following temporary accounts would be needed to record inventory purchases: Purchases, Freight-In, Purchase Returns and Allowances, and Purchase Discounts.

CHART OF ACCOUNTS				
Assets	Liabilities	Stockholders' Equity	Revenues	Expenses
Cash	Notes Payable	Common Stock	Service Revenue	Administrative Expenses
Accounts Receivable	Accounts Payable	Paid-in Capital in Excess of Par—Common Stock	Sales Revenue	Amortization Expense
Allowance for Doubtful Accounts	Unearned Service Revenue	Preferred Stock	Sales Discounts	Bad Debt Expense
Interest Receivable	Salaries and Wages Payable	Paid-in Capital in Excess of Par—Preferred Stock	Sales Returns and Allowances	Cost of Goods Sold
Inventory	Interest Payable	Treasury Stock	Interest Revenue	Depreciation Expense
Supplies	Dividends Payable	Retained Earnings	Gain on Disposal of Plant Assets	Freight-Out
Prepaid Insurance	Income Taxes Payable	Dividends		Income Tax Expense
Land	Bonds Payable	Income Summary		Insurance Expense
Equipment	Discount on Bonds Payable			Interest Expense
Accumulated Depreciation—Equipment	Premium on Bonds Payable			Loss on Disposal of Plant Assets
Buildings	Mortgage Payable			Maintenance and Repairs Expense
Accumulated Depreciation—Buildings				Rent Expense
Copyrights				Salaries and Wages Expense
Goodwill				Selling Expenses
Patents				Supplies Expense
				Utilities Expense

This book was set in New Aster LT Std by Aptara[®], Inc. and printed and bound by Quad Graphics/Versailles.

The cover was printed by Quad Graphics/Versailles.

Founded in 1807, John Wiley & Sons, Inc. has been a valued source of knowledge and understanding for more than 200 years, helping people around the world meet their needs and fulfill their aspirations. Our company is built on a foundation of principles that include responsibility to the communities we serve and where we live and work. In 2008, we launched a Corporate Citizenship Initiative, a global effort to address the environmental, social, economic, and ethical challenges we face in our business. Among the issues we are addressing are carbon impact, paper specifications and procurement, ethical conduct within our business and among our vendors, and community and charitable support. For more information, please visit our website: www.wiley.com/go/citizenship.

From the Authors

Dear Student,

Why This Course? Remember your biology course in high school? Did you have one of those “invisible man” models (or maybe something more high-tech than that) that gave you the opportunity to look “inside” the human body? This accounting course offers something similar. To understand a business, you have to understand the financial insides of a business organization. An accounting course will help you understand the essential financial components of businesses. Whether you are looking at a large multinational company like *Apple* or *Starbucks* or a single-owner software consulting business or coffee shop, knowing the fundamentals of accounting will help you understand what is happening. As an employee, a manager, an investor, a business owner, or a director of your own personal finances—any of which roles you will have at some point in your life—you will make better decisions for having taken this course.

Why This Book? Hundreds of thousands of students have used this textbook. Your instructor has chosen it for you because of its trusted reputation. The authors have worked hard to keep the book fresh, timely, and accurate.

“Whether you are looking at a large multinational company like Apple or Starbucks or a single-owner software consulting business or coffee shop, knowing the fundamentals of accounting will help you understand what is happening.”

How to Succeed? We’ve asked many students and many instructors whether there is a secret for success in this course. The nearly unanimous answer turns out to be not much of a secret: “Do the homework.” This is one course where doing is learning. The more time you spend on the homework assignments—using the various tools that this textbook provides—the more likely you are to learn the essential concepts, techniques, and methods of accounting. Besides the textbook itself, WileyPLUS and the book’s companion website also offers various support resources.

Good luck in this course. We hope you enjoy the experience and that you put to good use throughout a lifetime of success the knowledge you obtain in this course. We are sure you will not be disappointed.

Jerry J. Weygandt
Paul D. Kimmel
Donald E. Kieso

Author Commitment

Jerry Weygandt

JERRY J. WEYGANDT, PhD, CPA, is Arthur Andersen Alumni Emeritus Professor of Accounting at the University of Wisconsin—Madison. He holds a Ph.D. in accounting from the University of Illinois. Articles by Professor Weygandt have appeared in the *Accounting Review*, *Journal of Accounting Research*, *Accounting Horizons*, *Journal of Accountancy*, and other academic and professional journals. These articles have examined such financial reporting issues as accounting for price-level adjustments, pensions, convertible securities, stock option contracts, and interim reports. Professor Weygandt is author of other accounting and financial reporting books and is a member of the American Accounting Association, the American Institute of Certified Public Accountants, and the Wisconsin Society of Certified Public Accountants. He has served on numerous committees of the American Accounting Association and as a member of the editorial board of the *Accounting Review*; he also has served as President and Secretary-Treasurer of the American Accounting Association. In addition, he has been actively involved with the American Institute of Certified Public Accountants and has been a member of the Accounting Standards Executive Committee (AcSEC) of that organization. He has served on the FASB task force that examined the reporting issues related to accounting for income taxes and served as a trustee of the Financial Accounting Foundation. Professor Weygandt has received the Chancellor's Award for Excellence in Teaching and the Beta Gamma Sigma Dean's Teaching Award. He is on the board of directors of M & I Bank of Southern Wisconsin. He is the recipient of the Wisconsin Institute of CPAs' Outstanding Educator's Award and the Lifetime Achievement Award. In 2001 he received the American Accounting Association's Outstanding Educator Award.

Paul Kimmel

PAUL D. KIMMEL, PhD, CPA, received his bachelor's degree from the University of Minnesota and his doctorate in accounting from the University of Wisconsin. He is an Associate Professor at the University of Wisconsin—Milwaukee, and has public accounting experience with Deloitte & Touche (Minneapolis). He was the recipient of the UWM School of Business Advisory Council Teaching Award, the Reggie Taite Excellence in Teaching Award and a three-time winner of the Outstanding Teaching Assistant Award at the University of Wisconsin. He is also a recipient of the Elijah Watts Sells Award for Honorary Distinction for his results on the CPA exam. He is a member of the American Accounting Association and the Institute of Management Accountants and has published articles in *Accounting Review*, *Accounting Horizons*, *Advances in Management Accounting*, *Managerial Finance*, *Issues in Accounting Education*, *Journal of Accounting Education*, as well as other journals. His research interests include accounting for financial instruments and innovation in accounting education. He has published papers and given numerous talks on incorporating critical thinking into accounting education, and helped prepare a catalog of critical thinking resources for the Federated Schools of Accountancy.

Don Kieso

DONALD E. KIESO, PhD, CPA, received his bachelor's degree from Aurora University and his doctorate in accounting from the University of Illinois. He has served as chairman of the Department of Accountancy and is currently the KPMG Emeritus Professor of Accountancy at Northern Illinois University. He has public accounting experience with Price Waterhouse & Co. (San Francisco and Chicago) and Arthur Andersen & Co. (Chicago) and research experience with the Research Division of the American Institute of Certified Public Accountants (New York). He has done post doctorate work as a Visiting Scholar at the University of California at Berkeley and is a recipient of NIU's Teaching Excellence Award and four Golden Apple Teaching Awards. Professor Kieso is the author of other accounting and business books and is a member of the American Accounting Association, the American Institute of Certified Public Accountants, and the Illinois CPA Society. He has served as a member of the Board of Directors of the Illinois CPA Society, then AACSB's Accounting Accreditation Committees, the State of Illinois Comptroller's Commission, as Secretary-Treasurer of the Federation of Schools of Accountancy, and as Secretary-Treasurer of the American Accounting Association. Professor Kieso is currently serving on the Board of Trustees and Executive Committee of Aurora University, as a member of the Board of Directors of Kishwaukee Community Hospital, and as Treasurer and Director of Valley West Community Hospital. From 1989 to 1993 he served as a charter member of the national Accounting Education Change Commission. He is the recipient of the Outstanding Accounting Educator Award from the Illinois CPA Society, the FSA's Joseph A. Silvos Award of Merit, the NIU Foundation's Humanitarian Award for Service to Higher Education, a Distinguished Service Award from the Illinois CPA Society, and in 2003 an honorary doctorate from Aurora University.

Practice Made Simple

The Team for Success is focused on helping students get the most out of their accounting course by **making practice simple**. Both in the printed text and the online environment of *WileyPLUS*, new opportunities for self-guided practice allow students to check their knowledge of accounting concepts, skills, and problem-solving techniques as they receive individual feedback at the question, learning objective, and course level.

Personalized Practice

Based on cognitive science, **WileyPLUS with ORION** is a personalized, adaptive learning experience that gives students the practice they need to build proficiency on topics while using their study time most effectively. The adaptive engine is powered by hundreds of unique questions per chapter, giving students endless opportunities for practice throughout the course.

Streamlined Learning Objectives

Newly streamlined learning objectives help students make the best use of their time outside of class. Each learning objective is addressed by reading content, answering a variety of practice and assessment questions, and watching educational videos, so that no matter where students begin their work, the relevant resources and practice are readily accessible.

CHAPTER OUTLINE		
Learning Objectives		
1	Discuss the difference between traditional costing and activity-based costing.	<ul style="list-style-type: none"> Traditional costing systems Illustration of a traditional system Need for a new approach Activity-based costing DO IT! 1 Costing Systems
2	Apply activity-based costing to a manufacturer.	<ul style="list-style-type: none"> Identify and class activities and allocate overhead Identify cost drivers Compute activity-based overhead rates Assign overhead costs Comparing unit costs DO IT! 2 Apply ABC to Manufacturer
3	Explain the benefits and limitations of activity-based costing.	<ul style="list-style-type: none"> Advantages of multiple cost pools Advantages of enhanced cost control Advantages of better management decisions Limitations of ABC DO IT! 3 Classify Activity Levels
4	Apply activity-based costing to service industries.	<ul style="list-style-type: none"> Traditional costing example ABC example DO IT! 4 Apply ABC to Service Company

Review and Practice

A new section in the text and in WileyPLUS offers students more opportunities for self-guided practice.

In WileyPLUS, the new practice assignments include several Do ITs, Brief Exercises, Exercises, and Problems, giving students the opportunity to check their work or see the answer and solution after their final attempt.

In the text, the new Review and Practice section includes:

- Learning Objectives Review
- Glossary Review
- Practice Multiple-Choice Questions and Solutions
- Practice Exercises and Solutions
- Practice Problem and Solution

SOLUTIONS TO PRACTICE EXERCISES

1. (a)	Activity Cost Pools	Cost Drivers	Estimated Overhead
	Cutting	Machine hours	\$400,000
	Design	Number of setups	555,000
Activity-based overhead rates:			
	<u>Cutting</u>		<u>Design</u>
	$\frac{\$400,000}{200,000} = \2 per machine hour		$\frac{\$555,000}{1,500} = \370 per setup
Activity-based costing			
	<u>Cutting</u>		<u>Cotton</u>
	$100,000 \times \$2$	\$200,000	\$200,000
	$100,000 \times \$2$		
	<u>Design</u>		
	$1,000 \times \$370$	370,000	185,000
	$500 \times \$370$		
	Total cost allocated	<u>\$570,000</u>	<u>\$385,000</u>
(b)	Estimated overhead	$\frac{\$955,000}{477,500} = \2 per direct labor hour	
	Direct labors hours	477,500	

What's New?

WileyPLUS with ORION

Over 5,500 new questions are available for practice and review. WileyPLUS with Orion is an adaptive study and practice tool that helps students build proficiency in course topics.

Updated Content and Design

We scrutinized all chapter material to find new ways to engage students and help them learn accounting concepts. Homework problems were updated in all chapters.

A new learning objective structure helps students practice their understanding of concepts with **DO IT!** exercises before they move on to different topics in other learning objectives. Coupled with a new interior design and revised infographics, the new outcomes-oriented approach motivates students and helps them make the best use of their time.

WileyPLUS Videos

Over 250 videos are available in WileyPLUS. More than 80 of the videos are new to the Second Edition. The videos walk students through relevant homework problems and solutions, review important concepts, provide overviews of Excel skills, and explore topics in a real-world context.

Student Practice and Solutions

New practice opportunities with solutions are integrated throughout the textbook and WileyPLUS course. Each textbook chapter now provides students with a **Review and Practice** section that includes learning objective summaries, multiple-choice questions with feedback for each answer choice, and both practice exercises and problems with solutions. Also, each learning objective module in the textbook is now followed by a **DO IT!** exercise with an accompanying solution.

In **WileyPLUS**, two brief exercises, two **DO IT!** exercises, two exercises, and a new problem are available for practice with each chapter. These new practice questions are algorithmic, providing students with multiple opportunities for advanced practice.

Real World Context

We expanded our practice of using numerous examples of real companies throughout the textbook. For example, new feature stories highlight operations of **Clif Bar**, **Groupon**, and **REI**. Also, new financial reporting problems in each chapter require students to analyze the financial statements of **Apple**, **Wal-Mart**, **Louis Vuitton**, and **Amazon.com**. Finally, in WileyPLUS, real-world Insight boxes now have questions that can be assigned as homework.

Excel

New Excel skill videos help students understand Excel features they can apply in their accounting studies. A new continuing Excel tutorial is also available at the end of each managerial accounting chapter.

More information about the Second Edition is available on the book's website at www.wiley.com/college/weygandt.

Table of Contents

1 Accounting in Action 2

Knowing the Numbers: Clif Bar 2

LO 1: Identify the activities and users associated with accounting. 4

Three Activities 4

Who Uses Accounting Data? 5

LO 2: Explain the building blocks of accounting: ethics, principles, and assumptions. 7

Ethics in Financial Reporting 7

Generally Accepted Accounting Principles 9

Measurement Principles 9

Assumptions 9

LO 3: State the accounting equation, and define its components. 12

Assets 12

Liabilities 12

Stockholders' Equity 12

LO 4: Analyze the effects of business transactions on the accounting equation. 14

Transaction Analysis 15

Summary of Transactions 19

LO 5: Describe the four financial statements and how they are prepared. 21

Income Statement 21

Retained Earnings Statement 21

Balance Sheet 23

Statement of Cash Flows 23

LO *6: APPENDIX 1A: Explain the career opportunities in accounting. 25

Public Accounting 25

Private Accounting 25

Governmental Accounting 25

Forensic Accounting 26

"Show Me the Money" 26

A Look at IFRS 46

2 The Recording Process 48

Accidents Happen: MF Global Holdings 48

LO 1: Describe how accounts, debits, and credits are used to record business transactions. 50

Debits and Credits 50

Stockholders' Equity Relationships 54

Summary of Debit/Credit Rules 54

LO 2: Indicate how a journal is used in the recording process. 55

Steps in the Recording Process 55

The Journal 56

LO 3: Explain how a ledger and posting help in the recording process. 58

The Ledger 58

Posting 60

The Recording Process Illustrated 62

Summary Illustration of Journalizing and

Posting 67

LO 4: Prepare a trial balance. 69

Limitations of a Trial Balance 69

Locating Errors 70

Dollar Signs and Underlining 70

A Look at IFRS 92

3 Adjusting the Accounts 94

Keeping Track of Groupons: Groupon 94

LO 1: Explain the accrual basis of accounting and the reasons for adjusting entries. 96

Fiscal and Calendar Years 96

Accrual- versus Cash-Basis Accounting 96

Recognizing Revenues and Expenses 97

The Need for Adjusting Entries 98

Types of Adjusting Entries 98

LO 2: Prepare adjusting entries for deferrals. 100

Prepaid Expenses 100

Unearned Revenues 104

LO 3: Prepare adjusting entries for accruals. 106

Accrued Revenues 106

Accrued Expenses 108

Summary of Basic Relationships 111

LO 4: Describe the nature and purpose of an adjusted trial balance. 113

Preparing the Adjusted Trial Balance 113

Preparing Financial Statements 114

LO *5: APPENDIX 3A: Prepare adjusting entries for the alternative treatment of deferrals. 117

Prepaid Expenses 118

Unearned Revenues 119

Summary of Additional Adjustment

Relationships 120

LO *6: APPENDIX 3B: Discuss financial reporting concepts. 120

Qualities of Useful Information 120

Assumptions in Financial Reporting 121

Principles in Financial Reporting 122

Cost Constraint 122

A Look at IFRS 148

4 Completing the Accounting Cycle 150

Everyone Likes to Win: Rhino Foods 150

LO 1: Prepare a worksheet. 152

Steps in Preparing a Worksheet 153
Preparing Financial Statements from a Worksheet 155

Preparing Adjusting Entries from a Worksheet 157

LO 2: Prepare closing entries and a post-closing trial balance. 157

Preparing Closing Entries 158
Posting Closing Entries 160
Preparing a Post-Closing Trial Balance 162

LO 3: Explain the steps in the accounting cycle and how to prepare correcting entries. 165

Summary of the Accounting Cycle 165
Reversing Entries—An Optional Step 165
Correcting Entries—An Avoidable Step 166

LO 4: Identify the sections of a classified balance sheet. 168

Current Assets 168
Long-Term Investments 170
Property, Plant, and Equipment 170
Intangible Assets 170
Current Liabilities 171
Long-Term Liabilities 172
Stockholders' (Owners') Equity 172

LO *5: APPENDIX 4A: Prepare reversing entries. 174

Reversing Entries Example 174

A Look at IFRS 200

5 Accounting for Merchandising Operations 204

Buy Now, Vote Later: REI 204

LO 1: Describe merchandising operations and inventory systems. 206

Operating Cycles 206
Flow of Costs 207

LO 2: Record purchases under a perpetual inventory system. 209

Freight Costs 210
Purchase Returns and Allowances 212
Purchase Discounts 212
Summary of Purchasing Transactions 213

LO 3: Record sales under a perpetual inventory system. 214

Sales Returns and Allowances 215
Sales Discounts 216

LO 4: Apply the steps in the accounting cycle to a merchandising company. 218

Adjusting Entries 218

Closing Entries 218

Summary of Merchandising Entries 219

LO 5: Compare a multiple-step with a single-step income statement. 220

Multiple-Step Income Statement 220
Single-Step Income Statement 223
Classified Balance Sheet 224

LO *6: APPENDIX 5A: Prepare a worksheet for a merchandising company. 225

Using a Worksheet 225

LO *7: APPENDIX 5B: Record purchases and sales under a periodic inventory system. 227

Determining Cost of Goods Sold Under a Periodic System 227

Recording Merchandise Transactions 228

Recording Purchases of Merchandise 228

Recording Sales of Merchandise 229

Journalizing and Posting Closing Entries 229

Using a Worksheet 231

A Look at IFRS 256

6 Inventories 258

"Where Is That Spare Bulldozer Blade?": Caterpillar 258

LO 1: Discuss how to classify and determine inventory. 260

Classifying Inventory 260
Determining Inventory Quantities 261

LO 2: Apply inventory cost flow methods and discuss their financial effects. 264

Specific Identification 264
Cost Flow Assumptions 265
Financial Statement and Tax Effects of Cost Flow Methods 269
Using Inventory Cost Flow Methods Consistently 271

LO 3: Indicate the effects of inventory errors on the financial statements. 272

Income Statement Effects 272
Balance Sheet Effects 273

LO 4: Explain the statement presentation and analysis of inventory. 274

Presentation 274
Lower-of-Cost-or-Market 274
Analysis 275

LO *5: APPENDIX 6A: Apply the inventory cost flow methods to perpetual inventory records. 277

First-In, First-Out (FIFO) 278
Last-In, First-Out (LIFO) 278
Average-Cost 279

LO *6: APPENDIX 6B: Describe the two methods of estimating inventories. 280

Gross Profit Method 280
Retail Inventory Method 281

A Look at IFRS 304

7 Fraud, Internal Control, and Cash 306

Minding the Money in Madison: Barriques 306

LO 1: Discuss fraud and the principles of internal control. 308

- Fraud 308
- The Sarbanes-Oxley Act 308
- Internal Control 309
- Principles of Internal Control Activities 309
- Limitations of Internal Control 316

LO 2: Apply internal control principles to cash. 317

- Cash Receipts Controls 318
- Cash Disbursements Controls 320
- Petty Cash Fund 322

LO 3: Identify the control features of a bank account. 325

- Making Bank Deposits 325
- Writing Checks 326
- Bank Statements 327
- Reconciling the Bank Account 328
- Electronic Funds Transfer (EFT) System 332

LO 4: Explain the reporting of cash. 333

- Cash Equivalents 333
- Restricted Cash 333

A Look at IFRS 354

8 Accounting for Receivables 356

A Dose of Careful Management Keeps Receivables Healthy: Whitehall-Robins 356

LO 1: Explain how companies recognize accounts receivable. 358

- Types of Receivables 358
- Recognizing Accounts Receivable 358

LO 2: Describe how companies value accounts receivable and record their disposition. 360

- Valuing Accounts Receivable 360
- Disposing of Accounts Receivable 366

LO 3: Explain how companies recognize notes receivable. 369

- Determining the Maturity Date 369
- Computing Interest 370
- Recognizing Notes Receivable 371

LO 4: Describe how companies value notes receivable, record their disposition, and present and analyze receivables. 371

- Valuing Notes Receivable 371
- Disposing of Notes Receivable 372
- Statement Presentation and Analysis 373

A Look at IFRS 393

9 Plant Assets, Natural Resources, and Intangible Assets 396

How Much for a Ride to the Beach?:

Rent-A-Wreck 396

LO 1: Explain the accounting for plant asset expenditures. 398

- Determining the Cost of Plant Assets 398
- Expenditures During Useful Life 400

LO 2: Apply depreciation methods to plant assets. 402

- Factors in Computing Depreciation 403
- Depreciation Methods 403
- Depreciation and Income Taxes 408
- Revising Periodic Depreciation 408

LO 3: Explain how to account for the disposal of plant assets. 409

- Retirement of Plant Assets 410
- Sale of Plant Assets 410

LO 4: Describe how to account for natural resources and intangible assets. 412

- Natural Resources 412
- Depletion 412
- Intangible Assets 414
- Accounting for Intangible Assets 414
- Research and Development Costs 416

LO 5: Discuss how plant assets, natural resources, and intangible assets are reported and analyzed. 417

- Presentation 417
- Analysis 418

LO *6: APPENDIX 9A: Explain how to account for the exchange of plant assets. 419

- Loss Treatment 419
- Gain Treatment 420

A Look at IFRS 441

10 Liabilities 444

Financing His Dreams: Wilbert Murdock 444

LO 1: Explain how to account for current liabilities. 446

- What Is a Current Liability? 446
- Notes Payable 446
- Sales Taxes Payable 447
- Payroll and Payroll Taxes Payable 448
- Unearned Revenues 450
- Current Maturities of Long-Term Debt 451

LO 2: Describe the major characteristics of bonds. 452

- Types of Bonds 452
- Issuing Procedures 452

Bond Trading 453

Determining the Market Price of a Bond 454

LO 3: Explain how to account for bond transactions. 456

Issuing Bonds at Face Value 456

Discount or Premium on Bonds 456

Issuing Bonds at a Discount 457

Issuing Bonds at a Premium 459

Redeeming and Converting Bonds 460

LO 4: Explain how to account for long-term notes payable. 462

LO 5: Discuss how liabilities are reported and analyzed. 464

Presentation 464

Use of Ratios 465

Debt and Equity Financing 466

LO *6: APPENDIX 10A: Apply the straight-line method of amortizing bond discount and bond premium. 468

Amortizing Bond Discount 468

Amortizing Bond Premium 469

LO *7: APPENDIX 10B: Apply the effective-interest method of amortizing bond discount and bond premium. 470

Amortizing Bond Discount 471

Amortizing Bond Premium 473

A Look at IFRS 495

11 Corporations: Organization, Stock Transactions, Dividends, and Retained Earnings 498

What's Cooking?: Nike 498

LO 1: Discuss the major characteristics of a corporation. 500

Characteristics of a Corporation 500

Forming a Corporation 502

Stockholder Rights 504

Stock Issue Considerations 504

Corporate Capital 507

LO 2: Explain how to account for the issuance of common and preferred stock. 509

Accounting for Common Stock 509

Accounting for Preferred Stock 511

LO 3: Explain how to account for treasury stock. 512

Purchase of Treasury Stock 512

Disposal of Treasury Stock 513

LO 4: Explain how to account for cash dividends. 515

Cash Dividends 515

Dividend Preferences 517

LO 5: Explain how to account for stock dividends and splits. 520

Stock Dividends 520

Stock Splits 522

LO 6: Discuss how stockholders' equity is reported and analyzed. 524

Retained Earnings 524

Statement Presentation and Analysis 528

LO *7: APPENDIX 11A: Describe the use and content of the stockholders' equity statement. 531

LO *8: APPENDIX 11B: Compute book value per share. 531

Book Value per Share 531

Book Value versus Market Price 532

A Look at IFRS 555

12 Investments 558

"Is There Anything Else We Can Buy?": Time Warner 558

LO 1: Explain how to account for debt investments. 560

Why Corporations Invest 560

Accounting for Debt Investments 561

LO 2: Explain how to account for stock investments. 563

Holdings of Less than 20% 563

Holdings Between 20% and 50% 564

Holdings of More than 50% 566

LO 3: Discuss how debt and stock investments are reported in financial statements. 568

Categories of Securities 568

Balance Sheet Presentation 571

Presentation of Realized and Unrealized Gain or Loss 572

Classified Balance Sheet 573

LO *4: APPENDIX 12A: Describe the form and content of consolidated financial statements as well as how to prepare them. 575

Consolidated Balance Sheet 575

Consolidated Income Statement 578

A Look at IFRS 596

13 Statement of Cash Flows 598

Got Cash?: Microsoft 598

LO 1: Discuss the usefulness and format of the statement of cash flows. 600

Usefulness of the Statement of Cash Flows 600

Classification of Cash Flows 600

Significant Noncash Activities 601

Format of the Statement of Cash Flows 602

LO 2: Prepare a statement of cash flows using the indirect method. 603

Indirect and Direct Methods 604

Indirect Method—Computer Services Company 604

Step 1: Operating Activities 606

Summary of Conversion to Net Cash Provided by
Operating Activities—Indirect Method 609
Step 2: Investing and Financing Activities 610
Step 3: Net Change in Cash 611

LO 3: Analyze the statement of cash flows. 614
Free Cash Flow 614

LO *4: APPENDIX 13A: Prepare a statement of cash flows using the direct method. 616
Step 1: Operating Activities 616
Step 2: Investing and Financing Activities 622
Step 3: Net Change in Cash 623

LO *5: APPENDIX 13B: Use a worksheet to prepare the statement of cash flows using the indirect method. 623
Preparing the Worksheet 624

LO *6: APPENDIX 13C: Use the T-account approach to prepare a statement of cash flows. 629

A Look at IFRS 656

14 Financial Statement Analysis 658

It Pays to Be Patient: Warren Buffett 658

LO 1: Apply horizontal and vertical analysis to financial statements. 660

Need for Comparative Analysis 660
Tools of Analysis 660
Horizontal Analysis 661
Vertical Analysis 664

LO 2: Analyze a company's performance using ratio analysis. 666

Liquidity Ratios 667
Profitability Ratios 670
Solvency Ratios 674
Summary of Ratios 676

LO 3: Apply the concept of sustainable income. 678

Discontinued Operations 679
Other Comprehensive Income 679

A Look at IFRS 707

15 Managerial Accounting 710

Just Add Water . . . and Paddle: Current Designs 710

LO 1: Identify the features of managerial accounting and the functions of management. 712

Comparing Managerial and Financial Accounting 712
Management Functions 712
Organizational Structure 714

LO 2: Describe the classes of manufacturing costs and the differences between product and period costs. 716

Manufacturing Costs 716
Product Versus Period Costs 718
Illustration of Cost Concepts 718

LO 3: Demonstrate how to compute cost of goods manufactured and prepare financial statements for a manufacturer. 720

Income Statement 720
Cost of Goods Manufactured 721
Cost of Goods Manufactured Schedule 722
Balance Sheet 722

LO 4: Discuss trends in managerial accounting. 724

Service Industries 724
Focus on the Value Chain 725
Balanced Scorecard 726
Business Ethics 727
Corporate Social Responsibility 728

16 Job Order Costing 752

Profiting from the Silver Screen: Disney 752

LO 1: Describe cost systems and the flow of costs in a job order system. 754

Process Cost System 754
Job Order Cost System 754
Job Order Cost Flow 755
Accumulating Manufacturing Costs 756

LO 2: Use a job cost sheet to assign costs to work in process. 758

Raw Materials Costs 759
Factory Labor Costs 761

LO 3: Demonstrate how to determine and use the predetermined overhead rate. 763

LO 4: Prepare entries for manufacturing and service jobs completed and sold. 766

Assigning Costs to Finished Goods 766
Assigning Costs to Cost of Goods Sold 767
Summary of Job Order Cost Flows 767
Job Order Costing for Service Companies 769
Advantages and Disadvantages of Job Order Costing 770

LO 5: Distinguish between under- and overapplied manufacturing overhead. 771

Under- or Overapplied Manufacturing Overhead 772

17 Process Costing 794

The Little Guy Who Could: Jones Soda Co. 794

LO 1: Discuss the uses of a process cost system and how it compares to a job order system. 796

Uses of Process Cost Systems 796
Process Costing for Service Companies 797
Similarities and Differences Between Job Order Cost and Process Cost Systems 797

LO 2: Explain the flow of costs in a process cost system and the journal entries to assign manufacturing costs. 799

Process Cost Flow 799
Assigning Manufacturing Costs—Journal Entries 799

LO 3: Compute equivalent units. 802

Weighted-Average Method 802
Refinements on the Weighted-Average Method 803

LO 4: Complete the four steps to prepare a production cost report. 805

Compute the Physical Unit Flow (Step 1) 806
Compute the Equivalent Units of Production (Step 2) 806
Compute Unit Production Costs (Step 3) 807
Prepare a Cost Reconciliation Schedule (Step 4) 808
Preparing the Production Cost Report 808
Costing Systems—Final Comments 809

LO *5: APPENDIX 17A: Compute equivalent units using the FIFO method. 810

Equivalent Units Under FIFO 810
Comprehensive Example 811
FIFO and Weighted-Average 815

18 Activity-Based Costing 838

Precor Is on Your Side 838

LO 1: Discuss the difference between traditional costing and activity-based costing. 840

Traditional Costing Systems 840
Illustration of a Traditional Costing System 840
The Need for a New Approach 841
Activity-Based Costing 841

LO 2: Apply activity-based costing to a manufacturer. 844

Identify and Classify Activities and Assign Overhead to Cost Pools (Step 1) 844
Identify Cost Drivers (Step 2) 844
Compute Activity-Based Overhead Rates (Step 3) 845
Allocate Overhead Costs to Products (Step 4) 845
Comparing Unit Costs 846

LO 3: Explain the benefits and limitations of activity-based costing. 849

The Advantage of Multiple Cost Pools 849
The Advantage of Enhanced Cost Control 850
The Advantage of Better Management Decisions 852
Some Limitations and Knowing When to Use ABC 853

LO 4: Apply activity-based costing to service industries. 854

Traditional Costing Example 855
Activity-Based Costing Example 856

LO *5: APPENDIX 18A: Explain just-in-time (JIT) processing. 858

Objective of JIT Processing 859
Elements of JIT Processing 859
Benefits of JIT Processing 859

19 Cost-Volume-Profit 884

Don't Worry—Just Get Big: Amazon.com 884

LO 1: Explain variable, fixed, and mixed costs and the relevant range. 886

Variable Costs 886
Fixed Costs 887
Relevant Range 888
Mixed Costs 889

LO 2: Apply the high-low method to determine the components of mixed costs. 890

High-Low Method 891
Importance of Identifying Variable and Fixed Costs 893

LO 3: Prepare a CVP income statement to determine contribution margin. 894

Basic Components 894
CVP Income Statement 894

LO 4: Compute the break-even point using three approaches. 898

Mathematical Equation 898
Contribution Margin Technique 899
Graphic Presentation 900

LO 5: Determine the sales required to earn target net income and determine margin of safety. 901

Target Net Income 901
Margin of Safety 903

20 Cost-Volume-Profit Analysis: Additional Issues 922

Not Even a Flood Could Stop It: Whole Foods Market 922

LO 1: Apply basic CVP concepts. 924

Basic Concepts 924
Basic Computations 925
CVP and Changes in the Business Environment 926

LO 2: Explain the term sales mix and its effects on break-even sales. 929

Break-Even Sales in Units 929
Break-Even Sales in Dollars 931

LO 3: Determine sales mix when a company has limited resources. 933

LO 4: Indicate how operating leverage affects profitability. 935

Effect on Contribution Margin Ratio 936

Effect on Break-Even Point 936

Effect on Margin of Safety Ratio 937

Operating Leverage 937

LO *5: APPENDIX 20A: Explain the differences between absorption costing and variable costing. 939

Example Comparing Absorption Costing with Variable Costing 939

Net Income Effects 941

Decision-Making Concerns 945

Potential Advantages of Variable Costing 947

21 Incremental Analysis 972

Keeping It Clean: Method Products 972

LO 1: Describe management's decision-making process and incremental analysis. 974

Incremental Analysis Approach 974

How Incremental Analysis Works 975

Qualitative Factors 976

Relationship of Incremental Analysis and Activity-Based Costing 976

Types of Incremental Analysis 977

LO 2: Analyze the relevant costs in accepting an order at a special price. 977

LO 3: Analyze the relevant costs in a make-or-buy decision. 979

Opportunity Cost 980

LO 4: Analyze the relevant costs in determining whether to sell or process materials further. 981

Single-Product Case 982

Multiple-Product Case 982

LO 5: Analyze the relevant costs to be considered in repairing, retaining, or replacing equipment. 985

LO 6: Analyze the relevant costs in deciding whether to eliminate an unprofitable segment or product. 986

22 Pricing 1012

They've Got Your Size—and Color: Zappos.com 1012

LO 1: Compute a target cost when the market determines a product price. 1014

Target Costing 1015

LO 2: Compute a target selling price using cost-plus pricing. 1016

Cost-Plus Pricing 1016

Variable-Cost Pricing 1019

LO 3: Use time-and-material pricing to determine the cost of services provided. 1020

LO 4: Determine a transfer price using the negotiated, cost-based, and market-based approaches. 1024

Negotiated Transfer Prices 1024

Cost-Based Transfer Prices 1027

Market-Based Transfer Prices 1028

Effect of Outsourcing on Transfer Pricing 1029

Transfers Between Divisions in Different Countries 1029

LO *5: APPENDIX 22A: Determine prices using absorption-cost pricing and variable-cost pricing. 1030

Absorption-Cost Pricing 1030

Variable-Cost Pricing 1032

LO *6: APPENDIX 22B: Explain issues involved in transferring goods between divisions in different countries. 1034

23 Budgetary Planning 1056

What's in Your Cupcake?: BabyCakes NYC 1056

LO 1: State the essentials of effective budgeting and the components of the master budget. 1058

Budgeting and Accounting 1058

The Benefits of Budgeting 1058

Essentials of Effective Budgeting 1058

The Master Budget 1061

LO 2: Prepare budgets for sales, production, and direct materials. 1063

Sales Budget 1063

Production Budget 1064

Direct Materials Budget 1065

LO 3: Prepare budgets for direct labor, manufacturing overhead, and selling and administrative expenses, and a budgeted income statement. 1068

Direct Labor Budget 1068

Manufacturing Overhead Budget 1069

Selling and Administrative Expense Budget 1070

Budgeted Income Statement 1070

LO 4: Prepare a cash budget and a budgeted balance sheet. 1072

Cash Budget 1072

Budgeted Balance Sheet 1075

LO 5: Apply budgeting principles to nonmanufacturing companies. 1077

Merchandisers 1077

Service Companies 1078

Not-for-Profit Organizations 1079

24 Budgetary Control and Responsibility Accounting 1106

Pumpkin Madeleines and a Movie: Tribeca Grand Hotel 1106

LO 1: Describe budgetary control and static budget reports. 1108

Budgetary Control 1108
Static Budget Reports 1109

LO 2: Prepare flexible budget reports. 1111

Why Flexible Budgets? 1111
Developing the Flexible Budget 1114
Flexible Budget—A Case Study 1114
Flexible Budget Reports 1116

LO 3: Apply responsibility accounting to cost and profit centers. 1118

Controllable versus Noncontrollable Revenues and Costs 1120
Principles of Performance Evaluation 1120
Responsibility Reporting System 1122
Types of Responsibility Centers 1124

LO 4: Evaluate performance in investment centers. 1127

Return on Investment (ROI) 1127
Responsibility Report 1128
Judgmental Factors in ROI 1129
Improving ROI 1129

LO *5: APPENDIX 24A: Explain the difference between ROI and residual income. 1131

Residual Income Compared to ROI 1132
Residual Income Weakness 1132

25 Standard Costs and Balanced Scorecard 1158

80,000 Different Caffeinated Combinations: Starbucks 1158

LO 1: Describe standard costs. 1160

Distinguishing Between Standards and Budgets 1161
Setting Standard Costs 1161

LO 2: Determine direct materials variances. 1165

Analyzing and Reporting Variances 1165
Direct Materials Variances 1166

LO 3: Determine direct labor and total manufacturing overhead variances. 1169

Direct Labor Variances 1169
Manufacturing Overhead Variances 1171

LO 4: Prepare variance reports and balanced scorecards. 1173

Reporting Variances 1173
Income Statement Presentation of Variances 1174
Balanced Scorecard 1175

LO *5: APPENDIX 25A: Identify the features of a standard cost accounting system. 1178

Journal Entries 1178
Ledger Accounts 1180

LO *6: APPENDIX 25B: Compute overhead controllable and volume variances. 1181

Overhead Controllable Variance 1181
Overhead Volume Variance 1182

26 Planning for Capital Investments 1204

Floating Hotels: Holland America Line 1204

LO 1: Describe capital budgeting inputs and apply the cash payback technique. 1206

Cash Flow Information 1206
Illustrative Data 1207
Cash Payback 1207

LO 2: Use the net present value method. 1209

Equal Annual Cash Flows 1210
Unequal Annual Cash Flows 1211
Choosing a Discount Rate 1212
Simplifying Assumptions 1213
Comprehensive Example 1213

LO 3: Identify capital budgeting challenges and refinements. 1214

Intangible Benefits 1214
Profitability Index for Mutually Exclusive Projects 1216
Risk Analysis 1218
Post-Audit of Investment Projects 1218

LO 4: Use the internal rate of return method. 1219

Comparing Discounted Cash Flow Methods 1221

LO 5: Use the annual rate of return method. 1222

A Specimen Financial Statements: Apple Inc. A-1

B Specimen Financial Statements: PepsiCo, Inc. B-1

C Specimen Financial Statements: The Coca-Cola Company C-1

D Specimen Financial Statements: Amazon.com, Inc. D-1

E Specimen Financial Statements: Wal-Mart Stores, Inc. E-1

F Specimen Financial Statements: Louis Vuitton F-1

G Time Value of Money G-1

LO 1: Compute interest and future values. G-1

Nature of Interest G-1
Future Value of a Single Amount G-3
Future Value of an Annuity G-4

LO 2: Compute present values. G-7

Present Value Variables G-7
Present Value of a Single Amount G-7
Present Value of an Annuity G-9
Time Periods and Discounting G-11
Present Value of a Long-Term Note or Bond G-11

LO 3: Compute the present value in capital budgeting situations. G-14

LO 4: Use a financial calculator to solve time value of money problems. G-15

Present Value of a Single Sum G-16
Present Value of an Annuity G-17
Useful Applications of the Financial Calculator G-17

H Payroll Accounting* H-1

LO 1: Record the payroll for a pay period. H-1

Determining the Payroll H-1
Recording the Payroll H-5

LO 2: Record employer payroll taxes. H-7

FICA Taxes H-7
Federal Unemployment Taxes H-8
State Unemployment Taxes H-8
Recording Employer Payroll Taxes H-9
Filing and Remitting Payroll Taxes H-9

LO 3: Discuss the objectives of internal control for payroll. H-10

I Subsidiary Ledgers and Special Journals* I-1

LO 1: Describe the nature and purpose of a subsidiary ledger. I-1

Subsidiary Ledger Example I-2
Advantages of Subsidiary Ledgers I-2

LO 2: Record transactions in special journals. I-4

Sales Journal I-4
Cash Receipts Journal I-7
Purchases Journal I-11
Cash Payments Journal I-13
Effects of Special Journals on the General Journal I-16
Cyber Security: A Final Comment I-17

J Other Significant Liabilities* J-1

LO 1: Describe the accounting and disclosure requirements for contingent liabilities. J-1

Recording a Contingent Liability J-2
Disclosure of Contingent Liabilities J-3

LO 2: Discuss the accounting for lease liabilities and off-balance-sheet financing. J-3

Operating Leases J-3
Capital Leases J-4

LO 3: Discuss additional fringe benefits associated with employee compensation. J-5

Paid Absences J-5
Postretirement Benefits J-6

Acknowledgments

Financial and Managerial Accounting has benefited greatly from the input of focus group participants, manuscript reviewers, those who have sent comments by letter or e-mail, ancillary authors, and proofers. We greatly appreciate the constructive suggestions and innovative ideas of reviewers and the creativity and accuracy of the ancillary authors and checkers.

We thank Benjamin Huegel and Teresa Speck of St. Mary's University for their extensive efforts in the preparation of the homework materials related to Current Designs. We also appreciate the considerable support provided to us by the following people at Current Designs: Mike Cichanowski, Jim Brown, Diane Buswell, and Jake Greseth. We also benefited from the assistance and suggestions provided to us by Joan Van Hise in the preparation of materials related to sustainability.

We appreciate the exemplary support and commitment given to us by executive editor Michael McDonald, senior marketing manager Karolina Zarychta Honsa, customer and product development manager Christopher DeJohn, development editor Ed Brislin, associate development editor Courtney Luzzi, market solutions assistant Elizabeth Kearns, marketing assistant Anna Wilhelm, editorial supervisor Terry Ann Tatros,

editorial associate Margaret Thompson, product design manager Allie Morris, product design associate Matt Origoni, designers Maureen Eide and Kristine Carney, photo editor Mary Ann Price, indexer Steve Ingle, and Denise Showers at Aptara. All of these professionals provided innumerable services that helped the textbook take shape.

Finally, our thanks to Amy Scholz, Susan Elbe, George Hoffman, Tim Stookesberry, Douglas Reiner, Brent Gordon, Joe Heider, and Steve Smith for their support and leadership in Wiley's Global Education. We will appreciate suggestions and comments from users—instructors and students alike. You can send your thoughts and ideas about the textbook to us via email at: AccountingAuthors@yahoo.com.

Accounting in Action

The Chapter Preview describes the purpose of the chapter and highlights major topics.

CHAPTER PREVIEW The Feature Story below about **Clif Bar & Company** highlights the importance of having good financial information and knowing how to use it to make effective business decisions. Whatever your pursuits or occupation, the need for financial information is inescapable. You cannot earn a living, spend money, buy on credit, make an investment, or pay taxes without receiving, using, or dispensing financial information. Good decision-making depends on good information. The purpose of this chapter is to show you that accounting is the system used to provide useful financial information.

The Feature Story helps you picture how the chapter topic relates to the real world of accounting and business.

FEATURE STORY

Knowing the Numbers

Many students who take this course do not plan to be accountants. If you are in that group, you might be thinking, “If I’m not going to be an accountant, why do I need to know accounting?” Well, consider this quote from Harold Geneen, the former chairman of **IT&T**: “To be good at your business, you have to know the numbers—cold.” In business, accounting and financial statements are the means for communicating the numbers. If you don’t know how to read financial statements, you can’t really know your business.

Many businesses agree with this view. They see the value of their employees being able to read financial statements and understand how their actions affect the company’s financial results. For example, consider **Clif Bar & Company**. The original Clif Bar® energy bar was created in 1990 by Gary Erickson and his mother in her kitchen. Today, the company has almost 300 employees.

Clif Bar is guided by what it calls its Five Aspirations—Sustaining Our Business, Our Brands, Our People, Our Community, and the Planet. Its website documents its efforts and accomplishments in these five areas. Just a few examples include the company’s use of organic products to protect soil, water, and biodiversity; the “smart” solar array (the largest in North America), which provides nearly all the electrical needs for its 115,000-square foot building; and the incentives Clif

Bar provides to employees to reduce their personal environmental impact, such as \$6,500 toward the purchase of an efficient car or \$1,000 per year for eco-friendly improvements toward their homes.

One of the company’s proudest moments was the creation of an employee stock ownership plan (ESOP) in 2010. This plan gives its employees 20% ownership of the company (Gary and his wife Kit own the other 80%). The ESOP also resulted in Clif Bar enacting an open-book management program, including the commitment to educate all employee-owners about its finances. Armed with this basic financial knowledge, employees are more aware of the financial impact of their actions, which leads to better decisions.

Many other companies have adopted this open-book management approach. But even in companies that do not practice open-book management, employers generally assume that managers in all areas of the company are “financially literate.”

Taking this course will go a long way to making you financially literate. In this textbook, you will learn how to read and prepare financial statements, and how to use basic tools to evaluate financial results. Throughout this textbook, we attempt to increase your familiarity with financial reporting by providing numerous references, questions, and exercises that encourage you to explore the financial statements of well-known companies.

CHAPTER OUTLINE

Learning Objectives

The Chapter Outline presents the chapter's topics and subtopics, as well as practice opportunities.

1

Identify the activities and users associated with accounting.

- Three activities
- Accounting data users

DO IT!

1

Basic Concepts

2

Explain the building blocks of accounting: ethics, principles, and assumptions.

- Ethics
- GAAP
- Measurement principles
- Assumptions

DO IT!

2

Building Blocks of Accounting

3

State the accounting equation, and define its components.

- Assets
- Liabilities
- Stockholders' equity

DO IT!

3

Stockholders' Equity Effects

4

Analyze the effects of business transactions on the accounting equation.

- Transaction analysis
- Summary of transactions

DO IT!

4

Tabular Analysis

5

Describe the four financial statements and how they are prepared.

- Income statement
- Retained earnings statement
- Balance sheet
- Statement of cash flows

DO IT!

5

Financial Statement Items

Go to the **REVIEW AND PRACTICE** section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit **WILEYPLUS with ORION** for additional tutorials and practice opportunities.

Identify the activities and users associated with accounting.

Essential terms are printed in blue when they first appear, and are defined in the end-of-chapter Glossary Review.

What consistently ranks as one of the top career opportunities in business? What frequently rates among the most popular majors on campus? What was the undergraduate degree chosen by Nike founder Phil Knight, Home Depot co-founder Arthur Blank, former acting director of the Federal Bureau of Investigation (FBI) Thomas Pickard, and numerous members of Congress? Accounting.¹ Why did these people choose accounting? They wanted to understand what was happening financially to their organizations. Accounting is the financial information system that provides these insights. In short, to understand your organization, you have to know the numbers.

Accounting consists of three basic activities—it **identifies**, **records**, and **communicates** the economic events of an organization to interested users. Let's take a closer look at these three activities.

Three Activities

As a starting point to the accounting process, a company **identifies** the **economic events relevant to its business**. Examples of economic events are the sale of snack chips by PepsiCo, the provision of telephone services by AT&T, and the payment of wages by Facebook.

Once a company like PepsiCo identifies economic events, it **records** those events in order to provide a history of its financial activities. Recording consists of keeping a **systematic, chronological diary of events**, measured in dollars and cents. In recording, PepsiCo also classifies and summarizes economic events.

Finally, PepsiCo **communicates** the collected information to interested users by means of **accounting reports**. The most common of these reports are called **financial statements**. To make the reported financial information meaningful, PepsiCo reports the recorded data in a standardized way. It accumulates information resulting from similar transactions. For example, PepsiCo accumulates all sales transactions over a certain period of time and reports the data as one amount in the company's financial statements. Such data are said to be reported **in the aggregate**. By presenting the recorded data in the aggregate, the accounting process simplifies a multitude of transactions and makes a series of activities understandable and meaningful.

A vital element in communicating economic events is the accountant's ability to **analyze and interpret** the reported information. Analysis involves use of ratios, percentages, graphs, and charts to highlight significant financial trends and relationships. Interpretation involves **explaining the uses, meaning, and limitations of reported data**. Appendices A–E show the financial statements of Apple Inc., PepsiCo, Inc., The Coca-Cola Company, Amazon.com, Inc., and Wal-Mart Stores, Inc., respectively. (In addition, in the *A Look at IFRS* section at the end of each chapter, the French company Louis Vuitton Moët Hennessy is analyzed.) We refer to these statements at various places throughout the textbook. At this point, these financial statements probably strike you as complex and confusing. By the end of this course, you'll be surprised at your ability to understand, analyze, and interpret them.

Illustration 1-1 summarizes the activities of the accounting process.

¹The appendix to this chapter describes job opportunities for accounting majors and explains why accounting is such a popular major.

You should understand that the accounting process **includes** the bookkeeping function. **Bookkeeping** usually involves **only** the recording of economic events. It is therefore just one part of the accounting process. In total, accounting involves **the entire process of identifying, recording, and communicating economic events.**²

Illustration 1-1

The activities of the accounting process

Who Uses Accounting Data

The financial information that users need depends upon the kinds of decisions they make. There are two broad groups of users of financial information: internal users and external users.

INTERNAL USERS

Internal users of accounting information are managers who plan, organize, and run the business. These include marketing managers, production supervisors, finance directors, and company officers. In running a business, internal users must answer many important questions, as shown in Illustration 1-2.

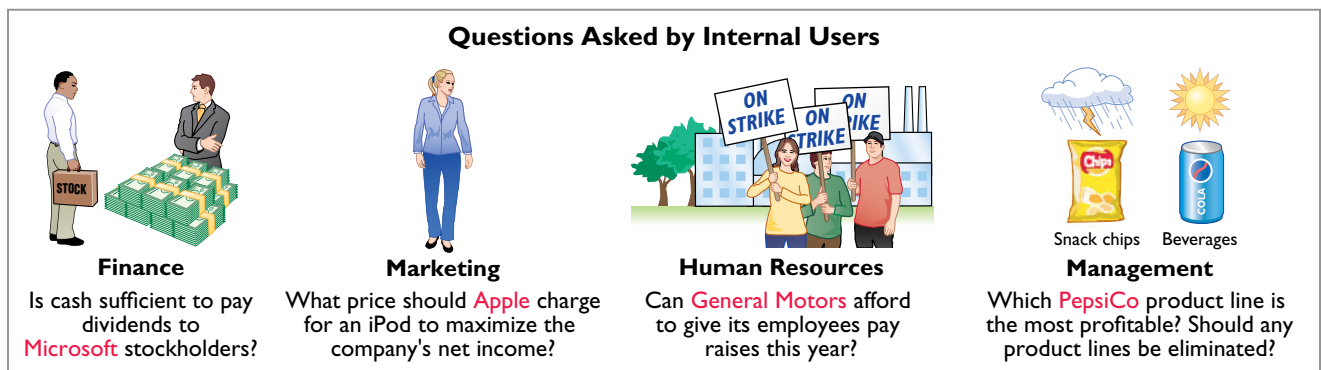

Illustration 1-2

Questions that internal users ask

²The origins of accounting are generally attributed to the work of Luca Pacioli, an Italian Renaissance mathematician. Pacioli was a close friend and tutor to Leonardo da Vinci and a contemporary of Christopher Columbus. In his 1494 text *Summa de Arithmetica, Geometria, Proportione et Proportionalite*, Pacioli described a system to ensure that financial information was recorded efficiently and accurately.

To answer these and other questions, internal users need detailed information on a timely basis. **Managerial accounting** provides internal reports to help users make decisions about their companies. Examples are financial comparisons of operating alternatives, projections of income from new sales campaigns, and forecasts of cash needs for the next year.

Accounting Across the Organization **Rhino Foods**

© Agnieszka Pastuszek-Maksim/iStockphoto

The Scoop on Accounting

Accounting can serve as a useful recruiting tool even for the human resources department. **Rhino Foods**, located in Burlington, Vermont, is a manufacturer of specialty ice cream. Its corporate website includes the following:

“Wouldn’t it be great to work where you were part of a team? Where your input and hard work made a

difference? Where you weren’t kept in the dark about what management was thinking? . . . Well—it’s not a dream! It’s the way we do business . . . Rhino Foods believes in family, honesty and open communication—we really care about and appreciate our employees—and it shows. Operating results are posted and monthly group meetings inform all employees about what’s happening in the Company. Employees also share in the Company’s profits, in addition to having an excellent comprehensive benefits package.”

Source: www.rhinofoods.com/workforus/workforus.html.

What are the benefits to the company and its employees of making the financial statements available to all employees? (Go to **WileyPLUS** for this answer and additional questions.)

Accounting Across the Organization boxes demonstrate applications of accounting information in various business functions.

EXTERNAL USERS

External users are individuals and organizations outside a company who want financial information about the company. The two most common types of external users are investors and creditors. **Investors** (owners) use accounting information to decide whether to buy, hold, or sell ownership shares of a company. **Creditors** (such as suppliers and bankers) use accounting information to evaluate the risks of granting credit or lending money. Illustration 1-3 shows some questions that investors and creditors may ask.

Questions Asked by External Users

Investors

Is **General Electric** earning satisfactory income?

Investors

How does **Disney** compare in size and profitability with **Time Warner**?

Creditors

Will **United Airlines** be able to pay its debts as they come due?

Illustration 1-3

Questions that external users ask

Financial accounting answers these questions. It provides economic and financial information for investors, creditors, and other external users. The information needs of external users vary considerably. **Taxing authorities**, such as the Internal Revenue Service, want to know whether the company complies with tax laws. **Regulatory agencies**, such as the Securities and Exchange

Commission or the Federal Trade Commission, want to know whether the company is operating within prescribed rules. **Customers** are interested in whether a company like **Telsa** will continue to honor product warranties and support its product lines. **Labor unions** such as the **Major League Baseball Players Association** want to know whether the owners have the ability to pay increased wages and benefits.

*The **DO IT!** exercises ask you to put newly acquired knowledge to work. They outline the **Action Plan** necessary to complete the exercise, and they show a **Solution**.*

DO IT!**1****Basic Concepts**

Indicate whether each of the five statements presented below is true or false.

1. The three steps in the accounting process are identification, recording, and communication.
2. Bookkeeping encompasses all steps in the accounting process.
3. Accountants prepare, but do not interpret, financial reports.
4. The two most common types of external users are investors and company officers.
5. Managerial accounting activities focus on reports for internal users.

Solution

1. True. 2. False. Bookkeeping involves only the recording step. 3. False. Accountants analyze and interpret information in reports as part of the communication step. 4. False. The two most common types of external users are investors and creditors. 5. True.

Related exercise material: **E1-1, E1-2, and DO IT! 1-1.**

Action Plan

- ✓ Review the basic concepts discussed.
- ✓ Develop an understanding of the key terms used.

LEARNING OBJECTIVE

2**Explain the building blocks of accounting: ethics, principles, and assumptions.**

A doctor follows certain protocols in treating a patient's illness. An architect follows certain structural guidelines in designing a building. Similarly, an accountant follows certain standards in reporting financial information. These standards are based on specific principles and assumptions. For these standards to work, however, a fundamental business concept must be present—ethical behavior.

Ethics in Financial Reporting

People won't gamble in a casino if they think it is "rigged." Similarly, people won't play the stock market if they think stock prices are rigged. In recent years, the financial press has been full of articles about financial scandals at **Enron**, **WorldCom**, **HealthSouth**, **AIG**, and other companies. As the scandals came to light, mistrust of financial reporting in general grew. One article in the *Wall Street Journal* noted that "repeated disclosures about questionable accounting practices have bruised investors' faith in the reliability of earnings reports, which in turn has sent stock prices tumbling." Imagine trying to carry on a business or invest money if you could not depend on the financial statements to be honestly prepared. Information would have no credibility. There is no doubt that a sound, well-functioning economy depends on accurate and dependable financial reporting.

United States regulators and lawmakers were very concerned that the economy would suffer if investors lost confidence in corporate accounting because of unethical financial reporting. In response, Congress passed the **Sarbanes-Oxley Act (SOX)**. Its intent is to reduce unethical corporate behavior and decrease the likelihood of future corporate scandals. As a result of SOX, top management must now certify the accuracy of financial information. In addition, penalties for

ETHICS NOTE

Circus-founder P.T. Barnum is alleged to have said, "Trust everyone, but cut the deck." What Sarbanes-Oxley does is to provide measures that (like cutting the deck of playing cards) help ensure that fraud will not occur.

Ethics Notes help sensitize you to some of the ethical issues in accounting.

fraudulent financial activity are much more severe. Also, SOX increased the independence requirements of the outside auditors who review the accuracy of corporate financial statements and increased the oversight role of boards of directors.

The standards of conduct by which actions are judged as right or wrong, honest or dishonest, fair or not fair, are **ethics**. Effective financial reporting depends on sound ethical behavior. To sensitize you to ethical situations in business and to give you practice at solving ethical dilemmas, we address ethics in a number of ways in this textbook:

1. A number of the *Feature Stories* and other parts of the textbook discuss the central importance of ethical behavior to financial reporting.
2. *Ethics Insight* boxes and marginal *Ethics Notes* highlight ethics situations and issues in actual business settings.
3. Many of the *People, Planet, and Profit Insight* boxes focus on ethical issues that companies face in measuring and reporting social and environmental issues.
4. At the end of the chapter, an *Ethics Case* simulates a business situation and asks you to put yourself in the position of a decision-maker in that case.

When analyzing these various ethics cases, as well as experiences in your own life, it is useful to apply the three steps outlined in Illustration 1-4.

1. Recognize an ethical situation and the ethical issues involved.
Use your personal ethics to identify ethical situations and issues. Some businesses and professional organizations provide written codes of ethics for guidance in some business situations.

2. Identify and analyze the principal elements in the situation.
Identify the **stakeholders**—persons or groups who may be harmed or benefited. Ask the question: What are the responsibilities and obligations of the parties involved?

3. Identify the alternatives, and weigh the impact of each alternative on various stakeholders.
Select the most ethical alternative, considering all the consequences. Sometimes there will be one right answer. Other situations involve more than one right solution; these situations require an evaluation of each and a selection of the best alternative.

Illustration 1-4

Steps in analyzing ethics cases and situations

Insight boxes provide examples of business situations from various perspectives—ethics, investor, international, and corporate social responsibility. Guideline answers to the critical thinking questions are available in WileyPLUS and at www.wiley.com/college/weygandt. Additional questions are offered in WileyPLUS.

Ethics Insight Dewey & LeBoeuf LLP

© Alliance/Shutterstock

I Felt the Pressure—Would You?

"I felt the pressure." That's what some of the employees of the now-defunct law firm of **Dewey & LeBoeuf LLP** indicated when they helped to overstate revenue and use accounting tricks to hide losses and cover up cash shortages. These employees worked for the former finance director and former chief financial officer (CFO) of the firm. Here are some of their comments:

- "I was instructed by the CFO to create invoices, knowing they would not be sent to clients. When I created these invoices, I knew that it was inappropriate."

- "I intentionally gave the auditors incorrect information in the course of the audit."

What happened here is that a small group of lower-level employees over a period of years carried out the instructions of their bosses. Their bosses, however, seemed to have no concern as evidenced by various e-mails with one another in which they referred to their financial manipulations as accounting tricks, cooking the books, and fake income.

Source: Ashby Jones, "Guilty Pleas of Dewey Staff Detail the Alleged Fraud," *Wall Street Journal* (March 28, 2014).

Why did these employees lie, and what do you believe should be their penalty for these lies? (Go to WileyPLUS for this answer and additional questions.)

Generally Accepted Accounting Principles

The accounting profession has developed standards that are generally accepted and universally practiced. This common set of standards is called **generally accepted accounting principles (GAAP)**. These standards indicate how to report economic events.

The primary accounting standard-setting body in the United States is the **Financial Accounting Standards Board (FASB)**. The **Securities and Exchange Commission (SEC)** is the agency of the U.S. government that oversees U.S. financial markets and accounting standard-setting bodies. The SEC relies on the FASB to develop accounting standards, which public companies must follow. Many countries outside of the United States have adopted the accounting standards issued by the **International Accounting Standards Board (IASB)**. These standards are called **International Financial Reporting Standards (IFRS)**.

As markets become more global, it is often desirable to compare the results of companies from different countries that report using different accounting standards. In order to increase comparability, in recent years the two standard-setting bodies have made efforts to reduce the differences between U.S. GAAP and IFRS. This process is referred to as **convergence**. As a result of these convergence efforts, it is likely that someday there will be a single set of high-quality accounting standards that are used by companies around the world. Because convergence is such an important issue, we highlight any major differences between GAAP and IFRS in *International Notes* (as shown in the margin here) and provide a more in-depth discussion in the *A Look at IFRS* section at the end of each chapter.

Measurement Principles

GAAP generally uses one of two measurement principles, the historical cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation. **Relevance** means that financial information is capable of making a difference in a decision. **Faithful representation** means that the numbers and descriptions match what really existed or happened—they are factual.

HISTORICAL COST PRINCIPLE

The **historical cost principle** (or cost principle) dictates that companies record assets at their cost. This is true not only at the time the asset is purchased, but also over the time the asset is held. For example, if **Best Buy** purchases land for \$360,000, the company initially reports it in its accounting records at \$360,000. But what does Best Buy do if, by the end of the next year, the fair value of the land has increased to \$400,000? Under the historical cost principle, it continues to report the land at \$360,000.

FAIR VALUE PRINCIPLE

The **fair value principle** states that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). Fair value information may be more useful than historical cost for certain types of assets and liabilities. For example, certain investment securities are reported at fair value because market price information is usually readily available for these types of assets. In determining which measurement principle to use, companies weigh the factual nature of cost figures versus the relevance of fair value. In general, most companies choose to use cost. Only in situations where assets are actively traded, such as investment securities, do companies apply the fair value principle extensively.

Assumptions

Assumptions provide a foundation for the accounting process. Two main assumptions are the **monetary unit assumption** and the **economic entity assumption**.

International Note

Over 100 countries use International Financial Reporting Standards (called IFRS). For example, all companies in the European Union follow international standards. The differences between U.S. and international standards are not generally significant.

International Notes highlight differences between U.S. and international accounting standards.

Helpful Hint

Relevance and faithful representation are two primary qualities that make accounting information useful for decision-making.

Helpful Hints further clarify concepts being discussed.

MONETARY UNIT ASSUMPTION

The **monetary unit assumption** requires that companies include in the accounting records only transaction data that can be expressed in money terms. This assumption enables accounting to quantify (measure) economic events. The monetary unit assumption is vital to applying the historical cost principle.

This assumption prevents the inclusion of some relevant information in the accounting records. For example, the health of a company's owner, the quality of service, and the morale of employees are not included. The reason: Companies cannot quantify this information in money terms. Though this information is important, companies record only events that can be measured in money.

ECONOMIC ENTITY ASSUMPTION

An economic entity can be any organization or unit in society. It may be a company (such as **Crocs, Inc.**), a governmental unit (the state of Ohio), a municipality (Seattle), a school district (St. Louis District 48), or a church (Southern Baptist). The **economic entity assumption** requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities. To illustrate, Sally Rider, owner of Sally's Boutique, must keep her personal living costs separate from the expenses of her business. Similarly, **J. Crew** and **Gap Inc.** are segregated into separate economic entities for accounting purposes.

PROPRIETORSHIP A business owned by one person is generally a **proprietorship**. The owner is often the manager/operator of the business. Small service-type businesses (plumbing companies, beauty salons, and auto repair shops), farms, and small retail stores (antique shops, clothing stores, and used-book stores) are often proprietorships. **Usually, only a relatively small amount of money (capital) is necessary to start in business as a proprietorship. The owner (proprietor) receives any profits, suffers any losses, and is personally liable for all debts of the business.** There is no legal distinction between the business as an economic unit and the owner, but the accounting records of the business activities are kept separate from the personal records and activities of the owner.

PARTNERSHIP A business owned by two or more persons associated as partners is a **partnership**. In most respects a partnership is like a proprietorship except that more than one owner is involved. Typically, a partnership agreement (written or oral) sets forth such terms as initial investment, duties of each partner, division of net income (or net loss), and settlement to be made upon death or withdrawal of a partner. Each partner generally has unlimited personal liability for the debts of the partnership. **Like a proprietorship, for accounting purposes the partnership transactions must be kept separate from the personal activities of the partners.** Partnerships are often used to organize retail and service-type businesses, including professional practices (lawyers, doctors, architects, and certified public accountants).

CORPORATION A business organized as a separate legal entity under state corporation law and having ownership divided into transferable shares of stock is a **corporation**. The holders of the shares (stockholders) **enjoy limited liability**; that is, they are not personally liable for the debts of the corporate entity. Stockholders **may transfer all or part of their ownership shares to other investors at any time** (i.e., sell their shares). The ease with which ownership can change adds to the attractiveness of investing in a corporation. Because ownership can be transferred without dissolving the corporation, the corporation **enjoys an unlimited life**.

Although the combined number of proprietorships and partnerships in the United States is more than five times the number of corporations, the revenue

ETHICS NOTE

The importance of the economic entity assumption is illustrated by scandals involving **Adelphia**. In this case, senior company employees entered into transactions that blurred the line between the employees' financial interests and those of the company. For example, Adelphia guaranteed over \$2 billion of loans to the founding family.

produced by corporations is eight times greater. Most of the largest companies in the United States—for example, **ExxonMobil**, **Ford**, **Wal-Mart Stores, Inc.**, **Citigroup**, and **Apple**—are corporations.

Spinning the Career Wheel

How will the study of accounting help you? A working knowledge of accounting is desirable for virtually every field of business. Some examples of how accounting is used in business careers include:

General management: Managers at **Ford Motors**, **Massachusetts General Hospital**, California State University—Fullerton, a **McDonald's** franchise, and a **Trek**

bike shop all need to understand accounting data in order to make wise business decisions.

Marketing: Marketing specialists at **Procter & Gamble** must be sensitive to costs and benefits, which accounting helps them quantify and understand. Making a sale is meaningless unless it is a profitable sale.

Finance: Do you want to be a banker for **Citicorp**, an investment analyst for **Goldman Sachs**, or a stock broker for **Merrill Lynch**? These fields rely heavily on accounting knowledge to analyze financial statements. In fact, it is difficult to get a good job in a finance function without two or three courses in accounting.

Real estate: Are you interested in being a real estate broker for **Prudential Real Estate**? Because a third party—the bank—is almost always involved in financing a real estate transaction, brokers must understand the numbers involved: Can the buyer afford to make the payments to the bank? Does the cash flow from an industrial property justify the purchase price? What are the tax benefits of the purchase?

How might accounting help you? (Go to [WileyPLUS](#) for this answer and additional questions)

DO IT!

2

Building Blocks of Accounting

Indicate whether each of the five statements presented below is true or false. If false, indicate how to correct the statement.

1. Congress passed the Sarbanes-Oxley Act to reduce unethical behavior and decrease the likelihood of future corporate scandals.
2. The primary accounting standard-setting body in the United States is the Financial Accounting Standards Board (FASB).
3. The historical cost principle dictates that companies record assets at their cost. In later periods, however, the fair value of the asset must be used if fair value is higher than its cost.
4. Relevance means that financial information matches what really happened; the information is factual.
5. A business owner's personal expenses must be separated from expenses of the business to comply with accounting's economic entity assumption.

Solution

1. True. 2. True. 3. False. The historical cost principle dictates that companies record assets at their cost. Under the historical cost principle, the company must also use cost in later periods. 4. False. Faithful representation means that financial information matches what really happened; the information is factual. 5. True.

Related exercise material: **E1-3**, **E1-4**, and **DO IT!** 1-2.

Action Plan

- ✓ Review the discussion of ethics and financial reporting standards.
- ✓ Develop an understanding of the key terms used.

State the accounting equation, and define its components.

The two basic elements of a business are what it owns and what it owes. **Assets** are the resources a business owns. For example, **Google** has total assets of approximately \$93.8 billion. Liabilities and stockholders' equity are the rights or claims against these resources. Thus, Google has \$93.8 billion of claims against its \$93.8 billion of assets. Claims of those to whom the company owes money (creditors) are called **liabilities**. Claims of owners are called **stockholders' equity**. Google has liabilities of \$22.1 billion and stockholders' equity of \$71.7 billion.

We can express the relationship of assets, liabilities, and stockholders' equity as an equation, as shown in Illustration 1-5.

Illustration 1-5

The basic accounting equation

Assets	=	Liabilities	+	Stockholders' Equity
--------	---	-------------	---	----------------------

This relationship is the **basic accounting equation**. Assets must equal the sum of liabilities and stockholders' equity. Liabilities appear before stockholders' equity in the basic accounting equation because they are paid first if a business is liquidated.

The accounting equation applies to all **economic entities** regardless of size, nature of business, or form of business organization. It applies to a small proprietorship such as a corner grocery store as well as to a giant corporation such as **PepsiCo**. The equation provides the **underlying framework** for recording and summarizing economic events.

Let's look in more detail at the categories in the basic accounting equation.

Assets

As noted above, **assets** are resources a business owns. The business uses its assets in carrying out such activities as production and sales. The common characteristic possessed by all assets is **the capacity to provide future services or benefits**. In a business, that service potential or future economic benefit eventually results in cash inflows (receipts). For example, consider Campus Pizza, a local restaurant. It owns a delivery truck that provides economic benefits from delivering pizzas. Other assets of Campus Pizza are tables, chairs, jukebox, cash register, oven, tableware, and, of course, cash.

Liabilities

Liabilities are claims against assets—that is, existing debts and obligations. Businesses of all sizes usually borrow money and purchase merchandise on credit. These economic activities result in payables of various sorts:

- Campus Pizza, for instance, purchases cheese, sausage, flour, and beverages on credit from suppliers. These obligations are called **accounts payable**.
- Campus Pizza also has a **note payable** to First National Bank for the money borrowed to purchase the delivery truck.
- Campus Pizza may also have **salaries and wages payable** to employees and **sales and real estate taxes payable** to the local government.

All of these persons or entities to whom Campus Pizza owes money are its **creditors**.

Creditors may legally force the liquidation of a business that does not pay its debts. In that case, the law requires that creditor claims be paid **before** ownership claims.

Stockholders' Equity

The ownership claim on a corporation's total assets is **stockholders' equity**. It is equal to total assets minus total liabilities. Here is why: The assets of a business are

Helpful Hint

In some situations, accountants use the term *owner's equity* and in others *owners' equity*. *Owner's* refers to one owner (the case with a sole proprietorship), and *owners'* refers to multiple owners (the case with partnerships). The term *stockholders' equity* refers to ownership in corporations.

claimed by either creditors or stockholders. To find out what belongs to stockholders, we subtract creditors' claims (the liabilities) from the assets. The remainder is the stockholders' claim on the assets—stockholders' equity. It is often referred to as **residual equity**—that is, the equity “left over” after creditors' claims are satisfied.

The stockholders' equity section of a corporation's balance sheet generally consists of (1) common stock and (2) retained earnings.

COMMON STOCK

A corporation may obtain funds by selling shares of stock to investors. **Common stock** is the term used to describe the total amount paid in by stockholders for the shares they purchase.

RETAINED EARNINGS

The **retained earnings** section of the balance sheet is determined by three items: revenues, expenses, and dividends.

REVENUES **Revenues are the gross increases in stockholders' equity resulting from business activities entered into for the purpose of earning income.** Generally, revenues result from selling merchandise, performing services, renting out property, and lending money.

Revenues usually result in an increase in an asset. They may arise from different sources and are called various names depending on the nature of the business. Campus Pizza, for instance, has two categories of sales revenues—pizza sales and beverage sales. Other titles for and sources of revenue common to many businesses are sales, fees, services, commissions, interest, dividends, royalties, and rent.

EXPENSES **Expenses are the cost of assets consumed or services used in the process of earning revenue. They are decreases in stockholders' equity that result from operating the business.** Like revenues, expenses take many forms and are called various names depending on the type of asset consumed or service used. For example, Campus Pizza recognizes the following types of expenses: cost of ingredients (flour, cheese, tomato paste, meat, mushrooms, etc.); cost of beverages; wages expense; utilities expense (electric, gas, and water expense); telephone expense; delivery expense (gasoline, repairs, licenses, etc.); supplies expense (napkins, detergents, aprons, etc.); rent expense; interest expense; and property tax expense.

DIVIDENDS Net income represents an increase in net assets which are then available to distribute to stockholders. The distribution of cash or other assets to stockholders is called a **dividend**. Dividends reduce retained earnings. However, dividends are **not an expense**. A corporation first determines its revenues and expenses and then computes net income or net loss. If it has net income and decides it has no better use for that income, a corporation may decide to distribute a dividend to its owners (the stockholders).

In summary, the principal sources (increases) of stockholders' equity are investments by stockholders and revenues from business operations. In contrast, reductions (decreases) in stockholders' equity result from expenses and dividends. These relationships are shown in Illustration 1-6.

Helpful Hint

The effect of revenues is positive—an increase in stockholders' equity coupled with an increase in assets or a decrease in liabilities.

Helpful Hint

The effect of expenses is negative—a decrease in stockholders' equity coupled with a decrease in assets or an increase in liabilities.

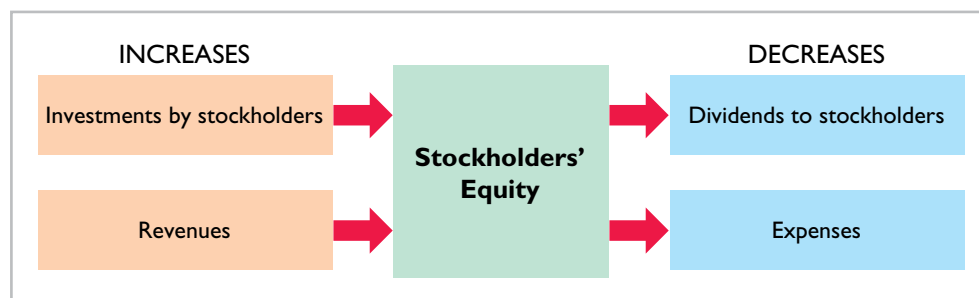

Illustration 1-6

Increases and decreases in stockholders' equity

DO IT!**3****Stockholders' Equity Effects****Action Plan**

- ✓ Understand the sources of revenue.
- ✓ Understand what causes expenses.
- ✓ Review the rules for changes in stockholders' equity.
- ✓ Recognize that dividends are distributions of cash or other assets to stockholders.

Classify the following items as issuance of stock (I), dividends (D), revenues (R), or expenses (E). Then indicate whether each item increases or decreases stockholders' equity.

- (1) Rent Expense (3) Dividends
 (2) Service Revenue (4) Salaries and Wages Expense

Solution

1. Rent Expense is an expense (E); it decreases stockholders' equity. 2. Service Revenue is a revenue (R); it increases stockholders' equity. 3. Dividends is a distribution to stockholders (D); it decreases stockholders' equity. 4. Salaries and Wages Expense is an expense (E); it decreases stockholders' equity.

LEARNING OBJECTIVE**4****Analyze the effects of business transactions on the accounting equation.**

Transactions (business transactions) are a business's economic events recorded by accountants. Transactions may be external or internal. **External transactions** involve economic events between the company and some outside enterprise. For example, Campus Pizza's purchase of cooking equipment from a supplier, payment of monthly rent to the landlord, and sale of pizzas to customers are external transactions. **Internal transactions** are economic events that occur entirely within one company. The use of cooking and cleaning supplies are internal transactions for Campus Pizza.

Companies carry on many activities that do not represent business transactions. Examples are hiring employees, responding to e-mails, talking with customers, and placing merchandise orders. Some of these activities may lead to business transactions: Employees will earn wages, and suppliers will deliver ordered merchandise. The company must analyze each event to find out if it affects the components of the accounting equation. If it does, the company will record the transaction. Illustration 1-7 demonstrates the transaction-identification process.

Illustration 1-7

Transaction-identification process

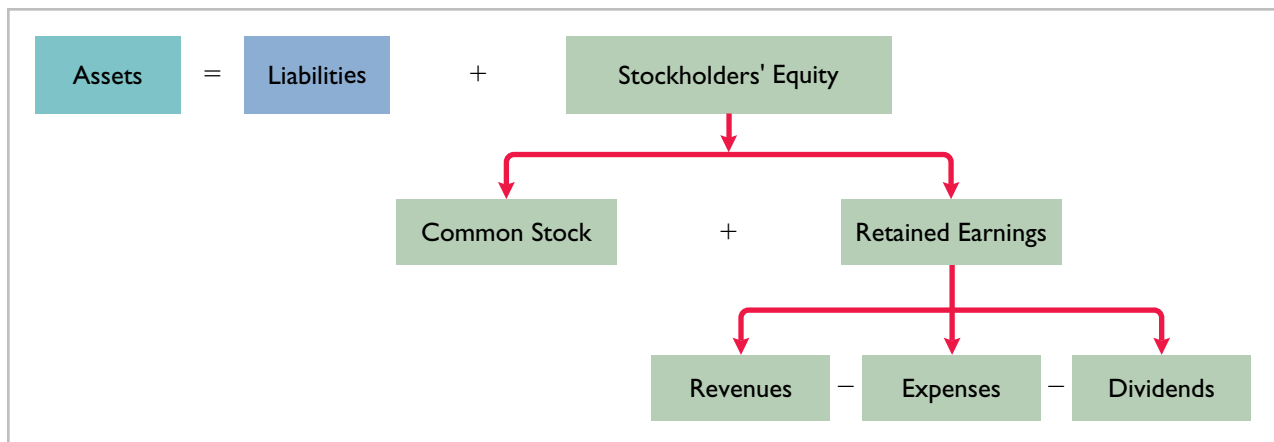

Each transaction must have a dual effect on the accounting equation. For example, if an asset is increased, there must be a corresponding (1) decrease in another asset, (2) increase in a specific liability, or (3) increase in stockholders' equity.

Two or more items could be affected. For example, as one asset is increased \$10,000, another asset could decrease \$6,000 and a liability could increase \$4,000. Any change in a liability or ownership claim is subject to similar analysis.

Transaction Analysis

To demonstrate how to analyze transactions in terms of the accounting equation, we will review the business activities of Softbyte Inc., a smartphone app development business, during its first month of operations. As part of this analysis, we will expand the basic accounting equation. This will allow us to better illustrate the impact of transactions on stockholders' equity. Recall that stockholders' equity is comprised of two parts: common stock and retained earnings. Common stock is affected when the company issues new shares of stock in exchange for cash. Retained earnings is affected when the company earns revenue, incurs expenses, or pays dividends. Illustration 1-8 shows the **expanded accounting equation**.

Illustration 1-8
Expanded accounting equation

If you are tempted to skip ahead after you've read a few of the following transaction analyses, don't do it. Each has something unique to teach, something you'll need later. (We assure you that we've kept them to the minimum needed!)

TRANSACTION 1. INVESTMENT BY STOCKHOLDERS Ray and Barbara Neal start a smartphone app development company that they incorporate as Softbyte Inc. On September 1, 2017, they invest \$15,000 cash in the business in exchange for \$15,000 of common stock. The common stock indicates the ownership interest that the Neals have in Softbyte Inc. This transaction results in an equal increase in both assets and stockholders' equity.

Helpful Hint

Study these transactions until you are sure you understand them. They are not difficult, but understanding them is important to your success in this course. The ability to analyze transactions in terms of the basic accounting equation is essential in accounting.

Basic Analysis	The asset Cash increases \$15,000, and stockholders' equity (identified as Common Stock) increases \$15,000.
----------------	--

Equation Analysis	<u>Assets</u> = <u>Liabilities</u> + <u>Stockholders' Equity</u>
	Cash = Common Stock
	(1) +\$15,000 = +\$15,000 Issued Stock

Observe that the equality of the basic equation has been maintained. Note also that the source of the increase in stockholders' equity (in this case, issued stock) is indicated. Why does this matter? Because investments by stockholders do not represent revenues, and they are excluded in determining net income. Therefore, it is necessary to make clear that the increase is an investment rather than revenue from operations. Additional investments (i.e., investments made by stockholders after the corporation has been initially formed) have the same effect on stockholders' equity as the initial investment.

TRANSACTION 2. PURCHASE OF EQUIPMENT FOR CASH Softbyte Inc. purchases computer equipment for \$7,000 cash. This transaction results in an equal increase and decrease in total assets, though the composition of assets changes.

Basic Analysis	The asset Cash decreases \$7,000, and the asset Equipment increases \$7,000.
----------------	--

Equation Analysis	<u>Assets</u> = <u>Liabilities</u> + <u>Stockholders' Equity</u>
	Cash + Equipment = Common Stock
	\$15,000 = \$15,000
	(2) -7,000 + +7,000
	\$ 8,000 + \$ 7,000 = \$15,000

Observe that total assets are still \$15,000. Common stock also remains at \$15,000, the amount of the original investment.

TRANSACTION 3. PURCHASE OF SUPPLIES ON CREDIT Softbyte Inc. purchases for \$1,600 from Mobile Solutions headsets and other computer accessories expected to last several months. Mobile Solutions agrees to allow Softbyte to pay this bill in October. This transaction is a purchase on account (a credit purchase). Assets increase because of the expected future benefits of using the headsets and computer accessories, and liabilities increase by the amount due Mobile Solutions.

Basic Analysis	The asset Supplies increases \$1,600, and the liability Accounts Payable increases \$1,600.
----------------	---

Equation Analysis	<u>Assets</u> = <u>Liabilities</u> + <u>Stockholders' Equity</u>
	Cash + Supplies + Equipment = Accounts Payable + Common Stock
	\$8,000 = \$15,000
	(3) +\$1,600
	\$8,000 + \$ 1,600 + \$ 7,000 = \$ 1,600 + \$15,000
	\$16,600 = \$16,600

Total assets are now \$16,600. This total is matched by a \$1,600 creditor's claim and a \$15,000 ownership claim.

TRANSACTION 4. SERVICES PERFORMED FOR CASH Softbyte Inc. receives \$1,200 cash from customers for app development services it has performed. This transaction represents Softbyte's principal revenue-producing activity. Recall that **revenue increases stockholders' equity**.

Basic Analysis	The asset Cash increases \$1,200, and stockholders' equity increases \$1,200 due to Service Revenue.														
Equation Analysis	Assets			=	Liabilities		+	Stockholders' Equity							
	Cash	+	Supplies	+	Equipment	=	Accounts Payable	+	Common Stock	+	Retained Earnings				
	\$8,000		\$1,600		\$7,000		\$1,600		\$15,000		Rev.	-	Exp.	-	Div.
	(4)		+1,200								+1,200				Service Revenue
		\$9,200	+	\$1,600	+	\$7,000	=	\$1,600	+	\$15,000	+	\$1,200			
	\$17,800						\$17,800								

The two sides of the equation balance at \$17,800. Service Revenue is included in determining Softbyte's net income.

Note that we do not have room to give details for each individual revenue and expense account in this illustration. Thus, revenues (and expenses when we get to them) are summarized under one column heading for Revenues and one for Expenses. However, it is important to keep track of the category (account) titles affected (e.g., Service Revenue) as they will be needed when we prepare financial statements later in the chapter.

TRANSACTION 5. PURCHASE OF ADVERTISING ON CREDIT Softbyte Inc. receives a bill for \$250 from the *Daily News* for advertising on its online website but postpones payment until a later date. This transaction results in an increase in liabilities and a decrease in stockholders' equity.

Basic Analysis	The liability Accounts Payable increases \$250, and stockholders' equity decreases \$250 due to Advertising Expense.															
Equation Analysis	Assets			=	Liabilities		+	Stockholders' Equity								
	Cash	+	Supplies	+	Equipment	=	Accounts Payable	+	Common Stock	+	Retained Earnings					
	\$9,200		\$1,600		\$7,000		\$1,600		\$15,000		\$1,200	Rev.	-	Exp.	-	Div.
	(5)						+250				-\$250				Advertising Expense	
		\$9,200	+	\$1,600	+	\$7,000	=	\$1,850	+	\$15,000	+	\$1,200	-	\$250		
	\$17,800						\$17,800									

The two sides of the equation still balance at \$17,800. Retained Earnings decreases when Softbyte incurs the expense. Expenses do not have to be paid in cash at the time they are incurred. When Softbyte pays at a later date, the liability Accounts Payable will decrease and the asset Cash will decrease (see Transaction 8). The cost of advertising is an expense (rather than an asset) because Softbyte has used the benefits. Advertising Expense is included in determining net income.

TRANSACTION 6. SERVICES PERFORMED FOR CASH AND CREDIT Softbyte Inc. performs \$3,500 of app development services for customers. The company receives cash of \$1,500 from customers, and it bills the balance of \$2,000 on account. This transaction results in an equal increase in assets and stockholders' equity.

Basic
Analysis

Three specific items are affected: The asset Cash increases \$1,500, the asset Accounts Receivable increases \$2,000, and stockholders' equity increases \$3,500 due to Service Revenue.

Equation
Analysis

Assets				=	Liabilities	+	Stockholders' Equity							
Cash	Accounts Receivable	Supplies	Equipment	=	Accounts Payable	+	Common Stock	Retained Earnings						
								Rev.	- Exp.	- Div.				
\$ 9,200		\$1,600	\$7,000	=	\$1,850	+	\$15,000	\$1,200	\$250					
(6) +1,500	+2,000							+3,500		Service Revenue				
\$10,700	+	\$2,000	+	\$1,600	+	\$7,000	=	\$1,850	+	\$15,000	+	\$4,700	-	\$250
\$21,300					\$21,300									

Softbyte recognizes \$3,500 in revenues when it performs the service. In exchange for this service, it received \$1,500 in Cash and Accounts Receivable of \$2,000. This Accounts Receivable represents customers' promises to pay \$2,000 to Softbyte in the future. When it later receives collections on account, Softbyte will increase Cash and will decrease Accounts Receivable (see Transaction 9).

TRANSACTION 7. PAYMENT OF EXPENSES Softbyte Inc. pays the following expenses in cash for September: office rent \$600, salaries and wages of employees \$900, and utilities \$200. These payments result in an equal decrease in assets and stockholders' equity.

Basic
Analysis

The asset Cash decreases \$1,700, and stockholders' equity decreases \$1,700 due to the following expenses: Rent Expense, Salaries and Wages Expense, and Utilities Expense.

Equation
Analysis

Assets				=	Liabilities	+	Stockholders' Equity							
Cash	Accounts Receivable	Supplies	Equipment	=	Accounts Payable	+	Common Stock	Retained Earnings						
								Rev.	- Exp.	- Div.				
\$10,700	\$2,000	\$1,600	\$7,000	=	\$1,850	+	\$15,000	\$4,700	\$250					
(7) -1,700									-600	Rent Exp.				
									-900	Sal./Wages Exp.				
									-200	Utilities Exp.				
\$ 9,000	+	\$2,000	+	\$1,600	+	\$7,000	=	\$1,850	+	\$15,000	+	\$4,700	-	\$1,950
\$19,600					\$19,600									

The two sides of the equation now balance at \$19,600. Three lines are required in the analysis to indicate the different types of expenses that have been incurred.

TRANSACTION 8. PAYMENT OF ACCOUNTS PAYABLE Softbyte Inc. pays its \$250 *Daily News* bill in cash. The company previously (in Transaction 5) recorded the bill as an increase in Accounts Payable and a decrease in stockholders' equity.

Basic
Analysis

This cash payment "on account" decreases the asset Cash by \$250 and also decreases the liability Accounts Payable by \$250.

Equation
Analysis

Assets				=	Liabilities	+	Stockholders' Equity							
Cash	Accounts Receivable	Supplies	Equipment	=	Accounts Payable	+	Common Stock	Retained Earnings						
								Rev.	- Exp.	- Div.				
\$9,000	\$2,000	\$1,600	\$7,000	=	\$1,850	+	\$15,000	\$4,700	\$1,950					
(8) -250					-250									
\$8,750	+	\$2,000	+	\$1,600	+	\$7,000	=	\$1,600	+	\$15,000	+	\$4,700	-	\$1,950
\$19,350					\$19,350									

Observe that the payment of a liability related to an expense that has previously been recorded does not affect stockholders' equity. Softbyte recorded the expense (in Transaction 5) and should not record it again.

TRANSACTION 9. RECEIPT OF CASH ON ACCOUNT Softbyte Inc. receives \$600 in cash from customers who had been billed for services (in Transaction 6). Transaction 9 does not change total assets, but it changes the composition of those assets.

Basic Analysis	The asset Cash increases \$600, and the asset Accounts Receivable decreases \$600.														
Equation Analysis	Assets				=	Liabilities		+	Stockholders' Equity						
	Cash	+	Accounts Receivable	+	Supplies	+	Equipment	=	Accounts Payable	+	Common Stock	+	Retained Earnings		
	\$8,750		\$2,000		\$1,600		\$7,000		\$1,600		\$15,000		\$4,700	-	\$1,950
	(9) +600		-600												
	\$9,350	+	\$1,400	+	\$1,600	+	\$7,000	=	\$1,600	+	\$15,000	+	\$4,700	-	\$1,950
	\$19,350								\$19,350						

Note that the collection of an account receivable for services previously billed and recorded does not affect stockholders' equity. Softbyte already recorded this revenue (in Transaction 6) and should not record it again.

TRANSACTION 10. DIVIDENDS The corporation pays a dividend of \$1,300 in cash to Ray and Barbara Neal, the stockholders of Softbyte Inc. This transaction results in an equal decrease in assets and stockholders' equity.

Basic Analysis	The asset Cash decreases \$1,300, and stockholders' equity decreases \$1,300 due to dividends.														
Equation Analysis	Assets				=	Liabilities		+	Stockholders' Equity						
	Cash	+	Accounts Receivable	+	Supplies	+	Equipment	=	Accounts Payable	+	Common Stock	+	Retained Earnings		
	\$9,350		\$1,400		\$1,600		\$7,000		\$1,600		\$15,000		\$4,700	-	\$1,950
	(10) -1,300														-1,300 Dividends
	\$8,050	+	\$1,400	+	\$1,600	+	\$7,000	=	\$1,600	+	\$15,000	+	\$4,700	-	\$1,950 - \$1,300
	\$18,050								\$18,050						

Note that the dividend reduces retained earnings, which is part of stockholders' equity. **Dividends are not expenses.** Like stockholders' investments, dividends are excluded in determining net income.

Summary of Transactions

Illustration 1-9 (page 20) summarizes the September transactions of Softbyte Inc. to show their cumulative effect on the basic accounting equation. It also indicates the transaction number and the specific effects of each transaction. Finally, Illustration 1-9 demonstrates a number of significant facts:

1. Each transaction must be analyzed in terms of its effect on:
 - (a) The three components of the basic accounting equation.
 - (b) Specific types (kinds) of items within each component.

Companies prepare four financial statements from the summarized accounting data:

1. An **income statement** presents the revenues and expenses and resulting net income or net loss for a specific period of time.
2. A **retained earnings statement** summarizes the changes in retained earnings for a specific period of time.
3. A **balance sheet** reports the assets, liabilities, and stockholders' equity of a company at a specific date.
4. A **statement of cash flows** summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.

These statements provide relevant financial data for internal and external users. Illustration 1-10 (page 22) shows the financial statements of Softbyte Inc. Note that the statements shown in Illustration 1-10 are interrelated:

1. Net income of \$2,750 on the **income statement** is added to the beginning balance of retained earnings in the **retained earnings statement**.
2. Retained earnings of \$1,450 at the end of the reporting period shown in the **retained earnings statement** is reported on the **balance sheet**.
3. Cash of \$8,050 on the **balance sheet** is reported on the **statement of cash flows**.

Also, explanatory notes and supporting schedules are an integral part of every set of financial statements. We illustrate these notes and schedules in later chapters of this textbook.

Be sure to carefully examine the format and content of each statement in Illustration 1-10. We describe the essential features of each in the following sections.

Income Statement

The income statement reports the success or profitability of the company's operations over a specific period of time. For example, Softbyte Inc.'s income statement is dated "For the Month Ended September 30, 2017." It is prepared from the data appearing in the revenue and expense columns of Illustration 1-9 (page 20). The heading of the statement identifies the company, the type of statement, and the time period covered by the statement.

The income statement lists revenues first, followed by expenses. Finally, the statement shows net income (or net loss). When revenues exceed expenses, **net income** results. When expenses exceed revenues, a **net loss** results.

Although practice varies, we have chosen in our illustrations and homework solutions to list expenses in order of magnitude. (We will consider alternative formats for the income statement in later chapters.)

Note that the income statement does not include investment and dividend transactions between the stockholders and the business in measuring net income. For example, as explained earlier, the cash dividend from Softbyte Inc. was not regarded as a business expense. This type of transaction is considered a reduction of retained earnings, which causes a decrease in stockholders' equity.

Retained Earnings Statement

Softbyte Inc.'s retained earnings statement reports the changes in retained earnings for a specific period of time. The time period is the same as that covered by the income statement ("For the Month Ended September 30, 2017"). Data for the

International Note

The primary types of financial statements required by GAAP and IFRS are the same. In practice, some format differences do exist in presentations employed by GAAP companies compared to IFRS companies.

Helpful Hint

The income statement, retained earnings statement, and statement of cash flows are all for a *period* of time, whereas the balance sheet is for a *point* in time.

Alternative Terminology

The income statement is sometimes referred to as the *statement of operations*, *earnings statement*, or *profit and loss statement*.

Alternative Terminology

notes present synonymous terms that you may come across in practice.

Illustration 1-10
Financial statements
and their interrelationships

Helpful Hint

The heading of each statement identifies the company, the type of statement, and the specific date or time period covered by the statement.

Helpful Hint

Note that final sums are double-underlined, and negative amounts (in the statement of cash flows) are presented in parentheses.

Helpful Hint

The arrows in this illustration show the interrelationships of the four financial statements.

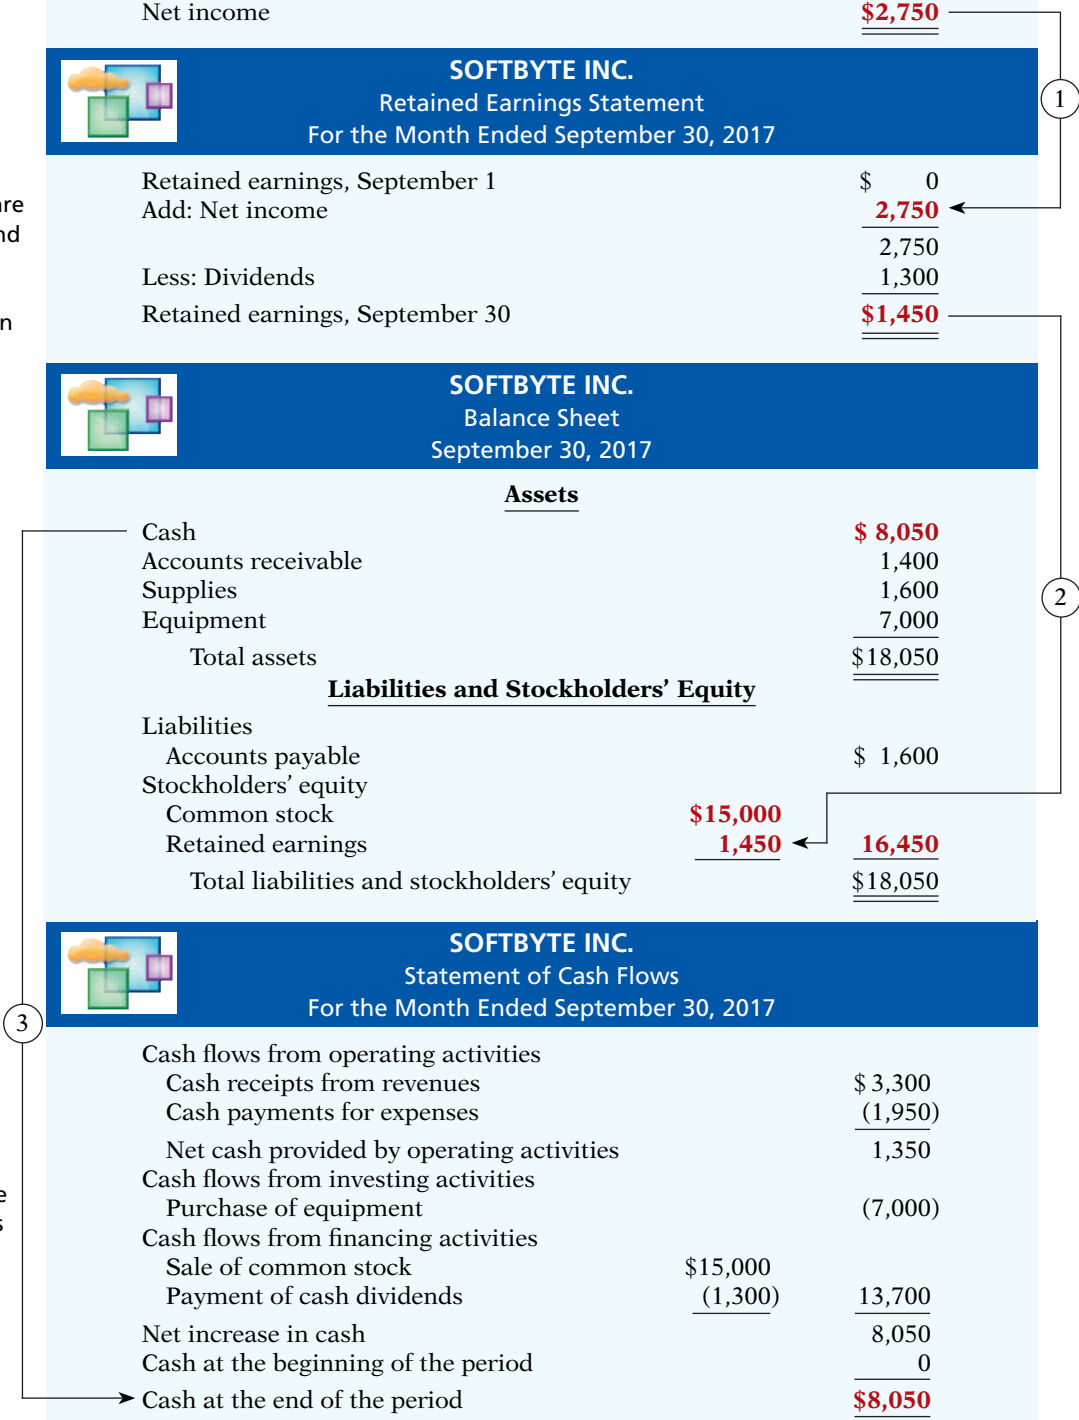

1. Net income is computed first and is needed to determine the ending balance in retained earnings.
2. The ending balance in retained earnings is needed in preparing the balance sheet.
3. The cash shown on the balance sheet is needed in preparing the statement of cash flows.

SOFTBYTE INC. Income Statement For the Month Ended September 30, 2017		
Revenues		
Service revenue		\$ 4,700
Expenses		
Salaries and wages expense	\$900	
Rent expense	600	
Advertising expense	250	
Utilities expense	<u>200</u>	
Total expenses		1,950
Net income		<u><u>\$2,750</u></u>

SOFTBYTE INC. Retained Earnings Statement For the Month Ended September 30, 2017		
Retained earnings, September 1		\$ 0
Add: Net income		<u>2,750</u>
		2,750
Less: Dividends		<u>1,300</u>
Retained earnings, September 30		<u><u>\$1,450</u></u>

SOFTBYTE INC. Balance Sheet September 30, 2017		
<u>Assets</u>		
Cash		\$ 8,050
Accounts receivable		1,400
Supplies		1,600
Equipment		<u>7,000</u>
Total assets		<u>\$18,050</u>
<u>Liabilities and Stockholders' Equity</u>		
Liabilities		
Accounts payable		\$ 1,600
Stockholders' equity		
Common stock	\$15,000	
Retained earnings	<u>1,450</u>	<u>16,450</u>
Total liabilities and stockholders' equity		<u>\$18,050</u>

SOFTBYTE INC. Statement of Cash Flows For the Month Ended September 30, 2017		
Cash flows from operating activities		
Cash receipts from revenues		\$ 3,300
Cash payments for expenses		<u>(1,950)</u>
Net cash provided by operating activities		1,350
Cash flows from investing activities		
Purchase of equipment		(7,000)
Cash flows from financing activities		
Sale of common stock	\$15,000	
Payment of cash dividends	<u>(1,300)</u>	<u>13,700</u>
Net increase in cash		8,050
Cash at the beginning of the period		<u>0</u>
Cash at the end of the period		<u><u>\$8,050</u></u>

preparation of the retained earnings statement come from the retained earnings columns of the tabular summary (Illustration 1-9) and from the income statement (Illustration 1-10, page 22).

The first line of the statement shows the beginning retained earnings amount. Then come net income and dividends. The retained earnings ending balance is the final amount on the statement. The information provided by this statement indicates the reasons why retained earnings increased or decreased during the period. If there is a net loss, it is deducted with dividends in the retained earnings statement.

Balance Sheet

Softbyte Inc.'s balance sheet reports the assets, liabilities, and stockholders' equity at a specific date (September 30, 2017). The company prepares the balance sheet from the column headings and the month-end data shown in the last line of the tabular summary (Illustration 1-9).

Observe that the balance sheet lists assets at the top, followed by liabilities and stockholders' equity. Total assets must equal total liabilities and stockholders' equity. Softbyte Inc. reports only one liability, Accounts Payable, on its balance sheet. In most cases, there will be more than one liability. When two or more liabilities are involved, a customary way of listing is as shown in Illustration 1-11.

<u>Liabilities</u>	
Notes payable	\$ 10,000
Accounts payable	63,000
Salaries and wages payable	18,000
Total liabilities	\$91,000

Illustration 1-11
Presentation of liabilities

The balance sheet is like a snapshot of the company's financial condition at a specific moment in time (usually the month-end or year-end).

Statement of Cash Flows

The statement of cash flows provides information on the cash receipts and payments for a specific period of time. The statement of cash flows reports (1) the cash effects of a company's operations during a period, (2) its investing activities, (3) its financing activities, (4) the net increase or decrease in cash during the period, and (5) the cash amount at the end of the period.

Reporting the sources, uses, and change in cash is useful because investors, creditors, and others want to know what is happening to a company's most liquid resource. The statement of cash flows provides answers to the following simple but important questions.

1. Where did cash come from during the period?
2. What was cash used for during the period?
3. What was the change in the cash balance during the period?

As shown in Softbyte Inc.'s statement of cash flows in Illustration 1-10, cash increased \$8,050 during the period. Net cash provided by operating activities increased cash \$1,350. Cash flow from investing activities decreased cash \$7,000, while cash flow from financing activities increased cash \$13,700. At this time, you need not be concerned with how these amounts are determined. Chapter 13 will examine in detail how the statement is prepared.

Helpful Hint
Investing activities pertain to investments made by the company, not investments made by the owners.

People, Planet, and Profit Insight

Beyond Financial Statements

Should we expand our financial statements beyond the income statement, retained earnings statement, balance sheet, and state-

ment of cash flows? Some believe we should take into account ecological and social performance, in addition to financial results, in evaluating a company. The argument is that a company's responsibility lies with anyone who is influenced by its actions. In other words, a company should

be interested in benefiting many different parties, instead of only maximizing stockholders' interests.

A socially responsible business does not exploit or endanger any group of individuals. It follows fair trade practices, provides safe environments for workers, and bears responsibility for environmental damage. Granted, measurement of these factors is difficult. How to report this information is also controversial. But, many interesting and useful efforts are underway. Throughout this textbook, we provide additional insights into how companies are attempting to meet the challenge of measuring and reporting their contributions to society, as well as their financial results, to stockholders.

Why might a company's stockholders be interested in its environmental and social performance? (Go to [WileyPLUS](#) for this answer and additional questions)

DO IT!

Financial Statement Items

Presented below is selected information related to Flanagan Corporation at December 31, 2017. Flanagan reports financial information monthly.

Equipment	\$10,000	Utilities Expense	\$ 4,000
Cash	8,000	Accounts Receivable	9,000
Service Revenue	36,000	Salaries and Wages Expense	7,000
Rent Expense	11,000	Notes Payable	16,500
Accounts Payable	2,000	Dividends	5,000

- Determine the total assets of Flanagan at December 31, 2017.
- Determine the net income that Flanagan reported for December 2017.
- Determine the stockholders' equity of Flanagan at December 31, 2017.

Solution

- The total assets are \$27,000, comprised of Cash \$8,000, Accounts Receivable \$9,000, and Equipment \$10,000.

- Net income is \$14,000, computed as follows.

Revenues		
Service revenue		\$36,000
Expenses		
Rent expense	\$11,000	
Salaries and wages expense	7,000	
Utilities expense	4,000	
Total expenses		<u>22,000</u>
Net income		<u>\$14,000</u>

- The ending stockholders' equity of Flanagan Corporation is \$8,500. By rewriting the accounting equation, we can compute stockholders' equity as assets minus liabilities, as follows.

Total assets [as computed in (a)]		\$27,000
Less: Liabilities		
Notes payable	\$16,500	
Accounts payable	2,000	<u>18,500</u>
Stockholders' equity		<u>\$ 8,500</u>

Note that it is not possible to determine the corporation's stockholders' equity in any other way, because the beginning total for stockholders' equity is not provided.

Action Plan

- ✓ Remember the basic accounting equation: assets must equal liabilities plus stockholders' equity.
- ✓ Review previous financial statements to determine how total assets, net income, and stockholders' equity are computed.

Why is accounting such a popular major and career choice? First, there are a lot of jobs. In many cities in recent years, the demand for accountants exceeded the supply. Not only are there a lot of jobs, but there are a wide array of opportunities. As one accounting organization observed, “accounting is one degree with 360 degrees of opportunity.”

Accounting is also hot because it is obvious that accounting matters. Interest in accounting has increased, ironically, because of the attention caused by the accounting failures of companies such as **Enron** and **WorldCom**. These widely publicized scandals revealed the important role that accounting plays in society. Most people want to make a difference, and an accounting career provides many opportunities to contribute to society. Finally, the Sarbanes-Oxley Act (SOX) (see page 7) significantly increased the accounting and internal control requirements for corporations. This dramatically increased demand for professionals with accounting training.

Accountants are in such demand that it is not uncommon for accounting students to have accepted a job offer a year before graduation. As the following discussion reveals, the job options of people with accounting degrees are virtually unlimited.

Public Accounting

Individuals in **public accounting** offer expert service to the general public, in much the same way that doctors serve patients and lawyers serve clients. A major portion of public accounting involves **auditing**. In auditing, a certified public accountant (CPA) examines company financial statements and provides an opinion as to how accurately the financial statements present the company’s results and financial position. Analysts, investors, and creditors rely heavily on these “audit opinions,” which CPAs have the exclusive authority to issue.

Taxation is another major area of public accounting. The work that tax specialists perform includes tax advice and planning, preparing tax returns, and representing clients before governmental agencies such as the Internal Revenue Service.

A third area in public accounting is **management consulting**. It ranges from installing basic accounting software or highly complex enterprise resource planning systems, to performing support services for major marketing projects and merger and acquisition activities.

Many CPAs are entrepreneurs. They form small- or medium-sized practices that frequently specialize in tax or consulting services.

Private Accounting

Instead of working in public accounting, you might choose to be an employee of a for-profit company such as **Starbucks**, **Google**, or **PepsiCo**. In **private** (or **managerial**) **accounting**, you would be involved in activities such as cost accounting (finding the cost of producing specific products), budgeting, accounting information system design and support, and tax planning and preparation. You might also be a member of your company’s internal audit team. In response to SOX, the internal auditors’ job of reviewing the company’s operations to ensure compliance with company policies and to increase efficiency has taken on increased importance.

Alternatively, many accountants work for not-for-profit organizations such as the **Red Cross** or the **Bill and Melinda Gates Foundation**, or for museums, libraries, or performing arts organizations.

Governmental Accounting

Another option is to pursue one of the many accounting opportunities in governmental agencies. For example, the Internal Revenue Service (IRS), Federal Bureau

of Investigation (FBI), and the Securities and Exchange Commission (SEC) all employ accountants. The FBI has a stated goal that at least 15 percent of its new agents should be CPAs. There is also a very high demand for accounting educators at public colleges and universities and in state and local governments.

Forensic Accounting

Forensic accounting uses accounting, auditing, and investigative skills to conduct investigations into theft and fraud. It is listed among the top 20 career paths of the future. The job of forensic accountants is to catch the perpetrators of the estimated \$600 billion per year of theft and fraud occurring at U.S. companies. This includes tracing money-laundering and identity-theft activities as well as tax evasion. Insurance companies hire forensic accountants to detect frauds such as arson, and law offices employ forensic accountants to identify marital assets in divorces. Forensic accountants often have FBI, IRS, or similar government experience.

“Show Me the Money”

How much can a new accountant make? Take a look at the average salaries for college graduates in public and private accounting. Keep in mind if you also have a CPA license, you’ll make 10–15% more when you start out.

Illustration 1A-1

Salary estimates for jobs in public and corporate accounting

Employer	Jr. Level (0–3 yrs.)	Sr. Level (4–6 yrs.)
Public accounting (large firm)	\$51,500–\$74,250	\$71,000–\$92,250
Public accounting (small firm)	\$42,500–\$60,500	\$57,000–\$74,000
Corporate accounting (large company)	\$41,750–\$68,500	\$67,000–\$86,500
Corporate accounting (small company)	\$37,000–\$56,750	\$52,750–\$68,500

Serious earning potential over time gives CPAs great job security. Here are some examples of upper-level salaries for managers in corporate accounting. Note that geographic region, experience, education, CPA certification, and company size each play a role in determining salary.

Illustration 1A-2

Upper-level management salaries in corporate accounting

Position	Large Company	Small to Medium Company
Chief financial officer	\$189,750–\$411,000	\$96,750–\$190,500
Corporate controller	\$128,000–\$199,000	\$82,750–\$144,750
Tax manager	\$100,250–\$142,500	\$79,500–\$110,750

For up-to-date salary estimates, as well as a wealth of additional information regarding accounting as a career, check out www.startheregoplaces.com.

The Review and Practice section provides opportunities for students to review key concepts and terms as well as complete multiple-choice questions, exercises, and a comprehensive problem. Detailed solutions are also included.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

1 Identify the activities and users associated with accounting. Accounting is an information system that identifies, records, and communicates the economic events of an organization to interested users. The major users and uses of accounting are as follows. (a) Management uses accounting information to plan,

organize, and run the business. (b) Investors (owners) decide whether to buy, hold, or sell their financial interests on the basis of accounting data. (c) Creditors (suppliers and bankers) evaluate the risks of granting credit or lending money on the basis of accounting information. Other groups that use accounting

information are taxing authorities, regulatory agencies, customers, and labor unions.

- 2 Explain the building blocks of accounting: ethics, principles, and assumptions.** Ethics are the standards of conduct by which actions are judged as right or wrong. Effective financial reporting depends on sound ethical behavior. Generally accepted accounting principles are a common set of standards used by accountants. The primary accounting standard-setting body in the United States is the Financial Accounting Standards Board. The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The economic entity assumption requires that the activities of each economic entity be kept separate from the activities of its owner(s) and other economic entities.
- 3 State the accounting equation, and define its components.** The basic accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$$

Assets are resources a business owns. Liabilities are creditorship claims on total assets. Stockholders' equity is the ownership claim on total assets.

The expanded accounting equation is:

$$\begin{aligned} \text{Assets} = & \text{Liabilities} + \text{Common Stock} \\ & + \text{Revenues} - \text{Expenses} - \text{Dividends} \end{aligned}$$

Common stock is affected when the company issues new shares of stock in exchange for cash. Revenues

are increases in assets resulting from income-earning activities. Expenses are the costs of assets consumed or services used in the process of earning revenue. Dividends are payments the company makes to its stockholders.

- 4 Analyze the effects of business transactions on the accounting equation.** Each business transaction must have a dual effect on the accounting equation. For example, if an individual asset increases, there must be a corresponding (1) decrease in another asset, or (2) increase in a specific liability, or (3) increase in stockholders' equity.
- 5 Describe the four financial statements and how they are prepared.** An income statement presents the revenues and expenses and resulting net income or net loss for a specific period of time. A retained earnings statement summarizes the changes in retained earnings for a specific period of time. A balance sheet reports the assets, liabilities, and stockholders' equity at a specific date. A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.
- *6 Explain the career opportunities in accounting.** Accounting offers many different jobs in fields such as public and private accounting, governmental accounting, and forensic accounting. Accounting is a popular major because there are many different types of jobs, with unlimited potential for career advancement.

GLOSSARY REVIEW

Accounting The information system that identifies, records, and communicates the economic events of an organization to interested users. (p. 4).

Assets Resources a business owns. (p. 12).

*** Auditing** The examination of financial statements by a certified public accountant in order to express an opinion as to how accurately the financial statements present the company's results and financial position. (p. 25).

Balance sheet A financial statement that reports the assets, liabilities, and stockholders' equity at a specific date. (p. 21).

Basic accounting equation $\text{Assets} = \text{Liabilities} + \text{Stockholders' Equity}$. (p. 12).

Bookkeeping A part of accounting that involves only the recording of economic events. (p. 5).

Common stock Term used to describe the total amount paid in by stockholders for the shares they purchase. (p. 13).

Convergence The process of reducing the differences between U.S. GAAP and IFRS. (p. 9).

Corporation A business organized as a separate legal entity under state corporation law, having ownership divided into transferable shares of stock. (p. 10).

Dividend A distribution by a corporation to its stockholders. (p. 13).

Economic entity assumption An assumption that requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities. (p. 10).

Ethics The standards of conduct by which one's actions are judged as right or wrong, honest or dishonest, fair or not fair. (p. 8).

Expanded accounting equation $\text{Assets} = \text{Liabilities} + \text{Common stock} + \text{Revenues} - \text{Expenses} - \text{Dividends}$. (p. 15).

Expenses The cost of assets consumed or services used in the process of earning revenue. (p. 13).

Fair value principle An accounting principle stating that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). (p. 9).

Faithful representation Numbers and descriptions match what really existed or happened—they are factual. (p. 9).

Financial accounting The field of accounting that provides economic and financial information for investors, creditors, and other external users. (p. 6).

Financial Accounting Standards Board (FASB) A private organization that establishes generally accepted accounting principles in the United States (GAAP). (p. 9).

* **Forensic accounting** An area of accounting that uses accounting, auditing, and investigative skills to conduct investigations into theft and fraud. (p. 26).

Generally accepted accounting principles (GAAP) Common standards that indicate how to report economic events. (p. 9).

Historical cost principle An accounting principle that states that companies should record assets at their cost. (p. 9).

Income statement A financial statement that presents the revenues and expenses and resulting net income or net loss of a company for a specific period of time. (p. 21).

International Accounting Standards Board (IASB) An accounting standard-setting body that issues standards adopted by many countries outside of the United States. (p. 9).

International Financial Reporting Standards (IFRS) International accounting standards set by the International Accounting Standards Board (IASB). (p. 9).

Liabilities Creditor claims against total assets. (p. 12).

* **Management consulting** An area of public accounting ranging from development of accounting and computer systems to support services for marketing projects and merger and acquisition activities. (p. 25).

Managerial accounting The field of accounting that provides internal reports to help users make decisions about their companies. (p. 6).

Monetary unit assumption An assumption stating that companies include in the accounting records only transaction data that can be expressed in terms of money. (p. 10).

Net income The amount by which revenues exceed expenses. (p. 21).

Net loss The amount by which expenses exceed revenues. (p. 21).

Partnership A business owned by two or more persons associated as partners. (p. 10).

* **Private (or managerial) accounting** An area of accounting within a company that involves such activities as cost accounting, budgeting, design and support of accounting information systems, and tax planning and preparation. (p. 25).

Proprietorship A business owned by one person. (p. 10).

* **Public accounting** An area of accounting in which the accountant offers expert service to the general public. (p. 25).

Relevance Financial information that is capable of making a difference in a decision. (p. 9).

Retained earnings statement A financial statement that summarizes the changes in retained earnings for a specific period of time. (p. 21).

Revenues The gross increase in stockholders' equity resulting from business activities entered into for the purpose of earning income. (p. 13).

Sarbanes-Oxley Act (SOX) Law passed by Congress intended to reduce unethical corporate behavior. (p. 7).

Securities and Exchange Commission (SEC) A governmental agency that oversees U.S. financial markets and accounting standard-setting bodies. (p. 9).

Statement of cash flows A financial statement that summarizes information about the cash inflows (receipts) and cash outflows (payments) for a specific period of time. (p. 21).

Stockholders' equity The ownership claim on a corporation's total assets. (p. 12).

* **Taxation** An area of public accounting involving tax advice, tax planning, preparing tax returns, and representing clients before governmental agencies. (p. 25).

Transactions The economic events of a business that are recorded by accountants. (p. 14).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following is **not** a step in the accounting process?
 (a) Identification. (c) Recording.
 (b) Economic entity. (d) Communication.
- (LO 1) 2. Which of the following statements about users of accounting information is **incorrect**?
 (a) Management is an internal user.
 (b) Taxing authorities are external users.
 (c) Present creditors are external users.
 (d) Regulatory authorities are internal users.
- (LO 2) 3. The historical cost principle states that:
 (a) assets should be initially recorded at cost and adjusted when the fair value changes.
 (b) activities of an entity are to be kept separate and distinct from its owner.
 (c) assets should be recorded at their cost.
 (d) only transaction data capable of being expressed in terms of money be included in the accounting records.
4. Which of the following statements about basic assumptions is **correct**? (LO 2)
 (a) Basic assumptions are the same as accounting principles.
 (b) The economic entity assumption states that there should be a particular unit of accountability.
 (c) The monetary unit assumption enables accounting to measure employee morale.
 (d) Partnerships are not economic entities.
5. The three types of business entities are: (LO 2)
 (a) proprietorships, small businesses, and partnerships.
 (b) proprietorships, partnerships, and corporations.
 (c) proprietorships, partnerships, and large businesses.
 (d) financial, manufacturing, and service companies.
6. Net income will result during a time period when: (LO 3)
 (a) assets exceed liabilities.
 (b) assets exceed revenues.
 (c) expenses exceed revenues.
 (d) revenues exceed expenses.

- (LO 3) 7. As of December 31, 2017, Reed Company has assets of \$3,500 and stockholders' equity of \$1,500. What are the liabilities for Reed Company as of December 31, 2017?
 (a) \$1,500. (c) \$2,500.
 (b) \$1,000. (d) \$2,000.
- (LO 4) 8. Performing services on account will have the following effects on the components of the basic accounting equation:
 (a) increase assets and decrease stockholders' equity.
 (b) increase assets and increase stockholders' equity.
 (c) increase assets and increase liabilities.
 (d) increase liabilities and increase stockholders' equity.
- (LO 4) 9. Which of the following events is **not** recorded in the accounting records?
 (a) Equipment is purchased on account.
 (b) An employee is terminated.
 (c) A cash investment is made into the business.
 (d) The company pays a cash dividend.
- (LO 4) 10. During 2017, Seisor Company's assets decreased \$50,000 and its liabilities decreased \$90,000. Its stockholders' equity therefore:
 (a) increased \$40,000. (c) decreased \$40,000.
 (b) decreased \$140,000. (d) increased \$140,000.
- (LO 4) 11. Payment of an account payable affects the components of the accounting equation in the following way.
 (a) Decreases stockholders' equity and decreases liabilities.
 (b) Increases assets and decreases liabilities.
 (c) Decreases assets and increases stockholders' equity.
 (d) Decreases assets and decreases liabilities.
12. Which of the following statements is **false**? (LO 5)
 (a) A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.
 (b) A balance sheet reports the assets, liabilities, and stockholders' equity at a specific date.
 (c) An income statement presents the revenues, expenses, changes in stockholders' equity, and resulting net income or net loss for a specific period of time.
 (d) A retained earnings statement summarizes the changes in retained earnings for a specific period of time.
13. On the last day of the period, Alan Cesska Company buys a \$900 machine on credit. This transaction will affect the: (LO 5)
 (a) income statement only.
 (b) balance sheet only.
 (c) income statement and retained earnings statement only.
 (d) income statement, retained earnings statement, and balance sheet.
14. The financial statement that reports assets, liabilities, and stockholders' equity is the: (LO 5)
 (a) income statement.
 (b) retained earnings statement.
 (c) balance sheet.
 (d) statement of cash flows.
- *15. Services performed by a public accountant include: (LO 6)
 (a) auditing, taxation, and management consulting.
 (b) auditing, budgeting, and management consulting.
 (c) auditing, budgeting, and cost accounting.
 (d) auditing, budgeting, and management consulting.

Solutions

1. (b) Economic entity is not one of the steps in the accounting process. The other choices are true because (a) identification is the first step in the accounting process, (c) recording is the second step in the accounting process, and (d) communication is the third and final step in the accounting process.
2. (d) Regulatory authorities are external, not internal, users of accounting information. The other choices are true statements.
3. (c) The historical cost principle states that assets should be recorded at their cost. The other choices are incorrect because (a) the historical cost principle does not say that assets should be adjusted for changes in fair value, (b) describes the economic entity assumption, and (d) describes the monetary unit assumption.
4. (b) The economic entity assumption states that there should be a particular unit of accountability. The other choices are incorrect because (a) basic assumptions are not the same as accounting principles, (c) the monetary unit assumption allows accounting to measure economic events, and (d) partnerships are economic entities.
5. (b) Proprietorships, partnerships, and corporations are the three types of business entities. Choices (a) and (c) are incorrect because small and large businesses only denote the sizes of businesses. Choice (d) is incorrect because financial, manufacturing, and service companies are types of businesses, not business entities.
6. (d) Net income results when revenues exceed expenses. The other choices are incorrect because (a) assets and liabilities are not used in the computation of net income; (b) revenues, not assets, are included in the computation of net income; and (c) when expenses exceed revenues, a net loss results.
7. (d) Using a variation of the basic accounting equation, $\text{Assets} - \text{Stockholders' equity} = \text{Liabilities}$, $\$3,500 - \$1,500 = \$2,000$. Therefore, choices (a) \$1,500, (b) \$1,000, and (c) \$2,500 are incorrect.
8. (b) When services are performed on account, assets are increased and stockholders' equity is increased. The other choices are incorrect because when services are performed on account (a) stockholders' equity is increased, not decreased; (c) liabilities are not affected; and (d) stockholders' equity is increased and liabilities are not affected.
9. (b) If an employee is terminated, this represents an activity of a company, not a business transaction. Assets, liabilities, and stockholders' equity are not affected. Thus, there is no effect on the accounting equation. The other choices are incorrect because they are all recorded: (a) when equipment is purchased on account, both assets and liabilities increase; (c) when a cash investment is made into a business, both assets and stockholders' equity increase; and (d) when a dividend is paid, both assets and stockholders' equity decrease.

10. (a) Using the basic accounting equation, $\text{Assets} = \text{Liabilities} + \text{Stockholders' equity}$, $-\$50,000 = -\$90,000 + \text{Stockholders' equity}$, so stockholders' equity increased \$40,000, not (b) decreased \$140,000, (c) decreased \$40,000, or (d) increased \$140,000.

11. (d) Payment of an account payable results in an equal decrease of assets (cash) and liabilities (accounts payable). The other choices are incorrect because payment of an account payable (a) does not affect stockholders' equity, (b) does not increase assets, and (c) does not affect stockholders' equity.

12. (c) An income statement represents the revenues, expenses, and the resulting net income or net loss for a specific period of time but not the changes in stockholders' equity. The other choices are true statements.

13. (b) This transaction will cause assets to increase by \$900 and liabilities to increase by \$900. The other choices are incorrect because this transaction (a) will have no effect on the income statement, (c) will have no effect on the income statement or the retained earnings statement, and (d) will affect the balance sheet but not the income statement or the retained earnings statement.

14. (c) The balance sheet is the statement that reports assets, liabilities and stockholders' equity. The other choices are incorrect because (a) the income statement reports revenues and expenses, (b) the retained earnings statement reports details about stockholders' equity, and (d) the statement of cash flows reports inflows and outflows of cash.

***15. (a)** Auditing, taxation, and management consulting are all services performed by public accountants. The other choices are incorrect because public accountants do not perform budgeting or cost accounting.

PRACTICE EXERCISES

Analyze the effect of transactions

(LO 3, 4)

1. Selected transactions for Beale Lawn Care Company are listed below.

1. Sold common stock for cash to start business.
2. Paid monthly utilities.
3. Purchased land on account.
4. Billed customers for services performed.
5. Paid dividends.
6. Received cash from customers billed in (4).
7. Incurred utilities expense on account.
8. Purchased equipment for cash.
9. Received cash from customers when service was performed.

Instructions

List the numbers of the above transactions and describe the effect of each transaction on assets, liabilities, and stockholders' equity. For example, the first answer is (1) Increase in assets and increase in stockholders' equity.

Solution

1. 1. Increase in assets and increase in stockholders' equity.
2. 2. Decrease in assets and decrease in stockholders' equity.
3. 3. Increase in assets and increase in liabilities.
4. 4. Increase in assets and increase in stockholders' equity.
5. 5. Decrease in assets and decrease in stockholders' equity.
6. 6. Increase in assets and decrease in assets.
7. 7. Increase in liabilities and decrease in stockholders' equity.
8. 8. Increase in assets and decrease in assets.
9. 9. Increase in assets and increase in stockholders' equity.

Analyze the effect of transactions on assets, liabilities, and stockholders' equity.

(LO 3, 4)

2. Hayes Computer Timeshare Company entered into the following transactions during May 2017.

1. Purchased office equipment for \$10,000 from Office Outfitters on account.
2. Paid \$3,000 cash for May rent on storage space.
3. Received \$12,000 cash from customers for contracts billed in April.

4. Performed services for Bayliss Construction Company for \$4,000 cash.
5. Paid Southern Power Co. \$10,000 cash for energy usage in May.
6. Stockholders invested an additional \$30,000 in the business.
7. Paid Office Outfitters for the equipment purchased in (1) above.
8. Incurred advertising expense for May of \$1,500 on account.

Instructions

Indicate with the appropriate letter whether each of the transactions above results in:

- (a) An increase in assets and a decrease in assets.
- (b) An increase in assets and an increase in stockholders' equity.
- (c) An increase in assets and an increase in liabilities.
- (d) A decrease in assets and a decrease in stockholders' equity.
- (e) A decrease in assets and a decrease in liabilities.
- (f) An increase in liabilities and a decrease in stockholders' equity.
- (g) An increase in stockholders' equity and a decrease in liabilities.

Solution

2. 1. (c)	3. (a)	5. (d)	7. (e)
2. (d)	4. (b)	6. (b)	8. (f)

PRACTICE PROBLEM

Legal Services Inc. was incorporated on July 1, 2017. During the first month of operations, the following transactions occurred.

Prepare a tabular presentation and financial statements.

1. Stockholders invested \$10,000 in cash in exchange for common stock of Legal Services Inc.
2. Paid \$800 for July rent on office space.
3. Purchased office equipment on account \$3,000.
4. Performed legal services for clients for cash \$1,500.
5. Borrowed \$700 cash from a bank on a note payable.
6. Performed legal services for client on account \$2,000.
7. Paid monthly expenses: salaries \$500, utilities \$300, and advertising \$100.

(LO 4, 5)

Instructions

- (a) Prepare a tabular summary of the transactions.
- (b) Prepare the income statement, retained earnings statement, and balance sheet at July 31, 2017, for Legal Services Inc.

Solution

(a) Transaction	Assets			=	Liabilities		+	Stockholders' Equity							
	Cash	+	Accounts Receivable		+	Equipment		=	Notes Payable	+	Accounts Payable		+	Common Stock	+
									Rev.	-	Exp.	-	Div.		
(1)	+\$10,000			=				+\$10,000						Issued Stock	
(2)	-800			=										Rent Expense	
(3)				=											
(4)	+1,500			=										Service Revenue	
(5)	+700			=											
(6)				=											
(7)	-500			=										Service Revenue	
	-300			=										Sal./Wages Exp.	
	-100			=										Utilities Expense	
				=										Advertising Expense	
	<u>\$10,500</u>	+	<u>\$2,000</u>	+	<u>\$3,000</u>	=	<u>\$700</u>	+	<u>\$3,000</u>	+	<u>\$10,000</u>	+	<u>\$3,500</u>	-	<u>\$1,700</u>
	\$15,500				\$15,500										

(b)

LEGAL SERVICES INC.
Income Statement
For the Month Ended July 31, 2017

Revenues		
Service revenue		\$3,500
Expenses		
Rent expense	\$800	
Salaries and wages expense	500	
Utilities expense	300	
Advertising expense	<u>100</u>	
Total expenses		1,700
Net income		<u><u>\$1,800</u></u>

LEGAL SERVICES INC.
Retained Earnings Statement
For the Month Ended July 31, 2017

Retained earnings, July 1	\$ -0-
Add: Net income	<u>1,800</u>
Retained earnings, July 31	<u><u>\$1,800</u></u>

LEGAL SERVICES INC.
Balance Sheet
July 31, 2017

<u>Assets</u>		
Cash		\$10,500
Accounts receivable		2,000
Equipment		<u>3,000</u>
Total assets		<u><u>\$15,500</u></u>
<u>Liabilities and Stockholders' Equity</u>		
Liabilities		
Notes payable	\$ 700	
Accounts payable	<u>3,000</u>	
Total liabilities		\$ 3,700
Stockholders' equity		
Common stock	10,000	
Retained earnings	<u>1,800</u>	<u>11,800</u>
Total liabilities and stockholders' equity		<u><u>\$15,500</u></u>

WileyPLUS

Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

QUESTIONS

- “Accounting is ingrained in our society and it is vital to our economic system.” Do you agree? Explain.
- Identify and describe the steps in the accounting process.
- (a) Who are internal users of accounting data?
(b) How does accounting provide relevant data to these users?
- What uses of financial accounting information are made by (a) investors and (b) creditors?
- “Bookkeeping and accounting are the same.” Do you agree? Explain.
- Harper Travel Agency purchased land for \$85,000 cash on December 10, 2017. At December 31, 2017, the land's value has increased to \$93,000. What

- amount should be reported for land on Harper's balance sheet at December 31, 2017? Explain.
- What is the monetary unit assumption?
 - What is the economic entity assumption?
 - What are the three basic forms of profit-oriented business organizations?
 - Juana Perez is the owner of a successful printing shop. Recently, her business has been increasing, and Juana has been thinking about changing the organization of her business from a proprietorship to a corporation. Discuss some of the advantages Juana would enjoy if she were to incorporate her business.
 - What is the basic accounting equation?
 - Define the terms assets, liabilities, and stockholders' equity.
 - What items affect stockholders' equity?
 - Which of the following items are liabilities of jewelry stores?

(a) Cash.	(f) Equipment.
(b) Accounts payable.	(g) Service revenue.
(c) Dividends.	(h) Salaries and wages payable.
(d) Accounts receivable.	(i) Rent expense.
(e) Supplies.	
 - Can a business enter into a transaction in which only the left side of the basic accounting equation is affected? If so, give an example.
 - Are the following events recorded in the accounting records? Explain your answer in each case.
 - The president of the company dies.
 - Supplies are purchased on account.
 - An employee is fired.
 - Indicate how the following business transactions affect the basic accounting equation.
 - Paid cash for janitorial services.
 - Purchased equipment for cash.
 - Invested cash in the business for stock.
 - Paid accounts payable in full.
 - Listed below are some items found in the financial statements of Jonas Co. Indicate in which financial statement(s) the following items would appear.

(a) Service revenue.	(e) Retained earnings.
(b) Equipment.	(f) Salaries and wages payable.
(c) Advertising expense.	
(d) Accounts receivable.	
 - In February 2017, Rachel Paige invested an additional \$10,000 in Drumlin Company. Drumlin's accountant, Liz Cooke, recorded this receipt as an increase in cash and revenues. Is this treatment appropriate? Why or why not?
 - "A company's net income appears directly on the income statement and the retained earnings statement, and it is included indirectly in the company's balance sheet." Do you agree? Explain.
 - Monique Enterprises had a stockholders' equity balance of \$158,000 at the beginning of the period. At the end of the accounting period, the stockholders' equity balance was \$198,000.
 - Assuming no additional investment or distributions during the period, what is the net income for the period?
 - Assuming an additional investment of \$16,000 but no distributions during the period, what is the net income for the period?
 - Summarized operations for Lakeview Co. for the month of July are as follows.

Revenues recognized: for cash \$30,000; on account \$70,000.

Expenses incurred: for cash \$26,000; on account \$38,000.

Indicate for Lakeview Co. (a) the total revenues, (b) the total expenses, and (c) net income for the month of July.
 - The basic accounting equation is $\text{Assets} = \text{Liabilities} + \text{Stockholders' equity}$. Replacing the words in that equation with dollar amounts, what is Apple's accounting equation at September 28, 2013?

BRIEF EXERCISES

BE1-1 Presented below is the basic accounting equation. Determine the missing amounts.

	<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>
(a)	\$78,000		\$50,000		?
(b)	?		\$45,000		\$70,000
(c)	\$94,000		?		\$60,000

Use basic accounting equation.

(LO 3)

BE1-2 Given the accounting equation, answer each of the following questions.

- The liabilities of Holland Company are \$120,000 and its stockholders' equity is \$232,000. What is the amount of Holland Company's total assets?
- The total assets of Holland Company are \$190,000 and its stockholders' equity is \$86,000. What is the amount of its total liabilities?
- The total assets of Holland Company are \$600,000 and its liabilities are equal to one-half of its total assets. What is the amount of Holland Company's stockholders' equity?

Use basic accounting equation.

(LO 3)

BE1-3 At the beginning of the year, Canon Company had total assets of \$870,000 and total liabilities of \$500,000. Answer the following questions.

- If total assets increased \$150,000 during the year and total liabilities decreased \$80,000, what is the amount of stockholders' equity at the end of the year?

Use basic accounting equation.

(LO 3)

- (b) During the year, total liabilities increased \$100,000 and stockholders' equity decreased \$66,000. What is the amount of total assets at the end of the year?
- (c) If total assets decreased \$80,000 and stockholders' equity increased \$120,000 during the year, what is the amount of total liabilities at the end of the year?

Solve accounting equation.

(LO 3)

BE1-4 Use the accounting equation to answer each of the following questions.

- (a) The liabilities of Olga Company are \$90,000. Common stock account is \$150,000; dividends are \$40,000; revenues, \$450,000; and expenses, \$320,000. What is the amount of Olga Company's total assets?
- (b) The total assets of Lafayette Company are \$57,000. Common stock account is \$23,000; dividends are \$7,000; revenues, \$50,000; and expenses, \$35,000. What is the amount of the company's total liabilities?
- (c) The total assets of Dierdorf Co. are \$600,000 and its liabilities are equal to two-thirds of its total assets. What is the amount of Dierdorf Co.'s stockholders' equity?

Identify assets, liabilities, and stockholders' equity.

(LO 3)

BE1-5 Indicate whether each of the following items is an asset (A), liability (L), or part of stockholders' equity (SE).

- | | |
|--------------------------------------|------------------------------|
| _____ (a) Accounts receivable | _____ (d) Supplies |
| _____ (b) Salaries and wages payable | _____ (e) Owner's investment |
| _____ (c) Equipment | _____ (f) Notes payable |

Determine effect of transactions on basic accounting equation.

(LO 4)

BE1-6 Presented below are three business transactions. On a sheet of paper, list the letters (a), (b), and (c) with columns for assets, liabilities, and stockholders' equity. For each column, indicate whether the transactions increased (+), decreased (-), or had no effect (NE) on assets, liabilities, and stockholders' equity.

- (a) Purchased supplies on account.
- (b) Received cash for performing a service.
- (c) Paid expenses in cash.

Determine effect of transactions on accounting equation.

(LO 4)

BE1-7 Follow the same format as BE1-6 above. Determine the effect on assets, liabilities, and stockholders' equity of the following three transactions.

- (a) Stockholders invested cash in the business for common stock.
- (b) Paid a cash dividend.
- (c) Received cash from a customer who had previously been billed for services performed.

Classify items affecting stockholders' equity.

(LO 3)

BE1-8 Classify each of the following items as dividends (D), revenue (R), or expense (E).

- | | |
|--------------------------------------|-----------------------------|
| _____ (a) Advertising expense | _____ (e) Dividends |
| _____ (b) Service revenue | _____ (f) Rent revenue |
| _____ (c) Insurance expense | _____ (g) Utilities expense |
| _____ (d) Salaries and wages expense | |

Determine effect of transactions on stockholders' equity.

(LO 4)

BE1-9 Presented below are three transactions. Mark each transaction as affecting common stock (C), dividends (D), revenue (R), expense (E), or not affecting stockholders' equity (NSE).

- _____ (a) Received cash for services performed.
- _____ (b) Paid cash to purchase equipment.
- _____ (c) Paid employee salaries.

Prepare a balance sheet.

(LO 5)

BE1-10 In alphabetical order below are balance sheet items for Ellerby Company at December 31, 2017. Prepare a balance sheet, following the format of Illustration 1-10.

Accounts payable	\$85,000
Accounts receivable	72,500
Cash	44,000
Common stock	31,500

Determine where items appear on financial statements.

(LO 5)

BE1-11 Indicate whether the following items would appear on the income statement (IS), balance sheet (BS), or retained earnings statement (RE).

- | | |
|-------------------------------|---------------------------|
| _____ (a) Notes payable | _____ (d) Cash |
| _____ (b) Advertising expense | _____ (e) Service revenue |
| _____ (c) Common stock | _____ (f) Dividends |

DO IT! Exercises

DO IT! 1-1 Indicate whether each of the five statements presented below is true or false. If false, indicate how to correct the statement.

1. The three steps in the accounting process are identification, recording, and examination.
2. The accounting process includes the bookkeeping function.
3. Managerial accounting provides reports to help investors and creditors evaluate a company.
4. The two most common types of external users are investors and creditors.
5. Internal users include human resources managers.

Review basic concepts.
(LO 1, 2)

DO IT! 1-2 Indicate whether each of the five statements presented below is true or false. If false, indicate how to correct the statement.

1. Congress passed the Sarbanes-Oxley Act to ensure that investors invest only in companies that will be profitable.
2. The standards of conduct by which actions are judged as loyal or disloyal are ethics.
3. The primary accounting standard-setting body in the United States is the Securities and Exchange Commission (SEC).
4. The historical cost principle dictates that companies record assets at their cost and continue to report them at their cost over the time the asset is held.
5. The monetary unit assumption requires that companies record only transactions that can be measured in money terms.

Review basic concepts.
(LO 1, 2)

DO IT! 1-3 Classify the following items as issuance of stock (I), dividends (D), revenues (R), or expenses (E). Then indicate whether each item increases or decreases stockholders' equity.

1. Dividends.
2. Rent revenue.
3. Advertising expense.
4. Stockholders invest cash in the business.

Evaluate effects of transactions on stockholders' equity
(LO 3)

DO IT! 1-4 Transactions made by Morlan and Co., a law firm, for the month of March are shown below. Prepare a tabular analysis which shows the effects of these transactions on the accounting equation, similar to that shown in Illustration 1-9 (page 20).

1. The company performed \$23,000 of services for customers, on credit.
2. The company received \$23,000 in cash from customers who had been billed for services (in transaction 1).
3. The company received a bill for \$1,800 of advertising, but will not pay it until a later date.
4. The company paid a dividend of \$5,000 in cash to stockholders.

Prepare tabular analysis.
(LO 4)

DO IT! 1-5 Presented below is selected information related to Garryowen Company at December 31, 2017. Garryowen reports financial information monthly.

Accounts Payable	\$ 3,000	Salaries and Wages Expense	\$16,500
Cash	9,000	Notes Payable	25,000
Advertising Expense	6,000	Rent Expense	9,800
Service Revenue	54,000	Accounts Receivable	13,500
Equipment	29,000	Dividends	7,500

Determine specific amounts on the financial statements.
(LO 5)

- (a) Determine the total assets of Garryowen Company at December 31, 2017.
- (b) Determine the net income that Garryowen Company reported for December 2017.
- (c) Determine the stockholders' equity of Garryowen Company at December 31, 2017.

EXERCISES

E1-1 Callison Company performs the following accounting tasks during the year.

- _____ Analyzing and interpreting information.
- _____ Classifying economic events.
- _____ Explaining uses, meaning, and limitations of data.
- _____ Keeping a systematic chronological diary of events.
- _____ Measuring events in dollars and cents.
- _____ Preparing accounting reports.
- _____ Reporting information in a standard format.
- _____ Selecting economic activities relevant to the company.
- _____ Summarizing economic events.

Classify the three activities of accounting.
(LO 1)

Accounting is “an information system that **identifies**, **records**, and **communicates** the economic events of an organization to interested users.”

Instructions

Categorize the accounting tasks performed by Callison as relating to either the identification (I), recording (R), or communication (C) aspects of accounting.

Identify users of accounting information.

(LO 1)

E1-2 (a) The following are users of financial statements.

- | | |
|--------------------------------|--|
| _____ Customers | _____ Securities and Exchange Commission |
| _____ Internal Revenue Service | _____ Store manager |
| _____ Labor unions | _____ Suppliers |
| _____ Marketing manager | _____ Vice president of finance |
| _____ Production supervisor | |

Instructions

Identify the users as being either **external users (E)** or **internal users (I)**.

(b) The following questions could be asked by an internal user or an external user.

- _____ Can we afford to give our employees a pay raise?
- _____ Did the company earn a satisfactory income?
- _____ Do we need to borrow in the near future?
- _____ How does the company’s profitability compare to other companies?
- _____ What does it cost us to manufacture each unit produced?
- _____ Which product should we emphasize?
- _____ Will the company be able to pay its short-term debts?

Instructions

Identify each of the questions as being more likely asked by an **internal user (I)** or an **external user (E)**.

Discuss ethics and the historical cost principle.

(LO 2)

E1-3 Sam Cresco, president of Cresco Company, has instructed Sharon Gross, the head of the accounting department for Cresco Company, to report the company’s land in the company’s accounting reports at its fair value of \$170,000 instead of its cost of \$100,000. Cresco says, “Showing the land at \$170,000 will make our company look like a better investment when we try to attract new investors next month.”

Instructions

Explain the ethical situation involved for Sharon Gross, identifying the stakeholders and the alternatives.

Use accounting concepts.

(LO 2)

E1-4 The following situations involve accounting principles and assumptions.

- Tina Company owns buildings that are worth substantially more than they originally cost. In an effort to provide more relevant information, Tina reports the buildings at fair value in its accounting reports.
- Fayette Company includes in its accounting records only transaction data that can be expressed in terms of money.
- Omar Shariff, president of Omar’s Oasis, records his personal living costs as expenses of Oasis.

Instructions

For each of the three situations, state if the accounting method used is correct or incorrect. If correct, identify which principle or assumption supports the method used. If incorrect, identify which principle or assumption has been violated.

Classify accounts as assets, liabilities, and stockholders’ equity.

(LO 3)

E1-5 Bailey Cleaners has the following balance sheet items.

- | | |
|------------------|----------------------------|
| Accounts payable | Accounts receivable |
| Cash | Notes payable |
| Equipment | Salaries and wages payable |
| Supplies | Common stock |

Instructions

Classify each item as an asset, liability, or stockholders’ equity.

Analyze the effect of transactions.

(LO 4)

E1-6 Selected transactions for Verdant Lawn Care Company are as follows.

- Sold common stock for cash to start business.
- Paid monthly rent.

3. Purchased equipment on account.
4. Billed customers for services performed.
5. Paid dividends.
6. Received cash from customers billed in (4).
7. Incurred advertising expense on account.
8. Purchased additional equipment for cash.
9. Received cash from customers when service was performed.

Instructions

List the numbers of the above transactions and describe the effect of each transaction on assets, liabilities, and stockholders' equity. For example, the first answer is (1) Increase in assets and increase in stockholders' equity.

E1-7 Keystone Computer Timeshare Company entered into the following transactions during May 2017.

1. Purchased computers for \$20,000 from Data Equipment on account.
2. Paid \$3,000 cash for May rent on storage space.
3. Received \$15,000 cash from customers for contracts billed in April.
4. Performed computer services for Ryan Construction Company for \$2,700 cash.
5. Paid Midland Power Co. \$11,000 cash for energy usage in May.
6. Stockholders invested an additional \$32,000 in the business.
7. Paid Data Equipment for the computers purchased in (1) above.
8. Incurred advertising expense for May of \$840 on account.

Analyze the effect of transactions on assets, liabilities, and stockholders' equity.

(LO 4)

Instructions

Indicate with the appropriate letter whether each of the transactions results in:

- (a) An increase in assets and a decrease in assets.
- (b) An increase in assets and an increase in stockholders' equity.
- (c) An increase in assets and an increase in liabilities.
- (d) A decrease in assets and a decrease in stockholders' equity.
- (e) A decrease in assets and a decrease in liabilities.
- (f) An increase in liabilities and a decrease in stockholders' equity.
- (g) An increase in stockholders' equity and a decrease in liabilities.

E1-8 An analysis of the transactions made by Foley & Co., a certified public accounting firm, for the month of August is shown below. Each increase and decrease in stockholders' equity is explained.

Analyze transactions and compute net income.

(LO 4, 5)

	Assets				=	Liabilities	+	Stockholders' Equity			
	Cash	Accounts Receivable	Supplies	Equipment				Accounts Payable	+	Common Stock	Retained Earnings
								Rev.	Exp.	Div.	
1.	+\$15,000							+\$15,000			
2.	-2,000			+\$5,000	+\$3,000						
3.	-750		+\$750								
4.	+4,900	+\$4,500									Service Revenue
5.	-1,500				-1,500						
6.	-2,000										
7.	-850								-\$850		Rent Expense
8.	+450	-450									
9.	-3,900								-3,900		Sal./Wages Expense
10.					+500				-500		Utilities Expense

Instructions

- (a) Describe each transaction that occurred for the month.
- (b) Determine how much stockholders' equity increased for the month.
- (c) Compute the amount of net income for the month.

E1-9 An analysis of transactions for Foley & Co. was presented in E1-8. Assume that August is the company's first month of business.

Prepare financial statements.

(LO 5)

Instructions

Prepare an income statement and a retained earnings statement for August and a balance sheet at August 31, 2017.

Determine net income (or loss).

(LO 5)

E1-10 Toth Company had the following assets and liabilities on the dates indicated.

<u>December 31</u>	<u>Total Assets</u>	<u>Total Liabilities</u>
2016	\$400,000	\$260,000
2017	\$480,000	\$300,000
2018	\$590,000	\$400,000

Toth began business on January 1, 2016, with an investment of \$100,000 from stockholders.

Instructions

From an analysis of the change in stockholders' equity during the year, compute the net income (or loss) for:

- 2016, assuming Toth paid \$15,000 in dividends for the year.
- 2017, assuming stockholders made an additional investment of \$50,000 and Toth paid no dividends in 2017.
- 2018, assuming stockholders made an additional investment of \$15,000 and Toth paid dividends of \$30,000 in 2018.

Analyze financial statement items.

(LO 5)

E1-11 Two items are omitted from each of the following summaries of balance sheet and income statement data for two corporations for the year 2017, Plunkett Co. and Herring Enterprises.

	<u>Plunkett Co.</u>	<u>Herring Enterprises</u>
Beginning of year:		
Total assets	\$ 97,000	\$122,000
Total liabilities	85,000	(c)
Total stockholders' equity	(a)	75,000
End of year:		
Total assets	160,000	180,000
Total liabilities	120,000	50,000
Total stockholders' equity	40,000	130,000
Changes during year in stockholders' equity:		
Additional investment	(b)	25,000
Dividends	15,000	(d)
Total revenues	215,000	100,000
Total expenses	175,000	55,000

Instructions

Determine the missing amounts.

Prepare income statement and retained earnings statement.

(LO 5)

E1-12 The following information relates to La Greca Co. for the year 2017.

Retained earnings, January 1, 2017	\$48,000	Advertising expense	\$ 1,800
Dividends during 2017	5,000	Rent expense	10,400
Service revenue	62,500	Utilities expense	3,100
Salaries and wages expense	28,000		

Instructions

After analyzing the data, prepare an income statement and a retained earnings statement for the year ending December 31, 2017.

Correct an incorrectly prepared balance sheet.

(LO 5)

E1-13 Robyn Howser is the bookkeeper for Madison Company. Robyn has been trying to determine the correct balance sheet for Madison Company. Madison's balance sheet is shown below.

MADISON COMPANY
Balance Sheet
December 31, 2017

<u>Assets</u>		<u>Liabilities</u>	
Cash	\$14,000	Accounts payable	\$15,000
Supplies	3,000	Accounts receivable	(8,500)
Equipment	48,000	Common stock	50,000
Dividends	9,000	Retained earnings	17,500
Total assets	<u>\$74,000</u>	Total liabilities and stockholders' equity	<u>\$74,000</u>

Instructions

Prepare a correct balance sheet.

E1-14 Wyco Park, a public camping ground near the Four Corners National Recreation Area, has compiled the following financial information as of December 31, 2017. *Compute net income and prepare a balance sheet.*

Revenues during 2017—camping fees	\$140,000	Notes payable	\$ 60,000	(LO 5)
Revenues during 2017—general store	47,000	Expenses during 2017	150,000	
Accounts payable	11,000	Supplies on hand	2,500	
Cash on hand	20,000	Common stock	20,000	
Original cost of equipment	105,500	Retained earnings	?	
Fair value of equipment	140,000			

Instructions

- (a) Determine Wyco Park's net income for 2017.
 (b) Prepare a balance sheet for Wyco Park as of December 31, 2017.

E1-15 Presented below is financial information related to the 2017 operations of Louisa Cruise Company. *Prepare an income statement.*

Maintenance and repairs expense	\$ 92,000
Utilities expense	10,000
Salaries and wages expense	142,000
Advertising expense	3,500
Ticket revenue	328,000

Instructions

Prepare the 2017 income statement for Louisa Cruise Company.

E1-16 Presented below is information related to Alexis and Ryans, Attorneys at Law. *Prepare a retained earnings statement.*

Retained earnings, January 1, 2017	\$ 23,000	(LO 5)
Legal service revenue—2017	340,000	
Total expenses—2017	211,000	
Assets, January 1, 2017	85,000	
Liabilities, January 1, 2017	62,000	
Assets, December 31, 2017	168,000	
Liabilities, December 31, 2017	80,000	
Dividends—2017	64,000	

Instructions

Prepare the 2017 retained earnings statement for Alexis and Ryans, Attorneys at Law.

E1-17 This information is for Paulo Company for the year ended December 31, 2017. *Prepare a cash flow statement.*

Cash received from revenues from customers	\$600,000	(LO 5)
Cash received for issuance of common stock	280,000	
Cash paid for new equipment	115,000	
Cash dividends paid	18,000	
Cash paid for expenses	430,000	
Cash balance 1/1/17	30,000	

Instructions

Prepare the 2017 statement of cash flows for Paulo Company.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Analyze transactions and compute net income.

(LO 3, 4)

P1-1A Fredonia Repair Inc. was started on May 1. A summary of May transactions is presented below.

1. Stockholders invested \$10,000 cash in the business in exchange for common stock.
2. Purchased equipment for \$5,000 cash.
3. Paid \$400 cash for May office rent.
4. Paid \$300 cash for supplies.
5. Incurred \$250 of advertising costs in the *Beacon News* on account.
6. Received \$4,700 in cash from customers for repair service.
7. Declared and paid a \$700 cash dividend.
8. Paid part-time employee salaries \$1,000.
9. Paid utility bills \$140.
10. Performed repair services worth \$1,100 on account.
11. Collected cash of \$120 for services billed in transaction (10).

Instructions

(a) Total assets \$13,560

Check figures let you know if you are on the right track with your solution.

(b) Net income \$4,010

- (a) Prepare a tabular analysis of the transactions using the following column headings: Cash, Accounts Receivable, Supplies, Equipment, Accounts Payable, Common Stock, and Retained Earnings (with separate columns for Revenues, Expenses, and Dividends). Include margin explanations for any changes in Retained Earnings. Revenue is called Service Revenue.
- (b) From an analysis of the Retained Earnings columns, compute the net income or net loss for May.

Analyze transactions and prepare income statement, retained earnings statement, and balance sheet.

(LO 3, 4, 5)

P1-2A On August 31, the balance sheet of La Brava Veterinary Clinic showed Cash \$9,000, Accounts Receivable \$1,700, Supplies \$600, Equipment \$6,000, Accounts Payable \$3,600, Common Stock \$13,000, and Retained Earnings \$700. During September, the following transactions occurred.

1. Paid \$2,900 cash for accounts payable due.
2. Collected \$1,300 of accounts receivable.
3. Purchased additional equipment for \$2,100, paying \$800 in cash and the balance on account.
4. Recognized revenue of \$7,300, of which \$2,500 is collected in cash and the balance is due in October.
5. Declared and paid a \$400 cash dividend.
6. Paid salaries \$1,700, rent for September \$900, and advertising expense \$200.
7. Incurred utilities expense for month on account \$170.
8. Received \$10,000 from Capital Bank on a 6-month note payable.

Instructions

(a) Ending cash \$15,900

(b) Net income \$4,330
Total assets \$29,800

- (a) Prepare a tabular analysis of the September transactions beginning with August 31 balances. The column headings should be as follows: Cash + Accounts Receivable + Supplies + Equipment = Notes Payable + Accounts Payable + Common Stock + Retained Earnings + Revenues – Expenses – Dividends.
- (b) Prepare an income statement for September, a retained earnings statement for September, and a balance sheet at September 30.

Prepare income statement, retained earnings statement, and balance sheet.

(LO 5)

P1-3A On May 1, Nimbus Flying School, a company that provides flying lessons, was started with an investment of \$45,000 cash in the business. Following are the assets and liabilities of the company on May 31, 2017, and the revenues and expenses for the month of May.

Cash	\$ 4,650	Notes Payable	\$28,000
Accounts Receivable	7,400	Rent Expense	900
Equipment	64,000	Maintenance and	
Service Revenue	6,800	Repairs Expense	350
Advertising Expense	500	Gasoline Expense	2,500
Accounts Payable	1,400	Utilities Expense	400

No additional investments were made in May, but the company paid dividends of \$500 during the month.

Instructions

- (a) Prepare an income statement and a retained earnings statement for the month of May and a balance sheet at May 31.
- (b) Prepare an income statement and a retained earnings statement for May assuming the following data are not included above: (1) \$900 worth of services were performed and billed but not collected at May 31, and (2) \$1,500 of gasoline expense was incurred but not paid.

- (a) Net income \$2,150
Total assets \$76,050
- (b) Net income \$1,550

P1-4A Nancy Tercek started a delivery service, Tercek Deliveries, on June 1, 2017. The following transactions occurred during the month of June.

Analyze transactions and prepare financial statements.

- June 1 Stockholders invested \$10,000 cash in the business in exchange for common stock.
- 2 Purchased a used van for deliveries for \$14,000. Nancy paid \$2,000 cash and signed a note payable for the remaining balance.
- 3 Paid \$500 for office rent for the month.
- 5 Performed \$4,800 of services on account.
- 9 Declared and paid \$300 in cash dividends.
- 12 Purchased supplies for \$150 on account.
- 15 Received a cash payment of \$1,250 for services performed on June 5.
- 17 Purchased gasoline for \$100 on account.
- 20 Received a cash payment of \$1,500 for services performed.
- 23 Made a cash payment of \$500 on the note payable.
- 26 Paid \$250 for utilities.
- 29 Paid for the gasoline purchased on account on June 17.
- 30 Paid \$1,000 for employee salaries.

(LO 3, 4, 5)

Instructions

- (a) Show the effects of the previous transactions on the accounting equation using the following format.

(a) Total assets \$25,800

		Assets			=	Liabilities		+	Stockholders' Equity				
Date	Cash	+ Accounts Receivable	+ Supplies	+ Equipment	=	Notes Payable	+ Accounts Payable	+ Common Stock	Retained Earnings				
									Rev.	-	Exp.	-	Div.

Include margin explanations for any changes in the Retained Earnings account in your analysis.

- (b) Prepare an income statement for the month of June.
- (c) Prepare a balance sheet at June 30, 2017.

(b) Net income \$4,450
(c) Cash \$8,100

P1-5A Financial statement information about four different companies is as follows.

Determine financial statement amounts and prepare retained earnings statement.

	Donatello Company	Leonardo Company	Michelangelo Company	Raphael Company
January 1, 2017				
Assets	\$ 75,000	\$110,000	(g)	\$150,000
Liabilities	48,000	(d)	\$ 75,000	(j)
Stockholders' equity	(a)	60,000	45,000	100,000
December 31, 2017				
Assets	(b)	137,000	200,000	(k)
Liabilities	55,000	75,000	(h)	80,000
Stockholders' equity	40,000	(e)	130,000	140,000
Stockholders' equity changes in year				
Additional investment	(c)	15,000	10,000	15,000
Dividends	6,000	(f)	14,000	10,000
Total revenues	350,000	420,000	(i)	500,000
Total expenses	335,000	382,000	342,000	(l)

(LO 4, 5)

Instructions

- (a) Determine the missing amounts. (*Hint:* For example, to solve for (a), Assets – Liabilities = Stockholders' Equity = \$27,000.)
- (b) Prepare the retained earnings statement for Leonardo Company. Assume beginning retained earnings was \$20,000.
- (c) Write a memorandum explaining the sequence for preparing financial statements and the interrelationship of the retained earnings statement to the income statement and balance sheet.

PROBLEMS: SET B AND SET C

Visit the book's website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

CONTINUING PROBLEM

The *Cookie Creations* problem starts in this chapter and continues through Chapter 14. You also can find this problem at the book's companion website.

Shutterstock

COOKIE CREATIONS

CC1 Natalie Koebel spent much of her childhood learning the art of cookie-making from her grandmother. They passed many happy hours mastering every type of cookie imaginable and later creating new recipes that were both healthy and delicious. Now at the start of her second year in college, Natalie is investigating various possibilities for starting her own business as part of the requirements of the entrepreneurship program in which she is enrolled.

A long-time friend insists that Natalie has to somehow include cookies in her business plan. After a series of brainstorming sessions, Natalie settles on the idea of operating a cookie-making school. She will start on a part-time basis and offer her services in people's homes. Now that she has started thinking about it, the possibilities seem endless. During the fall, she will concentrate on holiday cookies. She will offer individual lessons and group sessions (which will probably be more entertainment than education for the participants). Natalie also decides to include children in her target market.

The first difficult decision is coming up with the perfect name for her business. In the end, she settles on "Cookie Creations" and then moves on to more important issues.

Instructions

- What form of business organization—proprietorship, partnership, or corporation—do you recommend that Natalie use for her business? Discuss the benefits and weaknesses of each form and give the reasons for your choice.
- Will Natalie need accounting information? If yes, what information will she need and why? How often will she need this information?
- Identify specific asset, liability, and stockholders' equity accounts that Cookie Creations will likely use to record its business transactions.
- Should Natalie open a separate bank account for the business? Why or why not?

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP1-1 The financial statements of **Apple Inc.** for 2013 are presented in Appendix A. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

Refer to Apple's financial statements and answer the following questions.

- What were Apple's total assets at September 28, 2013? At September 29, 2012?
- How much cash (and cash equivalents) did Apple have on September 28, 2013?
- What amount of accounts payable did Apple report on September 28, 2013? On September 29, 2012?
- What were Apple's net sales in 2011? In 2012? In 2013?
- What is the amount of the change in Apple's net income from 2012 to 2013?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP1-2 PepsiCo's financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine the following for each company.
- (1) Total assets at December 28, 2013, for PepsiCo and for Coca-Cola at December 31, 2013.
 - (2) Accounts (notes) receivable, net at December 28, 2013, for PepsiCo and at December 31, 2013, for Coca-Cola.
 - (3) Net revenues for the year ended in 2013.
 - (4) Net income for the year ended in 2013.
- (b) What conclusions concerning the two companies can be drawn from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP1-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine the following for each company.
- (1) Total assets at December 31, 2013, for Amazon and for Wal-Mart at January 31, 2014.
 - (2) Receivables (net) at December 31, 2013, for Amazon and for Wal-Mart at January 31, 2014.
 - (3) Net sales (product only) for the year ended in 2013 (2014 for Wal-Mart).
 - (4) Net income for the year ended in 2013 (2014 for Wal-Mart).
- (b) What conclusions concerning these two companies can be drawn from these data?

Real-World Focus

BYP1-4 This exercise will familiarize you with skill requirements, job descriptions, and salaries for accounting careers.

Address: www.careers-in-accounting.com, or go to www.wiley.com/college/weygandt

Instructions

Go to the site shown above. Answer the following questions.

- (a) What are the three broad areas of accounting (from "Skills and Talents")?
- (b) List eight skills required in accounting.
- (c) How do the three accounting areas differ in terms of these eight required skills?
- (d) Explain one of the key job options in accounting.
- (e) What is the overall salary range for a junior staff accountant?

CRITICAL THINKING

Decision-Making Across the Organization

BYP1-5 Kathy and James Mohr, local golf stars, opened the Chip-Shot Driving Range Company on March 1, 2017. They invested \$25,000 cash and received common stock in exchange for their investment. A caddy shack was constructed for cash at a cost of \$8,000, and \$800 was spent on golf balls and golf clubs. The Mohrs leased five acres of land at a cost of \$1,000 per month and paid the first month's rent. During the first month, advertising costs totaled \$750, of which \$150 was unpaid at March 31, and \$400 was paid to members of the high-school golf team for retrieving golf balls. All revenues from customers were deposited in the company's bank account. On March 15, Kathy and James received a dividend of \$1,000. A \$100 utility bill was received on March 31 but was not paid. On March 31, the balance in the company's bank account was \$18,900.

Kathy and James thought they had a pretty good first month of operations. But, their estimates of profitability ranged from a loss of \$6,100 to net income of \$2,450.

Instructions

With the class divided into groups, answer the following.

- How could the Mohrs have concluded that the business operated at a loss of \$6,100? Was this a valid basis on which to determine net income?
- How could the Mohrs have concluded that the business operated at a net income of \$2,450? (*Hint:* Prepare a balance sheet at March 31.) Was this a valid basis on which to determine net income?
- Without preparing an income statement, determine the actual net income for March.
- What was the revenue recognized in March?

Communication Activity

BYP1-6 Ashley Hirano, the bookkeeper for New York Company, has been trying to develop the correct balance sheet for the company. The company's balance sheet is shown below.

NEW YORK COMPANY			
Balance Sheet			
For the Month Ended December 31, 2017			
Assets		Liabilities	
Equipment	\$25,500	Common stock	\$26,000
Cash	9,000	Accounts receivable	(6,000)
Supplies	2,000	Retained earnings	(2,000)
Accounts payable	(8,000)	Notes payable	10,500
	<u>\$28,500</u>		<u>\$28,500</u>

Instructions

Explain to Ashley Hirano in a memo why the original balance sheet is incorrect, and what should be done to correct it.

Ethics Case

BYP1-7 After numerous campus interviews, Greg Thorpe, a senior at Great Northern College, received two office interview invitations from the Baltimore offices of two large firms. Both firms offered to cover his out-of-pocket expenses (travel, hotel, and meals). He scheduled the interviews for both firms on the same day, one in the morning and one in the afternoon. At the conclusion of each interview, he submitted to both firms his total out-of-pocket expenses for the trip to Baltimore: mileage \$112 (280 miles at \$0.40), hotel \$130, meals \$36, and parking and tolls \$18, for a total of \$296. He believes this approach is appropriate. If he had made two trips, his cost would have been two times \$296. He is also certain that neither firm knew he had visited the other on that same trip. Within 10 days, Greg received two checks in the mail, each in the amount of \$296.

Instructions

- Who are the stakeholders (affected parties) in this situation?
- What are the ethical issues in this case?
- What would you do in this situation?

All About You

BYP1-8 Some people are tempted to make their finances look worse to get financial aid. Companies sometimes also manage their financial numbers in order to accomplish certain goals. Earnings management is the planned timing of revenues, expenses, gains, and losses to smooth out bumps in net income. In managing earnings, companies' actions vary from being within the range of ethical activity to being both unethical and illegal attempts to mislead investors and creditors.

Instructions

Provide responses for each of the following questions.

- Discuss whether you think each of the following actions (adapted from www.finaid.org/fafsa/maximize.phtml) to increase the chances of receiving financial aid is ethical.
 - Spend the student's assets and income first, before spending parents' assets and income.
 - Accelerate necessary expenses to reduce available cash. For example, if you need a new car, buy it before applying for financial aid.

- (3) State that a truly financially dependent child is independent.
- (4) Have a parent take an unpaid leave of absence for long enough to get below the “threshold” level of income.
- (b) What are some reasons why a **company** might want to overstate its earnings?
- (c) What are some reasons why a **company** might want to understate its earnings?
- (d) Under what circumstances might an otherwise ethical person decide to illegally overstate or understate earnings?

BYP1-9 When companies need money, they go to investors or creditors. Before investors or creditors will give a company cash, they want to know the company’s financial position and performance. They want to see the company’s financial statements—the balance sheet and the income statement. When students need money for school, they often apply for financial aid. When you apply for financial aid, you must submit your own version of a financial statement—the Free Application for Federal Student Aid (FAFSA) form.

Suppose you have \$4,000 in cash and \$4,000 in credit card bills. The more cash and other assets that you have, the less likely you are to get financial aid. Also, if you have a lot of consumer debt (credit card bills), schools are not more likely to loan you money. To increase your chances of receiving aid, should you use the cash to pay off your credit card bills and therefore make yourself look “worse off” to the financial aid decision-makers?

YES: You are playing within the rules. You are not hiding assets. You are simply restructuring your assets and liabilities to best conform with the preferences that are built into the federal aid formulas.

NO: You are engaging in a transaction solely to take advantage of a loophole in the federal aid rules. In doing so, you are potentially depriving someone who is actually worse off than you from receiving aid.

Instructions

Write a response indicating your position regarding this situation. Provide support for your view.

FASB Codification Activity

BYP1-10 The FASB has developed the Financial Accounting Standards Board Accounting Standards Codification (or more simply “the Codification”). The FASB’s primary goal in developing the Codification is to provide in one place all the authoritative literature related to a particular topic. To provide easy access to the Codification, the FASB also developed the Financial Accounting Standards Board Codification Research System (CRS). CRS is an online, real-time database that provides easy access to the Codification. The Codification and the related CRS provide a topically organized structure, subdivided into topic, subtopics, sections, and paragraphs, using a numerical index system.

You may find this system useful in your present and future studies, and so we have provided an opportunity to use this online system as part of the *Broadening Your Perspective* section.

Instructions

Academic access to the FASB Codification is available through university subscriptions, obtained from the American Accounting Association (at <http://aaahq.org/FASB/Access.cfm>), for an annual fee of \$250. This subscription covers an unlimited number of students within a single institution. Once this access has been obtained by your school, you should log in (at <http://aaahq.org/ascLogin.cfm>) and familiarize yourself with the resources that are accessible at the FASB Codification site.

Considering People, Planet, and Profit

BYP1-11 This chapter’s Feature Story discusses the fact that although **Clif Bar & Company** is not a public company, it does share its financial information with its employees as part of its open-book management approach. Further, although it does not publicly share its financial information, it does provide a different form of an annual report to external users. In this report, the company provides information regarding its sustainability efforts.

Address: www.issuu.com/clifbar/docs/clif_all_aspirations_2012

Instructions

Access the 2012 annual report of Clif Bar & Company at the site shown above and then answer the following questions.

- (a) What are the Five Aspirations?
- (b) What was the company’s 10-year compounded annual growth rate? What is the amount of 10-year organic purchases made by the company?

A Look at IFRS

LEARNING
OBJECTIVE

7

Describe the impact of international accounting standards on U.S. financial reporting.

Most agree that there is a need for one set of international accounting standards. Here is why:

Multinational corporations. Today's companies view the entire world as their market. For example, **Coca-Cola**, **Intel**, and **McDonald's** generate more than 50% of their sales outside the United States. Many foreign companies, such as **Toyota**, **Nestlé**, and **Sony**, find their largest market to be the United States.

Mergers and acquisitions. The mergers between **Fiat/Chrysler** and **Vodafone/Mannesmann** suggest that we will see even more such business combinations of companies from different countries in the future.

Information technology. As communication barriers continue to topple through advances in technology, companies and individuals in different countries and markets are becoming more comfortable buying and selling goods and services from one another.

Financial markets. Financial markets are of international significance today. Whether it is currency, equity securities (stocks), bonds, or derivatives, there are active markets throughout the world trading these types of instruments.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to accounting fundamentals.

Similarities

- The basic techniques for recording business transactions are the same for U.S. and international companies.
- Both international and U.S. accounting standards emphasize transparency in financial reporting. Both sets of standards are primarily driven by meeting the needs of investors and creditors.
- The three most common forms of business organizations, proprietorships, partnerships, and corporations, are also found in countries that use international accounting standards.

Differences

- International standards are referred to as International Financial Reporting Standards (IFRS), developed by the International Accounting Standards Board. Accounting standards in the United States are referred to as generally accepted accounting principles (GAAP) and are developed by the Financial Accounting Standards Board.
- IFRS tends to be simpler in its accounting and disclosure requirements; some people say it is more "principles-based." GAAP is more detailed; some people say it is more "rules-based."
- The internal control standards applicable to Sarbanes-Oxley (SOX) apply only to large public companies listed on U.S. exchanges. There is continuing debate as to whether non-U.S. companies should have to comply with this extra layer of regulation.

Looking to the Future

Both the IASB and the FASB are hard at work developing standards that will lead to the elimination of major differences in the way certain transactions are accounted for and reported.

IFRS Practice

IFRS Self-Test Questions

- Which of the following is **not** a reason why a single set of high-quality international accounting standards would be beneficial?
 - Mergers and acquisition activity.
 - Financial markets.
 - Multinational corporations.
 - GAAP is widely considered to be a superior reporting system.
- The Sarbanes-Oxley Act determines:
 - international tax regulations.
 - internal control standards as enforced by the IASB.
 - internal control standards of U.S. publicly traded companies.
 - U.S. tax regulations.
- IFRS is considered to be more:
 - principles-based and less rules-based than GAAP.
 - rules-based and less principles-based than GAAP.
 - detailed than GAAP.
 - None of the above.

IFRS Exercises

IFRS1-1 Who are the two key international players in the development of international accounting standards? Explain their role.

IFRS1-2 What is the benefit of a single set of high-quality accounting standards?

International Financial Reporting Problem: Louis Vuitton

IFRS1-3 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Visit Louis Vuitton's corporate website and answer the following questions from the company's 2013 annual report.

- What accounting firm performed the audit of Louis Vuitton's financial statements?
- What is the address of the company's corporate headquarters?
- What is the company's reporting currency?

Answers to IFRS Self-Test Questions

1. d 2. c 3. a

2

The Recording Process

CHAPTER PREVIEW In Chapter 1, we analyzed business transactions in terms of the accounting equation, and we presented the cumulative effects of these transactions in tabular form. Imagine a company like **MF Global** (as in the Feature Story below) using the same tabular format as Softbyte Inc. to keep track of its transactions. In a single day, MF Global engaged in thousands of business transactions. To record each transaction this way would be impractical, expensive, and unnecessary. Instead, companies use a set of procedures and records to keep track of transaction data more easily. This chapter introduces and illustrates these basic procedures and records.

FEATURE STORY

Accidents Happen

How organized are you financially? Take a short quiz. Answer yes or no to each question:

- Does your wallet contain so many cash machine receipts that you've been declared a walking fire hazard?
- Do you wait until your debit card is denied before checking the status of your funds?
- Was Aaron Rodgers (the quarterback for the **Green Bay Packers**) playing high school football the last time you verified the accuracy of your bank account?

If you think it is hard to keep track of the many transactions that make up your life, imagine how difficult it is for a big corporation to do so. Not only that, but now consider how important it is for a large company to have good accounting records, especially if it has control of your life savings. **MF Global Holdings Ltd** is such a company. As a big investment broker, it held billions of dollars of investments for clients. If you had your life savings invested at MF Global, you might be slightly displeased if you heard this from one of its representatives: "You know, I kind of remember an account

for someone with a name like yours—now what did we do with that?"

Unfortunately, that is almost exactly what happened to MF Global's clients shortly before it filed for bankruptcy. During the days immediately following the bankruptcy filing, regulators and auditors struggled to piece things together. In the words of one regulator, "Their books are a disaster . . . we're trying to figure out what numbers are real numbers." One company that considered buying an interest in MF Global walked away from the deal because it "couldn't get a sense of what was on the balance sheet." That company said the information that should have been instantly available instead took days to produce.

It now appears that MF Global did not properly segregate customer accounts from company accounts. And, because of its sloppy record-keeping, customers were not protected when the company had financial troubles. Total customer losses were approximately \$1 billion. As you can see, accounting matters!

CHAPTER OUTLINE

Learning Objectives

1

Describe how accounts, debits, and credits are used to record business transactions.

- Debits and credits
- Stockholders' equity relationships
- Summary of debit/credit rules

DO IT!

1

Normal Account Balances

2

Indicate how a journal is used in the recording process.

- Steps in the recording process
- The journal

DO IT!

2

Recording Business Activities

3

Explain how a ledger and posting help in the recording process.

- The ledger
- Posting
- The recording process illustrated
- Summary illustration of journalizing and posting

DO IT!

3

Posting

4

Prepare a trial balance.

- Limitations of a trial balance
- Locating errors
- Dollar signs and underlining

DO IT!

4

Trial Balance

Go to the **REVIEW AND PRACTICE** section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit **WileyPLUS with ORION** for additional tutorials and practice opportunities.

LEARNING
OBJECTIVE

1

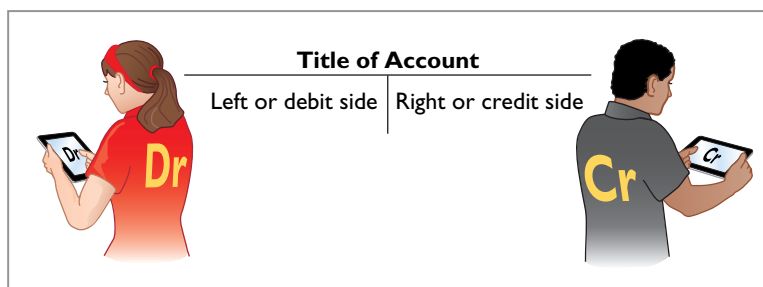

Describe how accounts, debits, and credits are used to record business transactions.

An **account** is an individual accounting record of increases and decreases in a specific asset, liability, or stockholders' equity item. For example, Softbyte Inc. (the company discussed in Chapter 1) would have separate accounts for Cash, Accounts Receivable, Accounts Payable, Service Revenue, Salaries and Wages Expense, and so on. (Note that whenever we are referring to a specific account, we capitalize the name.)

In its simplest form, an account consists of three parts: (1) a title, (2) a left or debit side, and (3) a right or credit side. Because the format of an account resembles the letter T, we refer to it as a **T-account**. Illustration 2-1 shows the basic form of an account.

Illustration 2-1

Basic form of account

We use this form often throughout this textbook to explain basic accounting relationships.

Debits and Credits

The term **debit** indicates the left side of an account, and **credit** indicates the right side. They are commonly abbreviated as **Dr.** for debit and **Cr.** for credit. They **do not** mean increase or decrease, as is commonly thought. We use the terms **debit** and **credit** repeatedly in the recording process to describe **where** entries are made in accounts. For example, the act of entering an amount on the left side of an account is called **debiting** the account. Making an entry on the right side is **crediting** the account.

When comparing the totals of the two sides, an account shows a **debit balance** if the total of the debit amounts exceeds the credits. An account shows a **credit balance** if the credit amounts exceed the debits. Note the position of the debit side and credit side in Illustration 2-1.

The procedure of recording debits and credits in an account is shown in Illustration 2-2 for the transactions affecting the Cash account of Softbyte Inc. The data are taken from the Cash column of the tabular summary in Illustration 1-9 (page 20).

Illustration 2-2

Tabular summary and account form for Softbyte's Cash account

Tabular Summary		Account Form	
Cash		Cash	
\$15,000		(Debits) 15,000	(Credits) 7,000
-7,000		1,200	1,700
1,200		1,500	250
1,500		600	1,300
-1,700			
-250		Balance 8,050	
600		(Debit)	
-1,300			
<u>\$ 8,050</u>			

Every positive item in the tabular summary represents a receipt of cash. Every negative amount represents a payment of cash. **Notice that in the account form, we record the increases in cash as debits and the decreases in cash as credits.** For example, the \$15,000 receipt of cash (in red) is debited to Cash, and the -\$7,000 payment of cash (in blue) is credited to Cash.

Having increases on one side and decreases on the other reduces recording errors and helps in determining the totals of each side of the account as well as the account balance. The balance is determined by netting the two sides (subtracting one amount from the other). The account balance, a debit of \$8,050, indicates that Softbyte had \$8,050 more increases than decreases in cash. In other words, Softbyte started with a balance of zero and now has \$8,050 in its Cash account.

DEBIT AND CREDIT PROCEDURE

In Chapter 1, you learned the effect of a transaction on the basic accounting equation. Remember that each transaction must affect two or more accounts to keep the basic accounting equation in balance. In other words, for each transaction, debits must equal credits. The equality of debits and credits provides the basis for the **double-entry system** of recording transactions.

Under the double-entry system, the dual (two-sided) effect of each transaction is recorded in appropriate accounts. This system provides a logical method for recording transactions. As discussed in the Feature Story about **MF Global**, the double-entry system also helps ensure the accuracy of the recorded amounts as well as the detection of errors. If every transaction is recorded with equal debits and credits, the sum of all the debits to the accounts must equal the sum of all the credits.

The double-entry system for determining the equality of the accounting equation is much more efficient than the plus/minus procedure used in Chapter 1. The following discussion illustrates debit and credit procedures in the double-entry system.

DR./CR. PROCEDURES FOR ASSETS AND LIABILITIES

In Illustration 2-2 for Softbyte Inc., increases in Cash—an asset—were entered on the left side, and decreases in Cash were entered on the right side. We know that both sides of the basic equation (Assets = Liabilities + Stockholders' Equity) must be equal. It therefore follows that increases and decreases in liabilities will have to be recorded **opposite from** increases and decreases in assets. Thus, increases in liabilities must be entered on the right or credit side, and decreases in liabilities must be entered on the left or debit side. The effects that debits and credits have on assets and liabilities are summarized in Illustration 2-3.

Debits	Credits
Increase assets	Decrease assets
Decrease liabilities	Increase liabilities

Illustration 2-3
Debit and credit effects—
assets and liabilities

Asset accounts normally show debit balances. That is, debits to a specific asset account should exceed credits to that account. Likewise, **liability accounts normally show credit balances.** That is, credits to a liability account should exceed debits to that account. The **normal balance** of an account is on the side where an increase in the account is recorded. Illustration 2-4 shows the normal balances for assets and liabilities.

Illustration 2-4
Normal balances—assets and
liabilities

International Note

Rules for accounting for specific events sometimes differ across countries. For example, European companies rely less on historical cost and more on fair value than U.S. companies. Despite the differences, the double-entry accounting system is the basis of accounting systems worldwide.

Knowing the normal balance in an account may help you trace errors. For example, a credit balance in an asset account such as Land or a debit balance in a liability account such as Salaries and Wages Payable usually indicates an error. Occasionally, though, an abnormal balance may be correct. The Cash account, for example, will have a credit balance when a company has overdrawn its bank balance (i.e., written a check that “bounced”).

STOCKHOLDERS' EQUITY

As Chapter 1 indicated, there are five subdivisions of stockholders' equity: common stock, retained earnings, dividends, revenues, and expenses. In a double-entry system, companies keep accounts for each of these subdivisions, as explained below.

COMMON STOCK Companies issue **common stock** in exchange for the owners' investment paid in to the corporation. Credits increase the Common Stock account, and debits decrease it. For example, when an owner invests cash in the business in exchange for shares of the corporation's stock, the company debits (increases) Cash and credits (increases) Common Stock.

Illustration 2-5 shows the rules of debit and credit for the Common Stock account.

Illustration 2-5

Debit and credit effects—
common stock

Debits	Credits
Decrease Common Stock	Increase Common Stock

Illustration 2-6 shows the normal balance for Common Stock.

Illustration 2-6

Normal balance—common
stock

Common Stock	
Debit for decrease	Credit for increase
↓	↑ Normal balance

Helpful Hint

The rules for debit and credit and the normal balances of common stock and retained earnings are the same as for liabilities.

RETAINED EARNINGS **Retained earnings** is net income that is kept (retained) in the business. It represents the portion of stockholders' equity that the company has accumulated through the profitable operation of the business. Credits (net income) increase the Retained Earnings account, and debits (dividends or net losses) decrease it, as Illustration 2-7 shows.

Illustration 2-7

Debit and credit effects and
normal balance—retained
earnings

Retained Earnings	
Debit for decrease	Credit for increase
↓	↑ Normal balance

DIVIDENDS A **dividend** is a company's distribution to its stockholders on a pro rata (equal) basis. The most common form of a distribution is a **cash dividend**. Dividends reduce the stockholders' claims on retained earnings. Debits increase the Dividends account, and credits decrease it. Illustration 2-8 shows the normal balance for Dividends.

Dividends	
Debit for increase	Credit for decrease
Normal balance	

Illustration 2-8

Investor Insight Chicago Cubs

Jonathan Daniel/Getty Images, Inc.

Keeping Score

The **Chicago Cubs** baseball team probably has these major revenue and expense accounts:

Revenues	Expenses
Admissions (ticket sales)	Players' salaries
Concessions	Administrative salaries
Television and radio	Travel
Advertising	Ballpark maintenance

Do you think that the **Chicago Bears** football team would be likely to have the same major revenue and expense accounts as the Cubs? (Go to **WileyPLUS** for this answer and additional questions.)

REVENUES AND EXPENSES The purpose of earning revenues is to benefit the stockholders of the business. When a company recognizes revenues, stockholders' equity increases. Revenues are a subdivision of stockholders' equity that provides information as to **why** stockholders' equity increased. Credits increase revenue accounts and debits decrease them. Therefore, **the effect of debits and credits on revenue accounts is the same as their effect on stockholders' equity.**

Expenses have the opposite effect. Expenses decrease stockholders' equity. Since expenses decrease net income and revenues increase it, it is logical that the increase and decrease sides of expense accounts should be the opposite of revenue accounts. Thus, expense accounts are increased by debits and decreased by credits. Illustration 2-9 shows the rules of debits and credits for revenues and expenses.

Helpful Hint
Because revenues increase stockholders' equity, a revenue account has the same debit/credit rules as the Common Stock account. Expenses have the opposite effect.

Debits	Credits
Decrease revenues	Increase revenues
Increase expenses	Decrease expenses

Illustration 2-9
Debit and credit effects—revenues and expenses

Credits to revenue accounts should exceed debits. Debits to expense accounts should exceed credits. Thus, revenue accounts normally show credit balances, and expense accounts normally show debit balances. Illustration 2-10 shows the normal balance for revenues and expenses.

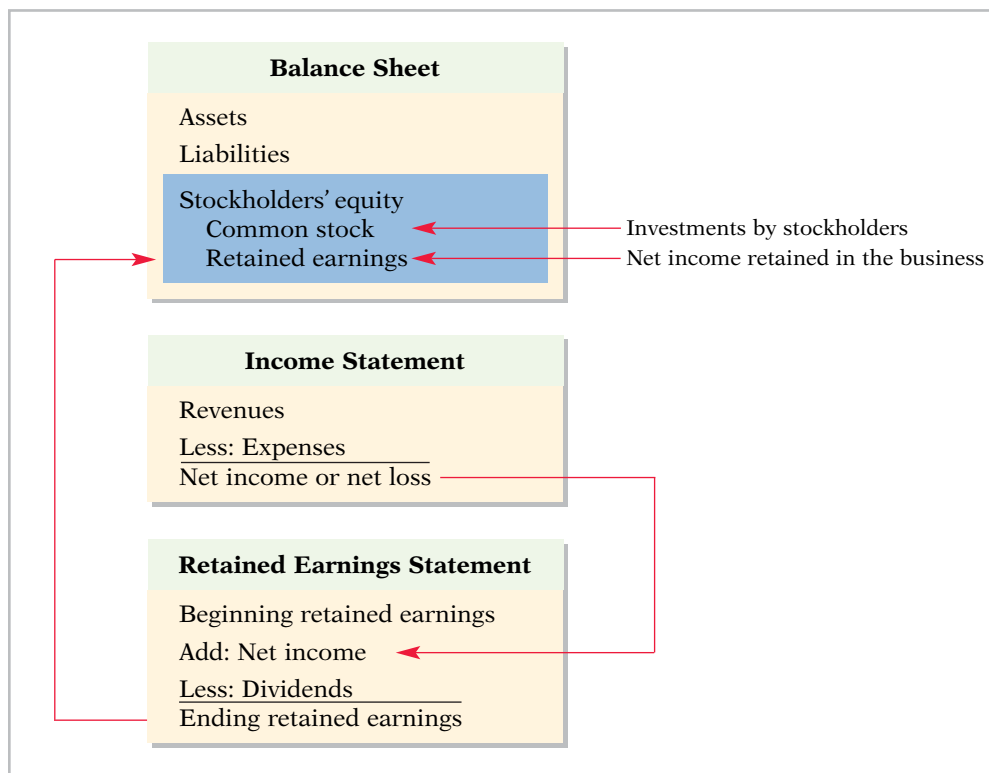

Revenues		Expenses	
Debit for decrease	Credit for increase	Debit for increase	Credit for decrease
	Normal balance	Normal balance	

Illustration 2-10
Normal balances—revenues and expenses

Stockholders' Equity Relationships

As Chapter 1 indicated, companies report common stock and retained earnings in the stockholders' equity section of the balance sheet. They report dividends on the retained earnings statement. And they report revenues and expenses on the income statement. Dividends, revenues, and expenses are eventually transferred to retained earnings at the end of the period. As a result, a change in any one of these three items affects stockholders' equity. Illustration 2-11 shows the relationships related to stockholders' equity.

Illustration 2-11
Stockholders' equity relationships

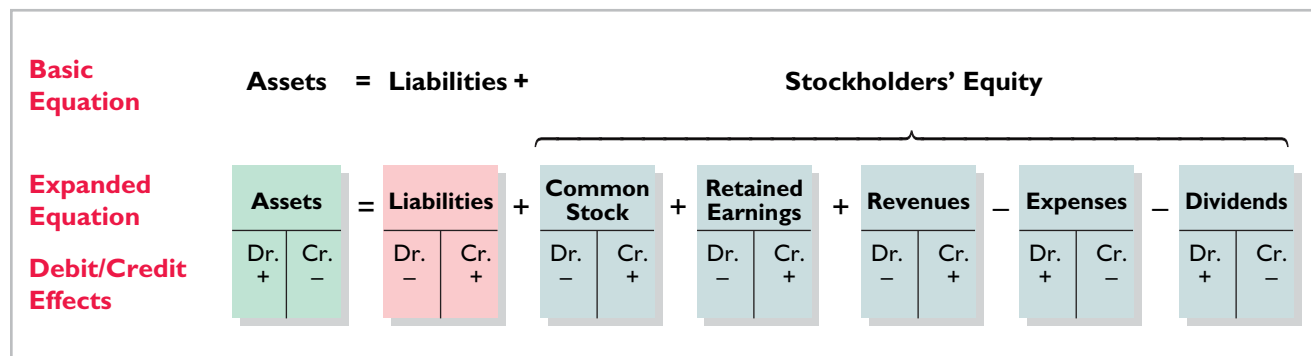

Helpful Hint

You may want to bookmark Illustration 2-12. You probably will refer to it often.

Summary of Debit/Credit Rules

Illustration 2-12 shows a summary of the debit/credit rules and effects on each type of account. Study this diagram carefully. It will help you understand the fundamentals of the double-entry system.

Illustration 2-12
Summary of debit/credit rules

DO IT!**1****Normal Account Balances**

Kate Browne, president of Hair It Is, Inc. has just rented space in a shopping mall in which she will open and operate a beauty salon. A friend has advised Kate to set up a double-entry set of accounting records in which to record all of her business transactions.

Identify the balance sheet accounts that Hair It Is, Inc. will likely use to record the transactions needed to establish and open the business. Also, indicate whether the normal balance of each account is a debit or a credit.

Solution

Hair It Is, Inc. would likely use the following accounts to record the transactions needed to ready the beauty salon for opening day:

Cash (debit balance)	Equipment (debit balance)
Supplies (debit balance)	Accounts Payable (credit balance)
Notes Payable (credit balance), if the business borrows money	Common Stock (credit balance)

Related exercise material: **BE2-1, BE2-2, E2-1, E2-2, E2-4, and DO IT 2-1.**

Action Plan

- ✓ Determine the types of accounts needed. Kate will need asset accounts for each different type of asset she invests in the business, and liability accounts for any debts she incurs.
- ✓ Understand the types of stockholders' equity accounts. When Kate begins the business, she will need only Common Stock. Later, she will need other stockholders' equity accounts.

LEARNING OBJECTIVE**2****Indicate how a journal is used in the recording process.****Steps in the Recording Process**

Although it is possible to enter transaction information directly into the accounts without using a journal, few businesses do so. Practically every business uses three basic steps in the recording process:

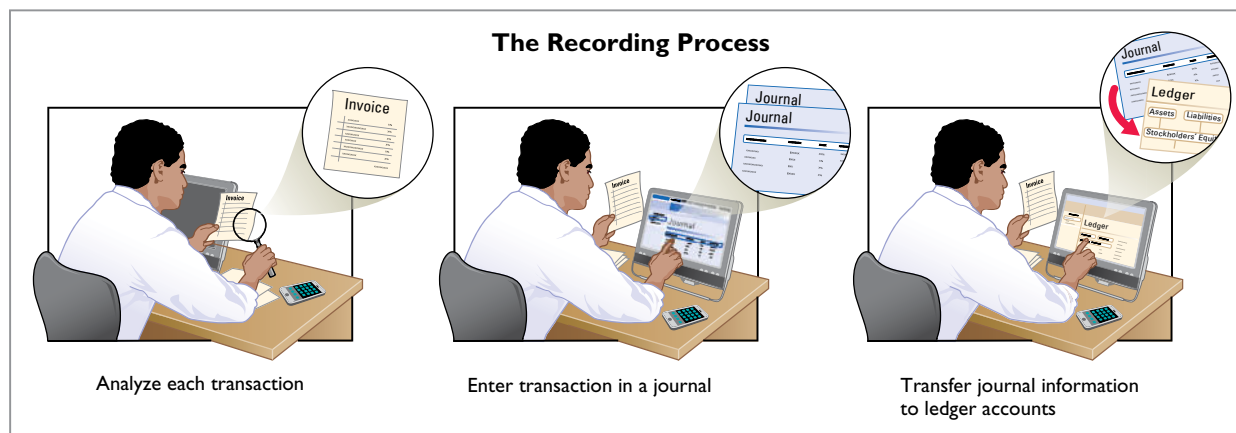

1. Analyze each transaction for its effects on the accounts.
2. Enter the transaction information in a **journal**.
3. Transfer the journal information to the appropriate accounts in the **ledger**.¹

The recording process begins with the transaction. **Business documents**, such as a sales receipt, a check, or a bill provide evidence of the transaction. The company analyzes this evidence to determine the transaction's effects on specific accounts. The company then enters the transaction in the journal. Finally, it transfers the journal entry to the designated accounts in the ledger. Illustration 2-13 shows the recording process.

ETHICS NOTE

International Outsourcing Services, LLC was accused of submitting fraudulent store coupons to companies for reimbursement of as much as \$250 million. Use of proper business documents reduces the likelihood of fraudulent activity.

Illustration 2-13
The recording process

¹We discuss here the manual recording process as we believe students should understand it first before learning and using a computerized system.

The steps in the recording process occur repeatedly. In Chapter 1, we illustrated the first step, the analysis of transactions, and will give further examples in this and later chapters. The other two steps in the recording process are explained in the next sections.

The Journal

Companies initially record transactions in chronological order (the order in which they occur). Thus, the **journal** is referred to as the book of original entry. For each transaction, the journal shows the debit and credit effects on specific accounts.

Companies may use various kinds of journals, but every company has the most basic form of journal, a **general journal**. Typically, a general journal has spaces for dates, account titles and explanations, references, and two amount columns. See the format of the journal in Illustration 2-14. *Whenever we use the term “journal” in this textbook, we mean the general journal unless we specify otherwise.*

The journal makes several significant contributions to the recording process:

1. It discloses in one place the **complete effects of a transaction**.
2. It provides a **chronological record** of transactions.
3. It helps to **prevent or locate errors** because the debit and credit amounts for each entry can be easily compared.

JOURNALIZING

Entering transaction data in the journal is known as **journalizing**. Companies make separate journal entries for each transaction. A complete entry consists of (1) the date of the transaction, (2) the accounts and amounts to be debited and credited, and (3) a brief explanation of the transaction.

Illustration 2-14 shows the technique of journalizing, using the first two transactions of Softbyte Inc. On September 1, stockholders invested \$15,000 cash in the corporation in exchange for shares of stock, and Softbyte purchased computer equipment for \$7,000 cash. The number J1 indicates that these two entries are recorded on the first page of the journal. Illustration 2-14 shows the standard form of journal entries for these two transactions. (The boxed numbers correspond to explanations in the list below the illustration.)

Illustration 2-14
Technique of journalizing

GENERAL JOURNAL				J1
Date	Account Titles and Explanation	Ref.	Debit	Credit
2017				
Sept. 1	Cash	5	15,000	
	Common Stock			15,000
	(Issued shares of stock for cash)			
1	Equipment		7,000	
	Cash			7,000
	(Purchase of equipment for cash)			

- 1 The date of the transaction is entered in the Date column.
- 2 The debit account title (that is, the account to be debited) is entered first at the extreme left margin of the column headed “Account Titles and Explanation,” and the amount of the debit is recorded in the Debit column.
- 3 The credit account title (that is, the account to be credited) is indented and entered on the next line in the column headed “Account Titles and Explanation,” and the amount of the credit is recorded in the Credit column.
- 4 A brief explanation of the transaction appears on the line below the credit account title. A space is left between journal entries. The blank space separates individual journal entries and makes the entire journal easier to read.

- 5 The column titled Ref. (which stands for Reference) is left blank when the journal entry is made. This column is used later when the journal entries are transferred to the ledger accounts.

It is important to use correct and specific account titles in journalizing. Erroneous account titles lead to incorrect financial statements. However, some flexibility exists initially in selecting account titles. The main criterion is that each title must appropriately describe the content of the account. Once a company chooses the specific title to use, it should record under that account title all later transactions involving the account.²

SIMPLE AND COMPOUND ENTRIES

Some entries involve only two accounts, one debit and one credit. (See, for example, the entries in Illustration 2-14.) This type of entry is called a **simple entry**. Some transactions, however, require more than two accounts in journalizing. An entry that requires three or more accounts is a **compound entry**. To illustrate, assume that on July 1, Butler Company purchases a delivery truck costing \$14,000. It pays \$8,000 cash now and agrees to pay the remaining \$6,000 on account (to be paid later). The compound entry is as follows.

GENERAL JOURNAL				J1
Date	Account Titles and Explanation	Ref.	Debit	Credit
2017 July 1	Equipment		14,000	
	Cash			8,000
	Accounts Payable			6,000
	(Purchased truck for cash with balance on account)			

Illustration 2-15
Compound journal entry

In a compound entry, the standard format requires that all debits be listed before the credits.

Boosting Microsoft's Profits

Microsoft originally designed the Xbox 360 to have 256 megabytes of memory. But the design department said that amount of memory wouldn't support the best special effects. The purchasing department said that adding more memory would cost \$30—which was 10% of the estimated selling price of \$300. The marketing department, however, “determined that adding the memory would let Microsoft reduce marketing costs and attract more game developers, boosting royalty revenue. It would also extend the life of the console, generating more sales.”

As a result of these changes, Xbox enjoyed great success. But, it does have competitors. Its newest video

game console, Xbox One, is now in a battle with **Sony's** Playstation4 for market share. How to compete? First, Microsoft bundled the critically acclaimed *Titanfall* with its Xbox One. By including the game most Xbox One buyers were going to purchase anyway, Microsoft was making its console more attractive. In addition, retailers are also discounting the Xbox, which should get the momentum going for increased sales. What Microsoft is doing is making sure that Xbox One is the center of the home entertainment system in the long run, even if it suffers a bit of a hardware loss today.

Sources: Robert A. Guth, “New Xbox Aim for Microsoft: Profitability,” *Wall Street Journal* (May 24, 2005), p. C1; and David Thier, “Will Microsoft Give the Xbox One a \$50 Price Cut?” *www.Forbes.com* (March 26, 2014).

In what ways is this Microsoft division using accounting to assist in its effort to become more profitable? (Go to [WileyPLUS](#) for this answer and additional questions.)

²In homework problems, you should use specific account titles when they are given. When account titles are not given, you may select account titles that identify the nature and content of each account. The account titles used in journalizing should not contain explanations such as Cash Paid or Cash Received.

DO IT! 2 Recording Business Activities

As president and sole stockholder, Kate Browne engaged in the following activities in establishing her salon, Hair It Is, Inc.

1. Opened a bank account in the name of Hair It Is, Inc. and deposited \$20,000 of her own money in this account in exchange for shares of common stock.
2. Purchased equipment on account (to be paid in 30 days) for a total cost of \$4,800.
3. Interviewed three people for the position of hair stylist.

Prepare the entries to record the transactions.

Solution

The three activities would be recorded as follows.

1. Cash	20,000	
Common Stock		20,000
(Issued shares of stock for cash)		
2. Equipment	4,800	
Accounts Payable		4,800
(Purchase of equipment on account)		
3. No entry because no transaction has occurred.		

Related exercise material: **BE2-3, BE2-4, BE2-5, BE2-6, E2-3, E2-5, E2-6, E2-7, and DO IT! 2-2.**

Action Plan

- ✓ Understand which activities need to be recorded and which do not. Any that affect assets, liabilities, or stockholders' equity should be recorded in a journal.
- ✓ Analyze the effects of transactions on asset, liability, and stockholders' equity accounts.

LEARNING OBJECTIVE

3

Explain how a ledger and posting help in the recording process.

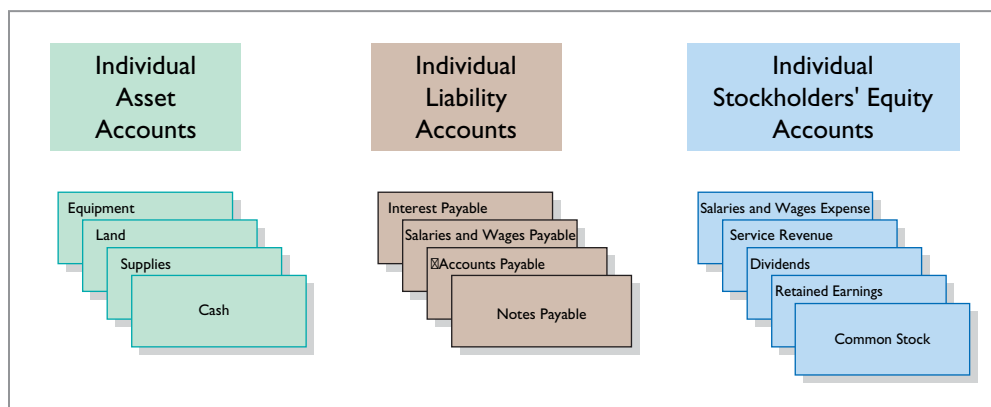

The Ledger

The entire group of accounts maintained by a company is the **ledger**. The ledger provides the balance in each of the accounts as well as keeps track of changes in these balances.

Companies may use various kinds of ledgers, but every company has a general ledger. A **general ledger** contains all the asset, liability, and stockholders' equity accounts, as shown in Illustration 2-16 for J. Lind Company. *Whenever we use the term "ledger" in this textbook, we are referring to the general ledger unless we specify otherwise.*

Illustration 2-16

The general ledger, which contains all of a company's accounts

Companies arrange the ledger in the sequence in which they present the accounts in the financial statements, beginning with the balance sheet accounts. First in order are the asset accounts, followed by liability accounts, stockholders' equity accounts, revenues, and expenses. Each account is numbered for easier identification.

The ledger provides the balance in each of the accounts. For example, the Cash account shows the amount of cash available to meet current obligations. The Accounts Receivable account shows amounts due from customers. The Accounts Payable account shows amounts owed to creditors.

A Convenient Overstatement

Sometimes a company's investment securities suffer a permanent decline in value below their original cost. When this occurs, the company is supposed to reduce the recorded value of the securities on its balance sheet ("write-them down" in common financial lingo) and record a loss. It appears, however, that during the financial crisis of 2008, employees at some financial institutions chose to look the other way as the value of their investments skidded.

A number of Wall Street traders that worked for the investment bank **Credit Suisse Group** were charged with intentionally overstating the value of securities that had suffered declines of approximately \$2.85 billion. One reason that they may have been reluctant to record the losses is out of fear that the company's shareholders and clients would panic if they saw the magnitude of the losses. However, personal self-interest might have been equally to blame—the bonuses of the traders were tied to the value of the investment securities.

Source: S. Pulliam, J. Eaglesham, and M. Siconolfi, "U.S. Plans Changes on Bond Fraud," *Wall Street Journal Online* (February 1, 2012).

What incentives might employees have had to overstate the value of these investment securities on the company's financial statements? (Go to **WileyPLUS** for this answer and additional questions.)

STANDARD FORM OF ACCOUNT

The simple T-account form used in accounting textbooks is often very useful for illustration purposes. However, in practice, the account forms used in ledgers are much more structured. Illustration 2-17 shows a typical form, using assumed data from a cash account.

CASH					NO. 101
Date	Explanation	Ref.	Debit	Credit	Balance
2017					
June 1			25,000		25,000
2				8,000	17,000
3			4,200		21,200
9			7,500		28,700
17				11,700	17,000
20				250	16,750
30				7,300	9,450

Illustration 2-17

Three-column form of account

This format is called the **three-column form of account**. It has three money columns—debit, credit, and balance. The balance in the account is determined after each transaction. Companies use the explanation space and reference columns to provide special information about the transaction.

Posting

Transferring journal entries to the ledger accounts is called **posting**. This phase of the recording process accumulates the effects of journalized transactions into the individual accounts. Posting involves the following steps.

1. In the **ledger**, in the appropriate columns of the account(s) debited, enter the date, journal page, and debit amount shown in the journal.
2. In the reference column of the **journal**, write the account number to which the debit amount was posted.
3. In the **ledger**, in the appropriate columns of the account(s) credited, enter the date, journal page, and credit amount shown in the journal.
4. In the reference column of the **journal**, write the account number to which the credit amount was posted.

Illustration 2-18 shows these four steps using Softbyte Inc.'s first journal entry. The boxed numbers indicate the sequence of the steps.

Illustration 2-18
Posting a journal entry

GENERAL JOURNAL					J1
Date	Account Titles and Explanation	Ref.	Debit	Credit	
2017 Sept.1	Cash Common Stock (Issued shares of stock for cash)	101 311	15,000	15,000	

GENERAL LEDGER					
CASH					NO. 101
Date	Explanation	Ref.	Debit	Credit	Balance
2017 Sept.1		J1	15,000		15,000

COMMON STOCK					NO. 311
Date	Explanation	Ref.	Debit	Credit	Balance
2017 Sept.1		J1		15,000	15,000

Key:

- 1 Post to debit account—date, journal page number, and amount.
- 2 Enter debit account number in journal reference column.
- 3 Post to credit account—date, journal page number, and amount.
- 4 Enter credit account number in journal reference column.

Posting should be performed in chronological order. That is, the company should post all the debits and credits of one journal entry before proceeding to the next journal entry. Postings should be made on a timely basis to ensure that the ledger is up-to-date.³

³In homework problems, you can journalize all transactions before posting any of the journal entries.

The reference column of a ledger account indicates the journal page from which the transaction was posted.⁴ The explanation space of the ledger account is used infrequently because an explanation already appears in the journal.

CHART OF ACCOUNTS

The number and type of accounts differ for each company. The number of accounts depends on the amount of detail management desires. For example, the management of one company may want a single account for all types of utility expense. Another may keep separate expense accounts for each type of utility, such as gas, electricity, and water. Similarly, a small company like Softbyte Inc. will have fewer accounts than a corporate giant like **Dell**. Softbyte may be able to manage and report its activities in 20 to 30 accounts, while Dell may require thousands of accounts to keep track of its worldwide activities.

Most companies have a **chart of accounts**. This chart lists the accounts and the account numbers that identify their location in the ledger. The numbering system that identifies the accounts usually starts with the balance sheet accounts and follows with the income statement accounts.

In this and the next two chapters, we will be explaining the accounting for Pioneer Advertising Inc. (a service company). Accounts 101–199 indicate asset accounts; 200–299 indicate liabilities; 301–350 indicate stockholders' equity accounts; 400–499, revenues; 601–799, expenses; 800–899, other revenues; and 900–999, other expenses. Illustration 2-19 shows Pioneer's chart of accounts. Accounts listed in red are used in this chapter; accounts shown in black are explained in later chapters.

Helpful Hint

On the textbook's front endpapers, you also will find an expanded chart of accounts.

 PIONEER ADVERTISING INC. Chart of Accounts	
Assets	Stockholders' Equity
101 Cash 112 Accounts Receivable 126 Supplies 130 Prepaid Insurance 157 Equipment 158 Accumulated Depreciation— Equipment	311 Common Stock 320 Retained Earnings 332 Dividends 350 Income Summary
Liabilities	Revenues
200 Notes Payable 201 Accounts Payable 209 Unearned Service Revenue 212 Salaries and Wages Payable 230 Interest Payable	Expenses
	631 Supplies Expense 711 Depreciation Expense 722 Insurance Expense 726 Salaries and Wages Expense 729 Rent Expense 732 Utilities Expense 905 Interest Expense

Illustration 2-19

Chart of accounts for Pioneer Advertising Inc.

You will notice that there are gaps in the numbering system of the chart of accounts for Pioneer. Companies leave gaps to permit the insertion of new accounts as needed during the life of the business.

⁴After the last entry has been posted, the accountant should scan the reference column **in the journal**, to confirm that all postings have been made.

The Recording Process Illustrated

Illustrations 2-20 through 2-29 show the basic steps in the recording process, using the October transactions of Pioneer Advertising Inc. A basic analysis, an equation analysis, and a debit-credit analysis precede the journal entry and posting of each transaction. For simplicity, we use the T-account form to show the posting instead of the standard account form.

Illustration 2-20

Investment of cash by stockholders

Cash Flows
+10,000

Helpful Hint

Follow these steps:

1. Determine what type of account is involved.
2. Determine what items increased or decreased and by how much.
3. Translate the increases and decreases into debits and credits.

Transaction	On October 1, C. R. Byrd invests \$10,000 cash in an advertising company to be known as Pioneer Advertising Inc.																			
Basic Analysis	The asset Cash increases \$10,000; stockholders' equity (specifically, Common Stock) increases \$10,000.																			
Equation Analysis	<table style="width:100%; border:none;"> <tr> <td style="text-align:center"><u>Assets</u></td> <td>=</td> <td style="text-align:center"><u>Liabilities</u></td> <td>+</td> <td style="text-align:center"><u>Stockholders' Equity</u></td> </tr> <tr> <td style="text-align:center">Cash</td> <td>=</td> <td></td> <td></td> <td style="text-align:center">Common Stock</td> </tr> <tr> <td style="text-align:center">+10,000</td> <td></td> <td></td> <td></td> <td style="text-align:center">+10,000</td> </tr> </table>					<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>	Cash	=			Common Stock	+10,000				+10,000

Illustration 2-21

Purchase of office equipment

Cash Flows
no effect

Transaction	On October 1, Pioneer purchases office equipment costing \$5,000 by signing a 3-month, 12%, \$5,000 note payable.																			
Basic Analysis	The asset Equipment increases \$5,000; the liability Notes Payable increases \$5,000.																			
Equation Analysis	<table style="width:100%; border:none;"> <tr> <td style="text-align:center"><u>Assets</u></td> <td>=</td> <td style="text-align:center"><u>Liabilities</u></td> <td>+</td> <td style="text-align:center"><u>Stockholders' Equity</u></td> </tr> <tr> <td style="text-align:center">Equipment</td> <td>=</td> <td style="text-align:center">Notes Payable</td> <td></td> <td></td> </tr> <tr> <td style="text-align:center">+5,000</td> <td></td> <td style="text-align:center">+5,000</td> <td></td> <td></td> </tr> </table>					<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>	Equipment	=	Notes Payable			+5,000		+5,000		
<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>																
Equipment	=	Notes Payable																		
+5,000		+5,000																		
Debit-Credit Analysis	Debits increase assets: debit Equipment \$5,000. Credits increase liabilities: credit Notes Payable \$5,000.																			
Journal Entry	<table style="width:100%; border:none;"> <tr> <td style="width:10%;"></td> <td style="width:10%; border-top: 1px solid black;">Oct. 1</td> <td style="width:40%; border-top: 1px solid black;">Equipment Notes Payable (Issued 3-month, 12% note for office equipment)</td> <td style="width:10%; border-top: 1px solid black; text-align:center;">157 200</td> <td style="width:10%; border-top: 1px solid black; text-align:center;">5,000</td> <td style="width:10%; border-top: 1px solid black; text-align:center;">5,000</td> </tr> </table>						Oct. 1	Equipment Notes Payable (Issued 3-month, 12% note for office equipment)	157 200	5,000	5,000									
	Oct. 1	Equipment Notes Payable (Issued 3-month, 12% note for office equipment)	157 200	5,000	5,000															
Posting	<table style="width:100%; border:none;"> <tr> <td style="width:20%;"></td> <td style="width:20%; text-align:center; border-bottom: 1px solid black;">Equipment</td> <td style="width:10%; text-align:center; border-bottom: 1px solid black;">157</td> <td style="width:20%;"></td> <td style="width:20%; text-align:center; border-bottom: 1px solid black;">Notes Payable</td> <td style="width:10%; text-align:center; border-bottom: 1px solid black;">200</td> </tr> <tr> <td style="border-bottom: 1px solid black;">Oct. 1</td> <td style="border-bottom: 1px solid black; text-align:right;">5,000</td> <td style="border-bottom: 1px solid black;"></td> <td style="border-bottom: 1px solid black;"></td> <td style="border-bottom: 1px solid black; text-align:left;">Oct. 1</td> <td style="border-bottom: 1px solid black; text-align:left;">5,000</td> </tr> </table>						Equipment	157		Notes Payable	200	Oct. 1	5,000			Oct. 1	5,000			
	Equipment	157		Notes Payable	200															
Oct. 1	5,000			Oct. 1	5,000															

Transaction On October 2, Pioneer receives a \$1,200 cash advance from R. Knox, a client, for advertising services that are expected to be completed by December 31.

Basic Analysis The asset Cash increases \$1,200; the liability Unearned Service Revenue increases \$1,200 because the service has not been performed yet. That is, when Pioneer receives an advance payment, it should record an unearned revenue (a liability) in order to recognize the obligation that exists. Note also that although most liabilities have the word “payable” in their title, unearned revenue is considered a liability because the liability is satisfied by providing a product or performing a service.

Equation Analysis

<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>
Cash	=	Unearned Service Revenue		
+1,200		+1,200		

Debit–Credit Analysis Debits increase assets: debit Cash \$1,200.
Credits increase liabilities: credit Unearned Service Revenue \$1,200.

Journal Entry

Oct. 2	Cash		101	1,200	
	Unearned Service Revenue		209		1,200
	(Received cash from R. Knox for future service)				

Posting

	Cash	101		Unearned Service Revenue	209
Oct. 1	10,000		Oct. 2	1,200	
2	1,200				

Illustration 2-22

Receipt of cash for future service

Cash Flows
+1,200

Transaction On October 3, Pioneer pays office rent for October in cash, \$900.

Basic Analysis The expense account Rent Expense increases \$900 because the payment pertains only to the current month; the asset Cash decreases \$900.

Equation Analysis

<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>
Cash	=			Rent Expense
-900				-900

Debit–Credit Analysis Debits increase expenses: debit Rent Expense \$900.
Credits decrease assets: credit Cash \$900.

Journal Entry

Oct. 3	Rent Expense		729	900	
	Cash		101		900
	(Paid October rent)				

Posting

	Cash	101		Rent Expense	729
Oct. 1	10,000		Oct. 3	900	
2	1,200				

Illustration 2-23

Payment of monthly rent

Cash Flows
-900

Illustration 2-24
Payment for insurance

Cash Flows
-600

Transaction	On October 4, Pioneer pays \$600 for a one-year insurance policy that will expire next year on September 30.																			
Basic Analysis	The asset Prepaid Insurance increases \$600 because the payment extends to more than the current month; the asset Cash decreases \$600. Payments of expenses that will benefit more than one accounting period are prepaid expenses or prepayments. When a company makes a payment, it debits an asset account in order to show the service or benefit that will be received in the future.

Event On October 9, Pioneer hires four employees to begin work on October 15. Each employee is to receive a weekly salary of \$500 for a 5-day work week, payable every 2 weeks—first payment made on October 26.

Basic Analysis A business transaction has not occurred. There is only an agreement between the employer and the employees to enter into a business transaction beginning on October 15. Thus, a debit–credit analysis is not needed because there is no accounting entry (see October 26 transaction for first entry).

Illustration 2-26
Hiring of employees

Cash Flows
no effect

Transaction On October 20, Pioneer’s board of directors declares and pays a \$500 cash dividend to stockholders.

Basic Analysis The Dividends account increases \$500; the asset Cash decreases \$500.

Equation Analysis

<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders’ Equity</u>
Cash	=			Dividends
–500				–500

Debit–Credit Analysis Debits increase dividends: debit Dividends \$500. Credits decrease assets: credit Cash \$500.

Study these transaction analyses carefully. **The purpose of transaction analysis is first to identify the type of account involved, and then to determine whether to make a debit or a credit to the account.** You should always perform this type of analysis before preparing a journal entry. Doing so will help you understand the journal entries discussed in this chapter as well as more complex journal entries in later chapters.

In addition, an Accounting Cycle Tutorial is available in *WileyPLUS*. It provides an interactive presentation of the steps in the accounting cycle, using the Pioneer example shown in Illustrations 2-20 through 2-29.

DO IT!**3****Posting**

Kate Browne recorded the following transactions in a general journal during the month of March.

Mar. 4	Cash	2,280	
	Service Revenue		2,280
15	Salaries and Wages Expense	400	
	Cash		400
19	Utilities Expense	92	
	Cash		92

Post these entries to the Cash account of the general ledger to determine its ending balance. The beginning balance of Cash on March 1 was \$600.

Solution

Cash			
3/1 Bal.	600	3/15	400
3/4	2,280	3/19	92
3/31 Bal.	2,388		

Related exercise material: **BE2-7, BE2-8, E2-8, E2-9, E2-12, and DO IT! 2-3.**

Action Plan

- ✓ Recall that posting involves transferring the journalized debits and credits to specific accounts in the ledger.
- ✓ Determine the ending balance by netting the total debits and credits.

LEARNING
OBJECTIVE

4

Prepare a trial balance.

A **trial balance** is a list of accounts and their balances at a given time. Customarily, companies prepare a trial balance at the end of an accounting period. They list accounts in the order in which they appear in the ledger. Debit balances appear in the left column and credit balances in the right column.

The trial balance proves the mathematical equality of debits and credits after posting. Under the double-entry system, this equality occurs when the sum of the debit account balances equals the sum of the credit account balances. **A trial balance may also uncover errors in journalizing and posting.** For example, a trial balance may well have detected the error at **MF Global** discussed in the Feature Story. **In addition, a trial balance is useful in the preparation of financial statements,** as we will explain in the next two chapters.

The steps for preparing a trial balance are:

1. List the account titles and their balances in the appropriate debit or credit column.
2. Total the debit and credit columns.
3. Prove the equality of the two columns.

Illustration 2-32 shows the trial balance prepared from Pioneer Advertising's ledger. Note that the total debits equal the total credits.

PIONEER ADVERTISING INC.		
Trial Balance		
October 31, 2017		
	<u>Debit</u>	<u>Credit</u>
Cash	\$ 15,200	
Supplies	2,500	
Prepaid Insurance	600	
Equipment	5,000	
Notes Payable		\$ 5,000
Accounts Payable		2,500
Unearned Service Revenue		1,200
Common Stock		10,000
Dividends	500	
Service Revenue		10,000
Salaries and Wages Expense	4,000	
Rent Expense	900	
	<u>\$28,700</u>	<u>\$28,700</u>

Illustration 2-32

A trial balance

Helpful Hint

Note that the order of presentation in the trial balance is:

Assets
Liabilities
Stockholders' equity
Revenues
Expenses

A trial balance is a necessary checkpoint for uncovering certain types of errors. For example, if only the debit portion of a journal entry has been posted, the trial balance would bring this error to light.

Limitations of a Trial Balance

A trial balance does not guarantee freedom from recording errors, however. Numerous errors may exist even though the totals of the trial balance columns agree. For example, the trial balance may balance even when:

1. A transaction is not journalized.
2. A correct journal entry is not posted.
3. A journal entry is posted twice.
4. Incorrect accounts are used in journalizing or posting.
5. Offsetting errors are made in recording the amount of a transaction.

ETHICS NOTE

An *error* is the result of an unintentional mistake; it is neither ethical nor unethical. An *irregularity* is an intentional misstatement, which is viewed as unethical.

As long as equal debits and credits are posted, even to the wrong account or in the wrong amount, the total debits will equal the total credits. **The trial balance does not prove that the company has recorded all transactions or that the ledger is correct.**

Locating Errors

Errors in a trial balance generally result from mathematical mistakes, incorrect postings, or simply transcribing data incorrectly. What do you do if you are faced with a trial balance that does not balance? First, determine the amount of the difference between the two columns of the trial balance. After this amount is known, the following steps are often helpful:

1. If the error is \$1, \$10, \$100, or \$1,000, re-add the trial balance columns and recompute the account balances.
2. If the error is divisible by 2, scan the trial balance to see whether a balance equal to half the error has been entered in the wrong column.
3. If the error is divisible by 9, retrace the account balances on the trial balance to see whether they are incorrectly copied from the ledger. For example, if a balance was \$12 and it was listed as \$21, a \$9 error has been made. Reversing the order of numbers is called a **transposition error**.
4. If the error is not divisible by 2 or 9, scan the ledger to see whether an account balance in the amount of the error has been omitted from the trial balance, and scan the journal to see whether a posting of that amount has been omitted.

Dollar Signs and Underlining

Note that dollar signs do not appear in journals or ledgers. Dollar signs are typically used only in the trial balance and the financial statements. Generally, a dollar sign is shown only for the first item in the column and for the total of that column. A single line (a totaling rule) is placed under the column of figures to be added or subtracted. Total amounts are double-underlined to indicate they are final sums.

Investor Insight **Fannie Mae**

Enviromatic/iStockphoto

Why Accuracy Matters

While most companies record transactions very carefully, the reality is that mistakes still happen. For example, bank regulators fined **Bank One Corporation** (now **Chase**) \$1.8 million because they felt that the unreliability of the bank's accounting system

caused it to violate regulatory requirements.

Also, in recent years **Fannie Mae**, the government-chartered mortgage association, announced a series of large accounting errors. These announcements caused alarm among investors, regulators, and politicians because they fear that the errors may suggest larger, undetected

problems. This is important because the home-mortgage market depends on Fannie Mae to buy hundreds of billions of dollars of mortgages each year from banks, thus enabling the banks to issue new mortgages.

Finally, before a major overhaul of its accounting system, the financial records of **Waste Management Inc.** were in such disarray that of the company's 57,000 employees, 10,000 were receiving pay slips that were in error.

The Sarbanes-Oxley Act was created to minimize the occurrence of errors like these by increasing every employee's responsibility for accurate financial reporting.

In order for these companies to prepare and issue financial statements, their accounting equations (debits and credits) must have been in balance at year-end. How could these errors or misstatements have occurred? (Go to WileyPLUS for this answer and additional questions.)

DO IT!**4****Trial Balance**

The following accounts come from the ledger of SnowGo Corporation at December 31, 2017.

157	Equipment	\$88,000	311	Common Stock	\$20,000

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 **Describe how accounts, debits, and credits are used to record business transactions.** An account is a record of increases and decreases in specific asset, liability, and stockholders' equity items. The terms debit and credit are synonymous with left and right. Assets, dividends, and expenses are increased by debits and decreased by credits. Liabilities, common stock, retained earnings, and revenues are increased by credits and decreased by debits.
- 2 **Indicate how a journal is used in the recording process.** The basic steps in the recording process are (a) analyze each transaction for its effects on the accounts, (b) enter the transaction information in a journal, and (c) transfer the journal information to the appropriate accounts in the ledger.
The initial accounting record of a transaction is entered in a journal before the data are entered in the accounts. A journal (a) discloses in one place the

complete effects of a transaction, (b) provides a chronological record of transactions, and (c) prevents or locates errors because the debit and credit amounts for each entry can be easily compared.

- 3 Explain how a ledger and posting help in the recording process.** The ledger is the entire group of accounts maintained by a company. The ledger provides the balance in each of the accounts as well as keeps track of changes in these balances. Posting is the transfer of

journal entries to the ledger accounts. This phase of the recording process accumulates the effects of journalized transactions in the individual accounts.

- 4 Prepare a trial balance.** A trial balance is a list of accounts and their balances at a given time. Its primary purpose is to prove the equality of debits and credits after posting. A trial balance also uncovers errors in journalizing and posting and is useful in preparing financial statements.

GLOSSARY REVIEW

Account A record of increases and decreases in specific asset, liability, or stockholders' equity items. (p. 50).

Chart of accounts A list of accounts and the account numbers that identify their location in the ledger. (p. 61).

Common stock Issued in exchange for the owners' investment paid in to corporation. (p. 52)

Compound entry A journal entry that involves three or more accounts. (p. 57).

Credit The right side of an account. (p. 50).

Debit The left side of an account. (p. 50).

Dividend A distribution by a corporation to its stockholders on a pro rata (equal) basis. (p. 52).

Double-entry system A system that records in appropriate accounts the dual effect of each transaction. (p. 51).

General journal The most basic form of journal. (p. 56).

General ledger A ledger that contains all asset, liability, and stockholders' equity accounts. (p. 58).

Journal An accounting record in which transactions are initially recorded in chronological order. (p. 56).

Journalizing The entering of transaction data in the journal. (p. 56).

Ledger The entire group of accounts maintained by a company. (p. 58).

Normal balance An account balance on the side where an increase in the account is recorded. (p. 51).

Posting The procedure of transferring journal entries to the ledger accounts. (p. 60).

Retained earnings Net income that is kept (retained) in the business. (p. 52).

Simple entry A journal entry that involves only two accounts. (p. 57).

T-account The basic form of an account. (p. 50).

Three-column form of account A form with columns for debit, credit, and balance amounts in an account. (p. 59).

Trial balance A list of accounts and their balances at a given time. (p. 69).

PRACTICE MULTIPLE-CHOICE QUESTIONS

(LO 1) 1. Which of the following statements about an account is **true**?

- (a) The right side of an account is the debit or increase side.
- (b) An account is an individual accounting record of increases and decreases in specific asset, liability, and stockholders' equity items.
- (c) There are separate accounts for specific assets and liabilities but only one account for stockholders' equity items.
- (d) The left side of an account is the credit or decrease side.

(LO 1) 2. Debits:

- (a) increase both assets and liabilities.
- (b) decrease both assets and liabilities.
- (c) increase assets and decrease liabilities.
- (d) decrease assets and increase liabilities.

(LO 1) 3. A revenue account:

- (a) is increased by debits.
- (b) is decreased by credits.

(c) has a normal balance of a debit.

(d) is increased by credits.

4. Accounts that normally have debit balances are: **(LO 1)**

- (a) assets, expenses, and revenues.
- (b) assets, expenses, and common stock.
- (c) assets, liabilities, and dividends.
- (d) assets, dividends, and expenses.

5. The expanded accounting equation is: **(LO 1)**

- (a) Assets + Liabilities = Common Stock + Retained Earnings + Revenues + Expenses + Dividends.
- (b) Assets = Liabilities + Common Stock + Retained Earnings + Revenues - Expenses + Dividends.
- (c) Assets = Liabilities - Common Stock - Retained Earnings - Revenues - Expenses - Dividends.
- (d) Assets = Liabilities + Common Stock + Retained Earnings + Revenues - Expenses - Dividends.

6. Which of the following is **not** part of the recording process? **(LO 1)**

- (a) Analyzing transactions.
- (b) Preparing a trial balance.

- (c) Entering transactions in a journal.
(d) Posting transactions.
- (LO 2) 7. Which of the following statements about a journal is **false**?
(a) It is not a book of original entry.
(b) It provides a chronological record of transactions.
(c) It helps to locate errors because the debit and credit amounts for each entry can be readily compared.
(d) It discloses in one place the complete effect of a transaction.
- (LO 2) 8. The purchase of supplies on account should result in:
(a) a debit to Supplies Expense and a credit to Cash.
(b) a debit to Supplies Expense and a credit to Accounts Payable.
(c) a debit to Supplies and a credit to Accounts Payable.
(d) a debit to Supplies and a credit to Accounts Receivable.
- (LO 3) 9. The order of the accounts in the ledger is:
(a) assets, revenues, expenses, liabilities, common stock, dividends.
(b) assets, liabilities, common stock, dividends, revenues, expenses.
(c) common stock, assets, revenues, expenses, liabilities, dividends.
(d) revenues, assets, expenses, liabilities, common stock, dividends.
- (LO 3) 10. A ledger:
(a) contains only asset and liability accounts.
(b) should show accounts in alphabetical order.
(c) is a collection of the entire group of accounts maintained by a company.
(d) is a book of original entry.
- (LO 3) 11. Posting:
(a) normally occurs before journalizing.
(b) transfers ledger transaction data to the journal.
(c) is an optional step in the recording process.
(d) transfers journal entries to ledger accounts.
12. Before posting a payment of \$5,000, the Accounts Payable of Chola Corporation had a normal balance of \$18,000. The balance after posting this transaction was:
(a) \$13,000. (c) \$23,000.
(b) \$5,000. (d) Cannot be determined.
13. A trial balance:
(a) is a list of accounts with their balances at a given time.
(b) proves the mathematical accuracy of journalized transactions.
(c) will not balance if a correct journal entry is posted twice.
(d) proves that all transactions have been recorded.
14. A trial balance will not balance if:
(a) a correct journal entry is posted twice.
(b) the purchase of supplies on account is debited to Supplies and credited to Cash.
(c) a \$100 cash dividend is debited to Dividends for \$1,000 and credited to Cash for \$100.
(d) a \$450 payment on account is debited to Accounts Payable for \$45 and credited to Cash for \$45.
15. The trial balance of Stevens Corporation had accounts with the following normal balances: Cash \$5,000, Service Revenue \$85,000, Salaries and Wages Payable \$4,000, Salaries and Wages Expense \$40,000, Rent Expense \$10,000, Common Stock \$42,000, Dividends \$13,000, and Equipment \$61,000. In preparing a trial balance, the total in the debit column is:
(a) \$116,000. (c) \$129,000.
(b) \$118,000. (d) \$131,000.

Solutions

1. (b) An account is an individual accounting record of increases and decreases in specific asset, liability, and owner's equity items. The other choices are incorrect because (a) the right side of the account is the credit side, not the debit side, and can be the increase or the decrease side, depending on the specific classification account; (c) there are also separate accounts for different owner's equity items; and (d) the left side of the account is the debit side, not the credit side, and can be either the decrease or the increase side, depending on the specific classification account.
2. (c) Debits increase assets but they decrease liabilities. The other choices are incorrect because debits (a) decrease, not increase, liabilities; (b) increase, not decrease, assets; and (d) increase, not decrease, assets and decrease, not increase, liabilities.
3. (d) A revenue account is increased by credits. The other choices are incorrect because a revenue account (a) is increased by credits, not debits; (b) is decreased by debits, not credits; and (c) has a normal balance of a credit, not a debit.
4. (d) Assets, dividends, and expenses all have normal debit balances. The other choices are incorrect because (a) revenues have normal credit balances, (b) common stock has a normal credit balance, and (c) liabilities have normal credit balances.
5. (d) The expanded accounting equation is $\text{Assets} = \text{Liabilities} + \text{Common Stock} + \text{Retained Earnings} + \text{Revenues} - \text{Expenses} - \text{Dividends}$. The other choices are therefore incorrect.
6. (b) Preparing the trial balance is not part of the recording process. Choices (a) analyzing transactions, (c) entering transactions in a journal, and (d) posting transactions are all part of the recording process.
7. (a) The journal is a book of original entry. The other choices are true statements.
8. (c) The purchase of supplies on account results in a debit to Supplies and a credit to Accounts Payable. The other choices are incorrect because the purchase of supplies on account results in (a) a debit to Supplies, not Supplies Expense, and a credit to Accounts Payable, not Cash; (b) a debit to Supplies, not Supplies Expense; and (d) a credit to Accounts Payable, not Accounts Receivable.
9. (b) The correct order of the accounts in the ledger is assets, liabilities, common stock, dividends, revenues, expenses. The other choices are incorrect because they do not reflect this order. The order of the accounts in the ledger is (1) balance sheet accounts:

assets, liabilities, and stockholders' equity accounts (common stock and dividends), and then (2) income statement accounts: revenues and expenses.

10. (c) A ledger is a collection of all the accounts maintained by a company. The other choices are incorrect because a ledger (a) contains all account types—assets, liabilities, stockholders' equity, revenue, and expense accounts—not just asset and liability accounts; (b) usually shows accounts in account number order, not alphabetical order; and (d) is not a book of original entry because entries made in the ledger come from the journals (the books of original entry).

11. (d) Posting transfers journal entries to ledger accounts. The other choices are incorrect because posting (a) occurs after journalizing, (b) transfers journal transaction data to the ledger; and (c) is not an optional step in the recording process.

12. (a) The balance is \$13,000 (\$18,000 normal balance – \$5,000 payment), not (b) \$5,000 or (c) \$23,000. Choice (d) is incorrect because the balance can be determined.

13. (a) A trial balance is a list of accounts with their balances at a given time. The other choices are incorrect because (b) the trial balance does not prove that journalized transactions are correct; (c) if a journal entry is posted twice, the trial balance will still balance; and (d) the trial balance does not prove that all transactions have been recorded.

14. (c) The trial balance will not balance in this case because the debit of \$1,000 to Dividends is not equal to the credit of \$100 to Cash. The other choices are incorrect because (a) if a correct journal entry is posted twice, the trial balance will still balance; (b) if the purchase of supplies on account is debited to Supplies and credited to Cash, Cash and Accounts Payable will be understated but the trial balance will still balance; and (d) since the debit and credit amounts are the same, the trial balance will still balance but both Accounts Payable and Cash will be overstated.

15. (c) The total debit column = \$5,000 (Cash) + \$40,000 (Salaries and Wages Expense) + \$10,000 (Rent Expense) + \$13,000 (Dividends) + \$61,000 (Equipment) = \$129,000, not (a) \$116,000, (b) \$118,000, or (d) \$131,000.

PRACTICE EXERCISES

Analyze transactions and determine their effect on accounts.

(LO 1)

- 1.** Presented below is information related to Conan Real Estate Agency.
- Oct. 1 Arnold Conan begins business as a real estate agent with a cash investment of \$18,000 in exchange for common stock.
- 2 Hires an administrative assistant.
- 3 Purchases office equipment for \$1,700, on account.
- 6 Sells a house and lot for B. Clinton; bills B. Clinton \$4,200 for realty services performed.
- 27 Pays \$900 on the balance related to the transaction of October 3.
- 30 Pays the administrative assistant \$2,800 in salary for October.

Instructions

Journalize the transactions. (You may omit explanations.)

Solution

1.

GENERAL JOURNAL					J1
Date	Account Titles and Explanation	Ref.	Debit	Credit	
Oct. 1	Cash		18,000		
	Common Stock			18,000	
2	No entry required				
3	Equipment		1,700		
	Accounts Payable			1,700	
6	Accounts Receivable		4,200		
	Service Revenue			4,200	
27	Accounts Payable		900		
	Cash			900	
30	Salaries and Wages Expense		2,800		
	Cash			2,800	

2. The T-accounts below summarize the ledger of Garfunkle Landscaping Company at the end of the first month of operations.

Cash		No. 101		Unearned Service Revenue		No. 209	
4/1	18,000	4/15	700		4/30	1,200	
4/12	800	4/25	1,400				
4/29	700						
4/30	1,200						
Accounts Receivable		No. 112		Common Stock		No. 311	
4/7	3,800	4/29	700		4/1	18,000	
Supplies		No. 126		Service Revenue		No. 400

	<u>\$24,300</u>	<u>\$24,300</u>

PRACTICE PROBLEM

Journalize transactions, post, and prepare a trial balance.

(LO 1, 2, 3, 4)

Bob Sample and other student investors opened Campus Laundromat Inc. on September 1, 2017. During the first month of operations, the following transactions occurred.

- Sept. 1 Stockholders invested \$20,000 cash in the business.
 2 The company paid \$1,000 cash for store rent for September.
 3 Purchased washers and dryers for \$25,000, paying \$10,000 in cash and signing a \$15,000, 6-month, 12% note payable.
 4 Paid \$1,200 for a one-year accident insurance policy.
 10 Received a bill from the *Daily News* for advertising the opening of the laundromat \$200.
 20 Declared and paid a cash dividend to stockholders \$700.
 30 The company determined that cash receipts for laundry services for the month were \$6,200.

The chart of accounts for the company is the same as that for Pioneer Advertising Inc. (Illustration 2-19, page 61), plus No. 610 Advertising Expense.

Instructions

- (a) Journalize the September transactions. (Use J1 for the journal page number.)
 (b) Open ledger accounts and post the September transactions.
 (c) Prepare a trial balance at September 30, 2017.

Solution

(a) GENERAL JOURNAL					J1
Date	Account Titles and Explanation	Ref.	Debit	Credit	
2017					
Sept. 1	Cash	101	20,000		
	Common Stock	311		20,000	
	(Stockholders' investment of cash in business)				
2	Rent Expense	729	1,000		
	Cash	101		1,000	
	(Paid September rent)				
3	Equipment	157	25,000		
	Cash	101		10,000	
	Notes Payable	200		15,000	
	(Purchased laundry equipment for cash and 6-month, 12% note payable)				
4	Prepaid Insurance	130	1,200

WileyPLUS

 Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

QUESTIONS

- Describe the parts of a T-account.
- "The terms debit and credit mean increase and decrease, respectively." Do you agree? Explain.
- Tom Dingel, a fellow student, contends that the double-entry system means each transaction must be recorded twice. Is Tom correct? Explain.
- Olga Conrad, a beginning accounting student, believes debit balances are favorable and credit balances are unfavorable. Is Olga correct? Discuss.
- State the rules of debit and credit as applied to (a) asset accounts, (b) liability accounts, and (c) the stockholders' equity accounts (revenue, expenses, dividends, common stock, and retained earnings).
- What is the normal balance for each of the following accounts? (a) Accounts Receivable. (b) Cash. (c) Dividends. (d) Accounts Payable. (e) Service Revenue. (f) Salaries and Wages Expense. (g) Common Stock.
- Indicate whether each of the following accounts is an asset, a liability, or a stockholders' equity account and whether it has a normal debit or credit balance: (a) Accounts Receivable, (b) Accounts Payable, (c) Equipment, (d) Dividends, and (e) Supplies.

8. For the following transactions, indicate the account debited and the account credited.
- Supplies are purchased on account.
 - Cash is received on signing a note payable.
 - Employees are paid salaries in cash.
9. Indicate whether the following accounts generally will have (a) debit entries only, (b) credit entries only, or (c) both debit and credit entries.
- Cash.
 - Accounts Receivable.
 - Dividends.
 - Accounts Payable.
 - Salaries and Wages Expense.
 - Service Revenue.
10. What are the basic steps in the recording process?
11. What are the advantages of using a journal in the recording process?
12. (a) When entering a transaction in the journal, should the debit or credit be written first?
(b) Which should be indented, the debit or credit?
13. Describe a compound entry, and provide an example.
14. (a) Should business transaction debits and credits be recorded directly in the ledger accounts?
(b) What are the advantages of first recording transactions in the journal and then posting to the ledger?
15. The account number is entered as the last step in posting the amounts from the journal to the ledger. What is the advantage of this step?
16. Journalize the following business transactions.
- Mark Stein invests \$9,000 cash in the business in exchange for shares of common stock.
 - Insurance of \$800 is paid for the year.
 - Supplies of \$2,000 are purchased on account.
 - Cash of \$7,800 is received for services performed.
17. (a) What is a ledger?
(b) What is a chart of accounts and why is it important?
18. What is a trial balance and what are its purposes?
19. Juan Kirby is confused about how accounting information flows through the accounting system. He believes the flow of information is as follows.
- Debits and credits posted to the ledger.
 - Business transaction occurs.
 - Information entered in the journal.
 - Financial statements are prepared.
 - Trial balance is prepared.
- Is Juan correct? If not, indicate to Juan the proper flow of the information.
20. Two students are discussing the use of a trial balance. They wonder whether the following errors, each considered separately, would prevent the trial balance from balancing. What would you tell them?
- The bookkeeper debited Cash for \$600 and credited Salaries and Wages Expense for \$600 for payment of wages.
 - Cash collected on account was debited to Cash for \$900 and Service Revenue was credited for \$90.
21. What are the normal balances for **Apple's** Cash, Accounts Payable, and Interest Expense accounts?

BRIEF EXERCISES

Indicate debit and credit effects and normal balance.

(LO 1)

BE2-1 For each of the following accounts indicate the effects of (a) a debit and (b) a credit on the accounts and (c) the normal balance of the account.

- Accounts Payable.
- Advertising Expense.
- Service Revenue.
- Accounts Receivable.
- Common Stock.
- Dividends.

Identify accounts to be debited and credited.

(LO 1)

BE2-2 Transactions for the Sheldon Cooper Company, which provides welding services, for the month of June are presented below. Identify the accounts to be debited and credited for each transaction.

- June 1 Sheldon Cooper invests \$4,000 cash in exchange for shares of common stock in a small welding business.
- 2 Purchases equipment on account for \$1,200.
- 3 \$800 cash is paid to landlord for June rent.
- 12 Bills P. Leonard \$300 for welding work done on account.

Journalize transactions.

(LO 2)

BE2-3 Using the data in BE2-2, journalize the transactions. (You may omit explanations.)

Identify and explain steps in recording process.

(LO 2)

BE2-4  Evan Saunders, a fellow student, is unclear about the basic steps in the recording process. Identify and briefly explain the steps in the order in which they occur.

Indicate basic and debit-credit analysis.

(LO 2)

BE2-5 Bombeck Inc. has the following transactions during August of the current year. Indicate (a) the effect on the accounting equation and (b) the debit-credit analysis illustrated on pages 62–66 of the textbook.

- Aug. 1 Opens an office as a financial advisor, investing \$5,000 in cash in exchange for common stock.
- 4 Pays insurance in advance for 6 months, \$1,800 cash.
- 16 Receives \$1,900 from clients for services performed.
- 27 Pays secretary \$1,000 salary.

BE2-6 Using the data in BE2-5, journalize the transactions. (You may omit explanations.)

Journalize transactions.

(LO 2)

BE2-7 Selected transactions for the Nikolai Company are presented in journal form below. Post the transactions to T-accounts. Make one T-account for each item and determine each account's ending balance.

Post journal entries to T-accounts.

(LO 3)

J1				
Date	Account Titles and Explanation	Ref.	Debit	Credit
May 5	Accounts Receivable		5,000	
	Service Revenue			5,000
	(Billed for services performed)			
12	Cash		2,100	
	Accounts Receivable			2,100
	(Received cash in payment of account)			
15	Cash		3,200	
	Service Revenue			3,200
	(Received cash for services performed)			

BE2-8 Selected journal entries for the Nikolai Company are presented in BE2-7. Post the transactions using the standard form of account.

Post journal entries to standard form of account.

(LO 3)

BE2-9 From the ledger balances given below, prepare a trial balance for the Favre Company at June 30, 2017. List the accounts in the order shown on page 69 of the textbook. All account balances are normal.

Prepare a trial balance.

(LO 4)

Accounts Payable \$7,000, Cash \$5,200, Common Stock \$20,000, Dividends \$800, Equipment \$17,000, Service Revenue \$6,000, Accounts Receivable \$3,000, Salaries and Wages Expense \$6,000, and Rent Expense \$1,000.

BE2-10 An inexperienced bookkeeper prepared the following trial balance. Prepare a correct trial balance, assuming all account balances are normal.

Prepare a correct trial balance.

(LO 4)

ERIKA COMPANY
Trial Balance
December 31, 2017

	<u>Debit</u>	<u>Credit</u>
Cash	\$16,800	
Prepaid Insurance		\$ 3,500
Accounts Payable		3,000
Unearned Service Revenue	4,200	
Common Stock		13,000
Dividends		4,500
Service Revenue		25,600
Salaries and Wages Expense	18,600	
Rent Expense		2,400
	<u>\$39,600</u>	<u>\$52,000</u>

DO IT! Exercises

DO IT! 2-1 James Mayaguez has just rented space in a strip mall. In this space, he will open a photography studio, to be called "Picture This!" A friend has advised James to set up a double-entry set of accounting records in which to record all of his business transactions.

Identify normal balances.

(LO 1)

Identify the balance sheet accounts that James will likely need to record the transactions needed to open his business (a corporation). Indicate whether the normal balance of each account is a debit or credit.

Record business activities.
(LO 2)

DO IT! 2-2 James Mayaguez engaged in the following activities in establishing his photography studio, Picture This!:

1. Opened a bank account in the name of Picture This! and deposited \$8,000 of his own money into this account in exchange for common stock.
2. Purchased photography supplies at a total cost of \$1,600. The business paid \$300 in cash and the balance is on account.
3. Obtained estimates on the cost of photography equipment from three different manufacturers.

In what form (type of record) should James record these three activities? Prepare the entries to record the transactions.

Post transactions.
(LO 3)

DO IT! 2-3 James Mayaguez recorded the following transactions during the month of April.

April 3	Cash	3,900	
	Service Revenue		3,900
April 16	Rent Expense	600	
	Cash		600
April 20	Salaries and Wages Expense	500	
	Cash		500

Post these entries to the Cash T-account of the general ledger to determine the ending balance in cash. The beginning balance in cash on April 1 was \$1,600.

Prepare a trial balance.
(LO 4)

DO IT! 2-4 The following accounts are taken from the ledger of Chillin' Company at December 31, 2017.

200	Notes Payable	\$20,000	101	Cash	\$6,000
311	Common Stock	25,000	120	Supplies	5,000
157	Equipment	76,000	522	Rent Expense	2,000
332	Dividends	8,000	220	Salaries and	
726	Salaries and			Wages Payable	3,000
	Wages Expense	38,000	201	Accounts Payable	9,000
400	Service Revenue	86,000	112	Accounts Receivable	8,000

Prepare a trial balance in good form.

EXERCISES

Analyze statements about accounting and the recording process.

(LO 1)

E2-1 Faith Dillon as prepared the following list of statements about accounts.

1. An account is an accounting record of either a specific asset or a specific liability.
2. An account shows only increases, not decreases, in the item it relates to.
3. Some items, such as cash and accounts receivable, are combined into one account.
4. An account has a left, or credit side, and a right, or debit side.
5. A simple form of an account consisting of just the account title, the left side, and the right side, is called a T-account.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Identify debits, credits, and normal balances.

(LO 1)

E2-2 Selected transactions for L. Takemoto, an interior decorating firm, in its first month of business, are shown below.

- | | |
|--------|--|
| Jan. 2 | Invested \$15,000 cash in the business in exchange for common stock. |
| 3 | Purchased used car for \$8,200 cash for use in the business. |
| 9 | Purchased supplies on account for \$500. |
| 11 | Billed customers \$1,800 for services performed. |
| 16 | Paid \$200 cash for advertising. |
| 20 | Received \$780 cash from customers billed on January 11. |
| 23 | Paid creditor \$300 cash on balance owed. |
| 28 | Declared and paid a \$500 cash dividend. |

Instructions

For each transaction indicate the following.

- (a) The basic type of account debited and credited (asset, liability, stockholders' equity).
- (b) The specific account debited and credited (Cash, Rent Expense, Service Revenue, etc.).

- (c) Whether the specific account is increased or decreased.
 (d) The normal balance of the specific account.

Use the following format, in which the January 2 transaction is given as an example.

	Account Debited				Account Credited			
	(a) Basic Type	(b) Specific Account	(c) Effect	(d) Normal Balance	(a) Basic Type	(b) Specific Account	(c) Effect	(d) Normal Balance
Jan. 2	Asset	Cash	Increase	Debit	Stockholders' Equity	Common Stock	Increase	Credit

E2-3 Data for L. Takemoto, interior decorating, are presented in E2-2.

Journalize transactions.

Instructions

Journalize the transactions using journal page J1. (You may omit explanations.)

(LO 2)

E2-4 Presented below is information related to Lexington Real Estate Agency.

Analyze transactions and determine their effect on accounts.

- Oct. 1 Diane Lexington begins business as a real estate agent with a cash investment of \$20,000 in exchange for common stock.
 2 Hires an administrative assistant.
 3 Purchases office furniture for \$2,300, on account.
 6 Sells a house and lot for N. Fennig; bills N. Fennig \$3,600 for realty services performed.
 27 Pays \$850 on the balance related to the transaction of October 3.
 30 Pays the administrative assistant \$2,500 in salary for October.

(LO 1)

Instructions

Prepare the debit-credit analysis for each transaction as illustrated on pages 62–66.

E2-5 Transaction data for Lexington Real Estate Agency are presented in E2-4.

Journalize transactions.

Instructions

Journalize the transactions. (You may omit explanations.)

(LO 2)

E2-6 Fredo Industries had the following transactions.

Analyze transactions and journalize.

- Borrowed \$5,000 from the bank by signing a note.
- Paid \$2,500 cash for a computer.
- Purchased \$450 of supplies on account.

(LO 1, 2)

Instructions

- Indicate what accounts are increased and decreased by each transaction.
- Journalize each transaction. (Omit explanations.)

E2-7 Leppard Enterprises had the following selected transactions.

Analyze transactions and journalize.

- Kim Leppard invested \$5,000 cash in the business in exchange for common stock.
- Paid office rent of \$950.
- Performed consulting services and billed a client \$4,700.
- Declared and paid a \$600 cash dividend.

(LO 1, 2)

Instructions

- Indicate the effect each transaction has on the accounting equation (Assets = Liabilities + Stockholders' Equity), using plus and minus signs.
- Journalize each transaction. (Omit explanations.)

E2-8 Meghan Selzer has prepared the following list of statements about the general ledger.

Analyze statements about the ledger.

- The general ledger contains all the asset and liability accounts, but no stockholders' equity accounts.
- The general ledger is sometimes referred to as simply the ledger.
- The accounts in the general ledger are arranged in alphabetical order.
- Each account in the general ledger is numbered for easier identification.
- The general ledger is a book of original entry.

(LO 3)

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Post journal entries and prepare a trial balance.

(LO 3, 4)

E2-9 Selected transactions from the journal of Kati Tillman, investment broker, are presented below.

Date	Account Titles and Explanation	Ref.	Debit	Credit
Aug. 1	Cash Common Stock (Investment of cash for stock)		6,000	6,000
10	Cash Service Revenue (Received cash for services performed)		2,700	2,700
12	Equipment Cash Notes Payable (Purchased office equipment for cash and notes payable)		5,000	800 4,200
25	Account Receivable Service Revenue (Billed clients for services performed)		1,600	1,600
31	Cash Accounts Receivable (Receipt of cash on account)		880	880

Instructions

(a) Post the transactions to T-accounts.

(b) Prepare a trial balance at August 31, 2017.

Journalize transactions from account data and prepare a trial balance.

(LO 2, 4)

E2-10 The T-accounts below summarize the ledger of Santana Landscaping Company at the end of its first month of operations.

Cash No. 101		Unearned No. 209	
4/1 10,000	4/15 720	Service Revenue	4/30 1,000
4/12 900	4/25 1,500		
4/29 400		Common Stock No. 311	
4/30 1,000			4/1 10,000
Accounts Receivable No. 112		Service Revenue No. 400	
4/7 3,200	4/29 400		4/7 3,200
Supplies No. 126			4/12 900
4/4 1,800		Salaries and No. 726	
Accounts Payable No. 201		Wages Expense	4/15 720
4/25 1,500	4/4 1,800		

Instructions

(a) Prepare the complete general journal (including explanations) from which the postings to Cash were made.

(b) Prepare a trial balance at April 30, 2017.

E2-11 Presented below is the ledger for Higgs Co.

Cash		No. 101	
10/1	5,000	10/4	400
10/10	730	10/12	1,500
10/10	3,000	10/15	280
10/20	500	10/30	300
10/25	2,000	10/31	500
Accounts Receivable		No. 112	
10/6	800	10/20	500
10/20	910		
Supplies		No. 126	
10/4	400		
Equipment		No. 157	
10/3	2,000		
Notes Payable		No. 200	
		10/10	3,000
Accounts Payable		No. 201	
10/12	1,500	10/3	2,000

Common Stock		No. 311	
		10/1	5,000
		10/25	2,000
Dividends		No. 332	
10/30	300		
Service Revenue		No. 400	
		10/6	800
		10/10	730
		10/20	910
Salaries and Wages Expense		No. 726	
10/31	500		
Rent Expense		No. 729	
10/15	280		

Journalize transactions from account data and prepare a trial balance.

(LO 2, 4)

Instructions

- Reproduce the journal entries for the transactions that occurred on October 1, 10, and 20, and provide explanations for each.
- Determine the October 31 balance for each of the accounts above, and prepare a trial balance at October 31, 2017.

E2-12 Selected transactions for Alvarado Company during its first month in business are presented below.

- Sept. 1 Invested \$10,000 cash in the business in exchange for common stock.
 5 Purchased equipment for \$12,000 paying \$4,000 in cash and the balance on account.
 25 Paid \$2,400 cash on balance owed for equipment.
 30 Declared and paid a \$500 cash dividend.

Alvarado's chart of accounts shows No. 101 Cash, No. 157 Equipment, No. 201 Accounts Payable, No. 311 Common Stock, and No. 332 Dividends.

Instructions

- Journalize the transactions on page J1 of the journal. (Omit explanations.)
- Post the transactions using the standard account form.

E2-13 The bookkeeper for Brooks Equipment Repair made a number of errors in journalizing and posting, as described below.

- A credit posting of \$450 to Accounts Receivable was omitted.
- A debit posting of \$750 for Prepaid Insurance was debited to Insurance Expense.
- A collection from a customer of \$100 in payment of its account owed was journalized and posted as a debit to Cash \$100 and a credit to Service Revenue \$100.
- A credit posting of \$300 to Property Taxes Payable was made twice.
- A cash purchase of supplies for \$250 was journalized and posted as a debit to Supplies \$25 and a credit to Cash \$25.
- A debit of \$525 to Advertising Expense was posted as \$552.

Analyze errors and their effects on trial balance.

(LO 4)

Instructions

For each error:

- Indicate whether the trial balance will balance.
- If the trial balance will not balance, indicate the amount of the difference.
- Indicate the trial balance column that will have the larger total.

Consider each error separately. Use the following form, in which error (1) is given as an example.

<u>Error</u>	<u>(a)</u> <u>In Balance</u>	<u>(b)</u> <u>Difference</u>	<u>(c)</u> <u>Larger Column</u>
(1)	No	\$450	debit

Prepare a trial balance.
(LO 4)

E2-14 The accounts in the ledger of Time Is Money Delivery Service contain the following balances on July 31, 2017.

Accounts Receivable	\$10,642	Prepaid Insurance	\$ 1,968
Accounts Payable	8,396	Maintenance and Repairs Expense	961
Cash	?	Service Revenue	10,610
Equipment	49,360	Dividends	700
Gasoline Expense	758	Common Stock	40,000
Utilities Expense	523	Salaries and Wages Expense	4,428
Notes Payable	26,450	Salaries and Wages Payable	815
		Retained Earnings	4,636

Instructions

Prepare a trial balance with the accounts arranged as illustrated in the chapter and fill in the missing amount for Cash.

Identify cash flow activities.
(LO 4)

E2-15 The statement of cash flows classifies each transaction as an operating activity, an investing activity, or a financing activity. Operating activities are the types of activities the company performs to generate profits. Investing activities include the purchase of long-lived assets such as equipment or the purchase of investment securities. Financing activities are borrowing money, issuing shares of stock, and paying dividends.

Presented below are the following transactions.

1. Issued stock for \$20,000 cash.
2. Issued note payable for \$12,000 cash.
3. Purchased office equipment for \$11,000 cash.
4. Received \$15,000 cash for services performed.
5. Paid \$1,000 cash for rent.
6. Paid \$600 cash dividend to stockholders.
7. Paid \$5,700 cash for salaries.

Instructions

Classify each of these transactions as operating, investing, or financing activities.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/veygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Journalize a series of transactions.

(LO 1, 2)

P2-1A Grandview Park was started on April 1 by R. S. Francis and associates. The following selected events and transactions occurred during April.

- Apr. 1 Stockholders invested \$50,000 cash in the business in exchange for common stock.
- 4 Purchased land costing \$34,000 for cash.
- 8 Incurred advertising expense of \$1,800 on account.
- 11 Paid salaries to employees \$1,500.
- 12 Hired park manager at a salary of \$3,500 per month, effective May 1.
- 13 Paid \$2,400 cash for a one-year insurance policy.
- 17 Declared and paid a \$1,400 cash dividend.
- 20 Received \$5,700 in cash for admission fees.
- 25 Sold 100 coupon books for \$30 each. Each book contains 10 coupons that entitle the holder to one admission to the park.
- 30 Received \$8,900 in cash admission fees.
- 30 Paid \$840 on balance owed for advertising incurred on April 8.

Grandview uses the following accounts: Cash, Prepaid Insurance, Land, Accounts Payable, Unearned Service Revenue, Common Stock, Dividends, Service Revenue, Advertising Expense, and Salaries and Wages Expense.

Instructions

Journalize the April transactions.

P2-2A Julia Dumars is a licensed CPA. During the first month of operations of her business, Julia Dumars, Inc., the following events and transactions occurred.

- May 1 Stockholders invested \$20,000 cash in exchange for common stock.
 2 Hired a secretary-receptionist at a salary of \$2,000 per month.
 3 Purchased \$1,500 of supplies on account from Vincent Supply Company.
 7 Paid office rent of \$900 cash for the month.
 11 Completed a tax assignment and billed client \$2,800 for services performed.
 12 Received \$3,500 advance on a management consulting engagement.
 17 Received cash of \$1,200 for services performed for Orville Co.
 31 Paid secretary-receptionist \$2,000 salary for the month.
 31 Paid 40% of balance due Vincent Supply Company.

Journalize transactions, post, and prepare a trial balance.

(LO 1, 2, 3, 4)

Julia uses the following chart of accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 201 Accounts Payable, No. 209 Unearned Service Revenue, No. 311 Common Stock, No. 400 Service Revenue, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

Instructions

- (a) Journalize the transactions.
 (b) Post to the ledger accounts.
 (c) Prepare a trial balance on May 31, 2017.

(c) Trial balance totals \$28,400

P2-3A Tom Zopf owns and manages a computer repair service, which had the following trial balance on December 31, 2016 (the end of its fiscal year).

Journalize and post transactions and prepare a trial balance.

(LO 1, 2, 3, 4)

TABLETTE REPAIR SERVICE, INC.

**Trial Balance
December 31, 2016**

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 8,000	
Accounts Receivable	15,000	
Supplies	11,000	
Prepaid Rent	3,000	
Equipment	21,000	
Accounts Payable		\$17,000
Common Stock		30,000
Retained Earnings		11,000
	<u>\$58,000</u>	<u>\$58,000</u>

Summarized transactions for January 2017 were as follows.

- Advertising costs, paid in cash, \$1,000.
- Additional supplies acquired on account \$3,600.
- Miscellaneous expenses, paid in cash, \$1,700.
- Cash collected from customers in payment of accounts receivable \$13,000.
- Cash paid to creditors for accounts payable due \$14,400.
- Repair services performed during January: for cash \$5,000; on account \$9,000.
- Wages for January, paid in cash, \$3,000.
- Dividends during January were \$1,600.

Instructions

- (a) Open T-accounts for each of the accounts listed in the trial balance, and enter the opening balances for 2017.
 (b) Prepare journal entries to record each of the January transactions. (Omit explanations.)
 (c) Post the journal entries to the accounts in the ledger. (Add accounts as needed.)
 (d) Prepare a trial balance as of January 31, 2017.

(d) Trial balance totals \$61,200

Prepare a correct trial balance.

(LO 4)

P2-4A The trial balance of Dominic Company shown below does not balance.

DOMINIC COMPANY
Trial Balance
May 31, 2017

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 3,850	
Accounts Receivable		\$ 2,750
Prepaid Insurance	700	
Equipment	12,000	
Accounts Payable		4,500
Unearned Service Revenue	560	
Common Stock		11,700
Service Revenue	8,690	
Salaries and Wages Expense	4,200	
Advertising Expense		1,100
Utilities Expense	800	
	<u>\$30,800</u>	<u>\$20,050</u>

Your review of the ledger reveals that each account has a normal balance. You also discover the following errors.

1. The totals of the debit sides of Prepaid Insurance, Accounts Payable, and Utilities Expense were each understated \$100.
2. Transposition errors were made in Accounts Receivable and Service Revenue. Based on postings made, the correct balances were \$2,570 and \$8,960, respectively.
3. A debit posting to Salaries and Wages Expense of \$200 was omitted.
4. A \$1,000 cash dividend was debited to Common Stock for \$1,000 and credited to Cash for \$1,000.
5. A \$520 purchase of supplies on account was debited to Equipment for \$520 and credited to Cash for \$520.
6. A cash payment of \$450 for advertising was debited to Advertising Expense for \$45 and credited to Cash for \$45.
7. A collection from a customer for \$420 was debited to Cash for \$420 and credited to Accounts Payable for \$420.

Instructions

Prepare a correct trial balance. Note that the chart of accounts includes the following: Dividends and Supplies. (*Hint:* It helps to prepare the correct journal entry for the transaction described and compare it to the mistake made.)

Trial balance totals \$26,720

Journalize transactions, post, and prepare a trial balance.

(LO 1, 2, 3, 4)

P2-5A The Palace Theater opened on April 1. All facilities were completed on March 31. At this time, the ledger showed No. 101 Cash \$6,000, No. 140 Land \$12,000, No. 145 Buildings (concession stand, projection room, ticket booth, and screen) \$8,000, No. 157 Equipment \$6,000, No. 201 Accounts Payable \$2,000, No. 275 Mortgage Payable \$10,000, and No. 311 Common Stock \$20,000. During April, the following events and transactions occurred.

- Apr. 2 Paid film rental of \$800 on first movie.
 3 Ordered two additional films at \$950 each.
 9 Received \$1,800 cash from admissions.
 10 Made \$2,000 payment on mortgage and \$1,000 for accounts payable due.
 11 Palace Theater contracted with Dever Company to operate the concession stand. Dever is to pay 18% of gross concession receipts (payable monthly) for the rental of the concession stand.
 12 Paid advertising expenses \$320.
 20 Received one of the films ordered on April 3 and was billed \$950. The film will be shown in April.
 25 Received \$5,200 cash from admissions.
 29 Paid salaries \$1,600.
 30 Received statement from Dever showing gross concession receipts of \$1,000 and the balance due to The Palace Theater of \$180 (\$1,000 × 18%) for April. Dever paid one-half of the balance due and will remit the remainder on May 5.
 30 Prepaid \$1,000 rental on special film to be run in May.

In addition to the accounts identified above, the chart of accounts shows No. 112 Accounts Receivable, No. 136 Prepaid Rent, No. 400 Service Revenue, No. 429 Rent Revenue, No. 610 Advertising Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

Instructions

- Enter the beginning balances in the ledger as of April 1. Insert a check mark (✓) in the reference column of the ledger for the beginning balance.
- Journalize the April transactions.
- Post the April journal entries to the ledger. Assume that all entries are posted from page 1 of the journal.
- Prepare a trial balance on April 30, 2017.

(d) Trial balance totals \$37,130

PROBLEMS: SET B AND SET C

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP2-1 The financial statements of **Apple Inc.** are presented in Appendix A. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Apple's financial statements contain the following selected accounts, stated in millions of dollars.

Accounts Payable	Cash and Cash Equivalents
Accounts Receivable	Research and Development Expense
Property, Plant, and Equipment	Inventories

Instructions

- Answer the following questions.
 - What is the increase and decrease side for each account?
 - What is the normal balance for each account?
- Identify the probable other account in the transaction and the effect on that account when:
 - Accounts Receivable is decreased.
 - Accounts Payable is decreased.
 - Inventories are increased.
- Identify the other account(s) that ordinarily would be involved when:
 - Research and Development Expense is increased.
 - Property, Plant, and Equipment is increased.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP2-2 PepsiCo's financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- (a) Based on the information contained in the financial statements, determine the normal balance of the listed accounts for each company.

PepsiCo	Coca-Cola
1. Inventory	1. Accounts Receivable
2. Property, Plant, and Equipment	2. Cash and Cash Equivalents
3. Accounts Payable	3. Cost of Goods Sold (expense)
4. Interest Expense	4. Sales (revenue)

- (b) Identify the other account ordinarily involved when:
- (1) Accounts Receivable is increased.
 - (2) Salaries and Wages Payable is decreased.
 - (3) Property, Plant, and Equipment is increased.
 - (4) Interest Expense is increased.

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP2-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- (a) Based on the information contained in the financial statements, determine the normal balance of the listed accounts for each company.

Amazon	Wal-Mart
1. Interest Expense	1. Product Revenues
2. Cash and Cash Equivalents	2. Inventories
3. Accounts Payable	3. Cost of Sales

- (b) Identify the other account ordinarily involved when:
- (1) Accounts Receivable is increased.
 - (2) Interest Expense is increased.
 - (3) Salaries and Wages Payable is decreased.
 - (4) Service Revenue is increased.

Real-World Focus

BYP2-4 Much information about specific companies is available on the Internet. Such information includes basic descriptions of the company's location, activities, industry, financial health, and financial performance.

Address: biz.yahoo.com/i, or go to www.wiley.com/college/weygandt

Steps

1. Type in a company name, or use the index to find a company name.
2. Choose **Profile**. Perform instructions (a)–(c) below.
3. Click on the company's specific industry to identify competitors. Perform instructions (d)–(g) below.

Instructions

Answer the following questions.

- (a) What is the company's industry?
- (b) What are the company's total sales?

- (c) What is the company's net income?
- (d) What are the names of four of the company's competitors?
- (e) Choose one of these competitors.
- (f) What is this competitor's name? What are its sales? What is its net income?
- (g) Which of these two companies is larger by size of sales? Which one reported higher net income?

BYP2-5 The January 27, 2011, edition of the *New York Times* contains an article by Richard Sandomir entitled "N.F.L. Finances, as Seen Through Packers' Records." The article discusses the fact that the **Green Bay Packers** are the only NFL team that publicly publishes its annual report.

Instructions

Read the article and answer the following questions.

- (a) Why are the Green Bay Packers the only professional football team to publish and distribute an annual report?
- (b) Why is the football players' labor union particularly interested in the Packers' annual report?
- (c) In addition to the players' labor union, what other outside party might be interested in the annual report?
- (d) Even though the Packers' revenue increased in recent years, the company's operating profit fell significantly. How does the article explain this decline?

CRITICAL THINKING

Decision-Making Across the Organization

BYP2-6 Dyanna Craig operates Craig Riding Academy. The academy's primary sources of revenue are riding fees and lesson fees, which are paid on a cash basis. Dyanna also boards horses for owners, who are billed monthly for boarding fees. In a few cases, boarders pay in advance of expected use. For its revenue transactions, the academy maintains the following accounts: Cash, Accounts Receivable, and Service Revenue.

The academy owns 10 horses, a stable, a riding corral, riding equipment, and office equipment. These assets are accounted for in these accounts: Horses, Buildings, and Equipment.

The academy also maintains the following accounts: Supplies, Prepaid Insurance, Accounts Payable, Salaries and Wages Expense, Advertising Expense, Utilities Expense, and Maintenance and Repairs Expense.

Dyanna makes periodic withdrawals of cash dividends to stockholders. To record stockholders' equity in the business and dividends, three accounts are maintained: Common Stock, Retained Earnings, and Dividends.

During the first month of operations, an inexperienced bookkeeper was employed. Dyanna Craig asks you to review the following eight entries of the 50 entries made during the month. In each case, the explanation for the entry is correct.

May 1	Cash	18,000	
	Common Stock		18,000
	(Invested \$18,000 cash in exchange for stock)		
5	Cash	250	
	Service Revenue		250
	(Received \$250 cash for lessons provided)		
7	Cash	300	
	Service Revenue		300
	(Received \$300 for boarding of horses beginning June 1)		
14	Equipment	80	
	Cash		800
	(Purchased desk and other office equipment for \$800 cash)		
15	Salaries and Wages Expense	400	
	Cash		400
	(Issued dividend checks to stockholders)		
20	Cash	148	
	Service Revenue		184
	(Received \$184 cash for riding fees)		

May 30	Maintenance and Repairs Expense	75	
	Accounts Payable		75
	(Received bill of \$75 from carpenter for repair services performed)		
31	Supplies	1,700	
	Cash		1,700
	(Purchased an estimated 2 months' supply of feed and hay for \$1,700 on account)		

Instructions

With the class divided into groups, answer the following.

- Identify each journal entry that is correct. For each journal entry that is incorrect, prepare the entry that should have been made by the bookkeeper.
- Which of the incorrect entries would prevent the trial balance from balancing?
- What was the correct net income for May, assuming the bookkeeper reported net income of \$4,500 after posting all 50 entries?
- What was the correct cash balance at May 31, assuming the bookkeeper reported a balance of \$12,475 after posting all 50 entries (and the only errors occurred in the items listed above)?

Communication Activity

BYP2-7 Keller's Maid Company offers home-cleaning service. Two recurring transactions for the company are billing customers for services performed and paying employee salaries. For example, on March 15, bills totaling \$6,000 were sent to customers and \$2,000 was paid in salaries to employees.

Instructions

Write a memo to your instructor that explains and illustrates the steps in the recording process for each of the March 15 transactions. Use the format illustrated in the textbook under the heading, "The Recording Process Illustrated" (p. 62).

Ethics Cases

BYP2-8 Meredith Ward is the assistant chief accountant at Frazier Company, a manufacturer of computer chips and cellular phones. The company presently has total sales of \$20 million. It is the end of the first quarter. Meredith is hurriedly trying to prepare a trial balance so that quarterly financial statements can be prepared and released to management and the regulatory agencies. The total credits on the trial balance exceed the debits by \$1,000. In order to meet the 4 p.m. deadline, Meredith decides to force the debits and credits into balance by adding the amount of the difference to the Equipment account. She chooses Equipment because it is one of the larger account balances; percentage-wise, it will be the least misstated. Meredith "plugs" the difference! She believes that the difference will not affect anyone's decisions. She wishes that she had another few days to find the error but realizes that the financial statements are already late.

Instructions

- Who are the stakeholders in this situation?
- What are the ethical issues involved in this case?
- What are Meredith's alternatives?

BYP2-9 If you haven't already done so, in the not-too-distant future you will prepare a résumé. In some ways, your résumé is like a company's annual report. Its purpose is to enable others to evaluate your past, in an effort to predict your future.

A résumé is your opportunity to create a positive first impression. It is important that it be impressive—but it should also be accurate. In order to increase their job prospects, some people are tempted to "inflate" their résumés by overstating the importance of some past accomplishments or positions. In fact, you might even think that "everybody does it" and that if you don't do it, you will be at a disadvantage.

David Edmondson, the president and CEO of well-known electronics retailer **Radio Shack**, overstated his accomplishments by claiming that he had earned a bachelor of science degree, when in fact he had not. Apparently, his employer had not done a background check to ensure the accuracy of his résumé. Should Radio Shack have fired him?

YES: Radio Shack is a publicly traded company. Investors, creditors, employees, and others doing business with the company will not trust it if its leader is known to have poor integrity. The “tone at the top” is vital to creating an ethical organization.

NO: Mr. Edmondson had been a Radio Shack employee for 11 years. He had served the company in a wide variety of positions, and had earned the position of CEO through exceptional performance. While the fact that he lied 11 years earlier on his résumé was unfortunate, his service since then made this past transgression irrelevant. In addition, the company was in the midst of a massive restructuring, which included closing 700 of its 7,000 stores. It could not afford additional upheaval at this time.

Instructions

Write a response indicating your position regarding this situation. Provide support for your view.

All About You

BYP2-10 Every company needs to plan in order to move forward. Its top management must consider where it wants the company to be in three to five years. Like a company, you need to think about where you want to be three to five years from now, and you need to start taking steps now in order to get there.

Instructions

Provide responses to each of the following items.

- Where would you like to be working in three to five years? Describe your plan for getting there by identifying between five and 10 specific steps that you need to take.
- In order to get the job you want, you will need a résumé. Your résumé is the equivalent of a company’s annual report. It needs to provide relevant and reliable information about your past accomplishments so that employers can decide whether to “invest” in you. Do a search on the Internet to find a good résumé format. What are the basic elements of a résumé?
- A company’s annual report provides information about a company’s accomplishments. In order for investors to use the annual report, the information must be reliable; that is, users must have faith that the information is accurate and believable. How can you provide assurance that the information on your résumé is reliable?
- Prepare a résumé assuming that you have accomplished the five to 10 specific steps you identified in part (a). Also, provide evidence that would give assurance that the information is reliable.

Considering People, Planet, and Profit

BYP2-11 Auditors provide a type of certification of corporate financial statements. Certification is used in many other aspects of business as well. For example, it plays a critical role in the sustainability movement. The February 7, 2012, issue of the *New York Times* contained an article by S. Amanda Caudill entitled “Better Lives in Better Coffee,” which discusses the role of certification in the coffee business.

Address: <http://scientistatwork.blogs.nytimes.com/2012/02/07/better-lives-in-better-coffee>

Instructions

Read the article and answer the following questions.

- The article mentions three different certification types that coffee growers can obtain from three different certification bodies. Using financial reporting as an example, what potential problems might the existence of multiple certification types present to coffee purchasers?
- According to the author, which certification is most common among coffee growers? What are the possible reasons for this?
- What social and environmental benefits are coffee certifications trying to achieve? Are there also potential financial benefits to the parties involved?

A Look at IFRS

LEARNING
OBJECTIVE

5

Compare the procedures for the accounting process under GAAP and IFRS.

International companies use the same set of procedures and records to keep track of transaction data. Thus, the material in Chapter 2 dealing with the account, general rules of debit and credit, and steps in the recording process—the journal, ledger, and chart of accounts—is the same under both GAAP and IFRS.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to the recording process.

Similarities

- Transaction analysis is the same under IFRS and GAAP.
- Both the IASB and the FASB go beyond the basic definitions provided in the textbook for the key elements of financial statements, that is assets, liabilities, equity, revenues, and expenses. The implications of the expanded definitions are discussed in more advanced accounting courses.
- As shown in the textbook, dollar signs are typically used only in the trial balance and the financial statements. The same practice is followed under IFRS, using the currency of the country where the reporting company is headquartered.
- A trial balance under IFRS follows the same format as shown in the textbook.

Differences

- IFRS relies less on historical cost and more on fair value than do FASB standards.
- Internal controls are a system of checks and balances designed to prevent and detect fraud and errors. While most public U.S. companies have these systems in place, many non-U.S. companies have never completely documented the controls nor had an independent auditor attest to their effectiveness.

Looking to the Future

The basic recording process shown in this textbook is followed by companies around the globe. It is unlikely to change in the future. The definitional structure of assets, liabilities, equity, revenues, and expenses may change over time as the IASB and FASB evaluate their overall conceptual framework for establishing accounting standards.

IFRS Practice

IFRS Self-Test Questions

1. Which statement is **correct** regarding IFRS?
 - (a) IFRS reverses the rules of debits and credits, that is, debits are on the right and credits are on the left.
 - (b) IFRS uses the same process for recording transactions as GAAP.
 - (c) The chart of accounts under IFRS is different because revenues follow assets.
 - (d) None of the above statements are correct.
2. The expanded accounting equation under IFRS is as follows:
 - (a) $\text{Assets} = \text{Liabilities} + \text{Common Stock} + \text{Retained Earnings} + \text{Revenues} - \text{Expenses} + \text{Dividends}$.
 - (b) $\text{Assets} + \text{Liabilities} = \text{Common Stock} + \text{Retained Earnings} + \text{Revenues} - \text{Expenses} - \text{Dividends}$.
 - (c) $\text{Assets} = \text{Liabilities} + \text{Common Stock} + \text{Retained Earnings} + \text{Revenues} - \text{Expenses} - \text{Dividends}$.
 - (d) $\text{Assets} = \text{Liabilities} + \text{Common Stock} + \text{Retained Earnings} - \text{Revenues} - \text{Expenses} - \text{Dividends}$.

3. A trial balance:
 - (a) is the same under IFRS and GAAP.
 - (b) proves that transactions are recorded correctly.
 - (c) proves that all transactions have been recorded.
 - (d) will not balance if a correct journal entry is posted twice.
4. One difference between IFRS and GAAP is that:
 - (a) GAAP uses accrual-accounting concepts and IFRS uses primarily the cash basis of accounting.
 - (b) IFRS uses a different posting process than GAAP.
 - (c) IFRS uses more fair value measurements than GAAP.
 - (d) the limitations of a trial balance are different between IFRS and GAAP.
5. The general policy for using proper currency signs (dollar, yen, pound, etc.) is the same for both IFRS and this textbook. This policy is as follows:
 - (a) Currency signs only appear in ledgers and journal entries.
 - (b) Currency signs are only shown in the trial balance.
 - (c) Currency signs are shown for all compound journal entries.
 - (d) Currency signs are shown in trial balances and financial statements.

International Financial Reporting Problem: Louis Vuitton

IFRS2-1 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Describe in which statement each of the following items is reported, and the position in the statement (e.g., current asset).

- (a) Other operating income and expense.
- (b) Cash and cash equivalents.
- (c) Trade accounts payable.
- (d) Cost of net financial debt.

Answers to IFRS Self-Test Questions

3

Adjusting the Accounts

CHAPTER PREVIEW In Chapter 1, you learned a neat little formula: $\text{Net income} = \text{Revenues} - \text{Expenses}$. In Chapter 2, you learned some rules for recording revenue and expense transactions. Guess what? Things are not really that nice and neat. In fact, it is often difficult for companies to determine in what time period they should report some revenues and expenses. In other words, in measuring net income, timing is everything.

FEATURE STORY

Keeping Track of Groupons

Who doesn't like buying things at a discount? That's why it's not surprising that three years after it started as a company, **Groupon** was estimated to be worth \$16 billion. This translates into an average increase in value of almost \$15 million per day.

Now consider that Groupon had previously been estimated to be worth even more than that. What happened? Well, accounting regulators and investors began to question the way that Groupon had accounted for some of its transactions. But if Groupon sells only coupons ("groupons"), how hard can it be to accurately account for that? It turns out that accounting for coupons is not as easy as you might think.

First, consider what happens when Groupon makes a sale. Suppose it sells a groupon for \$30 for Highrise Hamburgers. When it receives the \$30 from the customer, it must turn over half of that amount (\$15) to Highrise Hamburgers. So should Groupon record revenue for the full \$30 or just \$15? Until recently, Groupon recorded the full \$30. But, in response to an SEC ruling on the issue, Groupon now records revenue of \$15 instead.

A second issue is a matter of timing. When should Groupon record this \$15 revenue? Should it record the revenue when it sells the groupon, or must it wait until the customer uses the groupon at Highrise Hamburgers? You can find the answer to

this question in the notes to Groupon's financial statements. It recognizes the revenue once "the number of customers who purchase the daily deal exceeds the predetermined threshold, the Groupon has been electronically delivered to the purchaser and a listing of Groupons sold has been made available to the merchant."

The accounting becomes even more complicated when you consider the company's loyalty programs. Groupon offers free or discounted groupons to its subscribers for doing things such as referring new customers or participating in promotions. These groupons are to be used for future purchases, yet the company must record the expense at the time the customer receives the groupon. The cost of these programs is huge for Groupon, so the timing of this expense can definitely affect its reported income.

The final kicker is that Groupon, like all other companies, must rely on many estimates in its financial reporting. For example, Groupon reports that "estimates are utilized for, but not limited to, stock-based compensation, income taxes, valuation of acquired goodwill and intangible assets, customer refunds, contingent liabilities and the depreciable lives of fixed assets." It concludes by saying that "actual results could differ materially from those estimates." So, next time you use a coupon, think about what that means for the company's accountants!

Visit **WileyPLUS with ORION** for additional tutorials and practice opportunities.

LEARNING
OBJECTIVE

1

Explain the accrual basis of accounting and the reasons for adjusting entries.

Time Period
Assumption

Alternative Terminology

The time period assumption is also called the *periodicity assumption*.

If we could wait to prepare financial statements until a company ended its operations, no adjustments would be needed. At that point, we could easily determine its final balance sheet and the amount of lifetime income it earned.

However, most companies need immediate feedback about how well they are doing. For example, management usually wants monthly financial statements. The Internal Revenue Service requires all businesses to file annual tax returns. Therefore, **accountants divide the economic life of a business into artificial time periods**. This convenient assumption is referred to as the **time period assumption**.

Many business transactions affect more than one of these arbitrary time periods. For example, the airplanes purchased by **Southwest Airlines** five years ago are still in use today. We must determine the relevance of each business transaction to specific accounting periods. (How much of the cost of an airplane contributed to operations this year?)

Fiscal and Calendar Years

Both small and large companies prepare financial statements periodically in order to assess their financial condition and results of operations. **Accounting time periods are generally a month, a quarter, or a year**. Monthly and quarterly time periods are called **interim periods**. Most large companies must prepare both quarterly and annual financial statements.

An accounting time period that is one year in length is a **fiscal year**. A fiscal year usually begins with the first day of a month and ends 12 months later on the last day of a month. Many businesses use the **calendar year** (January 1 to December 31) as their accounting period. Some do not. Companies whose fiscal year differs from the calendar year include **Delta Air Lines**, June 30, and **The Walt Disney Company**, September 30. Sometimes a company's year-end will vary from year to year. For example, **PepsiCo's** fiscal year ends on the Friday closest to December 31, which was December 29 in 2012 and December 28 in 2013.

Accrual- versus Cash-Basis Accounting

What you will learn in this chapter is **accrual-basis accounting**. Under the accrual basis, companies record transactions that change a company's financial statements **in the periods in which the events occur**. For example, using the accrual basis to determine net income means companies recognize revenues when they perform services (rather than when they receive cash). It also means recognizing expenses when incurred (rather than when paid).

An alternative to the accrual basis is the cash basis. Under **cash-basis accounting**, companies record revenue when they receive cash. They record an expense when they pay out cash. The cash basis seems appealing due to its simplicity, but it often produces misleading financial statements. It fails to record revenue for a company that has performed services but for which the company has not received the cash. As a result, the cash basis does not match expenses with revenues.

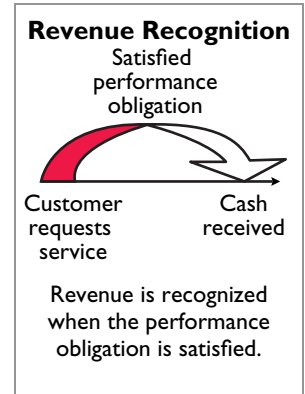

Accrual-basis accounting is therefore in accordance with generally accepted accounting principles (GAAP). Individuals and some small companies, however, do use cash-basis accounting. The cash basis is justified for small businesses because they often have few receivables and payables. Medium and large companies use accrual-basis accounting.

Recognizing Revenues and Expenses

It can be difficult to determine when to report revenues and expenses. The revenue recognition principle and the expense recognition principle help in this task.

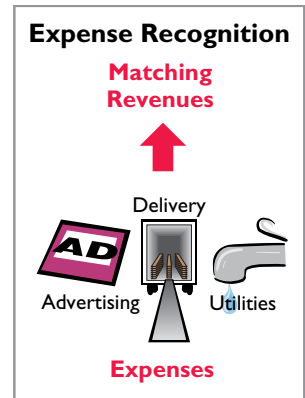

REVENUE RECOGNITION PRINCIPLE

When a company agrees to perform a service or sell a product to a customer, it has a **performance obligation**. When the company meets this performance obligation, it recognizes revenue. The **revenue recognition principle** therefore requires that companies recognize revenue in the accounting period in which the performance obligation is satisfied. To illustrate, assume that Dave’s Dry Cleaning cleans clothing on June 30 but customers do not claim and pay for their clothes until the first week of July. Dave’s should record revenue in June when it performed the service (satisfied the performance obligation) rather than in July when it received the cash. At June 30, Dave’s would report a receivable on its balance sheet and revenue in its income statement for the service performed.

EXPENSE RECOGNITION PRINCIPLE

Accountants follow a simple rule in recognizing expenses: “Let the expenses follow the revenues.” Thus, expense recognition is tied to revenue recognition. In the dry cleaning example, this means that Dave’s should report the salary expense incurred in performing the June 30 cleaning service in the same period in which it recognizes the service revenue. The critical issue in expense recognition is when the expense makes its contribution to revenue. This may or may not be the same period in which the expense is paid. If Dave’s does not pay the salary incurred on June 30 until July, it would report salaries payable on its June 30 balance sheet.

This practice of expense recognition is referred to as the **expense recognition principle** (often referred to as the **matching principle**). It dictates that efforts (expenses) be matched with results (revenues). Illustration 3-1 summarizes the revenue and expense recognition principles.

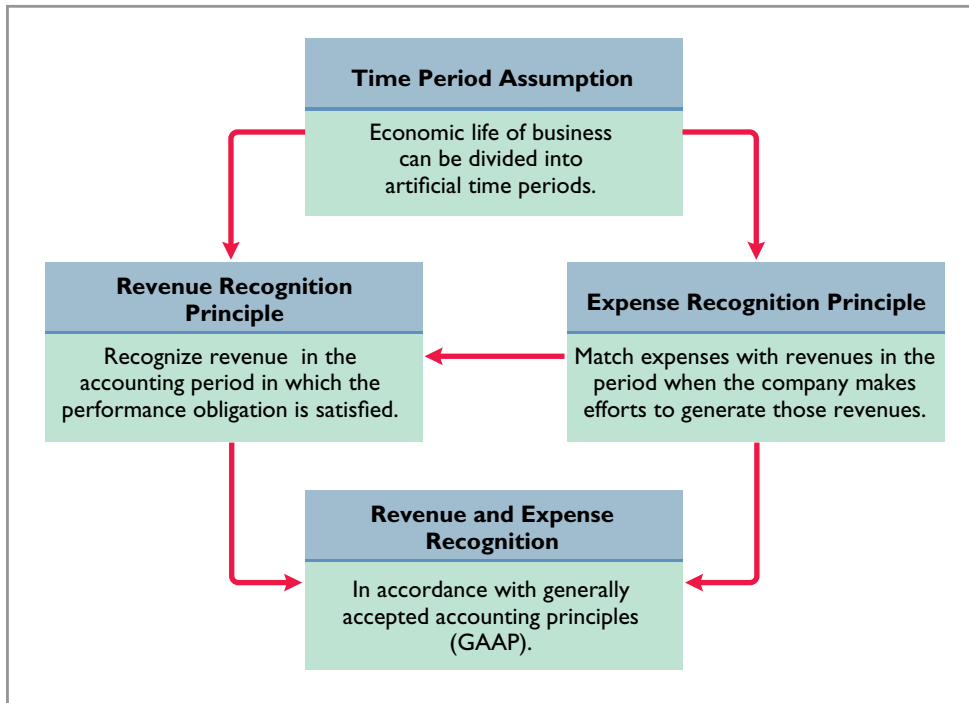

Illustration 3-1
GAAP relationships in revenue and expense recognition

Ethics Insight Krispy Kreme

Cooking the Books?

Allegations of abuse of the revenue recognition principle have become all too common in recent years. For example, it was alleged that **Krispy Kreme** sometimes doubled the number of doughnuts shipped to wholesale customers at the end of a quarter to boost quarterly results. The customers shipped the unsold doughnuts back after the beginning of the

next quarter for a refund. Conversely, **Computer Associates International** was accused of backdating sales—that is, reporting a sale in one period that did not actually occur until the next period in order to achieve the earlier period's sales targets.

What motivates sales executives and finance and accounting executives to participate in activities that result in inaccurate reporting of revenues? (Go to **WileyPLUS** for this answer and additional questions.)

The Need for Adjusting Entries

In order for revenues to be recorded in the period in which services are performed and for expenses to be recognized in the period in which they are incurred, companies make adjusting entries. **Adjusting entries ensure that the revenue recognition and expense recognition principles are followed.**

Adjusting entries are necessary because the **trial balance**—the first pulling together of the transaction data—may not contain up-to-date and complete data. This is true for several reasons:

1. Some events are not recorded daily because it is not efficient to do so. Examples are the use of supplies and the earning of wages by employees.
2. Some costs are not recorded during the accounting period because these costs expire with the passage of time rather than as a result of recurring daily transactions. Examples are charges related to the use of buildings and equipment, rent, and insurance.
3. Some items may be unrecorded. An example is a utility service bill that will not be received until the next accounting period.

Adjusting entries are required every time a company prepares financial statements. The company analyzes each account in the trial balance to determine whether it is complete and up-to-date for financial statement purposes. **Every adjusting entry will include one income statement account and one balance sheet account.**

**International Note**

Internal controls are a system of checks and balances designed to detect and prevent fraud and errors. The Sarbanes-Oxley Act requires U.S. companies to enhance their systems of internal control. However, many foreign companies do not have to meet strict internal control requirements. Some U.S. companies believe that this gives foreign firms an unfair advantage because developing and maintaining internal controls can be very expensive.

Types of Adjusting Entries

Adjusting entries are classified as either **deferrals** or **accruals**. As Illustration 3-2 shows, each of these classes has two subcategories.

Illustration 3-2
Categories of adjusting entries

Deferrals:

1. **Prepaid expenses:** Expenses paid in cash before they are used or consumed.
2. **Unearned revenues:** Cash received before services are performed.

Accruals:

1. **Accrued revenues:** Revenues for services performed but not yet received in cash or recorded.
2. **Accrued expenses:** Expenses incurred but not yet paid in cash or recorded.

Subsequent sections give examples of each type of adjustment. Each example is based on the October 31 trial balance of Pioneer Advertising Inc. from Chapter 2, reproduced in Illustration 3-3.

 PIONEER ADVERTISING INC. Trial Balance October 31, 2017		
	<u>Debit</u>	<u>Credit</u>
Cash	\$ 15,200	
Supplies	2,500	
Prepaid Insurance	600	
Equipment	5,000	
Notes Payable		\$ 5,000
Accounts Payable		2,500
Unearned Service Revenue		1,200
Common Stock		10,000
Retained Earnings		-0-
Dividends	500	
Service Revenue		10,000
Salaries and Wages Expense	4,000	
Rent Expense	900	
	<u>\$28,700</u>	<u>\$28,700</u>

Illustration 3-3
Trial balance

We assume that Pioneer uses an accounting period of one month. Thus, monthly adjusting entries are made. The entries are dated October 31.

LEARNING
OBJECTIVE

2

Prepare adjusting entries for deferrals.

To defer means to postpone or delay. **Deferrals** are expenses or revenues that are recognized at a date later than the point when cash was originally exchanged. The two types of deferrals are prepaid expenses and unearned revenues.

Prepaid Expenses

When companies record payments of expenses that will benefit more than one accounting period, they record an asset called **prepaid expenses** or **prepayments**. When expenses are prepaid, an asset account is increased (debited) to show the service or benefit that the company will receive in the future. Examples of common prepayments are insurance, supplies, advertising, and rent. In addition, companies make prepayments when they purchase buildings and equipment.

Prepaid expenses are costs that expire either with the passage of time (e.g., rent and insurance) **or through use** (e.g., supplies). The expiration of these costs does not require daily entries, which would be impractical and unnecessary. Accordingly, companies postpone the recognition of such cost expirations until they prepare financial statements. At each statement date, they make adjusting entries to record the expenses applicable to the current accounting period and to show the remaining amounts in the asset accounts.

Prior to adjustment, assets are overstated and expenses are understated. Therefore, as shown in Illustration 3-4, **an adjusting entry for prepaid expenses results in an increase (a debit) to an expense account and a decrease (a credit) to an asset account.**

Illustration 3-4

Adjusting entries for prepaid expenses

Let's look in more detail at some specific types of prepaid expenses, beginning with supplies.

SUPPLIES

The purchase of supplies, such as paper and envelopes, results in an increase (a debit) to an asset account. During the accounting period, the company uses supplies. Rather than record supplies expense as the supplies are used, companies recognize supplies expense at the **end** of the accounting period. At the end of the accounting period, the company counts the remaining supplies. As shown in Illustration 3-5, the difference between the unadjusted balance in the Supplies (asset) account and the actual cost of supplies on hand represents the supplies used (an expense) for that period.

Recall from Chapter 2 that Pioneer Advertising Inc. purchased supplies costing \$2,500 on October 5. Pioneer recorded the purchase by increasing (debiting) the asset Supplies. This account shows a balance of \$2,500 in the October 31 trial balance. An inventory count at the close of business on October 31 reveals that \$1,000 of supplies are still on hand. Thus, the cost of supplies used is \$1,500 (\$2,500 - \$1,000). This use of supplies decreases an asset, Supplies. It also decreases stockholders' equity by increasing an expense account, Supplies Expense. This is shown in Illustration 3-5.

Supplies

Oct. 5

Supplies purchased;
record asset

Oct. 31

Supplies used;
record supplies expense

Basic Analysis	The expense Supplies Expense is increased \$1,500; the asset Supplies is decreased \$1,500.			
Equation Analysis	(1)	$\begin{array}{r} \text{Assets} \\ \text{Supplies} \\ -\$1,500 \end{array}$	$\begin{array}{r} = \\ = \\ = \end{array}$	$\begin{array}{r} \text{Liabilities} \\ + \\ \text{Stockholders' Equity} \\ \text{Supplies Expense} \\ -\$1,500 \end{array}$
Debit-Credit Analysis	Debits increase expenses: debit Supplies Expense \$1,500. Credits decrease assets: credit Supplies \$1,500.			
Journal Entry	Oct. 31	Supplies Expense Supplies (To record supplies used)	1,500	1,500
Posting	Supplies 126		Supplies Expense 631	
	Oct. 5	2,500	Oct. 31	Adj. 1,500
	Oct. 31	Bal. 1,000	Oct. 31	Bal. 1,500

Illustration 3-5
Adjustment for supplies

After adjustment, the asset account Supplies shows a balance of \$1,000, which is equal to the cost of supplies on hand at the statement date. In addition, Supplies Expense shows a balance of \$1,500, which equals the cost of supplies used in October. **If Pioneer does not make the adjusting entry, October expenses are understated and net income is overstated by \$1,500. Moreover, both assets and stockholders' equity will be overstated by \$1,500 on the October 31 balance sheet.**

INSURANCE

Companies purchase insurance to protect themselves from losses due to fire, theft, and unforeseen events. Insurance must be paid in advance, often for more than one year. The cost of insurance (premiums) paid in advance is recorded as an increase (debit) in the asset account Prepaid Insurance. At the financial statement date, companies increase (debit) Insurance Expense and decrease (credit) Prepaid Insurance for the cost of insurance that has expired during the period.

On October 4, Pioneer Advertising paid \$600 for a one-year fire insurance policy. Coverage began on October 1. Pioneer recorded the payment by increasing (debiting) Prepaid Insurance. This account shows a balance of \$600 in the October 31 trial balance. Insurance of \$50 ($\$600 \div 12$) expires each month. The expiration of prepaid insurance decreases an asset, Prepaid Insurance. It also decreases stockholders' equity by increasing an expense account, Insurance Expense.

As shown in Illustration 3-6 (page 102), the asset Prepaid Insurance shows a balance of \$550, which represents the unexpired cost for the remaining 11 months of coverage. At the same time, the balance in Insurance Expense equals the insurance cost that expired in October. **If Pioneer does not make this adjustment, October expenses are understated by \$50 and net income is overstated by \$50. Moreover, both assets and stockholders' equity will be overstated by \$50 on the October 31 balance sheet.**

DEPRECIATION

A company typically owns a variety of assets that have long lives, such as buildings, equipment, and motor vehicles. The period of service is referred to as the **useful life** of the asset. Because a building is expected to be of service for many years, it is recorded as an asset, rather than an expense, on the date it is acquired.

Insurance				
Oct. 4				
	Insurance purchased; record asset

Depreciation = \$480/year			

Oct. 31
Depreciation recognized;
record depreciation expense

As explained in Chapter 1, companies record such assets **at cost**, as required by the historical cost principle. To follow the expense recognition principle, companies allocate a portion of this cost as an expense during each period of the asset's useful life. **Depreciation** is the process of allocating the cost of an asset to expense over its useful life.

NEED FOR ADJUSTMENT The acquisition of long-lived assets is essentially a long-term prepayment for the use of an asset. An adjusting entry for depreciation is needed to recognize the cost that has been used (an expense) during the period and to report the unused cost (an asset) at the end of the period. One very important point to understand: **Depreciation is an allocation concept, not a valuation concept.** That is, depreciation **allocates an asset's cost to the periods in which it is used. Depreciation does not attempt to report the actual change in the value of the asset.**

For Pioneer Advertising, assume that depreciation on the equipment is \$480 a year, or \$40 per month. As shown in Illustration 3-7, rather than decrease (credit) the asset account directly, Pioneer instead credits Accumulated Depreciation—Equipment. Accumulated Depreciation is called a **contra asset account**. Such an account is offset against an asset account on the balance sheet. Thus, the Accumulated Depreciation—Equipment account offsets the asset account Equipment. **This account keeps track of the total amount of depreciation expense taken over the life of the asset.** To keep the accounting equation in balance, Pioneer decreases stockholders' equity by increasing an expense account, Depreciation Expense.

The balance in the Accumulated Depreciation—Equipment account will increase \$40 each month, and the balance in Equipment remains \$5,000.

Helpful Hint

All contra accounts have increases, decreases, and normal balances opposite to the account to which they relate.

STATEMENT PRESENTATION As indicated, Accumulated Depreciation—Equipment is a contra asset account. It is offset against Equipment on the balance sheet. The normal balance of a contra asset account is a credit. A theoretical alternative to using a contra asset account would be to decrease (credit) the asset account by the amount of depreciation each period. But using the contra account is preferable for a simple reason: It discloses **both** the original cost of the equipment **and** the total cost that has been expensed to date. Thus, in the balance sheet,

Basic Analysis	The expense Depreciation Expense is increased \$40; the contra asset Accumulated Depreciation—Equipment is increased \$40.

Illustration 3-7
Adjustment for depreciation

Pioneer deducts Accumulated Depreciation—Equipment from the related asset account, as shown in Illustration 3-8.

Equipment	\$ 5,000
Less: Accumulated depreciation—equipment	40
	\$4,960

Illustration 3-8
Balance sheet presentation of accumulated depreciation

Book value is the difference between the cost of any depreciable asset and its related accumulated depreciation. In Illustration 3-8, the book value of the equipment at the balance sheet date is \$4,960. The book value and the fair value of the asset are generally two different values. As noted earlier, **the purpose of depreciation is not valuation but a means of cost allocation.**

Depreciation expense identifies the portion of an asset's cost that expired during the period (in this case, in October). The accounting equation shows that **without this adjusting entry, total assets, total stockholders' equity, and net income are overstated by \$40 and depreciation expense is understated by \$40.**

Illustration 3-9 summarizes the accounting for prepaid expenses.

Alternative Terminology
Book value is also referred to as *carrying value*.

Illustration 3-9
Accounting for prepaid expenses

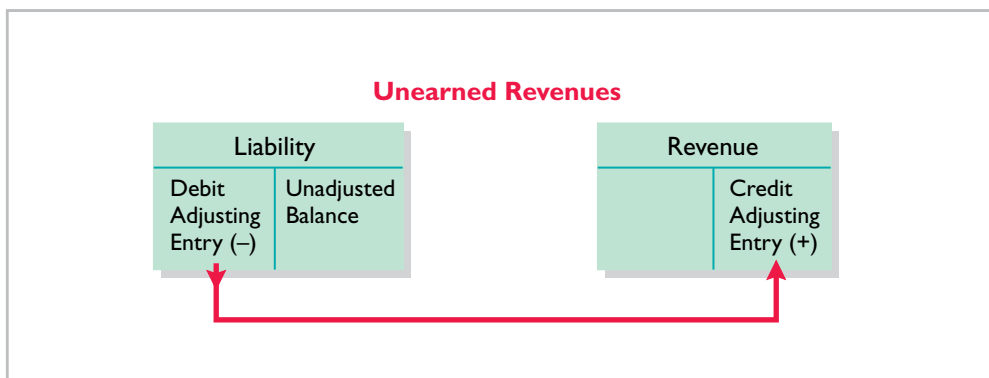

Unearned Revenues

When companies receive cash before services are performed, they record a liability by increasing (crediting) a liability account called **unearned revenues**. In other words, a company now has a performance obligation (liability) to transfer a service to one of its customers. Items like rent, magazine subscriptions, and customer deposits for future service may result in unearned revenues. Airlines such as **United**, **Southwest**, and **Delta**, for instance, treat receipts from the sale of tickets as unearned revenue until the flight service is provided.

Unearned revenues are the opposite of prepaid expenses. Indeed, unearned revenue on the books of one company is likely to be a prepaid expense on the books of the company that has made the advance payment. For example, if identical accounting periods are assumed, a landlord will have unearned rent revenue when a tenant has prepaid rent.

When a company receives payment for services to be performed in a future accounting period, it increases (credits) an unearned revenue (a liability) account to recognize the liability that exists. The company subsequently recognizes revenues when it performs the service. During the accounting period, it is not practical to make daily entries as the company performs services. Instead, the company delays recognition of revenue until the adjustment process. Then, the company makes an adjusting entry to record the revenue for services performed during the period and to show the liability that remains at the end of the accounting period. Typically, prior to adjustment, liabilities are overstated and revenues are understated. Therefore, as shown in Illustration 3-10, **the adjusting entry for unearned revenues results in a decrease (a debit) to a liability account and an increase (a credit) to a revenue account.**

Illustration 3-10
Adjusting entries for unearned revenues

Unearned Revenues

Oct. 2

Cash is received in advance; liability is recorded

Oct. 31
Some service has been performed; some revenue is recorded

Pioneer Advertising received \$1,200 on October 2 from R. Knox for advertising services expected to be completed by December 31. Pioneer credited the payment to Unearned Service Revenue. This liability account shows a balance of \$1,200 in the October 31 trial balance. From an evaluation of the services Pioneer performed for Knox during October, the company determines that it should recognize \$400 of revenue in October. The liability (Unearned Service Revenue) is therefore decreased, and stockholders' equity (Service Revenue) is increased.

As shown in Illustration 3-11, the liability Unearned Service Revenue now shows a balance of \$800. That amount represents the remaining advertising services expected to be performed in the future. At the same time, Service Revenue shows total revenue recognized in October of \$10,400. **Without this adjustment, revenues and net income are understated by \$400 in the income statement. Moreover, liabilities will be overstated and stockholders' equity will be understated by \$400 on the October 31 balance sheet.**

Basic Analysis	The liability Unearned Service Revenue is decreased \$400; the revenue Service Revenue is increased \$400.

Accounting Across the Organization

Best Buy

© Skip ODonnell/iStockphoto

Turning Gift Cards into Revenue

Those of you who are marketing majors (and even most of you who are not) know that gift cards are among the hottest marketing tools in merchandising today. Customers purchase gift cards and give them to someone for later use. In a recent year, gift-card sales topped \$95 billion.

Although these programs are popular with marketing executives, they create accounting questions. Should revenue be recorded at the time the gift card is sold, or when it is exercised? How should expired gift cards be accounted for? In a recent balance sheet, **Best Buy** reported unearned revenue related to gift cards of \$428 million.

Source: Robert Berner, "Gift Cards: No Gift to Investors," *BusinessWeek* (March 14, 2005), p. 86.

Suppose that Robert Jones purchases a \$100 gift card at Best Buy on December 24, 2016, and gives it to his wife, Mary Jones, on December 25, 2016. On January 3, 2017, Mary uses the card to purchase \$100 worth of CDs. When do you think Best Buy should recognize revenue and why? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!**2****Adjusting Entries for Deferrals**

The ledger of Hammond Inc., on March 31, 2017, includes these selected accounts before adjusting entries are prepared.

	Debit	Credit
Prepaid Insurance	\$ 3,600	
Supplies	2,800	
Equipment	25,000	
Accumulated Depreciation—Equipment		\$5,000
Unearned Service Revenue		9,200

An analysis of the accounts shows the following.

1. Insurance expires at the rate of \$100 per month.
2. Supplies on hand total \$800.
3. The equipment depreciates \$200 a month.
4. During March, services were performed for one-half of the unearned service revenue.

Prepare the adjusting entries for the month of March.

Solution**Action Plan**

- ✓ Make adjusting entries at the end of the period for revenues recognized and expenses incurred in the period.
- ✓ Don't forget to make adjusting entries for deferrals. Failure to adjust for deferrals leads to overstatement of the asset or liability and understatement of the related expense or revenue.

1. Insurance Expense	100	
Prepaid Insurance		100
(To record insurance expired)		
2. Supplies Expense	2,000	
Supplies		2,000
(To record supplies used)		
3. Depreciation Expense	200	
Accumulated Depreciation—Equipment		200
(To record monthly depreciation)		
4. Unearned Service Revenue	4,600	
Service Revenue		4,600
(To record revenue for services performed)		

Related exercise material: **BE3-2, BE3-3, BE3-4, BE3-5, BE3-6, and DO IT 3-2.**

LEARNING OBJECTIVE**3****Prepare adjusting entries for accruals.**

The second category of adjusting entries is **accruals**. Prior to an accrual adjustment, the revenue account (and the related asset account) or the expense account (and the related liability account) are understated. Thus, the adjusting entry for accruals will **increase both a balance sheet and an income statement account**.

Accrued Revenues

Revenues for services performed but not yet recorded at the statement date are **accrued revenues**. Accrued revenues may accumulate (accrue) with the passing of time, as in the case of interest revenue. These are unrecorded because the earning of interest does not involve daily transactions. Companies do not record interest revenue on a daily basis because it is often impractical to do so. Accrued revenues also may result from services that have been performed but not yet billed nor collected, as in the case of commissions and fees. These may be unrecorded because only a portion of the total service has been performed and the clients will not be billed until the service has been completed.

An adjusting entry records the receivable that exists at the balance sheet date and the revenue for the services performed during the period. Prior to adjustment,

both assets and revenues are understated. As shown in Illustration 3-13, **an adjusting entry for accrued revenues results in an increase (a debit) to an asset account and an increase (a credit) to a revenue account.**

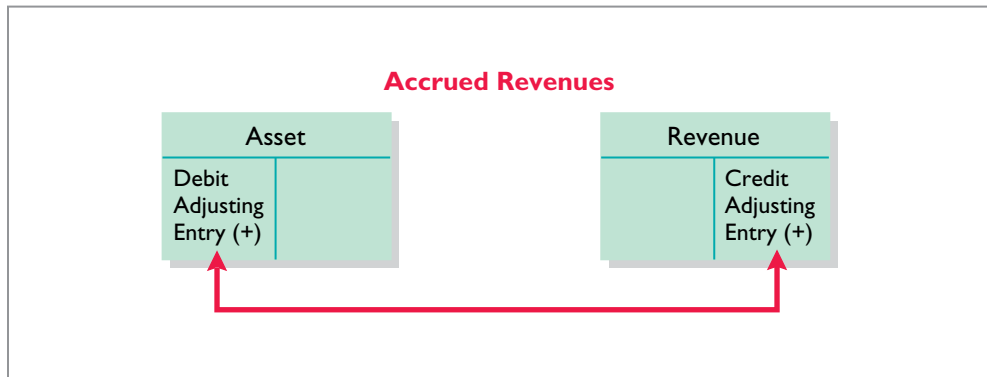

Illustration 3-13
Adjusting entries for accrued revenues

In October, Pioneer Advertising Inc. performed services worth \$200 that were not billed to clients on or before October 31. Because these services are not billed, they are not recorded. The accrual of unrecorded service revenue increases an asset account, Accounts Receivable. It also increases stockholders' equity by increasing a revenue account, Service Revenue, as shown in Illustration 3-14.

Basic Analysis	The asset Accounts Receivable is increased \$200; the revenue Service Revenue is increased \$200.																																									
Equation Analysis	$\begin{array}{r} \text{Assets} \\ \text{Accounts Receivable} \\ +\$200 \end{array} = \begin{array}{r} \text{Liabilities} \\ \text{Service Revenue} \\ +\$200 \end{array} + \begin{array}{r} \text{Stockholders' Equity} \end{array}$																																									
Debit-Credit Analysis	Debits increase assets: debit Accounts Receivable \$200. Credits increase revenues: credit Service Revenue \$200.																																									
Journal Entry	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 10%; text-align: center;">Oct. 31</td> <td style="width: 60%;">Accounts Receivable Service Revenue (To record revenue for services performed)</td> <td style="width: 10%; text-align: right; vertical-align: bottom;">200</td> <td style="width: 10%; text-align: right; vertical-align: bottom;">200</td> </tr> </table>		Oct. 31	Accounts Receivable Service Revenue (To record revenue for services performed)	200	200

	Accounts Receivable		112		Service Revenue		400																																			
Oct. 31	Adj. 200				Oct. 31	10,000																																				
					31	400																																				
					31	Adj. 200																																				
Oct. 31	Bal. 200				Oct. 31	Bal. 10,600																																				

Illustration 3-14
Adjustment for accrued revenue

The asset Accounts Receivable shows that clients owe Pioneer \$200 at the balance sheet date. The balance of \$10,600 in Service Revenue represents the total revenue for services performed by Pioneer during the month (\$10,000 + \$400 + \$200). **Without the adjusting entry, assets and stockholders' equity on the balance sheet and revenues and net income on the income statement are understated.**

On November 10, Pioneer receives cash of \$200 for the services performed in October and makes the following entry.

Nov. 10	Cash	200		200
	Accounts Receivable			
	(To record cash collected on account)			

The company records the collection of the receivables by a debit (increase) to Cash and a credit (decrease) to Accounts Receivable.

Equation analyses summarize the effects of transactions on the three elements of the accounting equation, as well as the effect on cash flows.

Illustration 3-15 summarizes the accounting for accrued revenues.

Illustration 3-15
Accounting for accrued revenues

ACCOUNTING FOR ACCRUED REVENUES			
Examples	Reason for Adjustment	Accounts Before Adjustment	Adjusting Entry
Interest, rent, services	Services performed but not yet received in cash or recorded.	Assets understated. Revenues understated.	Dr. Assets Cr. Revenues

ETHICS NOTE

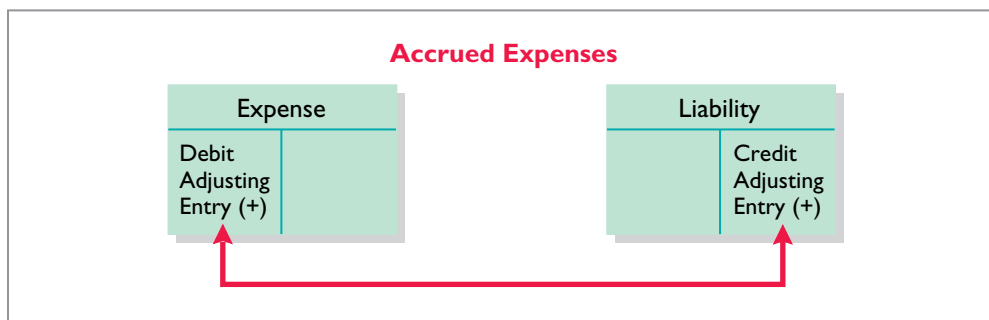

A report released by Fannie Mae's board of directors stated that improper adjusting entries at the mortgage-finance company resulted in delayed recognition of expenses caused by interest rate changes. The motivation for such accounting apparently was the desire to hit earnings estimates.

Accrued Expenses

Expenses incurred but not yet paid or recorded at the statement date are called **accrued expenses**. Interest, taxes, and salaries are common examples of accrued expenses.

Companies make adjustments for accrued expenses to record the obligations that exist at the balance sheet date and to recognize the expenses that apply to the current accounting period. Prior to adjustment, both liabilities and expenses are understated. Therefore, as Illustration 3-16 shows, **an adjusting entry for accrued expenses results in an increase (a debit) to an expense account and an increase (a credit) to a liability account.**

Illustration 3-16
Adjusting entries for accrued expenses

Let's look in more detail at some specific types of accrued expenses, beginning with accrued interest.

ACCRUED INTEREST

Pioneer Advertising signed a three-month note payable in the amount of \$5,000 on October 1. The note requires Pioneer to pay interest at an annual rate of 12%.

The amount of the interest recorded is determined by three factors: (1) the face value of the note; (2) the interest rate, which is always expressed as an annual rate; and (3) the length of time the note is outstanding. For Pioneer, the total interest due on the \$5,000 note at its maturity date three months in the future is \$150 ($\$5,000 \times 12\% \times \frac{3}{12}$), or \$50 for one month. Illustration 3-17 shows the formula for computing interest and its application to Pioneer for the month of October.

Illustration 3-17
Formula for computing interest

Face Value of Note	×	Annual Interest Rate	×	Time in Terms of One Year	×	Interest
\$5,000	×	12%	×	$\frac{1}{12}$	=	\$50

Helpful Hint

In computing interest, we express the time period as a fraction of a year.

As Illustration 3-18 shows, the accrual of interest at October 31 increases a liability account, Interest Payable. It also decreases stockholders' equity by increasing an expense account, Interest Expense.

Interest Expense shows the interest charges for the month of October. Interest Payable shows the amount of interest the company owes at the statement date. Pioneer will not pay the interest until the note comes due at the end of three months. Companies use the Interest Payable account, instead of crediting Notes Payable, to

Basic Analysis The expense Interest Expense is increased \$50; the liability Interest Payable is increased \$50.

Equation Analysis

<u>Assets</u>	=	<u>Liabilities</u>	+	<u>Stockholders' Equity</u>
		Interest Payable		Interest Expense
		+ \$50		- \$50

Debit–Credit Analysis

Debits increase expenses: debit Interest Expense \$50.
Credits increase liabilities: credit Interest Payable \$50.

Illustration 3-18
Adjustment for accrued interest

disclose the two different types of obligations—interest and principal—in the accounts and statements. **Without this adjusting entry, liabilities and interest expense are understated, and net income and stockholders' equity are overstated.**

ACCRUED SALARIES AND WAGES

Companies pay for some types of expenses, such as employee salaries and wages, after the services have been performed. Pioneer Advertising paid salaries and wages on October 26 for its employees' first two weeks of work. The next payment of salaries will not occur until November 9. As Illustration 3-19 shows, three working days remain in October (October 29–31).

Illustration 3-19
Calendar showing Pioneer's pay periods

At October 31, the salaries and wages for these three days represent an accrued expense and a related liability to Pioneer. The employees receive total salaries and wages of \$2,000 for a five-day work week, or \$400 per day. Thus, accrued salaries and wages at October 31 are \$1,200 (\$400 × 3). This accrual increases a liability, Salaries and Wages Payable. It also decreases stockholders' equity by increasing an expense account, Salaries and Wages Expense, as shown in Illustration 3-20 (page 110).

After this adjustment, the balance in Salaries and Wages Expense of \$5,200 (13 days × \$400) is the actual salary and wages expense for October. The balance in Salaries and Wages Payable of \$1,200 is the amount of the liability for salaries and wages Pioneer owes as of October 31. **Without the \$1,200 adjustment for salaries and wages, Pioneer's expenses are understated \$1,200 and its liabilities are understated \$1,200.**

Illustration 3-20
Adjustment for accrued salaries and wages

Basic Analysis	The expense Salaries and Wages Expense is increased \$1,200; the liability account Salaries and Wages Payable is increased \$1,200.				
Equation Analysis	Assets	=	Liabilities Salaries and Wages Payable + \$1,200	+	Stockholders' Equity Salaries and Wages Expense - \$1,200
Debit-Credit Analysis	Debits increase expenses: debit Salaries and Wages Expense \$1,200. Credits increase liabilities: credit Salaries and Wages Payable \$1,200.				
Journal Entry	Oct. 31	Salaries and Wages Expense Salaries and Wages Payable (To record accrued salaries and wages)	1,200	1,200	
Posting	Salaries and Wages Expense 726		Salaries and Wages Payable 212		
	Oct. 26	4,000		Oct. 31	Adj. 1,200
	31	Adj. 1,200			
	Oct. 31	Bal. 5,200		Oct. 31	Bal. 1,200

Pioneer pays salaries and wages every two weeks. Consequently, the next payday is November 9, when the company will again pay total salaries and wages of \$4,000. The payment consists of \$1,200 of salaries and wages payable at October 31 plus \$2,800 of salaries and wages expense for November (7 working days, as shown in the November calendar × \$400). Therefore, Pioneer makes the following entry on November 9.

A	=	L	+	SE
		-1,200		-2,800
-4,000				
Cash Flows				
-4,000				

Nov. 9	Salaries and Wages Payable Salaries and Wages Expense Cash (To record November 9 payroll)	1,200 2,800	4,000
--------	--	----------------	-------

This entry eliminates the liability for Salaries and Wages Payable that Pioneer recorded in the October 31 adjusting entry, and it records the proper amount of Salaries and Wages Expense for the period between November 1 and November 9.

Illustration 3-21 summarizes the accounting for accrued expenses.

Got Junk?

Do you have an old computer or two that you no longer use? How about an old TV that needs replacing? Many people do. Approximately 163,000 computers and televisions become obsolete each day. Yet, in a recent year, only 11% of computers were

recycled. It is estimated that 75% of all computers ever sold are sitting in storage somewhere, waiting to be disposed of. Each of these old TVs and computers is loaded with lead, cadmium, mercury, and other toxic chemicals. If you have one of these electronic gadgets, you have a responsibility, and a probable cost, for disposing of it. Companies have the same problem, but their discarded materials may include lead paint, asbestos, and other toxic chemicals.

What accounting issue might this cause for companies? (Go to [WileyPLUS](#) for this answer and additional questions.)

Summary of Basic Relationships

Illustration 3-22 summarizes the four basic types of adjusting entries. Take some time to study and analyze the adjusting entries. Be sure to note that **each adjusting entry affects one balance sheet account and one income statement account.**

Type of Adjustment	Accounts Before Adjustment	Adjusting Entry
Prepaid expenses	Assets overstated Expenses understated	Dr. Expenses Cr. Assets or Contra Assets
Unearned revenues	Liabilities overstated Revenues understated	Dr. Liabilities Cr. Revenues
Accrued revenues	Assets understated Revenues understated	Dr. Assets Cr. Revenues
Accrued expenses	Expenses understated Liabilities understated	Dr. Expenses Cr. Liabilities

Illustration 3-22

Summary of adjusting entries

Illustrations 3-23 (below) and 3-24 (on page 112) show the journalizing and posting of adjusting entries for Pioneer Advertising Inc. on October 31. The ledger identifies all adjustments by the reference J2 because they have been recorded on page 2 of the general journal. The company may insert a center caption “Adjusting Entries” between the last transaction entry and the first adjusting entry in the journal. When you review the general ledger in Illustration 3-24, note that the entries highlighted in color are the adjustments.

GENERAL JOURNAL					J2
Date	Account Titles and Explanation	Ref.	Debit	Credit	
2017	<u>Adjusting Entries</u>				
Oct. 31	Supplies Expense	631	1,500		
	Supplies	126		1,500	
	(To record supplies used)				
31	Insurance Expense	722	50		
	Prepaid Insurance	130		50	
	(To record insurance expired)				
31	Depreciation Expense	711	40		
	Accumulated Depreciation—Equipment	158		40	
	(To record monthly depreciation)				
31	Unearned Service Revenue	209	400		
	Service Revenue	400		400	
	(To record revenue for services performed)				
31	Accounts Receivable	112	200		
	Service Revenue	400		200	
	(To record revenue for services performed)				
31	Interest Expense	905	50		
	Interest Payable	230		50	
	(To record interest on notes payable)				
31	Salaries and Wages Expense	726	1,200		
	Salaries and Wages Payable	212		1,200	
	(To record accrued salaries and wages)				

Illustration 3-23

General journal showing adjusting entries

Helpful Hint

- (1) Adjusting entries should not involve debits or credits to Cash.
- (2) Evaluate whether the adjustment makes sense. For example, an adjustment to recognize supplies used should increase Supplies Expense.
- (3) Double-check all computations.
- (4) Each adjusting entry affects one balance sheet account and one income statement account.

DO IT!**3****Adjusting Entries for Accruals**

Micro Computer Services Inc. began operations on August 1, 2017. At the end of August 2017, management prepares monthly financial statements. The following information relates to August.

- At August 31, the company owed its employees \$800 in salaries and wages that will be paid on September 1.
 - On August 1, the company borrowed \$30,000 from a local bank on a 15-year mortgage. The annual interest rate is 10%.
 - Revenue for services performed but unrecorded for August totaled \$1,100.
- Prepare the adjusting entries needed at August 31, 2017.

Solution

1. Salaries and Wages Expense	800	
Salaries and Wages Payable		800
(To record accrued salaries)		
2. Interest Expense	250	
Interest Payable		250
(To record accrued interest: $\$30,000 \times 10\% \times \frac{1}{12} = \250)		
3. Accounts Receivable	1,100	
Service Revenue		1,100
(To record revenue for services performed)		

Related exercise material: **BE3-7, E3-5, E3-6, E3-7, E3-8, E3-9, and DO IT! 3-3.**

Action Plan

- ✓ Make adjusting entries at the end of the period to recognize revenues for services performed and for expenses incurred.
- ✓ Don't forget to make adjusting entries for accruals. Adjusting entries for accruals will increase both a balance sheet and an income statement account.

LEARNING OBJECTIVE**4****Describe the nature and purpose of an adjusted trial balance.**

After a company has journalized and posted all adjusting entries, it prepares another trial balance from the ledger accounts. This trial balance is called an **adjusted trial balance**. It shows the balances of all accounts, including those adjusted, at the end of the accounting period. The purpose of an adjusted trial balance is to **prove the equality** of the total debit balances and the total credit balances in the ledger after all adjustments. Because the accounts contain all data needed for financial statements, the adjusted trial balance is the **primary basis for the preparation of financial statements**.

Preparing the Adjusted Trial Balance

Illustration 3-25 (page 114) presents the adjusted trial balance for Pioneer Advertising Inc. prepared from the ledger accounts in Illustration 3-24. The amounts affected by the adjusting entries are highlighted in color. Compare these amounts to those in the unadjusted trial balance in Illustration 3-3 (page 99). In this comparison, you will see that there are more accounts in the adjusted trial balance as a result of the adjusting entries made at the end of the month.

Illustration 3-25
Adjusted trial balance

PIONEER ADVERTISING INC.		
Adjusted Trial Balance October 31, 2017		
	<u>Debit</u>	<u>Credit</u>
Cash	\$ 15,200	
Accounts Receivable	200	
Supplies	1,000	
Prepaid Insurance	550	
Equipment	5,000	
Accumulated Depreciation—Equipment		\$ 40
Notes Payable		5,000
Accounts Payable		2,500
Interest Payable		50
Unearned Service Revenue		800
Salaries and Wages Payable		1,200
Common Stock		10,000
Retained Earnings		-0-
Dividends	500	
Service Revenue		10,600
Salaries and Wages Expense	5,200	
Supplies Expense	1,500	
Rent Expense	900	
Insurance Expense	50	
Interest Expense	50	
Depreciation Expense	40	
	<u>\$30,190</u>	<u>\$30,190</u>

Preparing Financial Statements

Companies can prepare financial statements directly from the adjusted trial balance. Illustrations 3-26 (page 115) and 3-27 (page 116) present the interrelationships of data in the adjusted trial balance and the financial statements.

As Illustration 3-26 shows, companies prepare the income statement from the revenue and expense accounts. Next, they use the Retained Earnings and Dividends accounts and the net income (or net loss) from the income statement to prepare the retained earnings statement.

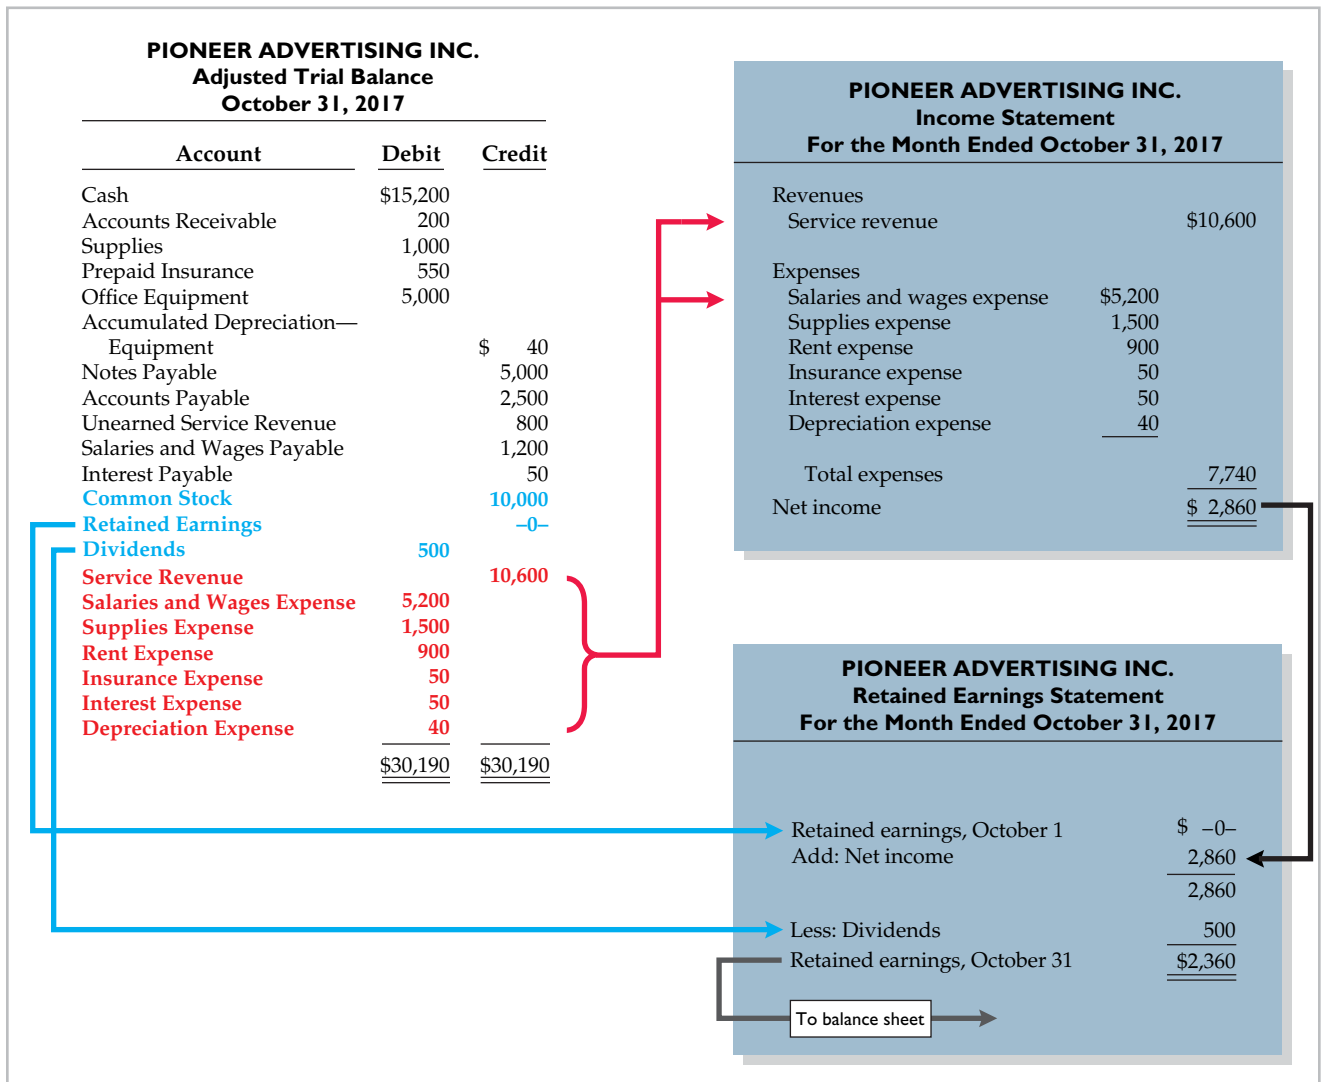

Illustration 3-26
Preparation of the income statement and retained earnings statement from the adjusted trial balance

As Illustration 3-27 (page 116) shows, companies then prepare the balance sheet from the asset and liability accounts and the ending retained earnings balance as reported in the retained earnings statement.

PIONEER ADVERTISING INC. Adjusted Trial Balance October 31, 2017			PIONEER ADVERTISING INC. Balance Sheet October 31, 2017

	<u>\$30,190</u>	<u>\$30,190</u>	<div style="border: 1px solid black; padding: 2px; width: fit-content;"> Balance at Oct. 31 from retained earnings statement in Illustration 3-26 </div>	

Illustration 3-27

Preparation of the balance sheet from the adjusted trial balance

DO IT!**4****Trial Balance**

Skolnick Co. was organized on April 1, 2017. The company prepares quarterly financial statements. The adjusted trial balance amounts at June 30 are shown below.

	<u>Debit</u>		<u>Credit</u>
Cash	\$ 6,700	Accumulated Depreciation— Equipment	\$ 850
Accounts Receivable	600	Notes Payable	5,000
Prepaid Rent	900	Accounts Payable	1,510
Supplies	1,000	Salaries and Wages Payable	400
Equipment	15,000	Interest Payable	50
Dividends	600	Unearned Rent Revenue	500
Salaries and Wages Expense	9,400	Common Stock	14,000
Rent Expense	1,500	Service Revenue	14,200
Depreciation Expense	850	Rent Revenue	800
Supplies Expense	200		
Utilities Expense	510		
Interest Expense	50		
	<u>\$37,310</u>		<u>\$37,310</u>

- Determine the net income for the quarter April 1 to June 30.
- Determine the total assets and total liabilities at June 30, 2017, for Skolnick Co.
- Determine the amount that appears for retained earnings at June 30, 2017.

Solution

- (a) The net income is determined by adding revenues and subtracting expenses. The net income is computed as follows.

Revenues		
Service revenue	\$14,200	
Rent revenue	800	
Total revenues		\$15,000
Expenses		
Salaries and wages expense	9,400	
Rent expense	1,500	
Depreciation expense	850	
Utilities expense	510	
Supplies expense	200	
Interest expense	50	
Total expenses		12,510
Net income		<u>\$ 2,490</u>

- (b) Total assets and liabilities are computed as follows.

Assets		Liabilities	
Cash	\$ 6,700	Notes payable	\$5,000
Accounts receivable	600	Accounts payable	1,510
Supplies	1,000	Unearned rent revenue	500
Prepaid rent	900	Salaries and wages payable	400
Equipment	\$15,000	Interest payable	50
Less: Accumulated depreciation—equipment	850	Total liabilities	<u>\$7,460</u>
Total assets	<u>\$23,350</u>		
(c) Retained earnings, April 1			
	\$ 0		
Add: Net income	2,490		
Less: Dividends	600		
Retained earnings, June 30	<u>\$ 1,890</u>		

Action Plan

- ✓ In an adjusted trial balance, make sure all asset, liability, revenue, and expense accounts are properly stated.
- ✓ To determine the ending balance in Retained Earnings, add net income and subtract dividends.

Related exercise material: **BE3-9, BE3-10, E3-11, E3-12, E3-13, and DO IT! 3-4.**

LEARNING
OBJECTIVE

5

APPENDIX 3A: Prepare adjusting entries for the alternative treatment of deferrals.

In discussing adjusting entries for prepaid expenses and unearned revenues, we illustrated transactions for which companies made the initial entries to balance sheet accounts. In the case of prepaid expenses, the company debited the prepayment to an asset account. In the case of unearned revenue, the company credited a liability account to record the cash received.

Some companies use an alternative treatment. (1) When a company prepays an expense, it debits that amount to an expense account. (2) When it receives payment for future services, it credits the amount to a revenue account. In this appendix, we describe the circumstances that justify such entries and the different adjusting entries that may be required. This alternative treatment of prepaid expenses and unearned revenues has the same effect on the financial statements as the procedures described in the chapter.

Prepaid Expenses

Prepaid expenses become expired costs either through the passage of time (e.g., insurance) or through consumption (e.g., advertising supplies). If at the time of purchase the company expects to consume the supplies before the next financial statement date, **it may choose to debit (increase) an expense account rather than an asset account. This alternative treatment is simply more convenient.**

Assume that Pioneer Advertising Inc. expects that it will use before the end of the month all of the supplies purchased on October 5. A debit of \$2,500 to Supplies Expense (rather than to the asset account Supplies) on October 5 will eliminate the need for an adjusting entry on October 31. At October 31, the Supplies Expense account will show a balance of \$2,500, which is the cost of supplies used between October 5 and October 31.

But what if the company does not use all the supplies? For example, what if an inventory of \$1,000 of advertising supplies remains on October 31? Obviously, the company would need to make an adjusting entry. Prior to adjustment, the expense account Supplies Expense is overstated \$1,000, and the asset account Supplies is understated \$1,000. Thus, Pioneer makes the following adjusting entry.

A	=	L	+	SE
+1,000				+1,000 Exp
Cash Flows				
no effect				

Oct. 31	Supplies	1,000	
	Supplies Expense		1,000
	(To record supplies inventory)		

After the company posts the adjusting entry, the accounts show the following:

Illustration 3A-1
Prepaid expenses accounts after adjustment

Supplies			Supplies Expense			
10/31	Adj.	1,000	10/5	2,500	10/31 Adj.	1,000
			10/31	Bal.	1,500	

After adjustment, the asset account Supplies shows a balance of \$1,000, which is equal to the cost of supplies on hand at October 31. In addition, Supplies Expense shows a balance of \$1,500. This is equal to the cost of supplies used between October 5 and October 31. Without the adjusting entry, expenses are overstated and net income is understated by \$1,000 in the October income statement. Also, both assets and stockholders' equity are understated by \$1,000 on the October 31 balance sheet.

Illustration 3A-2 compares the entries and accounts for advertising supplies in the two adjustment approaches.

Illustration 3A-2
Adjustment approaches—a comparison

Prepayment Initially Debited to Asset Account (per chapter)			Prepayment Initially Debited to Expense Account (per appendix)		
Oct. 5	Supplies	2,500	Oct. 5	Supplies Expense	2,500
	Accounts Payable	2,500		Accounts Payable	2,500
Oct. 31	Supplies Expense	1,500	Oct. 31	Supplies	1,000
	Supplies	1,500		Supplies Expense	1,000

After Pioneer posts the entries, the accounts appear as follows.

Illustration 3A-3
Comparison of accounts

(per chapter) Supplies			(per appendix) Supplies				
10/5	2,500	10/31 Adj.	1,500	10/31	Adj.	1,000	
10/31	Bal.	1,000					
Supplies Expense			Supplies Expense				
10/31	Adj.	1,500	10/5	2,500	10/31	Adj.	1,000
			10/31	Bal.	1,500		

Note that the account balances under each alternative are the same at October 31: Supplies \$1,000 and Supplies Expense \$1,500.

Unearned Revenues

Unearned revenues are recognized as revenue at the time services are performed. Similar to the case for prepaid expenses, companies may credit (increase) a revenue account when they receive cash for future services.

To illustrate, assume that Pioneer Advertising Inc. received \$1,200 for future services on October 2. Pioneer expects to perform the services before October 31.¹ In such a case, the company credits Service Revenue. If Pioneer in fact performs the service before October 31, no adjustment is needed.

However, if at the statement date Pioneer has not performed \$800 of the services, it would make an adjusting entry. Without the entry, the revenue account Service Revenue is overstated \$800, and the liability account Unearned Service Revenue is understated \$800. Thus, Pioneer makes the following adjusting entry.

Oct. 31	Service Revenue Unearned Service Revenue (To record unearned service revenue)	800 800	800
---------	---	----------------	-----

After Pioneer posts the adjusting entry, the accounts show the following.

Unearned Service Revenue				Service Revenue					
10/31	Adj.	800		10/31	Adj.	800	10/2	1,200	
							10/31	Bal.	400

The liability account Unearned Service Revenue shows a balance of \$800. This equals the services that will be performed in the future. In addition, the balance in Service Revenue equals the services performed in October. Without the adjusting entry, both revenues and net income are overstated by \$800 in the October income statement. Also, liabilities are understated by \$800 and stockholders' equity is overstated by \$800 on the October 31 balance sheet.

Illustration 3A-5 compares the entries and accounts for initially recording unearned service revenue in (1) a liability account or (2) a revenue account.

Unearned Service Revenue Initially Credited to Liability Account (per chapter)			Unearned Service Revenue Initially Credited to Revenue Account (per appendix)		
Oct. 2	Cash	1,200	Oct. 2	Cash	1,200
	Unearned Service Revenue	1,200		Service Revenue	1,200
Oct. 31	Unearned Service Revenue	400	Oct. 31	Service Revenue	800
	Service Revenue	400		Unearned Service Revenue	800

After Pioneer posts the entries, the accounts appear as follows.

(per chapter) Unearned Service Revenue			(per appendix) Unearned Service Revenue		
10/31	Adj.	400	10/2		1,200
			10/31	Adj.	800

Note that the balances in the accounts are the same under the two alternatives: Unearned Service Revenue \$800 and Service Revenue \$400.

Illustration 3A-7

Summary of basic relationships for deferrals

Summary of Additional Adjustment Relationships

Illustration 3A-7 provides a summary of basic relationships for deferrals.

Type of Adjustment	Reason for Adjustment	Account Balances before Adjustment	Adjusting Entry
1. Prepaid expenses	(a) Prepaid expenses initially recorded in asset accounts have been used.	Assets overstated Expenses understated	Dr. Expenses Cr. Assets
	(b) Prepaid expenses initially recorded in expense accounts have not been used.	Assets understated Expenses overstated	Dr. Assets Cr. Expenses
2. Unearned revenues	(a) Unearned revenues initially recorded in liability accounts are now recognized as revenue.	Liabilities overstated Revenues understated	Dr. Liabilities Cr. Revenues
	(b) Unearned revenues initially recorded in revenue accounts are still unearned.	Liabilities understated Revenues overstated	Dr. Revenues Cr. Liabilities

Alternative adjusting entries **do not apply** to accrued revenues and accrued expenses because **no entries occur before companies make these types of adjusting entries.**

OBJECTIVE

6

APPENDIX 3B: Discuss financial reporting concepts.

This appendix provides a summary of the concepts in action used in this textbook. In addition, it provides other useful concepts which accountants use as a basis for recording and reporting financial information.

Qualities of Useful Information

Recently, the FASB completed the first phase of a project in which it developed a conceptual framework to serve as the basis for future accounting standards. The framework begins by stating that the primary objective of financial reporting is to provide financial information that is **useful** to investors and creditors for making decisions about providing capital. Useful information should possess two fundamental qualities, relevance and faithful representation, as shown in Illustration 3B-1.

Illustration 3B-1

Fundamental qualities of useful information

Relevance Accounting information has **relevance** if it would make a difference in a business decision. Information is considered relevant if it provides information that has **predictive value**, that is, helps provide accurate expectations about the future, and has **confirmatory value**, that is, confirms or corrects prior expectations. **Materiality** is a company-specific aspect of relevance. An item is material when its **size** makes it likely to influence the decision of an investor or creditor.

Faithful Representation **Faithful representation** means that information accurately depicts what really happened. To provide a faithful representation, information must be **complete** (nothing important has been omitted), **neutral** (is not biased toward one position or another), and **free from error**.

ENHANCING QUALITIES

In addition to the two fundamental qualities, the FASB also describes a number of enhancing qualities of useful information. These include **comparability**, **consistency**, **verifiability**, **timeliness**, and **understandability**. In accounting, **comparability** results when different companies use the same accounting principles. Another characteristic that enhances comparability is consistency. **Consistency** means that a company uses the same accounting principles and methods from year to year. Information is **verifiable** if independent observers, using the same methods, obtain similar results. For accounting information to have relevance, it must be **timely**. That is, it must be available to decision-makers before it loses its capacity to influence decisions. For example, public companies like **Google** or **Best Buy** provide their annual reports to investors within 60 days of their year-end. Information has the quality of **understandability** if it is presented in a clear and concise fashion, so that reasonably informed users of that information can interpret it and comprehend its meaning.

Assumptions in Financial Reporting

To develop accounting standards, the FASB relies on some key assumptions, as shown in Illustration 3B-2. These include assumptions about the monetary unit, economic entity, time period, and going concern.

	<p>Monetary Unit Assumption The monetary unit assumption requires that only those things that can be expressed in money are included in the accounting records. This means that certain important information needed by investors, creditors, and managers, such as customer satisfaction, is not reported in the financial statements.</p>
	<p>Economic Entity Assumption The economic entity assumption states that every economic entity can be separately identified and accounted for. In order to assess a company's performance and financial position accurately, it is important to not blur company transactions with personal transactions (especially those of its managers) or transactions of other companies.</p>
	<p>Time Period Assumption Notice that the income statement, retained earnings statement, and statement of cash flows all cover periods of one year, and the balance sheet is prepared at the end of each year. The time period assumption states that the life of a business can be divided into artificial time periods and that useful reports covering those periods can be prepared for the business.</p>
	<p>Going Concern Assumption The going concern assumption states that the business will remain in operation for the foreseeable future. Of course, many businesses do fail, but in general it is reasonable to assume that the business will continue operating.</p>

Illustration 3B-2

Key assumptions in financial reporting

Principles in Financial Reporting

MEASUREMENT PRINCIPLES

GAAP generally uses one of two measurement principles, the historical cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation.

HISTORICAL COST PRINCIPLE The **historical cost principle** (or cost principle, discussed in Chapter 1) dictates that companies record assets at their cost. This is true not only at the time the asset is purchased but also over the time the asset is held. For example, if land that was purchased for \$30,000 increases in value to \$40,000, it continues to be reported at \$30,000.

FAIR VALUE PRINCIPLE The **fair value principle** (discussed in Chapter 1) indicates that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). Fair value information may be more useful than historical cost for certain types of assets and liabilities. For example, certain investment securities are reported at fair value because market price information is often readily available for these types of assets. In choosing between cost and fair value, two qualities that make accounting information useful for decision-making are used—relevance and faithful representation. In determining which measurement principle to use, the factual nature of cost figures are weighed versus the relevance of fair value. In general, most assets follow the historical cost principle because fair values may not be representationally faithful. Only in situations where assets are actively traded, such as investment securities, is the fair value principle applied.

REVENUE RECOGNITION PRINCIPLE

The **revenue recognition principle** requires that companies recognize revenue in the accounting period in which the performance obligation is satisfied. As discussed earlier in the chapter, in a service company, revenue is recognized at the time the service is performed. In a merchandising company, the performance obligation is generally satisfied when the goods transfer from the seller to the buyer (discussed in Chapter 5). At this point, the sales transaction is complete and the sales price established.

EXPENSE RECOGNITION PRINCIPLE

The **expense recognition principle** (often referred to as the matching principle, discussed earlier in the chapter) dictates that efforts (expenses) be matched with results (revenues). Thus, expenses follow revenues.

FULL DISCLOSURE PRINCIPLE

The **full disclosure principle** (discussed in Chapter 11) requires that companies disclose all circumstances and events that would make a difference to financial statement users. If an important item cannot reasonably be reported directly in one of the four types of financial statements, then it should be discussed in notes that accompany the statements.

Cost Constraint

Providing information is costly. In deciding whether companies should be required to provide a certain type of information, accounting standard-setters consider the **cost constraint**. It weighs the cost that companies will incur to provide the information against the benefit that financial statement users will gain from having the information available.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 **Explain the accrual basis of accounting and the reasons for adjusting entries.** The time period assumption assumes that the economic life of a business is divided into artificial time periods. Accrual-basis accounting means that companies record events that change a company's financial statements in the periods in which those events occur, rather than in the periods in which the company receives or pays cash.
Companies make adjusting entries at the end of an accounting period. Such entries ensure that companies recognize revenues in the period in which the performance obligation is satisfied and recognize expenses in the period in which they are incurred. The major types of adjusting entries are deferrals (prepaid expenses and unearned revenues) and accruals (accrued revenues and accrued expenses).
- 2 **Prepare adjusting entries for deferrals.** Deferrals are either prepaid expenses or unearned revenues. Companies make adjusting entries for deferrals to record the portion of the prepayment that represents the expense incurred or the revenue for services performed in the current accounting period.
- 3 **Prepare adjusting entries for accruals.** Accruals are either accrued revenues or accrued expenses. Companies make adjusting entries for accruals to record revenues for services performed and expenses incurred in the current accounting period that have not been recognized through daily entries.
- 4 **Describe the nature and purpose of an adjusted trial balance.** An adjusted trial balance shows the balances of all accounts, including those that have been adjusted, at the end of an accounting period. Its purpose is to prove the equality of the total debit balances and total credit balances in the ledger after all adjustments.
- *5 **Prepare adjusting entries for the alternative treatment of deferrals.** Companies may initially debit prepayments to an expense account. Likewise, they may

credit unearned revenues to a revenue account. At the end of the period, these accounts may be overstated. The adjusting entries for prepaid expenses are a debit to an asset account and a credit to an expense account. Adjusting entries for unearned revenues are a debit to a revenue account and a credit to a liability account.

- *6 **Discuss financial reporting concepts.** To be judged useful, information should have the primary characteristics of relevance and faithful representation. In addition, it should be comparable, consistent, verifiable, timely, and understandable.

The **monetary unit assumption** requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The **economic entity assumption** states that economic events can be identified with a particular unit of accountability. The **time period assumption** states that the economic life of a business can be divided into artificial time periods and that meaningful accounting reports can be prepared for each period. The **going concern assumption** states that the company will continue in operation long enough to carry out its existing objectives and commitments.

The **historical cost principle** states that companies should record assets at their cost. The **fair value principle** indicates that assets and liabilities should be reported at fair value. The **revenue recognition principle** requires that companies recognize revenue in the accounting period in which the performance obligation is satisfied. The **expense recognition principle** dictates that efforts (expenses) be matched with results (revenues). The **full disclosure principle** requires that companies disclose circumstances and events that matter to financial statement users.

The **cost constraint** weighs the cost that companies incur to provide a type of information against its benefits to financial statement users.

GLOSSARY REVIEW

Accrual-basis accounting Accounting basis in which companies record transactions that change a company's financial statements in the periods in which the events occur. (p. 96).

Accruals Adjusting entries for either accrued revenues or accrued expenses. (p. 98).

Accrued expenses Expenses incurred but not yet paid in cash or recorded. (p. 108).

Accrued revenues Revenues for services performed but not yet received in cash or recorded. (p. 106).

Adjusted trial balance A list of accounts and their balances after the company has made all adjustments. (p. 113).

Adjusting entries Entries made at the end of an accounting period to ensure that companies follow the revenue recognition and expense recognition principles. (p. 98).

- Book value** The difference between the cost of a depreciable asset and its related accumulated depreciation. (p. 103).
- Calendar year** An accounting period that extends from January 1 to December 31. (p. 96).
- Cash-basis accounting** Accounting basis in which companies record revenue when they receive cash and an expense when they pay out cash. (p. 96).
- * **Comparability** Ability to compare the accounting information of different companies because they use the same accounting principles. (p. 121).
- * **Consistency** Use of the same accounting principles and methods from year to year within a company. (p. 121).
- Contra asset account** An account offset against an asset account on the balance sheet. (p. 102).
- * **Cost constraint** Constraint that weighs the cost that companies will incur to provide the information against the benefit that financial statement users will gain from having the information available. (p. 122).
- Deferrals** Adjusting entries for either prepaid expenses or unearned revenues. (p. 98).
- Depreciation** The process of allocating the cost of an asset to expense over its useful life. (p. 102).
- * **Economic entity assumption** An assumption that every economic entity can be separately identified and accounted for. (p. 121).
- Expense recognition principle (matching principle)** The principle that companies match efforts (expenses) with accomplishments (revenues). (pp. 97, 122).
- * **Fair value principle** Assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). (p. 122).
- * **Faithful representation** Information that accurately depicts what really happened. (p. 120).
- Fiscal year** An accounting period that is one year in length. (p. 96).
- * **Full disclosure principle** Accounting principle that dictates that companies disclose circumstances and events that make a difference to financial statement users. (p. 122).
- * **Going concern assumption** The assumption that the company will continue in operation for the foreseeable future. (p. 121).
- * **Historical cost principle** An accounting principle that states that companies should record assets at their cost. (p. 122).
- Interim periods** Monthly or quarterly accounting time periods. (p. 96).
- * **Materiality** A company-specific aspect of relevance. An item is material when its size makes it likely to influence the decision of an investor or creditor. (p. 120).
- * **Monetary unit assumption** An assumption that requires that only those things that can be expressed in money are included in the accounting records. (p. 121).
- Prepaid expenses (prepayments)** Expenses paid in cash before they are used or consumed. (p. 100).
- * **Relevance** The quality of information that indicates the information makes a difference in a decision. (p. 120).
- Revenue recognition principle** The principle that companies recognize revenue in the accounting period in which the performance obligation is satisfied. (pp. 97, 122).
- * **Timely** Information that is available to decision-makers before it loses its capacity to influence decisions. (p. 121).
- Time period assumption** An assumption that accountants can divide the economic life of a business into artificial time periods. (pp. 96, 121).
- * **Understandability** Information presented in a clear and concise fashion so that users can interpret it and comprehend its meaning. (p. 121).
- Unearned revenues** A liability recorded for cash received before services are performed. (p. 104).
- Useful life** The length of service of a long-lived asset. (p. 101).
- * **Verifiable** The quality of information that occurs when independent observers, using the same methods, obtain similar results. (p. 121).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. The revenue recognition principle states that:
- revenue should be recognized in the accounting period in which a performance obligation is satisfied.
 - expenses should be matched with revenues.
 - the economic life of a business can be divided into artificial time periods.
 - the fiscal year should correspond with the calendar year.
- (LO 1) 2. The time period assumption states that:
- companies must wait until the calendar year is completed to prepare financial statements.
 - companies use the fiscal year to report financial information.
 - the economic life of a business can be divided into artificial time periods.
 - companies record information in the time period in which the events occur.
3. Which of the following statements about the accrual basis of accounting is **false**? (LO 1)
- Events that change a company's financial statements are recorded in the periods in which the events occur.
 - Revenue is recognized in the period in which services are performed.
 - This basis is in accord with generally accepted accounting principles.
 - Revenue is recorded only when cash is received, and expense is recorded only when cash is paid.

- (LO 1) 4. The principle or assumption dictating that efforts (expenses) be matched with accomplishments (revenues) is the:
- expense recognition principle.
 - cost assumption.
 - time period assumption.
 - revenue recognition principle.
- (LO 1) 5. Adjusting entries are made to ensure that:
- expenses are recognized in the period in which they are incurred.
 - revenues are recorded in the period in which services are performed.
 - balance sheet and income statement accounts have correct balances at the end of an accounting period.
 - All the responses above are correct.
- (LO 1) 6. Each of the following is a major type (or category) of adjusting entries **except**:
- prepaid expenses.
 - accrued revenues.
 - accrued expenses.
 - recognized revenues.
- (LO 2) 7. The trial balance shows Supplies \$1,350 and Supplies Expense \$0. If \$600 of supplies are on hand at the end of the period, the adjusting entry is:
- Supplies | 600 |
Supplies Expense | | 600
 - Supplies | 750 |
Supplies Expense | | 750
 - Supplies Expense | 750 |
Supplies | | 750
 - Supplies Expense | 600 |
Supplies | | 600
- (LO 2) 8. Adjustments for prepaid expenses:
- decrease assets and increase revenues.
 - decrease expenses and increase assets.
 - decrease assets and increase expenses.
 - decrease revenues and increase assets.
- (LO 2) 9. Accumulated Depreciation is:
- a contra asset account.
 - an expense account.
 - a stockholders' equity account.
 - a liability account.
- (LO 2) 10. Rivera Company computes depreciation on delivery equipment at \$1,000 for the month of June. The adjusting entry to record this depreciation is as follows.
- Depreciation Expense | 1,000 |
Accumulated Depreciation—
Rivera Company | | 1,000
 - Depreciation Expense | 1,000 |
Equipment | | 1,000
 - Depreciation Expense | 1,000 |
Accumulated Depreciation—
Equipment | | 1,000
 - Equipment Expense | 1,000 |
Accumulated Depreciation—
Equipment | | 1,000
11. Adjustments for unearned revenues: (LO 2)
- decrease liabilities and increase revenues.
 - have an assets-and-revenues-account relationship.
 - increase assets and increase revenues.
 - decrease revenues and decrease assets.
12. Adjustments for accrued revenues: (LO 3)
- have a liabilities-and-revenues-account relationship.
 - have an assets-and-revenues-account relationship.
 - decrease assets and revenues.
 - decrease liabilities and increase revenues.
13. Anika Wilson earned a salary of \$400 for the last week of September. She will be paid on October 1. The adjusting entry for Anika's employer at September 30 is: (LO 3)
- No entry is required.
 - Salaries and Wages Expense | 400 |
Salaries and Wages Payable | | 400
 - Salaries and Wages Expense | 400 |
Cash | | 400
 - Salaries and Wages Payable | 400 |
Cash | | 400
14. Which of the following statements is **incorrect** concerning the adjusted trial balance? (LO 4)
- An adjusted trial balance proves the equality of the total debit balances and the total credit balances in the ledger after all adjustments are made.
 - The adjusted trial balance provides the primary basis for the preparation of financial statements.
 - The adjusted trial balance lists the account balances segregated by assets and liabilities.
 - The adjusted trial balance is prepared after the adjusting entries have been journalized and posted.
- *15. The trial balance shows Supplies \$0 and Supplies Expense \$1,500. If \$800 of supplies are on hand at the end of the period, the adjusting entry is: (LO 5)
- debit Supplies \$800 and credit Supplies Expense \$800.
 - debit Supplies Expense \$800 and credit Supplies \$800.
 - debit Supplies \$700 and credit Supplies Expense \$700.
 - debit Supplies Expense \$700 and credit Supplies \$700.
- *16. Neutrality is an ingredient of: (LO 6)
- | | <u>Faithful Representation</u> | <u>Relevance</u> |
|-----|--------------------------------|------------------|
| (a) | Yes | Yes |
| (b) | No | No |
| (c) | Yes | No |
| (d) | No | Yes |
- *17. Which item is a constraint in financial accounting? (LO 6)
- Comparability.
 - Materiality.
 - Cost.
 - Consistency.

Solutions

1. (a) Revenue should be recognized in the accounting period in which a performance obligation is satisfied. The other choices are incorrect because (b) defines the expense recognition principle, (c) describes the time period assumption, and (d) a company's fiscal year does not need to correspond with the calendar year.

- 2. (c)** The economic life of a business can be divided into artificial time periods. The other choices are incorrect because (a) companies report their activities on a more frequent basis and not necessarily based on a calendar year; (b) companies report financial information more frequently than annually, such as monthly or quarterly, in order to evaluate results of operations; and (d) this statement describes accrual-basis accounting.
- 3. (d)** Under the accrual basis of accounting, revenue is recognized when the performance obligation is satisfied, not when cash is received, and expense is recognized when incurred, not when cash is paid. The other choices are true statements.
- 4. (a)** The expense recognition principle dictates that expense be matched with revenues. The other choices are incorrect because (b) there is no cost assumption, but the historical cost principle states that assets should be recorded at their cost; (c) the time period assumption states that the economic life of a business can be divided into artificial time periods; and (d) the revenue recognition principle indicates that revenue should be recognized in the accounting period in which a performance obligation is satisfied.
- 5. (d)** Adjusting entries are made for the reasons noted in choices (a), (b), and (c). The other choices are true statements, but (d) is the better answer.
- 6. (d)** Unearned revenues, not recognized revenues, are one of the major categories of adjusting entries. The other choices all list one of the major categories of adjusting entries.
- 7. (c)** Debiting Supplies Expense for \$750 and crediting Supplies for \$750 will decrease Supplies and increase Supplies Expense. The other choices are incorrect because (a) will increase Supplies and decrease Supplies Expense and also for the wrong amounts, (b) will increase Supplies and decrease Supplies Expense, and (d) will cause Supplies to have an incorrect balance of \$750 ($\$1,350 - \600) and Supplies Expense to have an incorrect balance of \$600 ($\$0 + \600).
- 8. (c)** Adjustments for prepaid expenses decrease assets and increase expenses. The other choices are incorrect because an adjusting entry for prepaid expenses (a) increases expenses, not revenues; (b) increases, not decreases, expenses and decreases, not increases, assets; and (d) increases, not decreases, revenues and decreases, not increases, assets.
- 9. (a)** Accumulated Depreciation is a contra asset account; it is offset against an asset account on the balance sheet. The other choices are incorrect because Accumulated Depreciation is not (b) an expense account nor located on the income statement, (c) a stockholders' equity account, or (d) a liability account.
- 10. (c)** The adjusting entry is to debit Depreciation Expense and credit Accumulated Depreciation—Equipment. The other choices are incorrect because (a) the contra asset account title includes the asset being depreciated, not the company name; (b) the credit should be to the contra asset account, not directly to the asset; and (d) the debit for this entry should be Depreciation Expense, not Equipment Expense.
- 11. (a)** Adjustments for unearned revenues will consist of a debit (decrease) to unearned revenues (a liability) and a credit (increase) to a revenue account. Choices (b), (c), and (d) are incorrect because adjustments for unearned revenues will increase revenues but will have no effect on assets.
- 12. (b)** Adjustments for accrued revenues will have an assets-and-revenues-account relationship. Choices (a) and (d) are incorrect because adjustments for accrued revenues have no effect on liabilities. Choice (c) is incorrect because these adjustments will increase, not decrease, both assets and revenues.
- 13. (b)** The adjusting entry should be to debit Salaries and Wages Expense for \$400 and credit Salaries and Wages Payable for \$400. The other choices are incorrect because (a) if an adjusting entry is not made, the amount of money owed (liability) that is shown on the balance sheet will be understated and the amount of salaries and wages expense will also be understated; (c) the credit account is incorrect as adjusting entries never affect cash; and (d) the debit account should be Salaries and Wages Expense and the credit account should be Salaries and Wages Payable. Adjusting entries never affect cash.
- 14. (c)** The accounts on the trial balance can be segregated by the balance in the account—either debit or credit—not whether they are assets or liabilities. All accounts in the ledger are included in the adjusted trial balance, not just assets and liabilities. The other choices are true statements.
- *15. (a)** This adjusting entry correctly states the Supplies account at \$800 ($\$0 + \800) and the Supplies Expense account at \$700 ($\$1,500 - \800). The other choices are incorrect because (b) will cause the Supplies account to have a credit balance (assets have a normal debit balance) and the Supplies Expense account to be stated at \$2,300, which is too high; (c) will result in a \$700 balance in the Supplies account (\$100 too low) and an \$800 balance in the Supplies Expense account (\$100 too high); and (d) will cause the Supplies account to have a credit balance (assets have a normal debit balance) and the Supplies Expense account to be stated at \$2,200, which is too high.
- *16. (c)** Neutrality is one of the enhancing qualities that makes information more representationally faithful, not relevant. Therefore, choices (a), (b), and (d) are incorrect.
- *17. (c)** Cost is a constraint in financial accounting. The other choices are all enhancing qualities of useful information.

PRACTICE EXERCISES

- 1.** Wendy Penn, D.D.S., opened a dental practice on January 1, 2017. During the first month of operations, the following transactions occurred. *Prepare adjusting entries.* (LO 3, 4)
- Performed services for patients totaling \$785, which had not yet been recorded.
 - Utility expenses incurred but not paid prior to January 31 totaled \$250.

- Purchased dental equipment on January 1 for \$90,000, paying \$25,000 in cash and signing a \$65,000, 3-year note payable. The equipment depreciates \$500 per month. Interest is \$550 per month.
- Purchased a one-year malpractice insurance policy on January 1 for \$15,000.
- Purchased \$1,700 of dental supplies. On January 31, determined that \$300 of supplies were on hand.

Instructions

Prepare the adjusting entries on January 31. Account titles are Accumulated Depreciation—Equipment, Depreciation Expense, Service Revenue, Accounts Receivable, Insurance Expense, Interest Expense, Interest Payable, Prepaid Insurance, Supplies, Supplies Expense, Utilities Expense, and Utilities Payable.

Solution

1. Jan. 31	Accounts Receivable	785	
	Service Revenue		785
31	Utilities Expense	250	
	Accounts Payable		250
31	Depreciation Expense	500	
	Accumulated Depreciation—Equipment		500
31	Interest Expense	550	
	Interest Payable		550
31	Insurance Expense (\$15,000 ÷ 12)	1,250	
	Prepaid Insurance		1,250
31	Supplies Expense (\$1,700 – \$300)	1,400	
	Supplies		1,400

- The income statement of Bragg Co. for the month of July shows net income of \$1,400 based on Service Revenue \$5,500, Salaries and Wages Expense \$2,300, Supplies Expense \$1,200, and Utilities Expense \$600. In reviewing the statement, you discover the following.

Prepare correct income statement.

(LO 2, 3, 4)

- Insurance expired during July of \$450 was omitted.
- Supplies expense includes \$300 of supplies that are still on hand at July 31.
- Depreciation on equipment of \$180 was omitted.
- Accrued but unpaid salaries and wages at July 31 of \$400 were not included.
- Services performed but unrecorded totaled \$600.

Instructions

Prepare a correct income statement for July 2017.

Solution

2.			
BRAGG CO.			
Income Statement			
For the Month Ended July 31, 2017			
Revenues			
Service revenue (\$5,500 + \$600)			\$6,100
Expenses			
Salaries and wages expense (\$2,300 + \$400)	\$2,700		
Supplies expense (\$1,200 – \$300)	900		
Utilities expense	600		
Insurance expense	450		
Depreciation expense	180		
Total expenses		<u>4,830</u>	
Net income			<u>\$1,270</u>

PRACTICE PROBLEM

Prepare adjusting entries from selected data.

(LO 2, 3)

The Green Thumb Lawn Care Inc. began operations on April 1. At April 30, the trial balance shows the following balances for selected accounts.

Prepaid Insurance	\$ 3,600
Equipment	28,000
Notes Payable	20,000
Unearned Service Revenue	4,200
Service Revenue	1,800

Analysis reveals the following additional data.

1. Prepaid insurance is the cost of a 2-year insurance policy, effective April 1.
2. Depreciation on the equipment is \$500 per month.
3. The note payable is dated April 1. It is a 6-month, 12% note.
4. Seven customers paid for the company's 6-month lawn service package of \$600 beginning in April. The company performed services for these customers in April.
5. Lawn services performed for other customers but not recorded at April 30 totaled \$1,500.

Instructions

Prepare the adjusting entries for the month of April. Show computations.

Solution

GENERAL JOURNAL				J1
Date	Account Titles and Explanation	Ref.	Debit	Credit
	<u>Adjusting Entries</u>			
Apr. 30	Insurance Expense Prepaid Insurance (To record insurance expired: $\$3,600 \div 24 = \150 per month)		150	150
30	Depreciation Expense Accumulated Depreciation—Equipment (To record monthly depreciation)		500	500
30	Interest Expense Interest Payable (To record interest on notes payable: $\$20,000 \times 12\% \times 1/12 = \200)		200	200
30	Unearned Service Revenue Service Revenue (To record revenue for services performed: $\$600 \div 6 = \100 ; $\$100$ per month $\times 7 = \$700$)		700	700
30	Accounts Receivable Service Revenue (To record revenue for services performed)		1,500	1,500

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

QUESTIONS

1. (a) How does the time period assumption affect an accountant's analysis of business transactions?
(b) Explain the terms fiscal year, calendar year, and interim periods.
2. Define two generally accepted accounting principles that relate to adjusting the accounts.
3. Susan Zupan, a lawyer, accepts a legal engagement in March, performs the work in April, and is paid in May. If Zupan's law firm prepares monthly financial statements, when should it recognize revenue from this engagement? Why?
4. Why do accrual-basis financial statements provide more useful information than cash-basis statements?
5. In completing the engagement in Question 3, Zupan pays no costs in March, \$2,000 in April, and \$2,500 in May (incurred in April). How much expense should the firm deduct from revenues in the month when it recognizes the revenue? Why?
6. "Adjusting entries are required by the historical cost principle of accounting." Do you agree? Explain.
7. Why may a trial balance not contain up-to-date and complete financial information?
8. Distinguish between the two categories of adjusting entries, and identify the types of adjustments applicable to each category.
9. What is the debit/credit effect of a prepaid expense adjusting entry?
10. "Depreciation is a valuation process that results in the reporting of the fair value of the asset." Do you agree? Explain.
11. Explain the differences between depreciation expense and accumulated depreciation.
12. J. Brownlee Company purchased equipment for \$18,000. By the current balance sheet date, \$6,000 had been depreciated. Indicate the balance sheet presentation of the data.
13. What is the debit/credit effect of an unearned revenue adjusting entry?
14. A company fails to recognize revenue for services performed but not yet received in cash or recorded. Which of the following accounts are involved in the adjusting entry: (a) asset, (b) liability, (c) revenue, or (d) expense? For the accounts selected, indicate whether they would be debited or credited in the entry.
15. A company fails to recognize an expense incurred but not paid. Indicate which of the following accounts is debited and which is credited in the adjusting entry: (a) asset, (b) liability, (c) revenue, or (d) expense.
16. A company makes an accrued revenue adjusting entry for \$900 and an accrued expense adjusting entry for \$700. How much was net income understated prior to these entries? Explain.
17. On January 9, a company pays \$5,000 for salaries and wages of which \$2,000 was reported as Salaries and Wages Payable on December 31. Give the entry to record the payment.
18. For each of the following items before adjustment, indicate the type of adjusting entry (prepaid expense, unearned revenue, accrued revenue, or accrued expense) that is needed to correct the misstatement. If an item could result in more than one type of adjusting entry, indicate each of the types.
 - (a) Assets are understated.
 - (b) Liabilities are overstated.
 - (c) Liabilities are understated.
 - (d) Expenses are understated.
 - (e) Assets are overstated.
 - (f) Revenue is understated.
19. One-half of the adjusting entry is given below. Indicate the account title for the other half of the entry.
 - (a) Salaries and Wages Expense is debited.
 - (b) Depreciation Expense is debited.
 - (c) Interest Payable is credited.
 - (d) Supplies is credited.
 - (e) Accounts Receivable is debited.
 - (f) Unearned Service Revenue is debited.
20. "An adjusting entry may affect more than one balance sheet or income statement account." Do you agree? Why or why not?
21. Why is it possible to prepare financial statements directly from an adjusted trial balance?
- *22. Dashan Company debits Supplies Expense for all purchases of supplies and credits Rent Revenue for all advanced rentals. For each type of adjustment, give the adjusting entry.
- *23. (a) What is the primary objective of financial reporting?
(b) Identify the characteristics of useful accounting information.
- *24. Dan Fineman, the president of King Company, is pleased. King substantially increased its net income in 2017 while keeping its unit inventory relatively the same. Howard Gross, chief accountant, cautions Dan, however. Gross says that since King changed its method of inventory valuation, there is a consistency problem and it is difficult to determine whether King is better off. Is Gross correct? Why or why not?
- *25. What is the distinction between comparability and consistency?
- *26. Describe the constraint inherent in the presentation of accounting information.
- *27. Laurie Belk is president of Better Books. She has no accounting background. Belk cannot understand why fair value is not used as the basis for all accounting measurement and reporting. Discuss.
- *28. What is the economic entity assumption? Give an example of its violation.

BRIEF EXERCISES

Indicate why adjusting entries are needed.

(LO 1)

BE3-1 The ledger of Jung Company includes the following accounts. Explain why each account may require adjustment.

- (a) Prepaid Insurance.
- (b) Depreciation Expense.
- (c) Unearned Service Revenue.
- (d) Interest Payable.

Identify the major types of adjusting entries.

(LO 1, 2, 3)

BE3-2 Moteki Company accumulates the following adjustment data at December 31. Indicate (a) the type of adjustment (prepaid expense, accrued revenue, and so on), and (b) the status of accounts before adjustment (overstated or understated).

1. Supplies of \$100 are on hand.
2. Services performed but not recorded total \$900.
3. Interest of \$200 has accumulated on a note payable.
4. Rent collected in advance totaling \$650 has been earned.

Prepare adjusting entry for supplies.

(LO 2)

BE3-3 Ritter Advertising Company's trial balance at December 31 shows Supplies \$6,700 and Supplies Expense \$0. On December 31, there are \$2,500 of supplies on hand. Prepare the adjusting entry at December 31, and using T-accounts, enter the balances in the accounts, post the adjusting entry, and indicate the adjusted balance in each account.

Prepare adjusting entry for depreciation.

(LO 2)

BE3-4 At the end of its first year, the trial balance of Nygaard Company shows Equipment \$30,000 and zero balances in Accumulated Depreciation—Equipment and Depreciation Expense. Depreciation for the year is estimated to be \$4,000. Prepare the adjusting entry for depreciation at December 31, post the adjustments to T-accounts, and indicate the balance sheet presentation of the equipment at December 31.

Prepare adjusting entry for prepaid expense.

(LO 2)

BE3-5 On July 1, 2017, Dobbs Co. pays \$14,400 to Kalter Insurance Co. for a 3-year insurance contract. Both companies have fiscal years ending December 31. For Dobbs Co., journalize and post the entry on July 1 and the adjusting entry on December 31.

Prepare adjusting entry for unearned revenue.

(LO 2)

BE3-6 Using the data in BE3-5, journalize and post the entry on July 1 and the adjusting entry on December 31 for Kalter Insurance Co. Kalter uses the accounts Unearned Service Revenue and Service Revenue.

Prepare adjusting entries for accruals.

(LO 3)

BE3-7 The bookkeeper for Bradbury Company asks you to prepare the following accrued adjusting entries at December 31.

1. Interest on notes payable of \$400 is accrued.
2. Services performed but not recorded total \$1,900.
3. Salaries earned by employees of \$900 have not been recorded.

Use the following account titles: Service Revenue, Accounts Receivable, Interest Expense, Interest Payable, Salaries and Wages Expense, and Salaries and Wages Payable.

Analyze accounts in an unadjusted trial balance.

(LO 1, 2, 3)

BE3-8 The trial balance of Yewlett Company includes the following balance sheet accounts, which may require adjustment. For each account that requires adjustment, indicate (a) the type of adjusting entry (prepaid expense, unearned revenue, accrued revenue, or accrued expense) and (b) the related account in the adjusting entry.

Accounts Receivable	Interest Payable
Prepaid Insurance	Unearned Service Revenue
Accumulated Depreciation—Equipment	

Prepare an income statement from an adjusted trial balance.

(LO 4)

BE3-9 The adjusted trial balance of Parsons Company at December 31, 2017, includes the following accounts: Common Stock \$15,600, Dividends \$7,000, Service Revenue \$37,000, Salaries and Wages Expense \$16,000, Insurance Expense \$2,000, Rent Expense \$4,000, Supplies Expense \$1,500, and Depreciation Expense \$1,300. Prepare an income statement for the year.

BE3-10 Partial adjusted trial balance data for Parsons Company is presented in BE3-9. The balance in Common Stock is the balance as of January 1. Prepare a retained earnings statement for the year assuming net income is \$12,200 for the year and Retained Earnings is \$7,240 on January 1.

Prepare a retained earnings statement from an adjusted trial balance.

(LO 4)

***BE3-11** Mayes Company records all prepayments in income statement accounts. At April 30, the trial balance shows Supplies Expense \$2,800, Service Revenue \$9,200, and zero balances in related balance sheet accounts. Prepare the adjusting entries at April 30 assuming (a) \$700 of supplies on hand and (b) \$3,000 of service revenue should be reported as unearned.

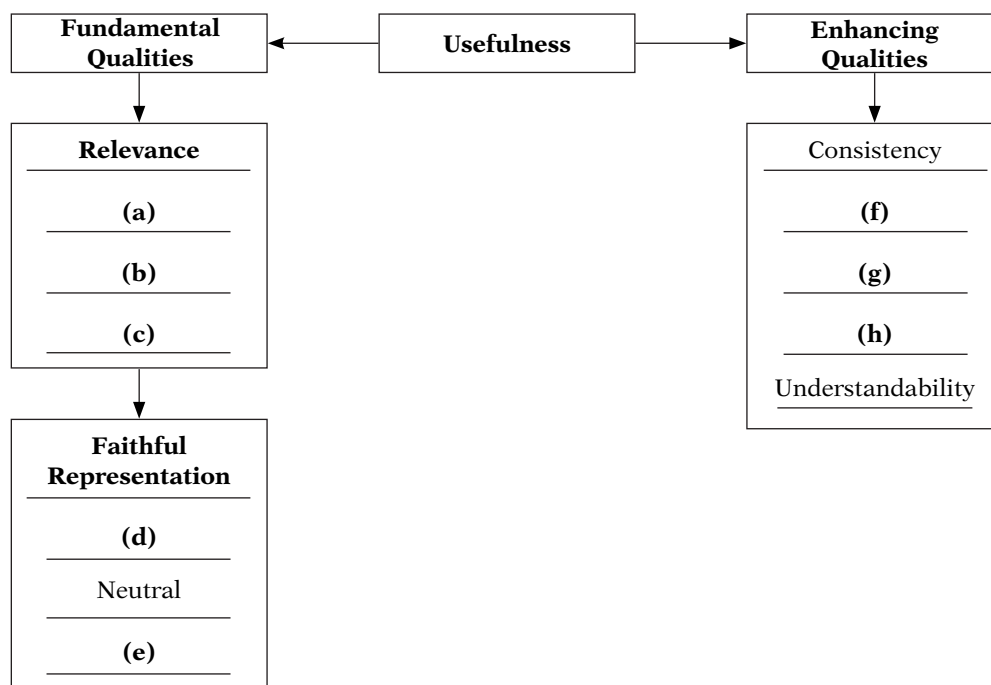

Prepare adjusting entries under alternative treatment of deferrals.

(LO 5)

***BE3-12** The accompanying chart shows the qualitative characteristics of useful accounting information. Fill in the blanks.

Identify characteristics of useful information.

(LO 6)

***BE3-13** Given the characteristics of useful accounting information, complete each of the following statements.

Identify characteristics of useful information.

- (a) For information to be _____, it should have predictive value, confirmatory value, and be material.
- (b) _____ is the quality of information that gives assurance that the information accurately depicts what really happened.
- (c) _____ means using the same accounting principles and methods from year to year within a company.

(LO 6)

***BE3-14** Here are some qualitative characteristics of useful accounting information:

Identify characteristics of useful information.

- 1. Predictive value
- 2. Neutral
- 3. Verifiable
- 4. Timely

(LO 6)

Match each qualitative characteristic to one of the following statements.

- _____ (a) Accounting information should help provide accurate expectations about future events.
- _____ (b) Accounting information cannot be selected, prepared, or presented to favor one set of interested users over another.
- _____ (c) The quality of information that occurs when independent observers, using the same methods, obtain similar results.
- _____ (d) Accounting information must be available to decision-makers before it loses its capacity to influence their decisions.

Define full disclosure principle.

(LO 6)

***BE3-15** Select the response that completes the following statement correctly. The full disclosure principle dictates that:

- financial statements should disclose all assets at their cost.
- financial statements should disclose only those events that can be measured in currency.
- financial statements should disclose all events and circumstances that would matter to users of financial statements.
- financial statements should not be relied on unless an auditor has expressed an unqualified opinion on them.

DO IT! Exercises

Identify timing concepts.

(LO 1)

DO IT! 3-1 Several timing concepts are discussed on pages 96–97. A list of concepts is provided below in the left column, with a description of the concept in the right column. There are more descriptions provided than concepts. Match the description to the concept.

- | | |
|---------------------------------------|--|
| 1. ___ Cash-basis accounting. | (a) Monthly and quarterly time periods. |
| 2. ___ Fiscal year. | (b) Accountants divide the economic life of a business into artificial time periods. |
| 3. ___ Revenue recognition principle. | (c) Efforts (expenses) should be matched with accomplishments (revenues). |
| 4. ___ Expense recognition principle. | (d) Companies record revenues when they receive cash and record expenses when they pay out cash. |
| | (e) An accounting time period that is one year in length. |
| | (f) An accounting time period that starts on January 1 and ends on December 31. |
| | (g) Companies record transactions in the period in which the events occur. |
| | (h) Recognize revenue in the accounting period in which a performance obligation is satisfied. |

Prepare adjusting entries for deferrals.

(LO 2)

DO IT! 3-2 The ledger of Herrera, Inc. on March 31, 2017, includes the following selected accounts before adjusting entries.

	<u>Debit</u>	<u>Credit</u>
Prepaid Insurance	2,400	
Supplies	2,500	
Equipment	30,000	
Unearned Service Revenue		9,000

An analysis of the accounts shows the following.

- Insurance expires at the rate of \$300 per month.
- Supplies on hand total \$1,100.
- The equipment depreciates \$500 per month.
- During March, services were performed for two-fifths of the unearned service revenue.

Prepare the adjusting entries for the month of March.

Prepare adjusting entries for accruals.

(LO 3)

DO IT! 3-3 Javier Computer Services began operations in July 2017. At the end of the month, the company prepares monthly financial statements. It has the following information for the month.

- At July 31, the company owed employees \$1,300 in salaries that the company will pay in August.
- On July 1, the company borrowed \$20,000 from a local bank on a 10-year note. The annual interest rate is 12%.
- Service revenue unrecorded in July totaled \$2,400.

Prepare the adjusting entries needed at July 31, 2017.

DO IT! 3-4 Lumina Co. was organized on April 1, 2017. The company prepares quarterly financial statements. The adjusted trial balance amounts at June 30 are shown below.

	Debit		Credit
Cash	\$ 5,360	Accumulated Depreciation—	
Accounts Receivable	480	Equipment	\$ 700
Prepaid Rent	720	Notes Payable	4,000
Supplies	920	Accounts Payable	790
Equipment	12,000	Salaries and Wages Payable	300
Dividends	500	Interest Payable	40
Salaries and Wages Expense	7,400	Unearned Rent Revenue	400
Rent Expense	1,200	Common Stock	11,200
Depreciation Expense	700	Service Revenue	11,360
Supplies Expense	160	Rent Revenue	1,100
Utilities Expense	410		<u>\$29,890</u>
Interest Expense	40		
	<u>\$29,890</u>		

Calculate amounts from trial balance.

(LO 4)

- Determine the net income for the quarter April 1 to June 30.
- Determine the total assets and total liabilities at June 30, 2017, for Lumina Company.
- Determine the amount that appears for Retained Earnings at June 30, 2017.

EXERCISES

E3-1 Ian Muse has prepared the following list of statements about the time period assumption.

Explain the time period assumption.

- Adjusting entries would not be necessary if a company's life were not divided into artificial time periods.
- The IRS requires companies to file annual tax returns.
- Accountants divide the economic life of a business into artificial time periods, but each transaction affects only one of these periods.
- Accounting time periods are generally a month, a quarter, or a year.
- A time period lasting one year is called an interim period.
- All fiscal years are calendar years, but not all calendar years are fiscal years.

(LO 1)

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E3-2 On numerous occasions, proposals have surfaced to put the federal government on the accrual basis of accounting. This is no small issue. If this basis were used, it would mean that billions in unrecorded liabilities would have to be booked, and the federal deficit would increase substantially.

Distinguish between cash and accrual basis of accounting.

(LO 1)

Instructions

- What is the difference between accrual-basis accounting and cash-basis accounting?
- Why would politicians prefer the cash basis over the accrual basis?
- Write a letter to your senator explaining why the federal government should adopt the accrual basis of accounting.

E3-3 Primo Industries collected \$105,000 from customers in 2017. Of the amount collected, \$25,000 was for services performed in 2016. In addition, Primo performed services worth \$40,000 in 2017, which will not be collected until 2018.

Compute cash and accrual accounting income.

(LO 1)

Primo Industries also paid \$72,000 for expenses in 2017. Of the amount paid, \$30,000 was for expenses incurred on account in 2016. In addition, Primo incurred \$42,000 of expenses in 2017, which will not be paid until 2018.

Instructions

- Compute 2017 cash-basis net income.
- Compute 2017 accrual-basis net income.

Identify the type of adjusting entry needed.

(LO 1, 2, 3)

E3-4 Hart Corporation encounters the following situations:

- Hart collects \$1,300 from a customer in 2017 for services to be performed in 2018.
- Hart incurs utility expense which is not yet paid in cash or recorded.
- Hart's employees worked 3 days in 2017 but will not be paid until 2018.
- Hart performs services for customers but has not yet received cash or recorded the transaction.
- Hart paid \$2,400 rent on December 1 for the 4 months starting December 1.
- Hart received cash for future services and recorded a liability until the service was performed.
- Hart performed consulting services for a client in December 2017. On December 31, it had not billed the client for services performed of \$1,200.
- Hart paid cash for an expense and recorded an asset until the item was used up.
- Hart purchased \$900 of supplies in 2017; at year-end, \$400 of supplies remain unused.
- Hart purchased equipment on January 1, 2017; the equipment will be used for 5 years.
- Hart borrowed \$10,000 on October 1, 2017, signing an 8% one-year note payable.

Instructions

Identify what type of adjusting entry (prepaid expense, unearned revenue, accrued expense, or accrued revenue) is needed in each situation at December 31, 2017.

Prepare adjusting entries from selected data.

(LO 2, 3)

E3-5 Verne Cova Company has the following balances in selected accounts on December 31, 2017.

Accounts Receivable	\$ -0-
Accumulated Depreciation—Equipment	-0-
Equipment	7,000
Interest Payable	-0-
Notes Payable	10,000
Prepaid Insurance	2,100
Salaries and Wages Payable	-0-
Supplies	2,450
Unearned Service Revenue	30,000

All the accounts have normal balances. The information below has been gathered at December 31, 2017.

- Verne Cova Company borrowed \$10,000 by signing a 12%, one-year note on September 1, 2017.
- A count of supplies on December 31, 2017, indicates that supplies of \$900 are on hand.
- Depreciation on the equipment for 2017 is \$1,000.
- Verne Cova Company paid \$2,100 for 12 months of insurance coverage on June 1, 2017.
- On December 1, 2017, Verne Cova collected \$30,000 for consulting services to be performed from December 1, 2017, through March 31, 2018.
- Verne Cova performed consulting services for a client in December 2017. The client will be billed \$4,200.
- Verne Cova Company pays its employees total salaries of \$9,000 every Monday for the preceding 5-day week (Monday through Friday). On Monday, December 29, employees were paid for the week ending December 26. All employees worked the last 3 days of 2017.

Instructions

Prepare adjusting entries for the seven items described above.

Identify types of adjustments and account relationships.

(LO 1, 2, 3)

E3-6 Lei Company accumulates the following adjustment data at December 31.

- Services performed but not recorded total \$1,000.
- Supplies of \$300 have been used.
- Utility expenses of \$225 are unpaid.
- Services related to unearned service revenue of \$260 were performed.
- Salaries of \$800 are unpaid.
- Prepaid insurance totaling \$350 has expired.

Instructions

For each of the above items indicate the following.

- The type of adjustment (prepaid expense, unearned revenue, accrued revenue, or accrued expense).
- The status of accounts before adjustment (overstatement or understatement).

E3-7 The ledger of Perez Rental Agency on March 31 of the current year includes the selected accounts, shown below, before quarterly adjusting entries have been prepared.

	<u>Debit</u>	<u>Credit</u>
Prepaid Insurance	\$ 3,600	
Supplies	2,800	
Equipment	25,000	
Accumulated Depreciation—Equipment		\$ 8,400
Notes Payable		20,000
Unearned Rent Revenue		10,200
Rent Revenue		60,000
Interest Expense	-0-	
Salaries and Wages Expense	14,000	

Prepare adjusting entries from selected account data.

(LO 2, 3)

An analysis of the accounts shows the following.

1. The equipment depreciates \$400 per month.
2. One-third of the unearned rent revenue was earned during the quarter.
3. Interest totaling \$500 is accrued on the notes payable for the quarter.
4. Supplies on hand total \$900.
5. Insurance expires at the rate of \$200 per month.

Instructions

Prepare the adjusting entries at March 31, assuming that adjusting entries are made **quarterly**. Additional accounts are Depreciation Expense, Insurance Expense, Interest Payable, and Supplies Expense.

E3-8 Robin Shalit, D.D.S., opened a dental practice on January 1, 2017. During the first month of operations, the following transactions occurred.

Prepare adjusting entries.

(LO 2, 3)

1. Performed services for patients who had dental plan insurance. At January 31, \$875 of such services were performed but not yet recorded.
2. Utility expenses incurred but not paid prior to January 31 totaled \$650.
3. Purchased dental equipment on January 1 for \$80,000, paying \$20,000 in cash and signing a \$60,000, 3-year note payable. The equipment depreciates \$400 per month. Interest is \$500 per month.
4. Purchased a one-year malpractice insurance policy on January 1 for \$24,000.
5. Purchased \$1,600 of dental supplies. On January 31, determined that \$400 of supplies were on hand.

Instructions

Prepare the adjusting entries on January 31. Account titles are Accumulated Depreciation—Equipment, Depreciation Expense, Service Revenue, Accounts Receivable, Insurance Expense, Interest Expense, Interest Payable, Prepaid Insurance, Supplies, Supplies Expense, Utilities Expense, and Utilities Payable.

E3-9 The trial balance for Pioneer Advertising Inc. is shown in Illustration 3-3 (page 99). Instead of the adjusting entries shown in the text at October 31, assume the following adjustment data.

Prepare adjusting entries.

(LO 2, 3)

1. Supplies on hand at October 31 total \$500.
2. Expired insurance for the month is \$100.
3. Depreciation for the month is \$50.
4. Services related to unearned service revenue in October worth \$600 were performed.
5. Services performed but not recorded at October 31 are \$300.
6. Interest accrued at October 31 is \$95.
7. Accrued salaries at October 31 are \$1,625.

Instructions

Prepare the adjusting entries for the items above.

E3-10 The income statement of Gopitkumar Co. for the month of July shows net income of \$1,400 based on Service Revenue \$5,500, Salaries and Wages Expense \$2,300, Supplies Expense \$1,200, and Utilities Expense \$600. In reviewing the statement, you discover the following.

Prepare correct income statement.

(LO 1, 2, 3, 4)

1. Insurance expired during July of \$400 was omitted.
2. Supplies expense includes \$250 of supplies that are still on hand at July 31.
3. Depreciation on equipment of \$150 was omitted.

4. Accrued but unpaid salaries and wages at July 31 of \$300 were not included.
5. Services performed but unrecorded totaled \$650.

Instructions

Prepare a correct income statement for July 2017.

Analyze adjusted data.

(LO 1, 2, 3, 4)

E3-11 A partial adjusted trial balance of Gehring Company at January 31, 2017, shows the following.

GEHRING COMPANY
Adjusted Trial Balance
January 31, 2017

	<u>Debit</u>	<u>Credit</u>
Supplies	\$ 850	
Prepaid Insurance	2,400	
Salaries and Wages Payable		\$ 800
Unearned Service Revenue		750
Supplies Expense	950	
Insurance Expense	400	
Salaries and Wages Expense	2,900	
Service Revenue		2,000

Instructions

Answer the following questions, assuming the year begins January 1.

- (a) If the amount in Supplies Expense is the January 31 adjusting entry, and \$1,000 of supplies was purchased in January, what was the balance in Supplies on January 1?
- (b) If the amount in Insurance Expense is the January 31 adjusting entry, and the original insurance premium was for one year, what was the total premium and when was the policy purchased?
- (c) If \$3,500 of salaries was paid in January, what was the balance in Salaries and Wages Payable at December 31, 2016?

Journalize basic transactions and adjusting entries.

(LO 2, 3)

E3-12 Selected accounts of Koffman Company are as follows.

Supplies Expense							
7/31	800						
Supplies				Salaries and Wages Payable			
7/1 Bal.	1,100	7/31	800		7/31	1,200	
7/10	650						
Accounts Receivable				Unearned Service Revenue			
7/31	500			7/31	1,150	7/1 Bal.	1,500
						7/20	1,000
Salaries and Wages Expense				Service Revenue			
7/15	1,200				7/14	2,000	
7/31	1,200				7/31	1,150	
						7/31	500

Instructions

After analyzing the accounts, journalize (a) the July transactions and (b) the adjusting entries that were made on July 31. (*Hint:* July transactions were for cash.)

E3-13 The trial balances before and after adjustment for Frinzi Company at the end of its fiscal year are presented below.

Prepare adjusting entries from analysis of trial balances.

(LO 2, 3, 4)

FRINZI COMPANY
Trial Balance
August 31, 2017

	Before Adjustment		After Adjustment	
	Dr.	Cr.	Dr.	Cr.
Cash	\$10,400		\$10,400	
Accounts Receivable	8,800		10,800	
Supplies	2,300		900	
Prepaid Insurance	4,000		2,500	
Equipment	14,000		14,000	
Accumulated Depreciation—Equipment		\$ 3,600		\$ 4,500
Accounts Payable		5,800		5,800
Salaries and Wages Payable		–0–		1,100
Unearned Rent Revenue		1,500		600
Common Stock		12,000		12,000
Retained Earnings		3,600		3,600
Service Revenue		34,000		36,000
Rent Revenue		11,000		11,900
Salaries and Wages Expense	17,000		18,100	
Supplies Expense	–0–		1,400	
Rent Expense	15,000		15,000	
Insurance Expense	–0–		1,500	
Depreciation Expense	–0–		900	
	\$71,500	\$71,500	\$75,500	\$75,500

Instructions

Prepare the adjusting entries that were made.

E3-14 The adjusted trial balance for Frinzi Company is given in E3-13.

Prepare financial statements from adjusted trial balance.

Instructions

Prepare the income and retained earnings statements for the year and the balance sheet at August 31.

(LO 4)

E3-15 The following data are taken from the comparative balance sheets of Cascade Billiards Club, which prepares its financial statements using the accrual basis of accounting.

Record transactions on accrual basis; convert revenue to cash receipts.

	December 31	2017	2016
Accounts receivable from members		\$14,000	\$ 9,000
Unearned service revenue		17,000	25,000

(LO 2, 3)

Members are billed based upon their use of the club's facilities. Unearned service revenues arise from the sale of gift certificates, which members can apply to their future use of club facilities. The 2017 income statement for the club showed that service revenue of \$161,000 was recorded during the year.

Instructions

(Hint: You will probably find it helpful to use T-accounts to analyze these data.)

- (a) Prepare journal entries for each of the following events that took place during 2017.
- (1) Accounts receivable from 2016 were all collected.
 - (2) Gift certificates outstanding at the end of 2016 were all redeemed.
 - (3) An additional \$38,000 worth of gift certificates were sold during 2017. A portion of these was used by the recipients during the year; the remainder was still outstanding at the end of 2017.
 - (4) Services performed for members for 2017 were billed to members.
 - (5) Accounts receivable for 2017 (i.e., those billed in item [4] above) were partially collected.

- (b) Determine the amount of cash received by the club, with respect to member services, during 2017.

Journalize adjusting entries.
(LO 5)

***E3-16** Aaron Lynch Company has the following balances in selected accounts on December 31, 2017.

Service Revenue	\$40,000
Insurance Expense	2,700
Supplies Expense	2,450

All the accounts have normal balances. Aaron Lynch Company debits prepayments to expense accounts when paid, and credits unearned revenues to revenue accounts when received. The following information below has been gathered at December 31, 2017.

1. Aaron Lynch Company paid \$2,700 for 12 months of insurance coverage on June 1, 2017.
2. On December 1, 2017, Aaron Lynch Company collected \$40,000 for consulting services to be performed from December 1, 2017, through March 31, 2018.
3. A count of supplies on December 31, 2017, indicates that supplies of \$900 are on hand.

Instructions

Prepare the adjusting entries needed at December 31, 2017.

Journalize transactions and adjusting entries.
(LO 5)

***E3-17** At Cambridge Company, prepayments are debited to expense when paid, and unearned revenues are credited to revenue when cash is received. During January of the current year, the following transactions occurred.

- Jan. 2 Paid \$1,920 for fire insurance protection for the year.
10 Paid \$1,700 for supplies.
15 Received \$6,100 for services to be performed in the future.

On January 31, it is determined that \$2,500 of the services were performed and that there are \$650 of supplies on hand.

Instructions

- (a) Journalize and post the January transactions. (Use T-accounts.)
- (b) Journalize and post the adjusting entries at January 31.
- (c) Determine the ending balance in each of the accounts.

Identify accounting assumptions and principles.
(LO 6)

***E3-18** Presented below are the assumptions and principles discussed in Appendix 3B.

- | | |
|-------------------------------|--------------------------------|
| 1. Full disclosure principle. | 4. Time period assumption. |
| 2. Going concern assumption. | 5. Historical cost principle. |
| 3. Monetary unit assumption. | 6. Economic entity assumption. |

Instructions

Identify by number the accounting assumption or principle that is described below. Do not use a number more than once.

- _____ (a) Is the rationale for why plant assets are not reported at liquidation value. (Note: Do not use the historical cost principle.)
- _____ (b) Indicates that personal and business recordkeeping should be separately maintained.
- _____ (c) Assumes that the monetary unit is the “measuring stick” used to report on financial performance.
- _____ (d) Separates financial information into time periods for reporting purposes.
- _____ (e) Measurement basis used when a reliable estimate of fair value is not available.
- _____ (f) Dictates that companies should disclose all circumstances and events that make a difference to financial statement users.

Identify the assumption or principle that has been violated.
(LO 6)

***E3-19** Rosman Co. had three major business transactions during 2017.

- (a) Reported at its fair value of \$260,000 merchandise inventory with a cost of \$208,000.
- (b) The president of Rosman Co., Jay Rosman, purchased a truck for personal use and charged it to his Salaries and Wages Expense account.
- (c) Rosman Co. wanted to make its 2017 income look better, so it added 2 more weeks to the year (a 54-week year). Previous years were 52 weeks.

Instructions

In each situation, identify the assumption or principle that has been violated, if any, and discuss what the company should have done.

- *E3-20** The following characteristics, assumptions, principles, or constraint guide the FASB when it creates accounting standards.

Relevance	Expense recognition principle
Faithful representation	Time period assumption
Comparability	Going concern assumption
Consistency	Historical cost principle
Monetary unit assumption	Full disclosure principle
Economic entity assumption	Materiality

Identify financial accounting concepts and principles.

(LO 6)

Match each item above with a description below.

- _____ Ability to easily evaluate one company's results relative to another's.
- _____ Belief that a company will continue to operate for the foreseeable future.
- _____ The judgment concerning whether an item's size is large enough to matter to decision-makers.
- _____ The reporting of all information that would make a difference to financial statement users.
- _____ The practice of preparing financial statements at regular intervals.
- _____ The quality of information that indicates the information makes a difference in a decision.
- _____ A belief that items should be reported on the balance sheet at the price that was paid to acquire them.
- _____ A company's use of the same accounting principles and methods from year to year.
- _____ Tracing accounting events to particular companies.
- _____ The desire to minimize bias in financial statements.
- _____ Reporting only those things that can be measured in monetary units.
- _____ Dictates that efforts (expenses) be matched with results (revenues).

- *E3-21** Net Nanny Software International Inc., headquartered in Vancouver, Canada, specializes in Internet safety and computer security products for both the home and commercial markets. In a recent balance sheet, it reported a deficit of US\$5,678,288. It has reported only net losses since its inception. In spite of these losses, Net Nanny's shares of stock have traded anywhere from a high of \$3.70 to a low of \$0.32 on the Canadian Venture Exchange.

Net Nanny's financial statements have historically been prepared in Canadian dollars. Recently, the company adopted the U.S. dollar as its reporting currency.

Comment on the objective and qualitative characteristics of accounting information.

(LO 6)

Instructions 

- What is the objective of financial reporting? How does this objective meet or not meet Net Nanny's investors' needs?
- Why would investors want to buy Net Nanny's shares if the company has consistently reported losses over the last few years? Include in your answer an assessment of the relevance of the information reported on Net Nanny's financial statements.
- Comment on how the change in reporting information from Canadian dollars to U.S. dollars likely affected the readers of Net Nanny's financial statements. Include in your answer an assessment of the comparability of the information.

- *E3-22** A friend of yours, Ana Gehrig, recently completed an undergraduate degree in science and has just started working with an international biotechnology company. Ana tells you that the owners of the business are trying to secure new sources of financing which are needed in order for the company to proceed with development of a new health-care product. Ana said that her boss told her that the company must put together a report to present to potential investors.

Ana thought that the company should include in this package the detailed scientific findings related to the Phase I clinical trials for this product. She said, "I know that the biotech industry sometimes has only a 10% success rate with new products, but if we report all the scientific findings, everyone will see what a sure success this is going to be! The president was talking about the importance of following some set of accounting principles. Why do we need to look at some accounting rules? What they need to realize is that we have scientific results that are quite encouraging, some of the most talented employees around, and the start of

Comment on the objective and qualitative characteristics of financial reporting.

(LO 6)

some really great customer relationships. We haven't made any sales yet, but we will. We just need the funds to get through all the clinical testing and get government approval for our product. Then these investors will be quite happy that they bought in to our company early!"

Instructions 

- What is accounting information?
- Comment on how Ana's suggestions for what should be reported to prospective investors conforms to the qualitative characteristics of accounting information. Do you think that the things that Ana wants to include in the information for investors will conform to financial reporting guidelines?

Visit the book's companion website, at www.wiley.com/college/veygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Prepare adjusting entries, post to ledger accounts, and prepare an adjusted trial balance.

(LO 2, 3, 4)

P3-1A Deanna Nardelli started her own consulting firm, Nardelli Consulting, on May 1, 2017. The trial balance at May 31 is as follows.

NARDELLI CONSULTING
Trial Balance
May 31, 2017

<u>Account Number</u>		<u>Debit</u>	<u>Credit</u>
101	Cash	\$ 4,500	
112	Accounts Receivable	6,000	
126	Supplies	1,900	
130	Prepaid Insurance	3,600	
149	Equipment	11,400	
201	Accounts Payable		\$ 2,200
209	Unearned Service Revenue		2,000
311	Common Stock		20,000
400	Service Revenue		7,500
726	Salaries and Wages Expense	3,400	
729	Rent Expense	900	
		<u>\$31,700</u>	<u>\$31,700</u>

In addition to those accounts listed on the trial balance, the chart of accounts for Nardelli Consulting also contains the following accounts and account numbers: No. 150 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 631 Supplies Expense, No. 717 Depreciation Expense, No. 722 Insurance Expense, and No. 732 Utilities Expense.

Other data:

- \$900 of supplies have been used during the month.
- Utilities expense incurred but not paid on May 31, 2017, \$250.
- The insurance policy is for 2 years.
- \$400 of the balance in the unearned service revenue account remains unearned at the end of the month.
- May 31 is a Wednesday, and employees are paid on Fridays. Nardelli Consulting has two employees, who are paid \$900 each for a 5-day work week.
- The equipment has a 5-year life with no salvage value. It is being depreciated at \$190 per month for 60 months.
- Invoices representing \$1,700 of services performed during the month have not been recorded as of May 31.

Instructions

- Prepare the adjusting entries for the month of May. Use J4 as the page number for your journal.
- Enter the totals from the trial balance as beginning account balances and place a check mark in the posting reference column. Post the adjusting entries to the ledger accounts.
- Prepare an adjusted trial balance at May 31, 2017.

(c) Adj. trial balance \$34,920

P3-2A The Skyline Motel opened for business on May 1, 2017. Its trial balance before adjustment on May 31 is as follows.

Prepare adjusting entries, post, and prepare adjusted trial balance and financial statements.

(LO 2, 3, 4)

SKYLINE MOTEL			
Trial Balance			
May 31, 2017			
<u>Account Number</u>		<u>Debit</u>	<u>Credit</u>
101	Cash	\$ 3,500	
126	Supplies	2,080	
130	Prepaid Insurance	2,400	
140	Land	12,000	
141	Buildings	60,000	
149	Equipment	15,000	
201	Accounts Payable		\$11,180
208	Unearned Rent Revenue		3,300
275	Mortgage Payable		40,000
311	Common Stock		35,000
429	Rent Revenue		10,300
610	Advertising Expense	600	
726	Salaries and Wages Expense	3,300	
732	Utilities Expense	900	
		<u>\$99,780</u>	<u>\$99,780</u>

In addition to those accounts listed on the trial balance, the chart of accounts for Skyline Motel also contains the following accounts and account numbers: No. 142 Accumulated Depreciation—Buildings, No. 150 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 230 Interest Payable, No. 619 Depreciation Expense, No. 631 Supplies Expense, No. 718 Interest Expense, and No. 722 Insurance Expense.

Other data:

- Prepaid insurance is a 1-year policy starting May 1, 2017.
- A count of supplies shows \$750 of unused supplies on May 31.
- Annual depreciation is \$3,000 on the buildings and \$1,500 on equipment.
- The mortgage interest rate is 12%. (The mortgage was taken out on May 1.)
- Two-thirds of the unearned rent revenue has been earned.
- Salaries of \$750 are accrued and unpaid at May 31.

Instructions

- Journalize the adjusting entries on May 31.
- Prepare a ledger using the three-column form of account. Enter the trial balance amounts and post the adjusting entries. (Use J1 as the posting reference.)
- Prepare an adjusted trial balance on May 31.
- Prepare an income statement and a retained earnings statement for the month of May and a balance sheet at May 31.

(c) Adj. trial balance \$101,305

(d) Net income \$4,645

Ending retained

earnings \$4,645

Total assets \$93,075

P3-3A Everett Co. was organized on July 1, 2017. Quarterly financial statements are prepared. The unadjusted and adjusted trial balances as of September 30 are shown on the next page.

Prepare adjusting entries and financial statements.

(LO 2, 3, 4)

EVERETT CO.
Trial Balance
September 30, 2017

	Unadjusted		Adjusted	
	Dr.	Cr.	Dr.	Cr.
Cash	\$ 8,700		\$ 8,700	
Accounts Receivable	10,400		11,500	
Supplies	1,500		650

Utilities Expense	1,510		1,510	
Interest Expense			100	
	\$53,810	\$53,810	\$56,435	\$56,435

Instructions

(b) Net income \$4,575
Ending retained earnings \$2,975
Total assets \$39,350

- (a) Journalize the adjusting entries that were made.
(b) Prepare an income statement and a retained earnings statement for the 3 months ending September 30 and a balance sheet at September 30.
(c) If the note bears interest at 12%, how many months has it been outstanding?

Prepare adjusting entries.

(LO 2, 3)

1. Insurance expense \$4,890
2. Rent revenue \$84,000

P3-4A A review of the ledger of Carmel Company at December 31, 2017, produces the following data pertaining to the preparation of annual adjusting entries.

1. Prepaid Insurance \$10,440. The company has separate insurance policies on its buildings and its motor vehicles. Policy B4564 on the building was purchased on April 1, 2016, for \$7,920. The policy has a term of 3 years. Policy A2958 on the vehicles was purchased on January 1, 2017, for \$4,500. This policy has a term of 2 years.
2. Unearned Rent Revenue \$429,000. The company began subleasing office space in its new building on November 1. At December 31, the company had the following rental contracts that are paid in full for the entire term of the lease.

Date	Term (in months)	Monthly Rent	Number of Leases
Nov. 1	9	\$5,000	5
Dec. 1	6	\$8,500	4

3. Interest expense \$1,800
4. Salaries and wages expense \$2,000

3. Notes Payable \$120,000. This balance consists of a note for 9 months at an annual interest rate of 9%, dated November 1.
4. Salaries and Wages Payable \$0. There are eight salaried employees. Salaries are paid every Friday for the current week. Five employees receive a salary of \$700 each per week, and three employees earn \$500 each per week. Assume December 31 is a Tuesday. Employees do not work weekends. All employees worked the last 2 days of December.

Instructions

Prepare the adjusting entries at December 31, 2017.

P3-5A On November 1, 2017, the account balances of Schilling Equipment Repair were as follows.

Journalize transactions and follow through accounting cycle to preparation of financial statements.

<u>No.</u>	<u>Debit</u>	<u>No.</u>	<u>Credit</u>		
101	Cash	\$ 2,400	154	Accumulated Depreciation—Equipment	\$ 2,000
112	Accounts Receivable	4,250	201	Accounts Payable	2,600
126	Supplies	1,800	209	Unearned Service Revenue	1,200
153	Equipment	12,000	212	Salaries and Wages Payable	700
			311	Common Stock	10,000
			320	Retained Earnings	3,950
		<u>\$20,450</u>			<u>\$20,450</u>

(LO 2, 3, 4)

During November, the following summary transactions were completed.

- Nov. 8 Paid \$1,700 for salaries due employees, of which \$700 is for October salaries.
- 10 Received \$3,420 cash from customers on account.
- 12 Received \$3,100 cash for services performed in November.
- 15 Purchased equipment on account \$2,000.
- 17 Purchased supplies on account \$700.
- 20 Paid creditors on account \$2,700.
- 22 Paid November rent \$400.
- 25 Paid salaries \$1,700.
- 27 Performed services on account and billed customers \$1,900 for these services.
- 29 Received \$600 from customers for future service.

Adjustment data consist of:

1. Supplies on hand \$1,400.
2. Accrued salaries payable \$350.
3. Depreciation for the month is \$200.
4. Services related to unearned service revenue of \$1,250 were performed.

Instructions

- (a) Enter the November 1 balances in the ledger accounts.
- (b) Journalize the November transactions.
- (c) Post to the ledger accounts. Use J1 for the posting reference. Use the following additional accounts: No. 407 Service Revenue, No. 615 Depreciation Expense, No. 631 Supplies Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.
- (d) Prepare a trial balance at November 30.
- (e) Journalize and post adjusting entries.
- (f) Prepare an adjusted trial balance.
- (g) Prepare an income statement and a retained earnings statement for November and a balance sheet at November 30.

- (d) Trial balance \$25,350
- (f) Adj. trial balance \$25,900
- (g) Net income \$1,500
- Ending retained earnings \$5,450
- Total assets \$18,950

***P3-6A** Sommer Graphics Company was organized on January 1, 2017, by Krystal Sommer. At the end of the first 6 months of operations, the trial balance contained the accounts shown below.

Prepare adjusting entries, adjusted trial balance, and financial statements using Appendix 3A.

	<u>Debit</u>		<u>Credit</u>
Cash	\$ 8,600	Notes Payable	\$ 20,000
Accounts Receivable	14,000	Accounts Payable	9,000
Equipment	45,000	Common Stock	22,000
Insurance Expense	2,700	Sales Revenue	52,100
Salaries and Wages Expense	30,000	Service Revenue	6,000
Supplies Expense	3,700		
Advertising Expense	1,900		
Rent Expense	1,500		
Utilities Expense	1,700		
	<u>\$109,100</u>		<u>\$109,100</u>

(LO 2, 3, 4, 5)

Analysis reveals the following additional data.

1. The \$3,700 balance in Supplies Expense represents supplies purchased in January. At June 30, \$1,500 of supplies are on hand.
2. The note payable was issued on February 1. It is a 9%, 6-month note.
3. The balance in Insurance Expense is the premium on a one-year policy, dated March 1, 2017.
4. Service revenues are credited to revenue when received. At June 30, services revenue of \$1,300 are unearned.
5. Revenue for services performed but unrecorded at June 30 totals \$2,000.
6. Depreciation is \$2,250 per year.

(b) Adj. trial balance \$112,975
 (c) Net income \$18,725
 Ending retained earnings \$18,725
 Total assets \$71,775

Instructions

- (a) Journalize the adjusting entries at June 30. (Assume adjustments are recorded every 6 months.)
- (b) Prepare an adjusted trial balance.
- (c) Prepare an income statement and a retained earnings statement for the 6 months ended June 30 and a balance sheet at June 30.

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 and 2.)

CC3 It is the end of November and Natalie has been in touch with her grandmother. Her grandmother asked Natalie how well things went in her first month of business. Natalie, too, would like to know if she has been profitable or not during November. Natalie realizes that in order to determine Cookie Creations' income, she must first make adjustments.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP3-1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

- (a) Using the consolidated financial statements and related information, identify items that may result in adjusting entries for prepayments.
- (b) Using the consolidated financial statements and related information, identify items that may result in adjusting entries for accruals.
- (c) What has been the trend since 2011 for net income?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP3-2 PepsiCo's financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

Based on information contained in these financial statements, determine the following for each company.

- (a) Net increase (decrease) in property, plant, and equipment (net) from 2012 to 2013.
- (b) Increase (decrease) in selling, general, and administrative expenses from 2012 to 2013.
- (c) Increase (decrease) in long-term debt (obligations) from 2012 to 2013.
- (d) Increase (decrease) in net income from 2012 to 2013.
- (e) Increase (decrease) in cash and cash equivalents from 2012 to 2013.

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP3-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

Based on information contained in these financial statements, determine the following for each company.

1. (a) Increase (decrease) in interest expense from 2012 to 2013.
(b) Increase (decrease) in net income from 2012 to 2013.
(c) Increase (decrease) in cash flow from operations from 2012 to 2013.
2. Cash flow from operations and net income for each company is different. What are some possible reasons for these differences?

Real-World Focus

BYP3-4 No financial decision-maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Internet.

Address: <http://biz.yahoo.com/i>, or go to www.wiley.com/college/weygandt

Steps:

1. Type in either Wal-Mart, Target Corp., or Kmart.
2. Choose **News**.
3. Select an article that sounds interesting to you and that would be relevant to an investor in these companies.

Instructions

- (a) What was the source of the article (e.g., Reuters, Businesswire, Prnewswire)?
- (b) Assume that you are a personal financial planner and that one of your clients owns stock in the company. Write a brief memo to your client summarizing the article and explaining the implications of the article for their investment.

BYP3-5 The July 6, 2011, edition of the *Wall Street Journal Online* includes an article by Michael Rapoport entitled "U.S. Firms Clash Over Accounting Rules." The article discusses why some U.S. companies favored adoption of International Financial Reporting Standards (IFRS) while other companies opposed it.

Instructions

Read the article and answer the following questions.

- (a) The article says that the switch to IFRS tends to be favored by "larger companies, big accounting firms, and rule makers." What reasons are given for favoring the switch?

- (b) What two reasons are given by many smaller companies that oppose the switch?
 (c) What criticism of IFRS is raised with regard to regulated companies?
 (d) Explain what is meant by “condorsement.”

CRITICAL THINKING

Decision-Making Across the Organization

BYP3-6 Happy Camper Park, Inc. was organized on April 1, 2016, by Barbara Evans. Barbara is a good manager but a poor accountant. From the trial balance prepared by a part-time bookkeeper, Barbara prepared the following income statement for the quarter that ended March 31, 2017.

HAPPY CAMPER PARK, INC.		
Income Statement		
For the Quarter Ended March 31, 2017		
Revenues		
Rent revenue		\$ 90,000
Operating expenses		
Advertising	\$ 5,200	
Salaries and wages	29,800	
Utilities	900	
Depreciation	800	
Maintenance and repairs	4,000	
Total operating expenses		40,700
Net income		\$ 49,300

Barbara thought that something was wrong with the statement because net income had never exceeded \$20,000 in any one quarter. Knowing that you are an experienced accountant, she asks you to review the income statement and other data.

You first look at the trial balance. In addition to the account balances reported above in the income statement, the ledger contains the following additional selected balances at March 31, 2017.

Supplies	\$ 6,200
Prepaid Insurance	7,200
Notes Payable	12,000

You then make inquiries and discover the following.

1. Rent revenues include advanced rentals for summer occupancy \$15,000.
2. There were \$1,700 of supplies on hand at March 31.
3. Prepaid insurance resulted from the payment of a one-year policy on January 1, 2017.
4. The mail on April 1, 2017, brought the following bills: advertising for week of March 24, \$110; repairs made March 10, \$260; and utilities, \$180.
5. There are four employees who receive wages totaling \$300 per day. At March 31, 2 days' salaries and wages have been incurred but not paid.
6. The note payable is a 3-month, 10% note dated January 1, 2017.

Instructions

With the class divided into groups, answer the following.

- (a) Prepare a correct income statement for the quarter ended March 31, 2017.
- (b) Explain to Barbara the generally accepted accounting principles that she did not recognize in preparing her income statement and their effect on her results.

Communication Activity

BYP3-7 In reviewing the accounts of Gloria Jean Co. at the end of the year, you discover that adjusting entries have not been made.

Instructions

Write a memo to Gloria Jean Hall, the owner of Gloria Jean Co., that explains the following: the nature and purpose of adjusting entries, why adjusting entries are needed, and the types of adjusting entries that may be made.

Ethics Case

BYP3-8 Kellner Company is a pesticide manufacturer. Its sales declined greatly this year due to the passage of legislation outlawing the sale of several of Kellner's chemical pesticides. In the coming year, Kellner will have environmentally safe and competitive chemicals to replace these discontinued products. Sales in the next year are expected to greatly exceed any prior year's. The decline in sales and profits appears to be a one-year aberration. But even so, the company president fears a large dip in the current year's profits. He believes that such a dip could cause a significant drop in the market price of Kellner's stock and make the company a takeover target.

To avoid this possibility, the company president calls in Melissa Ray, controller, to discuss this period's year-end adjusting entries. He urges her to accrue every possible revenue and to defer as many expenses as possible. He says to Melissa, "We need the revenues this year, and next year can easily absorb expenses deferred from this year. We can't let our stock price be hammered down!" Melissa didn't get around to recording the adjusting entries until January 17, but she dated the entries December 31 as if they were recorded then. Melissa also made every effort to comply with the president's request.

Instructions

- Who are the stakeholders in this situation?
- What are the ethical considerations of (1) the president's request and (2) Melissa dating the adjusting entries December 31?
- Can Melissa accrue revenues and defer expenses and still be ethical?

All About You

BYP3-9 Companies must report or disclose in their financial statements information about all liabilities, including potential liabilities related to environmental cleanup. There are many situations in which you will be asked to provide personal financial information about your assets, liabilities, revenue, and expenses. Sometimes you will face difficult decisions regarding what to disclose and how to disclose it.

Instructions

Suppose that you are putting together a loan application to purchase a home. Based on your income and assets, you qualify for the mortgage loan, but just barely. How would you address each of the following situations in reporting your financial position for the loan application? Provide responses for each of the following situations.

- You signed a guarantee for a bank loan that a friend took out for \$20,000. If your friend doesn't pay, you will have to pay. Your friend has made all of the payments so far, and it appears he will be able to pay in the future.
- You were involved in an auto accident in which you were at fault. There is the possibility that you may have to pay as much as \$50,000 as part of a settlement. The issue will not be resolved before the bank processes your mortgage request.
- The company for which you work isn't doing very well, and it has recently laid off employees. You are still employed, but it is quite possible that you will lose your job in the next few months.

Considering People, Planet, and Profit

BYP3-10 Many companies have potential pollution or environmental-disposal problems—not only for electronic gadgets, but also for the lead paint or asbestos they sold. How do we fit these issues into the accounting equation? Are these costs and related liabilities that companies should report?

YES: As more states impose laws holding companies responsible, and as more courts levy pollution-related fines, it becomes increasingly likely that companies will have to pay large amounts in the future.

NO: The amounts still are too difficult to estimate. Putting inaccurate estimates on the financial statements reduces their usefulness. Instead, why not charge the costs later, when the actual environmental cleanup or disposal occurs, at which time the company knows the actual cost?

Instructions

Write a response indicating your position regarding this situation. Provide support for your view.

FASB Codification Activity

BYP3-11 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascllogin.cfm> to log in and prepare responses to the following.

Instructions

Access the glossary (“Master Glossary”) to answer the following.

- What is the definition of revenue?
- What is the definition of compensation?

**A Look at IFRS**LEARNING
OBJECTIVE**7**

Compare the procedures for adjusting entries under GAAP and IFRS.

It is often difficult for companies to determine in what time period they should report particular revenues and expenses. Both the IASB and FASB are working on a joint project to develop a common conceptual framework that will enable companies to better use the same principles to record transactions consistently over time.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to accrual accounting.

Similarities

- In this chapter, you learned accrual-basis accounting applied under GAAP. Companies applying IFRS also use accrual-basis accounting to ensure that they record transactions that change a company’s financial statements in the period in which events occur.
- Similar to GAAP, cash-basis accounting is not in accordance with IFRS.
- IFRS also divides the economic life of companies into artificial time periods. Under both GAAP and IFRS, this is referred to as the **time period assumption**.
- The **general** revenue recognition principle required by GAAP that is used in this textbook is similar to that used under IFRS.
- Revenue recognition fraud is a major issue in U.S. financial reporting. The same situation occurs in other countries, as evidenced by revenue recognition breakdowns at Dutch software company **Baan NV**, Japanese electronics giant **NEC**, and Dutch grocer **Ahold NV**.

Differences

- Under IFRS, revaluation (using fair value) of items such as land and buildings is permitted. IFRS allows depreciation based on revaluation of assets, which is not permitted under GAAP.
- The terminology used for revenues and gains, and expenses and losses, differs somewhat between IFRS and GAAP. For example, income under IFRS includes both revenues, which arise during the normal course of operating activities, and gains, which arise from activities outside of the normal sales of goods and services. The term income is not used this way under GAAP. Instead, under GAAP income refers to the net difference between revenues and expenses.
- Under IFRS, expenses include both those costs incurred in the normal course of operations as well as losses that are not part of normal operations. This is in contrast to GAAP, which defines each separately.

Looking to the Future

The IASB and FASB are completing a joint project on revenue recognition. The purpose of this project is to develop comprehensive guidance on when to recognize revenue. It is hoped that this approach will lead to more consistent accounting in this area. For more on this topic, see www.fasb.org/project/revenue_recognition.shtml.

IFRS Practice

IFRS Self-Test Questions

1. IFRS:
 - (a) uses accrual accounting.
 - (b) uses cash-basis accounting.
 - (c) allows revenue to be recognized when a customer makes an order.
 - (d) requires that revenue not be recognized until cash is received.
2. Which of the following statements is **false**?
 - (a) IFRS employs the time period assumption.
 - (b) IFRS employs accrual accounting.
 - (c) IFRS requires that revenues and costs must be capable of being measured reliably.
 - (d) IFRS uses the cash basis of accounting.
3. As a result of the revenue recognition project by the FASB and IASB:
 - (a) revenue recognition places more emphasis on when the performance obligation is satisfied.
 - (b) revenue recognition places more emphasis on when revenue is realized.
 - (c) revenue recognition places more emphasis on when expenses are incurred.
 - (d) revenue is no longer recorded unless cash has been received.
4. Which of the following is **false**?
 - (a) Under IFRS, the term income describes both revenues and gains.
 - (b) Under IFRS, the term expenses includes losses.
 - (c) Under IFRS, companies do not engage in the adjusting process.
 - (d) Under IFRS, revenue recognition fraud is a major issue.
5. Accrual-basis accounting:
 - (a) is optional under IFRS.
 - (b) results in companies recording transactions that change a company's financial statements in the period in which events occur.
 - (c) has been eliminated as a result of the IASB/FASB joint project on revenue recognition.
 - (d) is not consistent with the IASB conceptual framework.

International Financial Reporting Problem: Louis Vuitton

IFRS3-1 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Visit Louis Vuitton's corporate website and answer the following questions from Louis Vuitton's 2013 annual report.

- (a) From the notes to the financial statements, how does the company determine the amount of revenue to record at the time of a sale?
- (b) From the notes to the financial statements, how does the company determine the provision for product returns?
- (c) Using the consolidated income statement and consolidated statement of financial position, identify items that may result in adjusting entries for deferrals.
- (d) Using the consolidated income statement, identify two items that may result in adjusting entries for accruals.

Answers to IFRS Self-Test Questions

4

Completing the Accounting Cycle

CHAPTER PREVIEW As the Feature Story below highlights, at **Rhino Foods, Inc.**, financial statements help employees understand what is happening in the business. In Chapter 3, we prepared financial statements directly from the adjusted trial balance. However, with so many details involved in the end-of-period accounting procedures, it is easy to make errors. One way to minimize errors in the records and to simplify the end-of-period procedures is to use a worksheet.

In this chapter, we will explain the role of the worksheet in accounting. We also will study the remaining steps in the accounting cycle, especially the closing process, again using Pioneer Advertising Inc. as an example. Then we will consider correcting entries and classified balance sheets.

FEATURE STORY

Everyone Likes to Win

When Ted Castle was a hockey coach at the University of Vermont, his players were self-motivated by their desire to win. Hockey was a game you usually either won or lost. But at **Rhino Foods, Inc.**, a bakery-foods company he founded in Burlington, Vermont, he discovered that manufacturing-line workers were not so self-motivated. Ted thought, what if he turned the food-making business into a game, with rules, strategies, and trophies?

In a game, knowing the score is all-important. Ted felt that only if the employees know the score—know exactly how the business is doing daily, weekly, monthly—could he turn food-making into a game. But Rhino is a closely held, family-owned business, and its financial statements and profits were confidential. Ted wondered, should he open Rhino's books to the employees?

A consultant put Ted's concerns in perspective when he said, "Imagine you're playing touch football. You play for an hour or two, and the whole time I'm sitting there with a book, keeping score. All of a sudden I blow the whistle,

and I say, 'OK, that's it. Everybody go home.' I close my book and walk away. How would you feel?" Ted opened his books and revealed the financial statements to his employees.

The next step was to teach employees the rules and strategies of how to "win" at making food. The first lesson: "Your opponent at Rhino is expenses. You must cut and control expenses." Ted and his staff distilled those lessons into daily scorecards—production reports and income statements—that keep Rhino's employees up-to-date on the game. At noon each day, Ted posts the previous day's results at the entrance to the production room. Everyone checks whether they made or lost money on what they produced the day before. And it's not just an academic exercise: There's a bonus check for each employee at the end of every four-week "game" that meets profitability guidelines.

Rhino has flourished since the first game. Employment has increased from 20 to 130 people, while both revenues and profits have grown dramatically.

Visit **WileyPLUS with ORION** for additional tutorials and practice opportunities.

Steps in Preparing a Worksheet

We will use the October 31 trial balance and adjustment data of Pioneer Advertising Inc. from Chapter 3 to illustrate how to prepare a worksheet. We describe each step of the process and demonstrate these steps in Illustration 4-2 (page 154).

STEP 1. PREPARE A TRIAL BALANCE ON THE WORKSHEET

Enter all ledger accounts with balances in the account titles column. Enter debit and credit amounts from the ledger in the trial balance columns. Illustration 4-2 shows the worksheet trial balance for Pioneer Advertising Inc. This trial balance is the same one that appears in Illustration 2-32 (page 69) and Illustration 3-3 (page 99).

STEP 2. ENTER THE ADJUSTMENTS IN THE ADJUSTMENTS COLUMNS

When using a worksheet, enter all adjustments in the adjustments columns. In entering the adjustments, use applicable trial balance accounts. If additional accounts are needed, insert them on the lines immediately below the trial balance totals. A different letter identifies the debit and credit for each adjusting entry. The term used to describe this process is **keying**. **Companies do not journalize the adjustments until after they complete the worksheet and prepare the financial statements.**

The adjustments for Pioneer Advertising Inc. are the same as the adjustments in Illustration 3-23 (page 111). They are keyed in the adjustments columns of the worksheet as follows.

- (a) Pioneer debits an additional account, Supplies Expense, \$1,500 for the cost of supplies used, and credits Supplies \$1,500.
- (b) Pioneer debits an additional account, Insurance Expense, \$50 for the insurance that has expired, and credits Prepaid Insurance \$50.
- (c) The company needs two additional depreciation accounts. It debits Depreciation Expense \$40 for the month's depreciation, and credits Accumulated Depreciation—Equipment \$40.
- (d) Pioneer debits Unearned Service Revenue \$400 for services performed, and credits Service Revenue \$400.
- (e) Pioneer debits an additional account, Accounts Receivable, \$200 for services performed but not billed, and credits Service Revenue \$200.
- (f) The company needs two additional accounts relating to interest. It debits Interest Expense \$50 for accrued interest, and credits Interest Payable \$50.
- (g) Pioneer debits Salaries and Wages Expense \$1,200 for accrued salaries, and credits an additional account, Salaries and Wages Payable, \$1,200.

After Pioneer has entered all the adjustments, the adjustments columns are totaled to prove their equality.

STEP 3. ENTER ADJUSTED BALANCES IN THE ADJUSTED TRIAL BALANCE COLUMNS

Pioneer determines the adjusted balance of an account by combining the amounts entered in the first four columns of the worksheet for each account. For example, the Prepaid Insurance account in the trial balance columns has a \$600 debit balance and a \$50 credit in the adjustments columns. The result is a \$550 debit balance recorded in the adjusted trial balance columns. **For each account, the amount in the adjusted trial balance columns is the balance that will appear in the ledger after journalizing and posting the adjusting entries.** The balances in these columns are the same as those in the adjusted trial balance in Illustration 3-25 (page 114).

Illustration 4-2
Preparing a trial balance

Pioneer Advertising Inc.										
Worksheet										
For the Month Ended October 31, 2017										
Account Titles	Trial Balance		Adjustments		Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	15,200				15,200				15,200	
Supplies	2,500			(a) 1,500	1,000				1,000	
Prepaid Insurance	600			(b) 50	550				550	
Equipment	5,000				5,000				5,000	
Notes Payable		5,000				5,000				5,000
Accounts Payable		2,500				2,500				2,500
Unearned Service Revenue		1,200	(d) 400			800				800
Common Stock		10,000				10,000				10,000
Dividends	500				500				500	
Service Revenue		10,000		(d) 400 (e) 200		10,600		10,600		
Salaries and Wages Expense	4,000		(g) 1,200		5,200		5,200			
Rent Expense	900				900		900			
Totals	28,700	28,700								
Supplies Expense			(a) 1,500		1,500		1,500			
Insurance Expense			(b) 50		50		50			
Accum. Depreciation— Equipment				(c) 40		40				40
Depreciation Expense			(c) 40		40		40			
Accounts Receivable			(e) 200		200				200	
Interest Expense			(f) 50		50		50			
Interest Payable				(f) 50		50				50
Salaries and Wages Payable				(g) 1,200		1,200				1,200
Totals			3,440	3,440	30,190	30,190	7,740	10,600	22,450	19,590
Net Income								2,860		2,860
Totals							10,600	10,600	22,450	22,450

Add additional accounts as needed to complete the adjustments:
 (a) Supplies Used.
 (b) Insurance Expired.
 (c) Depreciation Expensed.
 (d) Service Revenue Recognized.
 (e) Service Revenue Accrued.
 (f) Interest Accrued.
 (g) Salaries Accrued.

The difference between the totals of the two income statement columns determines net income or net loss.

Net income is extended to the credit column of the balance sheet columns. (Net loss would be extended to the debit column.)

After Pioneer has entered all account balances in the adjusted trial balance columns, the columns are totaled to prove their equality. If the column totals do not agree, the financial statement columns will not balance and the financial statements will be incorrect.

STEP 4. EXTEND ADJUSTED TRIAL BALANCE AMOUNTS TO APPROPRIATE FINANCIAL STATEMENT COLUMNS

The fourth step is to extend adjusted trial balance amounts to the income statement and balance sheet columns of the worksheet. Pioneer enters balance sheet accounts in the appropriate balance sheet debit and credit columns. For instance, it enters Cash in the balance sheet debit column, and Notes Payable in the balance sheet credit column. Pioneer extends Accumulated Depreciation—Equipment to the balance sheet credit column. The reason is that accumulated depreciation is a contra asset account with a credit balance.

Pioneer extends the balances in Common Stock and Retained Earnings, if any, to the balance sheet credit column. In addition, it extends the balance in Dividends to the balance sheet debit column because it is a stockholders' equity account with a debit balance.

The company enters the expense and revenue accounts such as Salaries and Wages Expense and Service Revenue in the appropriate income statement columns.

Helpful Hint

Every adjusted trial balance amount must be extended to one of the four statement columns.

STEP 5. TOTAL THE STATEMENT COLUMNS, COMPUTE THE NET INCOME (OR NET LOSS), AND COMPLETE THE WORKSHEET

The company now must total each of the financial statement columns. The net income or net loss for the period is the difference between the totals of the two income statement columns. If total credits exceed total debits, the result is net income. In such a case, as shown in Illustration 4-2, the company inserts the words "Net Income" in the account titles space. It then enters the amount in the income statement debit column and the balance sheet credit column. **The debit amount balances the income statement columns; the credit amount balances the balance sheet columns.** In addition, the credit in the balance sheet column indicates the increase in stockholders' equity resulting from net income.

What if total debits exceed total credits in the income statement columns? In that case, the company has a net loss. It enters the amount of the net loss in the income statement credit column and the balance sheet debit column.

After entering the net income or net loss, the company determines new column totals. The totals shown in the debit and credit income statement columns will match. So will the totals shown in the debit and credit balance sheet columns. If either the income statement columns or the balance sheet columns are not equal after the net income or net loss has been entered, there is an error in the worksheet.

Preparing Financial Statements from a Worksheet

After a company has completed a worksheet, it has at hand all the data required for preparation of financial statements. The income statement is prepared from the income statement columns. The balance sheet and retained earnings statement are prepared from the balance sheet columns. Illustration 4-3 (page 156) shows the financial statements prepared from Pioneer Advertising's worksheet. At this point, the company has not journalized or posted adjusting entries. Therefore, ledger balances for some accounts are not the same as the financial statement amounts.

Illustration 4-3

Financial statements from a worksheet

 PIONEER ADVERTISING INC. Income Statement For the Month Ended October 31, 2017		
Revenues		
Service revenue		\$10,600
Expenses		
Salaries and wages expense	\$5,200	
Supplies expense	1,500	
Rent expense	900	
Insurance expense	50	
Interest expense	50	
Depreciation expense	40	
Total expenses	<u>7,740</u>	<u>7,740</u>
Net income		<u>\$ 2,860</u>

 PIONEER ADVERTISING INC. Retained Earnings Statement For the Month Ended October 31, 2017		
Retained earnings, October 1		\$ -0-
Add: Net income		2,860
		<u>2,860</u>
Less: Dividends		500
Retained earnings, October 31		<u>\$2,360</u>

 PIONEER ADVERTISING INC. Balance Sheet October 31, 2017		
<u>Assets</u>		
Cash		\$15,200
Accounts receivable		200
Supplies		1,000
Prepaid insurance		550
Equipment	\$5,000	
Less: Accumulated depreciation—equipment	<u>40</u>	<u>4,960</u>
Total assets		<u>\$21,910</u>
<u>Liabilities and Stockholders' Equity</u>		
Liabilities		
Notes payable	\$5,000	
Accounts payable	2,500	
Interest payable	50	
Unearned service revenue	800	
Salaries and wages payable	<u>1,200</u>	
Total liabilities		\$ 9,550
Stockholders' equity		
Common stock	10,000	
Retained earnings	<u>2,360</u>	
Total stockholders' equity		<u>12,360</u>
Total liabilities and stockholders' equity		<u>\$21,910</u>

The amount shown for common stock on the worksheet does not change from the beginning to the end of the period unless the company issues additional stock during the period. Because there was no balance in Pioneer's retained earnings, the account is not listed on the worksheet. Only after dividends and net income (or loss) are posted to retained earnings does this account have a balance at the end of the first year of the business.

Using a worksheet, companies can prepare financial statements before they journalize and post adjusting entries. **However, the completed worksheet is not a substitute for formal financial statements.** The format of the data in the financial statement columns of the worksheet is not the same as the format of the financial statements. **A worksheet is essentially a working tool of the accountant;** companies do not distribute it to management and other parties.

Preparing Adjusting Entries from a Worksheet

A worksheet is not a journal, and it cannot be used as a basis for posting to ledger accounts. To adjust the accounts, the company must journalize the adjustments and post them to the ledger. **The adjusting entries are prepared from the adjustments columns of the worksheet.** The reference letters in the adjustments columns and the explanations of the adjustments at the bottom of the worksheet help identify the adjusting entries. The journalizing and posting of adjusting entries **follow** the preparation of financial statements when a worksheet is used. The adjusting entries on October 31 for Pioneer Advertising Inc. are the same as those shown in Illustration 3-23 (page 111).

Helpful Hint

Note that writing the explanation of the adjustment at the bottom of the worksheet is not required

DO IT!

1

Worksheet

Susan Elbe is preparing a worksheet. Explain to Susan how she should extend the following adjusted trial balance accounts to the financial statement columns of the worksheet.

Cash	Dividends
Accumulated Depreciation—Equipment	Service Revenue
Accounts Payable	Salaries and Wages Expense

Solution

Income statement debit column—Salaries and Wages Expense
 Income statement credit column—Service Revenue
 Balance sheet debit column—Cash; Dividends
 Balance sheet credit column—Accumulated Depreciation—Equipment; Accounts Payable

Related exercise material: **BE4-1, BE4-2, BE4-3, E4-1, E4-2, E4-5, E4-6, and DO IT! 4-1.**

Action Plan

- ✓ Balance sheet: Extend assets to debit column. Extend liabilities to credit column. Extend contra assets to credit column. Extend Dividends account to debit column.
- ✓ Income statement: Extend expenses to debit column. Extend revenues to credit column.

LEARNING OBJECTIVE

2

Prepare closing entries and a post-closing trial balance.

At the end of the accounting period, the company makes the accounts ready for the next period. This is called **closing the books**. In closing the books, the company distinguishes between temporary and permanent accounts.

Temporary accounts relate only to a given accounting period. They include all income statement accounts and the Dividends account. **The company closes all temporary accounts at the end of the period.**

In contrast, **permanent accounts** relate to one or more future accounting periods. They consist of all balance sheet accounts, including stockholders' equity accounts. **Permanent accounts are not closed from period to period.** Instead,

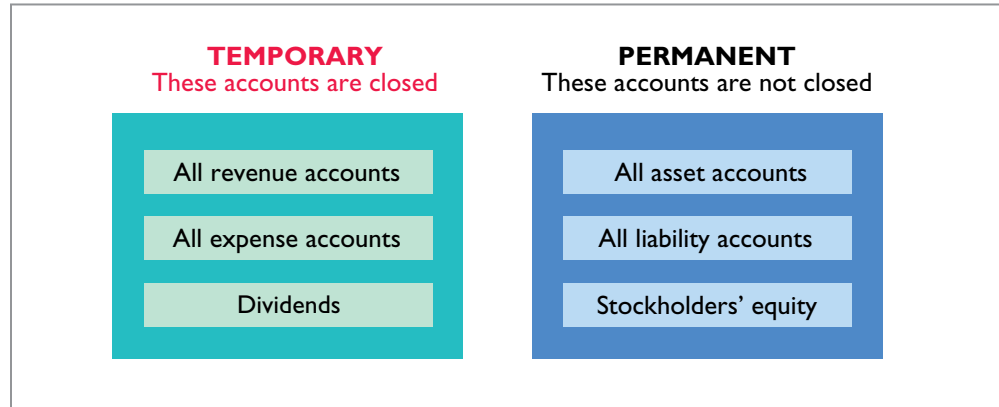

the company carries forward the balances of permanent accounts into the next accounting period. Illustration 4-4 identifies the accounts in each category.

Illustration 4-4

Temporary versus permanent accounts

Alternative Terminology

Temporary accounts are sometimes called *nominal accounts*, and permanent accounts are sometimes called *real accounts*.

Preparing Closing Entries

At the end of the accounting period, the company transfers temporary account balances to the permanent stockholders' equity account, Retained Earnings, by means of closing entries.

Closing entries formally recognize in the ledger the transfer of net income (or net loss) and Dividends to Retained Earnings. The retained earnings statement shows the results of these entries. **Closing entries also produce a zero balance in each temporary account.** The temporary accounts are then ready to accumulate data in the next accounting period separate from the data of prior periods. Permanent accounts are not closed.

Journalizing and posting closing entries is a required step in the accounting cycle (see Illustration 4-11 on page 165). The company performs this step after it has prepared financial statements. In contrast to the steps in the cycle that you have already studied, companies generally journalize and post closing entries **only at the end of the annual accounting period.** Thus, all temporary accounts will contain data for the entire year.

In preparing closing entries, companies could close each income statement account directly to Retained Earnings. However, to do so would result in excessive detail in the permanent Retained Earnings account. Instead, companies close the revenue and expense accounts to another temporary account, **Income Summary**, and they transfer the resulting net income or net loss from this account to Retained Earnings.

Companies **record closing entries in the general journal.** A center caption, Closing Entries, inserted in the journal between the last adjusting entry and the first closing entry, identifies these entries. Then the company posts the closing entries to the ledger accounts.

Companies generally prepare closing entries directly from the adjusted balances in the ledger. They could prepare separate closing entries for each nominal account, but the following four entries accomplish the desired result more efficiently:

1. Debit each revenue account for its balance, and credit Income Summary for total revenues.
2. Debit Income Summary for total expenses, and credit each expense account for its balance.

3. Debit Income Summary and credit Retained Earnings for the amount of net income.
4. Debit Retained Earnings for the balance in the Dividends account, and credit Dividends for the same amount.

Illustration 4-5 presents a diagram of the closing process. In it, the boxed numbers refer to the four entries required in the closing process.

Helpful Hint

The Dividends account is closed directly to Retained Earnings and *not* to Income Summary because dividends are not an expense.

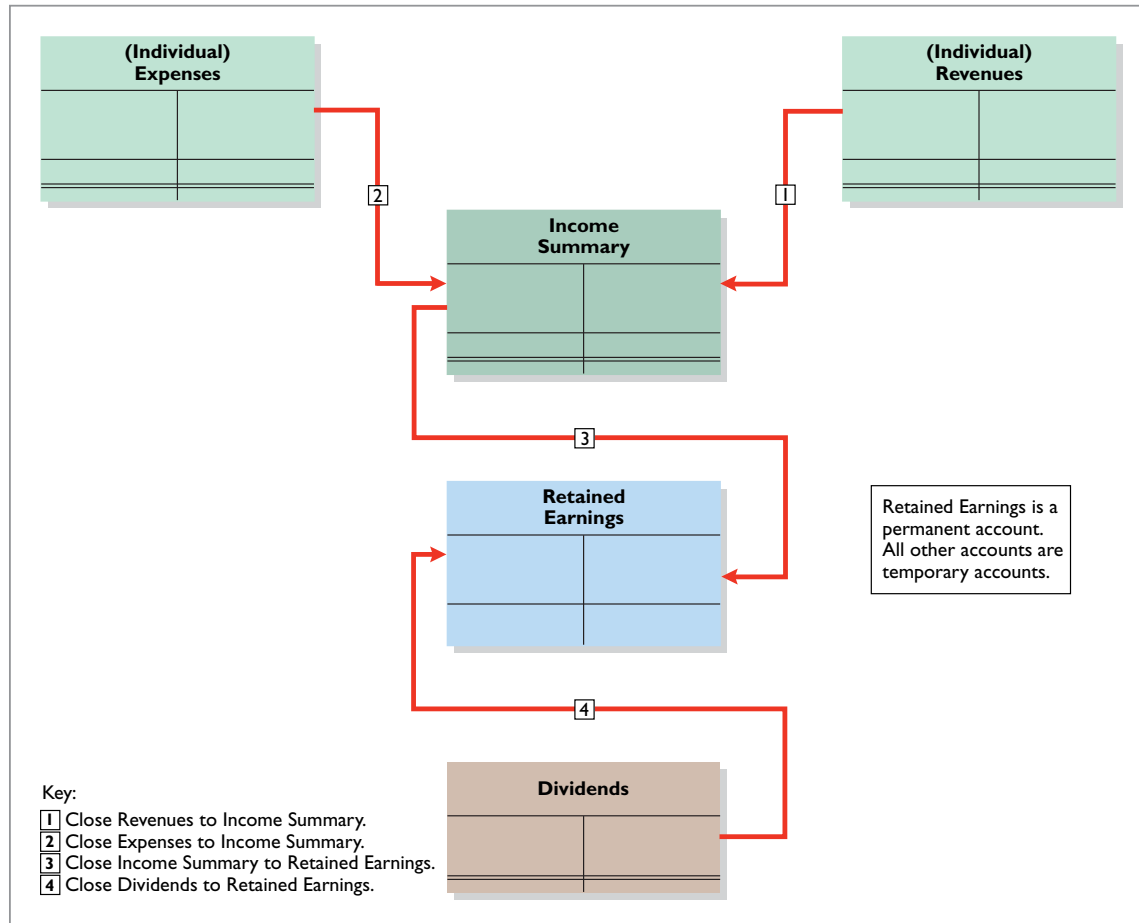

Illustration 4-5

Diagram of closing process—
corporation

If there were a net loss (because expenses exceeded revenues), entry 3 in Illustration 4-5 would be reversed: there would be a credit to Income Summary and a debit to Retained Earnings.

CLOSING ENTRIES ILLUSTRATED

In practice, companies generally prepare closing entries only at the end of the annual accounting period. However, to illustrate the journalizing and posting of closing entries, we will assume that Pioneer Advertising Inc. closes its books monthly. Illustration 4-6 (page 160) shows the closing entries at October 31. (The numbers in parentheses before each entry correspond to the four entries diagrammed in Illustration 4-5.)

Illustration 4-6
Closing entries journalized

GENERAL JOURNAL				
				J3
Date	Account Titles and Explanation	Ref.	Debit	Credit
	<u>Closing Entries</u>			
2017	(1)			
Oct. 31	Service Revenue	400	10,600	
	Income Summary	350		10,600
	(To close revenue account)			
	(2)			
31	Income Summary	350	7,740	
	Supplies Expense	631		1,500
	Depreciation Expense	711		40
	Insurance Expense	722		50
	Salaries and Wages Expense	726		5,200
	Rent Expense	729		900
	Interest Expense	905		50
	(To close expense accounts)			
	(3)			
31	Income Summary	350	2,860	
	Retained Earnings	320		2,860
	(To close net income to retained earnings)			
	(4)			
31	Retained Earnings	320	500	
	Dividends	332		500
	(To close dividends to retained earnings)			

Note that the amounts for Income Summary in entries (1) and (2) are the totals of the income statement credit and debit columns, respectively, in the worksheet.

A couple of cautions in preparing closing entries. (1) Avoid unintentionally doubling the revenue and expense balances rather than zeroing them. (2) Do not close Dividends through the Income Summary account. **Dividends are not an expense, and they are not a factor in determining net income.**

Posting Closing Entries

Illustration 4-7 shows the posting of the closing entries and the underlining (ruling) of the accounts. Note that all temporary accounts have zero balances after posting the closing entries. In addition, you should realize that the balance in Retained Earnings represents the accumulated undistributed earnings of the corporation at the end of the accounting period. This balance is shown on the balance sheet and is the ending amount reported on the retained earnings statement, as shown in Illustration 4-3 (page 156). Pioneer Advertising uses the Income Summary account only in closing. It does not journalize and post entries to this account during the year.

As part of the closing process, Pioneer totals, balances, and double-underlines its temporary accounts—revenues, expenses, and Dividends, as shown in T-account form in Illustration 4-7. It does not close its permanent accounts—assets, liabilities, and stockholders' equity (Common Stock and Retained Earnings). Instead, Pioneer draws a single underline beneath the current-period entries for the permanent accounts. The account balance is then entered below the single underline and is carried forward to the next period (for example, see Retained Earnings).

Helpful Hint

The balance in Income Summary before it is closed must equal the net income or net loss for the period.

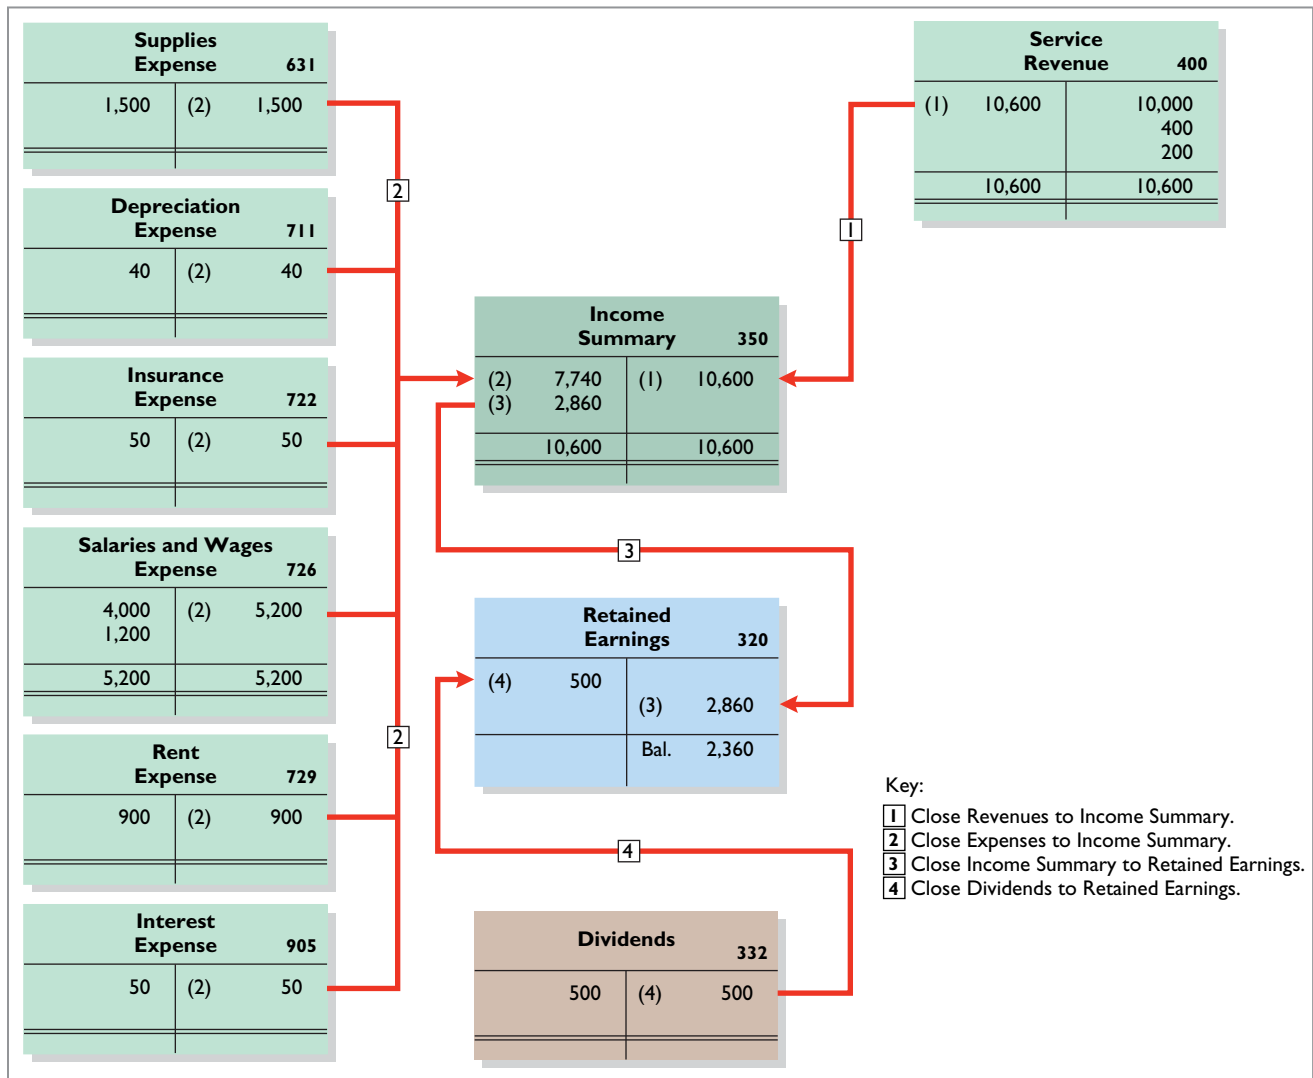

Illustration 4-7
Posting of closing entries

Accounting Across the Organization

Cisco Systems

© Steve Cole/iStockphoto

Cisco Performs the Virtual Close

Technology has dramatically shortened the closing process. Recent surveys have reported that the average company now takes only six to seven days to close, rather than the previous 20 days. But a few companies do much better. **Cisco Systems**

can perform a “virtual close”—closing within 24 hours on any day in the quarter. The same is true at **Lockheed Martin Corp.**, which improved its closing time by 85% in just the

last few years. Not very long ago, it took 14 to 16 days. Managers at these companies emphasize that this increased speed has not reduced the accuracy and completeness of the data.

This is not just showing off. Knowing exactly where you are financially all of the time allows the company to respond faster than its competitors. It also means that the hundreds of people who used to spend 10 to 20 days a quarter tracking transactions can now be more usefully employed on things such as mining data for business intelligence to find new business opportunities.

Source: “Reporting Practices: Few Do It All,” *Financial Executive* (November 2003), p. 11.

Who else benefits from a shorter closing process? (Go to **WileyPLUS** for this answer and additional questions.)

Preparing a Post-Closing Trial Balance

After Pioneer Advertising has journalized and posted all closing entries, it prepares another trial balance, called a **post-closing trial balance**, from the ledger. The post-closing trial balance lists permanent accounts and their balances after the journalizing and posting of closing entries. The purpose of the post-closing trial balance is **to prove the equality of the permanent account balances carried forward into the next accounting period**. Since all temporary accounts will have zero balances, **the post-closing trial balance will contain only permanent—balance sheet—accounts**.

Illustration 4-8 shows the post-closing trial balance for Pioneer Advertising Inc.

Note: The permanent accounts for Pioneer Advertising Inc. are shown here; the temporary accounts are shown in Illustration 4-10. Both permanent and temporary accounts are part of the general ledger; we segregated them here to aid in learning.

Illustration 4-9
General ledger, permanent accounts

A post-closing trial balance provides evidence that the company has properly journalized and posted the closing entries. It also shows that the accounting equation is in balance at the end of the accounting period. However, like the trial balance, it does not prove that Pioneer has recorded all transactions or that the ledger is correct. For example, the post-closing trial balance still will balance even if a transaction is not journalized and posted or if a transaction is journalized and posted twice.

The remaining accounts in the general ledger are temporary accounts, shown in Illustration 4-10 (page 164). After Pioneer correctly posts the closing entries, each temporary account has a zero balance. These accounts are double-underlined to finalize the closing process.

DO IT! 2 Closing Entries

The worksheet for Hancock Company shows the following in the financial statement columns:

Dividends \$15,000
 Common stock \$42,000
 Net income \$18,000

Prepare the closing entries at December 31 that affect stockholders' equity.

Solution

Action Plan

- ✓ Close Income Summary to Retained Earnings.
- ✓ Close Dividends to Retained Earnings.

Dec. 31	Income Summary	18,000	
	Retained Earnings		18,000
	(To close net income to retained earnings)		
31	Retained Earnings	15,000	
	Dividends		15,000
	(To close dividends to retained earnings)

LEARNING
OBJECTIVE

3

Explain the steps in the accounting cycle and how to prepare correcting entries.

Summary of the Accounting Cycle

Illustration 4-11 summarizes the steps in the accounting cycle. You can see that the cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance.

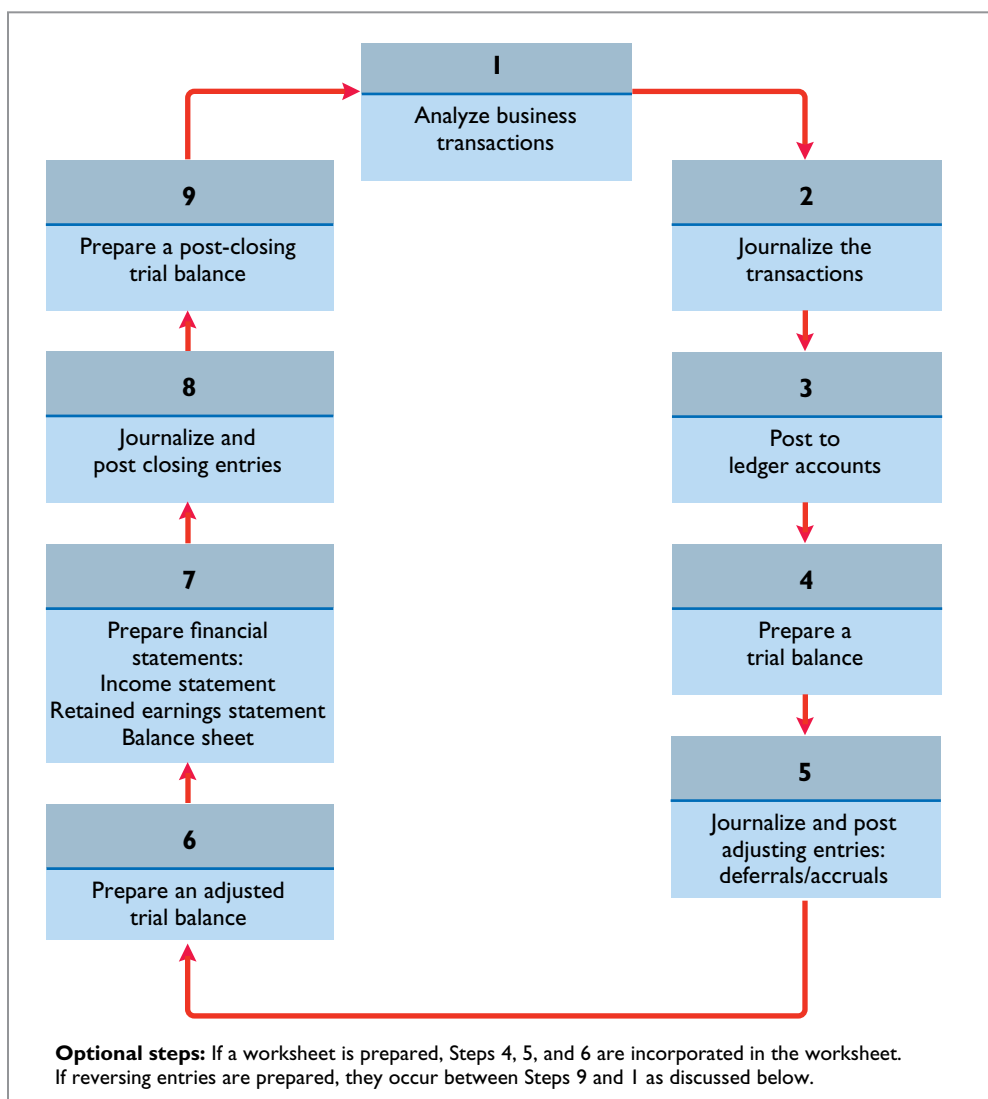

Illustration 4-11
Steps in the accounting cycle

Steps 1–3 may occur daily during the accounting period. Companies perform Steps 4–7 on a periodic basis, such as monthly, quarterly, or annually. Steps 8 and 9—closing entries and a post-closing trial balance—usually take place only at the end of a company's **annual** accounting period.

There are also two **optional steps** in the accounting cycle. As you have seen, companies may use a worksheet in preparing adjusting entries and financial statements. In addition, they may use reversing entries, as explained below.

Reversing Entries—An Optional Step

Some accountants prefer to reverse certain adjusting entries by making a **reversing entry** at the beginning of the next accounting period. A reversing entry is the

exact opposite of the adjusting entry made in the previous period. **Use of reversing entries is an optional bookkeeping procedure; it is not a required step in the accounting cycle.** Accordingly, we have chosen to cover this topic in Appendix 4A at the end of this chapter.

Correcting Entries—An Avoidable Step

Unfortunately, errors may occur in the recording process. Companies should correct errors, **as soon as they discover them**, by journalizing and posting **correcting entries**. If the accounting records are free of errors, no correcting entries are needed.

You should recognize several differences between correcting entries and adjusting entries. First, adjusting entries are an integral part of the accounting cycle. Correcting entries, on the other hand, are unnecessary if the records are error-free. Second, companies journalize and post adjustments **only at the end of an accounting period**. In contrast, companies make correcting entries **whenever they discover an error**. Finally, adjusting entries always affect at least one balance sheet account and one income statement account. In contrast, correcting entries may involve any combination of accounts in need of correction.

Correcting entries must be posted before closing entries.

To determine the correcting entry, it is useful to compare the incorrect entry with the correct entry. Doing so helps identify the accounts and amounts that should—and should not—be corrected. After comparison, the accountant makes an entry to correct the accounts. The following two cases for Mercato Co. illustrate this approach.

ETHICS NOTE

When companies find errors in previously released income statements, they restate those numbers. Perhaps because of the increased scrutiny caused by Sarbanes-Oxley, in a recent year companies filed a record 1,195 restatements.

CASE 1

On May 10, Mercato Co. journalized and posted a \$50 cash collection on account from a customer as a debit to Cash \$50 and a credit to Service Revenue \$50. The company discovered the error on May 20, when the customer paid the remaining balance in full.

Illustration 4-12
Comparison of entries

Incorrect Entry (May 10)			Correct Entry (May 10)		
Cash	50		Cash	50	
Service Revenue		50	Accounts Receivable		50

Comparison of the incorrect entry with the correct entry reveals that the debit to Cash \$50 is correct. However, the \$50 credit to Service Revenue should have been credited to Accounts Receivable. As a result, both Service Revenue and Accounts Receivable are overstated in the ledger. Mercato makes the following correcting entry.

Illustration 4-13
Correcting entry

A	=	L	+	SE
				-50 Rev
<hr/>				
-50				
Cash Flows				
no effect				

Correcting Entry					
May 20	Service Revenue		50		
	Accounts Receivable				50
	(To correct entry of May 10)				

CASE 2

On May 18, Mercato purchased on account equipment costing \$450. The transaction was journalized and posted as a debit to Equipment \$45 and a credit to Accounts Payable \$45. The error was discovered on June 3, when Mercato received the monthly statement for May from the creditor.

Illustration 4-14
Comparison of entries

Incorrect Entry (May 18)			Correct Entry (May 18)		
Equipment	45		Equipment	450	
Accounts Payable		45	Accounts Payable		450

Comparison of the two entries shows that two accounts are incorrect. Equipment is understated \$405, and Accounts Payable is understated \$405. Mercato makes the following correcting entry.

<u>Correcting Entry</u>			
June 3	Equipment Accounts Payable (To correct entry of May 18)	405	405

A	=	L	+	SE
+405				+405

Cash Flows
no effect

Instead of preparing a correcting entry, **it is possible to reverse the incorrect entry and then prepare the correct entry.** This approach will result in more entries and postings than a correcting entry, but it will accomplish the desired result.

Illustration 4-15
Correcting entry

Accounting Across the Organization Yale Express

© Christian Lagereek/iStockphoto

Lost in Transportation

Yale Express, a short-haul trucking firm, turned over much of its cargo to local truckers to complete deliveries. Yale collected the entire delivery charge. When billed by the local trucker, Yale sent payment for the final phase to the local trucker. Yale used a cutoff period of 20 days into the next accounting period in making its adjusting entries for accrued liabilities. That is, it waited 20 days to receive the local truckers' bills to determine the amount of the unpaid but incurred delivery charges as of the balance sheet date.

On the other hand, **Republic Carloading**, a nationwide, long-distance freight forwarder, frequently did not receive transportation bills from truckers to whom it passed on cargo until months after the year-end. In making its year-end adjusting entries, Republic waited for months in order to include all of these outstanding transportation bills.

When Yale Express merged with Republic Carloading, Yale's vice president employed the 20-day cutoff procedure for both firms. As a result, millions of dollars of Republic's accrued transportation bills went unrecorded. When the company detected the error and made correcting entries, these and other errors changed a reported profit of \$1.14 million into a loss of \$1.88 million!

What might Yale Express's vice president have done to produce more accurate financial statements without waiting months for Republic's outstanding transportation bills? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT! 3 Correcting Entries

Sanchez Company discovered the following errors made in January 2017.

1. A payment of Salaries and Wages Expense of \$600 was debited to Supplies and credited to Cash, both for \$600.
2. A collection of \$3,000 from a client on account was debited to Cash \$200 and credited to Service Revenue \$200.
3. The purchase of supplies on account for \$860 was debited to Supplies \$680 and credited to Accounts Payable \$680.

Correct the errors without reversing the incorrect entry.

Solution

1. Salaries and Wages Expense	600		
Supplies		600	
2. Service Revenue	200		
Cash	2,800		
Accounts Receivable			3,000
3. Supplies (\$860 – \$680)	180		
Accounts Payable			180

Action Plan

- ✓ Compare the incorrect entry with correct entry.
- ✓ After comparison, make an entry to correct the accounts.

Related exercise material: **BE4-9, E4-12, E4-13, and DO IT! 4-3.**

Identify the sections of a classified balance sheet.

The balance sheet presents a snapshot of a company's financial position at a point in time. To improve users' understanding of a company's financial position, companies often use a classified balance sheet. A **classified balance sheet** groups together similar assets and similar liabilities, using a number of standard classifications and sections. This is useful because items within a group have similar economic characteristics. A classified balance sheet generally contains the standard classifications listed in Illustration 4-16.

Illustration 4-16

Standard balance sheet classifications

<u>Assets</u>	<u>Liabilities and Stockholders' Equity</u>
Current assets	Current liabilities
Long-term investments	Long-term liabilities
Property, plant, and equipment	Stockholders' equity
Intangible assets	

These groupings help financial statement readers determine such things as (1) whether the company has enough assets to pay its debts as they come due, and (2) the claims of short- and long-term creditors on the company's total assets. Many of these groupings can be seen in the balance sheet of Franklin Corporation shown in Illustration 4-17. In the sections that follow, we explain each of these groupings.

Current Assets

Current assets are assets that a company expects to convert to cash or use up within one year or its operating cycle, whichever is longer. In Illustration 4-17, Franklin Corporation had current assets of \$22,100. For most businesses, the cutoff for classification as current assets is one year from the balance sheet date. For example, accounts receivable are current assets because the company will collect them and convert them to cash within one year. Supplies is a current asset because the company expects to use them up in operations within one year.

Some companies use a period longer than one year to classify assets and liabilities as current because they have an operating cycle longer than one year. The **operating cycle** of a company is the average time that it takes to purchase inventory, sell it on account, and then collect cash from customers. For most businesses, this cycle takes less than a year so they use a one-year cutoff. But for some businesses, such as vineyards or airplane manufacturers, this period may be longer than a year. **Except where noted, we will assume that companies use one year to determine whether an asset or liability is current or long-term.**

Common types of current assets are (1) cash, (2) investments (such as short-term U.S. government securities), (3) receivables (notes receivable, accounts receivable, and interest receivable), (4) inventories, and (5) prepaid expenses (supplies and insurance). **On the balance sheet, companies usually list these items in the order in which they expect to convert them into cash.** Illustration 4-18 presents the current assets of **Southwest Airlines Co.**

Long-Term Investments

Alternative Terminology

Long-term investments are often referred to simply as *investments*.

Long-term investments are generally (1) investments in stocks and bonds of other companies that are normally held for many years, (2) long-term assets such as land or buildings that a company is not currently using in its operating activities, and (3) long-term notes receivable. In Illustration 4-17, Franklin Corporation reported total long-term investments of \$7,200 on its balance sheet.

Yahoo! Inc. reported long-term investments in its balance sheet, as shown in Illustration 4-19.

Illustration 4-19

Long-term investments section

YAHOO! INC. Balance Sheet (partial) (in thousands)	
Long-term investments	
Investments in securities	\$90,266

Alternative Terminology

Property, plant, and equipment is sometimes called *fixed assets* or *plant assets*.

Property, Plant, and Equipment

Property, plant, and equipment are assets with relatively long useful lives that a company is currently using in operating the business. This category includes land, buildings, machinery and equipment, delivery equipment, and furniture.

In Illustration 4-17, Franklin Corporation reported property, plant, and equipment of \$29,000.

Depreciation is the practice of allocating the cost of assets to a number of years. Companies do this by systematically assigning a portion of an asset's cost as an expense each year (rather than expensing the full purchase price in the year of purchase). The assets that the company depreciates are reported on the balance sheet at cost less accumulated depreciation. The **accumulated depreciation** account shows the total amount of depreciation that the company has expensed thus far in the asset's life. In Illustration 4-17, Franklin Corporation reported accumulated depreciation of \$5,000.

Illustration 4-20 presents the property, plant, and equipment of **Cooper Tire & Rubber Company**.

International Note

Recently, China adopted International Financial Reporting Standards (IFRS). This was done in an effort to reduce fraud and increase investor confidence in financial reports. Under these standards, many items, such as property, plant, and equipment, may be reported at current fair values rather than historical cost.

Illustration 4-20

Less: Accumulated depreciation		<u>1,252,692</u>
		\$ 991,816

Helpful Hint

Sometimes intangible assets are reported under a broader heading called "Other assets."

Intangible Assets

Many companies have long-lived assets that do not have physical substance yet often are very valuable. We call these assets **intangible assets**. One significant intangible asset is goodwill. Others include patents, copyrights, and trademarks

or trade names that give the company **exclusive right** of use for a specified period of time. In Illustration 4-17, Franklin Corporation reported intangible assets of \$3,100.

Illustration 4-21 shows the intangible assets of media giant Time Warner, Inc.

People, Planet, and Profit Insight

© Gehring/iStockphoto

Regaining Goodwill

After falling to unforeseen lows amidst scandals, recalls, and economic crises, the American public's positive perception of the reputation of corporate America is on the rise. Overall corporate reputation is experiencing rehabilitation as the American public gives high marks overall to corporate America, specific industries, and the largest number of

individual companies in a dozen years. This is according to the findings of the *2011 Harris Interactive RQ Study*, which measures the reputations of the 60 most visible companies in the United States.

The survey focuses on six reputational dimensions that influence reputation and consumer behavior. Four of these

dimensions, along with the five corporations that ranked highest within each, are as follows.

- **Social Responsibility:** (1) Whole Foods Market, (2) Johnson & Johnson, (3) Google, (4) The Walt Disney Company, (5) Procter & Gamble Co.
- **Emotional Appeal:** (1) Johnson & Johnson, (2) Amazon.com, (3) UPS, (4) General Mills, (5) Kraft Foods
- **Financial Performance:** (1) Google, (2) Berkshire Hathaway, (3) Apple, (4) Intel, (5) The Walt Disney Company
- **Products and Services:** (1) Intel Corporation, (2) 3M Company, (3) Johnson & Johnson, (4) Google, (5) Procter & Gamble Co.

Source: www.harrisinteractive.com.

Name two industries today which are probably rated low on the reputational characteristics of "being trusted" and "having high ethical standards." (Go to **WileyPLUS** for this answer and additional questions.)

Current Liabilities

In the liabilities and stockholders' equity section of the balance sheet, the first grouping is current liabilities. **Current liabilities** are obligations that the company is to pay within the coming year or its operating cycle, whichever is longer. Common examples are accounts payable, salaries and wages payable, notes payable, interest payable, and income taxes payable. Also included as current liabilities are current maturities of long-term obligations—payments to be made within the next year on long-term obligations. In Illustration 4-17, Franklin Corporation reported five different types of current liabilities, for a total of \$16,050.

Illustration 4-22 (page 172) shows the current liabilities section adapted from the balance sheet of **Marcus Corporation**.

ETHICS NOTE

A company that has more current assets than current liabilities can increase the ratio of current assets to current liabilities by using cash to pay off some current liabilities. This gives the appearance of being more liquid. Do you think this move is ethical?

Illustration 4-22
Current liabilities section

MARCUS CORPORATION	
Balance Sheet (partial)	
(in thousands)	
Current liabilities	
Notes payable	\$ 239
Accounts payable	24,242
Current maturities of long-term debt	57,250
Other current liabilities	27,477
Income taxes payable	11,215
Salaries and wages payable	6,720
Total current liabilities	\$127,143

Users of financial statements look closely at the relationship between current assets and current liabilities. This relationship is important in evaluating a company's **liquidity**—its ability to pay obligations expected to be due within the next year. When current assets exceed current liabilities, the likelihood for paying the liabilities is favorable. When the reverse is true, short-term creditors may not be paid, and the company may ultimately be forced into bankruptcy.

Accounting Across the Organization

REL Consultancy Group

© Jorge Salcedo/iStockphoto

Can a Company Be Too Liquid?

There actually is a point where a company can be too liquid—that is, it can have too much working capital (current assets less current liabilities). While it is important to be liquid enough to be able to pay short-term bills as they come due, a company does not want to tie up its cash in extra inventory or receivables that are not earning the company money.

By one estimate from the **REL Consultancy Group**, the thousand largest U.S. companies have on their books cumulative excess working capital of \$764 billion. Based on this figure, companies could have reduced debt by 36% or increased net income by 9%. Given that managers throughout a company are interested in improving profitability, it is clear that they should have an eye toward managing working capital. They need to aim for a “Goldilocks solution”—not too much, not too little, but just right.

Source: K. Richardson, “Companies Fall Behind in Cash Management,” *Wall Street Journal* (June 19, 2007).

What can various company managers do to ensure that working capital is managed efficiently to maximize net income? (Go to **WileyPLUS** for this answer and additional questions.)

Long-Term Liabilities

Long-term liabilities are obligations that a company expects to pay **after** one year. Liabilities in this category include bonds payable, mortgages payable, long-term notes payable, lease liabilities, and pension liabilities. Many companies report long-term debt maturing after one year as a single amount in the balance sheet and show the details of the debt in notes that accompany the financial statements. Others list the various types of long-term liabilities. In Illustration 4-17, Franklin Corporation reported long-term liabilities of \$11,300.

Illustration 4-23 shows the long-term liabilities that **The Procter & Gamble Company** reported in its balance sheet.

Stockholders' (Owners') Equity

The content of the owners' equity section varies with the form of business organization. In a proprietorship, there is one capital account. In a partnership, there is a capital account for each partner. Corporations divide owners' equity into two accounts—Common Stock (sometimes referred to as Capital Stock) and

Alternative Terminology
Common stock is sometimes called *capital stock*.

_____ Debt investments (short-term)	_____ Common stock
_____ Mortgage payable (due in 3 years)	_____ Unearned service revenue

Match each of the accounts to its proper balance sheet classification, shown below. If the item would not appear on a balance sheet, use "NA."

Current assets (CA)

Long-term investments (LTI)

Property, plant, and equipment (PPE)

Intangible assets (IA)

Current liabilities (CL)

Long-term liabilities (LTL)

Stockholders' equity (SE)

Solution

<u>CL</u> Salaries and wages payable	<u>LTI</u> Stock investments (long-term)
<u>NA</u> Service revenue	<u>PPE</u> Equipment
<u>CL</u> Interest payable	<u>PPE</u> Accumulated depreciation— equipment
<u>IA</u> Goodwill	<u>NA</u> Depreciation expense
<u>CA</u> Debt investments (short-term)	<u>SE</u> Common stock
<u>LTL</u> Mortgage payable (due in 3 years)	<u>CL</u> Unearned service revenue

Action Plan

- ✓ Analyze whether each financial statement item is an asset, liability, or stockholders' equity.
- ✓ Determine if asset and liability items are short-term or long-term.

APPENDIX 4A: Prepare reversing entries.

After preparing the financial statements and closing the books, it is often helpful to reverse some of the adjusting entries before recording the regular transactions of the next period. Such entries are **reversing entries**. Companies make **a reversing entry at the beginning of the next accounting period**. Each reversing entry **is the exact opposite of the adjusting entry made in the previous period**. The recording of reversing entries is an **optional step** in the accounting cycle.

The purpose of reversing entries is to simplify the recording of a subsequent transaction related to an adjusting entry. For example, in Chapter 3 (page 110), the payment of salaries after an adjusting entry resulted in two debits: one to Salaries and Wages Payable and the other to Salaries and Wages Expense. With reversing entries, the company can debit the entire subsequent payment to Salaries and Wages Expense. **The use of reversing entries does not change the amounts reported in the financial statements.** What it does is simplify the recording of subsequent transactions.

Reversing Entries Example

Companies most often use reversing entries to reverse two types of adjusting entries: accrued revenues and accrued expenses. To illustrate the optional use of reversing entries for accrued expenses, we will use the salaries expense transactions for Pioneer Advertising Inc. as illustrated in Chapters 2, 3, and 4. The transaction and adjustment data are as follows.

1. October 26 (initial salary entry): Pioneer pays \$4,000 of salaries and wages earned between October 15 and October 26.
2. October 31 (adjusting entry): Salaries and wages earned between October 29 and October 31 are \$1,200. The company will pay these in the November 9 payroll.
3. November 9 (subsequent salary entry): Salaries and wages paid are \$4,000. Of this amount, \$1,200 applied to accrued salaries and wages payable and \$2,800 was earned between November 1 and November 9.

Illustration 4A-1 shows the entries with and without reversing entries.

Illustration 4A-1

Comparative entries—not reversing vs. reversing

Without Reversing Entries (per chapter)				With Reversing Entries (per appendix)			
<u>Initial Salary Entry</u>				<u>Initial Salary Entry</u>			
Oct. 26	Salaries and Wages Expense	4,000		Oct. 26	(Same entry)		
	Cash		4,000				
<u>Adjusting Entry</u>				<u>Adjusting Entry</u>			
Oct. 31	Salaries and Wages Expense	1,200		Oct. 31	(Same entry)		
	Salaries and Wages Payable		1,200				
<u>Closing Entry</u>				<u>Closing Entry</u>			
Oct. 31	Income Summary	5,200		Oct. 31	(Same entry)		
	Salaries and Wages Expense		5,200				
<u>Reversing Entry</u>				<u>Reversing Entry</u>			
Nov. 1	No reversing entry is made.			Nov. 1	Salaries and Wages Payable	1,200	
					Salaries and Wages Expense		1,200
<u>Subsequent Salary Entry</u>				<u>Subsequent Salary Entry</u>			
Nov. 9	Salaries and Wages Payable	1,200		Nov. 9	Salaries and Wages Expense	4,000	
	Salaries and Wages Expense	2,800			Cash		4,000
	Cash		4,000				

The first three entries are the same whether or not Pioneer uses reversing entries. The last two entries are different. The November 1 **reversing entry** eliminates the \$1,200 balance in Salaries and Wages Payable created by the October 31 adjusting entry. The reversing entry also creates a \$1,200 credit balance in the Salaries and Wages Expense account. As you know, it is unusual for an expense account to have a credit balance. The balance is correct in this instance, though, because it anticipates that the entire amount of the first salaries and wages payment in the new accounting period will be debited to Salaries and Wages Expense. This debit will eliminate the credit balance. The resulting debit balance in the expense account will equal the salaries and wages expense incurred in the new accounting period (\$2,800 in this example).

If Pioneer makes reversing entries, it can debit all cash payments of expenses to the expense account. This means that on November 9 (and every payday) Pioneer can debit Salaries and Wages Expense for the amount paid, without regard to any accrued salaries and wages payable. Being able to make the **same entry each time** simplifies the recording process. The company can record subsequent transactions as if the related adjusting entry had never been made.

Illustration 4A-2 shows the posting of the entries with reversing entries.

Salaries and Wages Expense				Salaries and Wages Payable			
10/26	Paid	4,000		10/31	Closing	5,200	
	31	Adjusting	1,200				
			5,200				5,200
11/9	Paid	4,000		11/1	Reversing	1,200	
				10/31	Adjusting		1,200

Illustration 4A-2
Postings with reversing entries

A company can also use reversing entries for accrued revenue adjusting entries. For Pioneer, the adjusting entry was Accounts Receivable (Dr.) \$200 and Service Revenue (Cr.) \$200. Thus, the reversing entry on November 1 is:

Nov. 1	Service Revenue	200	
	Accounts Receivable		200
	(To reverse October 31 adjusting entry)		

When Pioneer collects the accrued service revenue, it debits Cash and credits Service Revenue.

A	=	L	+	SE
				-200 Rev
-200				

Cash Flows
no effect

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 Prepare a worksheet.** The steps in preparing a worksheet are as follows. (a) Prepare a trial balance on the worksheet. (b) Enter the adjustments in the adjustments columns. (c) Enter adjusted balances in the adjusted trial balance columns. (d) Extend adjusted trial balance amounts to appropriate financial statement columns. (e) Total the statement columns, compute net income (or net loss), and complete the worksheet.
- 2 Prepare closing entries and a post-closing trial balance.** Closing the books occurs at the end of an accounting period. The process is to journalize and post closing entries and then underline and balance all accounts.

In closing the books, companies make separate entries to close revenues and expenses to Income Summary, Income Summary to Retained Earnings, and Dividends to Retained Earnings. Only temporary accounts are closed. A post-closing trial balance contains the balances in permanent accounts that are carried forward to the next accounting period. The purpose of this trial balance is to prove the equality of these balances.

- 3 **Explain the steps in the accounting cycle and how to prepare correcting entries.** The required steps in the accounting cycle are (1) analyze business transactions, (2) journalize the transactions, (3) post to ledger accounts, (4) prepare a trial balance, (5) journalize and post adjusting entries, (6) prepare an adjusted trial balance, (7) prepare financial statements, (8) journalize and post closing entries, and (9) prepare a post-closing trial balance.

One way to determine the correcting entry is to compare the incorrect entry with the correct entry.

After comparison, the company makes a correcting entry to correct the accounts. An alternative to a correcting entry is to reverse the incorrect entry and then prepare the correct entry.

- 4 **Identify the sections of a classified balance sheet.** A classified balance sheet categorizes assets as current assets; long-term investments; property, plant, and equipment; and intangibles. Liabilities are classified as either current or long-term. There is also a stockholders' (owners') equity section, which varies with the form of business organization.

- *5 **Prepare reversing entries.** Reversing entries are the opposite of the adjusting entries made in the preceding period. Some companies choose to make reversing entries at the beginning of a new accounting period to simplify the recording of later transactions related to the adjusting entries. In most cases, only accrued adjusting entries are reversed.

GLOSSARY REVIEW

Classified balance sheet A balance sheet that contains standard classifications or sections. (p. 168).

Closing entries Entries made at the end of an accounting period to transfer the balances of temporary accounts to a permanent stockholders' equity account, Retained Earnings. (p. 158).

Correcting entries Entries to correct errors made in recording transactions. (p. 166).

Current assets Assets that a company expects to convert to cash or use up within one year. (p. 168).

Current liabilities Obligations that a company expects to pay within the coming year or its operating cycle, whichever is longer. (p. 171).

Income Summary A temporary account used in closing revenue and expense accounts. (p. 158).

Intangible assets Noncurrent assets that do not have physical substance. (p. 170).

Liquidity The ability of a company to pay obligations expected to be due within the next year. (p. 172).

Long-term investments Generally, (1) investments in stocks and bonds of other companies that companies normally hold for many years, and (2) long-term assets, such as land and buildings, not currently being used in operations. (p. 170).

Long-term liabilities Obligations that a company expects to pay after one year. (p. 172).

Operating cycle The average time that it takes to purchase inventory, sell it on account, and then collect cash from customers. (p. 168).

Permanent (real) accounts Accounts that relate to one or more future accounting periods. Consist of all balance sheet accounts. Balances are carried forward to the next accounting period. (p. 157).

Post-closing trial balance A list of permanent accounts and their balances after a company has journalized and posted closing entries. (p. 162).

Property, plant, and equipment Assets with relatively long useful lives and currently being used in operations. (p. 170).

Reversing entry An entry, made at the beginning of the next accounting period that is the exact opposite of the adjusting entry made in the previous period. (p. 165).

Stockholders' equity The ownership claim of shareholders on total assets. It is to a corporation what owner's equity is to a proprietorship. (p. 173).

Temporary (nominal) accounts Accounts that relate only to a given accounting period. Consist of all income statement accounts and the Dividends account. All temporary accounts are closed at the end of the accounting period. (p. 157).

Worksheet A multiple-column form that may be used in making adjusting entries and in preparing financial statements. (p. 152).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following statements is **incorrect** concerning the worksheet?
- (a) The worksheet is essentially a working tool of the accountant.

- (b) The worksheet is distributed to management and other interested parties.
- (c) The worksheet cannot be used as a basis for posting to ledger accounts.

- (d) Financial statements can be prepared directly from the worksheet before journalizing and posting the adjusting entries.
- (LO 1) 2. In a worksheet, net income is entered in the following columns:
- income statement (Dr) and balance sheet (Dr).
 - income statement (Cr) and balance sheet (Dr).
 - income statement (Dr) and balance sheet (Cr).
 - income statement (Cr) and balance sheet (Cr).
- (LO 1) 3. In the unadjusted trial balance of its worksheet for the year ended December 31, 2017, Knox Company reported Equipment of \$120,000. The year-end adjusting entries require an adjustment of \$15,000 for depreciation expense for the equipment. After the adjusted trial balance is completed, what amount should be shown in the financial statement columns?
- A debit of \$105,000 for Equipment in the balance sheet column.
 - A credit of \$15,000 for Depreciation Expense—Equipment in the income statement column.
 - A debit of \$120,000 for Equipment in the balance sheet column.
 - A debit of \$15,000 for Accumulated Depreciation—Equipment in the balance sheet column.
- (LO 2) 4. An account that will have a zero balance after closing entries have been journalized and posted is:
- Service Revenue.
 - Supplies.
 - Prepaid Insurance.
 - Accumulated Depreciation—Equipment.
- (LO 2) 5. When a net loss has occurred, Income Summary is:
- debited and Retained Earnings is credited.
 - credited and Retained Earnings is debited.
 - debited and Dividends is credited.
 - credited and Dividends is debited.
- (LO 2) 6. The closing process involves separate entries to close (1) expenses, (2) dividends, (3) revenues, and (4) income summary. The correct sequencing of the entries is:
- (4), (3), (2), (1).
 - (1), (2), (3), (4).
 - (3), (1), (4), (2).
 - (3), (2), (1), (4).
- (LO 2) 7. Which types of accounts will appear in the post-closing trial balance?
- Permanent (real) accounts.
 - Temporary (nominal) accounts.
 - Accounts shown in the income statement columns of a worksheet.
 - None of these answer choices is correct.
- (LO 3) 8. All of the following are required steps in the accounting cycle **except**:
- journalizing and posting closing entries.
 - preparing financial statements.
 - journalizing the transactions.
 - preparing a worksheet.
- (LO 3) 9. The proper order of the following steps in the accounting cycle is:
- prepare unadjusted trial balance, journalize transactions, post to ledger accounts, journalize and post adjusting entries.
 - journalize transactions, prepare unadjusted trial balance, post to ledger accounts, journalize and post adjusting entries.
 - journalize transactions, post to ledger accounts, prepare unadjusted trial balance, journalize and post adjusting entries.
 - prepare unadjusted trial balance, journalize and post adjusting entries, journalize transactions, post to ledger accounts.
10. When Ramirez Company purchased supplies worth \$500, it incorrectly recorded a credit to Supplies for \$5,000 and a debit to Cash for \$5,000. Before correcting this error:
- Cash is overstated and Supplies is overstated.
 - Cash is understated and Supplies is understated.
 - Cash is understated and Supplies is overstated.
 - Cash is overstated and Supplies is understated.
11. Cash of \$100 received at the time the service was performed was journalized and posted as a debit to Cash \$100 and a credit to Accounts Receivable \$100. Assuming the incorrect entry is not reversed, the correcting entry is:
- debit Service Revenue \$100 and credit Accounts Receivable \$100.
 - debit Accounts Receivable \$100 and credit Service Revenue \$100.
 - debit Cash \$100 and credit Service Revenue \$100.
 - debit Accounts Receivable \$100 and credit Cash \$100.
12. The correct order of presentation in a classified balance sheet for the following current assets is:
- accounts receivable, cash, prepaid insurance, inventory.
 - cash, inventory, accounts receivable, prepaid insurance.
 - cash, accounts receivable, inventory, prepaid insurance.
 - inventory, cash, accounts receivable, prepaid insurance.
13. A company has purchased a tract of land. It expects to build a production plant on the land in approximately 5 years. During the 5 years before construction, the land will be idle. The land should be reported as:
- property, plant, and equipment.
 - land expense.
 - a long-term investment.
 - an intangible asset.
14. In a classified balance sheet, assets are usually classified using the following categories:
- current assets; long-term assets; property, plant, and equipment; and intangible assets.
 - current assets; long-term investments; property, plant, and equipment; and tangible assets.
 - current assets; long-term investments; tangible assets; and intangible assets.
 - current assets; long-term investments; property, plant, and equipment; and intangible assets.
15. Current assets are listed:
- by expected conversion to cash.
 - by importance.
 - by longevity.
 - alphabetically.
- *16. On December 31, Kevin Hartman Company correctly made an adjusting entry to recognize \$2,000 of accrued salaries payable. On January 8 of the next year, total salaries of \$3,400 were paid. Assuming the correct reversing entry was made on January 1, the

entry on January 8 will result in a credit to Cash \$3,400 and the following debit(s):

(a) Salaries and Wages Payable \$1,400 and Salaries and Wages Expense \$2,000.

(b) Salaries and Wages Payable \$2,000 and Salaries and Wages Expense \$1,400.

(c) Salaries and Wages Expense \$3,400.

(d) Salaries and Wages Payable \$3,400.

Solutions

1. **(b)** The worksheet is a working tool of the accountant; it is not distributed to management and other interested parties. The other choices are all true statements.
2. **(c)** Net income is entered in the Dr column of the income statement and the Cr column of the balance sheet. The other choices are incorrect because net income is entered in the (a) Cr (not Dr) column of the balance sheet, (b) Dr (not Cr) column of the income statement and in the Cr (not Dr) column of the balance sheet, and (d) Dr (not Cr) column of the income statement.
3. **(c)** A debit of \$120,000 for Equipment would appear in the balance sheet column. The other choices are incorrect because (a) Equipment, less accumulated depreciation of \$15,000, would total \$105,000 under assets on the balance sheet, not on the worksheet; (b) a debit, not credit, for Depreciation Expense would appear in the income statement column; and (d) a credit, not debit, of \$15,000 for Accumulated Depreciation—Equipment would appear in the balance sheet column.
4. **(a)** The Service Revenue account will have a zero balance after closing entries have been journalized and posted because it is a temporary account. The other choices are incorrect because (b) Supplies, (c) Prepaid Insurance, and (d) Accumulation Depreciation—Equipment are all permanent accounts and therefore not closed in the closing process.
5. **(b)** The effect of a net loss is a credit to Income Summary and a debit to Retained Earnings. The other choices are incorrect because (a) Income Summary is credited, not debited, and Retained Earnings is debited, not credited; (c) Income Summary is credited, not debited, and Dividends is not affected; and (d) Retained Earnings, not Dividends, is debited.
6. **(c)** The correct order is (3) revenues, (1) expenses, (4) income summary and (2) dividends. Therefore, choices (a), (b), and (d) are incorrect.
7. **(a)** Permanent accounts appear in the post-closing trial balance. The other choices are incorrect because (b) temporary accounts and (c) income statement accounts are closed to a zero balance and are therefore not included in the post-closing trial balance. Choice (d) is wrong as there is only one correct answer for this question.
8. **(d)** Preparing a worksheet is not a required step in the accounting cycle. The other choices are all required steps in the accounting cycle.
9. **(c)** The proper order of the steps in the accounting cycle is (1) journalize transactions, (2) post to ledger accounts, (3) prepare unadjusted trial balance, and (4) journalize and post adjusting entries. Therefore, choices (a), (b), and (d) are incorrect.
10. **(d)** This entry causes Cash to be overstated and Supplies to be understated. Supplies should have been debited (increasing supplies) and Cash should have been credited (decreasing cash). The other choices are incorrect because (a) Supplies is understated, not overstated; (b) Cash is overstated, not understated; and (c) Cash is overstated, not understated, and Supplies is understated, not overstated.
11. **(b)** The correcting entry is to debit Accounts Receivable \$100 and credit Service Revenue \$100. The other choices are incorrect because (a) Service Revenue should be credited, not debited, and Accounts Receivable should be debited, not credited; (c) Service Revenue should be credited for \$100, and Cash should not be included in the correcting entry as it was recorded properly; and (d) Accounts Receivable should be debited for \$100 and Cash should not be included in the correcting entry as it was recorded properly.
12. **(c)** Companies list current assets on balance sheet in the order of liquidity: cash, accounts receivable, inventory, and prepaid insurance. Therefore, choices (a), (b), and (d) are incorrect.
13. **(c)** Long-term investments include long-term assets such as land that a company is not currently using in its operating activities. The other choices are incorrect because (a) land would be reported as property, plant, and equipment only if it is being currently used in the business; (b) land is an asset, not an expense; and (d) land has physical substance and thus is a tangible property.
14. **(d)** These are the categories usually used in a classified balance sheet. The other choices are incorrect because the categories (a) “long-term assets” and (b) and (c) “tangible assets” are generally not used.
15. **(a)** Current assets are listed in order of their liquidity, not (b) by importance, (c) by longevity, or (d) alphabetically.
- *16. **(c)** The use of reversing entries simplifies the recording of the first payroll following the end of the year by eliminating the need to make an entry to the Salaries and Wages Payable account. The other choices are incorrect because (a) Salaries and Wages Payable is not part of the payroll entry on January 8, and the debit to Salaries and Wages Expense should be for \$3,400, not \$2,000; and (b) and (d) the Salaries and Wages Expense account, not the Salaries and Wages Payable account, should be debited.

PRACTICE EXERCISES

1. Arapaho Company ended its fiscal year on July 31, 2017. The company's adjusted trial balance as of the end of its fiscal year is as shown below.

Journalize and post closing entries, and prepare a post-closing trial balance.

(LO 2)

ARAPAHO COMPANY Adjusted Trial Balance July 31, 2017

No.	Account Titles	Debit	Credit
101	Cash	\$ 15,940	
112	Accounts Receivable	8,580	
157	Equipment	16,900	
158	Accumulated Depreciation—Equipment		\$ 7,500
201	Accounts Payable		4,420
208	Unearned Rent Revenue		1,600
311	Common Stock		20,500
320	Retained Earnings		25,000
332	Dividends	14,000	
400	Service Revenue		64,000
429	Rent Revenue		5,500
711	Depreciation Expense	4,500	
726	Salaries and Wages Expense	54,700	
732	Utilities Expense	13,900	
		<u>\$128,520</u>	<u>\$128,520</u>

Instructions

- Prepare the closing entries using page J15 in a general journal.
- Post to Retained Earnings and No. 350 Income Summary accounts. (Use the three-column form.)
- Prepare a post-closing trial balance at July 31, 2017.

Solution

1. (a)

GENERAL JOURNAL					J15
Date	Account Titles	Ref.	Debit	Credit	
July 31	Service Revenue	400	64,000		
	Rent Revenue	429	5,500		
	Income Summary	350		69,500	
	(To close revenue accounts)				
31	Income Summary	350	73,100		
	Depreciation Expense	711		4,500	
	Salaries and Wages Expense	726		54,700	
	Utilities Expense	732		13,900	
	(To close expense accounts)				
31	Retained Earnings	320	3,600		
	Income Summary	350		3,600	
	(To close net loss to retained earnings)				
31	Retained Earnings	320	14,000		
	Dividends	332		14,000	
	(To close dividends to retained earnings)				

(b)

Retained Earnings						Income Summary					
No. 320						No. 350					
Date	Explanation	Ref.	Debit	Credit	Balance	Date	Explanation	Ref.	Debit	Credit	Balance
July 31	Balance				25,000	July 31	Close revenue	J15		69,500	69,500
31	Close net loss	J15	3,600		21,400	31	Close expenses	J15	73,100		(3,600)
31	Close dividends	J15	14,000		7,400	31	Close net loss	J15		3,600	0

(c)

ARAPAHO COMPANY Post-Closing Trial Balance July 31, 2017		
	Debit	Credit
Cash	\$15,940	
Accounts Receivable	8,580	
Equipment	16,900	
Accumulated Depreciation—Equipment		\$ 7,500
Accounts Payable		4,420
Unearned Rent Revenue		1,600
Common Stock		20,500
Retained Earnings		7,400
	<u>\$41,420</u>	<u>\$41,420</u>

Prepare financial statements.
(LO 4)

2. The adjusted trial balance for Arapaho Company is presented in **Practice Exercise 1**.

Instructions

- Prepare an income statement and a retained earnings statement for the year ended July 31, 2017.
- Prepare a classified balance sheet at July 31, 2017.

Solution

2. (a)

ARAPAHO COMPANY Income Statement For the Year Ended July 31, 2017		
Revenues		
Service revenue	\$64,000	
Rent revenue	<u>5,500</u>	
Total revenues		\$69,500
Expenses		
Salaries and wages expense	54,700	
Utilities expense	13,900	
Depreciation expense	<u>4,500</u>	
Total expenses		<u>73,100</u>
Net loss		<u>(\$ 3,600)</u>

ARAPAHO COMPANY Retained Earnings Statement For the Year Ended July 31, 2017		
Retained Earnings, August 1, 2016		\$25,000
Less: Net loss	\$ 3,600	
Dividends	<u>14,000</u>	17,600
Retained Earnings, July 31, 2017		<u>\$ 7,400</u>

(b)

ARAPAHO COMPANY		
Balance Sheet		
July 31, 2017		
<u>Assets</u>		
Current assets		
Cash	\$15,940	
Accounts receivable	<u>8,580</u>	
Total current assets		\$24,520
Property, plant, and equipment		
Equipment	16,900	
Less: Accumulated depreciation—equipment	<u>7,500</u>	<u>9,400</u>
Total assets		<u>\$33,920</u>
<u>Liabilities and Stockholders' Equity</u>		
Current liabilities		
Accounts payable	\$ 4,420	
Unearned rent revenue	<u>1,600</u>	
Total current liabilities		\$ 6,020
Stockholders' equity		
Common stock	20,500	
Retained earnings	<u>7,400</u>	
Total stockholders' equity		27,900
Total liabilities and stockholders' equity		<u>\$33,920</u>

PRACTICE PROBLEM

At the end of its first month of operations, Pampered Pet Service Inc. has the following unadjusted trial balance.

Prepare worksheet and classified balance sheet, and journalize closing entries.

(LO 1, 2, 4)

PAMPERED PET SERVICE INC.		
August 31, 2017		
Trial Balance		
	<u>Debit</u>	<u>Credit</u>
Cash	\$ 5,400	
Accounts Receivable	2,800	
Supplies	1,300	
Prepaid Insurance	2,400	
Equipment	60,000	
Notes Payable		\$40,000
Accounts Payable		2,400
Common Stock		30,000
Dividends	1,000	
Service Revenue		4,900
Salaries and Wages Expense	3,200	
Utilities Expense	800	
Advertising Expense	<u>400</u>	
	<u>\$77,300</u>	<u>\$77,300</u>

Other data:

1. Insurance expires at the rate of \$200 per month.
2. \$1,000 of supplies are on hand at August 31.
3. Monthly depreciation on the equipment is \$900.
4. Interest of \$500 on the notes payable has accrued during August.

Instructions

- (a) Prepare a worksheet.
- (b) Prepare a classified balance sheet assuming \$35,000 of the notes payable are long-term.
- (c) Journalize the closing entries.

Solution

(a)

PAMPERED PET SERVICE INC.
Worksheet for the Month Ended August 31, 2017

Account Titles	Trial Balance		Adjustments		Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	5,400				5,400				5,400	
Accounts Receivable	2,800				2,800				2,800	
Supplies	1,300			(b) 300	1,000				1,000	
Prepaid Insurance	2,400			(a) 200	2,200				2,200	
Equipment	60,000				60,000				60,000	
Notes Payable		40,000				40,000				40,000

QUESTIONS

1. "A worksheet is a permanent accounting record and its use is required in the accounting cycle." Do you agree? Explain.
2. Explain the purpose of the worksheet.
3. What is the relationship, if any, between the amount shown in the adjusted trial balance column for an account and that account's ledger balance?
4. If a company's revenues are \$125,000 and its expenses are \$113,000, in which financial statement columns of the worksheet will the net income of \$12,000 appear? When expenses exceed revenues, in which columns will the difference appear?
5. Why is it necessary to prepare formal financial statements if all of the data are in the statement columns of the worksheet?
6. Identify the account(s) debited and credited in each of the four closing entries, assuming the company has net income for the year.
7. Describe the nature of the Income Summary account and identify the types of summary data that may be posted to this account.
8. What are the content and purpose of a post-closing trial balance?
9. Which of the following accounts would not appear in the post-closing trial balance? Interest Payable; Equipment; Depreciation Expense; Dividends; Unearned Service Revenue; Accumulated Depreciation—Equipment; and Service Revenue.
10. Distinguish between a reversing entry and an adjusting entry. Are reversing entries required?
11. Indicate, in the sequence in which they are made, the three required steps in the accounting cycle that involve journalizing.
12. Identify, in the sequence in which they are prepared, the three trial balances that are often used to report financial information about a company.
13. How do correcting entries differ from adjusting entries?
14. What standard classifications are used in preparing a classified balance sheet?
15. What is meant by the term "operating cycle?"
16. Define current assets. What basis is used for arranging individual items within the current assets section?
17. Distinguish between long-term investments and property, plant, and equipment.
18. (a) What is the term used to describe the owners' equity section of a corporation? (b) Identify the two owners' equity accounts in a corporation and indicate the purpose of each.
19. Using **Apple's** annual report, determine its current liabilities at September 29, 2012, and September 28, 2013. Were current liabilities higher or lower than current assets in these two years?
- *20. Cigale Company prepares reversing entries. If the adjusting entry for interest payable is reversed, what type of an account balance, if any, will there be in Interest Payable and Interest Expense after the reversing entry is posted?
- *21. At December 31, accrued salaries payable totaled \$3,500. On January 10, total salaries of \$8,000 are paid. (a) Assume that reversing entries are made at January 1. Give the January 10 entry, and indicate the Salaries and Wages Expense account balance after the entry is posted. (b) Repeat part (a) assuming reversing entries are not made.

BRIEF EXERCISES

List the steps in preparing a worksheet.

(LO 1)

BE4-1 The steps in using a worksheet are presented in random order below. List the steps in the proper order by placing numbers 1–5 in the blank spaces.

- (a) ____ Prepare a trial balance on the worksheet.
- (b) ____ Enter adjusted balances.
- (c) ____ Extend adjusted balances to appropriate statement columns.
- (d) ____ Total the statement columns, compute net income (loss), and complete the worksheet.
- (e) ____ Enter adjustment data.

Prepare partial worksheet.

(LO 1)

BE4-2 The ledger of Clayton Company includes the following unadjusted balances: Prepaid Insurance \$3,000, Service Revenue \$58,000, and Salaries and Wages Expense \$25,000. Adjusting entries are required for (a) expired insurance \$1,800; (b) services performed \$1,100, but unbilled and uncollected; and (c) accrued salaries payable \$800.

Enter the unadjusted balances and adjustments into a worksheet and complete the worksheet for all accounts. (Note: You will need to add the following accounts: Accounts Receivable, Salaries and Wages Payable, and Insurance Expense.)

BE4-3 The following selected accounts appear in the adjusted trial balance columns of the worksheet for Goulet Company: Accumulated Depreciation—Equipment; Depreciation Expense; Common Stock; Dividends; Service Revenue; Supplies; and Accounts Payable. Indicate the financial statement column (income statement Dr., balance sheet Cr., etc.) to which each balance should be extended.

Identify worksheet columns for selected accounts.

(LO 1)

BE4-4 The ledger of Rios Company contains the following balances: Retained Earnings \$30,000; Dividends \$2,000; Service Revenue \$50,000; Salaries and Wages Expense \$27,000; and Supplies Expense \$7,000. Prepare the closing entries at December 31.

Prepare closing entries from ledger balances.

(LO 2)

BE4-5 Using the data in BE4-4, enter the balances in T-accounts, post the closing entries, and underline and balance the accounts.

Post closing entries; underline and balance T-accounts.

(LO 2)

BE4-6 The income statement for Weeping Willow Golf Club for the month ending July 31 shows Service Revenue \$16,400, Salaries and Wages Expense \$8,200, Maintenance and Repairs Expense \$2,500, and Net Income \$5,700. Prepare the entries to close the revenue and expense accounts. Post the entries to the revenue and expense accounts, and complete the closing process for these accounts using the three-column form of account.

Journalize and post closing entries using the three-column form of account.

(LO 2)

BE4-7 Using the data in BE4-3, identify the accounts that would be included in a post-closing trial balance.

Identify post-closing trial balance accounts.

(LO 2)

BE4-8 The steps in the accounting cycle are listed in random order below. List the steps in proper sequence, assuming no worksheet is prepared, by placing numbers 1–9 in the blank spaces.

List the required steps in the accounting cycle in sequence.

(LO 3)

- _____ Prepare a trial balance.
- _____ Journalize the transactions.
- _____ Journalize and post closing entries.
- _____ Prepare financial statements.
- _____ Journalize and post adjusting entries.
- _____ Post to ledger accounts.
- _____ Prepare a post-closing trial balance.
- _____ Prepare an adjusted trial balance.
- _____ Analyze business transactions.

BE4-9 At Creighton Company, the following errors were discovered after the transactions had been journalized and posted. Prepare the correcting entries.

Prepare correcting entries.

(LO 3)

- A collection on account from a customer for \$870 was recorded as a debit to Cash \$870 and a credit to Service Revenue \$870.
- The purchase of store supplies on account for \$1,570 was recorded as a debit to Supplies \$1,750 and a credit to Accounts Payable \$1,750.

BE4-10 The balance sheet debit column of the worksheet for Hamidi Company includes the following accounts: Accounts Receivable \$12,500, Prepaid Insurance \$3,600, Cash \$4,100, Supplies \$5,200, and Debt Investments (short-term) \$6,700. Prepare the current assets section of the balance sheet, listing the accounts in proper sequence.

Prepare the current assets section of a balance sheet.

(LO 4)

BE4-11 The following are the major balance sheet classifications:

Classify accounts on balance sheet.

- | | |
|--------------------------------------|-----------------------------|
| Current assets (CA) | Current liabilities (CL) |
| Long-term investments (LTI) | Long-term liabilities (LTL) |
| Property, plant, and equipment (PPE) | Stockholders' equity (SE) |
| Intangible assets (IA) | |

(LO 4)

Match each of the following accounts to its proper balance sheet classification.

_____ Accounts payable	_____ Income taxes payable
_____ Accounts receivable	_____ Debt investments (long-term)
_____ Accumulated depreciation—buildings	_____ Land
_____ Buildings	_____ Inventory
_____ Cash	_____ Patents
_____ Copyrights	_____ Supplies

Prepare reversing entries.
(LO 5)

***BE4-12** At October 31, Burgess Company made an accrued expense adjusting entry of \$2,100 for salaries. Prepare the reversing entry on November 1, and indicate the balances in Salaries and Wages Payable and Salaries and Wages Expense after posting the reversing entry.

DO IT! Exercises

Prepare a worksheet.
(LO 1)

DO IT! 4-1 Bradley Decker is preparing a worksheet. Explain to Bradley how he should extend the following adjusted trial balance accounts to the financial statement columns of the worksheet.

Service Revenue	Accounts Receivable
Notes Payable	Accumulated Depreciation
Common Stock	Utilities Expense

Prepare closing entries.
(LO 2)

DO IT! 4-2 The worksheet for Tsai Company shows the following in the financial statement columns.

Dividends	\$22,000
Common Stock	70,000
Net income	41,000

Prepare the closing entries at December 31 that affect stockholders' equity.

Prepare correcting entries.
(LO 3)

DO IT! 4-3 Hanson Company has an inexperienced accountant. During the first months on the job, the accountant made the following errors in journalizing transactions. All entries were posted as made.

- The purchase of supplies for \$650 cash was debited to Equipment \$210 and credited to Cash \$210.
- A \$500 withdrawal of cash for B. Hanson's personal use was debited to Salaries and Wages Expense \$900 and credited to Cash \$900.
- A payment on account of \$820 to a creditor was debited to Accounts Payable \$280 and credited to Cash \$280.

Prepare the correcting entries.

Match accounts to balance sheet classifications.
(LO 4)

DO IT! 4-4 The following accounts were taken from the financial statements of Lee Company.

_____ Interest revenue	_____ Common stock
_____ Utilities payable	_____ Accumulated depreciation—equipment
_____ Accounts payable	_____ Equipment
_____ Supplies	_____ Salaries and wages expense
_____ Bonds payable	_____ Debt investments (long-term)
_____ Goodwill	_____ Unearned rent revenue

Match each of the accounts to its proper balance sheet classification, as shown below. If the item would not appear on a balance sheet, use "NA."

Current assets (CA)	Current liabilities (CL)
Long-term investments (LTI)	Long-term liabilities (LTL)
Property, plant, and equipment (PPE)	Stockholders' equity (SE)
Intangible assets (IA)	

EXERCISES

E4-1 The trial balance columns of the worksheet for Nanduri Company at June 30, 2017, are as follows. *Complete the worksheet.* (LO 1)

NANDURI COMPANY
Worksheet
For the Month Ended June 30, 2017

Account Titles	Trial Balance	
	Dr.	Cr.
Cash	2,320	
Accounts Receivable	2,440	
Supplies	1,880	
Accounts Payable		1,120
Unearned Service Revenue		240
Common Stock		3,600
Service Revenue		2,400
Salaries and Wages Expense	560	
Miscellaneous Expense	160	
	7,360	7,360

Other data:

1. A physical count reveals \$500 of supplies on hand.
2. \$100 of the unearned revenue is still unearned at month-end.
3. Accrued salaries are \$210.

Instructions

Enter the trial balance on a worksheet and complete the worksheet.

E4-2 The adjusted trial balance columns of the worksheet for DeSousa Company are as follows. *Complete the worksheet.* (LO 1)

DESOUSA COMPANY
Worksheet (partial)
For the Month Ended April 30, 2017

Account Titles	Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	10,000					
Accounts Receivable	7,840					
Prepaid Rent	2,280					
Equipment	23,050					
Accumulated Depreciation—Equip.		4,921				
Notes Payable		5,700				
Accounts Payable		4,920				
Common Stock		20,000				
Retained Earnings		7,960				
Dividends	3,650					
Service Revenue		15,590				
Salaries and Wages Expense	10,840					
Rent Expense	760					
Depreciation Expense	671					
Interest Expense	57					
Interest Payable		57				
Totals	59,148	59,148				

Instructions

Complete the worksheet.

Prepare financial statements from worksheet.

(LO 1, 4)

E4-3 Worksheet data for DeSousa Company are presented in E4-2.

Instructions

Prepare an income statement, a retained earnings statement, and a classified balance sheet.

Journalize and post closing entries and prepare a post-closing trial balance.

(LO 2)

E4-4 Worksheet data for DeSousa Company are presented in E4-2.

Instructions

- Journalize the closing entries at April 30.
- Post the closing entries to Income Summary and Retained Earnings. (Use T-accounts.)
- Prepare a post-closing trial balance at April 30.

Prepare adjusting entries from a worksheet, and extend balances to worksheet columns.

(LO 1)

E4-5 The adjustments columns of the worksheet for Misra Company are shown below.

Account Titles	Adjustments	
	Debit	Credit
Accounts Receivable	1,100	
Prepaid Insurance		300
Accumulated Depreciation—Equipment		900
Salaries and Wages Payable		500
Service Revenue		1,100
Salaries and Wages Expense	500	
Insurance Expense	300	
Depreciation Expense	900	
	<u>2,800</u>	<u>2,800</u>

Instructions

- Prepare the adjusting entries.
- Assuming the adjusted trial balance amount for each account is normal, indicate the financial statement column to which each balance should be extended.

Derive adjusting entries from worksheet data.

(LO 1)

E4-6 Selected worksheet data for Elsayed Company are presented below.

Account Titles	Trial Balance		Adjusted Trial Balance	
	Dr.	Cr.	Dr.	Cr.
Accounts Receivable	?		34,000	
Prepaid Insurance	26,000		20,000	
Supplies	7,000		?	
Accumulated Depreciation—Equipment		12,000		?
Salaries and Wages Payable		?		5,600
Service Revenue		88,000		97,000
Insurance Expense			?	
Depreciation Expense			10,000	
Supplies Expense			4,500	
Salaries and Wages Expense	?		49,000	

Instructions

- Fill in the missing amounts.
- Prepare the adjusting entries that were made.

Prepare closing entries, and prepare a post-closing trial balance.

(LO 2)

E4-7 Kay Magill Company had the following adjusted trial balance.

KAY MAGILL COMPANY
Adjusted Trial Balance
For the Month Ended June 30, 2017

Account Titles	Adjusted Trial Balance	
	Debit	Credit
Cash	\$ 3,712	
Accounts Receivable	3,904	
Supplies	480	
Accounts Payable		\$ 1,556
Unearned Service Revenue		160
Common Stock		4,000
Retained Earnings		1,760
Dividends	628	
Service Revenue		4,300
Salaries and Wages Expense	1,344	
Miscellaneous Expense	256	
Supplies Expense	1,900	
Salaries and Wages Payable		448
	\$12,224	\$12,224

Instructions

- (a) Prepare closing entries at June 30, 2017.
 (b) Prepare a post-closing trial balance.

E4-8 Plevin Company ended its fiscal year on July 31, 2017. The company's adjusted trial balance as of the end of its fiscal year is shown below.

Journalize and post closing entries, and prepare a post-closing trial balance.

(LO 2)

PLEVIN COMPANY
Adjusted Trial Balance
July 31, 2017

No.	Account Titles	Debit	Credit
101	Cash	\$ 9,840	
112	Accounts Receivable	8,780	
157	Equipment	15,900	
158	Accumulated Depreciation—Equip.		\$ 7,400
201	Accounts Payable		4,220
208	Unearned Rent Revenue		1,800
311	Common Stock		20,000
320	Retained Earnings		25,200
332	Dividends	16,000	
400	Service Revenue		64,000
429	Rent Revenue		6,500
711	Depreciation Expense	8,000	
726	Salaries and Wages Expense	55,700	
732	Utilities Expense	14,900	
		\$129,120	\$129,120

Instructions

- (a) Prepare the closing entries using page J15.
 (b) Post to the Retained Earnings and No. 350 Income Summary accounts. (Use the three-column form.)
 (c) Prepare a post-closing trial balance at July 31.

E4-9 The adjusted trial balance for Plevin Company is presented in E4-8.

Prepare financial statements.

Instructions

- (a) Prepare an income statement and a retained earnings statement for the year.
 (b) Prepare a classified balance sheet at July 31.

(LO 4)

Answer questions related to the accounting cycle.

(LO 3)

E4-10 Janis Engle has prepared the following list of statements about the accounting cycle.

1. "Journalize the transactions" is the first step in the accounting cycle.
2. Reversing entries are a required step in the accounting cycle.
3. Correcting entries do not have to be part of the accounting cycle.
4. If a worksheet is prepared, some steps of the accounting cycle are incorporated into the worksheet.
5. The accounting cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance.
6. All steps of the accounting cycle occur daily during the accounting period.
7. The step of "post to the ledger accounts" occurs before the step of "journalize the transactions."
8. Closing entries must be prepared before financial statements can be prepared.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Prepare closing entries.

(LO 2)

E4-11 Selected accounts for Heather's Salon are presented below. All June 30 postings are from closing entries.

Salaries and Wages Expense				Service Revenue				Retained Earnings			
6/10	3,200	6/30	8,800	6/30	18,100	6/15	9,700	6/30	2,500	6/1	12,000
6/28	5,600					6/24	8,400			6/30	5,000
Bal. 14,500											
Supplies Expense				Rent Expense				Dividends			
6/12	600	6/30	1,300	6/1	3,000	6/30	3,000	6/13	1,000	6/30	2,500
6/24	700							6/25	1,500		

Instructions

- (a) Prepare the closing entries that were made.
- (b) Post the closing entries to Income Summary.

Prepare correcting entries.

(LO 3)

E4-12 Andrew Clark Company discovered the following errors made in January 2017.

1. A payment of Salaries and Wages Expense of \$700 was debited to Equipment and credited to Cash, both for \$700.
2. A collection of \$1,000 from a client on account was debited to Cash \$100 and credited to Service Revenue \$100.
3. The purchase of equipment on account for \$760 was debited to Equipment \$670 and credited to Accounts Payable \$670.

Instructions

- (a) Correct the errors by reversing the incorrect entry and preparing the correct entry.
- (b) Correct the errors without reversing the incorrect entry.

Prepare correcting entries.

(LO 3)

E4-13 Keenan Company has an inexperienced accountant. During the first 2 weeks on the job, the accountant made the following errors in journalizing transactions. All entries were posted as made.

1. A payment on account of \$840 to a creditor was debited to Accounts Payable \$480 and credited to Cash \$480.
2. The purchase of supplies on account for \$560 was debited to Equipment \$56 and credited to Accounts Payable \$56.
3. A \$500 cash dividend was debited to Salaries and Wages Expense \$500 and credited to Cash \$500.

Instructions

Prepare the correcting entries.

Prepare a classified balance sheet.

(LO 4)

E4-14 The adjusted trial balance for Martell Bowling Alley at December 31, 2017, contains the following accounts.

	<u>Debit</u>		<u>Credit</u>
Buildings	\$128,800	Common Stock	\$ 90,000
Accounts Receivable	14,520	Retained Earnings	25,000
Prepaid Insurance	4,680	Accumulated Depreciation—Buildings	42,600
Cash	18,040	Accounts Payable	12,300
Equipment	62,400	Notes Payable	97,780
Land	67,000	Accumulated Depreciation—Equipment	18,720
Insurance Expense	780	Interest Payable	2,600
Depreciation Expense	7,360	Service Revenue	17,180
Interest Expense	2,600		<u>\$306,180</u>
	<u>\$306,180</u>		

Instructions

- (a) Prepare a classified balance sheet; assume that \$22,000 of the note payable will be paid in 2018.
- (b)  Comment on the liquidity of the company.

E4-15 The following are the major balance sheet classifications.

Current assets (CA)	Current liabilities (CL)
Long-term investments (LTI)	Long-term liabilities (LTL)
Property, plant, and equipment (PPE)	Stockholders' equity (SE)
Intangible assets (IA)	

Classify accounts on balance sheet.

(LO 4)

Instructions

Classify each of the following accounts taken from Raman Company's balance sheet.

_____ Accounts payable	_____ Accumulated depreciation—equipment
_____ Accounts receivable	_____ Buildings
_____ Cash	_____ Land (in use)
_____ Common stock	_____ Notes payable (due in 2 years)
_____ Patents	_____ Supplies
_____ Salaries and wages payable	_____ Equipment
_____ Inventory	_____ Prepaid expenses
_____ Stock investments (to be sold in 7 months)	

E4-16 The following items were taken from the financial statements of D. Gygi Company. (All amounts are in thousands.)

Long-term debt	\$ 1,000	Accumulated depreciation—equipment	\$ 5,655
Prepaid insurance	880	Accounts payable	1,444
Equipment	11,500	Notes payable (due after 2018)	400
Stock investments (long-term)	264	Common stock	10,000
Debt investments (short-term)	3,690	Retained earnings	2,955
Notes payable (due in 2018)	500	Accounts receivable	1,696
Cash	2,668	Inventory	1,256

Prepare a classified balance sheet.

(LO 4)

Instructions

Prepare a classified balance sheet in good form as of December 31, 2017.

E4-17 These financial statement items are for Norsted Company at year-end, July 31, 2017.

Salaries and wages payable	\$ 2,080	Notes payable (long-term)	\$ 1,800
Salaries and wages expense	51,700	Cash	14,200
Utilities expense	22,600	Accounts receivable	9,780
Equipment	30,400	Accumulated depreciation—equipment	6,000
Accounts payable	4,100	Dividends	3,000
Service revenue	62,000	Depreciation expense	4,000
Rent revenue	8,500	Retained earnings (beginning of the year)	21,200
Common stock	30,000		

Prepare financial statements.

(LO 4)

Instructions

- (a) Prepare an income statement and a retained earnings statement for the year.
- (b) Prepare a classified balance sheet at July 31.

Use reversing entries.

(LO 5)

***E4-18** Reblin Company pays salaries of \$12,000 every Monday for the preceding 5-day week (Monday through Friday). Assume December 31 falls on a Tuesday, so Reblin's employees have worked 2 days without being paid.

Instructions

- Assume the company does not use reversing entries. Prepare the December 31 adjusting entry and the entry on Monday, January 6, when Reblin pays the payroll.
- Assume the company does use reversing entries. Prepare the December 31 adjusting entry, the January 1 reversing entry, and the entry on Monday, January 6, when Reblin pays the payroll.

Prepare closing and reversing entries.

(LO 2, 5)

***E4-19** On December 31, the adjusted trial balance of Cisneros Employment Agency shows the following selected data.

Accounts Receivable	\$24,500	Service Revenue	\$92,500
Interest Expense	8,300	Interest Payable	2,000

Analysis shows that adjusting entries were made to (1) accrue \$5,000 of service revenue and (2) accrue \$2,000 interest expense.

Instructions

- Prepare the closing entries for the temporary accounts shown above at December 31.
- Prepare the reversing entries on January 1.
- Post the entries in (a) and (b), excluding the Income Summary account. Underline and balance the accounts. (Use T-accounts.)
- Prepare the entries to record (1) the collection of the accrued revenue on January 10 and (2) the payment of all interest due (\$3,000) on January 15.
- Post the entries in (d) to the temporary accounts.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/wegandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Prepare a worksheet, financial statements, and adjusting and closing entries.

(LO 1, 2, 4)

P4-1A The trial balance columns of the worksheet for Lampert Roofing at March 31, 2017, are as follows.

LAMPERT ROOFING
Worksheet
For the Month Ended March 31, 2017

Account Titles	Trial Balance	
	Dr.	Cr.
Cash	4,500	
Accounts Receivable	3,200	
Supplies	2,000	
Equipment	11,000	
Accumulated Depreciation—Equipment		1,250
Accounts Payable		2,500
Unearned Service Revenue		550
Common Stock		10,000
Retained Earnings		2,900
Dividends	1,100	
Service Revenue		6,300
Salaries and Wages Expense	1,300	
Miscellaneous Expense	400	
	23,500	23,500

Other data:

1. A physical count reveals only \$550 of roofing supplies on hand.
2. Depreciation for March is \$250.
3. Unearned service revenue amounted to \$210 at March 31.
4. Accrued salaries are \$700.

Instructions

- (a) Enter the trial balance on a worksheet and complete the worksheet.
- (b) Prepare an income statement and a retained earnings statement for the month of March and a classified balance sheet at March 31.
- (c) Journalize the adjusting entries from the adjustments columns of the worksheet.
- (d) Journalize the closing entries from the financial statement columns of the worksheet.

(a) Adjusted trial balance
\$24,450
(b) Net income \$2,540
Total assets \$17,750

P4-2A The adjusted trial balance columns of the worksheet for Alshwer Company are as follows.

Complete worksheet; prepare financial statements, closing entries, and post-closing trial balance.

(LO 1, 2, 4)

ALSHWER COMPANY
Worksheet
For the Year Ended December 31, 2017

Account No.	Account Titles	Adjusted Trial Balance	
		Dr.	Cr.
101	Cash	5,300	
112	Accounts Receivable	10,800	
126	Supplies	1,500	
130	Prepaid Insurance	2,000	
157	Equipment	27,000	
158	Accumulated Depreciation—Equipment		5,600
200	Notes Payable		15,000
201	Accounts Payable		6,100
212	Salaries and Wages Payable		2,400
230	Interest Payable		600
311	Common Stock		10,000
320	Retained Earnings		3,000
332	Dividends	7,000	
400	Service Revenue		61,000
610	Advertising Expense	8,400	
631	Supplies Expense	4,000	
711	Depreciation Expense	5,600	
722	Insurance Expense	3,500	
726	Salaries and Wages Expense	28,000	
905	Interest Expense	600	
	Totals	<u>103,700</u>	<u>103,700</u>

Instructions

- (a) Complete the worksheet by extending the balances to the financial statement columns.
- (b) Prepare an income statement, a retained earnings statement, and a classified balance sheet. (Note: \$5,000 of the notes payable become due in 2018.)
- (c) Prepare the closing entries. Use J14 for the journal page.
- (d) Post the closing entries. (Use the three-column form of account.) Income Summary is No. 350.
- (e) Prepare a post-closing trial balance.

(a) Net income \$10,900
(b) Current assets \$19,600
Current liabilities \$14,100

(e) Post-closing trial balance
\$46,600

P4-3A The completed financial statement columns of the worksheet for Fleming Company are shown on the next page.

Prepare financial statements, closing entries, and post-closing trial balance.

(LO 1, 2, 4)

FLEMING COMPANY
Worksheet
For the Year Ended December 31, 2017

Account No.	Account Titles	Income Statement		Balance Sheet

Utilities Expense	19,000		19,000	
Totals	<u>402,200</u>	<u>402,200</u>		

Account Titles	Trial Balance		Adjusted Trial Balance	
	Dr.	Cr.	Dr.	Cr.
Insurance Expense			1,200	
Depreciation Expense			6,600	
Accumulated Depreciation—Buildings				3,000
Accumulated Depreciation—Equipment				3,600
Interest Expense			10,000	
Interest Payable				10,000
Totals			<u>418,800</u>	<u>418,800</u>

Instructions

- Prepare a complete worksheet.
- Prepare a classified balance sheet. (*Note:* \$30,000 of the mortgage note payable is due for payment next year.)
- Journalize the adjusting entries.
- Journalize the closing entries.
- Prepare a post-closing trial balance.

- Net income \$24,900
- Total current assets \$44,500
- Post-closing trial balance \$297,500

P4-5A Heidi Jara opened Jara's Cleaning Service on July 1, 2017. During July, the following transactions were completed.

- July 1 Stockholders invested \$20,000 cash in the business in exchange for common stock.
- Purchased used truck for \$9,000, paying \$4,000 cash and the balance on account.
 - Purchased cleaning supplies for \$2,100 on account.
 - Paid \$1,800 cash on a 1-year insurance policy effective July 1.
 - Billed customers \$4,500 for cleaning services.
 - Paid \$1,500 cash on amount owed on truck and \$1,400 on amount owed on cleaning supplies.
 - Paid \$2,500 cash for employee salaries.
 - Collected \$3,400 cash from customers billed on July 12.
 - Billed customers \$6,000 for cleaning services.
 - Paid \$350 for the monthly gasoline bill for the truck.
 - Paid a \$5,600 cash dividend.

Complete all steps in accounting cycle.

(LO 1, 2, 4)

The chart of accounts for Jara's Cleaning Service contains the following accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 130 Prepaid Insurance, No. 157 Equipment, No. 158 Accumulated Depreciation—Equipment, No. 201 Accounts Payable, No. 212 Salaries and Wages Payable, No. 311 Common Stock, No. 320 Retained Earnings, No. 332 Dividends, No. 350 Income Summary, No. 400 Service Revenue, No. 631 Supplies Expense, No. 633 Gasoline Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 726 Salaries and Wages Expense.

Instructions

- Journalize and post the July transactions. Use page J1 for the journal and the three-column form of account.
- Prepare a trial balance at July 31 on a worksheet.
- Enter the following adjustments on the worksheet and complete the worksheet.
 - Unbilled and uncollected revenue for services performed at July 31 were \$2,700.
 - Depreciation on equipment for the month was \$500.
 - One-twelfth of the insurance expired.
 - An inventory count shows \$600 of cleaning supplies on hand at July 31.
 - Accrued but unpaid employee salaries were \$1,000.
- Prepare an income statement and a retained earnings statement for July and a classified balance sheet at July 31.
- Journalize and post adjusting entries. Use page J2 for the journal.
- Journalize and post closing entries and complete the closing process. Use page J3 for the journal.
- Prepare a post-closing trial balance at July 31.

- Trial balance \$34,700
- Adjusted trial balance \$38,900

- Net income \$7,200
Total assets \$26,800

- Post-closing trial balance \$27,300

Analyze errors and prepare correcting entries and trial balance.

(LO 3)

P4-6A Dao Vang, CPA, was retained by Universal Cable to prepare financial statements for April 2017. Vang accumulated all the ledger balances per Universal's records and found the following.

UNIVERSAL CABLE
Trial Balance
April 30, 2017

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 4,100	
Accounts Receivable	3,200	
Supplies	800	
Equipment	10,600	
Accumulated Depreciation—Equip.		\$ 1,350
Accounts Payable		2,100
Salaries and Wages Payable		700
Unearned Service Revenue		890
Common Stock		10,000
Retained Earnings		2,900
Service Revenue		5,450
Salaries and Wages Expense	3,300	
Advertising Expense	600	
Miscellaneous Expense	290	
Depreciation Expense	500	
	<u>\$23,390</u>	<u>\$23,390</u>

Dao Vang reviewed the records and found the following errors.

1. Cash received from a customer on account was recorded as \$950 instead of \$590.
2. A payment of \$75 for advertising expense was entered as a debit to Miscellaneous Expense \$75 and a credit to Cash \$75.
3. The first salary payment this month was for \$1,900, which included \$700 of salaries payable on March 31. The payment was recorded as a debit to Salaries and Wages Expense \$1,900 and a credit to Cash \$1,900. (No reversing entries were made on April 1.)
4. The purchase on account of a printer costing \$310 was recorded as a debit to Supplies and a credit to Accounts Payable for \$310.
5. A cash payment of repair expense on equipment for \$96 was recorded as a debit to Equipment \$69 and a credit to Cash \$69.

Instructions

- (a) Prepare an analysis of each error showing (1) the incorrect entry, (2) the correct entry, and (3) the correcting entry. Items 4 and 5 occurred on April 30, 2017.
- (b) Prepare a correct trial balance.

(b) Trial balance \$22,690

PROBLEMS: SET B AND SET C

COMPREHENSIVE PROBLEM: CHAPTERS 2 TO 4

CP4 Kristin Malone opened Kristin's Maids Cleaning Service on July 1, 2017. During July, the company completed the following transactions.

- | | | |
|------|----|--|
| July | 1 | Stockholders invested \$14,000 cash in the business in exchange for common stock. |
| | 1 | Purchased a used truck for \$10,000, paying \$3,000 cash and the balance on account. |
| | 3 | Purchased cleaning supplies for \$800 on account. |
| | 5 | Paid \$1,800 on a 1-year insurance policy, effective July 1. |
| | 12 | Billed customers \$3,800 for cleaning services. |

- 18 Paid \$1,000 of amount owed on truck, and \$400 of amount owed on cleaning supplies.
- 20 Paid \$1,600 for employee salaries.
- 21 Collected \$1,400 from customers billed on July 12.
- 25 Billed customers \$1,500 for cleaning services.
- 31 Paid gasoline for the month on the truck, \$400.
- 31 Declared and paid a \$600 cash dividend.

The chart of accounts for Kristin's Maids Cleaning Service contains the following accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 130 Prepaid Insurance, No. 157 Equipment, No. 158 Accumulated Depreciation—Equipment, No. 201 Accounts Payable, No. 212 Salaries and Wages Payable, No. 311 Common Stock, No. 320 Retained Earnings, No. 332 Dividends, No. 350 Income Summary, No. 400 Service Revenue, No. 631 Supplies Expense, No. 633 Gasoline Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 726 Salaries and Wages Expense.

Instructions

- (a) Journalize and post the July transactions. Use page J1 for the journal.
- (b) Prepare a trial balance at July 31 on a worksheet. (b) Trial balance
\$25,700
- (c) Enter the following adjustments on the worksheet, and complete the worksheet.
 - (1) Unbilled fees for services performed at July 31 were \$1,300.
 - (2) Depreciation on equipment for the month was \$200.
 - (3) One-twelfth of the insurance expired.
 - (4) An inventory count shows \$100 of cleaning supplies on hand at July 31.
 - (5) Accrued but unpaid employee salaries were \$500.
- (d) Prepare an income statement and a retained earnings statement for July, and a classified balance sheet at July 31, 2017. (d) Net income \$3,050
Total assets \$23,350
- (e) Journalize and post the adjusting entries. Use page J2 for the journal.
- (f) Journalize and post the closing entries, and complete the closing process. Use page J3 for the journal.
- (g) Prepare a post-closing trial balance at July 31. (g) Post-closing trial
balance \$23,550

CONTINUING PROBLEM

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 3.)

CC4 Natalie had a very busy December. At the end of the month, after journalizing and posting the December transactions and adjusting entries, Natalie then prepared an adjusted trial balance.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP4-1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

Answer the questions below using Apple's Consolidated Balance Sheets.

- (a) What were Apple's total current assets at September 28, 2013, and September 29, 2012?
- (b) Are assets that Apple included under current assets listed in proper order? Explain.

- (c) How are Apple's assets classified?
- (d) What was Apple's "Cash and cash equivalents" at September 28, 2013?
- (e) What were Apple's total current liabilities at September 28, 2013, and September 29, 2012?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP4-2 PepsiCo's financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine each of the following for PepsiCo at December 28, 2013, and for Coca-Cola at December 31, 2013.
 - (1) Total current assets.
 - (2) Net amount of property, plant, and equipment (land, buildings, and equipment).
 - (3) Total current liabilities.
 - (4) Total equity.
- (b) What conclusions concerning the companies' respective financial positions can be drawn?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP4-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine the following for Amazon at December 31, 2013, and Wal-Mart at January 31, 2014.
 - (1) Total current assets.
 - (2) Net amount of property and equipment (fixed assets), net.
 - (3) Total current liabilities.
 - (4) Total equity.
- (b) What conclusions concerning these two companies can be drawn from these data?

Real-World Focus

BYP4-4 Numerous companies have established home pages on the Internet, e.g., the soda companies **Capt'n Eli Root Beer Company** (www.captneli.com/rootbeer.php) and **Cheerwine** (www.cheerwine.com).

Instructions

Examine the home pages of any two companies and answer the following questions.

- (a) What type of information is available?
- (b) Is any accounting-related information presented?
- (c) Would you describe the home page as informative, promotional, or both? Why?

CRITICAL THINKING

Decision-Making Across the Organization

BYP4-5 Whitegloves Janitorial Service was started 2 years ago by Lynn Sanders. Because business has been exceptionally good, Lynn decided on July 1, 2017, to expand operations by acquiring an additional truck and hiring two more assistants. To finance the expansion, Lynn obtained on July 1, 2017, a \$25,000, 10% bank loan, payable \$10,000 on July 1, 2018, and the balance on July 1, 2019. The terms of the loan require the borrower to have \$10,000 more current assets than current liabilities at December 31, 2017. If these terms are not met, the bank loan will be refinanced at 15% interest. At December 31, 2017, the accountant for Whitegloves Janitorial Service Inc. prepared the following balance sheet.

WHITEGLOVES JANITORIAL SERVICE
Balance Sheet
December 31, 2017

<u>Assets</u>		<u>Liabilities and Stockholders' Equity</u>	
Current assets		Current liabilities	
Cash	\$ 6,500	Notes payable	\$10,000
Accounts receivable	9,000	Accounts payable	<u>2,500</u>
Supplies	5,200	Total current liabilities	\$12,500
Prepaid insurance	<u>4,800</u>	Long-term liability	
Total current assets	\$25,500	Notes payable	<u>15,000</u>
Property, plant, and equipment		Total liabilities	27,500
Equipment (net)	22,000	Stockholders' equity	
Delivery trucks (net)	<u>34,000</u>	Common stock	30,000
Total property, plant, and equipment	<u>56,000</u>	Retained earnings	<u>24,000</u>
Total assets	<u>\$81,500</u>	Total stockholders' equity	<u>54,000</u>
		Total liabilities and stockholders' equity	<u>\$81,500</u>

Lynn presented the balance sheet to the bank's loan officer on January 2, 2018, confident that the company had met the terms of the loan. The loan officer was not impressed. She said, "We need financial statements audited by a CPA." A CPA was hired and immediately realized that the balance sheet had been prepared from a trial balance and not from an adjusted trial balance. The adjustment data at the balance sheet date consisted of the following.

1. Unbilled janitorial services performed were \$3,700.
2. Janitorial supplies on hand were \$2,500.
3. Prepaid insurance was a 3-year policy dated January 1, 2017.
4. December expenses incurred but unpaid at December 31, \$500.
5. Interest on the bank loan was not recorded.
6. The amounts for property, plant, and equipment presented in the balance sheet were reported net of accumulated depreciation (cost less accumulated depreciation). These amounts were \$4,000 for cleaning equipment and \$5,000 for delivery trucks as of January 1, 2017. Depreciation for 2017 was \$2,000 for cleaning equipment and \$5,000 for delivery trucks.

Instructions

With the class divided into groups, answer the following.

- (a) Prepare a correct balance sheet.
- (b) Were the terms of the bank loan met? Explain.

Communication Activity

BYP4-6 The accounting cycle is important in understanding the accounting process.

Instructions

Write a memo to your instructor that lists the steps of the accounting cycle in the order they should be completed. End with a paragraph that explains the optional steps in the cycle.

Ethics Case

BYP4-7 As the controller of Take No Prisoners Perfume Company, you discover a misstatement that overstated net income in the prior year's financial statements. The misleading financial statements appear in the company's annual report which was issued to banks and other creditors less than a month ago. After much thought about the consequences of telling the president, Jeb Wilde, about this misstatement, you gather your courage to inform him. Jeb says, "Hey! What they don't know won't hurt them. But, just so we set the record straight, we'll adjust this year's financial statements for last year's misstatement. We can absorb that misstatement better in this year than in last year anyway! Just don't make such a mistake again."

Instructions

- (a) Who are the stakeholders in this situation?
- (b) What are the ethical issues in this situation?
- (c) What would you do as a controller in this situation?

All About You

BYP4-8 Companies prepare balance sheets in order to know their financial position at a specific point in time. This enables them to make a comparison to their position at previous points in time, and gives them a basis for planning for the future. In order to evaluate your financial position, you need to prepare a personal balance sheet. Assume that you have compiled the following information regarding your finances. (*Note:* Some of the items might not be used in your personal balance sheet.)

Amount owed on student loan balance (long-term)	\$ 5,000
Balance in checking account	1,200
Certificate of deposit (6-month)	3,000
Annual earnings from part-time job	11,300
Automobile	7,000
Balance on automobile loan (current portion)	1,500
Balance on automobile loan (long-term portion)	4,000
Home computer	800
Amount owed to you by younger brother	300
Balance in money market account	1,800
Annual tuition	6,400
Video and stereo equipment	1,250
Balance owed on credit card (current portion)	150
Balance owed on credit card (long-term portion)	1,650

Instructions

Prepare a personal balance sheet using the format you have learned for a classified balance sheet for a company. For the equity account, use Owner's Equity.

FASB Codification Activity

BYP4-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

Instructions

- (a) Access the glossary ("Master Glossary") at the FASB Codification website to answer the following.
 - (1) What is the definition of current assets?
 - (2) What is the definition of current liabilities?
- (b) A company wants to offset its accounts payable against its cash account and show a cash amount net of accounts payable on its balance sheet. Identify the criteria (found in the FASB Codification) under which a company has the right of set off. Does the company have the right to offset accounts payable against the cash account?

A Look at IFRS

LEARNING
OBJECTIVE

6

Compare the procedures for the closing process under GAAP and IFRS.

The classified balance sheet, although generally required internationally, contains certain variations in format when reporting under IFRS.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to the closing process and the financial statements.

Similarities

- The procedures of the closing process are applicable to all companies, whether they are using IFRS or GAAP.
- IFRS generally requires a classified statement of financial position similar to the classified balance sheet under GAAP.

- IFRS follows the same guidelines as this textbook for distinguishing between current and noncurrent assets and liabilities.

Differences

- IFRS recommends but does not require the use of the title “statement of financial position” rather than balance sheet.
- The format of statement of financial position information is often presented differently under IFRS. Although no specific format is required, many companies that follow IFRS present statement of financial position information in this order:
 - ◆ Non-current assets
 - ◆ Current assets
 - ◆ Equity
 - ◆ Non-current liabilities
 - ◆ Current liabilities
- Under IFRS, current assets are usually listed in the reverse order of liquidity. For example, under GAAP cash is listed first, but under IFRS it is listed last.
- IFRS has many differences in terminology from what are shown in your textbook. For example, in the sample statement of financial position illustrated below, notice in the investment category that stock is called shares.

FRANKLIN CORPORATION			
Statement of Financial Position			
October 31, 2017			
<u>Assets</u>			
Intangible assets			
Patents			\$ 3,100
Property, plant, and equipment			
Land		\$10,000	
Equipment	\$24,000		
Less: Accumulated depreciation	5,000	19,000	29,000
Long-term investments			
Share investments		5,200	
Investment in real estate		2,000	7,200
Current assets			
Prepaid insurance		400	
Supplies		2,100	
Inventory		3,000	
Notes receivable		1,000	
Accounts receivable		7,000	
Debt investments		2,000	
Cash		6,600	22,100
Total assets			\$61,400
<u>Equity and Liabilities</u>			
Equity			
Share capital			\$34,050
Non-current liabilities			
Mortgage payable		\$10,000	
Notes payable		1,300	11,300
Current liabilities			
Notes payable		11,000	
Accounts payable		2,100	
Salaries and wages payable		1,600	
Unearned service revenue		900	
Interest payable		450	16,050
Total equity and liabilities			\$61,400

- Both GAAP and IFRS are increasing the use of fair value to report assets. However, at this point IFRS has adopted it more broadly. As examples, under IFRS companies can apply fair value to property, plant, and equipment, and in some cases intangible assets.

Looking to the Future

The IASB and the FASB are working on a project to converge their standards related to financial statement presentation. A key feature of the proposed framework is that each of the statements will be organized in the same format, to separate an entity's financing activities from its operating and investing activities and, further, to separate financing activities into transactions with owners and creditors. Thus, the same classifications used in the statement of financial position would also be used in the income statement and the statement of cash flows. The project has three phases. You can follow the joint financial presentation project at the following link: http://www.fasb.org/project/financial_statement_presentation.shtml.

IFRS Practice

IFRS Self-Test Questions

1. A company has purchased a tract of land and expects to build a production plant on the land in approximately 5 years. During the 5 years before construction, the land will be idle. Under IFRS, the land should be reported as:
 - (a) land expense.
 - (b) property, plant, and equipment.
 - (c) an intangible asset.
 - (d) a long-term investment.
2. Current assets under IFRS are listed generally:
 - (a) by importance.
 - (b) in the reverse order of their expected conversion to cash.
 - (c) by longevity.
 - (d) alphabetically.
3. Companies that use IFRS:
 - (a) may report all their assets on the statement of financial position at fair value.
 - (b) may offset assets against liabilities and show net assets and net liabilities on their statements of financial position, rather than the underlying detailed line items.
 - (c) may report non-current assets before current assets on the statement of financial position.
 - (d) do not have any guidelines as to what should be reported on the statement of financial position.
4. Companies that follow IFRS to prepare a statement of financial position generally use the following order of classification:
 - (a) current assets, current liabilities, non-current assets, non-current liabilities, equity.
 - (b) non-current assets, non-current liabilities, current assets, current liabilities, equity.
 - (c) non-current assets, current assets, equity, non-current liabilities, current liabilities.
 - (d) equity, non-current assets, current assets, non-current liabilities, current liabilities.

IFRS Exercises

IFRS4-1 In what ways does the format of a statement of financial of position under IFRS often differ from a balance sheet presented under GAAP?

IFRS4-2 What term is commonly used under IFRS in reference to the balance sheet?

IFRS4-3 The statement of financial position for Sundell Company includes the following accounts (in British pounds): Accounts Receivable £12,500, Prepaid Insurance £3,600, Cash £15,400, Supplies £5,200, and Debt Investments (short-term) £6,700. Prepare the current assets section of the statement of financial position, listing the accounts in proper sequence.

IFRS4-4 The following information is available for Lessila Bowling Alley at December 31, 2017.

Buildings	\$128,800	Share Capital	\$115,000
Accounts Receivable	14,520	Accumulated Depreciation—Buildings	42,600
Prepaid Insurance	4,680	Accounts Payable	12,300
Cash	18,040	Notes Payable	97,780
Equipment	62,400	Accumulated Depreciation—Equipment	18,720
Land	64,000	Interest Payable	2,600
Insurance Expense	780	Bowling Revenues	14,180
Depreciation Expense	7,360		
Interest Expense	2,600		

Prepare a classified statement of financial position. Assume that \$13,900 of the notes payable will be paid in 2018.

International Comparative Analysis Problem: Apple vs. Louis Vuitton

IFRS4-5 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Identify five differences in the format of the statement of financial position used by Louis Vuitton compared to a company, such as **Apple**, that follows GAAP. (Apple's financial statements are available in Appendix A.)

Accounting for Merchandising Operations

CHAPTER PREVIEW Merchandising is one of the largest and most influential industries in the United States. It is likely that a number of you will work for a merchandiser. Therefore, understanding the financial statements of merchandising companies is important. In this chapter, you will learn the basics about reporting merchandising transactions. In addition, you will learn how to prepare and analyze a commonly used form of the income statement—the multiple-step income statement.

FEATURE STORY

Buy Now, Vote Later

Have you ever shopped for outdoor gear at an REI (Recreational Equipment Incorporated) store? If so, you might have been surprised if a salesclerk asked if you were a member. A member? What do you mean a member? You soon realize that REI might not be your typical store. In fact, there's a lot about REI that makes it different.

REI is a consumer cooperative, or "co-op" for short. To figure out what that means, consider this quote from the company's annual stewardship report:

As a cooperative, the Company is owned by its members. Each member is entitled to one vote in the election of the Company's Board of Directors. Since January 1, 2008, the nonrefundable, nontransferable, one-time membership fee has been 20 dollars. As of December 31, 2010, there were approximately 10.8 million members.

Voting rights? Now that's something you don't get from shopping at Walmart. REI members get other benefits as well, including sharing in the company's profits through a dividend at the end of the year, which can be used for purchases at REI stores during the next two years. The more you spend, the bigger your dividend.

Since REI is a co-op, you might also wonder whether management's incentives might be a little different than at other stores. For example, is management still concerned about making a profit? The answer is yes, as it ensures the

long-term viability of the company. At the same time, REI's members want the company to be run efficiently, so that prices remain low. In order for its members to evaluate just how well management is doing, REI publishes an audited annual report, just like publicly traded companies do. So, while profit maximization might not be the ultimate goal for REI, the accounting and reporting issues are similar to those of a typical corporation.

How well is this business model working for REI? Well, it has consistently been rated as one of the best places to work in the United States by *Fortune* magazine. It is one of only five companies named each year since the list was created in 1998. Also, REI had sustainable business practices long before social responsibility became popular at other companies. As the CEO's stewardship report states, "we reduced the absolute amount of energy we use despite opening four new stores and growing our business; we grew the amount of FSC-certified paper we use to 58.4 percent of our total paper footprint—including our cash register receipt paper; we facilitated 2.2 million volunteer hours and we provided \$3.7 million to more than 330 conservation and recreation nonprofits."

So, while REI, like other retailers, closely monitors its financial results, it also strives to succeed in other areas. And, with over 10 million votes at stake, REI's management knows that it has to deliver.

LEARNING
OBJECTIVE

1

Describe merchandising operations and inventory systems.

REI, **Wal-Mart Stores, Inc.**, and **Amazon.com** are called merchandising companies because they buy and sell merchandise rather than perform services as their primary source of revenue. Merchandising companies that purchase and sell directly to consumers are called **retailers**. Merchandising companies that sell to retailers are known as **wholesalers**. For example, retailer **Walgreens** might buy goods from wholesaler **McKesson**. Retailer **Office Depot** might buy office supplies from wholesaler **United Stationers**. The primary source of revenues for merchandising companies is the sale of merchandise, often referred to simply as **sales revenue** or **sales**. A merchandising company has two categories of expenses: cost of goods sold and operating expenses.

Cost of goods sold is the total cost of merchandise sold during the period. This expense is directly related to the revenue recognized from the sale of goods. Illustration 5-1 shows the income measurement process for a merchandising company. The items in the two blue boxes are unique to a merchandising company; they are not used by a service company.

Illustration 5-1

Income measurement process for a merchandising company

**Operating Cycles**

The operating cycle of a merchandising company ordinarily is longer than that of a service company. The purchase of merchandise inventory and its eventual sale lengthen the cycle. Illustration 5-2 shows the operating cycle of a service company.

Illustration 5-2

Operating cycle for a service company

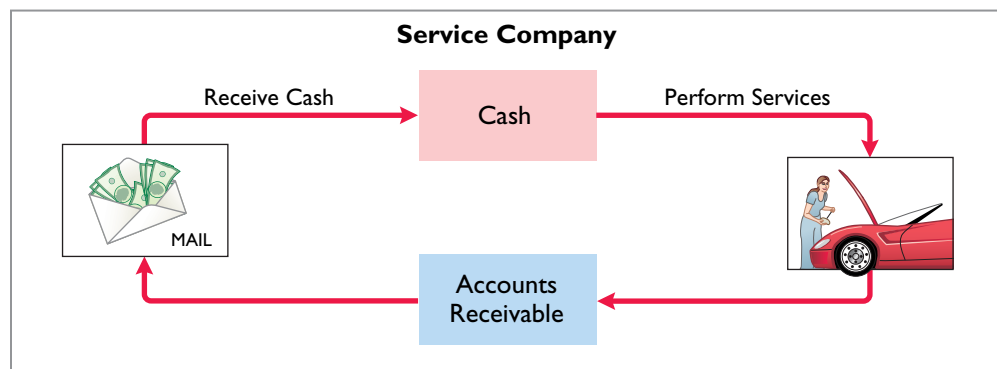

Illustration 5-3 shows the operating cycle of a merchandising company.

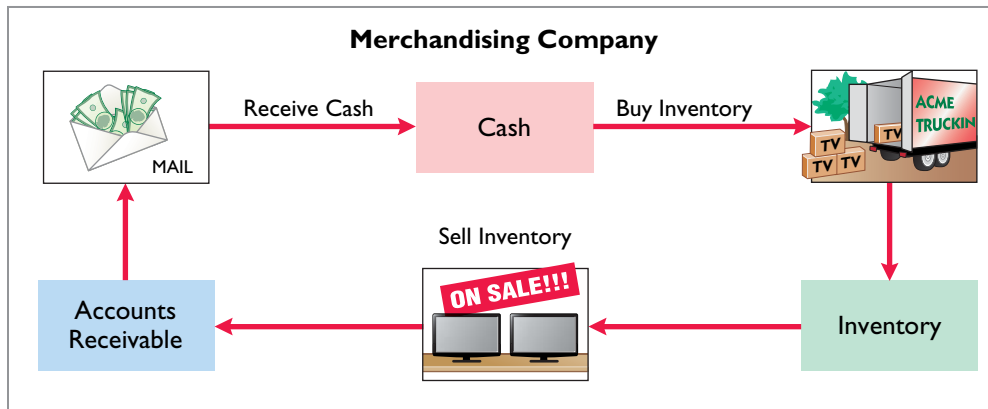

Illustration 5-3
Operating cycle for a merchandising company

Note that the added asset account for a merchandising company is the Inventory account. Companies report inventory as a current asset on the balance sheet.

Flow of Costs

The flow of costs for a merchandising company is as follows. Beginning inventory plus the cost of goods purchased is the cost of goods available for sale. As goods are sold, they are assigned to cost of goods sold. Those goods that are not sold by the end of the accounting period represent ending inventory. Illustration 5-4 describes these relationships. Companies use one of two systems to account for inventory: a **perpetual inventory system** or a **periodic inventory system**.

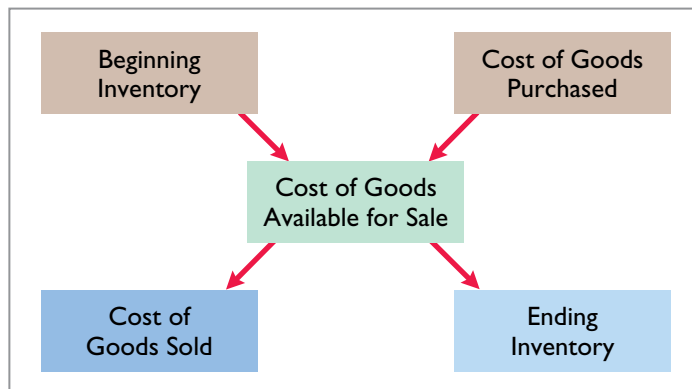

Illustration 5-4
Flow of costs

PERPETUAL SYSTEM

In a **perpetual inventory system**, companies keep detailed records of the cost of each inventory purchase and sale. These records continuously—perpetually—show the inventory that should be on hand for every item. For example, a **Ford** dealership has separate inventory records for each automobile, truck, and van on its lot and showroom floor. Similarly, a **Kroger** grocery store uses bar codes and optical scanners to keep a daily running record of every box of cereal and every jar of jelly that it buys and sells. Under a perpetual inventory system, a company determines the cost of goods sold **each time a sale occurs**.

Helpful Hint

For control purposes, companies take a physical inventory count under the perpetual system, even though it is not needed to determine cost of goods sold.

PERIODIC SYSTEM

In a **periodic inventory system**, companies do not keep detailed inventory records of the goods on hand throughout the period. Instead, they determine the cost of goods sold **only at the end of the accounting period**—that is, periodically. At that point, the company takes a physical inventory count to determine the cost of goods on hand.

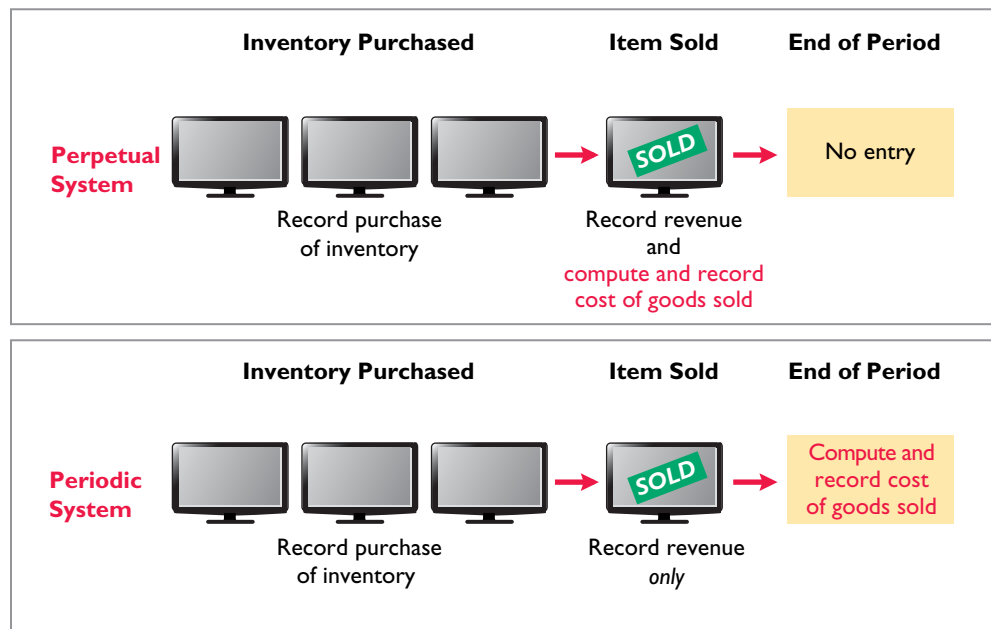

To determine the cost of goods sold under a periodic inventory system, the following steps are necessary:

1. Determine the cost of goods on hand at the beginning of the accounting period.
2. Add to it the cost of goods purchased.
3. Subtract the cost of goods on hand at the end of the accounting period.

Illustration 5-5 graphically compares the sequence of activities and the timing of the cost of goods sold computation under the two inventory systems.

Illustration 5-5

Comparing perpetual and periodic inventory systems

ADVANTAGES OF THE PERPETUAL SYSTEM

Companies that sell merchandise with high unit values, such as automobiles, furniture, and major home appliances, have traditionally used perpetual systems. The growing use of computers and electronic scanners has enabled many more companies to install perpetual inventory systems. The perpetual inventory system is so named because the accounting records continuously—perpetually—show the quantity and cost of the inventory that should be on hand at any time.

A perpetual inventory system provides better control over inventories than a periodic system. Since the inventory records show the quantities that should be on hand, the company can count the goods at any time to see whether the amount of goods actually on hand agrees with the inventory records. If shortages are uncovered, the company can investigate immediately. Although a perpetual inventory system requires both additional clerical work and expense to maintain the subsidiary records, a computerized system can minimize this cost. Much of **Amazon.com's** success is attributed to its sophisticated inventory system.

Some businesses find it either unnecessary or uneconomical to invest in a sophisticated, computerized perpetual inventory system such as Amazon's. Many small merchandising businesses find that basic accounting software provides some of the essential benefits of a perpetual inventory system. Also, managers of some small businesses still find that they can control their merchandise and manage day-to-day operations using a periodic inventory system.

Because of the widespread use of the perpetual inventory system, we illustrate it in this chapter. We discuss and illustrate the periodic system in Appendix 5B.

Investor Insight **Morrow Snowboards, Inc.**

© Ben Blankenburg/iStockphoto

Morrow Snowboards Improves Its Stock Appeal

Investors are often eager to invest in a company that has a hot new product. However, when snowboard-maker **Morrow Snowboards, Inc.** issued shares of stock to the public for the first time, some investors expressed reluctance to invest

in Morrow because of a number of accounting control problems. To reduce investor concerns, Morrow implemented a perpetual inventory system to improve its control over inventory. In addition, the company stated that it would perform a physical inventory count every quarter until it felt that its perpetual inventory system was reliable.

If a perpetual system keeps track of inventory on a daily basis, why do companies ever need to do a physical count? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!

1

Merchandising Operations and Inventory Systems

Indicate whether the following statements are true or false.

1. The primary source of revenue for a merchandising company results from performing services for customers.
2. The operating cycle of a service company is usually shorter than that of a merchandising company.
3. Sales revenue less cost of goods sold equals gross profit.
4. Ending inventory plus the cost of goods purchased equals cost of goods available for sale.

Solution

1. False. The primary source of revenue for a service company results from performing services for customers. 2. True. 3. True. 4. False. Beginning inventory plus the cost of goods purchased equals cost of goods available for sale.

Related exercise material: **BE5-1, BE5-2, E5-1, and DO IT! 5-1.**

Action Plan

- ✓ Review merchandising concepts.
- ✓ Understand the flow of costs in a merchandising company.

LEARNING OBJECTIVE

2

Record purchases under a perpetual inventory system.

Companies purchase inventory using cash or credit (on account). They normally record purchases when they receive the goods from the seller. Every purchase should be supported by business documents that provide written evidence of the transaction. Each cash purchase should be supported by a canceled check or a cash register receipt indicating the items purchased and amounts paid. Companies record cash purchases by an increase in Inventory and a decrease in Cash.

A **purchase invoice** should support each credit purchase. This invoice indicates the total purchase price and other relevant information. However, the purchaser does not prepare a separate purchase invoice. Instead, the purchaser uses as a purchase invoice a copy of the sales invoice sent by the seller. In Illustration 5-6 (page 210), for example, Sauk Stereo (the buyer) uses as a purchase invoice the sales invoice prepared by PW Audio Supply, Inc. (the seller).

Illustration 5-6

Sales invoice used as purchase invoice by Sauk Stereo

Helpful Hint

To better understand the contents of this invoice, identify these items:

1. Seller
2. Invoice date
3. Purchaser
4. Salesperson
5. Credit terms
6. Freight terms
7. Goods sold: catalog number, description, quantity, price per unit
8. Total invoice amount

Date		Salesperson	Terms	FOB Shipping Point	
5/4/17		Malone	2/10, n/30		
Catalog No.	Description	Quantity	Price	Amount	
X572Y9820	Printed Circuit Board-prototype	1	2,300	\$2,300	
A2547Z45	Production Model Circuits	5	300	1,500	
IMPORTANT: ALL RETURNS MUST BE MADE WITHIN 10 DAYS				TOTAL	\$3,800

Sauk Stereo makes the following journal entry to record its purchase from PW Audio Supply. The entry increases (debits) Inventory and increases (credits) Accounts Payable.

A	=	L	+	SE
+3,800				
		+3,800		
Cash Flows				
no effect				

May 4	Inventory	3,800	
	Accounts Payable		3,800
	(To record goods purchased on account from PW Audio Supply)		

Under the perpetual inventory system, companies record purchases of merchandise for sale in the Inventory account. Thus, **REI** would increase (debit) Inventory for clothing, sporting goods, and anything else purchased for resale to customers.

Not all purchases are debited to Inventory, however. Companies record purchases of assets acquired for use and not for resale, such as supplies, equipment, and similar items, as increases to specific asset accounts rather than to Inventory. For example, to record the purchase of materials used to make shelf signs or for cash register receipt paper, REI would increase (debit) Supplies.

Freight Costs

The sales agreement should indicate who—the seller or the buyer—is to pay for transporting the goods to the buyer's place of business. When a common carrier such as a railroad, trucking company, or airline transports the goods, the carrier prepares a freight bill in accord with the sales agreement.

Freight terms are expressed as either FOB shipping point or FOB destination. The letters FOB mean **free on board**. Thus, **FOB shipping point** means that the seller places the goods free on board the carrier, and the buyer pays the freight costs. Conversely, **FOB destination** means that the seller places the goods free on board to the buyer's place of business, and the seller pays the freight. For example, the sales invoice in Illustration 5-6 indicates FOB shipping point. Thus, the buyer (Sauk Stereo) pays the freight charges. Illustration 5-7 illustrates these shipping terms.

Illustration 5-7
Shipping terms

FREIGHT COSTS INCURRED BY THE BUYER

When the buyer incurs the transportation costs, these costs are considered part of the cost of purchasing inventory. Therefore, the buyer debits (increases) the Inventory account. For example, if Sauk Stereo (the buyer) pays Public Carrier Co. \$150 for freight charges on May 6, the entry on Sauk Stereo's books is:

May 6	Inventory	150	
	Cash		150
	(To record payment of freight on goods purchased)		

A	=	L	+	SE
+150				
-150				
<hr/>				
Cash Flows				
-150				

↓

Thus, any freight costs incurred by the buyer are part of the cost of merchandise purchased. The reason: Inventory cost should include all costs to acquire the inventory, including freight necessary to deliver the goods to the buyer. Companies recognize these costs as cost of goods sold when inventory is sold.

FREIGHT COSTS INCURRED BY THE SELLER

In contrast, **freight costs incurred by the seller on outgoing merchandise are an operating expense to the seller**. These costs increase an expense account titled Freight-Out (sometimes called Delivery Expense). For example, if the freight terms on the invoice in Illustration 5-6 had required PW Audio Supply (the seller) to pay the freight charges, the entry by PW Audio Supply would be:

May 4	Freight-Out (or Delivery Expense)	150	
	Cash		150
	(To record payment of freight on goods sold)		

A	=	L	+	SE
				-150 Exp
-150				
<hr/>				
Cash Flows				
-150				

↓

When the seller pays the freight charges, the seller will usually establish a higher invoice price for the goods to cover the shipping expense.

Purchase Returns and Allowances

A purchaser may be dissatisfied with the merchandise received because the goods are damaged or defective, of inferior quality, or do not meet the purchaser's specifications. In such cases, the purchaser may return the goods to the seller for credit if the sale was made on credit, or for a cash refund if the purchase was for cash. This transaction is known as a **purchase return**. Alternatively, the purchaser may choose to keep the merchandise if the seller is willing to grant an allowance (deduction) from the purchase price. This transaction is known as a **purchase allowance**.

Assume that Sauk Stereo returned goods costing \$300 to PW Audio Supply on May 8. The following entry by Sauk Stereo for the returned merchandise decreases (debits) Accounts Payable and decreases (credits) Inventory.

A	=	L	+	SE
-300		-300		
Cash Flows				
no effect				

May 8	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; border-right: 1px solid black; padding: 5px;">Accounts Payable</td> <td style="width: 50%; padding: 5px; text-align: right;">300</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;">Inventory</td> <td style="padding: 5px; text-align: right;">300</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;">(To record return of goods purchased from PW Audio Supply)</td> <td style="padding: 5px;"></td> </tr> </table>	Accounts Payable	300	Inventory	300	(To record return of goods purchased from PW Audio Supply)	
Accounts Payable	300						
Inventory	300						
(To record return of goods purchased from PW Audio Supply)							

Because Sauk Stereo increased Inventory when the goods were received, Inventory is decreased when Sauk Stereo returns the goods.

Suppose instead that Sauk Stereo chose to keep the goods after being granted a \$50 allowance (reduction in price). It would reduce (debit) Accounts Payable and reduce (credit) Inventory for \$50.

Purchase Discounts

The credit terms of a purchase on account may permit the buyer to claim a cash discount for prompt payment. The buyer calls this cash discount a **purchase discount**. This incentive offers advantages to both parties. The purchaser saves money, and the seller is able to shorten the operating cycle by converting the accounts receivable into cash.

Credit terms specify the amount of the cash discount and time period in which it is offered. They also indicate the time period in which the purchaser is expected to pay the full invoice price. In the sales invoice in Illustration 5-6 (page 210), credit terms are 2/10, n/30, which is read "two-ten, net thirty." This means that the buyer may take a 2% cash discount on the invoice price, less ("net of") any returns or allowances, if payment is made within 10 days of the invoice date (the **discount period**). Otherwise, the invoice price, less any returns or allowances, is due 30 days from the invoice date.

Alternatively, the discount period may extend to a specified number of days following the month in which the sale occurs. For example, 1/10 EOM (end of month) means that a 1% discount is available if the invoice is paid within the first 10 days of the next month.

When the seller elects not to offer a cash discount for prompt payment, credit terms will specify only the maximum time period for paying the balance due. For example, the invoice may state the time period as n/30, n/60, or n/10 EOM. This means, respectively, that the buyer must pay the net amount in 30 days, 60 days, or within the first 10 days of the next month.

When the buyer pays an invoice within the discount period, the amount of the discount decreases Inventory. Why? Because companies record inventory at cost, and by paying within the discount period, the buyer has reduced its cost. To illustrate, assume Sauk Stereo pays the balance due of \$3,500 (gross invoice price of \$3,800 less purchase returns and allowances of \$300) on May 14, the last day of the discount period. The cash discount is \$70 ($\$3,500 \times 2\%$), and Sauk Stereo pays \$3,430 ($\$3,500 - \70). The entry Sauk Stereo makes to record its May 14 payment decreases (debits) Accounts Payable by the amount of the gross invoice price, reduces (credits) Inventory by the \$70 discount, and reduces (credits) Cash by the net amount owed.

Helpful Hint

The term *net* in "net 30" means the remaining amount due after subtracting any sales returns and allowances and partial payments.

May 14	Accounts Payable Cash Inventory (To record payment within discount period)	3,500 3,430 70	3,430 70
--------	---	------------------------------	-------------

A	=	L	+	SE
		-3,500		
		-3,430		
		-70		
Cash Flows				
		-3,430		

If Sauk Stereo failed to take the discount and instead made full payment of \$3,500 on June 3, it would debit Accounts Payable and credit Cash for \$3,500 each.

June 3	Accounts Payable Cash (To record payment with no discount taken)	3,500 3,500	3,500
--------	--	------------------------	-------

A	=	L	+	SE
		-3,500		
		-3,500		
Cash Flows				
		-3,500		

A merchandising company usually should take all available discounts. Passing up the discount may be viewed as **paying interest** for use of the money. For example, passing up the discount offered by PW Audio Supply would be comparable to Sauk Stereo paying an interest rate of 2% for the use of \$3,500 for 20 days. This is the equivalent of an annual interest rate of approximately 36.5% ($2\% \times 365/20$). Obviously, it would be better for Sauk Stereo to borrow at prevailing bank interest rates of 6% to 10% than to lose the discount.

Summary of Purchasing Transactions

The following T-account (with transaction descriptions in red) provides a summary of the effect of the previous transactions on Inventory. Sauk Stereo originally purchased \$3,800 worth of inventory for resale. It then returned \$300 of goods. It paid \$150 in freight charges, and finally, it received a \$70 discount off the balance owed because it paid within the discount period. This results in a balance in Inventory of \$3,580.

		Inventory					
Purchase	May 4	3,800	May 8	300	Purchase return		
Freight-in	6	150	14	70	Purchase discount		
Balance	3,580						

DO IT!

2

Purchase Transactions

On September 5, De La Hoya Company buys merchandise on account from Junot Diaz Company. The selling price of the goods is \$1,500, and the cost to Diaz Company was \$800. On September 8, De La Hoya returns defective goods with a selling price of \$200. Record the transactions on the books of De La Hoya Company.

Solution

Sept. 5	Inventory Accounts Payable (To record goods purchased on account)	1,500 1,500	1,500
8	Accounts Payable Inventory (To record return of defective goods)	200 200	200

Action Plan

- ✓ Purchaser records goods at cost.
- ✓ When goods are returned, purchaser reduces Inventory.

Related exercise material: **BE5-3, BE5-5, E5-2, E5-3, E5-4, and DO IT! 5-2.**

LEARNING
OBJECTIVE

3

Record sales under a perpetual inventory system.

In accordance with the revenue recognition principle, companies record sales revenue when the performance obligation is satisfied. Typically, the performance obligation is satisfied when the goods transfer from the seller to the buyer. At this point, the sales transaction is complete and the sales price established.

Sales may be made on credit or for cash. A **business document** should support every sales transaction, to provide written evidence of the sale. **Cash register documents** provide evidence of cash sales. A **sales invoice**, like the one shown in Illustration 5-6 (page 210), provides support for a credit sale. The original copy of the invoice goes to the customer, and the seller keeps a copy for use in recording the sale. The invoice shows the date of sale, customer name, total sales price, and other relevant information.

The seller makes two entries for each sale. **The first entry records the sale:** The seller increases (debits) Cash (or Accounts Receivable if a credit sale) and also increases (credits) Sales Revenue. **The second entry records the cost of the merchandise sold:** The seller increases (debits) Cost of Goods Sold and also decreases (credits) Inventory for the cost of those goods. As a result, the Inventory account will show at all times the amount of inventory that should be on hand.

To illustrate a credit sales transaction, PW Audio Supply, Inc. records its May 4 sale of \$3,800 to Sauk Stereo (see Illustration 5-6) as follows (assume the merchandise cost PW Audio Supply \$2,400).

A	=	L	+	SE
+3,800				+3,800 Rev
Cash Flows				
no effect				

A	=	L	+	SE
-2,400				-2,400 Exp
Cash Flows				
no effect				

May 4	Accounts Receivable		3,800	3,800
	Sales Revenue			
	(To record credit sale to Sauk Stereo per invoice #731)			
4	Cost of Goods Sold		2,400	2,400
	Inventory			
	(To record cost of merchandise sold on invoice #731 to Sauk Stereo)			

For internal decision-making purposes, merchandising companies may use more than one sales account. For example, PW Audio Supply may decide to keep separate sales accounts for its sales of TVs, Blu-ray players, and headsets. **REI** might use separate accounts for camping gear, children's clothing, and ski equipment—or it might have even more narrowly defined accounts. By using separate sales accounts for major product lines, rather than a single combined sales account, company management can more closely monitor sales trends and respond more strategically to changes in sales patterns. For example, if TV sales are increasing while Blu-ray player sales are decreasing, PW Audio Supply might reevaluate both its advertising and pricing policies on these items to ensure they are optimal.

On its income statement presented to outside investors, a merchandising company normally would provide only a single sales figure—the sum of all of its individual sales accounts. This is done for two reasons. First, providing detail on all of its individual sales accounts would add considerable length to its income statement. Second, companies do not want their competitors to know the details of their operating results. However, **Microsoft** recently expanded its disclosure of revenue from three to five types. The reason: The additional categories enabled financial statement users to better evaluate the growth of the company's consumer and Internet businesses.

ETHICS NOTE

Many companies are trying to improve the quality of their financial reporting. For example, **General Electric** now provides more detail on its revenues and operating profits.

ANATOMY OF A FRAUD¹

Holly Harmon was a cashier at a national superstore for only a short while when she began stealing merchandise using three methods. Under the first method, her husband or friends took UPC labels from cheaper items and put them on more expensive items. Holly then scanned the goods at the register. Using the second method, Holly scanned an item at the register but then voided the sale and left the merchandise in the shopping cart. A third approach was to put goods into large plastic containers. She scanned the plastic containers but not the goods within them. One day, Holly did not call in sick or show up for work. In such instances, the company reviews past surveillance tapes to look for suspicious activity by employees. This enabled the store to observe the thefts and to identify the participants.

Total take: \$12,000

THE MISSING CONTROLS

Human resource controls. A background check would have revealed Holly's previous criminal record. She would not have been hired as a cashier.

Physical controls. Software can flag high numbers of voided transactions or a high number of sales of low-priced goods. Random comparisons of video records with cash register records can ensure that the goods reported as sold on the register are the same goods that are shown being purchased on the video recording. Finally, employees should be aware that they are being monitored.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 251–259.

At the end of "Anatomy of a Fraud" stories, which describe some recent real-world frauds, we discuss the missing control activities that would likely have prevented or uncovered the fraud.

Sales Returns and Allowances

We now look at the "flip side" of purchase returns and allowances, which the seller records as **sales returns and allowances**. These are transactions where the seller either accepts goods back from the buyer (a return) or grants a reduction in the purchase price (an allowance) so the buyer will keep the goods. PW Audio Supply's entries to record credit for returned goods involve (1) an increase (debit) in Sales Returns and Allowances (a contra account to Sales Revenue) and a decrease (credit) in Accounts Receivable at the \$300 selling price, and (2) an increase (debit) in Inventory (assume a \$140 cost) and a decrease (credit) in Cost of Goods Sold, as shown below (assuming that the goods were not defective).

May 8	Sales Returns and Allowances	300	
	Accounts Receivable		300
	(To record credit granted to Sauk Stereo for returned goods)		
8	Inventory	140	
	Cost of Goods Sold		140
	(To record cost of goods returned)		

If Sauk Stereo returns goods because they are damaged or defective, then PW Audio Supply's entry to Inventory and Cost of Goods Sold should be for the fair value of the returned goods, rather than their cost. For example, if the returned goods were defective and had a fair value of \$50, PW Audio Supply would debit Inventory for \$50 and credit Cost of Goods Sold for \$50.

What happens if the goods are not returned but the seller grants the buyer an allowance by reducing the purchase price? In this case, the seller debits Sales Returns and Allowances and credits Accounts Receivable for the amount of the allowance. An allowance has no impact on Inventory or Cost of Goods Sold.

¹The "Anatomy of a Fraud" stories in this textbook are adapted from *Fraud Casebook: Lessons from the Bad Side of Business*, edited by Joseph T. Wells (Hoboken, NJ: John Wiley & Sons, Inc., 2007). Used by permission. The names of some of the people and organization in the stories are fictitious, but the facts in the stories are true.

Sales Returns and Allowances is a **contra revenue account** to Sales Revenue. This means that it is offset against a revenue account on the income statement. The normal balance of Sales Returns and Allowances is a debit. Companies use a contra account, instead of debiting Sales Revenue, to disclose in the accounts and in the income statement the amount of sales returns and allowances. Disclosure of this information is important to management. Excessive returns and allowances may suggest problems—inferior merchandise, inefficiencies in filling orders, errors in billing customers, or delivery or shipment mistakes. Moreover, a decrease (debit) recorded directly to Sales Revenue would obscure the relative importance of sales returns and allowances as a percentage of sales. It also could distort comparisons between total sales in different accounting periods.

Accounting Across the Organization

Costco Wholesale Corp.

Should Costco Change Its Return Policy?

In most industries, sales returns are relatively minor. But returns of consumer electronics can really take a bite out of profits. At one time, the marketing executives at **Costco Wholesale Corp.** faced a difficult decision.

Costco always prided itself on its generous return policy. Most goods had an unlimited grace period for returns. However, a new policy requires

that certain electronics must be returned within 90 days of their purchase. The reason? The cost of returned products such as high-definition TVs, computers, and iPods cut an estimated 8¢ per share off Costco's earnings per share, which was \$2.30.

Source: Kris Hudson, "Costco Tightens Policy on Returning Electronics," *Wall Street Journal* (February 27, 2007), p. B4.

If a company expects significant returns, what are the implications for revenue recognition? (Go to **WileyPLUS** for this answer and additional questions.)

Sales Discounts

As mentioned in our discussion of purchase transactions, the seller may offer the customer a cash discount—called by the seller a **sales discount**—for the prompt payment of the balance due. Like a purchase discount, a sales discount is based on the invoice price less returns and allowances, if any. The seller increases (debits) the Sales Discounts account for discounts that are taken. For example, PW Audio Supply makes the following entry to record the cash receipt on May 14 from Sauk Stereo within the discount period.

A	=	L	+	SE
+3,430				-70 Rev
-3,500				
<hr/>				
Cash Flows				
+3,430				

May 14	Cash	3,430	
	Sales Discounts	70	
	Accounts Receivable		3,500
	(To record collection within 2/10, n/30 discount period from Sauk Stereo)		

Like Sales Returns and Allowances, Sales Discounts is a **contra revenue account** to Sales Revenue. Its normal balance is a debit. PW Audio Supply uses this account, instead of debiting Sales Revenue, to disclose the amount of cash discounts taken by customers. If Sauk Stereo does not take the discount, PW Audio Supply increases (debits) Cash for \$3,500 and decreases (credits) Accounts Receivable for the same amount at the date of collection.

The following T-accounts summarize the three sales-related transactions and show their combined effect on net sales.

Sales Revenue	Sales Returns and Allowances	Sales Discounts
3,800	300	70
		
Net Sales		
\$3,430

Selling Green

Here is a question an executive of PepsiCo was asked: Should PepsiCo market green? The executive indicated that the company should, as he believes it's the No. 1 thing consumers all over the world care about. Here are some of his thoughts on this issue:

"Sun Chips are part of the food business I run. It's a 'healthy snack.' We decided that Sun Chips, if it's a healthy snack, should be made in facilities that have a net-zero footprint. In other words, I want off the electric grid everywhere we make Sun Chips. We did that. Sun Chips should be made in a facility that puts back more water than it uses. It does that. And we partnered with our

suppliers and came out with the world's first compostable chip package.

Now, there was an issue with this package: It was louder than the New York subway, louder than jet engines taking off. What would a company that's committed to green do: walk away or stay committed? If your people are passionate, they're going to fix it for you as long as you stay committed. Six months later, the compostable bag has half the noise of our current package.

So the view today is: we should market green, we should be proud to do it . . . it has to be a 360-degree process, both internal and external. And if you do that, you can monetize environmental sustainability for the shareholders."

Source: "Four Problems—and Solutions," *Wall Street Journal* (March 7, 2011), p. R2.

What is meant by "monetize environmental sustainability" for shareholders? (Go to **WileyPLUS** for this answer and additional questions.)

Sales Transactions

On September 5, De La Hoya Company buys merchandise on account from Junot Diaz Company. The selling price of the goods is \$1,500, and the cost to Diaz Company was \$800. On September 8, De La Hoya returns defective goods with a selling price of \$200 and a fair value of \$30. Record the transactions on the books of Junot Diaz Company.

Solution

Sept. 5	Accounts Receivable	1,500	
	Sales Revenue		1,500
	(To record credit sale)		
5	Cost of Goods Sold	800	
	Inventory		800
	(To record cost of goods sold on account)		
8	Sales Returns and Allowances	200	
	Accounts Receivable		200
	(To record credit granted for receipt of returned goods)		
8	Inventory	30	
	Cost of Goods Sold		30
	(To record fair value of goods returned)		

Related exercise material: **BE5-3, BE5-4, E5-3, E5-4, E5-5, and DO IT! 5-3.**

Action Plan

- ✓ Seller records both the sale and the cost of goods sold at the time of the sale.
- ✓ When goods are returned, the seller records the return in a contra account, Sales Returns and Allowances, and reduces Accounts Receivable.
- ✓ Any goods returned increase Inventory and reduce Cost of Goods Sold. Defective or damaged inventory is recorded at fair value (scrap value).

LEARNING
OBJECTIVE

4

Apply the steps in the accounting cycle to a merchandising company.

Up to this point, we have illustrated the basic entries for transactions relating to purchases and sales in a perpetual inventory system. Now we consider the remaining steps in the accounting cycle for a merchandising company. Each of the required steps described in Chapter 4 for service companies apply to merchandising companies. Appendix 5A to this chapter shows the use of a worksheet by a merchandiser (an optional step).

Adjusting Entries

A merchandising company generally has the same types of adjusting entries as a service company. However, a merchandiser using a perpetual system will require one additional adjustment to make the records agree with the actual inventory on hand. Here's why: At the end of each period, for control purposes, a merchandising company that uses a perpetual system will take a physical count of its goods on hand. The company's unadjusted balance in Inventory usually does not agree with the actual amount of inventory on hand. The perpetual inventory records may be incorrect due to recording errors, theft, or waste. Thus, the company needs to adjust the perpetual records to make the recorded inventory amount agree with the inventory on hand. **This involves adjusting Inventory and Cost of Goods Sold.**

For example, suppose that PW Audio Supply, Inc. has an unadjusted balance of \$40,500 in Inventory. Through a physical count, PW Audio Supply determines that its actual merchandise inventory at December 31 is \$40,000. The company would make an adjusting entry as follows.

A	=	L	+	SE
-500				-500 Exp
Cash Flows				
no effect				

Dec. 31	Cost of Goods Sold Inventory (To adjust inventory to physical count)	500	500
---------	--	-----	-----

Closing Entries

A merchandising company, like a service company, closes to Income Summary all accounts that affect net income. In journalizing, the company credits all temporary accounts with debit balances, and debits all temporary accounts with credit balances, as shown below and on the next page for PW Audio Supply. Note that PW Audio Supply closes Cost of Goods Sold to Income Summary.

Helpful Hint

The easiest way to prepare the first two closing entries is to identify the temporary accounts by their balances and then prepare one entry for the credits and one for the debits.

Dec. 31	Sales Revenue Income Summary (To close income statement accounts with credit balances)	480,000	480,000
31	Income Summary Sales Returns and Allowances Sales Discounts Cost of Goods Sold Salaries and Wages Expense Freight-Out Advertising Expense Utilities Expense Depreciation Expense Insurance Expense (To close income statement accounts with debit balances)	450,000	12,000 8,000 316,000 64,000 7,000 16,000 17,000 8,000 2,000

31	Income Summary Retained Earnings (To close net income to retained earnings)	30,000	30,000
31	Retained Earnings Dividends (To close dividends to retained earnings)	15,000	15,000

After PW Audio Supply has posted the closing entries, all temporary accounts have zero balances. Also, Retained Earnings has a balance that is carried over to the next period.

Summary of Merchandising Entries

Illustration 5-8 summarizes the entries for the merchandising accounts using a perpetual inventory system.

DO IT!**4****Closing Entries**

The trial balance of Celine's Sports Wear Shop at December 31 shows Inventory \$25,000, Sales Revenue \$162,400, Sales Returns and Allowances \$4,800, Sales Discounts \$3,600, Cost of Goods Sold \$110,000, Rent Revenue \$6,000, Freight-Out \$1,800, Rent Expense \$8,800, and Salaries and Wages Expense \$22,000. Prepare the closing entries for the above accounts.

Solution**Action Plan**

- ✓ Close all temporary accounts with credit balances to Income Summary by debiting these accounts.
- ✓ Close all temporary accounts with debit balances, except dividends, to Income Summary by crediting these accounts.

The two closing entries are:

Dec. 31	Sales Revenue	162,400	
	Rent Revenue	6,000	
	Income Summary		168,400
	(To close accounts with credit balances)		
31	Income Summary	151,000	
	Cost of Goods Sold		110,000
	Sales Returns and Allowances		4,800
	Sales Discounts		3,600
	Freight-Out		1,800
	Rent Expense		8,800
	Salaries and Wages Expense		22,000
	(To close accounts with debit balances)		

Related exercise material: **BE5-6, BE5-7, E5-6, E5-7, E5-8, and DO IT 5-4.**

LEARNING
OBJECTIVE**5****Compare a multiple-step with a single-step income statement.**

Merchandising companies widely use the classified balance sheet introduced in Chapter 4 and one of two forms for the income statement. This section explains the use of these financial statements by merchandisers.

Multiple-Step Income Statement

The **multiple-step income statement** is so named because it shows several steps in determining net income. Two of these steps relate to the company's principal operating activities. A multiple-step statement also distinguishes between **operating** and **nonoperating activities**. Finally, the statement highlights intermediate components of income and shows subgroupings of expenses.

INCOME STATEMENT PRESENTATION OF SALES

The multiple-step income statement begins by presenting **sales revenue**. It then deducts contra revenue accounts—sales returns and allowances and sales discounts—from sales revenue to arrive at **net sales**. Illustration 5-9 presents the sales section for PW Audio Supply, Inc., using assumed data.

Illustration 5-9

Computation of net sales

PW AUDIO SUPPLY, INC.			
Income Statement (partial)			
Sales			
	Sales revenue		\$ 480,000
	Less: Sales returns and allowances	\$12,000	
	Sales discounts	8,000	20,000
	Net sales		\$460,000

GROSS PROFIT

From Illustration 5-1, you learned that companies deduct cost of goods sold from sales revenue to determine **gross profit**. For this computation, companies use **net sales** (which takes into consideration Sales Returns and Allowances and Sales Discounts) as the amount of sales revenue. On the basis of the sales data in Illustration 5-9 (net sales of \$460,000) and cost of goods sold under the perpetual inventory system (assume \$316,000), PW Audio Supply's gross profit is \$144,000, computed as follows.

Net sales	\$ 460,000
Cost of goods sold	<u>316,000</u>
Gross profit	\$144,000

Alternative Terminology
Gross profit is sometimes referred to as *gross margin*.

Illustration 5-10
Computation of gross profit

We also can express a company's gross profit as a percentage, called the **gross profit rate**. To do so, we divide the amount of gross profit by net sales. For PW Audio Supply, the **gross profit rate** is 31.3%, computed as follows.

Gross Profit	÷	Net Sales	=	Gross Profit Rate
\$144,000	÷	\$460,000	=	31.3%

Illustration 5-11
Gross profit rate formula and computation

Analysts generally consider the gross profit **rate** to be more useful than the gross profit **amount**. The rate expresses a more meaningful (qualitative) relationship between net sales and gross profit. For example, a gross profit of \$1,000,000 may sound impressive. But if it is the result of a gross profit rate of only 7%, it is not so impressive. The gross profit rate tells how many cents of each sales dollar go to gross profit.

Gross profit represents the **merchandising profit** of a company. It is not a measure of the overall profitability because operating expenses are not yet deducted. But managers and other interested parties closely watch the amount and trend of gross profit. They compare current gross profit with amounts reported in past periods. They also compare the company's gross profit rate with rates of competitors and with industry averages. Such comparisons provide information about the effectiveness of a company's purchasing function and the soundness of its pricing policies.

OPERATING EXPENSES AND NET INCOME

Operating expenses are the next component in measuring net income for a merchandising company. They are the expenses incurred in the process of earning sales revenue. These expenses are similar in merchandising and service companies. At PW Audio Supply, operating expenses were \$114,000. The company determines its net income by subtracting operating expenses from gross profit. Thus, net income is \$30,000, as shown below.

Gross profit	\$ 144,000
Operating expenses	<u>114,000</u>
Net income	<u><u>\$ 30,000</u></u>

Illustration 5-12
Operating expenses in computing net income

The net income amount is the so-called "bottom line" of a company's income statement.

NONOPERATING ACTIVITIES

Nonoperating activities consist of various revenues and expenses and gains and losses that are unrelated to the company's main line of operations. When nonoperating items are included, the label "**Income from operations**" (or "Operating income")

precedes them. This label clearly identifies the results of the company's normal operations, an amount determined by subtracting cost of goods sold and operating expenses from net sales. The results of nonoperating activities are shown in the categories "Other revenues and gains" and "Other expenses and losses." Illustration 5-13 lists examples of each.

Illustration 5-13

Other items of nonoperating activities

ETHICS NOTE

Companies manage earnings in various ways. ConAgra Foods recorded a non-recurring gain for \$186 million from the sale of Pilgrim's Pride stock to help meet an earnings projection for the quarter.

Other Revenues and Gains

- Interest revenue** from notes receivable and marketable securities.
- Dividend revenue** from investments in common stock.
- Rent revenue** from subleasing a portion of the store.
- Gain** from the sale of property, plant, and equipment.

Other Expenses and Losses

- Interest expense** on notes and loans payable.
- Casualty losses** from recurring causes, such as vandalism and accidents.
- Loss** from the sale or abandonment of property, plant, and equipment.
- Loss** from strikes by employees and suppliers.

Merchandising companies report the nonoperating activities in the income statement immediately after the company's operating activities. Illustration 5-14 shows these sections for PW Audio Supply, Inc., using assumed data.

Illustration 5-14

Multiple-step income statement

		PW AUDIO SUPPLY, INC.	
		Income Statement	
		For the Year Ended December 31, 2017	
Calculation of gross profit	Sales		
	Sales revenue		\$480,000
	Less: Sales returns and allowances	\$12,000	
	Sales discounts	8,000	20,000
	Net sales		460,000
	Cost of goods sold		316,000
	Gross profit		144,000
Calculation of income from operations	Operating expenses		
	Salaries and wages expense	64,000	
	Utilities expense	17,000	
	Advertising expense	16,000	
	Depreciation expense	8,000	
	Freight-out	7,000	
	Insurance expense	2,000	
	Total operating expenses		114,000
	Income from operations		30,000
Results of nonoperating activities	Other revenues and gains		
	Interest revenue	3,000	
	Gain on disposal of plant assets	600	3,600
	Other expenses and losses		
	Interest expense	1,800	
Casualty loss from vandalism	200	2,000	
	Net income		<u>\$ 31,600</u>

The distinction between operating and nonoperating activities is crucial to many external users of financial data. These users view operating income as sustainable and many nonoperating activities as non-recurring. Therefore, when forecasting next year's income, analysts put the most weight on this year's operating income and less weight on this year's nonoperating activities.

Ethics Insight IBM

ImageRite/Getty Images, Inc.

Disclosing More Details

After **Enron**, increased investor criticism and regulator scrutiny forced many companies to improve the clarity of their financial disclosures. For example, **IBM** began providing more detail regarding its “Other gains and losses.” It had previously included these items in its selling, general, and administrative expenses, with little disclosure. For example, previously if IBM sold off one of its buildings at a gain, it would include this gain in the

selling, general, and administrative expense line item, thus reducing that expense. This made it appear that the company had done a better job of controlling operating expenses than it actually had.

As another example, when **eBay** sold the remainder of its investment in **Skype** to **Microsoft**, it reported a gain in “Other revenues and gains” of \$1.7 billion. Since eBay’s total income from operations was \$2.4 billion, it was very important that the gain from the Skype sale not be buried in operating income.

Why have investors and analysts demanded more accuracy in isolating “Other gains and losses” from operating items? (Go to **WileyPLUS** for this answer and additional questions.)

Single-Step Income Statement

Another income statement format is the **single-step income statement**. The statement is so named because only one step—subtracting total expenses from total revenues—is required in determining net income.

In a single-step statement, all data are classified into two categories: (1) **revenues**, which include both operating revenues and other revenues and gains; and (2) **expenses**, which include cost of goods sold, operating expenses, and other expenses and losses. Illustration 5-15 shows a single-step statement for PW Audio Supply, Inc.

PW AUDIO SUPPLY, INC. Income Statement For the Year Ended December 31, 2017		
Revenues		
Net sales	\$460,000	
Interest revenue	3,000	
Gain on disposal of plant assets	600	
Total revenues	463,600	
Expenses		
Cost of goods sold	\$316,000	
Operating expenses	114,000	
Interest expense	1,800	
Casualty loss from vandalism	200	
Total expenses	432,000	
Net income	\$ 31,600	

Illustration 5-15
Single-step income statement

There are two primary reasons for using the single-step format. (1) A company does not realize any type of profit or income until total revenues exceed total expenses, so it makes sense to divide the statement into these two categories. (2) The format is simpler and easier to read. *For homework problems, however, you should use the single-step format only when specifically instructed to do so.*

Classified Balance Sheet

In the balance sheet, merchandising companies report inventory as a current asset immediately below accounts receivable. Recall from Chapter 4 that companies generally list current asset items in the order of their closeness to cash (liquidity). Inventory is less close to cash than accounts receivable because the goods must first be sold and then collection made from the customer. Illustration 5-16 presents the assets section of a classified balance sheet for PW Audio Supply, Inc.

Illustration 5-16

Assets section of a classified balance sheet

PW AUDIO SUPPLY, INC.		
Balance Sheet (Partial)		
December 31, 2017		
<u>Assets</u>		
Current assets		
Cash		\$ 9,500
Accounts receivable		16,100
Inventory		40,000
Prepaid insurance		1,800
		67,400
Total current assets		
Property, plant, and equipment		
Equipment	\$80,000	
Less: Accumulated depreciation—equipment	24,000	56,000
		\$123,400
Total assets		

Helpful Hint

The \$40,000 is the cost of the inventory on hand, not its expected selling price.

APPENDIX 5A: Prepare a worksheet for a merchandising company.

Using a Worksheet

As indicated in Chapter 4, a worksheet enables companies to prepare financial statements before they journalize and post adjusting entries. The steps in preparing a worksheet for a merchandising company are the same as for a service company (see pages 153–155). Illustration 5A-1 (page 226) shows the worksheet for PW Audio Supply, Inc. (excluding nonoperating items). The unique accounts for a merchandiser using a **perpetual inventory system** are in red.

TRIAL BALANCE COLUMNS

Data for the trial balance come from the ledger balances of PW Audio Supply at December 31. The amount shown for Inventory, \$40,500, is the year-end inventory amount from the perpetual inventory system.

ADJUSTMENTS COLUMNS

A merchandising company generally has the same types of adjustments as a service company. As you see in the worksheet, adjustments (b), (c), and (d) are for insurance, depreciation, and salaries and wages. Pioneer Advertising Inc., as illustrated in Chapters 3 and 4, also had these adjustments. Adjustment (a) was required to adjust the perpetual inventory carrying amount to the actual count.

After PW Audio Supply enters all adjustments data on the worksheet, it establishes the equality of the adjustments column totals. It then extends the balances in all accounts to the adjusted trial balance columns.

ADJUSTED TRIAL BALANCE

The adjusted trial balance shows the balance of all accounts after adjustment at the end of the accounting period.

INCOME STATEMENT COLUMNS

Next, the merchandising company transfers the accounts and balances that affect the income statement from the adjusted trial balance columns to the income statement columns. PW Audio Supply shows Sales Revenue of \$480,000 in the

PW Audio Supply, Inc.

Freight-Out	7,000				7,000		7,000				
Advertising Expense	16,000				16,000		16,000				
Salaries and Wages Expense	59,000		(d) 5,000		64,000		64,000				
Utilities Expense	17,000				17,000		17,000				
Totals	599,400	599,400									
Insurance Expense			(b) 2,000		2,000		2,000				
Depreciation Expense			(c) 8,000		8,000		8,000				
Salaries and Wages Payable				(d) 5,000		5,000				5,000	
Totals			15,500	15,500	612,400	612,400	450,000	480,000	162,400	132,400	
Net Income							30,000			30,000	
Totals							480,000	480,000	162,400	162,400	

Key: (a) Adjustment to inventory on hand. (b) Insurance expired. (c) Depreciation expense. (d) Salaries and wages accrued.

Illustration 5A-1

Worksheet for merchandising company—perpetual inventory system

credit column. It shows the contra revenue accounts Sales Returns and Allowances \$12,000 and Sales Discounts \$8,000 in the debit column. The difference of \$460,000 is the net sales shown on the income statement (Illustration 5-14, page 222).

Finally, the company totals all the credits in the income statement column and compares those totals to the total of the debits in the income statement column. If the credits exceed the debits, the company has net income. PW Audio Supply has net income of \$30,000. If the debits exceed the credits, the company would report a net loss.

BALANCE SHEET COLUMNS

The major difference between the balance sheets of a service company and a merchandiser is inventory. PW Audio Supply shows the ending inventory amount of \$40,000 in the balance sheet debit column. The information to prepare the retained earnings statement is also found in these columns. That is, the retained earnings beginning balance is \$33,000. Dividends are \$15,000. Net income results when the total of the debit column exceeds the total of the credit column in the

balance sheet columns. A net loss results when the total of the credits exceeds the total of the debit balances.

LEARNING
OBJECTIVE

APPENDIX 5B: Record purchases and sales under a periodic inventory system.

As described in this chapter, companies may use one of two basic systems of accounting for inventories: (1) the perpetual inventory system or (2) the periodic inventory system. In the chapter, we focused on the characteristics of the perpetual inventory system. In this appendix, we discuss and illustrate the **periodic inventory system**. One key difference between the two systems is the point at which the company computes cost of goods sold. For a visual reminder of this difference, refer back to Illustration 5-5 (on page 208).

Determining Cost of Goods Sold Under a Periodic System

Determining cost of goods sold is different when a periodic inventory system is used rather than a perpetual system. As you have seen, a company using a **perpetual system** makes an entry to record cost of goods sold and to reduce inventory each time a sale is made. A company using a **periodic system** does not determine cost of goods sold until the end of the period. At the end of the period, the company performs a count to determine the ending balance of inventory. It then **calculates cost of goods sold by subtracting ending inventory from the cost of goods available for sale**. Goods available for sale is the sum of beginning inventory plus purchases, as shown in Illustration 5B-1.

Beginning Inventory	
+ Cost of Goods Purchased	
Cost of Goods Available for Sale	
– Ending Inventory	
Cost of Goods Sold	

Illustration 5B-1

Basic formula for cost of goods sold using the periodic system

Another difference between the two approaches is that the perpetual system directly adjusts the Inventory account for any transaction that affects inventory (such as freight costs, returns, and discounts). The periodic system does not do this. Instead, it creates different accounts for purchases, freight costs, returns, and discounts. These various accounts are shown in Illustration 5B-2, which presents the calculation of cost of goods sold for PW Audio Supply, Inc., using the periodic approach.

PW AUDIO SUPPLY, INC. Cost of Goods Sold For the Year Ended December 31, 2017

Cost of goods sold			\$ 36,000
Inventory, January 1			36,000
Purchases	\$325,000		
Less: Purchase returns and allowances	\$10,400		
Purchase discounts	6,800	17,200	
Net purchases		307,800	
Add: Freight-in		12,200	
Cost of goods purchased		320,000	
Cost of goods available for sale		356,000	
Less: Inventory, December 31		40,000	
Cost of goods sold		316,000	

Illustration 5B-2

Cost of goods sold for a merchandiser using a periodic inventory system

Helpful Hint

The far right column identifies the primary items that make up cost of goods sold of \$316,000. The middle column explains cost of goods purchased of \$320,000. The left column reports contra purchase items of \$17,200.

Note that the basic elements from Illustration 5B-1 are highlighted in Illustration 5B-2. You will learn more in Chapter 6 about how to determine cost of goods sold using the periodic system.

The use of the periodic inventory system does not affect the form of presentation in the balance sheet. As under the perpetual system, a company reports inventory in the current assets section.

Recording Merchandise Transactions

In a **periodic inventory system**, companies record revenues from the sale of merchandise when sales are made, just as in a perpetual system. Unlike the perpetual system, however, companies **do not attempt on the date of sale to record the cost of the merchandise sold**. Instead, they take a physical inventory count at the **end of the period** to determine (1) the cost of the merchandise then on hand and (2) the cost of the goods sold during the period. And, **under a periodic system, companies record purchases of merchandise in the Purchases account rather than in the Inventory account**. Also, in a periodic system, purchase returns and allowances, purchase discounts, and freight costs on purchases are recorded in separate accounts.

To illustrate the recording of merchandise transactions under a periodic inventory system, we will use purchase/sales transactions between PW Audio Supply, Inc. and Sauk Stereo, as illustrated for the perpetual inventory system in this chapter.

Recording Purchases of Merchandise

On the basis of the sales invoice (Illustration 5-6, shown on page 210) and receipt of the merchandise ordered from PW Audio Supply, Sauk Stereo records the \$3,800 purchase as follows.

May 4	Purchases	3,800	
	Accounts Payable		3,800
	(To record goods purchased on account from PW Audio Supply)		

Purchases is a temporary account whose normal balance is a debit.

FREIGHT COSTS

When the purchaser directly incurs the freight costs, it debits the account Freight-In (or Transportation-In). For example, if Sauk Stereo pays Public Carrier Co. \$150 for freight charges on its purchase from PW Audio Supply on May 6, the entry on Sauk Stereo's books is:

May 6	Freight-In (Transportation-In)	150	
	Cash		150
	(To record payment of freight on goods purchased)		

Like Purchases, Freight-In is a temporary account whose normal balance is a debit. **Freight-In is part of cost of goods purchased**. The reason is that cost of goods purchased should include any freight charges necessary to bring the goods to the purchaser. Freight costs are not subject to a purchase discount. Purchase discounts apply only to the invoice cost of the merchandise.

PURCHASE RETURNS AND ALLOWANCES

Sauk Stereo returns \$300 of goods to PW Audio Supply and prepares the following entry to recognize the return.

May 8	Accounts Payable	300	
	Purchase Returns and Allowances		300
	(To record return of goods purchased from PW Audio Supply)		

Helpful Hint

Be careful not to debit purchases of equipment or supplies to a Purchases account.

Alternative Terminology

Freight-In is also called *Transportation-In*.

Purchase Returns and Allowances is a temporary account whose normal balance is a credit.

PURCHASE DISCOUNTS

On May 14, Sauk Stereo pays the balance due on account to PW Audio Supply, taking the 2% cash discount allowed by PW Audio Supply for payment within 10 days. Sauk Stereo records the payment and discount as follows.

May 14	Accounts Payable (\$3,800 – \$300) Purchase Discounts (\$3,500 × .02) Cash (To record payment within the discount period)	3,500 	 70 3,430
--------	--	-----------------------	-------------------------

Purchase Discounts is a temporary account whose normal balance is a credit.

Recording Sales of Merchandise

The seller, PW Audio Supply, records the sale of \$3,800 of merchandise to Sauk Stereo on May 4 (sales invoice No. 731, Illustration 5-6, page 210) as follows.

May 4	Accounts Receivable Sales Revenue (To record credit sales per invoice #731 to Sauk Stereo)	3,800 	 3,800
-------	--	-----------------------	-------------------

SALES RETURNS AND ALLOWANCES

To record the returned goods received from Sauk Stereo on May 8, PW Audio Supply records the \$300 sales return as follows.

May 8	Sales Returns and Allowances Accounts Receivable (To record credit granted to Sauk Stereo for returned goods)	300 	 300
-------	---	---------------------	-----------------

SALES DISCOUNTS

On May 14, PW Audio Supply receives payment of \$3,430 on account from Sauk Stereo. PW Audio Supply honors the 2% cash discount and records the payment of Sauk Stereo's account receivable in full as follows.

May 14	Cash Sales Discounts (\$3,500 × .02) Accounts Receivable (\$3,800 – \$300) (To record collection within 2/10, n/30 discount period from Sauk Stereo)	3,430 70 	 3,500
--------	---	-----------------------------	-------------------

COMPARISON OF ENTRIES—PERPETUAL VS. PERIODIC

Illustration 5B-3 (page 230) summarizes the periodic inventory entries shown in this appendix and compares them to the perpetual system entries from the chapter. Entries that differ in the two systems are shown in color.

Journalizing and Posting Closing Entries

For a merchandising company, like a service company, all accounts that affect the determination of net income are closed to Income Summary. Data for the preparation of closing entries may be obtained from the income statement columns of the worksheet. In journalizing, all debit column amounts are credited, and all credit column amounts are debited. To close the merchandise inventory in a periodic inventory system:

ENTRIES ON SAUK STEREO'S BOOKS

Transaction		Perpetual Inventory System		Periodic Inventory System	
May 4	Purchase of merchandise on credit.	Inventory	3,800	Purchases	3,800
		Accounts Payable	3,800	Accounts Payable	3,800
6	Freight costs on purchases.	Inventory	150	Freight-In	150
		Cash	150	Cash	150
8	Purchase returns and allowances.	Accounts Payable	300	Accounts Payable	300
		Inventory	300	Purchase Returns and Allowances	300
14	Payment on account with a discount.	Accounts Payable	3,500	Accounts Payable	3,500
		Cash	3,430	Cash	3,430
		Inventory	70	Purchase Discounts	70

ENTRIES ON PW AUDIO SUPPLY'S BOOKS

Transaction		Perpetual Inventory System		Periodic Inventory System	
May 4	Sale of merchandise on credit.	Accounts Receivable	3,800	Accounts Receivable	3,800
		Sales Revenue	3,800	Sales Revenue	3,800
		Cost of Goods Sold	2,400	No entry for cost of goods sold	
		Inventory	2,400		
8	Return of merchandise sold.	Sales Returns and Allowances	300	Sales Returns and Allowances	300
		Accounts Receivable	300	Accounts Receivable	300
		Inventory	140	No entry	
		Cost of Goods Sold	140		
14	Cash received on account with a discount.	Cash	3,430	Cash	3,430
		Sales Discounts	70	Sales Discounts	70
		Accounts Receivable	3,500	Accounts Receivable	3,500

Illustration 5B-3

Comparison of entries for perpetual and periodic inventory systems

1. The beginning inventory balance is debited to Income Summary and credited to Inventory.
2. The ending inventory balance is debited to Inventory and credited to Income Summary.

The two entries for PW Audio Supply are as follows.

Dec. 31	Income Summary	(1)	36,000	36,000
	Inventory			
	(To close beginning inventory)			
31	Inventory	(2)	40,000	40,000
	Income Summary			
	(To record ending inventory)			

After posting, the Inventory and Income Summary accounts will show the following.

Illustration 5B-4

Posting closing entries for merchandise inventory

Inventory				Income Summary				
1/1	Bal.	36,000	12/31	Close	36,000	12/31	Close	40,000
12/31	Close	40,000						
12/31	Bal.	40,000						

Often, the closing of Inventory is included with other closing entries, as shown on the next page for PW Audio Supply. (*Close Inventory with other accounts in homework problems unless stated otherwise.*)

Dec. 31	Inventory (Dec. 31)	40,000	
	Sales Revenue	480,000	
	Purchase Returns and Allowances	10,400	
	Purchase Discounts	6,800	
	Income Summary (To record ending inventory and close accounts with credit balances)		537,200
31	Income Summary	507,200	
	Inventory (Jan. 1)		36,000
	Sales Returns and Allowances		12,000
	Sales Discounts		8,000
	Purchases		325,000
	Freight-In		12,200
	Salaries and Wages Expense		64,000
	Freight-Out		7,000
	Advertising Expense		16,000
	Utilities Expense		17,000
	Depreciation Expense		8,000
	Insurance Expense		2,000
	(To close beginning inventory and other income statement accounts with debit balances)		
31	Income Summary	30,000	
	Retained Earnings (To transfer net income to retained earnings)		30,000
31	Retained Earnings	15,000	
	Dividends (To close dividends to retained earnings)		15,000

Helpful Hint

Except for merchandise inventory, the easiest way to prepare the first two closing entries is to identify the temporary accounts by their balances and then prepare one entry for the credits and one for the debits.

After the closing entries are posted, all temporary accounts have zero balances. In addition, Retained Earnings has a credit balance of \$48,000: beginning balance + net income – dividends (\$33,000 + \$30,000 – \$15,000).

Using a Worksheet

As indicated in Chapter 4, a worksheet enables companies to prepare financial statements before journalizing and posting adjusting entries. The steps in preparing a worksheet for a merchandising company are the same as they are for a service company (see pages 153–155).

TRIAL BALANCE COLUMNS

Data for the trial balance come from the ledger balances of PW Audio Supply at December 31. The amount shown for Inventory, \$36,000, is the beginning inventory amount from the periodic inventory system.

ADJUSTMENTS COLUMNS

A merchandising company generally has the same types of adjustments as a service company. As you see in the worksheet in Illustration 5B-5 (page 232), adjustments (a), (b), and (c) are for insurance, depreciation, and salaries and wages. These adjustments were also required for Pioneer Advertising Inc., as illustrated in Chapters 3 and 4. The unique accounts for a merchandiser using a **periodic inventory system** are shown in capital red letters. Note, however, that the worksheet excludes nonoperating items.

After all adjustment data are entered on the worksheet, the equality of the adjustment column totals is established. The balances in all accounts are then extended to the adjusted trial balance columns.

INCOME STATEMENT COLUMNS

Next, PW Audio Supply transfers the accounts and balances that affect the income statement from the adjusted trial balance columns to the income statement columns.

PW AUDIO SUPPLY, INC.											
Worksheet											
For the Year Ended December 31, 2017											
	Trial Balance		Adjustments		Adjusted Trial Balance		Income Statement		Balance Sheet		
Accounts	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	
Cash	9,500				9,500				9,500		
Accounts Receivable	16,100				16,100				16,100		
INVENTORY	36,000				36,000		36,000	40,000	40,000		
Prepaid Insurance	3,800			(a) 2,000	1,800				1,800		
Equipment	80,000				80,000				80,000		
Accumulated Depreciation— Equipment		16,000		(b) 8,000		24,000				24,000	
Accounts Payable		20,400				20,400				20,400	
Common Stock		50,000				50,000				50,000	
Retained Earnings		33,000				33,000				33,000	
Dividends	15,000				15,000				15,000		
SALES REVENUE		480,000				480,000		480,000			
SALES RETURNS AND ALLOWANCES	12,000				12,000		12,000				
SALES DISCOUNTS	8,000				8,000		8,000				
PURCHASES	325,000				325,000		325,000				
PURCHASE RETURNS AND ALLOWANCES		10,400				10,400		10,400			
PURCHASE DISCOUNTS		6,800				6,800		6,800			
FREIGHT-IN	12,200				12,200		12,200				
Freight-Out	7,000				7,000		7,000				
Advertising Expense	16,000				16,000		16,000				
Salaries and Wages Expense	59,000		(c) 5,000		64,000		64,000				
Utilities Expense	17,000				17,000		17,000				
Totals	616,600	616,600									
Insurance Expense			(a) 2,000		2,000		2,000				
Depreciation Expense			(b) 8,000		8,000		8,000				
Salaries and Wages Payable				(c) 5,000		5,000				5,000	
Totals			15,000	15,000	629,600	629,600	507,200	537,200	162,400	132,400	
Net Income							30,000			30,000	
Totals							537,200	537,200	162,400	162,400	

Key: (a) Insurance expired. (b) Depreciation expense. (c) Salaries and wages accrued.

Illustration 5B-5

Worksheet for merchandising company—periodic inventory system

The company shows Sales Revenue of \$480,000 in the credit column. It shows the contra revenue accounts, Sales Returns and Allowances of \$12,000 and Sales Discounts of \$8,000, in the debit column. The difference of \$460,000 is the net sales shown on the income statement (Illustration 5-9, page 220). Similarly, Purchases of \$325,000 and Freight-In of \$12,200 are extended to the debit column. The contra purchase accounts, Purchase Returns and Allowances of \$10,400 and Purchase Discounts of \$6,800, are extended to the credit columns.

The worksheet procedures for the Inventory account merit specific comment. The procedures are shown on the next page.

1. The beginning balance, \$36,000, is extended from the adjusted trial balance column to the **income statement debit column**. From there, it can be added in reporting cost of goods available for sale in the income statement.
2. The ending inventory, \$40,000, is added to the worksheet by an **income statement credit and a balance sheet debit**. The credit makes it possible to deduct ending inventory from the cost of goods available for sale in the income statement to determine cost of goods sold. The debit means the ending inventory can be reported as an asset on the balance sheet.

These two procedures are specifically illustrated below:

	Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.
Inventory	(1) 36,000	40,000 ← (2)	→ 40,000	

Illustration 5B-6

Worksheet procedures for inventories

The computation for cost of goods sold, taken from the income statement column in Illustration 5B-5, is as follows.

Debit Column		Credit Column	
Beginning inventory	\$ 36,000	Ending inventory	\$40,000
Purchases	325,000	Purchase returns and allowances	10,400
Freight-in	12,200	Purchase discounts	6,800
Total debits	373,200	Total credits	\$57,200
Less: Total credits	57,200		
Cost of goods sold	\$316,000		

Illustration 5B-7

Computation of cost of goods sold from worksheet columns

Helpful Hint

In a periodic system, cost of goods sold is a computation—it is not a separate account with a balance.

Finally, PW Audio Supply totals all the credits in the income statement column and compares these totals to the total of the debits in the income statement column. If the credits exceed the debits, the company has net income. PW Audio Supply has net income of \$30,000. If the debits exceed the credits, the company would report a net loss.

BALANCE SHEET COLUMNS

The major difference between the balance sheets of a service company and a merchandising company is inventory. PW Audio Supply shows ending inventory of \$40,000 in the balance sheet debit column. The information to prepare the retained earnings statement is also found in these columns. That is, the retained earnings beginning balance is \$33,000. Dividends are \$15,000. Net income results when the total of the debit column exceeds the total of the credit column in the balance sheet columns. A net loss results when the total of the credits exceeds the total of the debit balances.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 **Describe merchandising operations and inventory systems.** Because of inventory, a merchandising company has sales revenue, cost of goods sold, and gross profit. To account for inventory, a merchandising company must choose between a perpetual and a periodic inventory system.
- 2 **Record purchases under a perpetual inventory system.** The company debits the Inventory account for all purchases of merchandise and freight-in, and credits it for purchase discounts and purchase returns and allowances.

- 3 Record sales under a perpetual inventory system.** When a merchandising company sells inventory, it debits Accounts Receivable (or Cash) and credits Sales Revenue for the **selling price** of the merchandise. At the same time, it debits Cost of Goods Sold and credits Inventory for the **cost** of the inventory items sold. Sales Returns and Allowances and Sales Discounts are debited and are contra revenue accounts.
- 4 Apply the steps in the accounting cycle to a merchandising company.** Each of the required steps in the accounting cycle for a service company applies to a merchandising company. A worksheet is again an optional step. Under a perpetual inventory system, the company must adjust the Inventory account to agree with the physical count.
- 5 Compare a multiple-step with a single-step income statement.** A multiple-step income statement shows

numerous steps in determining net income, including nonoperating activities sections. A single-step income statement classifies all data under two categories, revenues or expenses, and determines net income in one step.

- *6 Prepare a worksheet for a merchandising company.** The steps in preparing a worksheet for a merchandising company are the same as for a service company. The unique accounts for a merchandiser are Inventory, Sales Revenue, Sales Returns and Allowances, Sales Discounts, and Cost of Goods Sold.
- *7 Record purchases and sales under a periodic inventory system.** In recording purchases under a periodic system, companies must make entries for (a) cash and credit purchases, (b) purchase returns and allowances, (c) purchase discounts, and (d) freight costs. In recording sales, companies must make entries for (a) cash and credit sales, (b) sales returns and allowances, and (c) sales discounts.

GLOSSARY REVIEW

Contra revenue account An account that is offset against a revenue account on the income statement. (p. 216).

Cost of goods sold The total cost of merchandise sold during the period. (p. 206).

FOB destination Freight terms indicating that the seller places the goods free on board to the buyer's place of business, and the seller pays the freight. (p. 211).

FOB shipping point Freight terms indicating that the seller places goods free on board the carrier, and the buyer pays the freight costs. (p. 211).

Gross profit The excess of net sales over the cost of goods sold. (p. 221).

Gross profit rate Gross profit expressed as a percentage, by dividing the amount of gross profit by net sales. (p. 221).

Income from operations Income from a company's principal operating activity; determined by subtracting cost of goods sold and operating expenses from net sales. (p. 221).

Multiple-step income statement An income statement that shows several steps in determining net income. (p. 220).

Net sales Sales revenue less sales returns and allowances and less sales discounts. (p. 220).

Nonoperating activities Various revenues, expenses, gains, and losses that are unrelated to a company's main line of operations. (p. 221).

Operating expenses Expenses incurred in the process of earning sales revenue. (p. 221).

Other expenses and losses A nonoperating-activities section of the income statement that shows expenses and losses unrelated to the company's main line of operations. (p. 222).

Other revenues and gains A nonoperating-activities section of the income statement that shows revenues and gains unrelated to the company's main line of operations. (p. 222).

Periodic inventory system An inventory system under which the company does not keep detailed inventory records throughout the accounting period but determines the cost of goods sold only at the end of an accounting period. (p. 208).

Perpetual inventory system An inventory system under which the company keeps detailed records of the cost of each inventory purchase and sale, and the records continuously show the inventory that should be on hand. (p. 207).

Purchase allowance A deduction made to the selling price of merchandise, granted by the seller so that the buyer will keep the merchandise. (p. 212).

Purchase discount A cash discount claimed by a buyer for prompt payment of a balance due. (p. 212).

Purchase invoice A document that supports each credit purchase. (p. 209).

Purchase return A return of goods from the buyer to the seller for a cash or credit refund. (p. 212).

Sales discount A reduction given by a seller for prompt payment of a credit sale. (p. 216).

Sales invoice A document that supports each credit sale. (p. 214).

Sales returns and allowances Purchase returns and allowances from the seller's perspective. See *Purchase return* and *Purchase allowance*, above. (p. 215).

Sales revenue (Sales) The primary source of revenue in a merchandising company. (p. 206).

Single-step income statement An income statement that shows only one step in determining net income. (p. 223).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Gross profit will result if:
 (a) operating expenses are less than net income.
 (b) sales revenues are greater than operating expenses.
 (c) sales revenues are greater than cost of goods sold.
 (d) operating expenses are greater than cost of goods sold.
- (LO 2) 2. Under a perpetual inventory system, when goods are purchased for resale by a company:
 (a) purchases on account are debited to Inventory.
 (b) purchases on account are debited to Purchases.
 (c) purchase returns are debited to Purchase Returns and Allowances.
 (d) freight costs are debited to Freight-Out.
- (LO 3) 3. The sales accounts that normally have a debit balance are:
 (a) Sales Discounts.
 (b) Sales Returns and Allowances.
 (c) Both (a) and (b).
 (d) Neither (a) nor (b).
- (LO 3) 4. A credit sale of \$750 is made on June 13, terms 2/10, net/30. A return of \$50 is granted on June 16. The amount received as payment in full on June 23 is:
 (a) \$700. (c) \$685.
 (b) \$686. (d) \$650.
- (LO 2) 5. Which of the following accounts will normally appear in the ledger of a merchandising company that uses a perpetual inventory system?
 (a) Purchases. (c) Cost of Goods Sold.
 (b) Freight-In. (d) Purchase Discounts.
- (LO 3) 6. To record the sale of goods for cash in a perpetual inventory system:
 (a) only one journal entry is necessary to record cost of goods sold and reduction of inventory.
 (b) only one journal entry is necessary to record the receipt of cash and the sales revenue.
 (c) two journal entries are necessary: one to record the receipt of cash and sales revenue, and one to record the cost of goods sold and reduction of inventory.
 (d) two journal entries are necessary: one to record the receipt of cash and reduction of inventory, and one to record the cost of goods sold and sales revenue.
- (LO 4) 7. The steps in the accounting cycle for a merchandising company are the same as those in a service company **except**:
 (a) an additional adjusting journal entry for inventory may be needed in a merchandising company.
 (b) closing journal entries are not required for a merchandising company.
 (c) a post-closing trial balance is not required for a merchandising company.
 (d) a multiple-step income statement is required for a merchandising company.
8. The multiple-step income statement for a merchandising company shows each of the following features **except**:
 (a) gross profit.
 (b) cost of goods sold.
 (c) a sales section.
 (d) an investing activities section.
9. If sales revenues are \$400,000, cost of goods sold is \$310,000, and operating expenses are \$60,000, the gross profit is:
 (a) \$30,000. (c) \$340,000.
 (b) \$90,000. (d) \$400,000.
10. A single-step income statement:
 (a) reports gross profit.
 (b) does not report cost of goods sold.
 (c) reports sales revenue and "Other revenues and gains" in the revenues section of the income statement.
 (d) reports operating income separately.
11. Which of the following appears on both a single-step and a multiple-step income statement?
 (a) Inventory.
 (b) Gross profit.
 (c) Income from operations.
 (d) Cost of goods sold.
- *12. In a worksheet using a perpetual inventory system, Inventory is shown in the following columns:
 (a) adjusted trial balance debit and balance sheet debit.
 (b) income statement debit and balance sheet debit.
 (c) income statement credit and balance sheet debit.
 (d) income statement credit and adjusted trial balance debit.
- *13. In determining cost of goods sold in a periodic system:
 (a) purchase discounts are deducted from net purchases.
 (b) freight-out is added to net purchases.
 (c) purchase returns and allowances are deducted from net purchases.
 (d) freight-in is added to net purchases.
- *14. If beginning inventory is \$60,000, cost of goods purchased is \$380,000, and ending inventory is \$50,000, cost of goods sold is:
 (a) \$390,000. (c) \$330,000.
 (b) \$370,000. (d) \$420,000.
- *15. When goods are purchased for resale by a company using a periodic inventory system:
 (a) purchases on account are debited to Inventory.
 (b) purchases on account are debited to Purchases.
 (c) purchase returns are debited to Purchase Returns and Allowances.
 (d) freight costs are debited to Purchases.

Solutions

1. (c) Gross profit will result if sales revenues are greater than cost of goods sold. The other choices are incorrect because (a) operating expenses and net income are not used in the computation of gross profit; (b) gross profit results when sales revenues are greater than cost of goods sold, not operating expenses; and (d) gross profit results when sales revenues, not operating expenses, are greater than cost of goods sold.

- 2. (a)** Under a perpetual inventory system, when a company purchases goods for resale, purchases on account are debited to the Inventory account, not (b) Purchases or (c) Purchase Returns and Allowances. Choice (d) is incorrect because freight costs are also debited to the Inventory account, not the Freight-Out account.
- 3. (c)** Both Sales Discounts and Sales Returns and Allowances normally have a debit balance. Choices (a) and (b) are both correct, but (c) is the better answer. Choice (d) is incorrect as both (a) and (b), not neither, are correct.
- 4. (b)** The full amount of \$686 is paid within 10 days of the purchase $(\$750 - \$50) - [(\$750 - \$50) \times 2\%]$. The other choices are incorrect because (a) does not consider the discount of \$14; (c) the amount of the discount is based upon the amount after the return is granted $(\$700 \times 2\%)$, not the amount before the return of merchandise $(\$750 \times 2\%)$; and (d) does not constitute payment in full on June 23.
- 5. (c)** The Cost of Goods Sold account normally appears in the ledger of a merchandising company using a perpetual inventory system. The other choices are incorrect because (a) the Purchases account, (b) the Freight-In account, and (d) the Purchase Discounts account all appear in the ledger of a merchandising company that uses a periodic inventory system.
- 6. (c)** Two journal entries are necessary: one to record the receipt of cash and sales revenue, and one to record the cost of goods sold and reduction of inventory. The other choices are incorrect because (a) only considers the recognition of the expense and ignores the revenue, (b) only considers the recognition of revenue and leaves out the expense or cost of merchandise sold, and (d) the receipt of cash and sales revenue, not reduction of inventory, are paired together; and the cost of goods sold and reduction of inventory, not sales revenue, are paired together.
- 7. (a)** An additional adjusting journal entry for inventory may be needed in a merchandising company to adjust for a physical inventory count, but it is not needed for a service company. The other choices are incorrect because (b) closing journal entries and (c) a post-closing trial balance are required for both types of companies. Choice (d) is incorrect because while a multiple-step income statement is not required for a merchandising company, it is useful to distinguish income generated from operating the business versus income or loss from nonrecurring nonoperating items.
- 8. (d)** An investing activities section appears on the statement of cash flows, not on a multiple-step income statement. Choices (a) gross profit, (b) cost of goods sold, and (c) a sales section are all features of a multiple-step income statement.
- 9. (b)** $\text{Gross profit} = \text{Sales revenue } (\$400,000) - \text{Cost of goods sold } (\$310,000) = \$90,000$, not (a) \$30,000, (c) \$340,000, or (d) \$400,000.
- 10. (c)** Both sales revenue and “Other revenues and gains” are reported in the revenues section of a single-step income statement. The other choices are incorrect because (a) gross profit is not reported on a single-step income statement, (b) cost of goods sold is included in the expenses section of a single-step income statement, and (d) income from operations is not shown separately on a single-step income statement.
- 11. (d)** Cost of goods sold appears on both a single-step and a multiple-step income statement. The other choices are incorrect because (a) inventory does not appear on either a single-step or a multiple-step income statement and (b) gross profit and (c) income from operations appear on a multiple-step income statement but not on a single-step income statement.
- 12. (a)** In a worksheet using a perpetual inventory system, inventory is shown in the adjusted trial balance debit column and in the balance sheet debit column. The other choices are incorrect because the Inventory account is not shown in the income statement columns.
- *13. (d)** In determining cost of goods sold in a periodic system, freight-in is added to net purchases. The other choices are incorrect because (a) purchase discounts are deducted from purchases, not net purchases; (b) freight-out is a cost of sales, not a cost of purchases; and (c) purchase returns and allowances are deducted from purchases, not net purchases.
- *14. (a)** $\text{Beginning inventory } (\$60,000) + \text{Cost of goods purchased } (\$380,000) - \text{Ending inventory } (\$50,000) = \text{Cost of goods sold } (\$390,000)$, not (b) \$370,000, (c) \$330,000, or (d) \$420,000.
- *15. (b)** Purchases for resale are debited to the Purchases account. The other choices are incorrect because (a) purchases on account are debited to Purchases, not Inventory; (c) Purchase Returns and Allowances are always credited; and (d) freight costs are debited to Freight-In, not Purchases.

PRACTICE EXERCISES

Prepare purchase and sales entries.

(LO 2, 3)

1. On June 10, Vareen Company purchased \$8,000 of merchandise from Harrah Company, FOB shipping point, terms 3/10, n/30. Vareen pays the freight costs of \$400 on June 11. Damaged goods totaling \$300 are returned to Harrah for credit on June 12. The fair value of these goods is \$70. On June 19, Vareen pays Harrah Company in full, less the purchase discount. Both companies use a perpetual inventory system.

Instructions

- Prepare separate entries for each transaction on the books of Vareen Company.
- Prepare separate entries for each transaction for Harrah Company. The merchandise purchased by Vareen on June 10 had cost Harrah \$4,800.

Solution

1. (a)			
June 10	Inventory	8,000	
	Accounts Payable		8,000
11	Inventory	400	
	Cash		400
12	Accounts Payable	300	
	Inventory		300
19	Accounts Payable (\$8,000 – \$300)	7,700	
	Inventory		231
	Cash (\$7,700 × 3%)		7,469
(b)			
June 10	Accounts Receivable	8,000	
	Sales Revenue		8,000
	Cost of Goods Sold	4,800	
	Inventory		4,800
12	Sales Returns and Allowances	300	
	Accounts Receivable		300
	Inventory	70	
	Cost of Goods Sold		70
19	Cash (\$7,700 – \$231)	7,469	
	Sales Discounts (\$7,700 × 3%)	231	
	Accounts Receivable		7,700
	(\$8,000 – \$300)		

2. In its income statement for the year ended December 31, 2017, Marten Company reported the following condensed data.

Interest expense	\$ 70,000	Net sales	\$2,200,000
Operating expenses	725,000	Interest revenue	25,000
Cost of goods sold	1,300,000	Loss on disposal of plant assets	17,000

Prepare multiple-step and single-step income statements.

(LO 5)

Instructions

- (a) Prepare a multiple-step income statement.
 (b) Prepare a single-step income statement.

Solution

2. (a)			
MARTEN COMPANY			
Income Statement			
For the Year Ended December 31, 2017			
Net sales			\$2,200,000
Cost of goods sold			1,300,000
Gross profit			<u>900,000</u>
Operating expenses			<u>725,000</u>
Income from operations			175,000
Other revenues and gains			
Interest revenue		\$25,000	
Other expenses and losses			
Interest expense	\$70,000		
Loss on disposal of plant assets	<u>17,000</u>	<u>87,000</u>	<u>(62,000)</u>
Net income			<u><u>\$ 113,000</u></u>

(b)

MARTEN COMPANY
Income Statement
For the Year Ended December 31, 2017

Revenues		
Net sales		\$2,200,000
Interest revenue		<u>25,000</u>
Total revenues		2,225,000
Expenses		
Cost of goods sold	\$1,300,000	
Operating expenses	725,000	
Interest expense	70,000	
Loss on disposal of plant assets	<u>17,000</u>	
Total expenses		2,112,000
Net income		<u><u>\$ 113,000</u></u>

PRACTICE PROBLEM

Prepare a multiple-step income statement.

(LO 5)

The adjusted trial balance columns of Falcetto Company's worksheet for the year ended December 31, 2017, are as follows.

	Debit		Credit
Cash	14,500	Accumulated Depreciation—	
Accounts Receivable	11,100	Equipment	18,000
Inventory	29,000	Notes Payable	25,000
Prepaid Insurance	2,500	Accounts Payable	10,600
Equipment	95,000	Common Stock	50,000
Dividends	12,000	Retained Earnings	31,000
Sales Returns and Allowances	6,700	Sales Revenue	536,800
Sales Discounts	5,000	Interest Revenue	<u>2,500</u>
Cost of Goods Sold	363,400		<u>673,900</u>
Freight-Out	7,600		
Advertising Expense	12,000		
Salaries and Wages Expense	56,000		
Utilities Expense	18,000		
Rent Expense	24,000		
Depreciation Expense	9,000		
Insurance Expense	4,500		
Interest Expense	<u>3,600</u>		
	<u>673,900</u>		

Instructions

Prepare a multiple-step income statement for Falcetto Company.

Solution

FALCETTO COMPANY
Income Statement
For the Year Ended December 31, 2017

Sales		
Sales revenue		\$536,800
Less: Sales returns and allowances	\$ 6,700	
Sales discounts	<u>5,000</u>	<u>11,700</u>
Net sales		525,100
Cost of goods sold		<u>363,400</u>
Gross profit		161,700

Operating expenses		
Salaries and wages expense	56,000	
Rent expense	24,000	
Utilities expense	18,000	
Advertising expense	12,000	
Depreciation expense	9,000	
Freight-out	7,600	
Insurance expense	4,500	
Total operating expenses		<u>131,100</u>
Income from operations		30,600
Other revenues and gains		
Interest revenue	2,500	
Other expenses and losses		
Interest expense	<u>3,600</u>	<u>1,100</u>
Net income		<u>\$ 29,500</u>

WileyPLUS

Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

QUESTIONS

- (a) "The steps in the accounting cycle for a merchandising company are different from the accounting cycle for a service company." Do you agree or disagree? (b) Is the measurement of net income for a merchandising company conceptually the same as for a service company? Explain.
- Why is the normal operating cycle for a merchandising company likely to be longer than for a service company?
- What components of revenues and expenses are different between merchandising and service companies?
- How does income measurement differ between a merchandising and a service company?
- When is cost of goods sold determined in a perpetual inventory system?
- Distinguish between FOB shipping point and FOB destination. Identify the freight terms that will result in a debit to Inventory by the buyer and a debit to Freight-Out by the seller.
- Explain the meaning of the credit terms 2/10, n/30.
- Goods costing \$2,000 are purchased on account on July 15 with credit terms of 2/10, n/30. On July 18, a \$200 credit memo is received from the supplier for damaged goods. Give the journal entry on July 24 to record payment of the balance due within the discount period using a perpetual inventory system.
- Ming Xu believes revenues from credit sales may be recorded before they are collected in cash. Do you agree? Explain.
- (a) What is the primary source document for recording (1) cash sales and (2) credit sales? (b) Using XXs for amounts, give the journal entry for each of the transactions in part (a).
- A credit sale is made on July 10 for \$900, terms 2/10, n/30. On July 12, \$100 of goods are returned for credit. Give the journal entry on July 19 to record the receipt of the balance due within the discount period.
- Explain why the Inventory account will usually require adjustment at year-end.
- Prepare the closing entries for the Sales Revenue account, assuming a balance of \$200,000 and the Cost of Goods Sold account with a \$145,000 balance.
- What merchandising account(s) will appear in the post-closing trial balance?
- Minnick Co. has sales revenue of \$105,000, cost of goods sold of \$70,000, and operating expenses of \$20,000. What is its gross profit and its gross profit rate?
- Paul Scott Company reports net sales of \$800,000, gross profit of \$370,000, and net income of \$240,000. What are its operating expenses?
- Identify the distinguishing features of an income statement for a merchandising company.
- Identify the sections of a multiple-step income statement that relate to (a) operating activities, and (b) nonoperating activities.
- How does the single-step form of income statement differ from the multiple-step form?
- Determine Apple's gross profit rate for 2013 and 2012. Indicate whether it increased or decreased from 2012 to 2013.
- Indicate the columns of the worksheet in a perpetual system in which (a) inventory and (b) cost of goods sold will be shown.
- Identify the accounts that are added to or deducted from Purchases in a periodic system to determine the cost of goods purchased. For each account, indicate whether it is added or deducted.
- Goods costing \$3,000 are purchased on account on July 15 with credit terms of 2/10, n/30. On July 18, a \$200 credit was received from the supplier for damaged goods. Give the journal entry on July 24 to record payment of the balance due within the discount period, assuming a periodic inventory system.

BRIEF EXERCISES

Compute missing amounts in determining cost of goods sold.

(LO 1)

BE5-1 Presented below are the components in determining cost of goods sold. Determine the missing amounts.

	<u>Beginning Inventory</u>	<u>Purchases</u>	<u>Cost of Goods Available for Sale</u>	<u>Ending Inventory</u>	<u>Cost of Goods Sold</u>
(a)	\$80,000	\$100,000	?	?	\$120,000
(b)	\$50,000	?	\$115,000	\$35,000	?
(c)	?	\$110,000	\$160,000	\$29,000	?

Compute missing amounts in determining net income.

(LO 1)

BE5-2 Presented below are the components in Gates Company's income statement. Determine the missing amounts.

	<u>Sales Revenue</u>	<u>Cost of Goods Sold</u>	<u>Gross Profit</u>	<u>Operating Expenses</u>	<u>Net Income</u>
(a)	\$ 75,000	?	\$30,000	?	\$10,800
(b)	\$108,000	\$70,000	?	?	\$29,500
(c)	?	\$83,900	\$79,600	\$39,500	?

Journalize perpetual inventory entries.

(LO 2, 3)

BE5-3 Radomir Company buys merchandise on account from Lemke Company. The selling price of the goods is \$780, and the cost of the goods is \$470. Both companies use perpetual inventory systems. Journalize the transaction on the books of both companies.

Journalize sales transactions.

(LO 3)

BE5-4 Prepare the journal entries to record the following transactions on Kwang Company's books using a perpetual inventory system.

- On March 2, Kwang Company sold \$900,000 of merchandise to Sensat Company, terms 2/10, n/30. The cost of the merchandise sold was \$620,000.
- On March 6, Sensat Company returned \$90,000 of the merchandise purchased on March 2. The cost of the returned merchandise was \$62,000.
- On March 12, Kwang Company received the balance due from Sensat Company.

Journalize purchase transactions.

(LO 2)

BE5-5 From the information in BE5-4, prepare the journal entries to record these transactions on Sensat Company's books under a perpetual inventory system.

Prepare adjusting entry for inventory.

(LO 4)

BE5-6 At year-end, the perpetual inventory records of Litwin Company showed merchandise inventory of \$98,000. The company determined, however, that its actual inventory on hand was \$95,700. Record the necessary adjusting entry.

Prepare closing entries for accounts.

(LO 4)

BE5-7 Hudson Company has the following account balances: Sales Revenue \$195,000, Sales Discounts \$2,000, Cost of Goods Sold \$117,000, and Inventory \$40,000. Prepare the entries to record the closing of these items to Income Summary.

Prepare sales section of income statement.

(LO 5)

BE5-8 Arndt Company provides the following information for the month ended October 31, 2017; sales on credit \$280,000, cash sales \$100,000, sales discounts \$5,000, and sales returns and allowances \$11,000. Prepare the sales section of the income statement based on this information.

Contrast presentation in multiple-step and single-step income statements.

(LO 5)

BE5-9  Explain where each of the following items would appear on (1) a multiple-step income statement, and on (2) a single-step income statement: (a) gain on sale of equipment, (b) interest expense, (c) casualty loss from vandalism, and (d) cost of goods sold.

Compute net sales, gross profit, income from operations, and gross profit rate.

(LO 5)

BE5-10 Assume Kader Company has the following reported amounts: Sales revenue \$510,000, Sales returns and allowances \$15,000, Cost of goods sold \$330,000, and Operating expenses \$110,000. Compute the following: (a) net sales, (b) gross profit, (c) income from operations, and (d) gross profit rate. (Round to one decimal place.)

***BE5-11** Presented below is the format of the worksheet using the perpetual inventory system presented in Appendix 5A.

Identify worksheet columns for selected accounts.

(LO 6)

<u>Trial Balance</u>		<u>Adjustments</u>		<u>Adjusted Trial Balance</u>		<u>Income Statement</u>		<u>Balance Sheet</u>	
Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.

Indicate where the following items will appear on the worksheet: (a) Cash, (b) Inventory, (c) Sales revenue, and (d) Cost of goods sold.

Example:

Cash: Trial balance debit column; Adjusted trial balance debit column; and Balance sheet debit column.

***BE5-12** Assume that Gallant Company uses a periodic inventory system and has these account balances: Purchases \$450,000, Purchase Returns and Allowances \$13,000, Purchase Discounts \$8,000, and Freight-In \$16,000. Determine net purchases and cost of goods purchased.

Compute net purchases and cost of goods purchased.

(LO 7)

***BE5-13** Assume the same information as in BE5-12 and also that Gallant Company has beginning inventory of \$60,000, ending inventory of \$90,000, and net sales of \$730,000. Determine the amounts to be reported for cost of goods sold and gross profit.

Compute cost of goods sold and gross profit.

(LO 7)

***BE5-14** Prepare the journal entries to record these transactions on Nimmer Company's books using a periodic inventory system.

Journalize purchase transactions.

- On March 2, Nimmer Company purchased \$900,000 of merchandise from Sen Company, terms 2/10, n/30.
- On March 6, Nimmer Company returned \$130,000 of the merchandise purchased on March 2.
- On March 12, Nimmer Company paid the balance due to Sen Company.

(LO 7)

***BE5-15** A. Hall Company has the following merchandise account balances: Sales Revenue \$180,000, Sales Discounts \$2,000, Purchases \$120,000, and Purchases Returns and Allowances \$30,000. In addition, it has a beginning inventory of \$40,000 and an ending inventory of \$30,000. Prepare the entries to record the closing of these items to Income Summary using the periodic inventory system.

Prepare closing entries for merchandise accounts.

(LO 7)

***BE5-16** Presented below is the format of the worksheet using the periodic inventory system presented in Appendix 5B.

Identify worksheet columns for selected accounts.

(LO 7)

<u>Trial Balance</u>		<u>Adjustments</u>		<u>Adjusted Trial Balance</u>		<u>Income Statement</u>		<u>Balance Sheet</u>	
Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.

Indicate where the following items will appear on the worksheet: (a) Cash, (b) Beginning inventory, (c) Accounts payable, and (d) Ending inventory.

Example

Cash: Trial balance debit column; Adjustment trial balance debit column; and Balance sheet debit column.

DO IT! Exercises

DO IT! 5-1 Indicate whether the following statements are true or false.

- A merchandising company reports gross profit but a service company does not.
- Under a periodic inventory system, a company determines the cost of goods sold each time a sale occurs.

Answer general questions about merchandisers.

(LO 1)

- A service company is likely to use accounts receivable but a merchandising company is not likely to do so.
- Under a periodic inventory system, the cost of goods on hand at the beginning of the accounting period plus the cost of goods purchased less the cost of goods on hand at the end of the accounting period equals cost of goods sold.

Record transactions of purchasing company.

(LO 2)

DO IT! 5-2 On October 5, Loomis Company buys merchandise on account from Brooke Company. The selling price of the goods is \$5,000, and the cost to Brooke Company is \$3,100. On October 8, Loomis returns defective goods with a selling price of \$650 and a fair value of \$100. Record the transactions on the books of Loomis Company.

Record transactions of selling company.

(LO 3)

DO IT! 5-3 Assume information similar to that in **DO IT! 5-2**: On October 5, Loomis Company buys merchandise on account from Brooke Company. The selling price of the goods is \$5,000, and the cost to Brooke Company is \$3,100. On October 8, Loomis returns defective goods with a selling price of \$650 and a fair value of \$100. Record the transactions on the books of Brooke Company.

Prepare closing entries for a merchandising company.

(LO 4)

DO IT! 5-4 The trial balance of Optique Boutique at December 31 shows Inventory \$21,000, Sales Revenue \$156,000, Sales Returns and Allowances \$4,000, Sales Discounts \$3,000, Cost of Goods Sold \$92,400, Interest Revenue \$5,000, Freight-Out \$1,500, Utilities Expense \$7,400, and Salaries and Wages Expense \$19,500. Prepare the closing entries for Optique for these accounts.

Classify financial statement accounts.

(LO 5)

DO IT! 5-5 Estes Company is preparing its multiple-step income statement, retained earnings statement, and classified balance sheet. Using the column headings **Account**, **Financial Statement**, and **Classification**, indicate in which financial statement and under what classification each of the following would be reported.

<u>Account</u>	<u>Financial Statement</u>	<u>Classification</u>
Accounts Payable		
Accounts Receivable		
Accumulated Depreciation—Buildings		
Cash		
Casualty Loss from Vandalism		
Common Stock		
Cost of Goods Sold		
Depreciation Expense		
Dividends		
Equipment		
Freight-Out		
Insurance Expense		
Interest Payable		
Inventory		
Land		
Notes Payable (due in 5 years)		
Property Taxes Payable		
Salaries and Wages Expense		
Salaries and Wages Payable		
Sales Returns and Allowances		
Sales Revenue		
Unearned Rent Revenue		
Utilities Expense		

EXERCISES

Answer general questions about merchandisers.

(LO 1)

E5-1 Mr. Etemadi has prepared the following list of statements about service companies and merchandisers.

- Measuring net income for a merchandiser is conceptually the same as for a service company.
- For a merchandiser, sales less operating expenses is called gross profit.
- For a merchandiser, the primary source of revenues is the sale of inventory.
- Sales salaries and wages is an example of an operating expense.

- The operating cycle of a merchandiser is the same as that of a service company.
- In a perpetual inventory system, no detailed inventory records of goods on hand are maintained.
- In a periodic inventory system, the cost of goods sold is determined only at the end of the accounting period.
- A periodic inventory system provides better control over inventories than a perpetual system.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E5-2 Information related to Harwick Co. is presented below.

- On April 5, purchased merchandise from Botham Company for \$23,000, terms 2/10, net/30, FOB shipping point.
- On April 6, paid freight costs of \$900 on merchandise purchased from Botham.
- On April 7, purchased equipment on account for \$26,000.
- On April 8, returned damaged merchandise to Botham Company and was granted a \$3,000 credit for returned merchandise.
- On April 15, paid the amount due to Botham Company in full.

Journalize purchase transactions.

(LO 2)

Instructions

- Prepare the journal entries to record these transactions on the books of Harwick Co. under a perpetual inventory system.
- Assume that Harwick Co. paid the balance due to Botham Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

E5-3 On September 1, Boylan Office Supply had an inventory of 30 calculators at a cost of \$18 each. The company uses a perpetual inventory system. During September, the following transactions occurred.

Journalize perpetual inventory entries.

(LO 2, 3)

- | | |
|---------|---|
| Sept. 6 | Purchased with cash 80 calculators at \$20 each from Guthrie Co. terms net/30. |
| 9 | Paid freight of \$80 on calculators purchased from Guthrie Co. |
| 10 | Returned 3 calculators to Guthrie Co. for \$63 credit (including freight) because they did not meet specifications. |
| 12 | Sold 26 calculators costing \$21 (including freight) for \$31 each to Lee Book Store, terms n/30. |
| 14 | Granted credit of \$31 to Lee Book Store for the return of one calculator that was not ordered. |
| 20 | Sold 30 calculators costing \$21 for \$32 each to Orr's Card Shop, terms n/30. |

Instructions

Journalize the September transactions.

E5-4 On June 10, Tuzun Company purchased \$8,000 of merchandise from Epps Company, FOB shipping point, terms 2/10, n/30. Tuzun pays the freight costs of \$400 on June 11. Damaged goods totaling \$300 are returned to Epps for credit on June 12. The fair value of these goods is \$70. On June 19, Tuzun pays Epps Company in full, less the purchase discount. Both companies use a perpetual inventory system.

Prepare purchase and sale entries.

(LO 2, 3)

Instructions

- Prepare separate entries for each transaction on the books of Tuzun Company.
- Prepare separate entries for each transaction for Epps Company. The merchandise purchased by Tuzun on June 10 had cost Epps \$4,800.

E5-5 Presented below are transactions related to Bogner Company.

Journalize sales transactions.

- On December 3, Bogner Company sold \$570,000 of merchandise to Maris Co., terms 2/10, n/30, FOB shipping point. The cost of the merchandise sold was \$350,000.
- On December 8, Maris Co. was granted an allowance of \$20,000 for merchandise purchased on December 3.
- On December 13, Bogner Company received the balance due from Maris Co.

(LO 3)

Instructions

- Prepare the journal entries to record these transactions on the books of Bogner Company using a perpetual inventory system.
- Assume that Bogner Company received the balance due from Maris Co. on January 2 of the following year instead of December 13. Prepare the journal entry to record the receipt of payment on January 2.

Prepare sales section and closing entries.

(LO 4, 5)

E5-6 The adjusted trial balance of Tsai Company shows the following data pertaining to sales at the end of its fiscal year October 31, 2017: Sales Revenue \$820,000, Freight-Out \$16,000, Sales Returns and Allowances \$25,000, and Sales Discounts \$13,000.

Instructions

- Prepare the sales section of the income statement.
- Prepare separate closing entries for (1) sales revenue, and (2) the contra accounts to sales revenue.

Prepare adjusting and closing entries.

(LO 4)

E5-7 Juan Morales Company had the following account balances at year-end: Cost of Goods Sold \$60,000, Inventory \$15,000, Operating Expenses \$29,000, Sales Revenue \$115,000, Sales Discounts \$1,200, and Sales Returns and Allowances \$1,700. A physical count of inventory determines that merchandise inventory on hand is \$13,900.

Instructions

- Prepare the adjusting entry necessary as a result of the physical count.
- Prepare closing entries.

Prepare adjusting and closing entries.

(LO 4)

E5-8 Presented below is information related to Garland Co. for the month of January 2017.

Ending inventory per perpetual records	\$ 21,600	Insurance expense	\$ 12,000
Ending inventory actually on hand	21,000	Rent expense	20,000
Cost of goods sold	218,000	Salaries and wages expense	55,000
Freight-out	7,000	Sales discounts	10,000
		Sales returns and allowances	13,000
		Sales revenue	380,000

Instructions

- Prepare the necessary adjusting entry for inventory.
- Prepare the necessary closing entries.

Prepare multiple-step income statement.

(LO 5)

E5-9 Presented below is information for Furlow Company for the month of March 2017.

Cost of goods sold	\$212,000	Rent expense	\$ 32,000
Freight-out	7,000	Sales discounts	8,000
Insurance expense	6,000	Sales returns and allowances	13,000
Salaries and wages expense	58,000	Sales revenue	380,000

Instructions

- Prepare a multiple-step income statement.
- Compute the gross profit rate.

Prepare multiple-step and single-step income statements.

(LO 5)

E5-10 In its income statement for the year ended December 31, 2017, Lemere Company reported the following condensed data.

Operating expenses	\$ 725,000	Interest revenue	\$ 28,000
Cost of goods sold	1,289,000	Loss on disposal of plant assets	17,000
Interest expense	70,000	Net sales	2,200,000

Instructions

- Prepare a multiple-step income statement.
- Prepare a single-step income statement.

Prepare correcting entries for sales and purchases.

(LO 2, 3)

E5-11 An inexperienced accountant for Huang Company made the following errors in recording merchandising transactions.

- A \$195 refund to a customer for faulty merchandise was debited to Sales Revenue \$195 and credited to Cash \$195.
- A \$180 credit purchase of supplies was debited to Inventory \$180 and credited to Cash \$180.
- A \$215 sales discount was debited to Sales Revenue.
- A cash payment of \$20 for freight on merchandise purchases was debited to Freight-Out \$200 and credited to Cash \$200.

Instructions

Prepare separate correcting entries for each error, assuming that the incorrect entry is not reversed. (Omit explanations.)

E5-12 In 2017, Matt Cruz Company had net sales of \$900,000 and cost of goods sold of \$522,000. Operating expenses were \$225,000, and interest expense was \$11,000. Cruz prepares a multiple-step income statement.

Compute various income measures.

(LO 5)

Instructions

- Compute Cruz's gross profit.
- Compute the gross profit rate. Why is this rate computed by financial statement users?
- What is Cruz's income from operations and net income?
- If Cruz prepared a single-step income statement, what amount would it report for net income?
- In what section of its classified balance sheet should Cruz report inventory?

E5-13 Presented below is financial information for two different companies.

Compute missing amounts and compute gross profit rate.

(LO 5)

	<u>May Company</u>	<u>Reed Company</u>
Sales revenue	\$90,000	\$ (d)
Sales returns	(a)	5,000
Net sales	87,000	102,000
Cost of goods sold	56,000	(e)
Gross profit	(b)	41,500
Operating expenses	15,000	(f)
Net income	(c)	15,000

Instructions

- Determine the missing amounts.
- Determine the gross profit rates. (Round to one decimal place.)

E5-14 Financial information is presented below for three different companies.

Compute missing amounts.

(LO 5)

	<u>Allen Cosmetics</u>	<u>Bast Grocery</u>	<u>Corr Wholesalers</u>
Sales revenue	\$90,000	\$ (e)	\$122,000
Sales returns and allowances	(a)	5,000	12,000
Net sales	86,000	95,000	(i)
Cost of goods sold	56,000	(f)	(j)
Gross profit	(b)	38,000	24,000
Operating expenses	15,000	(g)	18,000
Income from operations	(c)	(h)	(k)
Other expenses and losses	4,000	7,000	(l)
Net income	(d)	11,000	5,000

Instructions

Determine the missing amounts.

***E5-15** Presented below are selected accounts for Salazar Company as reported in the worksheet using a perpetual inventory system at the end of May 2017.

Complete worksheet using a perpetual inventory system.

(LO 6)

Accounts	Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	11,000					
Inventory	76,000					
Sales Revenue		480,000				
Sales Returns and Allowances	10,000					
Sales Discounts	9,000					
Cost of Goods Sold	300,000					

Instructions

Complete the worksheet by extending amounts reported in the adjusted trial balance to the appropriate columns in the worksheet. Do not total individual columns.

***E5-16** The trial balance columns of the worksheet using a perpetual inventory system for Marquez Company at June 30, 2017, are as follows.

Prepare a worksheet using a perpetual inventory system.

(LO 6)

MARQUEZ COMPANY
Worksheet
For the Month Ended June 30, 2017

Account Titles	Trial Balance	
	Debit	Credit
Cash	1,920	
Accounts Receivable	2,440	
Inventory	11,640	
Accounts Payable		1,120
Common Stock		3,500
Sales Revenue		42,500
Cost of Goods Sold	20,560	
Operating Expenses	10,560	
	47,120	47,120

Other data:

Operating expenses incurred on account, but not yet recorded, total \$1,500.

Instructions

Enter the trial balance on a worksheet and complete the worksheet.

Prepare cost of goods sold section.

(LO 7)

***E5-17** The trial balance of D. Savage Company at the end of its fiscal year, August 31, 2017, includes these accounts: Inventory \$17,200, Purchases \$149,000, Sales Revenue \$190,000, Freight-In \$5,000, Sales Returns and Allowances \$3,000, Freight-Out \$1,000, and Purchase Returns and Allowances \$2,000. The ending inventory is \$23,000.

Instructions

Prepare a cost of goods sold section for the year ending August 31 (periodic inventory).

Compute various income statement items.

(LO 7)

***E5-18** On January 1, 2017, Christel Madan Corporation had inventory of \$50,000. At December 31, 2017, Christel Madan had the following account balances.

Freight-in	\$ 4,000
Purchases	509,000
Purchase discounts	6,000
Purchase returns and allowances	2,000
Sales revenue	840,000
Sales discounts	5,000
Sales returns and allowances	10,000

At December 31, 2017, Christel Madan determines that its ending inventory is \$60,000.

Instructions

(a) Compute Christel Madan's 2017 gross profit.

(b) Compute Christel Madan's 2017 operating expenses if net income is \$130,000 and there are no nonoperating activities.

Prepare cost of goods sold section.

(LO 7)

***E5-19** Below is a series of cost of goods sold sections for companies B, F, L, and R.

	B	F	L	R
Beginning inventory	\$ 150	\$ 70	\$1,000	\$ (j)
Purchases	1,620	1,060	(g)	43,590
Purchase returns and allowances	40	(d)	290	(k)
Net purchases	(a)	1,030	6,210	41,090
Freight-in	110	(e)	(h)	2,240
Cost of goods purchased	(b)	1,280	7,940	(l)
Cost of goods available for sale	1,840	1,350	(i)	49,530
Ending inventory	310	(f)	1,450	6,230
Cost of goods sold	(c)	1,230	7,490	43,300

Instruction

Fill in the lettered blanks to complete the cost of goods sold sections.

***E5-20** This information relates to Rana Co.

1. On April 5, purchased merchandise from Craig Company for \$25,000, terms 2/10, net/30, FOB shipping point.
2. On April 6, paid freight costs of \$900 on merchandise purchased from Craig Company.
3. On April 7, purchased equipment on account for \$30,000.
4. On April 8, returned some of April 5 merchandise, which cost \$2,800, to Craig Company.
5. On April 15, paid the amount due to Craig Company in full.

Journalize purchase transactions.

(LO 7)

Instructions

- (a) Prepare the journal entries to record these transactions on the books of Rana Co. using a periodic inventory system.
- (b) Assume that Rana Co. paid the balance due to Craig Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

***E5-21** Presented below is information related to Lor Co.

1. On April 5, purchased merchandise from Garcia Company for \$19,000, terms 2/10, net/30, FOB shipping point.
2. On April 6, paid freight costs of \$800 on merchandise purchased from Garcia.
3. On April 7, purchased equipment on account from Holifield Mfg. Co. for \$23,000.
4. On April 8, returned merchandise, which cost \$4,000, to Garcia Company.
5. On April 15, paid the amount due to Garcia Company in full.

Journalize purchase transactions.

(LO 7)

Instructions

- (a) Prepare the journal entries to record the preceding transactions on the books of Lor Co. using a periodic inventory system.
- (b) Assume that Lor Co. paid the balance due to Garcia Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

***E5-22** Presented below are selected accounts for B. Midler Company as reported in the worksheet at the end of May 2017. Ending inventory is \$75,000.

Complete worksheet.

(LO 7)

Accounts	Adjusted Trial Balance		Income Statement		Balance Sheet	
	Dr.	Cr.	Dr.	Cr.	Dr.	Cr.
Cash	9,000					
Inventory	80,000					
Purchases	240,000					
Purchase Returns and Allowances		30,000				
Sales Revenue		450,000				
Sales Returns and Allowances	10,000					
Sales Discounts	5,000					
Rent Expense	42,000					

Instructions

Complete the worksheet by extending amounts reported in the adjusted trial balance to the appropriate columns in the worksheet. The company uses the periodic inventory system.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Journalize purchase and sales transactions under a perpetual inventory system.

(LO 2, 3)

P5-1A Powell's Book Warehouse distributes hardcover books to retail stores and extends credit terms of 2/10, n/30 to all of its customers. At the end of May, Powell's inventory consisted of books purchased for \$1,800. During June, the following merchandising transactions occurred.

- June 1 Purchased books on account for \$1,600 from Kline Publishers, FOB destination, terms 2/10, n/30. The appropriate party also made a cash payment of \$50 for the freight on this date.
- 3 Sold books on account to Reading Rainbow for \$2,500. The cost of the books sold was \$1,440.
- 6 Received \$100 credit for books returned to Kline Publishers.
- 9 Paid Kline Publishers in full, less discount.
- 15 Received payment in full from Reading Rainbow.
- 17 Sold books on account to Blanco Books for \$1,800. The cost of the books sold was \$1,080.
- 20 Purchased books on account for \$1,500 from Dietz Publishers, FOB destination, terms 2/15, n/30. The appropriate party also made a cash payment of \$50 for the freight on this date.
- 24 Received payment in full from Blanco Books.
- 26 Paid Dietz Publishers in full, less discount.
- 28 Sold books on account to Reddy Bookstore for \$1,400. The cost of the books sold was \$850.
- 30 Granted Reddy Bookstore \$120 credit for books returned costing \$72.

Powell's Book Warehouse's chart of accounts includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 201 Accounts Payable, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, No. 414 Sales Discounts, and No. 505 Cost of Goods Sold.

Instructions

Journalize the transactions for the month of June for Powell's Book Warehouse using a perpetual inventory system.

Journalize, post, and prepare a partial income statement.

(LO 2, 3, 5)

P5-2A Latona Hardware Store completed the following merchandising transactions in the month of May. At the beginning of May, the ledger of Latona showed Cash of \$5,000 and Common Stock of \$5,000.

- May 1 Purchased merchandise on account from Gray's Wholesale Supply \$4,200, terms 2/10, n/30.
- 2 Sold merchandise on account \$2,100, terms 1/10, n/30. The cost of the merchandise sold was \$1,300.
- 5 Received credit from Gray's Wholesale Supply for merchandise returned \$300.
- 9 Received collections in full, less discounts, from customers billed on sales of \$2,100 on May 2.
- 10 Paid Gray's Wholesale Supply in full, less discount.
- 11 Purchased supplies for cash \$400.
- 12 Purchased merchandise for cash \$1,400.
- 15 Received refund for poor quality merchandise from supplier on cash purchase \$150.
- 17 Purchased merchandise from Amland Distributors \$1,300, FOB shipping point, terms 2/10, n/30.
- 19 Paid freight on May 17 purchase \$130.
- 24 Sold merchandise for cash \$3,200. The merchandise sold had a cost of \$2,000.
- 25 Purchased merchandise from Horvath, Inc. \$620, FOB destination, terms 2/10, n/30.
- 27 Paid Amland Distributors in full, less discount.
- 29 Made refunds to cash customers for defective merchandise \$70. The returned merchandise had a fair value of \$30.
- 31 Sold merchandise on account \$1,000 terms n/30. The cost of the merchandise sold was \$560.

Latona Hardware's chart of accounts includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 126 Supplies, No. 201 Accounts Payable, No. 311 Common Stock, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, No. 414 Sales Discounts, and No. 505 Cost of Goods Sold.

Instructions

- Journalize the transactions using a perpetual inventory system.
- Enter the beginning cash and common stock balances and post the transactions. (Use J1 for the journal reference.)
- Prepare an income statement through gross profit for the month of May 2017.

(c) Gross profit \$2,379

P5-3A The Deluxe Store is located in midtown Madison. During the past several years, net income has been declining because of suburban shopping centers. At the end of the company's fiscal year on November 30, 2017, the following accounts appeared in two of its trial balances.

Prepare financial statements and adjusting and closing entries.

(LO 4, 5)

	Unadjusted	Adjusted		Unadjusted	Adjusted
Accounts Payable	\$ 25,200	\$ 25,200	Inventory	\$ 29,000	\$ 29,000
Accounts Receivable	30,500	30,500	Notes Payable	37,000	37,000
Accumulated Depr.—Equip.	34,000	45,000	Prepaid Insurance	10,500	3,500
Cash	26,000	26,000	Property Tax Expense		2,500
Common Stock	40,000	40,000	Property Taxes Payable		2,500
Cost of Goods Sold	507,000	507,000	Rent Expense	15,000	15,000
Dividends	10,000	10,000	Retained Earnings	61,700	61,700
Freight-Out	6,500	6,500	Salaries and Wages Expense	96,000	96,000
Equipment	146,000	146,000	Sales Commissions Expense	6,500	11,000
Depreciation Expense		11,000	Sales Commissions Payable		4,500
Insurance Expense		7,000	Sales Returns and Allowances	8,000	8,000
Interest Expense	6,400	6,400	Sales Revenue	700,000	700,000
Interest Revenue	8,000	8,000	Utilities Expense	8,500	8,500

Instructions

- Prepare a multiple-step income statement, a retained earnings statement, and a classified balance sheet. Notes payable are due in 2020.
- Journalize the adjusting entries that were made.
- Journalize the closing entries that are necessary.

(a) Net income \$29,100
Retained earnings \$80,800
Total assets \$190,000

P5-4A Adam Nichols, a former disc golf star, operates Adam's Discorama. At the beginning of the current season on April 1, the ledger of Adam's Discorama showed Cash \$1,800, Inventory \$2,500, and Common Stock \$4,300. The following transactions were completed during April.

Journalize, post, and prepare a trial balance.

(LO 2, 3, 4)

- Apr. 5 Purchased golf discs, bags, and other inventory on account from Rayford Co. \$1,200, FOB shipping point, terms 2/10, n/60.
- 7 Paid freight on the Rayford purchase \$50.
- 9 Received credit from Rayford Co. for merchandise returned \$100.
- 10 Sold merchandise on account for \$900, terms n/30. The merchandise sold had a cost of \$540.
- 12 Purchased disc golf shirts and other accessories on account from Galaxy Sportswear \$670, terms 1/10, n/30.
- 14 Paid Rayford Co. in full, less discount.
- 17 Received credit from Galaxy Sportswear for merchandise returned \$70.
- 20 Made sales on account for \$610, terms n/30. The cost of the merchandise sold was \$370.
- 21 Paid Galaxy Sportswear in full, less discount.
- 27 Granted an allowance to customers for clothing that was flawed \$20.
- 30 Received payments on account from customers \$900.

The chart of accounts for the store includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 201 Accounts Payable, No. 311 Common Stock, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, and No. 505 Cost of Goods Sold.

Instructions

- (a) Journalize the April transactions using a perpetual inventory system.
- (b) Enter the beginning balances in the ledger accounts and post the April transactions. (Use J1 for the journal reference.)
- (c) Prepare a trial balance on April 30, 2017.

(c) Total debits \$5,810

Complete accounting cycle beginning with a worksheet.

(LO 4, 5, 6)

***P5-5A** The trial balance of Valdez Fashion Center contained the following accounts at November 30, the end of the company's fiscal year.

VALDEZ FASHION CENTER
Trial Balance
November 30, 2017

	Debit	Credit
Cash	\$ 8,700	
Accounts Receivable	30,700	
Inventory	44,700	
Supplies	6,200	
Equipment	133,000	
Accumulated Depreciation—Equipment		\$ 28,000
Notes Payable		51,000
Accounts Payable		48,500
Common Stock		50,000
Retained Earnings		40,000
Dividends	12,000	
Sales Revenue		755,200
Sales Returns and Allowances	8,800	
Cost of Goods Sold	497,400	
Salaries and Wages Expense	140,000	
Advertising Expense	24,400	
Utilities Expense	14,000	
Maintenance and Repairs Expense	12,100	
Freight-Out	16,700	
Rent Expense	24,000	
Totals	\$972,700	\$972,700

Adjustment data:

- 1. Supplies on hand totaled \$2,000.
- 2. Depreciation is \$11,500 on the equipment.
- 3. Interest of \$4,000 is accrued on notes payable at November 30.
- 4. Inventory actually on hand is \$44,400.

Instructions

- (a) Enter the trial balance on a worksheet, and complete the worksheet.
- (b) Prepare a multiple-step income statement and a retained earnings statement for the year, and a classified balance sheet as of November 30, 2017. Notes payable of \$20,000 are due in January 2018.
- (c) Journalize the adjusting entries.
- (d) Journalize the closing entries.
- (e) Prepare a post-closing trial balance.

- (a) Adj. trial balance \$988,200
Net loss \$2,200
- (b) Gross profit \$248,700
Total assets \$179,300

Determine cost of goods sold and gross profit under periodic approach.

(LO 5, 7)

***P5-6A** At the end of Dayton Department Store's fiscal year on November 30, 2017, these accounts appeared in its adjusted trial balance.

Freight-In	\$ 7,500	
Inventory	40,000	
Purchases	585,000	
Purchase Discounts	6,300	
Purchase Returns and Allowances	2,700	
Sales Revenue	1,000,000	
Sales Returns and Allowances	20,000	

Additional facts:

- 1. Merchandise inventory on November 30, 2017, is \$52,600.
- 2. Dayton Department Store uses a periodic system.

Instructions

Prepare an income statement through gross profit for the year ended November 30, 2017.

Gross profit \$409,100

***P5-7A** Alana Inc. operates a retail operation that purchases and sells home entertainment products. The company purchases all merchandise inventory on credit and uses a periodic inventory system. The Accounts Payable account is used for recording inventory purchases only; all other current liabilities are accrued in separate accounts. You are provided with the following selected information for the fiscal years 2014 through 2017, inclusive.

Calculate missing amounts and assess profitability.

(LO 5, 7)

	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>
Income Statement Data				
Sales revenue		\$55,000	\$ (e)	\$47,000
Cost of goods sold		(a)	13,800	14,300
Gross profit		38,300	35,200	(i)
Operating expenses		34,900	(f)	28,600
Net income		\$ (b)	\$ 2,500	\$ (j)
Balance Sheet Data				
Inventory	\$7,200	\$ (c)	\$ 8,100	\$ (k)
Accounts payable	3,200	3,600	2,500	(l)
Additional Information				
Purchases of merchandise inventory on account		\$14,200	\$ (g)	\$13,200
Cash payments to suppliers		(d)	(h)	13,600

(c) \$4,700

(g) \$18,200

(i) \$32,700

Instructions

- (a) Calculate the missing amounts.
 (b) Sales declined over the 3-year fiscal period, 2015–2017. Does that mean that profitability necessarily also declined? Explain, computing the gross profit rate and the profit margin (Net income ÷ Sales revenue) for each fiscal year to help support your answer. (Round to one decimal place.)

***P5-8A** At the beginning of the current season on April 1, the ledger of Kokott Pro Shop showed Cash \$3,000, Inventory \$4,000, and Common Stock \$7,000. These transactions occurred during April 2017.

Journalize, post, and prepare trial balance and partial income statement using periodic approach.

- Apr. 5 Purchased golf bags, clubs, and balls on account from Hogan Co. \$1,200, FOB shipping point, terms 2/10, n/60.
 7 Paid freight on Hogan Co. purchases \$50.
 9 Received credit from Hogan Co. for merchandise returned \$100.
 10 Sold merchandise on account to customers \$600, terms n/30.
 12 Purchased golf shoes, sweaters, and other accessories on account from Duffer Sportswear \$450, terms 1/10, n/30.
 14 Paid Hogan Co. in full.
 17 Received credit from Duffer Sportswear for merchandise returned \$50.
 20 Made sales on account to customers \$600, terms n/30.
 21 Paid Duffer Sportswear in full.
 27 Granted credit to customers for clothing that had flaws \$35.
 30 Received payments on account from customers \$600.

(LO 7)

The chart of accounts for the pro shop includes Cash, Accounts Receivable, Inventory, Accounts Payable, Common Stock, Sales Revenue, Sales Returns and Allowances, Purchases, Purchase Returns and Allowances, Purchase Discounts, and Freight-In.

Instructions

- (a) Journalize the April transactions using a periodic inventory system.
 (b) Using T-accounts, enter the beginning balances in the ledger accounts and post the April transactions.
 (c) Prepare a trial balance on April 30, 2017.
 (d) Prepare an income statement through gross profit, assuming merchandise inventory on hand at April 30 is \$4,824.

(c) Tot. trial balance \$8,376
 Gross profit \$465

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEM

CP5 On December 1, 2017, Prosen Distributing Company had the following account balances.

	<u>Debit</u>		<u>Credit</u>
Cash	\$ 7,200	Accumulated Depreciation—	
Accounts Receivable	4,600	Equipment	\$ 2,200
Inventory	12,000	Accounts Payable	4,500
Supplies	1,200	Salaries and Wages Payable	1,000
Equipment	22,000	Common Stock	30,000
	<u>\$47,000</u>	Retained Earnings	9,300
			<u>\$47,000</u>

During December, the company completed the following summary transactions.

- Dec. 6 Paid \$1,600 for salaries and wages due employees, of which \$600 is for December and \$1,000 is for November salaries and wages payable.
- 8 Received \$1,900 cash from customers in payment of account (no discount allowed).
- 10 Sold merchandise for cash \$6,300. The cost of the merchandise sold was \$4,100.
- 13 Purchased merchandise on account from Maglio Co. \$9,000, terms 2/10, n/30.
- 15 Purchased supplies for cash \$2,000.
- 18 Sold merchandise on account \$12,000, terms 3/10, n/30. The cost of the merchandise sold was \$8,000.
- 20 Paid salaries and wages \$1,800.
- 23 Paid Maglio Co. in full, less discount.
- 27 Received collections in full, less discounts, from customers billed on December 18.

Adjustment data:

- Accrued salaries and wages payable \$800.
- Depreciation \$200 per month.
- Supplies on hand \$1,500.

Instructions

- Journalize the December transactions using a perpetual inventory system.
- Enter the December 1 balances in the ledger T-accounts and post the December transactions. Use Cost of Goods Sold, Depreciation Expense, Salaries and Wages Expense, Sales Revenue, Sales Discounts, and Supplies Expense.
- Journalize and post adjusting entries.
- Prepare an adjusted trial balance.
- Prepare an income statement and a retained earnings statement for December and a classified balance sheet at December 31.

(d) Totals \$65,300
(e) Net income \$740

CONTINUING PROBLEM**COOKIE CREATIONS**

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 4.)

CC5 Because Natalie has had such a successful first few months, she is considering other opportunities to develop her business. One opportunity is the sale of fine European mixers. The owner of Kzinski Supply Company has approached Natalie to become the exclusive U.S. distributor of these fine mixers. The current cost of a mixer is approximately \$525 (U.S.), and Natalie would sell each one for \$1,050. Natalie comes to you for advice on how to account for these mixers.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR **PERSPECTIVE**

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: **Apple Inc.**

BYP5-1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

Answer the following questions using Apple's Consolidated Statement of Income.

- What was the percentage change in (1) sales and in (2) net income from 2011 to 2012 and from 2012 to 2013?
- What was the company's gross profit rate in 2011, 2012, and 2013?
- What was the company's percentage of net income to net sales in 2011, 2012, and 2013? Comment on any trend in this percentage.

Comparative Analysis Problem: **PepsiCo, Inc. vs. The Coca-Cola Company**

BYP5-2 **PepsiCo's** financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- Based on the information contained in these financial statements, determine each of the following for each company.
 - Gross profit for 2013.
 - Gross profit rate for 2013.
 - Operating income for 2013.
 - Percentage change in operating income from 2012 to 2013.
- What conclusions concerning the relative profitability of the two companies can you draw from these data?

Comparative Analysis Problem: **Amazon.com, Inc. vs. Wal-Mart Stores, Inc.**

BYP5-3 **Amazon.com, Inc.'s** financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. (Use Wal-Mart's January 31, 2014, financial statements for comparative purposes.) Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- Based on the information contained in these financial statements, determine each of the following for each company. Use Amazon's net product sales to compute gross profit information.
 - Gross profit for 2013.
 - Gross profit rate for 2013.
 - Operating income for 2013.
 - Percentage change in operating income from 2012 to 2013.
- What conclusions concerning the relative profitability of the two companies can you draw from these data?

Real-World Focus

BYP5-4 No financial decision-maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Internet.

Address: biz.yahoo.com/i, or go to www.wiley.com/college/weygandt

Steps:

1. Type in either PepsiCo or Coca-Cola.
2. Choose **News**.
3. Select an article that sounds interesting to you.

Instructions

- (a) What was the source of the article (e.g., Reuters, Businesswire, PR Newswire)?
- (b) Assume that you are a personal financial planner and that one of your clients owns stock in the company. Write a brief memo to your client, summarizing the article and explaining the implications of the article for his or her investment.

CRITICAL THINKING**Decision-Making Across the Organization**

BYP5-5 Three years ago, Dana Mann and her brother-in-law Eric Boldt opened Family Department Store. For the first two years, business was good, but the following condensed income results for 2016 were disappointing.

FAMILY DEPARTMENT STORE
Income Statement
For The Year Ended December 31, 2016

Net sales		\$700,000
Cost of goods sold		<u>553,000</u>
Gross profit		147,000
Operating expenses		
Selling expenses	\$100,000	
Administrative expenses	<u>20,000</u>	<u>120,000</u>
Net income		<u>\$ 27,000</u>

Dana believes the problem lies in the relatively low gross profit rate (gross profit divided by net sales) of 21%. Eric believes the problem is that operating expenses are too high.

Dana thinks the gross profit rate can be improved by making both of the following changes. She does not anticipate that these changes will have any effect on operating expenses.

1. Increase average selling prices by 17%. This increase is expected to lower sales volume so that total sales will increase only 6%.
2. Buy merchandise in larger quantities and take all purchase discounts. These changes are expected to increase the gross profit rate by 3 percentage points.

Eric thinks expenses can be cut by making both of the following changes. He feels that these changes will not have any effect on net sales.

1. Cut sales salaries of \$60,000 in half and give sales personnel a commission of 2% of net sales.
2. Reduce store deliveries to one day per week rather than twice a week. This change will reduce delivery expenses of \$30,000 by 40%.

Dana and Eric come to you for help in deciding the best way to improve net income.

Instructions

With the class divided into groups, answer the following.

- (a) Prepare a condensed income statement for 2017, assuming (1) Dana's changes are implemented and (2) Eric's ideas are adopted.
- (b) What is your recommendation to Dana and Eric?
- (c) Prepare a condensed income statement for 2017, assuming both sets of proposed changes are made.

Communication Activity

BYP5-6 The following situation is in chronological order.

1. Connor decides to buy a surfboard.
2. He calls Surfing USA Co. to inquire about its surfboards.

3. Two days later, he requests Surfing USA Co. to make a surfboard.
4. Three days later, Surfing USA Co. sends him a purchase order to fill out.
5. He sends back the purchase order.
6. Surfing USA Co. receives the completed purchase order.
7. Surfing USA Co. completes the surfboard.
8. Connor picks up the surfboard.
9. Surfing USA Co. bills Connor.
10. Surfing USA Co. receives payment from Connor.

Instructions

In a memo to the president of Surfing USA Co., answer the following.

- (a) When should Surfing USA Co. record the sale?
- (b) Suppose that with his purchase order, Connor is required to make a down payment. Would that change your answer?

Ethics Case

BYP5-7 Jacquie Boynton was just hired as the assistant treasurer of Key West Stores. The company is a specialty chain store with nine retail stores concentrated in one metropolitan area. Among other things, the payment of all invoices is centralized in one of the departments Jacquie will manage. Her primary responsibility is to maintain the company's high credit rating by paying all bills when due and to take advantage of all cash discounts.

Phelan Carter, the former assistant treasurer who has been promoted to treasurer, is training Jacquie in her new duties. He instructs Jacquie that she is to continue the practice of preparing all checks "net of discount" and dating the checks the last day of the discount period. "But," Phelan continues, "we always hold the checks at least 4 days beyond the discount period before mailing them. That way, we get another 4 days of interest on our money. Most of our creditors need our business and don't complain. And, if they scream about our missing the discount period, we blame it on the mail room or the post office. We've only lost one discount out of every hundred we take that way. I think everybody does it. By the way, welcome to our team!"

Instructions

- (a) What are the ethical considerations in this case?
- (b) Who are the stakeholders that are harmed or benefitted in this situation?
- (c) Should Jacquie continue the practice started by Phelan? Does she have any choice?

All About You

BYP5-8 There are many situations in business where it is difficult to determine the proper period in which to record revenue. Suppose that after graduation with a degree in finance, you take a job as a manager at a consumer electronics store called Impact Electronics. The company has expanded rapidly in order to compete with **Best Buy**. Impact has also begun selling gift cards for its electronic products. The cards are available in any dollar amount and allow the holder of the card to purchase an item for up to 2 years from the time the card is purchased. If the card is not used during that 2 years, it expires.

Instructions

Answer the following questions.

At what point should the revenue from the gift cards be recognized? Should the revenue be recognized at the time the card is sold, or should it be recorded when the card is redeemed? Explain the reasoning to support your answers.

FASB Codification Activity

BYP5-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

Instructions

- (a) Access the glossary ("Master Glossary") to answer the following:
 - (1) What is the definition provided for inventory?
 - (2) What is a customer?
- (b) What guidance does the Codification provide concerning reporting inventories above cost?

A Look at IFRS

LEARNING
OBJECTIVE

8

Compare the accounting for merchandising under GAAP and IFRS.

The basic accounting entries for merchandising are the same under both GAAP and IFRS. The income statement is a required statement under both sets of standards. The basic format is similar although some differences do exist.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to inventories.

Similarities

- Under both GAAP and IFRS, a company can choose to use either a perpetual or a periodic inventory system.
- The definition of inventories is basically the same under GAAP and IFRS.
- As indicated above, the basic accounting entries for merchandising are the same under both GAAP and IFRS.
- Both GAAP and IFRS require that income statement information be presented for multiple years. For example, IFRS requires that 2 years of income statement information be presented, whereas GAAP requires 3 years.

Differences

- Under GAAP, Companies generally classify income statement items by function. Classification by function leads to descriptions like administration, distribution, and manufacturing. Under IFRS, companies must classify expenses either by nature or by function. Classification by nature leads to descriptions such as the following: salaries, depreciation expense, and utilities expense. If a company uses the functional-expense method on the income statement, disclosure by nature is required in the notes to the financial statements.
- Presentation of the income statement under GAAP follows either a single-step or multiple-step format. IFRS does not mention a single-step or multiple-step approach.
- Under IFRS, revaluation of land, buildings, and intangible assets is permitted. The initial gains and losses resulting from this revaluation are reported as adjustments to equity, often referred to as **other comprehensive income**. The effect of this difference is that the use of IFRS result in more transactions affecting equity (other comprehensive income) but not net income.

Looking to the Future

The IASB and FASB are working on a project that would rework the structure of financial statements. Specifically, this project will address the issue of how to classify various items in the income statement. A main goal of this new approach is to provide information that better represents how businesses are run. In addition, this approach draws attention away from just one number—net income. It will adopt major groupings similar to those currently used by the statement of cash flows (operating, investing, and financing), so that numbers can be more readily traced across statements. For example, the amount of income that is generated by operations would be traceable to the assets and liabilities used to generate the income. Finally, this approach would also provide detail, beyond that currently seen in most statements (either GAAP or IFRS), by requiring that line items be presented both by function and by nature. The new financial statement format was heavily influenced by suggestions from financial statement analysts.

IFRS Practice

IFRS Self-Test Questions

- Which of the following would **not** be included in the definition of inventory under IFRS?
 - Photocopy paper held for sale by an office-supply store.
 - Stereo equipment held for sale by an electronics store.
 - Used office equipment held for sale by the human relations department of a plastics company.
 - All of the above would meet the definition.
- Which of the following would **not** be a line item of a company reporting costs by nature?
 - Depreciation expense.
 - Salaries expense.
 - Interest expense.
 - Manufacturing expense.
- Which of the following would **not** be a line item of a company reporting costs by function?
 - Administration.
 - Manufacturing.
 - Utilities expense.
 - Distribution.
- Which of the following statements is **false**?
 - IFRS specifically requires use of a multiple-step income statement.
 - Under IFRS, companies can use either a perpetual or periodic system.
 - The proposed new format for financial statements was heavily influenced by the suggestions of financial statement analysts.
 - The new income statement format will try to de-emphasize the focus on the “net income” line item.

IFRS Exercises

IFRS5-1 Explain the difference between the “nature-of-expense” and “function-of-expense” classifications.

IFRS5-2 For each of the following income statement line items, state whether the item is a “by nature” expense item or a “by function” expense item.

_____ Cost of goods sold	_____ Utilities expense
_____ Depreciation expense	_____ Delivery expense
_____ Salaries and wages expense	_____ General and administrative expenses
_____ Selling expenses	

IFRS5-3 Matilda Company reported the following amounts (in euros) in 2017: Net income, €150,000; Unrealized gain related to revaluation of buildings, €10,000; and Unrealized loss on non-trading securities, €(35,000). Determine Matilda’s total comprehensive income for 2017.

International Financial Reporting Problem: Louis Vuitton

IFRS5-4 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company’s complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Use Louis Vuitton’s annual report to answer the following questions.

- Does Louis Vuitton use a multiple-step or a single-step income statement format? Explain how you made your determination.
- Instead of “interest expense,” what label does Louis Vuitton use for interest costs that it incurs?
- Using the notes to the company’s financial statements, determine the following:
 - Composition of the inventory.
 - Amount of inventory (gross) before impairment.

Answers to IFRS Self-Test Questions

6

Inventories

CHAPTER PREVIEW In the previous chapter, we discussed the accounting for merchandise inventory using a perpetual inventory system. In this chapter, we explain the methods used to calculate the cost of inventory on hand at the balance sheet date and the cost of goods sold.

FEATURE STORY

“Where Is That Spare Bulldozer Blade?”

Let’s talk inventory—big, bulldozer-size inventory.

Caterpillar Inc. is the world’s largest manufacturer of construction and mining equipment, diesel and natural gas engines, and industrial gas turbines. It sells its products in over 200 countries, making it one of the most successful U.S. exporters. More than 70% of its productive assets are located domestically, and nearly 50% of its sales are foreign.

In the past, Caterpillar’s profitability suffered, but today it is very successful. A big part of this turnaround can be attributed to effective management of its inventory. Imagine what it costs Caterpillar to have too many bulldozers sitting around in inventory—a situation the company definitely wants to avoid. Yet Caterpillar must also make sure it has enough inventory to meet demand.

At one time during a 7-year period, Caterpillar’s sales increased by 100% while its inventory increased by only 50%. To achieve this dramatic reduction in the amount of resources tied up in inventory while continuing to meet customers’ needs, Caterpillar used a two-pronged approach. First, it completed a factory modernization program, which greatly increased its production efficiency. The program reduced by

60% the amount of inventory the company processes at any one time. It also reduced by an incredible 75% the time it takes to manufacture a part.

Second, Caterpillar dramatically improved its parts distribution system. It ships more than 100,000 items daily from its 23 distribution centers strategically located around the world (10 million square feet of warehouse space—remember, we’re talking bulldozers). The company can virtually guarantee that it can get any part to anywhere in the world within 24 hours.

These changes led to record exports, profits, and revenues for Caterpillar. It would seem that things couldn’t be better. But industry analysts, as well as the company’s managers, thought otherwise. In order to maintain Caterpillar’s position as the industry leader, management began another major overhaul of inventory production and inventory management processes. The goal: to cut the number of repairs in half, increase productivity by 20%, and increase inventory turnover by 40%.

In short, Caterpillar’s ability to manage its inventory has been a key reason for its past success and will very likely play a huge part in its future profitability as well.

CHAPTER OUTLINE

Learning Objectives

1

Discuss how to classify and determine inventory.

- Classifying inventory
- Determine inventory quantities

DO IT!

1

Rules of Ownership

2

Apply inventory cost flow methods and discuss their financial effects.

- Specific identification
- Cost flow assumptions
- Financial statement and tax effects
- Using cost flow methods consistently

DO IT!

2

Cost Flow Methods

3

Indicate the effects of inventory errors on the financial statements.

- Income statement effects
- Balance sheet effects

DO IT!

3

Inventory Errors

4

Explain the statement presentation and analysis of inventory.

- Presentation
- Lower-of-cost-or-market
- Analysis

DO IT!

4

LCM and Inventory Turnover

Go to the **REVIEW AND PRACTICE** section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit **WILEYPLUS with ORION** for additional tutorials and practice opportunities.

Discuss how to classify and determine inventory.

Two important steps in the reporting of inventory at the end of the accounting period are the classification of inventory based on its degree of completeness and the determination of inventory amounts.

Classifying Inventory

How a company classifies its inventory depends on whether the firm is a merchandiser or a manufacturer. In a **merchandising** company, such as those described in Chapter 5, inventory consists of many different items. For example, in a grocery store, canned goods, dairy products, meats, and produce are just a few of the inventory items on hand. These items have two common characteristics: (1) they are owned by the company, and (2) they are in a form ready for sale to customers in the ordinary course of business. Thus, merchandisers need only one inventory classification, **merchandise inventory**, to describe the many different items that make up the total inventory.

In a **manufacturing** company, some inventory may not yet be ready for sale. As a result, manufacturers usually classify inventory into three categories: finished goods, work in process, and raw materials. **Finished goods inventory** is manufactured items that are completed and ready for sale. **Work in process** is that portion of manufactured inventory that has been placed into the production process but is not yet complete. **Raw materials** are the basic goods that will be used in production but have not yet been placed into production.

For example, **Caterpillar** classifies earth-moving tractors completed and ready for sale as **finished goods**. It classifies the tractors on the assembly line in various stages of production as **work in process**. The steel, glass, tires, and other components that are on hand waiting to be used in the production of tractors are identified as **raw materials**. Illustration 6-1 shows an adapted excerpt from Note 7 of Caterpillar's annual report.

Helpful Hint

Regardless of the classification, companies report all inventories under Current Assets on the balance sheet.

Illustration 6-1

Composition of Caterpillar's inventory

(millions of dollars)	December 31		
	2013	2012	2011
Raw materials	\$ 2,966	\$ 3,573	\$ 3,766
Work-in-process	2,589	2,920	2,959
Finished goods	6,785	8,767	7,562
Other	285	287	257
Total inventories	\$12,625	\$15,547	\$14,544

By observing the levels and changes in the levels of these three inventory types, financial statement users can gain insight into management's production plans. For example, low levels of raw materials and high levels of finished goods suggest that management believes it has enough inventory on hand and production will be slowing down—perhaps in anticipation of a recession. Conversely, high levels of raw materials and low levels of finished goods probably signal that management is planning to step up production.

Many companies have significantly lowered inventory levels and costs using **just-in-time (JIT) inventory** methods. Under a just-in-time method, companies manufacture or purchase goods only when needed for use. **Dell** is famous for having developed a system for making computers in response to individual customer requests. Even though it makes each computer to meet each customer's particular specifications, Dell is able to assemble the computer and put it on a truck in less than 48 hours. The success of the JIT system depends on

reliable suppliers. By integrating its information systems with those of its suppliers, Dell reduced its inventories to nearly zero. This is a huge advantage in an industry where products become obsolete nearly overnight.

The accounting concepts discussed in this chapter apply to the inventory classifications of both merchandising and manufacturing companies. Our focus here is on merchandise inventory.

Accounting Across the Organization Ford

© PeskyMonkey/iStockphoto

A Big Hiccup

JIT can save a company a lot of money, but it isn't without risk. An unexpected disruption in the supply chain can cost a company a lot of money. Japanese automakers experienced just such a disruption when a 6.8-magnitude earthquake caused major damage to the company that produces 50% of their piston rings. The rings themselves cost only \$1.50, but you can't

make a car without them. As a result, the automakers were forced to shut down production for a few days—a loss of tens of thousands of cars.

Similarly, a major snowstorm halted production at the Canadian plants of Ford. A Ford spokesperson said, "Because the plants run with just-in-time inventory, we don't have large stockpiles of parts sitting around. When you have a somewhat significant disruption, you can pretty quickly run out of parts."

Sources: Amy Chozick, "A Key Strategy of Japan's Car Makers Backfires," *Wall Street Journal* (July 20, 2007); and Kate Linebaugh, "Canada Military Evacuates Motorists Stranded by Snow," *Wall Street Journal* (December 15, 2010).

What steps might the companies take to avoid such a serious disruption in the future? (Go to WileyPLUS for this answer and additional questions.)

Determining Inventory Quantities

No matter whether they are using a periodic or perpetual inventory system, all companies need to determine inventory quantities at the end of the accounting period. If using a perpetual system, companies take a physical inventory for the following reasons:

1. To check the accuracy of their perpetual inventory records.
2. To determine the amount of inventory lost due to wasted raw materials, shoplifting, or employee theft.

Companies using a periodic inventory system take a physical inventory for **two different purposes**: to determine the inventory on hand at the balance sheet date, and to determine the cost of goods sold for the period.

Determining inventory quantities involves two steps: (1) taking a physical inventory of goods on hand and (2) determining the ownership of goods.

TAKING A PHYSICAL INVENTORY

Companies take a physical inventory at the end of the accounting period. Taking a physical inventory involves actually counting, weighing, or measuring each kind of inventory on hand. In many companies, taking an inventory is a formidable task. Retailers such as **Target**, **True Value Hardware**, or **Home Depot** have thousands of different inventory items. An inventory count is generally more accurate when goods are not being sold or received during the counting. Consequently, companies often "take inventory" when the business is closed or when business is slow. Many retailers close early on a chosen day in January—after the holiday sales and returns, when inventories are at their lowest level—to count inventory. **Wal-Mart Stores, Inc.**, for example, has a year-end of January 31.

ETHICS NOTE

In a famous fraud, a salad oil company filled its storage tanks mostly with water. The oil rose to the top, so auditors thought the tanks were full of oil. The company also said it had more tanks than it really did: It repainted numbers on the tanks to confuse auditors.

Ethics Insight Leslie Fay

© Greg Brookes/iStockphoto

Falsifying Inventory to Boost Income

Managers at women's apparel maker **Leslie Fay** were convicted of falsifying inventory records to boost net income—and consequently to boost management bonuses. In another case, executives at **Craig Consumer Electronics**

were accused of defrauding lenders by manipulating inventory records. The indictment said the company classified “defective goods as new or refurbished” and claimed that it owned certain shipments “from overseas suppliers” when, in fact, Craig either did not own the shipments or the shipments did not exist.

What effect does an overstatement of inventory have on a company's financial statements? (Go to **WileyPLUS** for this answer and additional questions.)

DETERMINING OWNERSHIP OF GOODS

One challenge in computing inventory quantities is determining what inventory a company owns. To determine ownership of goods, two questions must be answered: Do all of the goods included in the count belong to the company? Does the company own any goods that were not included in the count?

GOODS IN TRANSIT A complication in determining ownership is **goods in transit** (on board a truck, train, ship, or plane) at the end of the period. The company may have purchased goods that have not yet been received, or it may have sold goods that have not yet been delivered. To arrive at an accurate count, the company must determine ownership of these goods.

Goods in transit should be included in the inventory of the company that has legal title to the goods. Legal title is determined by the terms of the sale, as shown in Illustration 6-2 and described below.

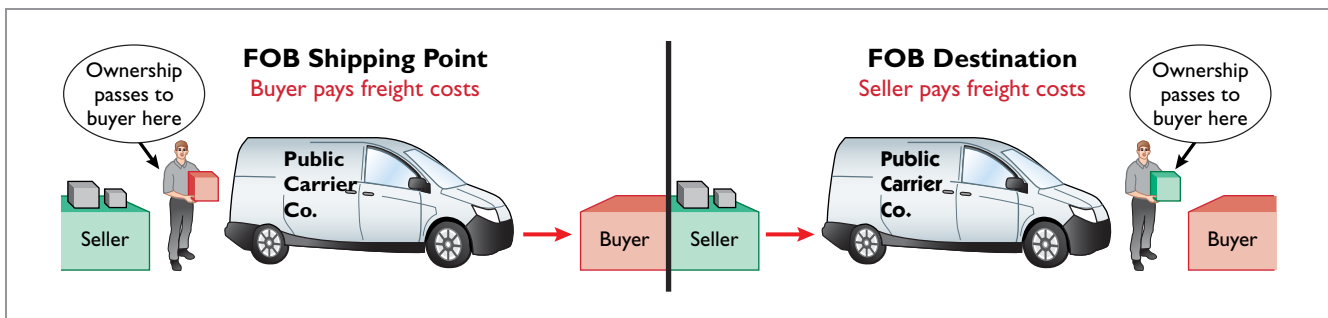

Illustration 6-2
Terms of sale

1. When the terms are **FOB (free on board) shipping point**, ownership of the goods passes to the buyer when the public carrier accepts the goods from the seller.
2. When the terms are **FOB destination**, ownership of the goods remains with the seller until the goods reach the buyer.

If goods in transit at the statement date are ignored, inventory quantities may be seriously miscounted. Assume, for example, that Hargrove Company has 20,000 units of inventory on hand on December 31. It also has the following goods in transit:

1. Sales of 1,500 units shipped December 31 FOB destination.
 2. Purchases of 2,500 units shipped FOB shipping point by the seller on December 31.
- Hargrove has legal title to both the 1,500 units sold and the 2,500 units purchased. If the company ignores the units in transit, it would understate inventory quantities by 4,000 units (1,500 + 2,500).

As we will see later in the chapter, inaccurate inventory counts affect not only the inventory amount shown on the balance sheet but also the cost of goods sold calculation on the income statement.

CONSIGNED GOODS In some lines of business, it is common to hold the goods of other parties and try to sell the goods for them for a fee, but without taking ownership of the goods. These are called **consigned goods**.

For example, you might have a used car that you would like to sell. If you take the item to a dealer, the dealer might be willing to put the car on its lot and charge you a commission if it is sold. Under this agreement, the dealer **would not take ownership** of the car, which would still belong to you. Therefore, if an inventory count were taken, the car would not be included in the dealer's inventory because the dealer does not own it.

Many car, boat, and antique dealers sell goods on consignment to keep their inventory costs down and to avoid the risk of purchasing an item that they will not be able to sell. Today, even some manufacturers are making consignment agreements with their suppliers in order to keep their inventory levels low.

ANATOMY OF A FRAUD

Ted Nickerson, CEO of clock manufacturer Dally Industries, was feared by all of his employees. Ted also had expensive tastes. To support this habit, Ted took out large loans, which he collateralized with his shares of Dally Industries stock. If the price of Dally's stock fell, he was required to provide the bank with more shares of stock. To achieve target net income figures and thus maintain the stock price, Ted coerced employees in the company to alter inventory figures. Inventory quantities were manipulated by changing the amounts on inventory control tags after the year-end physical inventory count. For example, if a tag said there were 20 units of a particular item, the tag was changed to 220. Similarly, the unit costs that were used to determine the value of ending inventory were increased from, for example, \$125 per unit to \$1,250. Both of these fraudulent changes had the effect of increasing the amount of reported ending inventory. This reduced cost of goods sold and increased net income.

Total take: \$245,000

THE MISSING CONTROL

Independent internal verification. The company should have spot-checked its inventory records periodically, verifying that the number of units in the records agreed with the amount on hand and that the unit costs agreed with vendor price sheets.

DO IT!

1

Rules of Ownership

Hasbeen Company completed its inventory count. It arrived at a total inventory value of \$200,000. As a new member of Hasbeen's accounting department, you have been given the information listed below. Discuss how this information affects the reported cost of inventory.

1. Hasbeen included in the inventory goods held on consignment for Falls Co., costing \$15,000.
2. The company did not include in the count purchased goods of \$10,000 which were in transit (terms: FOB shipping point).
3. The company did not include in the count sold inventory with a cost of \$12,000 which was in transit (terms: FOB shipping point).

Solution

The goods of \$15,000 held on consignment should be deducted from the inventory count. The goods of \$10,000 purchased FOB shipping point should be added to the inventory count. Sold goods of \$12,000 which were in transit FOB shipping point should not be included in the ending inventory. Thus, inventory should be carried at \$195,000 ($\$200,000 - \$15,000 + \$10,000$).

Action Plan

- ✓ Apply the rules of ownership to goods held on consignment.
- ✓ Apply the rules of ownership to goods in transit.

LEARNING
OBJECTIVE

2

Apply inventory cost flow methods and discuss their financial effects.

Inventory is accounted for at cost. Cost includes all expenditures necessary to acquire goods and place them in a condition ready for sale. For example, freight costs incurred to acquire inventory are added to the cost of inventory, but the cost of shipping goods to a customer are a selling expense.

After a company has determined the quantity of units of inventory, it applies unit costs to the quantities to compute the total cost of the inventory and the cost of goods sold. This process can be complicated if a company has purchased inventory items at different times and at different prices.

For example, assume that Crivitz TV Company purchases three identical 50-inch TVs on different dates at costs of \$700, \$750, and \$800. During the year, Crivitz sold two sets at \$1,200 each. These facts are summarized in Illustration 6-3.

Illustration 6-3

Data for inventory costing example

Purchases

February 3	1 TV	at	\$700
March 5	1 TV	at	\$750
May 22	1 TV	at	\$800

Sales

June 1	2 TVs	for	\$2,400 (\$1,200 × 2)
--------	-------	-----	-----------------------

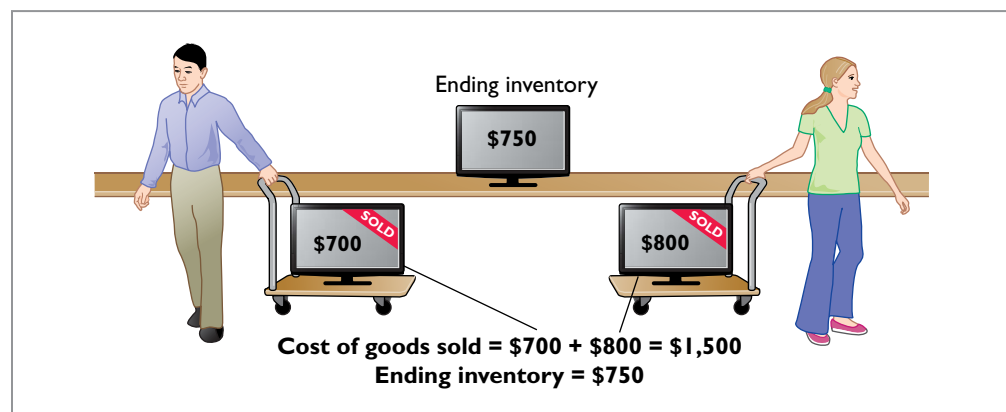

Cost of goods sold will differ depending on which two TVs the company sold. For example, it might be \$1,450 (\$700 + \$750), or \$1,500 (\$700 + \$800), or \$1,550 (\$750 + \$800). In this section, we discuss alternative costing methods available to Crivitz.

Specific Identification

If Crivitz can positively identify which particular units it sold and which are still in ending inventory, it can use the **specific identification method** of inventory costing. For example, if Crivitz sold the TVs it purchased on February 3 and May 22, then its cost of goods sold is \$1,500 (\$700 + \$800), and its ending inventory is \$750 (see Illustration 6-4). Using this method, companies can accurately determine ending inventory and cost of goods sold.

Illustration 6-4

Specific identification method

**ETHICS NOTE**

A major disadvantage of the specific identification method is that management may be able to manipulate net income. For example, it can boost net income by selling units purchased at a low cost, or reduce net income by selling units purchased at a high cost.

Specific identification requires that companies keep records of the original cost of each individual inventory item. Historically, specific identification was possible only when a company sold a limited variety of high-unit-cost items that could be identified clearly from the time of purchase through the time of sale. Examples of such products are cars, pianos, or expensive antiques.

Today, bar coding, electronic product codes, and radio frequency identification make it theoretically possible to do specific identification with nearly any type of product. The reality is, however, that this practice is still relatively rare. Instead, rather than keep track of the cost of each particular item sold, most companies make assumptions, called **cost flow assumptions**, about which units were sold.

Cost Flow Assumptions

Because specific identification is often impractical, other cost flow methods are permitted. These differ from specific identification in that they **assume** flows of costs that may be unrelated to the physical flow of goods. There are three assumed cost flow methods:

1. First-in, first-out (FIFO)
2. Last-in, first-out (LIFO)
3. Average-cost

There is no accounting requirement that the cost flow assumption be consistent with the physical movement of the goods. Company management selects the appropriate cost flow method.

To demonstrate the three cost flow methods, we will use a **periodic** inventory system. We assume a periodic system because **very few companies use perpetual LIFO, FIFO, or average-cost** to cost their inventory and related cost of goods sold. Instead, companies that use perpetual systems often use an assumed cost (called a standard cost) to record cost of goods sold at the time of sale. Then, at the end of the period when they count their inventory, they **recalculate cost of goods sold using periodic FIFO, LIFO, or average-cost** as shown in this chapter and adjust cost of goods sold to this recalculated number.¹

To illustrate the three inventory cost flow methods, we will use the data for Houston Electronics' Astro condensers, shown in Illustration 6-5.

HOUSTON ELECTRONICS Astro Condensers				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total units available for sale	1,000		\$12,000
	Units in ending inventory	(450)		
	Units sold	550		

Illustration 6-5
Data for Houston Electronics

The cost of goods sold formula in a periodic system is:

$$(\text{Beginning Inventory} + \text{Purchases}) - \text{Ending Inventory} = \text{Cost of Goods Sold}$$

Houston Electronics had a total of 1,000 units available to sell during the period (beginning inventory plus purchases). The total cost of these 1,000 units is \$12,000, referred to as **cost of goods available for sale**. A physical inventory

¹Also, some companies use a perpetual system to keep track of units, but they do not make an entry for perpetual cost of goods sold. In addition, firms that employ LIFO tend to use **dollar-value LIFO**, a method discussed in upper-level courses. FIFO periodic and FIFO perpetual give the same result. Therefore, companies should not incur the additional cost to use FIFO perpetual. Few companies use perpetual average-cost because of the added cost of record-keeping. Finally, for instructional purposes, we believe it is easier to demonstrate the cost flow assumptions under the periodic system, which makes it more pedagogically appropriate.

taken at December 31 determined that there were 450 units in ending inventory. Therefore, Houston sold 550 units ($1,000 - 450$) during the period. To determine the cost of the 550 units that were sold (the cost of goods sold), we assign a cost to the ending inventory and subtract that value from the cost of goods available for sale. The value assigned to the ending inventory **will depend on which cost flow method we use**. No matter which cost flow assumption we use, though, the sum of cost of goods sold plus the cost of the ending inventory must equal the cost of goods available for sale—in this case, \$12,000.

FIRST-IN, FIRST-OUT (FIFO)

The **first-in, first-out (FIFO) method** assumes that the **earliest goods** purchased are the first to be sold. FIFO often parallels the actual physical flow of merchandise. That is, it generally is good business practice to sell the oldest units first. Under the FIFO method, therefore, the **costs** of the earliest goods purchased are the first to be recognized in determining cost of goods sold. (This does not necessarily mean that the oldest units **are** sold first, but that the costs of the oldest units are **recognized** first. In a bin of picture hangers at the hardware store, for example, no one really knows, nor would it matter, which hangers are sold first.) Illustration 6-6 shows the allocation of the cost of goods available for sale at Houston Electronics under FIFO.

Illustration 6-6

Allocation of costs—
FIFO method

Helpful Hint

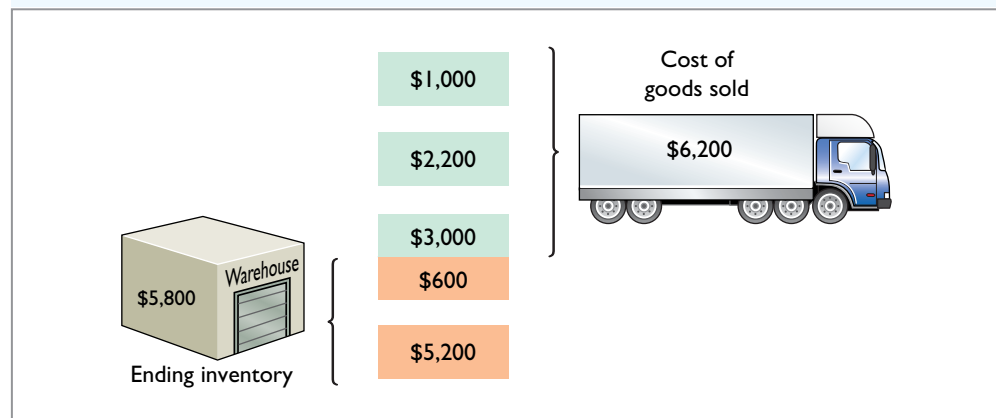

Note the sequencing of the allocation: (1) compute ending inventory, and (2) determine cost of goods sold.

Helpful Hint

Another way of thinking about the calculation of FIFO ending inventory is the **LISH assumption**—last in still here.

COST OF GOODS AVAILABLE FOR SALE				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total	1,000		\$12,000

STEP 1: ENDING INVENTORY				STEP 2: COST OF GOODS SOLD	
Date	Units	Unit Cost	Total Cost		
Nov. 27	400	\$13	\$ 5,200	Cost of goods available for sale	\$12,000
Aug. 24	50	12	600	Less: Ending inventory	5,800
Total	450		\$5,800	Cost of goods sold	\$ 6,200

Under FIFO, since it is assumed that the first goods purchased were the first goods sold, ending inventory is based on the prices of the most recent units purchased. That is, **under FIFO, companies obtain the cost of the ending inventory by taking the unit cost of the most recent purchase and working backward until all units of inventory have been costed**. In this example, Houston Electronics prices the 450 units of ending inventory using the **most recent** prices. The last

purchase was 400 units at \$13 on November 27. The remaining 50 units are priced using the unit cost of the second most recent purchase, \$12, on August 24. Next, Houston Electronics calculates cost of goods sold by subtracting the cost of the units **not sold** (ending inventory) from the cost of all goods available for sale.

Illustration 6-7 demonstrates that companies also can calculate cost of goods sold by pricing the 550 units sold using the prices of the first 550 units acquired. Note that of the 300 units purchased on August 24, only 250 units are assumed sold. This agrees with our calculation of the cost of ending inventory, where 50 of these units were assumed unsold and thus included in ending inventory.

Date	Units	Unit Cost	Total Cost
Jan. 1	100	\$10	\$ 1,000
Apr. 15	200	11	2,200
Aug. 24	250	12	3,000
Total	550		\$6,200

Illustration 6-7
Proof of cost of goods sold

LAST-IN, FIRST-OUT (LIFO)

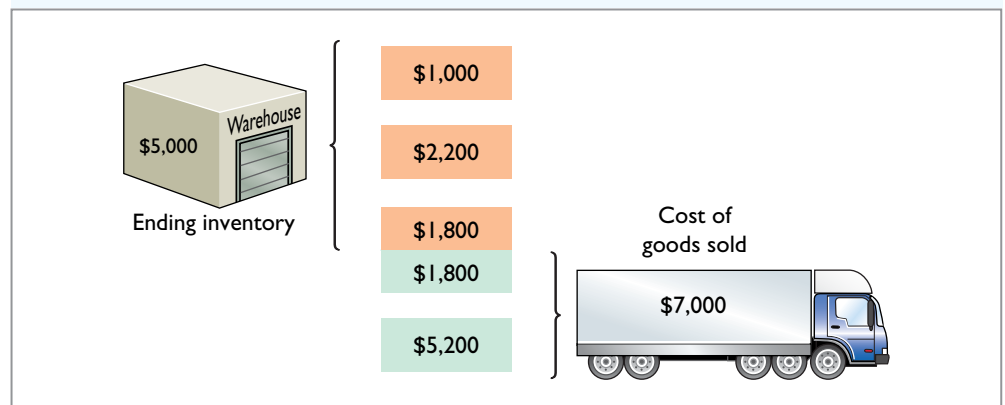

The **last-in, first-out (LIFO) method** assumes that the **latest goods** purchased are the first to be sold. LIFO seldom coincides with the actual physical flow of inventory. (Exceptions include goods stored in piles, such as coal or hay, where goods are removed from the top of the pile as they are sold.) Under the LIFO method, the **costs** of the latest goods purchased are the first to be recognized in determining cost of goods sold. Illustration 6-8 shows the allocation of the cost of goods available for sale at Houston Electronics under LIFO.

COST OF GOODS AVAILABLE FOR SALE				
Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total	1,000		\$12,000

Illustration 6-8
Allocation of costs—
LIFO method

STEP 1: ENDING INVENTORY				STEP 2: COST OF GOODS SOLD	
Date	Units	Unit Cost	Total Cost		
Jan. 1	100	\$10	\$ 1,000	Cost of goods available for sale	\$12,000
Apr. 15	200	11	2,200	Less: Ending inventory	5,000
Aug. 24	150	12	1,800	Cost of goods sold	\$ 7,000
Total	450		\$5,000		

Helpful Hint
Another way of thinking about the calculation of LIFO ending inventory is the **FISH assumption**—first in still here.

Under LIFO, since it is assumed that the first goods sold were those that were most recently purchased, ending inventory is based on the prices of the oldest units purchased. That is, **under LIFO, companies obtain the cost of the ending inventory by taking the unit cost of the earliest goods available for sale and working forward until all units of inventory have been costed.** In this example, Houston Electronics prices the 450 units of ending inventory using the **earliest** prices. The first purchase was 100 units at \$10 in the January 1 beginning inventory. Then, 200 units were purchased at \$11. The remaining 150 units needed are priced at \$12 per unit (August 24 purchase). Next, Houston Electronics calculates cost of goods sold by subtracting the cost of the units **not sold** (ending inventory) from the cost of all goods available for sale.

Illustration 6-9 demonstrates that companies also can calculate cost of goods sold by pricing the 550 units sold using the prices of the last 550 units acquired. Note that of the 300 units purchased on August 24, only 150 units are assumed sold. This agrees with our calculation of the cost of ending inventory, where 150 of these units were assumed unsold and thus included in ending inventory.

Illustration 6-9

Proof of cost of goods sold

<u>Date</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>
Nov. 27	400	\$13	\$ 5,200
Aug. 24	150	12	1,800
Total	550		\$7,000

Under a periodic inventory system, which we are using here, **all goods purchased during the period are assumed to be available for the first sale, regardless of the date of purchase.**

AVERAGE-COST

The **average-cost method** allocates the cost of goods available for sale on the basis of the **weighted-average unit cost** incurred. The average-cost method assumes that goods are similar in nature. Illustration 6-10 presents the formula and a sample computation of the weighted-average unit cost.

Illustration 6-10

Formula for weighted-average unit cost

Cost of Goods Available for Sale	÷	Total Units Available for Sale	=	Weighted-Average Unit Cost
\$12,000	÷	1,000	=	\$12

The company then applies the weighted-average unit cost to the units on hand to determine the cost of the ending inventory. Illustration 6-11 shows the allocation of the cost of goods available for sale at Houston Electronics using average-cost.

We can verify the cost of goods sold under this method by multiplying the units sold times the weighted-average unit cost ($550 \times \$12 = \$6,600$). Note that this method does **not** use the average of the unit costs. That average is \$11.50 ($\$10 + \$11 + \$12 + \$13 = \46; $\$46 \div 4$). The average-cost method instead uses the average **weighted by** the quantities purchased at each unit cost.

COST OF GOODS AVAILABLE FOR SALE

Date	Explanation	Units	Unit Cost	Total Cost
Jan. 1	Beginning inventory	100	\$10	\$ 1,000
Apr. 15	Purchase	200	11	2,200
Aug. 24	Purchase	300	12	3,600
Nov. 27	Purchase	400	13	5,200
	Total	1,000		<u>\$12,000</u>

STEP 1: ENDING INVENTORY

\$12,000	÷	1,000	=	\$12
Units		Unit Cost		Total Cost
450		\$12		<u>\$5,400</u>

STEP 2: COST OF GOODS SOLD

Cost of goods available for sale	\$12,000
Less: Ending inventory	5,400
Cost of goods sold	<u>\$ 6,600</u>

Allocation of costs—
average-cost method

Financial Statement and Tax Effects of Cost Flow Methods

Each of the three assumed cost flow methods is acceptable for use. For example, **Reebok International Ltd.** and **Wendy's International** currently use the FIFO method of inventory costing. **Campbell Soup Company**, **Kroger**, and **Walgreen Drugs** use LIFO for part or all of their inventory. **Bristol-Myers Squibb**, **Starbucks**, and **Motorola** use the average-cost method. In fact, a company may also use more than one cost flow method at the same time. **Stanley Black & Decker Manufacturing Company**, for example, uses LIFO for domestic inventories and FIFO for foreign inventories. Illustration 6-12 (in the margin) shows the use of the three cost flow methods in 500 large U.S. companies.

The reasons companies adopt different inventory cost flow methods are varied, but they usually involve one of three factors: (1) income statement effects, (2) balance sheet effects, or (3) tax effects.

INCOME STATEMENT EFFECTS

To understand why companies might choose a particular cost flow method, let's examine the effects of the different cost flow assumptions on the financial statements of Houston Electronics. The condensed income statements in Illustration 6-13 (page 270) assume that Houston sold its 550 units for \$18,500, had operating expenses of \$9,000, and is subject to an income tax rate of 30%.

Note the cost of goods available for sale (\$12,000) is the same under each of the three inventory cost flow methods. However, the ending inventories and the costs of goods sold are different. This difference is due to the unit costs that the company allocated to cost of goods sold and to ending inventory. Each dollar of difference in ending inventory results in a corresponding dollar difference in

Illustration 6-12
Use of cost flow methods in
major U.S. companies

Illustration 6-13

Comparative effects of cost flow methods

HOUSTON ELECTRONICS Condensed Income Statements			
	FIFO	LIFO	Average-Cost
Sales revenue	\$18,500	\$18,500	\$18,500
Beginning inventory	1,000	1,000	1,000
Purchases	11,000	11,000	11,000
Cost of goods available for sale	12,000	12,000	12,000
Ending inventory	5,800	5,000	5,400
Cost of goods sold	6,200	7,000	6,600
Gross profit	12,300	11,500	11,900
Operating expenses	9,000	9,000	9,000
Income before income taxes*	3,300	2,500	2,900
Income tax expense (30%)	990	750	870
Net income	\$ 2,310	\$ 1,750	\$ 2,030

*We are assuming that Houston Electronics is a corporation, and corporations are required to pay income taxes.

income before income taxes. For Houston, an \$800 difference exists between FIFO and LIFO cost of goods sold.

In periods of changing prices, the cost flow assumption can have significant impacts both on income and on evaluations of income, such as the following.

1. In a period of inflation, FIFO produces a higher net income because lower unit costs of the first units purchased are matched against revenue.
2. In a period of inflation, LIFO produces a lower net income because higher unit costs of the last goods purchased are matched against revenue.
3. If prices are falling, the results from the use of FIFO and LIFO are reversed. FIFO will report the lowest net income and LIFO the highest.
4. Regardless of whether prices are rising or falling, average-cost produces net income between FIFO and LIFO.

As shown in the Houston example (Illustration 6-13), in a period of rising prices FIFO reports the highest net income (\$2,310) and LIFO the lowest (\$1,750); average-cost falls between these two amounts (\$2,030).

To management, higher net income is an advantage. It causes external users to view the company more favorably. In addition, management bonuses, if based on net income, will be higher. Therefore, when prices are rising (which is usually the case), companies tend to prefer FIFO because it results in higher net income.

Others believe that LIFO presents a more realistic net income number. That is, LIFO matches the more recent costs against current revenues to provide a better measure of net income. During periods of inflation, many challenge the quality of non-LIFO earnings, noting that failing to match current costs against current revenues leads to an understatement of cost of goods sold and an overstatement of net income. As some indicate, net income computed using FIFO creates “**paper or phantom profits**”—that is, earnings that do not really exist.

BALANCE SHEET EFFECTS

A major advantage of the FIFO method is that in a period of inflation, the costs allocated to ending inventory will approximate their current cost. For example, for Houston Electronics, 400 of the 450 units in the ending inventory are costed under FIFO at the higher November 27 unit cost of \$13.

Conversely, a major shortcoming of the LIFO method is that in a period of inflation, the costs allocated to ending inventory may be significantly understated in terms of current cost. The understatement becomes greater over prolonged

periods of inflation if the inventory includes goods purchased in one or more prior accounting periods. For example, **Caterpillar** has used LIFO for more than 50 years. Its balance sheet shows ending inventory of \$14,544 million. But the inventory's actual current cost if FIFO had been used is \$16,966 million.

TAX EFFECTS

We have seen that both inventory on the balance sheet and net income on the income statement are higher when companies use FIFO in a period of inflation. Yet, many companies have selected LIFO. Why? The reason is that LIFO results in the lowest income taxes (because of lower net income) during times of rising prices. For example, at Houston Electronics, income taxes are \$750 under LIFO, compared to \$990 under FIFO. The tax savings of \$240 makes more cash available for use in the business.

Using Inventory Cost Flow Methods Consistently

Whatever cost flow method a company chooses, it should use that method consistently from one accounting period to another. This approach is often referred to as the **consistency concept**, which means that a company uses the same accounting principles and methods from year to year. Consistent application enhances the comparability of financial statements over successive time periods. In contrast, using the FIFO method one year and the LIFO method the next year would make it difficult to compare the net incomes of the two years.

Although consistent application is preferred, it does not mean that a company may never change its inventory costing method. When a company adopts a different method, it should disclose in the financial statements the change and its effects on net income. Illustration 6-14 shows a typical disclosure, using information from recent financial statements of **Quaker Oats** (now a unit of **PepsiCo**).

Helpful Hint

A tax rule, often referred to as the **LIFO conformity rule**, requires that if companies use LIFO for tax purposes they must also use it for financial reporting purposes. This means that if a company chooses the LIFO method to reduce its tax bills, it will also have to report lower net income in its financial statements.

QUAKER OATS Notes to the Financial Statements

Note 1: Effective July 1, the Company adopted the LIFO cost flow assumption for valuing the majority of U.S. Grocery Products inventories. The Company believes that the use of the LIFO method better matches current costs with current revenues. The effect of this change on the current year was to decrease net income by \$16.0 million.

Illustration 6-14

Disclosure of change in cost flow method

International Insight ExxonMobil Corporation

Bloomberg/Getty Images

Is LIFO Fair?

ExxonMobil Corporation, like many U.S. companies, uses LIFO to value its inventory for financial reporting and tax purposes. In one recent year, this resulted in a cost of goods sold figure that was \$5.6 billion higher than under FIFO. By increasing cost of goods sold, ExxonMobil reduces net income, which reduces taxes. Critics say that LIFO provides an unfair "tax

dodge." As Congress looks for more sources of tax revenue, some lawmakers favor the elimination of LIFO. Supporters of LIFO argue that the method is conceptually sound because it matches current costs with current revenues. In addition, they point out that this matching provides protection against inflation.

International accounting standards do not allow the use of LIFO. Because of this, the net income of foreign oil companies such as **BP** and **Royal Dutch Shell** are not directly comparable to U.S. companies, which makes analysis difficult.

Source: David Reilly, "Big Oil's Accounting Methods Fuel Criticism," *Wall Street Journal* (August 8, 2006), p. C1.

What are the arguments for and against the use of LIFO? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!**2****Cost Flow Methods**

The accounting records of Shumway Ag Implements show the following data.

Beginning inventory	4,000 units at \$ 3
Purchases	6,000 units at \$ 4
Sales	7,000 units at \$12

Determine the cost of goods sold during the period under a periodic inventory system using (a) the FIFO method, (b) the LIFO method, and (c) the average-cost method.

Action Plan

- ✓ Understand the periodic inventory system.
- ✓ Allocate costs between goods sold and goods on hand (ending inventory) for each cost flow method.
- ✓ Compute cost of goods sold for each method.

Solution

$$\text{Cost of goods available for sale} = (4,000 \times \$3) + (6,000 \times \$4) = \$36,000$$

$$\text{Ending inventory} = 10,000 - 7,000 = 3,000 \text{ units}$$

$$(a) \text{ FIFO: } \$36,000 - (3,000 \times \$4) = \$24,000$$

$$(b) \text{ LIFO: } \$36,000 - (3,000 \times \$3) = \$27,000$$

$$(c) \text{ Average cost per unit: } [(4,000 @ \$3) + (6,000 @ \$4)] \div 10,000 = \$3.60$$

$$\text{Average-cost: } \$36,000 - (3,000 \times \$3.60) = \$25,200$$

Related exercise material: **BE6-3, BE6-4, BE6-5, E6-3, E6-4, E6-5, E6-6, E6-7, E6-8, and DO IT! 6-2.**

LEARNING OBJECTIVE**3****Indicate the effects of inventory errors on the financial statements.**

Unfortunately, errors occasionally occur in accounting for inventory. In some cases, errors are caused by failure to count or price the inventory correctly. In other cases, errors occur because companies do not properly recognize the transfer of legal title to goods that are in transit. When errors occur, they affect both the income statement and the balance sheet.

Income Statement Effects

Under a periodic inventory system, both the beginning and ending inventories appear in the income statement. The ending inventory of one period automatically becomes the beginning inventory of the next period. Thus, inventory errors affect the computation of cost of goods sold and net income in two periods.

The effects on cost of goods sold can be computed by first entering incorrect data in the formula in Illustration 6-15 and then substituting the correct data.

Illustration 6-15

Formula for cost of goods sold

Beginning Inventory	+	Cost of Goods Purchased	-	Ending Inventory	=	Cost of Goods Sold
--------------------------------	---	--	---	-----------------------------	---	-----------------------------------

ETHICS NOTE

Inventory fraud increases during recessions. Such fraud includes pricing inventory at amounts in excess of its actual value, or claiming to have inventory when no inventory exists. Inventory fraud usually overstates ending inventory, thereby understating cost of goods sold and creating higher income.

If the error understates **beginning** inventory, cost of goods sold will be understated. If the error understates **ending** inventory, cost of goods sold will be overstated. Illustration 6-16 shows the effects of inventory errors on the current year's income statement.

So far, the effects of inventory errors are fairly straightforward. Now, though, comes the (at first) surprising part: An error in the ending inventory of the current period will have a **reverse effect on net income of the next accounting period**. Illustration 6-17 shows this effect. As you study the illustration, you will see that the reverse effect comes from the fact that understating ending inventory in 2016 results in understating beginning inventory in 2017 and overstating net income in 2017.

<u>When Inventory Error:</u>	<u>Cost of Goods Sold Is:</u>	<u>Net Income Is:</u>
Understates beginning inventory	Understated	Overstated
Overstates beginning inventory	Overstated	Understated
Understates ending inventory	Overstated	Understated
Overstates ending inventory	Understated	Overstated

Illustration 6-16

Effects of inventory errors on current year's income statement

SAMPLE COMPANY
Condensed Income Statements

	2016		2017	
	<u>Incorrect</u>	<u>Correct</u>	<u>Incorrect</u>	<u>Correct</u>
Sales revenue	\$80,000	\$80,000	\$90,000	\$90,000
Beginning inventory	\$20,000	\$20,000	\$12,000	\$15,000
Cost of goods purchased	40,000	40,000	68,000	68,000
Cost of goods available for sale	60,000	60,000	80,000	83,000
Ending inventory	12,000	15,000	23,000	23,000
Cost of goods sold	48,000	45,000	57,000	60,000
Gross profit	32,000	35,000	33,000	30,000
Operating expenses	10,000	10,000	20,000	20,000
Net income	\$22,000	\$25,000	\$13,000	\$10,000
	\$(3,000) Net income understated		\$3,000 Net income overstated	

The errors cancel. Thus, the combined total income for the 2-year period is correct.

Over the two years, though, total net income is correct because the errors **offset each other**. Notice that total income using incorrect data is \$35,000 (\$22,000 + \$13,000), which is the same as the total income of \$35,000 (\$25,000 + \$10,000) using correct data. Also note in this example that an error in the beginning inventory does not result in a corresponding error in the ending inventory for that period. The correctness of the ending inventory depends entirely on the accuracy of taking and costing the inventory at the balance sheet date under the periodic inventory system.

Balance Sheet Effects

Companies can determine the effect of ending inventory errors on the balance sheet by using the basic accounting equation: Assets = Liabilities + Stockholders' Equity. Errors in the ending inventory have the effects shown in Illustration 6-18.

<u>Ending Inventory Error</u>	<u>Assets</u>	<u>Liabilities</u>	<u>Stockholders' Equity</u>
Overstated	Overstated	No effect	Overstated
Understated	Understated	No effect	Understated

Illustration 6-17

Effects of inventory errors on two years' income statements

Illustration 6-18

Effects of ending inventory errors on balance sheet

The effect of an error in ending inventory on the subsequent period was shown in Illustration 6-17. Recall that if the error is not corrected, the combined total net income for the two periods would be correct. Thus, total stockholders' equity reported on the balance sheet at the end of 2017 will also be correct.

DO IT!**3****Inventory Errors****Action Plan**

- ✓ An ending inventory error in one period will have an equal and opposite effect on cost of goods sold and net income in the next period.
- ✓ After two years, the errors have offset each other.

Visual Company overstated its 2016 ending inventory by \$22,000. Determine the impact this error has on ending inventory, cost of goods sold, and stockholders' equity in 2016 and 2017.

Solution

	2016	2017
Ending inventory	\$22,000 overstated	No effect
Cost of goods sold	\$22,000 understated	\$22,000 overstated
Stockholders' equity	\$22,000 overstated	No effect

LEARNING OBJECTIVE**4****Explain the statement presentation and analysis of inventory.****Presentation**

As indicated in Chapter 5, inventory is classified in the balance sheet as a current asset immediately below receivables. In a multiple-step income statement, cost of goods sold is subtracted from net sales. There also should be disclosure of (1) the major inventory classifications, (2) the basis of accounting (cost, or lower-of-cost-or-market), and (3) the cost method (FIFO, LIFO, or average-cost).

Wal-Mart Stores, Inc., for example, in its January 31, 2014, balance sheet reported inventories of \$44,858 million under current assets. The accompanying notes to the financial statements, as shown in Illustration 6-19, disclosed the following information.

Illustration 6-19

Inventory disclosures by Wal-Mart

WAL-MART STORES, INC.
Notes to the Financial Statements

Note 1. Summary of Significant Accounting Policies**Inventories**

The Company values inventories at the lower of cost or market as determined primarily by the retail method of accounting, using the last-in, first-out ("LIFO") method for substantially all of the WalMart U.S. segment's inventories. The WalMart International segment's inventories are primarily valued by the retail method of accounting, using the first-in, first-out ("FIFO") method. The retail method of accounting results in inventory being valued at the lower of cost or market since permanent markdowns are currently taken as a reduction of the retail value of inventory. The Sam's Club segment's inventories are valued based on the weighted-average cost using the LIFO method. At January 31, 2014 and 2013, the Company's inventories valued at LIFO approximate those inventories as if they were valued at FIFO.

As indicated in this note, Wal-Mart values its inventories at the lower-of-cost-or-market using LIFO and FIFO.

Lower-of-Cost-or-Market

The value of inventory for companies selling high-technology or fashion goods can drop very quickly due to continual changes in technology or fashion. These circumstances sometimes call for inventory valuation methods other than those presented so far. For example, at one time purchasing managers at **Ford** decided

to make a large purchase of palladium, a precious metal used in vehicle emission devices. They made this purchase because they feared a future shortage. The shortage did not materialize, and by the end of the year the price of palladium had plummeted. Ford's inventory was then worth \$1 billion less than its original cost. Do you think Ford's inventory should have been stated at cost, in accordance with the historical cost principle, or at its lower replacement cost?

As you probably reasoned, this situation requires a departure from the cost basis of accounting. This is done by valuing the inventory at the **lower-of-cost-or-market (LCM)** in the period in which the price decline occurs. LCM is a basis whereby inventory is stated at the lower of either its cost or market value as determined by current replacement cost. LCM is an example of the accounting convention of **conservatism**. Conservatism means that the approach adopted among accounting alternatives is the method that is least likely to overstate assets and net income.

Companies apply LCM to the items in inventory after they have used one of the cost flow methods (specific identification, FIFO, LIFO, or average-cost) to determine cost. Under the LCM basis, market is defined as **current replacement cost**, not selling price. For a merchandising company, current replacement cost is the cost of purchasing the same goods at the present time from the usual suppliers in the usual quantities. Current replacement cost is used because a decline in the replacement cost of an item usually leads to a decline in the selling price of the item.

To illustrate the application of LCM, assume that Ken Tuckie TV has the following lines of merchandise with costs and market values as indicated. LCM produces the results shown in Illustration 6-20. Note that the amounts shown in the final column are the lower-of-cost-or-market amounts for each item.

	Units	Cost per Unit	Market per Unit	Lower-of-Cost- or-Market
Flat-screen TVs	100	\$600	\$550	\$ 55,000 (\$550 × 100)
Satellite radios	500	90	104	45,000 (\$90 × 500)
Blu-ray players	850	50	48	40,800 (\$48 × 850)
CDs	3,000	5	6	15,000 (\$5 × 3,000)
Total inventory				<u>\$155,800</u>

Illustration 6-20

Computation of lower-of-cost-or-market

Analysis

The amount of inventory carried by a company has significant economic consequences. And inventory management is a double-edged sword that requires constant attention. On the one hand, management wants to have a great variety and quantity available so that customers have a wide selection and items are always in stock. But, such a policy may incur high carrying costs (e.g., investment, storage, insurance, obsolescence, and damage). On the other hand, low inventory levels lead to stock-outs and lost sales. Common ratios used to manage and evaluate inventory levels are inventory turnover and a related measure, days in inventory.

Inventory turnover measures the number of times on average the inventory is sold during the period. Its purpose is to measure the liquidity of the inventory. The inventory turnover is computed by dividing cost of goods sold by the average inventory during the period. Unless seasonal factors are significant, average inventory can be computed from the beginning and ending inventory balances. For example, **Wal-Mart** reported in its 2014 annual report a beginning inventory of \$43,803 million, an ending inventory of \$44,858 million, and cost of goods sold for the year ended January 31, 2014, of \$358,069 million. The inventory turnover formula and computation for Wal-Mart are shown on the next page.

International Note

Under U.S. GAAP, companies cannot reverse inventory write-downs if inventory increases in value in subsequent periods. IFRS permits companies to reverse write-downs in some circumstances.

Illustration 6-21

Inventory turnover formula and computation for Wal-Mart

Cost of Goods Sold	÷	Average Inventory	=	Inventory Turnover
\$358,069	÷	$\frac{\$44,858 + \$43,803}{2}$	=	8.1 times

A variant of the inventory turnover is **days in inventory**. This measures the average number of days inventory is held. It is calculated as 365 divided by the inventory turnover. For example, Wal-Mart's inventory turnover of 8.1 times divided into 365 is 45.1 days. This is the approximate time that it takes a company to sell the inventory once it arrives at the store.

There are typical levels of inventory in every industry. Companies that are able to keep their inventory at lower levels and higher turnovers and still satisfy customer needs are the most successful.

Accounting Across the Organization Sony

© Dmitry Kutlayev/iStockphoto

Too Many TVs or Too Few?

Financial analysts closely monitored the inventory management practices of companies during the recent recession. For example, some analysts following **Sony** expressed concern because the company built up its inventory of televisions in an attempt to sell 25 million liquid crystal display (LCD) TVs—a 60% increase over the prior year. A year earlier, Sony had cut its inventory levels so that its quarterly days in inventory was

down to 38 days, compared to 61 days for the same quarter a year before that. But now, as a result of its inventory build-up, days in inventory rose to 59 days. While management was saying that it didn't think that Sony's inventory levels were now too high, analysts were concerned that the company would have to engage in very heavy discounting in order to sell off its inventory. Analysts noted that the losses from discounting can be "punishing."

For Sony, what are the advantages and disadvantages of having a low days in inventory measure? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!

4

LCM and Inventory Turnover

(a) Tracy Company sells three different types of home heating stoves (gas, wood, and pellet). The cost and market value of its inventory of stoves are as follows.

	<u>Cost</u>	<u>Market</u>
Gas	\$ 84,000	\$ 79,000
Wood	250,000	280,000
Pellet	112,000	101,000

Action Plan

- ✓ Determine whether cost or market value is lower for each inventory type.
- ✓ Sum the lowest value of each inventory type to determine the total value of inventory.

Determine the value of the company's inventory under the lower-of-cost-or-market approach.

Solution

The lowest value for each inventory type is gas \$79,000, wood \$250,000, and pellet \$101,000. The total inventory value is the sum of these amounts, \$430,000.

(b) Early in 2017, Westmoreland Company switched to a just-in-time inventory system. Its sales revenue, cost of goods sold, and inventory amounts for 2016 and 2017 are shown below.

	<u>2016</u>	<u>2017</u>
Sales revenue	\$2,000,000	\$1,800,000
Cost of goods sold	1,000,000	910,000
Beginning inventory	290,000	210,000
Ending inventory	210,000	50,000

Determine the inventory turnover and days in inventory for 2016 and 2017. Discuss the changes in the amount of inventory, the inventory turnover and days in inventory, and the amount of sales across the two years.

Solution

	<u>2016</u>	<u>2017</u>
Inventory turnover	$\frac{\$1,000,000}{(\$290,000 + \$210,000)/2} = 4$	$\frac{\$910,000}{(\$210,000 + \$50,000)/2} = 7$
Days in inventory	$365 \div 4 = 91.3$ days	$365 \div 7 = 52.1$ days

The company experienced a very significant decline in its ending inventory as a result of the just-in-time inventory. This decline improved its inventory turnover and its days in inventory. However, its sales declined by 10%. It is possible that this decline was caused by the dramatic reduction in the amount of inventory that was on hand, which increased the likelihood of “stock-outs.” To determine the optimal inventory level, management must weigh the benefits of reduced inventory against the potential lost sales caused by stock-outs.

Action Plan

- ✓ To find the inventory turnover, divide cost of goods sold by average inventory.
- ✓ To determine days in inventory, divide 365 days by the inventory turnover.
- ✓ Just-in-time inventory reduces the amount of inventory on hand, which reduces carrying costs. Reducing inventory levels by too much has potential negative implications for sales.

LEARNING OBJECTIVE

5

APPENDIX 6A: Apply the inventory cost flow methods to perpetual inventory records.

What inventory cost flow methods can companies employ if they use a perpetual inventory system? Simple—they can use any of the inventory cost flow methods described in the chapter. To illustrate the application of the three assumed cost flow methods (FIFO, LIFO, and average-cost), we will use the data shown in Illustration 6A-1 and in this chapter for Houston Electronics’ Astro condensers.

HOUSTON ELECTRONICS Astro Condensers

Date	Explanation	Units	Unit Cost	Total Cost	Balance in Units
1/1	Beginning inventory	100	\$10	\$ 1,000	100
4/15	Purchases	200	11	2,200	300
8/24	Purchases	300	12	3,600	600
9/10	Sale	550			50
11/27	Purchases	400	13	5,200	450
				\$12,000	

Illustration 6A-1

Inventoriable units and costs

First-In, First-Out (FIFO)

Under perpetual FIFO, the company charges to cost of goods sold the cost of the earliest goods on hand **prior to each sale**. Therefore, the cost of goods sold on September 10 consists of the units on hand January 1 and the units purchased April 15 and August 24. Illustration 6A-2 shows the inventory under a FIFO method perpetual system.

Illustration 6A-2
Perpetual system—FIFO

Date	Purchases	Cost of Goods Sold	Balance (in units and cost)
January 1			(100 @ \$10) \$ 1,000
April 15	(200 @ \$11) \$2,200		(100 @ \$10) } (200 @ \$11) } \$ 3,200
August 24	(300 @ \$12) \$3,600		(100 @ \$10) } (200 @ \$11) } \$ 6,800 (300 @ \$12) }
September 10		(100 @ \$10) (200 @ \$11) (250 @ \$12)	(50 @ \$12) \$ 600
		\$6,200	
November 27	(400 @ \$13) \$5,200		(50 @ \$12) } (400 @ \$13) } \$5,800

Cost of goods sold (points to \$6,200)

Ending inventory (points to \$5,800)

The ending inventory in this situation is \$5,800, and the cost of goods sold is \$6,200 [(100 @ \$10) + (200 @ \$11) + (250 @ \$12)].

Compare Illustrations 6-6 (page 266) and 6A-2. You can see that the results under FIFO in a perpetual system are the **same as in a periodic system**. In both cases, the ending inventory is \$5,800 and cost of goods sold is \$6,200. Regardless of the system, the first costs in are the costs assigned to cost of goods sold.

Last-In, First-Out (LIFO)

Under the LIFO method using a perpetual system, the company charges to cost of goods sold the cost of the most recent purchase prior to sale. Therefore, the cost of the goods sold on September 10 consists of all the units from the August 24 and April 15 purchases plus 50 of the units in beginning inventory. Illustration 6A-3 shows the computation of the ending inventory under the LIFO method.

Illustration 6A-3
Perpetual system—LIFO

Date	Purchases	Cost of Goods Sold	Balance (in units and cost)
January 1			(100 @ \$10) \$ 1,000
April 15	(200 @ \$11) \$2,200		(100 @ \$10) } (200 @ \$11) } \$ 3,200
August 24	(300 @ \$12) \$3,600		(100 @ \$10) } (200 @ \$11) } \$ 6,800 (300 @ \$12) }
September 10		(300 @ \$12) (200 @ \$11) (50 @ \$10)	(50 @ \$10) \$ 500
		\$6,300	
November 27	(400 @ \$13) \$5,200		(50 @ \$10) } (400 @ \$13) } \$5,700

Cost of goods sold (points to \$6,300)

Ending inventory (points to \$5,700)

The use of LIFO in a perpetual system will usually produce cost allocations that differ from those using LIFO in a periodic system. In a perpetual system, the company allocates the latest units purchased **prior to each sale** to cost of

goods sold. In contrast, in a periodic system, the latest units purchased **during the period** are allocated to cost of goods sold. Thus, when a purchase is made after the last sale, the LIFO periodic system will apply this purchase to the previous sale. Compare Illustrations 6-8 (page 267) and 6A-3. Illustration 6-8 shows that the 400 units at \$13 purchased on November 27 applied to the sale of 550 units on September 10. Under the LIFO perpetual system in Illustration 6A-3, the 400 units at \$13 purchased on November 27 are all applied to the ending inventory.

The ending inventory in this LIFO perpetual illustration is \$5,700, and cost of goods sold is \$6,300, as compared to the LIFO periodic Illustration 6-8 (page 267) where the ending inventory is \$5,000 and cost of goods sold is \$7,000.

Average-Cost

The average-cost method in a perpetual inventory system is called the **moving-average method**. Under this method, the company computes a new average **after each purchase**, by dividing the cost of goods available for sale by the units on hand. The average cost is then applied to (1) the units sold, to determine the cost of goods sold, and (2) the remaining units on hand, to determine the ending inventory amount. Illustration 6A-4 shows the application of the moving-average cost method by Houston Electronics (computations of the moving-average unit cost are shown after Illustration 6A-4).

Date	Purchases	Cost of Goods Sold	Balance (in units and cost)	
January 1			(100 @ \$10)	\$ 1,000
April 15	(200 @ \$11) \$2,200		(300 @ \$10.667)	\$ 3,200
August 24	(300 @ \$12) \$3,600		(600 @ \$11.333)	\$ 6,800
September 10		(550 @ \$11.333)	(50 @ \$11.333)	\$ 567
		\$6,233		
November 27	(400 @ \$13) \$5,200		(450 @ \$12.816)	\$5,767

Illustration 6A-4
Perpetual system—
moving-average method

Cost of goods sold

Ending inventory

As indicated, Houston Electronics computes a **new average each time it makes a purchase**.

1. On April 15, after Houston buys 200 units for \$2,200, a total of 300 units costing \$3,200 ($\$1,000 + \$2,200$) are on hand. The average unit cost is \$10.667 ($\$3,200 \div 300$).
2. On August 24, after Houston buys 300 units for \$3,600, a total of 600 units costing \$6,800 ($\$1,000 + \$2,200 + \$3,600$) are on hand. The average cost per unit is \$11.333 ($\$6,800 \div 600$).
3. On September 10, to compute cost of goods sold, Houston uses this unit cost of \$11.333 in costing sales until it makes another purchase, when the company computes a new unit cost. Accordingly, the unit cost of the 550 units sold on September 10 is \$11.333, and the total cost of goods sold is \$6,233.
4. On November 27, following the purchase of 400 units for \$5,200, there are 450 units on hand costing \$5,767 ($\$567 + \$5,200$) with a new average cost of \$12.816 ($\$5,767 \div 450$).

Compare this moving-average cost under the perpetual inventory system to Illustration 6-11 (page 269) showing the average-cost method under a periodic inventory system.

APPENDIX 6B: Describe the two methods of estimating inventories.

In the chapter, we assumed that a company would be able to physically count its inventory. What if it cannot? What if the inventory were destroyed by fire or flood, for example? In that case, the company would use an estimate.

Two circumstances explain why companies sometimes estimate inventories. First, a casualty such as fire, flood, or earthquake may make it impossible to take a physical inventory. Second, managers may want monthly or quarterly financial statements, but a physical inventory is taken only annually. The need for estimating inventories occurs primarily with a periodic inventory system because of the absence of perpetual inventory records.

There are two widely used methods of estimating inventories: (1) the gross profit method, and (2) the retail inventory method.

Gross Profit Method

The **gross profit method** estimates the cost of ending inventory by applying a gross profit rate to net sales. This method is relatively simple but effective. Accountants, auditors, and managers frequently use the gross profit method to test the reasonableness of the ending inventory amount. It will detect large errors.

To use this method, a company needs to know its net sales, cost of goods available for sale, and gross profit rate. The company then can estimate its gross profit for the period. Illustration 6B-1 shows the formulas for using the gross profit method.

Illustration 6B-1
Gross profit method formulas

Step 1:	Net Sales	–	Estimated Gross Profit	=	Estimated Cost of Goods Sold
			↓		
Step 2:	Cost of Goods Available for Sale	–	Estimated Cost of Goods Sold	=	Estimated Cost of Ending Inventory

To illustrate, assume that Kishwaukee Company wishes to prepare an income statement for the month of January. Its records show net sales of \$200,000, beginning inventory \$40,000, and cost of goods purchased \$120,000. In the preceding year, the company realized a 30% gross profit rate. It expects to earn the same rate this year. Given these facts and assumptions, Kishwaukee can compute the estimated cost of the ending inventory at January 31 under the gross profit method as follows.

Illustration 6B-2
Example of gross profit method

Step 1:	
Net sales	\$ 200,000
Less: Estimated gross profit (30% × \$200,000)	60,000
Estimated cost of goods sold	\$140,000
Step 2:	
Beginning inventory	\$ 40,000
Cost of goods purchased	120,000
Cost of goods available for sale	160,000
Less: Estimated cost of goods sold	140,000
Estimated cost of ending inventory	\$ 20,000

The gross profit method is based on the assumption that the gross profit rate will remain constant. But, it may not remain constant, due to a change in merchandising policies or in market conditions. In such cases, the company should adjust the rate to reflect current operating conditions. In some cases, companies can obtain a more accurate estimate by applying this method on a department or product-line basis.

Note that companies should not use the gross profit method to prepare financial statements at the end of the year. These statements should be based on a physical inventory count.

Retail Inventory Method

A retail store such as **Home Depot**, **Ace Hardware**, or **Walmart** has thousands of different types of merchandise at low unit costs. In such cases, it is difficult and time-consuming to apply unit costs to inventory quantities. An alternative is to use the **retail inventory method** to estimate the cost of inventory. Most retail companies can establish a relationship between cost and sales price. The company then applies the cost-to-retail percentage to the ending inventory at retail prices to determine inventory at cost.

Under the retail inventory method, a company's records must show both the cost and retail value of the goods available for sale. Illustration 6B-3 presents the formulas for using the retail inventory method.

Step 1:	Goods Available for Sale at Retail	–	Net Sales	=	Ending Inventory at Retail
Step 2:	Goods Available for Sale at Cost	÷	Goods Available for Sale at Retail	=	Cost-to-Retail Ratio
Step 3:	Ending Inventory at Retail	×	Cost-to-Retail Ratio	=	Estimated Cost of Ending Inventory

Illustration 6B-3
Retail inventory method formulas

We can demonstrate the logic of the retail method by using unit-cost data. Assume that Ortiz Inc. has marked 10 units purchased at \$7 to sell for \$10 per unit. Thus, the cost-to-retail ratio is 70% ($\$70 \div \100). If four units remain unsold, their retail value is \$40 ($4 \times \10), and their cost is \$28 ($\$40 \times 70\%$). This amount agrees with the total cost of goods on hand on a per unit basis ($4 \times \$7$).

Illustration 6B-4 shows application of the retail method for Valley West. Note that it is not necessary to take a physical inventory to determine the estimated cost of goods on hand at any given time.

	<u>At Cost</u>	<u>At Retail</u>
Beginning inventory	\$14,000	\$ 21,500
Goods purchased	61,000	78,500
Goods available for sale	<u>\$75,000</u>	<u>100,000</u>
Less: Net sales		<u>70,000</u>
Step (1) Ending inventory at retail =		<u>\$ 30,000</u>
Step (2) Cost-to-retail ratio = $\\$75,000 \div \\$100,000 = 75\%$		
Step (3) Estimated cost of ending inventory = $\\$30,000 \times 75\% =$		<u>\$22,500</u>

Illustration 6B-4
Application of retail inventory method

The retail inventory method also facilitates taking a physical inventory at the end of the year. Valley West can value the goods on hand at the prices marked on the merchandise, and then apply the cost-to-retail ratio to the goods on hand at retail to determine the ending inventory at cost.

Helpful Hint
In determining inventory at retail, companies use selling prices of the units.

The major disadvantage of the retail method is that it is an averaging technique. Thus, it may produce an incorrect inventory valuation if the mix of the ending inventory is not representative of the mix in the goods available for sale. Assume, for example, that the cost-to-retail ratio of 75% for Valley West consists of equal proportions of inventory items that have cost-to-retail ratios of 70%, 75%, and 80%. If the ending inventory contains only items with a 70% ratio, an incorrect inventory cost will result. Companies can minimize this problem by applying the retail method on a department or product-line basis.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 Discuss how to classify and determine inventory.** Merchandisers need only one inventory classification, merchandise inventory, to describe the different items that make up total inventory. Manufacturers, on the other hand, usually classify inventory into three categories: finished goods, work in process, and raw materials. To determine inventory quantities, manufacturers (1) take a physical inventory of goods on hand and (2) determine the ownership of goods in transit or on consignment.
- 2 Apply inventory cost flow methods and discuss their financial effects.** The primary basis of accounting for inventories is cost. Cost of goods available for sale includes (a) cost of beginning inventory and (b) cost of goods purchased. The inventory cost flow methods are specific identification and three assumed cost flow methods—FIFO, LIFO, and average-cost.

When prices are rising, the first-in, first-out (FIFO) method results in lower cost of goods sold and higher net income than the other methods. The last-in, first-out (LIFO) method results in the lowest income taxes. The reverse is true when prices are falling. In the balance sheet, FIFO results in an ending inventory that is closest to current value. Inventory under LIFO is the farthest from current value.
- 3 Indicate the effects of inventory errors on the financial statements.** In the income statement of the current year: (a) If beginning inventory is understated, net income is overstated. The reverse occurs if beginning inventory is overstated. (b) If ending inventory is overstated, net income is overstated. If ending inventory is understated, net income is understated. In the following period, its effect on net income for that period is reversed, and total net income for the two years will be correct.

In the balance sheet: Ending inventory errors will have the same effect on total assets and total stockholders' equity and no effect on liabilities.
- 4 Explain the statement presentation and analysis of inventory.** Inventory is classified in the balance sheet as a current asset immediately below receivables. There also should be disclosure of (1) the major inventory classifications, (2) the basis of accounting, and (3) the cost method.

Companies use the lower-of-cost-or-market (LCM) basis when the current replacement cost (market) is less than cost. Under LCM, companies recognize the loss in the period in which the price decline occurs.

The inventory turnover is cost of goods sold divided by average inventory. To convert it to average days in inventory, divide 365 days by the inventory turnover.
- *5 Apply the inventory cost flow methods to perpetual inventory records.** Under FIFO and a perpetual inventory system, companies charge to cost of goods sold the cost of the earliest goods on hand prior to each sale. Under LIFO and a perpetual system, companies charge to cost of goods sold the cost of the most recent purchase prior to sale. Under the moving-average (average-cost) method and a perpetual system, companies compute a new average cost after each purchase.
- *6 Describe the two methods of estimating inventories.** The two methods of estimating inventories are the gross profit method and the retail inventory method. Under the gross profit method, companies apply a gross profit rate to net sales to determine estimated cost of goods sold. They then subtract estimated cost of goods sold from cost of goods available for sale to determine the estimated cost of the ending inventory.

Under the retail inventory method, companies compute a cost-to-retail ratio by dividing the cost of goods available for sale by the retail value of the goods available for sale. They then apply this ratio to the ending inventory at retail to determine the estimated cost of the ending inventory.

GLOSSARY REVIEW

Average-cost method Inventory costing method that uses the weighted-average unit cost to allocate to ending inventory and cost of goods sold the cost of goods available for sale. (p. 268).

Consigned goods Goods held for sale by one party although ownership of the goods is retained by another party. (p. 263).

Consistency concept Dictates that a company use the same accounting principles and methods from year to year. (p. 271).

Current replacement cost The current cost to replace an inventory item. (p. 275).

Days in inventory Measure of the average number of days inventory is held; calculated as 365 divided by inventory turnover. (p. 276).

Finished goods inventory Manufactured items that are completed and ready for sale. (p. 260).

First-in, first-out (FIFO) method Inventory costing method that assumes that the costs of the earliest goods purchased are the first to be recognized as cost of goods sold. (p. 266).

FOB (free on board) destination Freight terms indicating that ownership of the goods remains with the seller until the goods reach the buyer. (p. 262).

FOB (free on board) shipping point Freight terms indicating that ownership of the goods passes to the buyer when the public carrier accepts the goods from the seller. (p. 262).

***Gross profit method** A method for estimating the cost of the ending inventory by applying a gross profit rate to net sales and subtracting estimated cost of goods sold from cost of goods available for sale. (p. 280).

Inventory turnover A ratio that measures the number of times on average the inventory sold during the period; computed by dividing cost of goods sold by the average inventory during the period. (p. 275).

Just-in-time (JIT) inventory Inventory system in which companies manufacture or purchase goods only when needed for use. (p. 260).

Last-in, first-out (LIFO) method Inventory costing method that assumes the costs of the latest units purchased are the first to be allocated to cost of goods sold. (p. 267).

Lower-of-cost-or-market (LCM) A basis whereby inventory is stated at the lower of either its cost or its market value as determined by current replacement cost. (p. 275).

***Moving-average method** A new average is computed after each purchase, by dividing the cost of goods available for sale by the units on hand. (p. 279).

Raw materials Basic goods that will be used in production but have not yet been placed into production. (p. 260).

***Retail inventory method** A method for estimating the cost of the ending inventory by applying a cost-to-retail ratio to the ending inventory at retail. (p. 281).

Specific identification method An actual physical flow costing method in which items still in inventory are specifically costed to arrive at the total cost of the ending inventory. (p. 264).

Weighted-average unit cost Average cost that is weighted by the number of units purchased at each unit cost. (p. 268).

Work in process That portion of manufactured inventory that has been placed into the production process but is not yet complete. (p. 260).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following should **not** be included in the physical inventory of a company?
- Goods held on consignment from another company.
 - Goods shipped on consignment to another company.
 - Goods in transit from another company shipped FOB shipping point.
 - None of the above.

- (LO 1) 2. As a result of a thorough physical inventory, Railway Company determined that it had inventory worth \$180,000 at December 31, 2017. This count did not take into consideration the following facts: Rogers Consignment store currently has goods worth \$35,000 on its sales floor that belong to Railway but are being sold on consignment by Rogers. The selling price of these goods is \$50,000. Railway purchased \$13,000 of goods that were shipped on December 27, FOB destination, that will be received by Railway on January 3. Determine the correct amount of inventory that Railway should report.
- \$230,000.
 - \$215,000.
 - \$228,000.
 - \$193,000.

3. Cost of goods available for sale consists of two elements: beginning inventory and:
- ending inventory.
 - cost of goods purchased.
 - cost of goods sold.
 - All of the answer choices are correct.
4. Poppins Company has the following: (LO 2)

	Units	Unit Cost
Inventory, Jan. 1	8,000	\$11
Purchase, June 19	13,000	12
Purchase, Nov. 8	5,000	13

- If Poppins has 9,000 units on hand at December 31, the cost of the ending inventory under FIFO is:
- \$99,000.
 - \$108,000.
 - \$113,000.
 - \$117,000.
5. Using the data in Question 4 above, the cost of the ending inventory under LIFO is: (LO 2)
- \$113,000.
 - \$108,000.
 - \$99,000.
 - \$100,000.

(LO 2) **6.** Hansel Electronics has the following:

	<u>Units</u>	<u>Unit Cost</u>
Inventory, Jan. 1	5,000	\$ 8
Purchase, April 2	15,000	\$10
Purchase, Aug. 28	20,000	\$12

If Hansel has 7,000 units on hand at December 31, the cost of ending inventory under the average-cost method is:

- (a) \$84,000. (c) \$56,000.
 (b) \$70,000. (d) \$75,250.

(LO 2) **7.** In periods of rising prices, LIFO will produce:

- (a) higher net income than FIFO.
 (b) the same net income as FIFO.
 (c) lower net income than FIFO.
 (d) higher net income than average-cost.

(LO 2) **8.** Factors that affect the selection of an inventory costing method do **not** include:

- (a) tax effects.
 (b) balance sheet effects.
 (c) income statement effects.
 (d) perpetual vs. periodic inventory system.

(LO 3) **9.** Falk Company's ending inventory is understated \$4,000. The effects of this error on the current year's cost of goods sold and net income, respectively, are:

- (a) understated, overstated.
 (b) overstated, understated.
 (c) overstated, overstated.
 (d) understated, understated.

(LO 3) **10.** Pauline Company overstated its inventory by \$15,000 at December 31, 2016. It did not correct the error in 2016 or 2017. As a result, Pauline's stockholders' equity was:

- (a) overstated at December 31, 2016, and understated at December 31, 2017.
 (b) overstated at December 31, 2016, and properly stated at December 31, 2017.
 (c) understated at December 31, 2016, and understated at December 31, 2017.

(d) overstated at December 31, 2016, and overstated at December 31, 2017.

11. Norton Company purchased 1,000 widgets and has 200 widgets in its ending inventory at a cost of \$91 each and a current replacement cost of \$80 each. The ending inventory under lower-of-cost-or-market is:

- (a) \$91,000. (c) \$18,200.
 (b) \$80,000. (d) \$16,000.

12. Santana Company had beginning inventory of \$80,000, ending inventory of \$110,000, cost of goods sold of \$285,000, and sales of \$475,000. Santana's days in inventory is:

- (a) 73 days. (c) 102.5 days.
 (b) 121.7 days. (d) 84.5 days.

13. Which of these would cause the inventory turnover to increase the most?

- (a) Increasing the amount of inventory on hand.
 (b) Keeping the amount of inventory on hand constant but increasing sales.
 (c) Keeping the amount of inventory on hand constant but decreasing sales.
 (d) Decreasing the amount of inventory on hand and increasing sales.

***14.** In a perpetual inventory system:

- (a) LIFO cost of goods sold will be the same as in a periodic inventory system.
 (b) average costs are a simple average of unit costs incurred.
 (c) a new average is computed under the average-cost method after each sale.
 (d) FIFO cost of goods sold will be the same as in a periodic inventory system.

***15.** King Company has sales of \$150,000 and cost of goods available for sale of \$135,000. If the gross profit rate is 30%, the estimated cost of the ending inventory under the gross profit method is:

- (a) \$15,000. (c) \$45,000.
 (b) \$30,000. (d) \$75,000.

Solutions

1. (a) Goods held on consignment should not be included because another company has title (ownership) to the goods. The other choices are incorrect because (b) goods shipped on consignment to another company and (c) goods in transit from another company shipped FOB shipping point should be included in a company's ending inventory. Choice (d) is incorrect as there is a correct answer for this question.

2. (b) The inventory held on consignment by Rogers should be included in Railway's inventory balance at cost (\$35,000). The purchased goods of \$13,000 should not be included in inventory until January 3 because the goods are shipped FOB destination. Therefore, the correct amount of inventory is \$215,000 (\$180,000 + \$35,000), not (a) \$230,000, (c) \$228,000, or (d) \$193,000.

3. (b) Cost of goods available for sale consists of beginning inventory and cost of goods purchased, not (a) ending inventory or (c) cost of goods sold. Therefore, choice (d) is also incorrect.

4. (c) Under FIFO, ending inventory will consist of 5,000 units from the Nov. 8 purchase and 4,000 units from the June 19 purchase. Therefore, ending inventory is $(5,000 \times \$13) + (4,000 \times \$12) = \$113,000$, not (a) \$99,000, (b) \$108,000, or (d) \$117,000.

5. (d) Under LIFO, ending inventory will consist of 8,000 units from the inventory at Jan. 1 and 1,000 units from the June 19 purchase. Therefore, ending inventory is $(8,000 \times \$11) + (1,000 \times \$12) = \$100,000$, not (a) \$113,000, (b) \$108,000, or (c) \$99,000.

6. (d) Under the average-cost method, total cost of goods available for sale needs to be calculated in order to determine average cost per unit. The total cost of goods available is $\$430,000 = (5,000 \times \$8) + (15,000 \times \$10) + (20,000 \times \$12)$. The average cost per unit = $(\$430,000/40,000 \text{ total units available for sale}) = \10.75 . Therefore, ending inventory is $(\$10.75 \times 7,000) = \$75,250$, not (a) \$84,000, (b) \$70,000, or (c) \$56,000.

7. (c) In periods of rising prices, LIFO will produce lower net income than FIFO, not (a) higher than FIFO or (b) the same as FIFO. Choice (d) is incorrect because in periods of rising prices, LIFO will produce lower net income than average-cost. LIFO therefore charges the highest inventory cost against revenues in a period of rising prices.

8. (d) Perpetual vs. periodic inventory system is not one of the factors that affect the selection of an inventory costing method. The other choices are incorrect because (a) tax effects, (b) balance sheet effects, and (c) income statement effects all affect the selection of an inventory costing method.

9. (b) Because ending inventory is too low, cost of goods sold will be too high (overstated) and since cost of goods sold (an expense) is too high, net income will be too low (understated). Therefore, the other choices are incorrect.

10. (b) Stockholders' equity is overstated by \$15,000 at December 31, 2016, and is properly stated at December 31, 2017. An ending inventory error in one period will have an equal and opposite effect on cost of goods sold and net income in the next period; after two years, the errors have offset each other. The other choices are incorrect because stockholders' equity (a) is properly stated, not understated, at December 31, 2017; (c) is overstated, not understated, by \$15,000 at December 31, 2016, and is properly stated, not understated, at December 31, 2017; and (d) is properly stated at December 31, 2017, not overstated.

11. (d) Under the LCM basis, "market" is defined as the current replacement cost. Therefore, ending inventory would be valued at $200 \text{ widgets} \times \$80 \text{ each} = \$16,000$, not (a) \$91,000, (b) \$80,000, or (c) \$18,200.

12. (b) Santana's days in inventory = $365 / \text{Inventory turnover} = 365 / [\$285,000 / (\$80,000 + \$110,000) / 2] = 121.7 \text{ days}$, not (a) 73 days, (c) 102.5 days, or (d) 84.5 days.

13. (d) Decreasing the amount of inventory on hand will cause the denominator to decrease, causing inventory turnover to increase. Increasing sales will cause the numerator of the ratio to increase (higher sales means higher COGS), thus causing inventory turnover to increase even more. The other choices are incorrect because (a) increasing the amount of inventory on hand causes the denominator of the ratio to increase while the numerator stays the same, causing inventory turnover to decrease; (b) keeping the amount of inventory on hand constant but increasing sales will cause inventory turnover to increase because the numerator of the ratio will increase (higher sales means higher COGS) while the denominator stays the same, which will result in a lesser inventory increase than decreasing amount of inventory on hand and increasing sales; and (c) keeping the amount of inventory on hand constant but decreasing sales will cause inventory turnover to decrease because the numerator of the ratio will decrease (lower sales means lower COGS) while the denominator stays the same.

***14. (d)** FIFO cost of goods sold is the same under both a periodic and a perpetual inventory system. The other choices are incorrect because (a) LIFO cost of goods sold is not the same under a periodic and a perpetual inventory system; (b) average costs are based on a moving average of unit costs, not an average of unit costs; and (c) a new average is computed under the average-cost method after each purchase, not sale.

***15. (b)** $\text{COGS} = \text{Sales} (\$150,000) - \text{Gross profit} (\$150,000 \times 30\%) = \$105,000$. Ending inventory = Cost of goods available for sale ($\$135,000$) - COGS ($\$105,000$) = $\$30,000$, not (a) \$15,000, (c) \$45,000, or (d) \$75,000.

PRACTICE EXERCISES

1. Mika Sorbino, an auditor with Martinez CPAs, is performing a review of Sergei Company's inventory account. Sergei's did not have a good year and top management is under pressure to boost reported income. According to its records, the inventory balance at year-end was \$650,000. However, the following information was not considered when determining that amount.

Determine the correct inventory amount.

(LO 1)

- Included in the company's count were goods with a cost of \$200,000 that the company is holding on consignment. The goods belong to Bosnia Corporation.
- The physical count did not include goods purchased by Sergei with a cost of \$40,000 that were shipped FOB shipping point on December 28 and did not arrive at Sergei's warehouse until January 3.
- Included in the inventory account was \$15,000 of office supplies that were stored in the warehouse and were to be used by the company's supervisors and managers during the coming year.
- The company received an order on December 28 that was boxed and was sitting on the loading dock awaiting pick-up on December 31. The shipper picked up the goods on January 1 and delivered them on January 6. The shipping terms were FOB shipping point. The goods had a selling price of \$40,000 and a cost of \$30,000. The goods were not included in the count because they were sitting on the dock.
- On December 29, Sergei shipped goods with a selling price of \$80,000 and a cost of \$60,000 to Oman Sales Corporation FOB shipping point. The goods arrived on January 3. Oman Sales had only ordered goods with a selling price of \$10,000 and a cost of \$8,000. However, a Sergei's sales manager had authorized the shipment and said that if Oman wanted to ship the goods back next week, it could.
- Included in the count was \$30,000 of goods that were parts for a machine that the company no longer made. Given the high-tech nature of Sergei's products, it was unlikely that these obsolete parts had any other use. However, management would prefer to keep them on the books at cost, "since that is what we paid for them, after all."

Instructions

Prepare a schedule to determine the correct inventory amount. Provide explanations for each item above, saying why you did or did not make an adjustment for each item.

Solution

1. Ending inventory—as reported	\$650,000
1. Subtract from inventory: The goods belong to Bosnia Corporation. Sergei is merely holding them as a consignee.	(200,000)
2. Add to inventory: The goods belong to Sergei when they were shipped.	40,000
3. Subtract from inventory: Office supplies should be carried in a separate account. They are not considered inventory held for resale.	(15,000)
4. Add to inventory: The goods belong to Sergei until they are shipped (Jan. 1).	30,000
5. Add to inventory: Oman Sales ordered goods with a cost of \$8,000. Sergei should record the corresponding sales revenue of \$10,000. Sergei's decision to ship extra "unordered" goods does not constitute a sale. The manager's statement that Oman could ship the goods back indicates that Sergei knows this over-shipment is not a legitimate sale. The manager acted unethically in an attempt to improve Sergei's reported income by overshipping.	52,000
6. Subtract from inventory: GAAP require that inventory be valued at the lower-of-cost-or-market. Obsolete parts should be adjusted from cost to zero if they have no other use.	(30,000)
Correct inventory	<u>\$527,000</u>

Determine effects of inventory errors.

(LO 3)

2. Abel's Hardware reported cost of goods sold as follows.

	<u>2016</u>	<u>2017</u>
Beginning inventory	\$ 20,000	\$ 30,000
Cost of goods purchased	150,000	175,000
Cost of goods available for sale	170,000	205,000
Ending inventory	(30,000)	(35,000)
Cost of goods sold	<u>\$140,000</u>	<u>\$170,000</u>

Abel's made two errors: (1) 2016 ending inventory was overstated \$2,500, and (2) 2017 ending inventory was understated \$5,500.

Instructions

Compute the correct cost of goods sold for each year.

Solution

2.		<u>2016</u>	<u>2017</u>
	Beginning inventory	\$ 20,000	\$ 27,500
	Cost of goods purchased	150,000	175,000
	Cost of goods available for sale	170,000	202,500
	Corrected ending inventory	(27,500) ^a	(40,500) ^b
	Cost of goods sold	<u>\$142,500</u>	<u>\$162,000</u>

^a\$30,000 - \$2,500 = \$27,500; ^b\$35,000 + \$5,500 = \$40,500

PRACTICE PROBLEMS

1. Gerald D. Englehart Company has the following inventory, purchases, and sales data for the month of March.

Inventory:	March 1	200 units @ \$4.00	\$ 800
Purchases:	March 10	500 units @ \$4.50	2,250
	March 20	400 units @ \$4.75	1,900
	March 30	300 units @ \$5.00	1,500
Sales:	March 15	500 units	
	March 25	400 units	

Compute inventory and cost of goods sold using three cost flow methods in a periodic inventory system.

(LO 2)

The physical inventory count on March 31 shows 500 units on hand.

Instructions

Under a **periodic inventory system**, determine the cost of inventory on hand at March 31 and the cost of goods sold for March under (a) FIFO, (b) LIFO, and (c) average-cost.

Solution

1. The cost of goods available for sale is \$6,450, as follows.

Inventory:	200 units @ \$4.00	\$ 800	
Purchases:	March 10	500 units @ \$4.50	2,250
	March 20	400 units @ \$4.75	1,900
	March 30	300 units @ \$5.00	1,500
Total:	<u>1,400</u>	<u>\$6,450</u>	

Under a **periodic inventory system**, the cost of goods sold under each cost flow method is as follows.

(a) **FIFO Method**

Ending inventory:

<u>Date</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>	
March 30	300	\$5.00	\$1,500	
March 20	200	4.75	950	\$2,450

Cost of goods sold: $\$6,450 - \$2,450 = \underline{\underline{\$4,000}}$

(b) **LIFO Method**

Ending inventory:

<u>Date</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>	
March 1	200	\$4.00	\$ 800	
March 10	300	4.50	1,350	\$2,150

Cost of goods sold: $\$6,450 - \$2,150 = \underline{\underline{\$4,300}}$

(c) **Average-Cost Method**

Average unit cost: $\$6,450 \div 1,400 = \4.607

Ending inventory: $500 \times \$4.607 = \underline{\underline{\$2,303.50}}$

Cost of goods sold: $\$6,450 - \$2,303.50 = \underline{\underline{\$4,146.50}}$

*2. **Practice Problem 1** showed cost of goods sold computations under a periodic inventory system. Now let's assume that Gerald D. Englehart Company uses a perpetual inventory system. The company has the same inventory, purchases, and sales data for the month of March as shown earlier:

Compute inventory and cost of goods sold using three cost flow methods in a perpetual inventory system.

(LO 5)

Inventory: March 1	200 units @ \$4.00	\$ 800
Purchases:		
March 10	500 units @ \$4.50	2,250
March 20	400 units @ \$4.75	1,900
March 30	300 units @ \$5.00	1,500
Sales:		
March 15	500 units	
March 25	400 units	

The physical inventory count on March 31 shows 500 units on hand.

Instructions

Under a **perpetual inventory system**, determine the cost of inventory on hand at March 31 and the cost of goods sold for March under (a) FIFO, (b) LIFO, and (c) moving-average cost.

Solution

2. The cost of goods available for sale is \$6,450, as follows.

Inventory:	200 units @ \$4.00	\$ 800
Purchases: March 10	500 units @ \$4.50	2,250
March 20	400 units @ \$4.75	1,900
March 30	300 units @ \$5.00	1,500
Total:	<u>1,400</u>	<u>\$6,450</u>

Under a **perpetual inventory system**, the cost of goods sold under each cost flow method is as follows.

		<u>FIFO Method</u>		
<u>Date</u>	<u>Purchases</u>	<u>Cost of Goods Sold</u>	<u>Balance</u>	
March 1			(200 @ \$4.00)	\$ 800
March 10	(500 @ \$4.50) \$2,250		(200 @ \$4.00)	\$3,050
			(500 @ \$4.50)	
March 15		(200 @ \$4.00)	(200 @ \$4.50)	\$ 900
		(300 @ \$4.50)		
		\$2,150		
March 20	(400 @ \$4.75) \$1,900		(200 @ \$4.50)	\$2,800
			(400 @ \$4.75)	
March 25		(200 @ \$4.50)	(200 @ \$4.75)	\$ 950
		(200 @ \$4.75)		
		\$1,850		
March 30	(300 @ \$5.00) \$1,500		(200 @ \$4.75)	\$2,450
			(300 @ \$5.00)	
	Ending inventory <u>\$2,450</u>	Cost of goods sold: \$2,150 + \$1,850 =	<u>\$4,000</u>	

		<u>LIFO Method</u>		
<u>Date</u>	<u>Purchases</u>	<u>Cost of Goods Sold</u>	<u>Balance</u>	
March 1			(200 @ \$4.00)	\$ 800
March 10	(500 @ \$4.50) \$2,250		(200 @ \$4.00)	\$3,050
			(500 @ \$4.50)	
March 15		(500 @ \$4.50) \$2,250	(200 @ \$4.00)	\$ 800
March 20	(400 @ \$4.75) \$1,900		(200 @ \$4.00)	\$2,700
			(400 @ \$4.75)	
March 25		(400 @ \$4.75) \$1,900	(200 @ \$4.00)	\$ 800
March 30	(300 @ \$5.00) \$1,500		(200 @ \$4.00)	\$2,300
			(300 @ \$5.00)	
	Ending inventory <u>\$2,300</u>	Cost of goods sold: \$2,250 + \$1,900 =	<u>\$4,150</u>	

		<u>Moving-Average Cost Method</u>		
<u>Date</u>	<u>Purchases</u>	<u>Cost of Goods Sold</u>	<u>Balance</u>	
March 1			(200 @ \$ 4.00)	\$ 800
March 10	(500 @ \$4.50) \$2,250		(700 @ \$4.357)	\$3,050
March 15		(500 @ \$4.357) \$2,179	(200 @ \$4.357)	\$ 871
March 20	(400 @ \$4.75) \$1,900		(600 @ \$4.618)	\$2,771
March 25		(400 @ \$4.618) \$1,847	(200 @ \$4.618)	\$ 924
March 30	(300 @ \$5.00) \$1,500		(500 @ \$4.848)	\$2,424
	Ending inventory <u>\$2,424</u>	Cost of goods sold: \$2,179 + \$1,847 =	<u>\$4,026</u>	

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

QUESTIONS

1. "The key to successful business operations is effective inventory management." Do you agree? Explain.
2. An item must possess two characteristics to be classified as inventory by a merchandiser. What are these two characteristics?
3. Your friend Theo Dolan has been hired to help take the physical inventory in Silker Hardware Store. Explain to Theo Dolan what this job will entail.
4. (a) Rochelle Company ships merchandise to Jay Company on December 30. The merchandise reaches the buyer on January 6. Indicate the terms of sale that will result in the goods being included in (1) Rochelle's December 31 inventory, and (2) Jay's December 31 inventory.
(b) Under what circumstances should Rochelle Company include consigned goods in its inventory?
5. Katz Hat Shop received a shipment of hats for which it paid the wholesaler \$2,970. The price of the hats was \$3,000, but Katz was given a \$30 cash discount and required to pay freight charges of \$50. In addition, Katz paid \$130 to cover the travel expenses of an employee who negotiated the purchase of the hats. What amount will Katz record for inventory? Why?
6. Explain the difference between the terms FOB shipping point and FOB destination.
7. Kyle Ebert believes that the allocation of inventoriable costs should be based on the actual physical flow of the goods. Explain to Kyle why this may be both impractical and inappropriate.
8. What is a major advantage and a major disadvantage of the specific identification method of inventory costing?
9. "The selection of an inventory cost flow method is a decision made by accountants." Do you agree? Explain. Once a method has been selected, what accounting requirement applies?
10. Which assumed inventory cost flow method:
 - (a) usually parallels the actual physical flow of merchandise?
 - (b) assumes that goods available for sale during an accounting period are identical?
 - (c) assumes that the latest units purchased are the first to be sold?
11. In a period of rising prices, the inventory reported in Gumby Company's balance sheet is close to the current cost of the inventory. Pokey Company's inventory is considerably below its current cost. Identify the inventory cost flow method being used by each company. Which company has probably been reporting the higher gross profit?
12. Davey Company has been using the FIFO cost flow method during a prolonged period of rising prices. During the same time period, Davey has been paying out all of its net income as dividends. What adverse effects may result from this policy?
13. Josh Kuchin is studying for the next accounting midterm examination. What should Josh know about (a) departing from the cost basis of accounting for inventories and (b) the meaning of "market" in the lower-of-cost-or-market method?
14. Taylor Entertainment Center has 5 televisions on hand at the balance sheet date. Each costs \$400. The current replacement cost is \$380 per unit. Under the lower-of-cost-or-market basis of accounting for inventories, what value should be reported for the televisions on the balance sheet? Why?
15. Bonnie Stores has 20 toasters on hand at the balance sheet date. Each costs \$27. The current replacement cost is \$30 per unit. Under the lower-of-cost-or-market basis of accounting for inventories, what value should Bonnie report for the toasters on the balance sheet? Why?
16. Kuzu Company discovers in 2017 that its ending inventory at December 31, 2016, was \$7,000 understated. What effect will this error have on (a) 2016 net income, (b) 2017 net income, and (c) the combined net income for the 2 years?
17. Ryder Company's balance sheet shows Inventory \$162,800. What additional disclosures should be made?
18. Under what circumstances might inventory turnover be too high? That is, what possible negative consequences might occur?
19. What inventory cost flow does **Apple** use for its inventories? (*Hint*: You will need to examine the notes for Apple's financial statements.)
- *20. "When perpetual inventory records are kept, the results under the FIFO and LIFO methods are the same as they would be in a periodic inventory system." Do you agree? Explain.
- *21. How does the average-cost method of inventory costing differ between a perpetual inventory system and a periodic inventory system?
- *22. When is it necessary to estimate inventories?
- *23. Both the gross profit method and the retail inventory method are based on averages. For each method, indicate the average used, how it is determined, and how it is applied.
- *24. Wiggins Company has net sales of \$400,000 and cost of goods available for sale of \$300,000. If the gross profit rate is 35%, what is the estimated cost of the ending inventory? Show computations.
- *25. Emporia Shoe Shop had goods available for sale in 2017 with a retail price of \$120,000. The cost of these goods was \$84,000. If sales during the period were \$80,000, what is the estimated cost of ending inventory using the retail inventory method?

BRIEF EXERCISES

Identify items to be included in taking a physical inventory.

(LO 1)

BE6-1 Farley Company identifies the following items for possible inclusion in the taking of a physical inventory. Indicate whether each item should be included or excluded from the inventory taking.

- (a) Goods shipped on consignment by Farley to another company.
- (b) Goods in transit from a supplier shipped FOB destination.
- (c) Goods sold but being held for customer pickup.
- (d) Goods held on consignment from another company.

Determine ending inventory amount.

(LO 1)

BE6-2 Stallman Company took a physical inventory on December 31 and determined that goods costing \$200,000 were on hand. Not included in the physical count were \$25,000 of goods purchased from Pelzer Corporation, FOB shipping point, and \$22,000 of goods sold to Alvarez Company for \$30,000, FOB destination. Both the Pelzer purchase and the Alvarez sale were in transit at year-end. What amount should Stallman report as its December 31 inventory?

Compute ending inventory using FIFO and LIFO.

(LO 2)

BE6-3 In its first month of operations, Bethke Company made three purchases of merchandise in the following sequence: (1) 300 units at \$6, (2) 400 units at \$7, and (3) 200 units at \$8. Assuming there are 360 units on hand, compute the cost of the ending inventory under the (a) FIFO method and (b) LIFO method. Bethke uses a periodic inventory system.

Compute the ending inventory using average-cost.

(LO 2)

BE6-4 Data for Bethke Company are presented in BE6-3. Compute the cost of the ending inventory under the average-cost method, assuming there are 360 units on hand. (Round average cost per unit to nearest cent.)

Explain the financial statement effect of inventory cost flow assumptions.

(LO 2)

BE6-5 The management of Svetlana Corp. is considering the effects of inventory-costing methods on its financial statements and its income tax expense. Assuming that the price the company pays for inventory is increasing, which method will:

- (a) Provide the highest net income?
- (b) Provide the highest ending inventory?
- (c) Result in the lowest income tax expense?
- (d) Result in the most stable earnings over a number of years?

Determine correct income statement amounts.

(LO 3)

BE6-6 Pettit Company reports net income of \$90,000 in 2017. However, ending inventory was understated \$7,000. What is the correct net income for 2017? What effect, if any, will this error have on total assets as reported in the balance sheet at December 31, 2017?

Determine the LCM valuation using inventory categories.

(LO 4)

BE6-7 Central Appliance Center accumulates the following cost and market data at December 31.

Inventory Categories	Cost Data	Market Data
Cameras	\$12,000	\$12,100
Camcorders	9,500	9,700
Blu-ray players	14,000	12,800

Compute the lower-of-cost-or-market for the company's total inventory.

Compute inventory turnover and days in inventory.

(LO 4)

BE6-8 At December 31, 2017, the following information was available for A. Kamble Company: ending inventory \$40,000, beginning inventory \$60,000, cost of goods sold \$270,000, and sales revenue \$380,000. Calculate inventory turnover and days in inventory for A. Kamble Company.

Apply cost flow methods to perpetual inventory records.

(LO 5)

***BE6-9** Gregory Department Store uses a perpetual inventory system. Data for product E2-D2 include the following purchases.

Date	Number of Units	Unit Price
May 7	50	\$10
July 28	30	13

On June 1, Gregory sold 26 units, and on August 27, 40 more units. Prepare the perpetual inventory schedule for the above transactions using (a) FIFO, (b) LIFO, and (c) moving-average cost. (Round average cost per unit to nearest cent.)

***BE6-10** At May 31, Suarez Company has net sales of \$330,000 and cost of goods available for sale of \$230,000. Compute the estimated cost of the ending inventory, assuming the gross profit rate is 35%.

Apply the gross profit method.
(LO 6)

***BE6-11** On June 30, Calico Fabrics has the following data pertaining to the retail inventory method. Goods available for sale: at cost \$38,000; at retail \$50,000; net sales \$40,000; and ending inventory at retail \$10,000. Compute the estimated cost of the ending inventory using the retail inventory method.

Apply the retail inventory method.
(LO 6)

DO IT! Exercises

DO IT! 6-1 Gomez Company just took its physical inventory. The count of inventory items on hand at the company's business locations resulted in a total inventory cost of \$300,000. In reviewing the details of the count and related inventory transactions, you have discovered the following.

Apply rules of ownership to determine inventory cost.
(LO 1)

- Gomez has sent inventory costing \$26,000 on consignment to Kako Company. All of this inventory was at Kako's showrooms on December 31.
- The company did not include in the count inventory (cost, \$20,000) that was sold on December 28, terms FOB shipping point. The goods were in transit on December 31.
- The company did not include in the count inventory (cost, \$17,000) that was purchased with terms of FOB shipping point. The goods were in transit on December 31.

Compute the correct December 31 inventory.

DO IT! 6-2 The accounting records of Old Towne Electronics show the following data.

Beginning inventory	3,000 units at \$5
Purchases	8,000 units at \$7
Sales	9,400 units at \$10

Compute cost of goods sold under different cost flow methods.
(LO 2)

Determine cost of goods sold during the period under a periodic inventory system using (a) the FIFO method, (b) the LIFO method, and (c) the average-cost method. (Round unit cost to nearest tenth of a cent.)

DO IT! 6-3 Janus Company understated its 2016 ending inventory by \$31,000. Determine the impact this error has on ending inventory, cost of goods sold, and stockholders' equity in 2016 and 2017.

Determine effect of inventory error.
(LO 3)

DO IT! 6-4 (a) Moberg Company sells three different categories of tools (small, medium, and large). The cost and market value of its inventory of tools are as follows.

	<u>Cost</u>	<u>Market</u>
Small	\$ 64,000	\$ 73,000
Medium	290,000	260,000
Large	152,000	171,000

Compute inventory value under LCM and assess inventory level.
(LO 4)

Determine the value of the company's inventory under the lower-of-cost-or-market approach. (b) Early in 2017, Chien Company switched to a just-in-time inventory system. Its sales revenue, cost of goods sold, and inventory amounts for 2016 and 2017 are shown below.

	<u>2016</u>	<u>2017</u>
Sales revenue	\$3,120,000	\$3,713,000
Cost of goods sold	1,200,000	1,425,000
Beginning inventory	180,000	220,000
Ending inventory	220,000	100,000

Determine the inventory turnover and days in inventory for 2016 and 2017. Discuss the changes in the amount of inventory, the inventory turnover and days in inventory, and the amount of sales revenue across the two years.

EXERCISES

Determine the correct inventory amount.

(LO 1)

E6-1 Tri-State Bank and Trust is considering giving Josef Company a loan. Before doing so, management decides that further discussions with Josef's accountant may be desirable. One area of particular concern is the inventory account, which has a year-end balance of \$297,000. Discussions with the accountant reveal the following.

1. Josef sold goods costing \$38,000 to Sorci Company, FOB shipping point, on December 28. The goods are not expected to arrive at Sorci until January 12. The goods were not included in the physical inventory because they were not in the warehouse.
2. The physical count of the inventory did not include goods costing \$95,000 that were shipped to Josef FOB destination on December 27 and were still in transit at year-end.
3. Josef received goods costing \$22,000 on January 2. The goods were shipped FOB shipping point on December 26 by Solita Co. The goods were not included in the physical count.
4. Josef sold goods costing \$35,000 to Natali Co., FOB destination, on December 30. The goods were received at Natali on January 8. They were not included in Josef's physical inventory.
5. Josef received goods costing \$44,000 on January 2 that were shipped FOB destination on December 29. The shipment was a rush order that was supposed to arrive December 31. This purchase was included in the ending inventory of \$297,000.

Instructions

Determine the correct inventory amount on December 31.

Determine the correct inventory amount.

(LO 1)

E6-2 Rachel Warren, an auditor with Laplante CPAs, is performing a review of Schuda Company's inventory account. Schuda did not have a good year, and top management is under pressure to boost reported income. According to its records, the inventory balance at year-end was \$740,000. However, the following information was not considered when determining that amount.

1. Included in the company's count were goods with a cost of \$250,000 that the company is holding on consignment. The goods belong to Harmon Corporation.
2. The physical count did not include goods purchased by Schuda with a cost of \$40,000 that were shipped FOB destination on December 28 and did not arrive at Schuda's warehouse until January 3.
3. Included in the inventory account was \$14,000 of office supplies that were stored in the warehouse and were to be used by the company's supervisors and managers during the coming year.
4. The company received an order on December 29 that was boxed and sitting on the loading dock awaiting pick-up on December 31. The shipper picked up the goods on January 1 and delivered them on January 6. The shipping terms were FOB shipping point. The goods had a selling price of \$40,000 and a cost of \$28,000. The goods were not included in the count because they were sitting on the dock.
5. On December 29, Schuda shipped goods with a selling price of \$80,000 and a cost of \$60,000 to Reza Sales Corporation FOB shipping point. The goods arrived on January 3. Reza had only ordered goods with a selling price of \$10,000 and a cost of \$8,000. However, a sales manager at Schuda had authorized the shipment and said that if Reza wanted to ship the goods back next week, it could.
6. Included in the count was \$40,000 of goods that were parts for a machine that the company no longer made. Given the high-tech nature of Schuda's products, it was unlikely that these obsolete parts had any other use. However, management would prefer to keep them on the books at cost, "since that is what we paid for them, after all."

Instructions

Prepare a schedule to determine the correct inventory amount. Provide explanations for each item above, saying why you did or did not make an adjustment for each item.

Calculate cost of goods sold using specific identification and FIFO.

(LO 2)

E6-3 On December 1, Marzion Electronics Ltd. has three DVD players left in stock. All are identical, all are priced to sell at \$150. One of the three DVD players left in stock, with serial #1012, was purchased on June 1 at a cost of \$100. Another, with serial #1045, was purchased on November 1 for \$90. The last player, serial #1056, was purchased on November 30 for \$80.

Instructions

- Calculate the cost of goods sold using the FIFO periodic inventory method assuming that two of the three players were sold by the end of December, Marzion Electronics' year-end.
- If Marzion Electronics used the specific identification method instead of the FIFO method, how might it alter its earnings by "selectively choosing" which particular players to sell to the two customers? What would Marzion's cost of goods sold be if the company wished to minimize earnings? Maximize earnings?
- Which of the two inventory methods do you recommend that Marzion use? Explain why.

E6-4 Linda's Boards sells a snowboard, Xpert, that is popular with snowboard enthusiasts. Information relating to Linda's purchases of Xpert snowboards during September is shown below. During the same month, 121 Xpert snowboards were sold. Linda's uses a periodic inventory system.

<u>Date</u>	<u>Explanation</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>
Sept. 1	Inventory	26	\$ 97	\$ 2,522
Sept. 12	Purchases	45	102	4,590
Sept. 19	Purchases	20	104	2,080
Sept. 26	Purchases	50	105	5,250
	Totals	<u>141</u>		<u>\$14,442</u>

Compute inventory and cost of goods sold using FIFO and LIFO.

(LO 2)

Instructions

- Compute the ending inventory at September 30 and cost of goods sold using the FIFO and LIFO methods. Prove the amount allocated to cost of goods sold under each method.
- For both FIFO and LIFO, calculate the sum of ending inventory and cost of goods sold. What do you notice about the answers you found for each method?

E6-5 Xiong Co. uses a periodic inventory system. Its records show the following for the month of May, in which 65 units were sold.

		<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>
May 1	Inventory	30	\$ 8	\$240
15	Purchases	25	11	275
24	Purchases	35	12	420
	Totals	<u>90</u>		<u>\$935</u>

Compute inventory and cost of goods sold using FIFO and LIFO.

(LO 2)

Instructions

Compute the ending inventory at May 31 and cost of goods sold using the FIFO and LIFO methods. Prove the amount allocated to cost of goods sold under each method.

E6-6 Kaleta Company reports the following for the month of June.

		<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>
June 1	Inventory	200	\$5	\$1,000
12	Purchase	400	6	2,400
23	Purchase	300	7	2,100
30	Inventory	100		

Compute inventory and cost of goods sold using FIFO and LIFO.

(LO 2)

Instructions

- Compute the cost of the ending inventory and the cost of goods sold under (1) FIFO and (2) LIFO.
- Which costing method gives the higher ending inventory? Why?
- Which method results in the higher cost of goods sold? Why?

E6-7 Lisa Company had 100 units in beginning inventory at a total cost of \$10,000. The company purchased 200 units at a total cost of \$26,000. At the end of the year, Lisa had 80 units in ending inventory.

Compute inventory under FIFO, LIFO, and average-cost.

(LO 2)

Instructions

- Compute the cost of the ending inventory and the cost of goods sold under (1) FIFO, (2) LIFO, and (3) average-cost.
- Which cost flow method would result in the highest net income?

- (c) Which cost flow method would result in inventories approximating current cost in the balance sheet?
 (d) Which cost flow method would result in Lisa paying the least taxes in the first year?

Compute inventory and cost of goods sold using average-cost.

(LO 2)

E6-8 Inventory data for Kaleta Company are presented in E6-6.

Instructions

- (a) Compute the cost of the ending inventory and the cost of goods sold using the average-cost method. (Round average cost per unit to nearest cent.)
 (b) Will the results in (a) be higher or lower than the results under (1) FIFO and (2) LIFO?
 (c) Why is the average unit cost not \$6?

Determine effects of inventory errors.

(LO 3)

E6-9 Hamid's Hardware reported cost of goods sold as follows.

	<u>2016</u>	<u>2017</u>
Beginning inventory	\$ 20,000	\$ 30,000
Cost of goods purchased	150,000	175,000
Cost of goods available for sale	170,000	205,000
Ending inventory	30,000	35,000
Cost of goods sold	<u>\$140,000</u>	<u>\$170,000</u>

Hamid's made two errors: (1) 2016 ending inventory was overstated \$3,000, and (2) 2017 ending inventory was understated \$6,000.

Instructions

Compute the correct cost of goods sold for each year.

Prepare correct income statements.

(LO 3)

E6-10 Rulix Watch Company reported the following income statement data for a 2-year period.

	<u>2016</u>	<u>2017</u>
Sales revenue	\$220,000	\$250,000
Cost of goods sold		
Beginning inventory	32,000	44,000
Cost of goods purchased	173,000	202,000
Cost of goods available for sale	205,000	246,000
Ending inventory	44,000	52,000
Cost of goods sold	<u>161,000</u>	<u>194,000</u>
Gross profit	<u>\$ 59,000</u>	<u>\$ 56,000</u>

Rulix uses a periodic inventory system. The inventories at January 1, 2016, and December 31, 2017, are correct. However, the ending inventory at December 31, 2016, was overstated \$6,000.

Instructions

- (a) Prepare correct income statement data for the 2 years.
 (b) What is the cumulative effect of the inventory error on total gross profit for the 2 years?
 (c)  Explain in a letter to the president of Rulix Watch Company what has happened, i.e., the nature of the error and its effect on the financial statements.

Determine ending inventory under LCM.

(LO 4)

E6-11 Optix Camera Shop uses the lower-of-cost-or-market basis for its inventory. The following data are available at December 31.

<u>Item</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Market</u>
Cameras:			
Minolta	5	\$170	\$156
Canon	6	150	152
Light meters:			
Vivitar	12	125	115
Kodak	14	120	135

Instructions

Determine the amount of the ending inventory by applying the lower-of-cost-or-market basis.

E6-12 Serebin Company applied FIFO to its inventory and got the following results for its ending inventory.

Cameras	100 units at a cost per unit of \$65
Blu-rays players	150 units at a cost per unit of \$75
iPods	125 units at a cost per unit of \$80

Compute lower-of-cost-or-market.

(LO 4)

The cost of purchasing units at year-end was cameras \$71, Blu-ray players \$67, and iPods \$78.

Instructions

Determine the amount of ending inventory at lower-of-cost-or-market.

E6-13 This information is available for Quick's Photo Corporation for 2015, 2016, and 2017.

	<u>2015</u>	<u>2016</u>	<u>2017</u>
Beginning inventory	\$ 100,000	\$ 300,000	\$ 400,000
Ending inventory	300,000	400,000	480,000
Cost of goods sold	900,000	1,120,000	1,300,000
Sales revenue	1,200,000	1,600,000	1,900,000

Compute inventory turnover, days in inventory, and gross profit rate.

(LO 4)

Instructions

Calculate inventory turnover, days in inventory, and gross profit rate (from Chapter 5) for Quick's Photo Corporation for 2015, 2016, and 2017. Comment on any trends.

E6-14 The cost of goods sold computations for Alpha Company and Omega Company are shown below.

	<u>Alpha Company</u>	<u>Omega Company</u>
Beginning inventory	\$ 45,000	\$ 71,000
Cost of goods purchased	200,000	290,000
Cost of goods available for sale	245,000	361,000
Ending inventory	55,000	69,000
Cost of goods sold	<u>\$190,000</u>	<u>\$292,000</u>

Compute inventory turnover and days in inventory.

(LO 4)

Instructions

- (a) Compute inventory turnover and days in inventory for each company.
 (b) Which company moves its inventory more quickly?

* **E6-15** Bufford Appliance uses a perpetual inventory system. For its flat-screen television sets, the January 1 inventory was 3 sets at \$600 each. On January 10, Bufford purchased 6 units at \$660 each. The company sold 2 units on January 8 and 4 units on January 15.

Apply cost flow methods to perpetual records.

(LO 5)

Instructions

Compute the ending inventory under (a) FIFO, (b) LIFO, and (c) moving-average cost. (Round average cost per unit to nearest cent.)

* **E6-16** Kaleta Company reports the following for the month of June.

<u>Date</u>	<u>Explanation</u>	<u>Units</u>	<u>Unit Cost</u>	<u>Total Cost</u>
June 1	Inventory	200	\$5	\$1,000
12	Purchase	400	6	2,400
23	Purchase	300	7	2,100
30	Inventory	100		

Calculate inventory and cost of goods sold using three cost flow methods in a perpetual inventory system.

(LO 5)

Instructions

- (a) Calculate the cost of the ending inventory and the cost of goods sold for each cost flow assumption, using a perpetual inventory system. Assume a sale of 440 units occurred on June 15 for a selling price of \$8 and a sale of 360 units on June 27 for \$9. (Round average cost per unit to 3 decimal places.)

- (b) How do the results differ from E6-6 and E6-8?
 (c) Why is the average unit cost not \$6 [(\$5 + \$6 + \$7) ÷ 3 = \$6]?

Apply cost flow methods to perpetual records.

(LO 5)

***E6-17** Information about Linda's Boards is presented in E6-4. Additional data regarding Linda's sales of Xpert snowboards are provided below. Assume that Linda's uses a perpetual inventory system.

<u>Date</u>		<u>Units</u>	<u>Unit Price</u>	<u>Total Revenue</u>
Sept. 5	Sale	12	\$199	\$ 2,388
Sept. 16	Sale	50	199	9,950
Sept. 29	Sale	59	209	12,331
	Totals	<u>121</u>		<u>\$24,669</u>

Instructions

- (a) Compute ending inventory at September 30 using FIFO, LIFO, and moving-average cost. (Round average cost per unit to nearest cent.)
 (b) Compare ending inventory using a perpetual inventory system to ending inventory using a periodic inventory system (from E6-4).
 (c) Which inventory cost flow method (FIFO, LIFO) gives the same ending inventory value under both periodic and perpetual? Which method gives different ending inventory values?

Use the gross profit method to estimate inventory.

(LO 6)

***E6-18** Brenda Company reported the following information for November and December 2017.

	<u>November</u>	<u>December</u>
Cost of goods purchased	\$536,000	\$ 610,000
Inventory, beginning-of-month	130,000	120,000
Inventory, end-of-month	120,000	?
Sales revenue	840,000	1,000,000

Brenda's ending inventory at December 31 was destroyed in a fire.

Instructions

- (a) Compute the gross profit rate for November.
 (b) Using the gross profit rate for November, determine the estimated cost of inventory lost in the fire.

Determine merchandise lost using the gross profit method of estimating inventory.

(LO 6)

***E6-19** The inventory of Hauser Company was destroyed by fire on March 1. From an examination of the accounting records, the following data for the first 2 months of the year are obtained: Sales Revenue \$51,000, Sales Returns and Allowances \$1,000, Purchases \$31,200, Freight-In \$1,200, and Purchase Returns and Allowances \$1,400.

Instructions

Determine the merchandise lost by fire, assuming:

- (a) A beginning inventory of \$20,000 and a gross profit rate of 40% on net sales.
 (b) A beginning inventory of \$30,000 and a gross profit rate of 30% on net sales.

Determine ending inventory at cost using retail method.

(LO 6)

***E6-20** Gepetto Shoe Store uses the retail inventory method for its two departments, Women's Shoes and Men's Shoes. The following information for each department is obtained.

<u>Item</u>	<u>Women's Shoes</u>	<u>Men's Shoes</u>
Beginning inventory at cost	\$ 25,000	\$ 45,000
Cost of goods purchased at cost	110,000	136,300
Net sales	178,000	185,000
Beginning inventory at retail	46,000	60,000
Cost of goods purchased at retail	179,000	185,000

Instructions

Compute the estimated cost of the ending inventory for each department under the retail inventory method.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

P6-1A Austin Limited is trying to determine the value of its ending inventory as of February 28, 2017, the company's year-end. The following transactions occurred, and the accountant asked your help in determining whether they should be recorded or not.

Determine items and amounts to be recorded in inventory.

- On February 26, Austin shipped goods costing \$800 to a customer and charged the customer \$1,000. The goods were shipped with terms FOB shipping point and the receiving report indicates that the customer received the goods on March 2.
- On February 26, Louis Inc. shipped goods to Austin under terms FOB shipping point. The invoice price was \$450 plus \$30 for freight. The receiving report indicates that the goods were received by Austin on March 2.
- Austin had \$650 of inventory isolated in the warehouse. The inventory is designated for a customer who has requested that the goods be shipped on March 10.
- Also included in Austin's warehouse is \$700 of inventory that Ryhn Producers shipped to Austin on consignment.
- On February 26, Austin issued a purchase order to acquire goods costing \$900. The goods were shipped with terms FOB destination on February 27. Austin received the goods on March 2.
- On February 26, Austin shipped goods to a customer under terms FOB destination. The invoice price was \$350; the cost of the items was \$200. The receiving report indicates that the goods were received by the customer on March 2.

(LO 1)

Instructions

For each of the preceding transactions, specify whether the item in question should be included in ending inventory, and if so, at what amount.

P6-2A Express Distribution markets CDs of the performing artist Fishe. At the beginning of October, Express had in beginning inventory 2,000 of Fishe's CDs with a unit cost of \$7. During October, Express made the following purchases of Fishe's CDs.

Determine cost of goods sold and ending inventory using FIFO, LIFO, and average-cost with analysis.

Oct. 3	2,500 @ \$8	Oct. 19	3,000 @ \$10
Oct. 9	3,500 @ \$9	Oct. 25	4,000 @ \$11

(LO 2)

During October, 10,900 units were sold. Express uses a periodic inventory system.

Instructions

- Determine the cost of goods available for sale.
- Determine (1) the ending inventory and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.
- Which cost flow method results in (1) the highest inventory amount for the balance sheet and (2) the highest cost of goods sold for the income statement?

(b) (2) Cost of goods sold:

FIFO	\$ 94,500
LIFO	\$108,700
Average	\$101,370

P6-3A Ziad Company had a beginning inventory on January 1 of 150 units of Product 4-18-15 at a cost of \$20 per unit. During the year, the following purchases were made.

Determine cost of goods sold and ending inventory using FIFO, LIFO, and average-cost with analysis.

Mar. 15	400 units at \$23	Sept. 4	350 units at \$26
July 20	250 units at \$24	Dec. 2	100 units at \$29

(LO 2)

1,000 units were sold. Ziad Company uses a periodic inventory system.

Instructions

- Determine the cost of goods available for sale.
- Determine (1) the ending inventory, and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.
- Which cost flow method results in (1) the highest inventory amount for the balance sheet, and (2) the highest cost of goods sold for the income statement?

(b) (2) Cost of goods sold:

FIFO	\$23,400
LIFO	\$24,900
Average	\$24,160

Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.

(LO 2)

P6-4A The management of Felipe Inc. is reevaluating the appropriateness of using its present inventory cost flow method, which is average-cost. The company requests your help in determining the results of operations for 2017 if either the FIFO or the LIFO method had been used. For 2017, the accounting records show these data:

Inventories		Purchases and Sales	
Beginning (7,000 units)	\$14,000	Total net sales (180,000 units)	\$747,000
Ending (17,000 units)		Total cost of goods purchased (190,000 units)	466,000

Purchases were made quarterly as follows.

Quarter	Units	Unit Cost	Total Cost
1	50,000	\$2.20	\$110,000
2	40,000	2.35	94,000
3	40,000	2.50	100,000
4	60,000	2.70	162,000
	<u>190,000</u>		<u>\$466,000</u>

Operating expenses were \$130,000, and the company's income tax rate is 40%.

Instructions

(a) Gross profit:

FIFO	\$312,900
LIFO	\$303,000

(a) Prepare comparative condensed income statements for 2017 under FIFO and LIFO. (Show computations of ending inventory.)

(b) Answer the following questions for management.

- Which cost flow method (FIFO or LIFO) produces the more meaningful inventory amount for the balance sheet? Why?
- Which cost flow method (FIFO or LIFO) produces the more meaningful net income? Why?
- Which cost flow method (FIFO or LIFO) is more likely to approximate the actual physical flow of goods? Why?
- How much more cash will be available for management under LIFO than under FIFO? Why?
- Will gross profit under the average-cost method be higher or lower than FIFO? Than LIFO? (*Note:* It is not necessary to quantify your answer.)

Calculate ending inventory, cost of goods sold, gross profit, and gross profit rate under periodic method; compare results.

(LO 2)

P6-5A You are provided with the following information for Najera Inc. for the month ended June 30, 2017. Najera uses the periodic method for inventory.

Date	Description	Quantity	Unit Cost or Selling Price
June 1	Beginning inventory	40	\$40
June 4	Purchase	135	44
June 10	Sale	110	70
June 11	Sale return	15	70
June 18	Purchase	55	46
June 18	Purchase return	10	46
June 25	Sale	65	75
June 28	Purchase	30	50

Instructions

(a) (iii) Gross profit:

LIFO	\$4,215
FIFO	\$4,645
Average	\$4,414.60

(a) Calculate (i) ending inventory, (ii) cost of goods sold, (iii) gross profit, and (iv) gross profit rate under each of the following methods.

(1) LIFO. (2) FIFO. (3) Average-cost.

(b) Compare results for the three cost flow assumptions.

Compare specific identification, FIFO, and LIFO under periodic method; use cost flow assumption to justify price increase.

(LO 2)

P6-6A You are provided with the following information for Barton Inc. Barton Inc. uses the periodic method of accounting for its inventory transactions.

March 1	Beginning inventory 2,000 liters at a cost of 60¢ per liter.
March 3	Purchased 2,500 liters at a cost of 65¢ per liter.
March 5	Sold 2,300 liters for \$1.05 per liter.
March 10	Purchased 4,000 liters at a cost of 72¢ per liter.
March 20	Purchased 2,500 liters at a cost of 80¢ per liter.
March 30	Sold 5,200 liters for \$1.25 per liter.

Instructions

- (a) Prepare partial income statements through gross profit, and calculate the value of ending inventory that would be reported on the balance sheet, under each of the following cost flow assumptions. (Round ending inventory and cost of goods sold to the nearest dollar.)
 - (1) Specific identification method assuming:
 - (i) The March 5 sale consisted of 1,000 liters from the March 1 beginning inventory and 1,300 liters from the March 3 purchase; and
 - (ii) The March 30 sale consisted of the following number of units sold from beginning inventory and each purchase: 450 liters from March 1; 550 liters from March 3; 2,900 liters from March 10; and 1,300 liters from March 20.
 - (2) FIFO.
 - (3) LIFO.
- (b) How can companies use a cost flow method to justify price increases? Which cost flow method would best support an argument to increase prices?

- (a) Gross profit:
 - (1) Specific identification \$3,715
 - (2) FIFO \$3,930
 - (3) LIFO \$3,385

P6-7A The management of Sherlynn Co. asks your help in determining the comparative effects of the FIFO and LIFO inventory cost flow methods. For 2017, the accounting records provide the following data.

Inventory, January 1 (10,000 units)	\$ 45,000
Cost of 100,000 units purchased	532,000
Selling price of 80,000 units sold	700,000
Operating expenses	140,000

Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.

(LO 2)

Units purchased consisted of 35,000 units at \$5.10 on May 10; 35,000 units at \$5.30 on August 15; and 30,000 units at \$5.60 on November 20. Income taxes are 30%.

Instructions

- (a) Prepare comparative condensed income statements for 2017 under FIFO and LIFO. (Show computations of ending inventory.)
- (b) Answer the following questions for management.
 - (1) Which inventory cost flow method produces the most meaningful inventory amount for the balance sheet? Why?
 - (2) Which inventory cost flow method produces the most meaningful net income? Why?
 - (3) Which inventory cost flow method is most likely to approximate actual physical flow of the goods? Why?
 - (4) How much additional cash will be available for management under LIFO than under FIFO? Why?
 - (5) How much of the gross profit under FIFO is illusory in comparison with the gross profit under LIFO?

- (a) Net income:
 - FIFO \$105,700
 - LIFO \$91,000

***P6-8A** Mercer Inc. is a retailer operating in British Columbia. Mercer uses the perpetual inventory method. All sales returns from customers result in the goods being returned to inventory; the inventory is not damaged. Assume that there are no credit transactions; all amounts are settled in cash. You are provided with the following information for Mercer Inc. for the month of January 2017.

Calculate cost of goods sold and ending inventory under LIFO, FIFO, and moving-average cost under the perpetual system; compare gross profit under each assumption.

(LO 5)

<u>Date</u>	<u>Description</u>	<u>Quantity</u>	<u>Unit Cost or Selling Price</u>
January 1	Beginning inventory	100	\$15
January 5	Purchase	140	18
January 8	Sale	110	28
January 10	Sale return	10	28
January 15	Purchase	55	20
January 16	Purchase return	5	20
January 20	Sale	90	32
January 25	Purchase	20	22

(a) (iii) Gross profit:

LIFO	\$2,160
FIFO	\$2,560
Average	\$2,421

Determine ending inventory under a perpetual inventory system.

(LO 5)

(a) Ending inventory:

FIFO	\$1,029
Average	\$994
LIFO	\$958

Compute gross profit rate and inventory loss using gross profit method.

(LO 6)

Instructions

- (a) For each of the following cost flow assumptions, calculate (i) cost of goods sold, (ii) ending inventory, and (iii) gross profit.
- (1) LIFO.
 - (2) FIFO.
 - (3) Moving-average cost. (Round average cost per unit to 3 decimal places.)
- (b) Compare results for the three cost flow assumptions.

***P6-9A** Terando Co. began operations on July 1. It uses a perpetual inventory system. During July, the company had the following purchases and sales.

Date	Purchases		Sales Units
	Units	Unit Cost	
July 1	5	\$120	
July 6			4
July 11	7	\$136	
July 14			3
July 21	8	\$147	
July 27			6

Instructions

- (a) Determine the ending inventory under a perpetual inventory system using (1) FIFO, (2) moving-average cost, and (3) LIFO.
- (b) Which costing method produces the highest ending inventory valuation?

***P6-10A** Suzuki Company lost all of its inventory in a fire on December 26, 2017. The accounting records showed the following gross profit data for November and December.

	November	December (to 12/26)
Net sales	\$600,000	\$700,000
Beginning inventory	32,000	36,000
Purchases	389,000	420,000
Purchase returns and allowances	13,300	14,900
Purchase discounts	8,500	9,500
Freight-in	8,800	9,900
Ending inventory	36,000	?

Suzuki is fully insured for fire losses but must prepare a report for the insurance company.

Instructions

(a) Gross profit rate 38%

- (a) Compute the gross profit rate for November.
- (b) Using the gross profit rate for November, determine the estimated cost of the inventory lost in the fire.

Compute ending inventory using retail method.

(LO 6)

***P6-11A** Dixon Books uses the retail inventory method to estimate its monthly ending inventories. The following information is available for two of its departments at October 31, 2017.

	Hardcovers		Paperbacks	
	Cost	Retail	Cost	Retail
Beginning inventory	\$ 420,000	\$ 700,000	\$ 280,000	\$ 360,000
Purchases	2,135,000	3,200,000	1,155,000	1,540,000
Freight-in	24,000		12,000	
Purchase discounts	44,000		22,000	
Net sales		3,100,000		1,570,000

At December 31, Dixon Books takes a physical inventory at retail. The actual retail values of the inventories in each department are Hardcovers \$790,000 and Paperbacks \$335,000.

Instructions

(a) Hardcovers: end. inv. \$520,000

- (a) Determine the estimated cost of the ending inventory for each department at **October 31**, 2017, using the retail inventory method.
- (b) Compute the ending inventory at cost for each department at **December 31**, assuming the cost-to-retail ratios for the year are 65% for Hardcovers and 75% for Paperbacks.

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEM

CP6 On December 1, 2017, Matthias Company had the account balances shown below.

	Debit		Credit
Cash	\$ 4,800	Accumulated Depreciation—Equipment	\$ 1,500
Accounts Receivable	3,900	Accounts Payable	3,000
Inventory	1,800*	Common Stock	20,000
Equipment	21,000	Retained Earnings	7,000
	<u>\$31,500</u>		<u>\$31,500</u>

*(3,000 × \$0.60)

The following transactions occurred during December.

- Dec. 3 Purchased 4,000 units of inventory on account at a cost of \$0.72 per unit.
 5 Sold 4,400 units of inventory on account for \$0.90 per unit. (It sold 3,000 of the \$0.60 units and 1,400 of the \$0.72.)
 7 Granted the December 5 customer \$180 credit for 200 units of inventory returned costing \$120. These units were returned to inventory.
 17 Purchased 2,200 units of inventory for cash at \$0.80 each.
 22 Sold 2,000 units of inventory on account for \$0.95 per unit. (It sold 2,000 of the \$0.72 units.)

Adjustment data:

- Accrued salaries payable \$400.
- Depreciation \$200 per month.

Instructions

- Journalize the December transactions and adjusting entries, assuming Matthias uses the perpetual inventory method.
- Enter the December 1 balances in the ledger T-accounts and post the December transactions. In addition to the accounts mentioned above, use the following additional accounts: Cost of Goods Sold, Depreciation Expense, Salaries and Wages Expense, Salaries and Wages Payable, Sales Revenue, and Sales Returns and Allowances.
- Prepare an adjusted trial balance as of December 31, 2017.
- Prepare an income statement for December 2017 and a classified balance sheet at December 31, 2017.
- Compute ending inventory and cost of goods sold under FIFO, assuming Matthias Company uses the periodic inventory system.
- Compute ending inventory and cost of goods sold under LIFO, assuming Matthias Company uses the periodic inventory system.

CONTINUING PROBLEM

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 5.)

CC6 Natalie is busy establishing both divisions of her business (cookie classes and mixer sales) and completing her business degree. Her goals for the next 11 months are to sell one mixer per month and to give two to three classes per week.

The cost of the fine European mixers is expected to increase. Natalie has just negotiated new terms with Kzinski that include shipping costs in the negotiated purchase price (mixers will be shipped FOB destination). Natalie must choose a cost flow assumption for her mixer inventory.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE**FINANCIAL REPORTING AND ANALYSIS****Financial Reporting Problem: Apple Inc.**

BYP6-1 The notes that accompany a company's financial statements provide informative details that would clutter the amounts and descriptions presented in the statements. Refer to the financial statements of **Apple Inc.** in Appendix A as well as its annual report. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

Answer the following questions. Complete the requirements in millions of dollars, as shown in Apple's annual report.

- What did Apple report for the amount of inventories in its consolidated balance sheet at September 29, 2012? At September 28, 2013?
- Compute the dollar amount of change and the percentage change in inventories between 2012 and 2013. Compute inventory as a percentage of current assets at September 28, 2013.
- How does Apple value its inventories? Which inventory cost flow method does Apple use? (See Notes to the Financial Statements.)
- What is the cost of sales (cost of goods sold) reported by Apple for 2013, 2012, and 2011? Compute the percentage of cost of sales to net sales in 2013.

**Comparative Analysis Problem:
PepsiCo, Inc. vs. The Coca-Cola Company**

BYP6-2 PepsiCo's financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- Based on the information contained in these financial statements, compute the following 2013 ratios for each company.
 - Inventory turnover.
 - Days in inventory.
- What conclusions concerning the management of the inventory can you draw from these data?

**Comparative Analysis Problem:
Amazon.com, Inc. vs. Wal-Mart Stores, Inc.**

BYP6-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- Based on the information contained in these financial statements, compute the following 2013 ratios for each company.
 - Inventory turnover.
 - Days in inventory.
- What conclusions concerning the management of the inventory can you draw from these data?

Real-World Focus

BYP6-4 A company's annual report usually will identify the inventory method used. Knowing that, you can analyze the effects of the inventory method on the income statement and balance sheet.

Address: www.cisco.com, or go to www.wiley.com/college/weygandt

Instructions

Answer the following questions based on the current year's annual report on **Cisco's** website.

- At Cisco's fiscal year-end, what was the inventory on the balance sheet?
- How has this changed from the previous fiscal year-end?

- (c) How much of the inventory was finished goods?
 (d) What inventory method does Cisco use?

CRITICAL THINKING

Decision-Making Across the Organization

BYP6-5 On April 10, 2017, fire damaged the office and warehouse of Corvet Company. Most of the accounting records were destroyed, but the following account balances were determined as of March 31, 2017: Inventory (January 1, 2017), \$80,000; Sales Revenue (January 1–March 31, 2017), \$180,000; Purchases (January 1–March 31, 2017), \$94,000.

The company's fiscal year ends on December 31. It uses a periodic inventory system.

From an analysis of the April bank statement, you discover cancelled checks of \$4,200 for cash purchases during the period April 1–10. Deposits during the same period totaled \$18,500. Of that amount, 60% were collections on accounts receivable, and the balance was cash sales.

Correspondence with the company's principal suppliers revealed \$12,400 of purchases on account from April 1 to April 10. Of that amount, \$1,600 was for merchandise in transit on April 10 that was shipped FOB destination.

Correspondence with the company's principal customers produced acknowledgments of credit sales totaling \$37,000 from April 1 to April 10. It was estimated that \$5,600 of credit sales will never be acknowledged or recovered from customers.

Corvet Company reached an agreement with the insurance company that its fire-loss claim should be based on the average of the gross profit rates for the preceding 2 years. The financial statements for 2015 and 2016 showed the following data.

	2016	2015
Net sales	\$600,000	\$480,000
Cost of goods purchased	404,000	356,000
Beginning inventory	60,000	40,000
Ending inventory	80,000	60,000

Inventory with a cost of \$17,000 was salvaged from the fire.

Instructions

With the class divided into groups, answer the following.

- (a) Determine the balances in (1) Sales Revenue and (2) Purchases at April 10.
 *(b) Determine the average gross profit rate for the years 2015 and 2016. (*Hint:* Find the gross profit rate for each year and divide the sum by 2.)
 *(c) Determine the inventory loss as a result of the fire, using the gross profit method.

Communication Activity

BYP6-6 You are the controller of Small Toys Inc. Marta Johns, the president, recently mentioned to you that she found an error in the 2016 financial statements which she believes has corrected itself. She determined, in discussions with the Purchasing Department, that 2016 ending inventory was overstated by \$1 million. Marta says that the 2017 ending inventory is correct. Thus, she assumes that 2017 income is correct. Marta says to you, "What happened has happened—there's no point in worrying about it anymore."

Instructions

You conclude that Marta is incorrect. Write a brief, tactful memo to Marta, clarifying the situation.

Ethics Case

BYP6-7 R. J. Graziano Wholesale Corp. uses the LIFO method of inventory costing. In the current year, profit at R. J. Graziano is running unusually high. The corporate tax rate is also high this year, but it is scheduled to decline significantly next year. In an effort to lower the current year's net income and to take advantage of the changing income tax rate, the president of R. J. Graziano Wholesale instructs the plant accountant to recommend to the purchasing department a large purchase of inventory for delivery 3 days before the end of the year. The price of the inventory to be purchased has doubled during the year, and the purchase will represent a major portion of the ending inventory value.

Instructions

- (a) What is the effect of this transaction on this year's and next year's income statement and income tax expense? Why?
 (b) If R. J. Graziano Wholesale had been using the FIFO method of inventory costing, would the president give the same directive?

- (c) Should the plant accountant order the inventory purchase to lower income? What are the ethical implications of this order?

All About You

BYP6-8 Some of the largest business frauds ever perpetrated have involved the misstatement of inventory. Two classics were at **Leslie Fay** and **McKesson Corporation**.

Instructions

There is considerable information regarding inventory frauds available on the Internet. Search for information about one of the two cases mentioned above, or inventory fraud at any other company, and prepare a short explanation of the nature of the inventory fraud.

FASB Codification Activity

BYP6-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

Instructions

- The primary basis for accounting for inventories is cost. How is cost defined in the Codification?
- What does the Codification state regarding the use of consistency in the selection or employment of a basis for inventory?

A Look at IFRS

LEARNING
OBJECTIVE

7

Compare the accounting for inventories under GAAP and IFRS.

The major IFRS requirements related to accounting and reporting for inventories are the same as GAAP. The major differences are that IFRS prohibits the use of the LIFO cost flow assumption and determines market in the lower-of-cost-or-market inventory valuation differently.

Relevant Facts

Following are the key similarities and differences between GAAP and IFRS related inventories.

Similarities

- IFRS and GAAP account for inventory acquisitions at historical cost and value inventory at the lower-of-cost-or-market subsequent to acquisition.
- Who owns the goods—goods in transit or consigned goods—as well as the costs to include in inventory are essentially accounted for the same under IFRS and GAAP.

Differences

- The requirements for accounting for and reporting inventories are more principles-based under IFRS. That is, GAAP provides more detailed guidelines in inventory accounting.
- A major difference between IFRS and GAAP relates to the LIFO cost flow assumption. GAAP permits the use of LIFO for inventory valuation. IFRS prohibits its use. FIFO and average-cost are the only two acceptable cost flow assumptions permitted under IFRS. Both sets of standards permit specific identification where appropriate.
- In the lower-of-cost-or-market test for inventory valuation, IFRS defines market as net realizable value. GAAP, on the other hand, defines market as replacement cost.

Looking to the Future

One convergence issue that will be difficult to resolve relates to the use of the LIFO cost flow assumption. As indicated, IFRS specifically prohibits its use. Conversely, the LIFO cost flow assumption is widely used in the United States because of its favorable tax advantages. In addition, many argue that LIFO from a financial reporting point of view provides a better matching of current costs against revenue and, therefore, enables companies to compute a more realistic income.

IFRS Practice

IFRS Self-Test Questions

- Which of the following should **not** be included in the inventory of a company using IFRS?
 - Goods held on consignment from another company.
 - Goods shipped on consignment to another company.
 - Goods in transit from another company shipped FOB shipping point.
 - None of the above.
- Which method of inventory costing is prohibited under IFRS?
 - Specific identification.
 - LIFO.
 - FIFO.
 - Average-cost.

IFRS Exercises

IFRS6-1 Briefly describe some of the similarities and differences between GAAP and IFRS with respect to the accounting for inventories.

IFRS6-2 LaTour Inc. is based in France and prepares its financial statements (in euros) in accordance with IFRS. In 2017, it reported cost of goods sold of €578 million and average inventory of €154 million. Briefly discuss how analysis of LaTour's inventory turnover (and comparisons to a company using GAAP) might be affected by differences in inventory accounting between IFRS and GAAP.

International Financial Reporting Problem: Louis Vuitton

IFRS6-3 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Using the notes to the company's financial statements, answer the following questions.

- What cost flow assumption does the company use to value inventory?
- What amount of goods purchased for retail and finished products did the company report at December 31, 2013?

Answers to IFRS Self-Test Questions

1. a 2. b

Fraud, Internal Control, and Cash

CHAPTER PREVIEW As the Feature Story about recording cash sales at **Barriques** indicates below, control of cash is important to ensure that fraud does not occur. Companies also need controls to safeguard other types of assets. For example, Barriques undoubtedly has controls to prevent the theft of food and supplies, and controls to prevent the theft of tableware and dishes from its kitchen.

In this chapter, we explain the essential features of an internal control system and how it prevents fraud. We also describe how those controls apply to a specific asset—cash. The applications include some controls with which you may be already familiar, such as the use of a bank.

FEATURE STORY

Minding the Money in Madison

For many years, **Barriques** in Madison, Wisconsin, has been named the city's favorite coffeehouse. Barriques not only does a booming business in coffee but also has wonderful baked goods, delicious sandwiches, and a fine selection of wines.

"Our customer base ranges from college students to neighborhood residents as well as visitors to our capital city," says bookkeeper Kerry Stopplesworth, who joined the company shortly after it was founded in 1998. "We are unique because we have customers who come in early on their way to work for a cup of coffee and then will stop back after work to pick up a bottle of wine for dinner. We stay very busy throughout all three parts of the day."

Like most businesses where purchases are low-cost and high-volume, cash control has to be simple. "We use a computerized point-of-sale (POS) system to keep track of our inventory and allow us to efficiently ring through an order for a customer," explains Stopplesworth. "You can either scan a barcode for an item or enter in a code for items that don't have a barcode such as cups of coffee or bakery items." The POS system also automatically tracks sales by department and

maintains an electronic journal of all the sales transactions that occur during the day.

"There are two POS stations at each store, and throughout the day any of the staff may operate them," says Stopplesworth. At the end of the day, each POS station is reconciled separately. The staff counts the cash in the drawer and enters this amount into the closing totals in the POS system. The POS system then compares the cash and credit amounts, less the cash being carried forward to the next day (the float), to the shift total in the electronic journal. If there are discrepancies, a recount is done and the journal is reviewed transaction by transaction to identify the problem. The staff then creates a deposit ticket for the cash less the float and puts this in a drop safe with the electronic journal summary report for the manager to review and take to the bank the next day. Ultimately, the bookkeeper reviews all of these documents as well as the deposit receipt that the bank produces to make sure they are all in agreement.

As Stopplesworth concludes, "We keep the closing process and accounting simple so that our staff can concentrate on taking care of our customers and making great coffee and food."

Discuss fraud and the principles of internal control.

The Feature Story describes many of the internal control procedures used by **Barriques**. These procedures are necessary to discourage employees from fraudulent activities.

Fraud

A **fraud** is a dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. Examples of fraud reported in the financial press include the following.

- A bookkeeper in a small company diverted \$750,000 of bill payments to a personal bank account over a three-year period.
- A shipping clerk with 28 years of service shipped \$125,000 of merchandise to himself.
- A computer operator embezzled \$21 million from **Wells Fargo Bank** over a two-year period.
- A church treasurer “borrowed” \$150,000 of church funds to finance a friend’s business dealings.

Why does fraud occur? The three main factors that contribute to fraudulent activity are depicted by the **fraud triangle** in Illustration 7-1 (in the margin).

Illustration 7-1
Fraud triangle

The most important element of the fraud triangle is **opportunity**.

For an employee to commit fraud, the workplace environment must provide opportunities that an employee can take advantage of. Opportunities occur when the workplace lacks sufficient controls to deter and detect fraud. For example, inadequate monitoring of employee actions can create opportunities for theft and can embolden employees because they believe they will not be caught.

A second factor that contributes to fraud is **financial pressure**.

Employees sometimes commit fraud because of personal financial problems caused by too much debt. Or, they might commit fraud because they want to lead a lifestyle that they cannot afford on their current salary.

The third factor that contributes to fraud is **rationalization**. In order to justify their fraud, employees rationalize their dishonest actions. For example, employees sometimes justify fraud because they believe they are underpaid while the employer is making lots of money. Employees feel justified in stealing because they believe they deserve to be paid more.

The Sarbanes-Oxley Act

What can be done to prevent or to detect fraud? After numerous corporate scandals came to light in the early 2000s, Congress addressed this issue by passing the **Sarbanes-Oxley Act (SOX)**. Under SOX, all publicly traded U.S. corporations are required to maintain an adequate system of internal control. Corporate executives and boards of directors must ensure that these controls are reliable and effective. In addition, independent outside auditors must attest to the adequacy of the internal control system. Companies that fail to comply are subject to fines, and company officers can be imprisoned. SOX also created the Public Company Accounting Oversight Board (PCAOB) to establish auditing standards and regulate auditor activity.

One poll found that 60% of investors believe that SOX helps safeguard their stock investments. Many say they would be unlikely to invest in a company that fails to follow SOX requirements. Although some corporate executives have criticized the time and expense involved in following the SOX requirements, SOX appears to be working well. For example, the chief accounting officer of

Eli Lily noted that SOX triggered a comprehensive review of how the company documents its controls. This review uncovered redundancies and pointed out controls that needed to be added. In short, it added up to time and money well spent.

Internal Control

Internal control is a process designed to provide reasonable assurance regarding the achievement of objectives related to operations, reporting, and compliance. In more detail, it consists of all the related methods and measures adopted within an organization to safeguard assets, enhance the reliability of accounting records, increase efficiency of operations, and ensure compliance with laws and regulations. Internal control systems have five primary components as listed below.¹

- **A control environment.** It is the responsibility of top management to make it clear that the organization values integrity and that unethical activity will not be tolerated. This component is often referred to as the “tone at the top.”
- **Risk assessment.** Companies must identify and analyze the various factors that create risk for the business and must determine how to manage these risks.
- **Control activities.** To reduce the occurrence of fraud, management must design policies and procedures to address the specific risks faced by the company.
- **Information and communication.** The internal control system must capture and communicate all pertinent information both down and up the organization, as well as communicate information to appropriate external parties.
- **Monitoring.** Internal control systems must be monitored periodically for their adequacy. Significant deficiencies need to be reported to top management and/or the board of directors.

And the Controls Are . . .

Internal controls are important for an effective financial reporting system. The same is true for sustainability reporting. An effective system of internal controls for sustainability reporting will help in the following ways: (1) prevent the unauthorized use of data; (2) provide reasonable

assurance that the information is accurate, valid, and complete; and (3) report information that is consistent with

overall sustainability accounting policies. With these types of controls, users will have the confidence that they can use the sustainability information effectively.

Some regulators are calling for even more assurance through audits of this information. Companies that potentially can cause environmental damage through greenhouse gases, as well as companies in the mining and extractive industries, are subject to reporting requirements. And, as demand for more information in the sustainability area expands, the need for audits of this information will grow.

Why is sustainability information important to investors? (Go to **WileyPLUS** for this answer and additional questions.)

Principles of Internal Control Activities

Each of the five components of an internal control system is important. Here, we will focus on one component, the control activities. The reason? These activities are the backbone of the company’s efforts to address the risks it faces, such as fraud.

¹The Committee of Sponsoring Organizations of the Treadway Commission, “Internal Control—Integrated Framework,” www.coso.org/documents/990025P_executive_summary_final_may20_e.pdf.

The specific control activities used by a company will vary, depending on management's assessment of the risks faced. This assessment is heavily influenced by the size and nature of the company.

The six principles of control activities are as follows.

- Establishment of responsibility
- Segregation of duties
- Documentation procedures
- Physical controls
- Independent internal verification
- Human resource controls

We explain these principles in the following sections. You should recognize that they apply to most companies and are relevant to both manual and computerized accounting systems.

ESTABLISHMENT OF RESPONSIBILITY

An essential principle of internal control is to assign responsibility to specific employees. **Control is most effective when only one person is responsible for a given task.**

To illustrate, assume that the cash on hand at the end of the day in a **Safeway** supermarket is \$10 short of the cash entered in the cash register. If only one person has operated the register, the shift manager can quickly determine responsibility for the shortage. If two or more individuals have worked the register, it may be impossible to determine who is responsible for the error.

Many retailers solve this problem by having registers with multiple drawers. This makes it possible for more than one person to operate a register but still allows identification of a particular employee with a specific drawer. Only the signed-in cashier has access to his or her drawer.

Establishing responsibility often requires limiting access only to authorized personnel, and then identifying those personnel. For example, the automated systems used by many companies have mechanisms such as identifying passcodes that keep track of who made a journal entry, who entered a sale, or who went into an inventory storeroom at a particular time. Use of identifying passcodes enables the company to establish responsibility by identifying the particular employee who carried out the activity.

ANATOMY OF A FRAUD

Maureen Frugali was a training supervisor for claims processing at Colossal Healthcare. As a standard part of the claims-processing training program, Maureen created fictitious claims for use by trainees. These fictitious claims were then sent to the accounts payable department. After the training claims had been processed, she was to notify Accounts Payable of all fictitious claims, so that they would not be paid. However, she did not inform Accounts Payable about every fictitious claim. She created some fictitious claims for entities that she controlled (that is, she would receive the payment), and she let Accounts Payable pay her.

Total take: \$11 million

THE MISSING CONTROL

Establishment of responsibility. The healthcare company did not adequately restrict the responsibility for authorizing and approving claims transactions. The training supervisor should not have been authorized to create claims in the company's "live" system.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 61–70.

SEGREGATION OF DUTIES

Segregation of duties is indispensable in an internal control system. There are two common applications of this principle:

1. Different individuals should be responsible for related activities.
2. The responsibility for recordkeeping for an asset should be separate from the physical custody of that asset.

The rationale for segregation of duties is this: **The work of one employee should, without a duplication of effort, provide a reliable basis for evaluating the work of another employee.** For example, the personnel that design and program computerized systems should not be assigned duties related to day-to-day use of the system. Otherwise, they could design the system to benefit them personally and conceal the fraud through day-to-day use.

SEGREGATION OF RELATED ACTIVITIES Making one individual responsible for related activities increases the potential for errors and irregularities. Instead, companies should, for example, assign related **purchasing activities** to different individuals. Related purchasing activities include ordering merchandise, order approval, receiving goods, authorizing payment, and paying for goods or services. Various frauds are possible when one person handles related purchasing activities:

- If a purchasing agent is allowed to order goods without obtaining supervisory approval, the likelihood of the purchasing agent receiving kickbacks from suppliers increases.
- If an employee who orders goods also handles the invoice and receipt of the goods, as well as payment authorization, he or she might authorize payment for a fictitious invoice.

These abuses are less likely to occur when companies divide the purchasing tasks.

Similarly, companies should assign related **sales activities** to different individuals. Related selling activities include making a sale, shipping (or delivering) the goods to the customer, billing the customer, and receiving payment. Various frauds are possible when one person handles related sales activities:

- If a salesperson can make a sale without obtaining supervisory approval, he or she might make sales at unauthorized prices to increase sales commissions.
- A shipping clerk who also has access to accounting records could ship goods to himself.
- A billing clerk who handles billing and receipt could understate the amount billed for sales made to friends and relatives.

These abuses are less likely to occur when companies divide the sales tasks. The salespeople make the sale, the shipping department ships the goods on the basis of the sales order, and the billing department prepares the sales invoice after comparing the sales order with the report of goods shipped.

ANATOMY OF A FRAUD

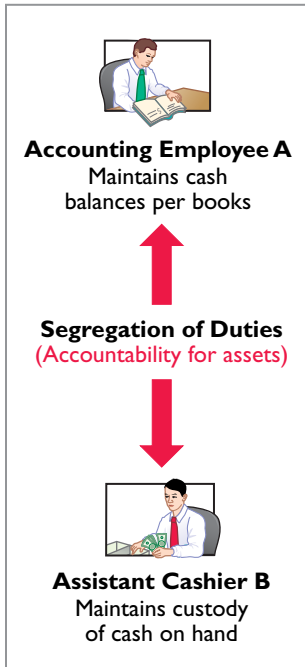

Lawrence Fairbanks, the assistant vice-chancellor of communications at Aesop University, was allowed to make purchases of under \$2,500 for his department without external approval. Unfortunately, he also sometimes bought items for himself, such as expensive antiques and other collectibles. How did he do it? He replaced the vendor invoices he received with fake vendor invoices that he created. The fake invoices had descriptions that were more consistent with the communications department's purchases. He submitted these fake invoices to the accounting department as the basis for their journal entries and to the accounts payable department as the basis for payment.

Total take: \$475,000

THE MISSING CONTROL

Segregation of duties. The university had not properly segregated related purchasing activities. Lawrence was ordering items, receiving the items, and receiving the invoice. By receiving the invoice, he had control over the documents that were used to account for the purchase and thus was able to substitute a fake invoice.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 3–15.

SEGREGATION OF RECORDKEEPING FROM PHYSICAL CUSTODY The accountant should have neither physical custody of the asset nor access to it. Likewise, the custodian of the asset should not maintain or have access to the accounting records. **The custodian of the asset is not likely to convert the asset to personal use when one employee maintains the record of the asset, and a different employee has physical custody of the asset.** The separation of accounting responsibility from the custody of assets is especially important for cash and inventories because these assets are very vulnerable to fraud.

ANATOMY OF A FRAUD

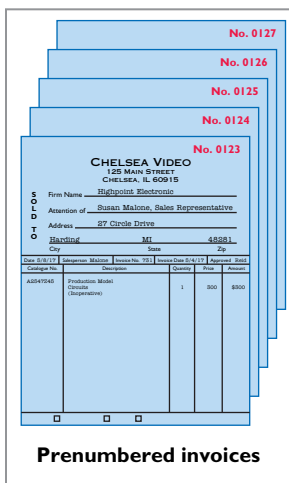

Angela Bauer was an accounts payable clerk for Aggasiz Construction Company. Angela prepared and issued checks to vendors and reconciled bank statements. She perpetrated a fraud in this way: She wrote checks for costs that the company had not actually incurred (e.g., fake taxes). A supervisor then approved and signed the checks. Before issuing the check, though, Angela would “white-out” the payee line on the check and change it to personal accounts that she controlled. She was able to conceal the theft because she also reconciled the bank account. That is, nobody else ever saw that the checks had been altered.

Total take: \$570,000

THE MISSING CONTROL

Segregation of duties. Aggasiz Construction Company did not properly segregate recordkeeping from physical custody. Angela had physical custody of the checks, which essentially was control of the cash. She also had recordkeeping responsibility because she prepared the bank reconciliation.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 100–107.

**DOCUMENTATION PROCEDURES**

Documents provide evidence that transactions and events have occurred. For example **Barriques’** point-of-sale terminals are networked with the company’s computing and accounting records, which results in direct documentation.

Similarly, a shipping document indicates that the goods have been shipped, and a sales invoice indicates that the company has billed the customer for the goods. By requiring signatures (or initials) on the documents, the company can identify the individual(s) responsible for the transaction or event. Companies should document transactions when they occur.

Companies should establish procedures for documents. First, whenever possible, companies should use **prenumbered documents, and all documents should be accounted for.** Prenumbering helps to prevent a transaction from being recorded more than once, or conversely, from not being recorded at all. Second, the control system should require that employees **promptly forward source documents for accounting entries to the accounting department. This control**

measure helps to ensure timely recording of the transaction and contributes directly to the accuracy and reliability of the accounting records.

ANATOMY OF A FRAUD

To support their reimbursement requests for travel costs incurred, employees at Mod Fashions Corporation’s design center were required to submit receipts. The receipts could include the detailed bill provided for a meal, the credit card receipt provided when the credit card payment is made, or a copy of the employee’s monthly credit card bill that listed the item. A number of the designers who frequently traveled together came up with a fraud scheme: They submitted claims for the same expenses. For example, if they had a meal together that cost \$200, one person submitted the detailed meal bill, another submitted the credit card receipt, and a third submitted a monthly credit card bill showing the meal as a line item. Thus, all three received a \$200 reimbursement.

Total take: \$75,000

THE MISSING CONTROL

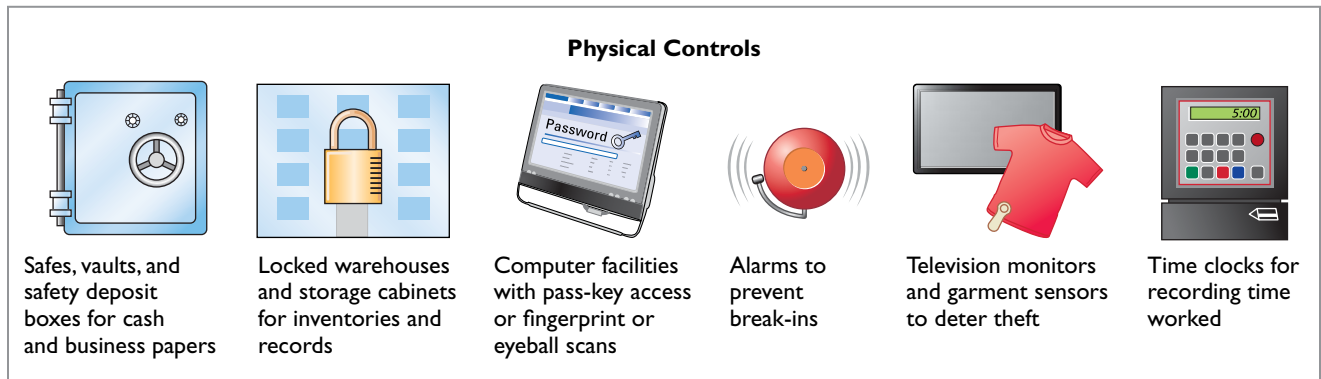

Documentation procedures. Mod Fashions should require the original, detailed receipt. It should not accept photocopies, and it should not accept credit card statements. In addition, documentation procedures could be further improved by requiring the use of a corporate credit card (rather than a personal credit card) for all business expenses.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 79–90.

PHYSICAL CONTROLS

Use of physical controls is essential. **Physical controls** relate to the safeguarding of assets and enhance the accuracy and reliability of the accounting records. Illustration 7-2 shows examples of these controls.

Illustration 7-2
Physical controls

ANATOMY OF A FRAUD

At Centerstone Health, a large insurance company, the mailroom each day received insurance applications from prospective customers. Mailroom employees scanned the applications into electronic documents before the applications were processed. Once the applications were scanned, they could be accessed online by authorized employees.

Insurance agents at Centerstone Health earn commissions based upon successful applications. The sales agent’s name is listed on the application. However, roughly 15% of the applications are from customers who did not work with a sales agent. Two friends—Alex, an employee in recordkeeping, and Parviz, a sales agent—thought up a way to perpetrate a fraud. Alex identified scanned applications that did not list a sales agent. After business hours, he entered the mailroom and found the hard-copy

applications that did not show a sales agent. He wrote in Parviz's name as the sales agent and then rescanned the application for processing. Parviz received the commission, which the friends then split.

Total take: \$240,000

THE MISSING CONTROL

Physical controls. Centerstone Health lacked two basic physical controls that could have prevented this fraud. First, the mailroom should have been locked during non-business hours, and access during business hours should have been tightly controlled. Second, the scanned applications supposedly could be accessed only by authorized employees using their passwords. However, the password for each employee was the same as the employee's user ID. Since employee user-ID numbers were available to all other employees, all employees knew all other employees' passwords. Unauthorized employees could access the scanned applications. Thus, Alex could enter the system using another employee's password and access the scanned applications.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 316–326.

INDEPENDENT INTERNAL VERIFICATION

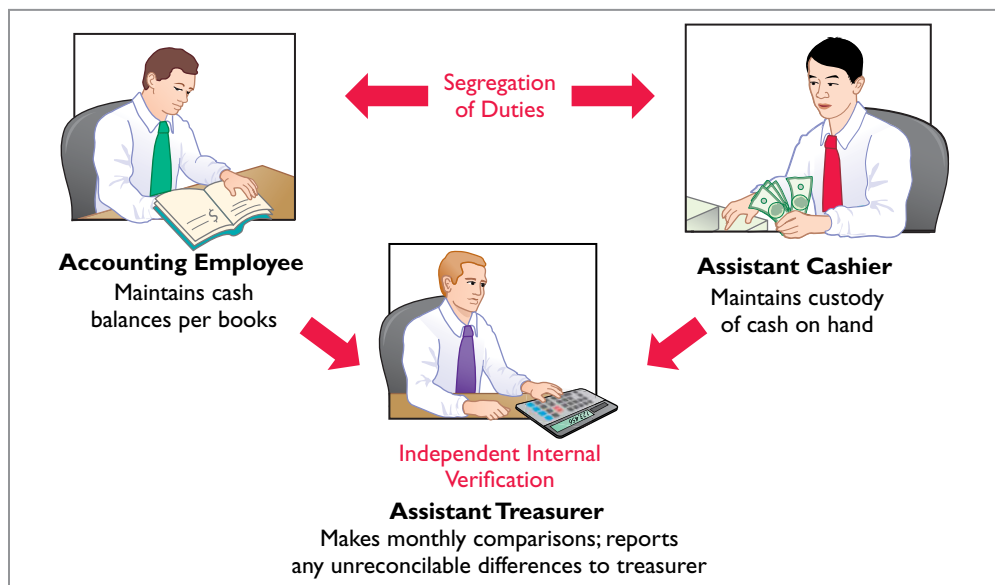

Most internal control systems provide for **independent internal verification**. This principle involves the review of data prepared by employees. To obtain maximum benefit from independent internal verification:

1. Companies should verify records periodically or on a surprise basis.
2. An employee who is independent of the personnel responsible for the information should make the verification.
3. Discrepancies and exceptions should be reported to a management level that can take appropriate corrective action.

Independent internal verification is especially useful in comparing recorded accountability with existing assets. The reconciliation of the electronic journal with the cash in the point-of-sale terminal at **Barriques** is an example of this internal control principle. Other common examples are the reconciliation of a company's cash balance per books with the cash balance per bank, and the verification of the perpetual inventory records through a count of physical inventory. Illustration 7-3 shows the relationship between this principle and the segregation of duties principle.

Illustration 7-3

Comparison of segregation of duties principle with independent internal verification principle

ANATOMY OF A FRAUD

Bobbi Jean Donnelly, the office manager for Mod Fashions Corporation's design center, was responsible for preparing the design center budget and reviewing expense reports submitted by design center employees. Her desire to upgrade her wardrobe got the better of her, and she enacted a fraud that involved filing expense-reimbursement requests for her own personal clothing purchases. Bobbi Jean was able to conceal the fraud because she was responsible for reviewing all expense reports, including her own. In addition, she sometimes was given ultimate responsibility for signing off on the expense reports when her boss was "too busy." Also, because she controlled the budget, when she submitted her expenses, she coded them to budget items that she knew were running under budget, so that they would not catch anyone's attention.

Total take: \$275,000

THE MISSING CONTROL

Independent internal verification. Bobbi Jean's boss should have verified her expense reports. When asked what he thought her expenses for a year were, the boss said about \$10,000. At \$115,000 per year, her actual expenses were more than 10 times what would have been expected. However, because he was "too busy" to verify her expense reports or to review the budget, he never noticed.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 79–90.

Large companies often assign independent internal verification to internal auditors. **Internal auditors** are company employees who continuously evaluate the effectiveness of the company's internal control systems. They review the activities of departments and individuals to determine whether prescribed internal controls are being followed. They also recommend improvements when needed. For example, **WorldCom** was at one time the second largest U.S. telecommunications company. The fraud that caused its bankruptcy (the largest ever when it occurred) involved billions of dollars. It was uncovered by an internal auditor.

HUMAN RESOURCE CONTROLS

Human resource control activities include the following.

- 1. Bond employees who handle cash.** **Bonding** involves obtaining insurance protection against theft by employees. It contributes to the safeguarding of cash in two ways. First, the insurance company carefully screens all individuals before adding them to the policy and may reject risky applicants. Second, bonded employees know that the insurance company will vigorously prosecute all offenders.
- 2. Rotate employees' duties and require employees to take vacations.** These measures deter employees from attempting thefts since they will not be able to permanently conceal their improper actions. Many banks, for example, have discovered employee thefts when the employee was on vacation or assigned to a new position.
- 3. Conduct thorough background checks.** Many believe that the most important and inexpensive measure any business can take to reduce employee theft and fraud is for the human resources department to conduct thorough background checks. Two tips: (1) Check to see whether job applicants actually graduated from the schools they list. (2) Never use telephone numbers for previous employers provided by the applicant. Always look them up yourself.

ANATOMY OF A FRAUD

Ellen Lowry was the desk manager and Josephine Rodriguez was the head of housekeeping at the Excelsior Inn, a luxury hotel. The two best friends were so dedicated to their jobs that they never took vacations, and they frequently filled in for other employees. In fact, Ms. Rodriguez, whose job as head of housekeeping did not include cleaning rooms, often cleaned rooms herself, “just to help the staff keep up.” These two “dedicated” employees, working as a team, found a way to earn a little more cash. Ellen, the desk manager, provided significant discounts to guests who paid with cash. She kept the cash and did not register the guest in the hotel’s computerized system. Instead, she took the room out of circulation “due to routine maintenance.” Because the room did not show up as being used, it did not receive a normal housekeeping assignment. Instead, Josephine, the head of housekeeping, cleaned the rooms during the guests’ stay.

Total take: \$95,000

THE MISSING CONTROL

Human resource controls. Ellen, the desk manager, had been fired by a previous employer after being accused of fraud. If the Excelsior Inn had conducted a thorough background check, it would not have hired her. The hotel fraud was detected when Ellen missed work for a few days due to illness. A system of mandatory vacations and rotating days off would have increased the chances of detecting the fraud before it became so large.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 145–155.

Accounting Across the Organization

Stockbyte/Getty Images, Inc.

SOX Boosts the Role of Human Resources

Under SOX, a company needs to keep track of employees’ degrees and certifications to ensure that employees continue to meet the specified requirements of a job. Also, to ensure proper employee supervision and proper separation of duties, companies must develop and monitor an organizational chart. When one corporation went through this exercise,

it found that out of 17,000 employees, there were 400 people who did not report to anyone. The corporation also had 35 people who reported to each other. In addition, if an employee complains of an unfair firing and mentions financial issues at the company, HR should refer the case to the company audit committee and possibly to its legal counsel.

Why would unsupervised employees or employees who report to each other represent potential internal control threats? (Go to **WileyPLUS** for this answer and additional questions.)

Helpful Hint

Controls may vary with the risk level of the activity. For example, management may consider cash to be high risk and maintaining inventories in the stockroom as low risk. Thus, management would have stricter controls for cash.

Limitations of Internal Control

Companies generally design their systems of internal control to provide **reasonable assurance** of proper safeguarding of assets and reliability of the accounting records. The concept of reasonable assurance rests on the premise that the costs of establishing control procedures should not exceed their expected benefit.

To illustrate, consider shoplifting losses in retail stores. Stores could eliminate such losses by having a security guard stop and search customers as they leave the store. But store managers have concluded that the negative effects of such a procedure cannot be justified. Instead, they have attempted to control shoplifting losses by less costly procedures. They post signs saying, “We reserve the right to inspect all packages” and “All shoplifters will be prosecuted.” They use hidden cameras and store detectives to monitor customer activity, and they install sensor equipment at exits.

The **human element** is an important factor in every system of internal control. A good system can become ineffective as a result of employee fatigue, carelessness, or indifference. For example, a receiving clerk may not bother to count goods received and may just “fudge” the counts. Occasionally, two or more individuals may work together to get around prescribed controls. Such **collusion** can significantly reduce the effectiveness of a system, eliminating the protection offered by segregation of duties. No system of internal control is perfect.

The **size of the business** also may impose limitations on internal control. Small companies often find it difficult to segregate duties or to provide for independent internal verification. A study by the Association of Certified Fraud Examiners (*Report to the Nation on Occupational Fraud and Abuse*) indicates that businesses with fewer than 100 employees are most at risk for employee theft. In fact, 29% of frauds occurred at companies with fewer than 100 employees. The median loss at small companies was \$154,000, which was close to the median fraud at companies with more than 10,000 employees (\$160,000). A \$154,000 loss can threaten the very existence of a small company.

DO IT! 1 Control Activities

Identify which control activity is violated in each of the following situations, and explain how the situation creates an opportunity for a fraud.

1. The person with primary responsibility for reconciling the bank account and making all bank deposits is also the company’s accountant.
2. Wellstone Company’s treasurer received an award for distinguished service because he had not taken a vacation in 30 years.
3. In order to save money spent on order slips and to reduce time spent keeping track of order slips, a local bar/restaurant does not buy prenumbered order slips.

Solution

1. Violates the control activity of segregation of duties. Recordkeeping should be separate from physical custody. As a consequence, the employee could embezzle cash and make journal entries to hide the theft.
2. Violates the control activity of human resource controls. Key employees must take vacations. Otherwise, the treasurer, who manages the company’s cash, might embezzle cash and use his position to conceal the theft.
3. Violates the control activity of documentation procedures. If prenumbered documents are not used, then it is virtually impossible to account for the documents. As a consequence, an employee could write up a dinner sale, receive the cash from the customer, and then throw away the order slip and keep the cash.

Action Plan

- ✓ Familiarize yourself with each of the control activities summarized on page 310.
- ✓ Understand the nature of the frauds that each control activity is intended to address.

Related exercise material: **BE7-1, BE7-2, BE7-3, BE7-4, E7-1 and DO IT 7-1.**

LEARNING OBJECTIVE

2

Apply internal control principles to cash.

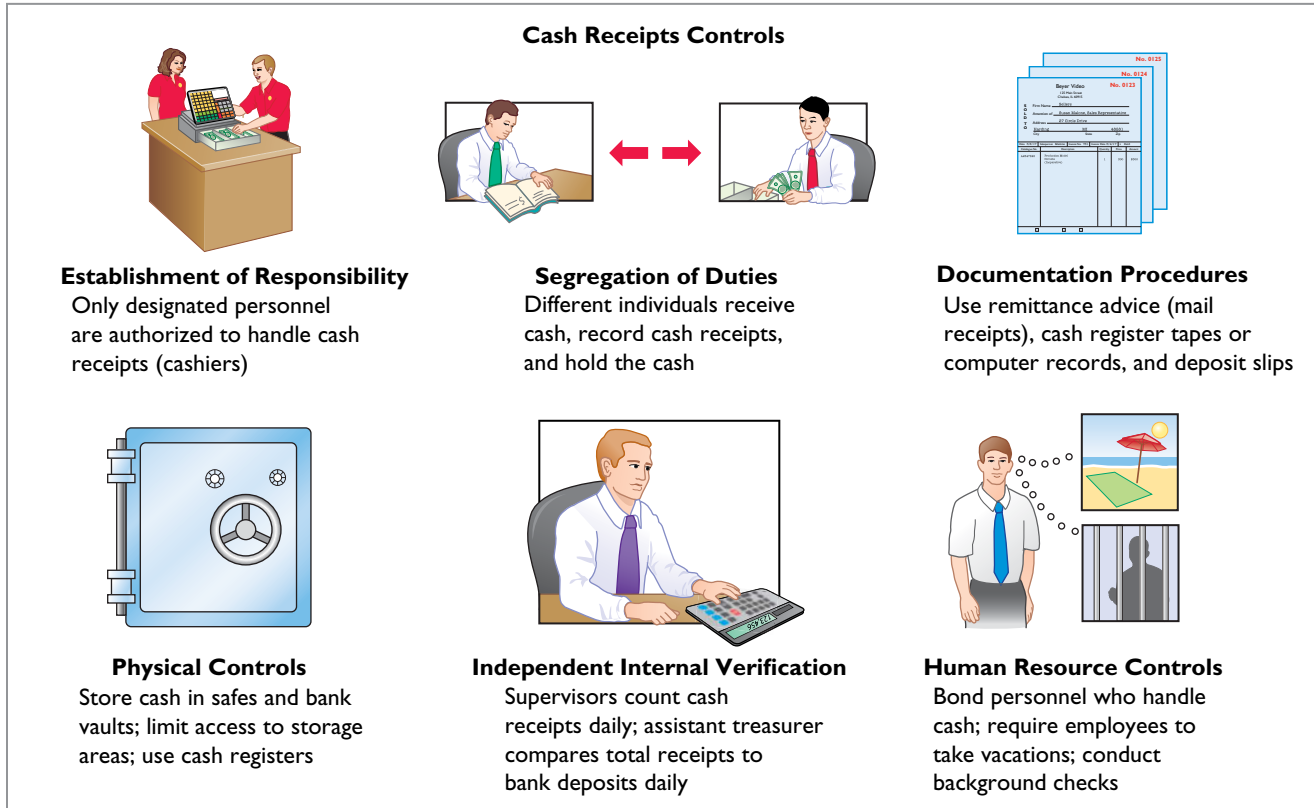

Cash is the one asset that is readily convertible into any other type of asset. It also is easily concealed and transported, and is highly desired. Because of these characteristics, **cash is the asset most susceptible to fraudulent activities**. In addition, because of the large volume of cash transactions, numerous errors may occur in executing and recording them. To safeguard cash and to ensure the accuracy of the accounting records for cash, effective internal control over cash is critical.

Cash Receipts Controls

Illustration 7-4 shows how the internal control principles explained earlier apply to cash receipts transactions. As you might expect, companies vary considerably in how they apply these principles. To illustrate internal control over cash receipts, we will examine control activities for a retail store with both over-the-counter and mail receipts.

Illustration 7-4

Application of internal control principles to cash receipts

OVER-THE-COUNTER RECEIPTS

In retail businesses, control of over-the-counter receipts centers on cash registers that are visible to customers. A cash sale is entered in a cash register (or point-of-sale terminal), with the amount clearly visible to the customer. This activity prevents the sales clerk from entering a lower amount and pocketing the difference. The customer receives an itemized cash register receipt slip and is expected to count the change received. (One weakness at **Barriques** in the Feature Story is that customers are only given a receipt if requested.) The cash register's tape is locked in the register until a supervisor removes it. This tape accumulates the daily transactions and totals.

At the end of the clerk's shift, the clerk counts the cash and sends the cash and the count to the cashier. The cashier counts the cash, prepares a deposit slip, and deposits the cash at the bank. The cashier also sends a duplicate of the deposit slip to the accounting department to indicate cash received. The supervisor removes the cash register tape and sends it to the accounting department as the basis for a journal entry to record the cash received. (For point-of-sale systems, the accounting department receives information on daily transactions and totals through the computer network.) Illustration 7-5 summarizes this process.

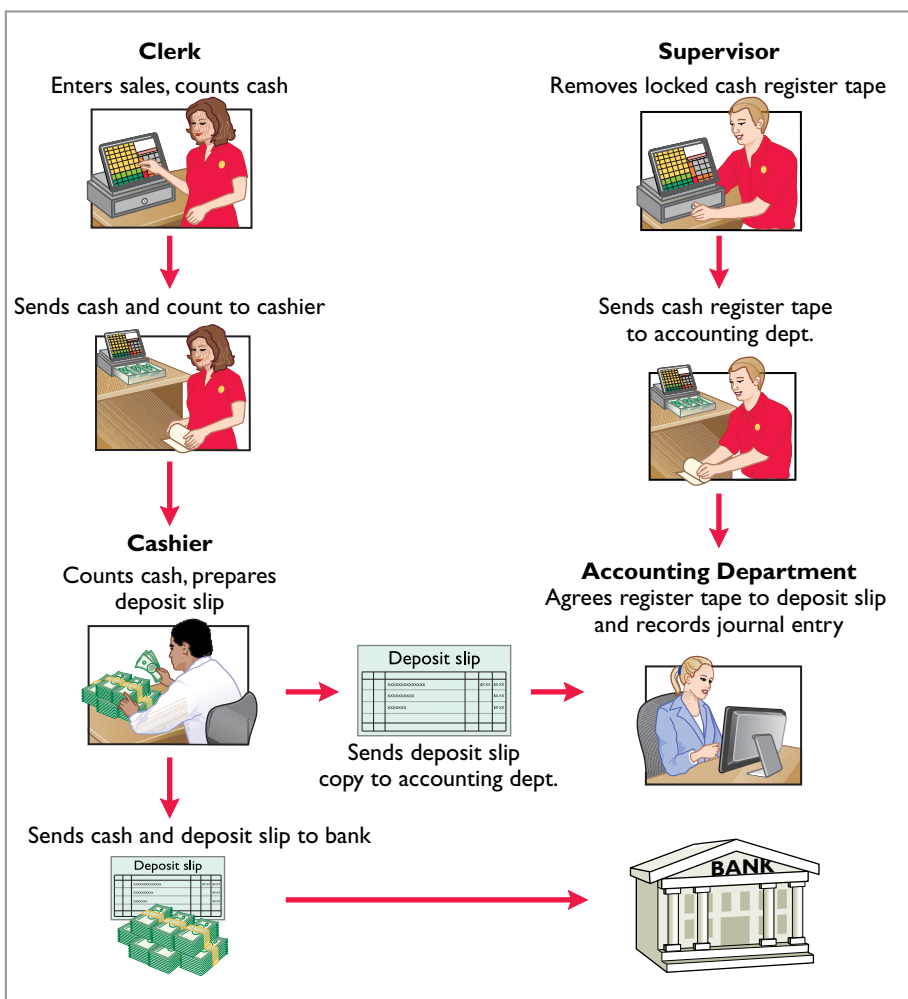

Illustration 7-5
Control of over-the-counter receipts

Helpful Hint
Flowcharts such as this one enhance the understanding of the flow of documents, the processing steps, and the internal control procedures.

This system for handling cash receipts uses an important internal control principle—segregation of recordkeeping from physical custody. The supervisor has access to the cash register tape but **not** to the cash. The clerk and the cashier have access to the cash but **not** to the register tape. In addition, the cash register tape provides documentation and enables independent internal verification. Use of these three principles of internal control (segregation of recordkeeping from physical custody, documentation, and independent internal verification) provides an effective system of internal control. Any attempt at fraudulent activity should be detected unless there is collusion among the employees.

In some instances, the amount deposited at the bank will not agree with the cash recorded in the accounting records based on the cash register tape. These differences often result because the clerk hands incorrect change back to the retail customer. In this case, the difference between the actual cash and the amount reported on the cash register tape is reported in a Cash Over and Short account. For example, suppose that the cash register tape indicated sales of \$6,956.20 but the amount of cash was only \$6,946.10. A cash shortfall of \$10.10 exists. To account for this cash shortfall and related cash, the company makes the following entry.

Cash	6,946.10	
Cash Over and Short	10.10	
Sales Revenue		6,956.20
(To record cash shortfall)		

Cash Over and Short is an income statement item. It is reported as miscellaneous expense when there is a cash shortfall, and as miscellaneous revenue when

A	=	L	+	SE
+6,946.10				- 10.10
				+6,956.20
Cash Flows				+6,946.10

there is an overage. Clearly, the amount should be small. Any material amounts in this account should be investigated.

MAIL RECEIPTS

All mail receipts should be opened in the presence of at least two mail clerks. These receipts are generally in the form of checks. A mail clerk should endorse each check “For Deposit Only.” This restrictive endorsement reduces the likelihood that someone could divert the check to personal use. Banks will not give an individual cash when presented with a check that has this type of endorsement.

The mail clerks prepare, in triplicate, a list of the checks received each day. This list shows the name of the check issuer, the purpose of the payment, and the amount of the check. Each mail clerk signs the list to establish responsibility for the data. The original copy of the list, along with the checks, is then sent to the cashier’s department. A copy of the list is sent to the accounting department for recording in the accounting records. The clerks also keep a copy.

This process provides excellent internal control for the company. By employing at least two clerks, the chance of fraud is reduced. Each clerk knows he or she is being observed by the other clerk(s). To engage in fraud, they would have to collude. The customers who submit payments also provide control because they will contact the company with a complaint if they are not properly credited for payment. Because the cashier has access to the cash but not the records, and the accounting department has access to the records but not the cash, neither can engage in undetected fraud.

DO IT!

2a

Control over Cash Receipts

L. R. Cortez is concerned about the control over cash receipts in his fast-food restaurant, Big Cheese. The restaurant has two cash registers. At no time do more than two employees take customer orders and enter sales. Work shifts for employees range from 4 to 8 hours. Cortez asks your help in installing a good system of internal control over cash receipts.

Action Plan

- ✓ Differentiate among the internal control principles of (1) establishing responsibility, (2) using physical controls, and (3) independent internal verification.
- ✓ Design an effective system of internal control over cash receipts.

Solution

Cortez should assign a separate cash register drawer to each employee at the start of each work shift, with register totals set at zero. Each employee should have access to only the assigned register drawer to enter all sales. Each customer should be given a receipt. At the end of the shift, the employee should do a cash count. A separate employee should compare the cash count with the register tape to be sure they agree. In addition, Cortez should install an automated system that would enable the company to compare orders entered in the register to orders processed by the kitchen.

Related exercise material: **BE7-5, BE7-6, BE7-7, E7-2, and DO IT! 7-2a.**

Cash Disbursements Controls

Companies disburse cash for a variety of reasons, such as to pay expenses and liabilities or to purchase assets. **Generally, internal control over cash disbursements is more effective when companies pay by check or electronic funds transfer (EFT) rather than by cash.** One exception is **payments for incidental amounts that are paid out of petty cash.**²

Companies generally issue checks only after following specified control procedures. Illustration 7-6 shows how principles of internal control apply to cash disbursements.

²We explain the operation of a petty cash fund on pages 322–324.

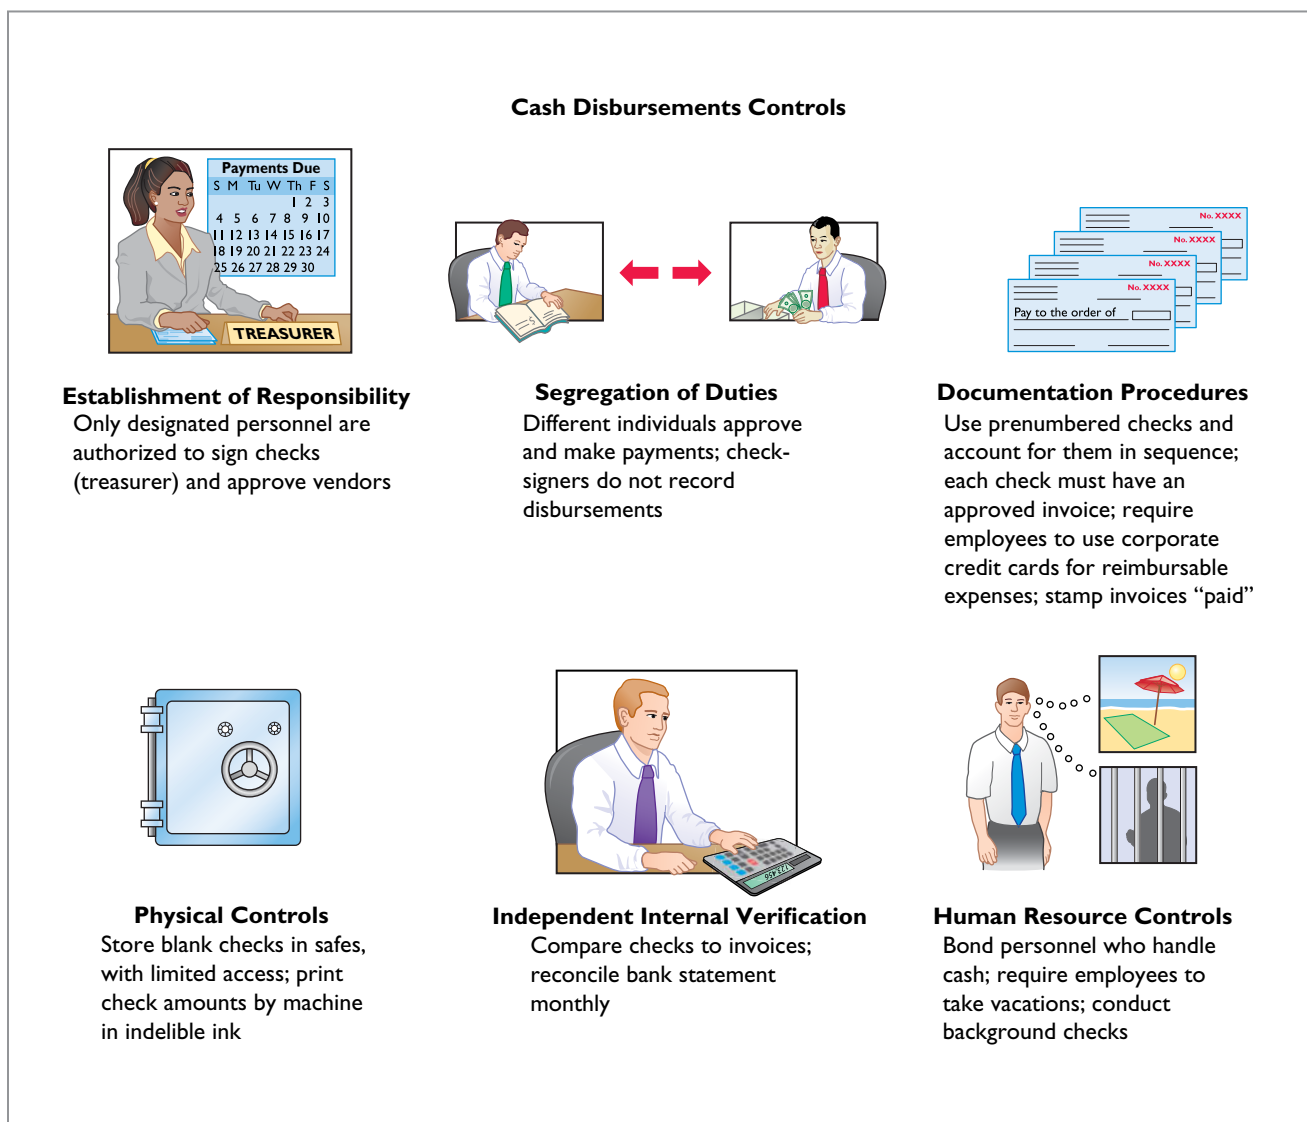

Illustration 7-6
Application of internal control principles to cash disbursements

VOUCHER SYSTEM CONTROLS

Most medium and large companies use vouchers as part of their internal control over cash disbursements. A **voucher system** is a network of approvals by authorized individuals, acting independently, to ensure that all disbursements by check are proper.

The system begins with the authorization to incur a cost or expense. It ends with the issuance of a check for the liability incurred. A **voucher** is an authorization form prepared for each expenditure. Companies require vouchers for all types of cash disbursements except those from petty cash.

The starting point in preparing a voucher is to fill in the appropriate information about the liability on the face of the voucher. The vendor's invoice provides most of the needed information. Then, an employee in the accounts payable department records the voucher (in a journal called a **voucher register**) and files it according to the date on which it is to be paid. The company issues and sends a check on that date, and stamps the voucher "paid." The paid voucher is sent to the accounting department for recording (in a journal called the **check register**). A voucher system involves two journal entries, one to record the liability when the voucher is issued and a second to pay the liability that relates to the voucher.

The use of a voucher system, whether done manually or electronically, improves internal control over cash disbursements. First, the authorization process inherent in a voucher system establishes responsibility. Each individual has responsibility to review the underlying documentation to ensure that it is correct. In addition, the voucher system keeps track of the documents that back up each transaction. By keeping these documents in one place, a supervisor can independently verify the authenticity of each transaction. Consider, for example, the case of Aesop University presented on page 311. Aesop did not use a voucher system for transactions under \$2,500. As a consequence, there was no independent verification of the documents, which enabled the employee to submit fake invoices to hide his unauthorized purchases.

Petty Cash Fund

As you just learned, better internal control over cash disbursements is possible when companies make payments by check. However, using checks to pay small amounts is both impractical and a nuisance. For instance, a company would not want to write checks to pay for postage due, working lunches, or taxi fares. A common way of handling such payments, while maintaining satisfactory control, is to use a **petty cash fund** to pay relatively small amounts. The operation of a petty cash fund, often called an **imprest system**, involves (1) establishing the fund, (2) making payments from the fund, and (3) replenishing the fund.³

ESTABLISHING THE PETTY CASH FUND

Two essential steps in establishing a petty cash fund are (1) appointing a petty cash custodian who will be responsible for the fund, and (2) determining the size of the fund. Ordinarily, a company expects the amount in the fund to cover anticipated disbursements for a three- to four-week period.

To establish the fund, a company issues a check payable to the petty cash custodian for the stipulated amount. For example, if Laird Company decides to establish a \$100 fund on March 1, the general journal entry is:

A	=	L	+	SE
+100				
-100				

Cash Flows
no effect

Mar. 1	Petty Cash Cash (To establish a petty cash fund)	100	100
--------	--	-----	-----

The fund custodian cashes the check and places the proceeds in a locked petty cash box or drawer. Most petty cash funds are established on a fixed-amount basis. The company will make no additional entries to the Petty Cash account unless management changes the stipulated amount of the fund. For example, if Laird Company decides on July 1 to increase the size of the fund to \$250, it would debit Petty Cash \$150 and credit Cash \$150.

MAKING PAYMENTS FROM THE PETTY CASH FUND

The petty cash custodian has the authority to make payments from the fund that conform to prescribed management policies. Usually, management limits the size of expenditures that come from petty cash. Likewise, it may not permit use of the fund for certain types of transactions (such as making short-term loans to employees).

Each payment from the fund must be documented on a prenumbered petty cash receipt (or petty cash voucher), as shown in Illustration 7-7. The signatures of both the fund custodian and the person receiving payment are required on the receipt. If other supporting documents such as a freight bill or invoice are available, they should be attached to the petty cash receipt.

ETHICS NOTE

Petty cash funds are authorized and legitimate. In contrast, “slush” funds are unauthorized and hidden (under the table).

Helpful Hint

The petty cash receipt satisfies two internal control procedures: (1) establishing responsibility (signature of custodian), and (2) documentation procedures.

³The term “imprest” means an advance of money for a designated purpose.

Illustration 7-7
Petty cash receipt

No. 7	LAIRD COMPANY Petty Cash Receipt	Date <u>3/6/17</u>
Paid to <u>Acme Express Agency</u>		Amount <u>\$18.00</u>
For <u>Collect Express Charges</u>		
CHARGE TO <u>Freight-in</u>		
Approved <u>L. A. Bird</u> Custodian		Received Payment <u>R. E. Meins</u>

The petty cash custodian keeps the receipts in the petty cash box until the fund is replenished. The sum of the petty cash receipts and the money in the fund should equal the established total at all times. Management can (and should) make surprise counts at any time to determine whether the fund is being maintained correctly.

The company does not make an accounting entry to record a payment when it is made from petty cash. It is considered both inexpedient and unnecessary to do so. Instead, the company recognizes the accounting effects of each payment when it replenishes the fund.

REPLENISHING THE PETTY CASH FUND

When the money in the petty cash fund reaches a minimum level, the company replenishes the fund. The petty cash custodian initiates a request for reimbursement. The individual prepares a schedule (or summary) of the payments that have been made and sends the schedule, supported by petty cash receipts and other documentation, to the treasurer's office. The treasurer's office examines the receipts and supporting documents to verify that proper payments from the fund were made. The treasurer then approves the request and issues a check to restore the fund to its established amount. At the same time, all supporting documentation is stamped "paid" so that it cannot be submitted again for payment.

To illustrate, assume that on March 15 Laird's petty cash custodian requests a check for \$87. The fund contains \$13 cash and petty cash receipts for postage \$44, freight-out \$38, and miscellaneous expenses \$5. The general journal entry to record the check is as follows.

Mar. 15	Postage Expense	44	
	Freight-Out	38	
	Miscellaneous Expense	5	
	Cash		87
	(To replenish petty cash fund)		

Note that the reimbursement entry does not affect the Petty Cash account. Replenishment changes the composition of the fund by replacing the petty cash receipts with cash. It does not change the balance in the fund.

Occasionally, in replenishing a petty cash fund, the company may need to recognize a cash shortage or overage. This results when the total of the cash plus receipts in the petty cash box does not equal the established amount of the petty cash fund. To illustrate, assume that Laird's petty cash custodian has only \$12 in

ETHICS NOTE

Internal control over a petty cash fund is strengthened by (1) having a supervisor make surprise counts of the fund to confirm whether the paid petty cash receipts and fund cash equal the imprest amount, and (2) canceling or mutilating the paid petty cash receipts so they cannot be resubmitted for reimbursement.

A	=	L	+	SE	
					-44 Exp
					-38 Exp
					-5 Exp
					-87
					Cash Flows
					-87

A	=	L	+	SE
				-44 Exp
				-38 Exp
				-5 Exp
				-1 Exp
-88				
<hr/>				
Cash Flows				
-88				

Helpful Hint

Cash over and short situations result from mathematical errors or from failure to keep accurate records.

cash in the fund plus the receipts as listed. The request for reimbursement would therefore be for \$88, and Laird would make the following entry.

Mar. 15	Postage Expense Freight-Out Miscellaneous Expense Cash Over and Short Cash (To replenish petty cash fund)	44 38 5 1	88
---------	--	--------------------	----

Conversely, if the custodian has \$14 in cash, the reimbursement request would be for \$86. The company would credit Cash Over and Short for \$1 (overage). A company reports a debit balance in Cash Over and Short in the income statement as miscellaneous expense. It reports a credit balance in the account as miscellaneous revenue. The company closes Cash Over and Short to Income Summary at the end of the year.

Companies should replenish a petty cash fund at the end of the accounting period, regardless of the cash in the fund. Replenishment at this time is necessary in order to recognize the effects of the petty cash payments on the financial statements.

How Employees Steal

Occupational fraud is using your own occupation for personal gain through the misuse or misapplication of the company's resources or assets. This type of fraud is one of three types:

1. **Asset misappropriation**, such as theft of cash on hand, fraudulent disbursements, false refunds, ghost employees, personal purchases, and fictitious employees. This fraud is the most common but the least costly.
2. **Corruption**, such as bribery, illegal gratuities, and economic extortion. This fraud generally falls in the middle between asset misappropriation and financial statement fraud as regards frequency and cost.
3. **Financial statement fraud**, such as fictitious revenues, concealed liabilities and expenses, improper disclosures, and improper asset values. This fraud occurs less frequently than other types of fraud but it is the most costly.

The graph below shows the frequency and the median loss for each type of occupational fraud.

Source: 2014 Report to the Nations on Occupational Fraud and Abuse, Association of Certified Fraud Examiners, pp. 10–12.

How can companies reduce the likelihood of occupational fraud? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT! 2b Petty Cash Fund

Bateer Company established a \$50 petty cash fund on July 1. On July 30, the fund had \$12 cash remaining and petty cash receipts for postage \$14, office supplies \$10, and delivery expense \$15. Prepare journal entries to establish the fund on July 1 and to replenish the fund on July 30.

Solution

July 1	Petty Cash	50	
	Cash		50
	(To establish petty cash fund)		
30	Postage Expense	14	
	Supplies	10	
	Delivery Expense	15	
	Cash Over and Short		1
	Cash (\$50 – \$12)		38
	(To replenish petty cash)		

Related exercise material: **BE7-9, E7-7, E7-8, and DO IT! 7-2b.**

Action Plan

- ✓ To establish the fund, set up a separate general ledger account.
- ✓ Determine how much cash is needed to replenish the fund: subtract the cash remaining from the petty cash fund balance.
- ✓ Total the petty cash receipts. Determine any cash over or short—the difference between the cash needed to replenish the fund and the total of the petty cash receipts.
- ✓ Record the expenses incurred according to the petty cash receipts when replenishing the fund.

LEARNING OBJECTIVE

3**Identify the control features of a bank account.**

The use of a bank contributes significantly to good internal control over cash. A company can safeguard its cash by using a bank as a depository and as a clearinghouse for checks received and written. Use of a bank minimizes the amount of currency that a company must keep on hand. Also, use of a bank facilitates the control of cash because it creates a double record of all bank transactions—one by the company and the other by the bank. The asset account Cash maintained by the company should have the same balance as the bank's liability account for that company. A **bank reconciliation** compares the bank's balance with the company's balance and explains any differences to make them agree.

Many companies have more than one bank account. For efficiency of operations and better control, national retailers like **Wal-Mart Stores, Inc.** and **Target** may have regional bank accounts. Large companies, with tens of thousands of employees, may have a payroll bank account, as well as one or more general bank accounts. Also, a company may maintain several bank accounts in order to have more than one source for short-term loans when needed.

Making Bank Deposits

An authorized employee, such as the head cashier, should make a company's bank deposits. Each deposit must be documented by a deposit slip (ticket), as shown in Illustration 7-8 (page 326).

Deposit slips are prepared in duplicate. The bank retains the original; the depositor keeps the duplicate, machine-stamped by the bank to establish its authenticity.

Writing Checks

A **check** is a written order signed by the depositor directing the bank to pay a specified sum of money to a designated recipient. There are three parties to a check: (1) the **maker** (or drawer) who issues the check, (2) the **bank** (or payer) on which the check is drawn, and (3) the **payee** to whom the check is payable. A check is a **negotiable instrument** that one party can transfer to another party by endorsement. Each check should be accompanied by an explanation of its purpose. In many companies, a remittance advice attached to the check, as shown in Illustration 7-9, explains the check's purpose.

W. A. Laird Company, Midland, MI

It is important to know the balance in the checking account at all times. To keep the balance current, the depositor should enter each deposit and check on running-balance memo forms (or online statements) provided by the bank or on the check stubs in the checkbook.

Bank Statements

If you have a personal checking account, you are probably familiar with bank statements. A **bank statement** shows the depositor's bank transactions and balances.⁴ Each month, a depositor receives a statement from the bank. Illustration 7-10 presents a typical bank statement for Laird Company. It shows (1) checks paid and other debits (such as debit card transactions or direct withdrawals for bill payments) that reduce the balance in the depositor's account, (2) deposits and other credits that increase the balance in the depositor's account, and (3) the account balance after each day's transactions.

Helpful Hint

Essentially, the bank statement is a copy of the bank's records sent to the customer (or available online) for review.

Symbols: **CM** Credit Memo **EC** Error Correction **NSF** Not Sufficient Funds **Reconcile Your Account Promptly**
DM Debit Memo **INT** Interest Earned **SC** Service Charge

Helpful Hint

The bank *credits* to the customer's account every deposit it receives. The reverse occurs when the bank "pays" a check issued by a company on its checking account balance. Payment reduces the bank's liability. Thus, the bank *debits* check payments to the customer's account with the bank.

The bank statement lists in numerical sequence all "paid" checks, along with the date the check was paid and its amount. Upon paying a check, the bank stamps the check "paid"; a paid check is sometimes referred to as a **canceled** check. On the statement, the bank also includes memoranda explaining other debits and credits it made to the depositor's account.

⁴Our presentation assumes that the depositor makes all adjustments at the end of the month. In practice, a company may also make journal entries during the month as it reviews information from the bank regarding its account.

DEBIT MEMORANDUM

Some banks charge a monthly fee for their services. Often, they charge this fee only when the average monthly balance in a checking account falls below a specified amount. They identify the fee, called a **bank service charge**, on the bank statement by a symbol such as **SC**. The bank also sends with the statement a debit memorandum explaining the charge noted on the statement. Other debit memoranda may also be issued for other bank services such as the cost of printing checks, issuing traveler's checks, and wiring funds to other locations. The symbol **DM** is often used for such charges.

Banks also use a debit memorandum when a deposited check from a customer “bounces” because of insufficient funds. For example, assume that J. R. Baron, a customer of Laird Company, sends a check for \$425.60 to Laird Company for services performed. Unfortunately, Baron does not have sufficient funds at his bank to pay for these services. In such a case, Baron's bank marks the check **NSF** (not sufficient funds) and returns it to Laird's (the depositor's) bank. Laird's bank then debits Laird's account, as shown by the symbol NSF on the bank statement in Illustration 7-10. The bank sends the NSF check and debit memorandum to Laird as notification of the charge. Laird then records an Account Receivable from J. R. Baron (the writer of the bad check) and reduces cash for the NSF check.

CREDIT MEMORANDUM

Sometimes a depositor asks the bank to collect its notes receivable. In such a case, the bank will credit the depositor's account for the cash proceeds of the note. This is illustrated by the symbol **CM** on the Laird Company bank statement. The bank issues and sends with the statement a credit memorandum to explain the entry. Many banks also offer interest on checking accounts. The interest earned may be indicated on the bank statement by the symbol **CM** or **INT**.

Reconciling the Bank Account

The bank and the depositor maintain independent records of the depositor's checking account. People tend to assume that the respective balances will always agree. In fact, the two balances are seldom the same at any given time, and both balances differ from the “correct” or “true” balance. Therefore, it is necessary to make the balance per books and the balance per bank agree with the correct or true amount—a process called **reconciling the bank account**. The need for agreement has two causes:

1. **Time lags** that prevent one of the parties from recording the transaction in the same period as the other party.
2. **Errors** by either party in recording transactions.

Time lags occur frequently. For example, several days may elapse between the time a company mails a check to a payee and the date the bank pays the check. Similarly, when the depositor uses the bank's night depository to make its deposits, there will be a difference of at least one day between the time the depositor records the deposit and the time the bank does so. A time lag also occurs whenever the bank mails a debit or credit memorandum to the depositor.

The incidence of errors depends on the effectiveness of the internal controls maintained by the company and the bank. Bank errors are infrequent. However, either party could accidentally record a \$450 check as \$45 or \$540. In addition, the bank might mistakenly charge a check drawn by C. D. Berg to the account of C. D. Burg.

RECONCILIATION PROCEDURE

The bank reconciliation should be prepared by an employee who has no other responsibilities pertaining to cash. If a company fails to follow this internal control principle of independent internal verification, cash embezzlements may go unnoticed. For example, a cashier who prepares the reconciliation can embezzle

cash and conceal the embezzlement by misstating the reconciliation. Thus, the bank accounts would reconcile, and the embezzlement would not be detected.

In reconciling the bank account, it is customary to reconcile the balance per books and balance per bank to their adjusted (correct or true) cash balances. The starting point in preparing the reconciliation is to enter the balance per bank statement and balance per books on the reconciliation schedule. The company then makes various adjustments, as shown in Illustration 7-11.

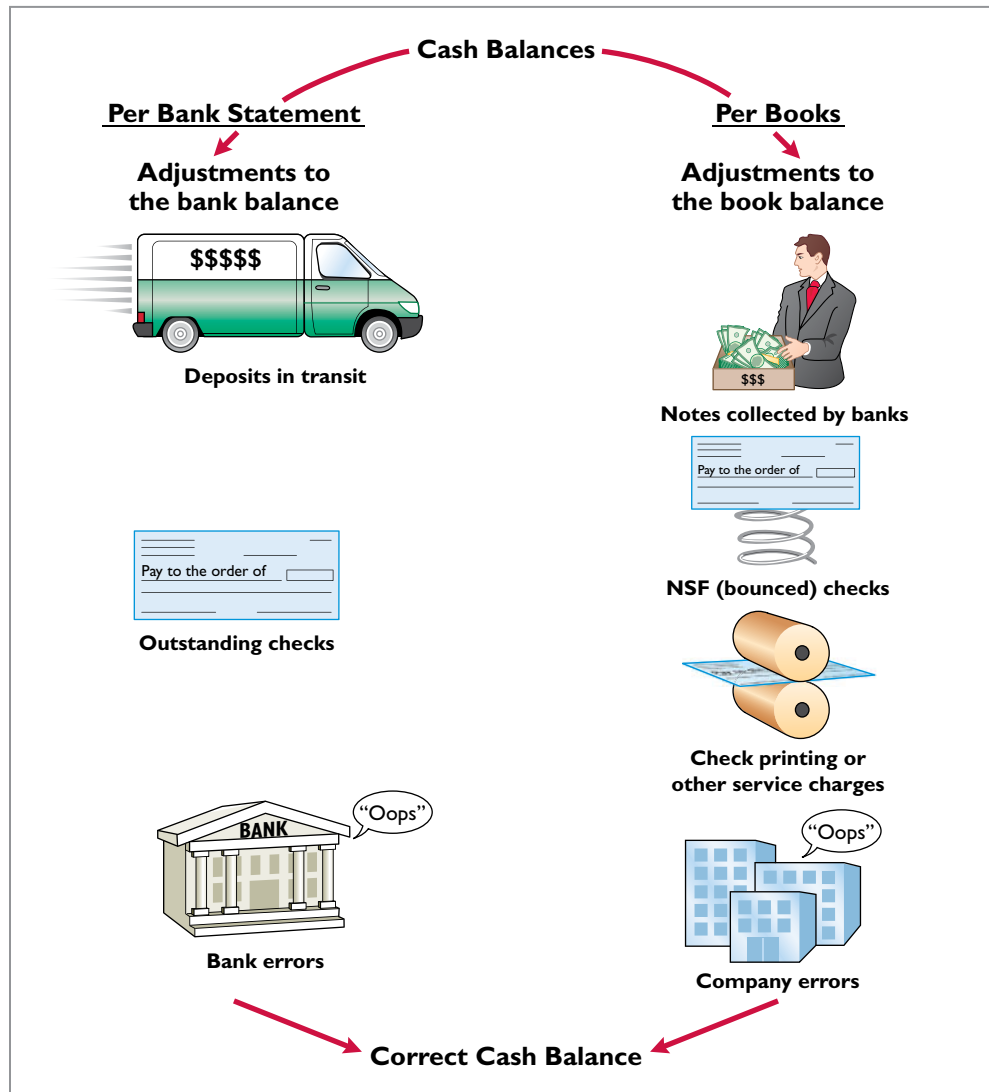

Illustration 7-11
Bank reconciliation
adjustments

The following steps should reveal all the reconciling items that cause the difference between the two balances.

Step 1. Deposits in transit. Compare the individual deposits listed on the bank statement with deposits in transit from the preceding bank reconciliation and with the deposits per company records or duplicate deposit slips. Deposits recorded by the depositor that have not been recorded by the bank are the **deposits in transit**. Add these deposits to the balance per bank.

Step 2. Outstanding checks. Compare the paid checks shown on the bank statement with (a) checks outstanding from the previous bank reconciliation, and (b) checks issued by the company as recorded in the cash payments journal (or in the check register in your personal checkbook). Issued checks recorded by the company but that have not yet been paid by

Helpful Hint

Deposits in transit and outstanding checks are reconciling items because of time lags.

the bank are **outstanding checks**. Deduct outstanding checks from the balance per bank.

Step 3. Errors. Note any errors discovered in the foregoing steps and list them in the appropriate section of the reconciliation schedule. For example, if the company mistakenly recorded as \$169 a paid check correctly written for \$196, it would deduct the error of \$27 from the balance per books. All errors made by the depositor are reconciling items in determining the adjusted cash balance per books. In contrast, all errors made by the bank are reconciling items in determining the adjusted cash balance per bank.

Step 4. Bank memoranda. Trace bank memoranda to the depositor's records. List in the appropriate section of the reconciliation schedule any unrecorded memoranda. For example, the company would deduct from the balance per books a \$5 debit memorandum for bank service charges. Similarly, it would add to the balance per books \$32 of interest earned.

BANK RECONCILIATION ILLUSTRATED

The bank statement for Laird Company (Illustration 7-10) shows a balance per bank of \$15,907.45 on April 30, 2017. On this date, the balance of cash per books is \$11,589.45. Using the four reconciliation steps, Laird determines the following reconciling items.

Step 1. Deposits in transit: April 30 deposit (received by bank on May 1).	\$2,201.40
Step 2. Outstanding checks: No. 453, \$3,000.00; no. 457, \$1,401.30; no. 460, \$1,502.70.	5,904.00
Step 3. Errors: Laird wrote check no. 443 for \$1,226.00 and the bank correctly paid that amount. However, Laird recorded the check as \$1,262.00.	36.00
Step 4. Bank memoranda:	
a. Debit—NSF check from J. R. Baron for \$425.60.	425.60
b. Debit—Charge for printing company checks \$30.00.	30.00
c. Credit—Collection of note receivable for \$1,000 plus interest earned \$50, less bank collection fee \$15.00.	1,035.00

		455.60
Adjusted cash balance per books		\$12,204.85 ←

Helpful Hint

Note in the bank statement in Illustration 7-10 that checks no. 459 and 461 have been paid but check no. 460 is not listed. Thus, this check is outstanding. If a complete bank statement were shown, checks no. 453 and 457 would also not be listed. The amounts for these three checks are obtained from the company's cash payments records.

Alternative Terminology

The terms *adjusted cash balance*, *true cash balance*, and *correct cash balance* are used interchangeably.

ENTRIES FROM BANK RECONCILIATION

The company records each reconciling item used to determine the **adjusted cash balance per books**. **If the company does not journalize and post these items, the Cash account will not show the correct balance.** Laird Company would make the following entries on April 30.

COLLECTION OF NOTE RECEIVABLE This entry involves four accounts. Assuming that the interest of \$50 has not been accrued and the collection fee is charged to Miscellaneous Expense, the entry is:

Apr. 30	Cash	1,035.00		
	Miscellaneous Expense	15.00		
	Notes Receivable		1,000.00	
	Interest Revenue		50.00	
	(To record collection of note receivable by bank)			

BOOK ERROR The cash disbursements journal shows that check no. 443 was a payment on account to Andrea Company, a supplier. The correcting entry is:

Apr. 30	Cash	36.00		
	Accounts Payable—Andrea Company		36.00	
	(To correct error in recording check no. 443)			

NSF CHECK As indicated earlier, an NSF check becomes an account receivable to the depositor. The entry is:

Apr. 30	Accounts Receivable—J. R. Baron	425.60		
	Cash		425.60	
	(To record NSF check)			

BANK SERVICE CHARGES Depositors debit check printing charges (DM) and other bank service charges (SC) to Miscellaneous Expense because they are usually nominal in amount. The entry is:

Apr. 30	Miscellaneous Expense	30.00		
	Cash		30.00	
	(To record charge for printing company checks)			

Instead of making four separate entries, Laird could combine them into one compound entry.

After Laird has posted the entries, the Cash account will show the following.

Cash			
Apr. 30 Bal.	11,589.45	Apr. 30	425.60
30	1,035.00	30	30.00
30	36.00		
Apr. 30 Bal.	12,204.85		

Helpful Hint

The entries that follow are adjusting entries. In prior chapters, Cash was an account that did not require adjustment. That was a simplifying assumption for learning purposes because we had not yet explained a bank reconciliation.

Illustration 7-13

Adjusted balance in Cash account

The adjusted cash balance in the ledger should agree with the adjusted cash balance per books in the bank reconciliation in Illustration 7-12 (page 330).

What entries does the bank make? If the company discovers any bank errors in preparing the reconciliation, it should notify the bank. The bank then can make the necessary corrections in its records. The bank does not make any entries for deposits in transit or outstanding checks. Only when these items reach the bank will the bank record these items.

Electronic Funds Transfer (EFT) System

It is not surprising that companies and banks have developed approaches to transfer funds among parties without the use of paper (deposit tickets, checks, etc.). Such procedures, called **electronic funds transfers (EFT)**, are disbursement systems that use wire, telephone, or computers to transfer cash balances from one location to another. Use of EFT is quite common. For example, many employees receive no formal payroll checks from their employers. Instead, employers send electronic payroll data to the appropriate banks. Also, individuals and companies now frequently make regular payments such as those for house, car, and utilities by EFT.

EFT transactions normally result in better internal control since no cash or checks are handled by company employees. This does not mean that opportunities for fraud are eliminated. In fact, the same basic principles related to internal control apply to EFT transactions. For example, without proper segregation of duties and authorizations, an employee might be able to redirect electronic payments into a personal bank account and conceal the theft with fraudulent accounting entries.

Investor Insight

Mary Altaffer/©AP/Wide World Photos

Madoff's Ponzi Scheme

No recent fraud has generated more interest and rage than the one perpetrated by Bernard Madoff. Madoff was an elite New York investment fund manager who was highly regarded by securities regulators. Investors flocked to him because he delivered very steady returns of between 10% and 15%, no matter whether the market was going up or going

down. However, for many years, Madoff did not actually invest the cash that people gave to him. Instead, he was running a Ponzi scheme: He paid returns to existing investors using cash received from new investors. As long

as the size of his investment fund continued to grow from new investments at a rate that exceeded the amounts that he needed to pay out in returns, Madoff was able to operate his fraud smoothly.

To conceal his misdeeds, Madoff fabricated false investment statements that were provided to investors. In addition, Madoff hired an auditor that never verified the accuracy of the investment records but automatically issued unqualified opinions each year. Although a competing fund manager warned the SEC a number of times over a nearly 10-year period that he thought Madoff was engaged in fraud, the SEC never aggressively investigated the allegations. Investors, many of which were charitable organizations, lost more than \$18 billion. Madoff was sentenced to a jail term of 150 years.

How was Madoff able to conceal such a giant fraud? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!

3

Bank Reconciliation

Sally Kist owns Linen Kist Fabrics. Sally asks you to explain how she should treat the following reconciling items when reconciling the company's bank account: (1) a debit memorandum for an NSF check, (2) a credit memorandum for a note collected by the bank, (3) outstanding checks, and (4) a deposit in transit.

Solution

Sally should treat the reconciling items as follows.

- (1) NSF check: Deduct from balance per books.
- (2) Collection of note: Add to balance per books.
- (3) Outstanding checks: Deduct from balance per bank.
- (4) Deposit in transit: Add to balance per bank.

Related exercise material: **BE7-11, BE7-12, BE7-13, BE7-14, E7-9, E7-10, E7-11, E7-12, E7-13, and DO IT! 7-3.**

Action Plan

- ✓ Understand the purpose of a bank reconciliation.
- ✓ Identify time lags and explain how they cause reconciling items.

LEARNING
OBJECTIVE

4

Explain the reporting of cash.

Cash consists of coins, currency (paper money), checks, money orders, and money on hand or on deposit in a bank or similar depository. Companies report cash in two different statements: the balance sheet and the statement of cash flows. The balance sheet reports the amount of cash available at a given point in time. The statement of cash flows shows the sources and uses of cash during a period of time. The statement of cash flows was introduced in Chapter 1 and will be discussed in much detail in Chapter 13. In this section, we discuss some important points regarding the presentation of cash in the balance sheet.

When presented in a balance sheet, cash on hand, cash in banks, and petty cash are often combined and reported simply as **Cash**. Because it is the most liquid asset owned by the company, cash is listed first in the current assets section of the balance sheet.

Cash Equivalents

Many companies use the designation “Cash and cash equivalents” in reporting cash. (See Illustration 7-14 for an example.) **Cash equivalents** are short-term, highly liquid investments that are both:

1. Readily convertible to known amounts of cash, and
2. So near their maturity that their market value is relatively insensitive to changes in interest rates. Generally, only investments with maturities of three months or less qualify under this definition.

DELTA AIR LINES, INC. Balance Sheet (partial) December 31, 2013 (in millions)	
Assets	
Current assets	
Cash and cash equivalents	\$2,844
Short-term investments	959
Restricted cash	122

Illustration 7-14
Balance sheet presentation
of cash

Examples of cash equivalents are Treasury bills, commercial paper (short-term corporate notes), and money market funds. All typically are purchased with cash that is in excess of immediate needs.

Occasionally, a company will have a net negative balance in its bank account. In this case, the company should report the negative balance among current liabilities. For example, farm equipment manufacturer **Ag-Chem** recently reported “Checks outstanding in excess of cash balances” of \$2,145,000 among its current liabilities.

Restricted Cash

A company may have **restricted cash**, cash that is not available for general use but rather is restricted for a special purpose. For example, landfill companies are often required to maintain a fund of restricted cash to ensure they will have adequate resources to cover closing and clean-up costs at the end of a landfill site’s useful life. **McKesson Corp.** recently reported restricted cash of \$962 million to be paid out as the result of investor lawsuits.

Cash restricted in use should be reported separately on the balance sheet as restricted cash. If the company expects to use the restricted cash within the next

ETHICS NOTE

Recently, some companies were forced to restate their financial statements because they had too broadly interpreted which types of investments could be treated as cash equivalents. By reporting these items as cash equivalents, the companies made themselves look more liquid.

year, it reports the amount as a current asset. When this is not the case, it reports the restricted funds as a noncurrent asset.

Illustration 7-14 shows restricted cash reported in the financial statements of **Delta Air Lines**. The company is required to maintain restricted cash as collateral to support insurance obligations related to workers' compensation claims. Delta does not have access to these funds for general use, and so it must report them separately, rather than as part of cash and cash equivalents.

DO IT!**4****Reporting Cash**

Indicate whether each of the following statements is true or false.

1. Cash and cash equivalents are comprised of coins, currency (paper money), money orders, and NSF checks.
2. Restricted cash is classified as either a current asset or noncurrent asset, depending on the circumstances.
3. A company may have a negative balance in its bank account. In this case, it should offset this negative balance against cash and cash equivalents on the balance sheet.
4. Because cash and cash equivalents often includes short-term investments, accounts receivable should be reported as the first item on the balance sheet.

Action Plan

- ✓ Understand how companies present cash and restricted cash on the balance sheet.
- ✓ Review the designations of cash equivalents and restricted cash, and how companies typically handle them.

Solution

1. False. NSF checks should be reported as receivables, not cash and cash equivalents.
2. True.
3. False. Companies that have a negative balance in their bank accounts should report the negative balance as a current liability.
4. False. Cash equivalents are readily convertible to known amounts of cash, and so near maturity (less than 3 months) that they are considered more liquid than accounts receivable and therefore are reported before accounts receivable on the balance sheet.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

1 Discuss fraud and the principles of internal control.

A fraud is a dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. The fraud triangle refers to the three factors that contribute to fraudulent activity by employees: opportunity, financial pressure, and rationalization. Internal control consists of all the related methods and measures adopted within an organization to safeguard its assets, enhance the reliability of its accounting records, increase efficiency of operations, and ensure compliance with laws and regulations.

The principles of internal control are establishment of responsibility, segregation of duties, documentation procedures, physical controls, independent internal verification, and human resource controls such as bonding and requiring employees to take vacations.

- #### 2 Apply internal control principles to cash.
- Internal controls over cash receipts include (a) designating specific personnel to handle cash; (b) assigning different individuals to receive cash, record cash, and maintain custody of cash; (c) using remittance advices for mail receipts, cash register tapes for over-the-counter receipts, and deposit slips for bank deposits; (d) using company safes and bank vaults to store cash with access limited to authorized personnel, and using cash registers in executing over-the-counter receipts; (e) making independent daily counts of register receipts and daily comparison of total receipts with total deposits; and (f) bonding personnel that handle cash and requiring them to take vacations.

Internal controls over cash disbursements include (a) having specific individuals such as the treasurer

authorized to sign checks and approve vendors; (b) assigning different individuals to approve items for payment, make the payment, and record the payment; (c) using prenumbered checks and accounting for all checks, with each check supported by an approved invoice; (d) storing blank checks in a safe or vault with access restricted to authorized personnel, and using a check-writing machine to imprint amounts on checks; (e) comparing each check with the approved invoice before issuing the check, and making monthly reconciliations of bank and book balances; and (f) bonding personnel who handle cash, requiring employees to take vacations, and conducting background checks.

Companies operate a petty cash fund to pay relatively small amounts of cash. They must establish the fund, make payments from the fund, and replenish the fund when the cash in the fund reaches a minimum level.

3 Identify the control features of a bank account. A bank account contributes to good internal control by providing physical controls for the storage of cash. It minimizes the amount of currency that a company must keep on hand, and it creates a double record of a depositor's bank transactions. It is customary to reconcile the balance per books and balance per bank to their adjusted balances. The steps in the reconciling process are to determine deposits in transit, outstanding checks, errors by the depositor or the bank, and unrecorded bank memoranda.

4 Explain the reporting of cash. Companies list cash first in the current assets section of the balance sheet. In some cases, they report cash together with cash equivalents. Cash restricted for a special purpose is reported separately as a current asset or as a noncurrent asset, depending on when the cash is expected to be used.

GLOSSARY REVIEW

Bank reconciliation The process of comparing the bank's balance of an account with the company's balance and explaining any differences to make them agree. (p. 325).

Bank service charge A fee charged by a bank for the use of its services. (p. 328).

Bank statement A monthly statement from the bank that shows the depositor's bank transactions and balances. (p. 327).

Bonding Obtaining insurance protection against theft by employees. (p. 315).

Cash Resources that consist of coins, currency, checks, money orders, and money on hand or on deposit in a bank or similar depository. (p. 333).

Cash equivalents Short-term, highly liquid investments that can be converted to a specific amount of cash. (p. 333).

Check A written order signed by a bank depositor, directing the bank to pay a specified sum of money to a designated recipient. (p. 326).

Deposits in transit Deposits recorded by the depositor but not yet recorded by the bank. (p. 329).

Electronic funds transfer (EFT) A disbursement system that uses wire, telephone, or computers to transfer funds from one location to another. (p. 332).

Fraud A dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. (p. 308).

Fraud triangle The three factors that contribute to fraudulent activity by employees: opportunity, financial pressure, and rationalization. (p. 308).

Internal auditors Company employees who continuously evaluate the effectiveness of the company's internal control system. (p. 315).

Internal control A process designed to provide reasonable assurance regarding the achievement of objectives related to operations, reporting, and compliance. (p. 309)

NSF check A check that is not paid by a bank because of insufficient funds in a customer's bank account. (p. 328).

Outstanding checks Checks issued and recorded by a company but not yet paid by the bank. (p. 330).

Petty cash fund A cash fund used to pay relatively small amounts. (p. 322).

Restricted cash Cash that must be used for a special purpose. (p. 333).

Sarbanes-Oxley Act (SOX) Regulations passed by Congress to try to reduce unethical corporate behavior. (p. 308).

Voucher An authorization form prepared for each payment in a voucher system. (p. 321).

Voucher system A network of approvals by authorized individuals acting independently to ensure that all disbursements by check are proper. (p. 321).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following is **not** an element of the fraud triangle?
- (a) Rationalization. (c) Segregation of duties.
(b) Financial pressure. (d) Opportunity.
2. An organization uses internal control to enhance the accuracy and reliability of accounting records and to:
- (a) safeguard assets. (LO 1)
(b) prevent fraud.

- (c) produce correct financial statements.
(d) deter employee dishonesty.
- (LO 1) 3. Which of the following was **not** a result of the Sarbanes-Oxley Act?
(a) Companies must file financial statements with the Internal Revenue Service.
(b) All publicly traded companies must maintain adequate internal controls.
(c) The Public Company Accounting Oversight Board was created to establish auditing standards and regulate auditor activity.
(d) Corporate executives and board of directors must ensure that controls are reliable and effective, and they can be fined or imprisoned for failure to do so.
- (LO 1) 4. The principles of internal control do **not** include:
(a) establishment of responsibility.
(b) documentation procedures.
(c) management responsibility.
(d) independent internal verification.
- (LO 1) 5. Physical controls do **not** include:
(a) safes and vaults to store cash.
(b) independent bank reconciliations.
(c) locked warehouses for inventories.
(d) bank safety deposit boxes for important papers.
- (LO 1) 6. Which of the following control activities is **not** relevant when a company uses a computerized (rather than manual) accounting system?
(a) Establishment of responsibility.
(b) Segregation of duties.
(c) Independent internal verification.
(d) All of these control activities are relevant to a computerized system.
- (LO 2) 7. Permitting only designated personnel to handle cash receipts is an application of the principle of:
(a) segregation of duties.
(b) establishment of responsibility.
(c) independent internal verification.
(d) human resource controls.
- (LO 2) 8. The use of prenumbered checks in disbursing cash is an application of the principle of:
(a) establishment of responsibility.
(b) segregation of duties.
(c) physical controls.
(d) documentation procedures.
9. A company writes a check to replenish a \$100 petty cash fund when the fund contains receipts of \$94 and \$4 in cash. In recording the check, the company should:
(a) debit Cash Over and Short for \$2.
(b) debit Petty Cash for \$94.
(c) credit Cash for \$94.
(d) credit Petty Cash for \$2.
10. The control features of a bank account do **not** include: (LO 3)
(a) having bank auditors verify the correctness of the bank balance per books.
(b) minimizing the amount of cash that must be kept on hand.
(c) providing a double record of all bank transactions.
(d) safeguarding cash by using a bank as a depository.
11. In a bank reconciliation, deposits in transit are: (LO 3)
(a) deducted from the book balance.
(b) added to the book balance.
(c) added to the bank balance.
(d) deducted from the bank balance.
12. The reconciling item in a bank reconciliation that will result in an adjusting entry by the depositor is: (LO 3)
(a) outstanding checks. (c) a bank error.
(b) deposit in transit. (d) bank service charges.
13. Which of the following items in a cash drawer at November 30 is **not** cash? (LO 4)
(a) Money orders.
(b) Coins and currency.
(c) An NSF check.
(d) A customer check dated November 28.
14. Which of the following statements correctly describes the reporting of cash? (LO 4)
(a) Cash cannot be combined with cash equivalents.
(b) Restricted cash funds may be combined with cash.
(c) Cash is listed first in the current assets section.
(d) Restricted cash funds cannot be reported as a current asset.

Solutions

- (c) Segregation of duties is not an element of the fraud triangle. The other choices are fraud triangle elements.
- (a) Safeguarding assets is one of the purposes of using internal control. The other choices are incorrect because while internal control can help to (b) prevent fraud, (c) produce correct financial statements, and (d) deter employee dishonesty, it is not one of the main purposes of using it.
- (a) Filing financial statements with the IRS is not a result of the Sarbanes-Oxley Act (SOX); SOX focuses on the prevention or detection of fraud. The other choices are results of SOX.
- (c) Management responsibility is not one of the principles of internal control. The other choices are true statements.
- (b) Independent bank reconciliations are not a physical control. The other choices are true statements.
- (d) Establishment of responsibility, segregation of duties, and independent internal verification are all relevant to a computerized system.
- (b) Permitting only designated personnel to handle cash receipts is an application of the principle of establishment of responsibility, not (a) segregation of duties, (c) independent internal verification, or (d) human resource controls.
- (d) The use of prenumbered checks in disbursing cash is an application of the principle of documentation procedures, not (a) establishment of responsibility, (b) segregation of duties, or (c) physical controls.
- (a) When this check is recorded, the company should debit Cash Over and Short for the shortage of \$2 (total of the receipts plus cash in the drawer (\$98) versus \$100), not (b) debit Petty Cash for \$94, (c) credit Cash for \$94, or (d) credit Petty Cash for \$2.

10. (a) Having bank auditors verify the correctness of the bank balance per books is not one of the control features of a bank account. The other choices are true statements.

11. (c) Deposits in transit are added to the bank balance on a bank reconciliation, not (a) deducted from the book balance, (b) added to the book balance, or (d) deducted from the bank balance.

12. (d) Because the depositor does not know the amount of the bank service charges until the bank statement is received, an adjusting entry must be made when the statement is received. The other choices are incorrect because (a) outstanding checks do not require an adjusting entry by the depositor because the checks have already been recorded in the depositor's books, (b) deposits in transit do not require an adjusting entry by the depositor because the deposits have already been recorded in the depositor's books, and (c) bank errors do not require an adjusting entry by the depositor, but the depositor does need to inform the bank of the error so it can be corrected.

13. (c) An NSF check should not be considered cash. The other choices are true statements.

14. (c) Cash is listed first in the current assets section. The other choices are incorrect because (a) cash and cash equivalents can be appropriately combined when reporting cash on the balance sheet, (b) restricted cash is not to be combined with cash when reporting cash on the balance sheet, and (d) restricted funds can be reported as current assets if they will be used within one year.

PRACTICE EXERCISES

1. Listed below are five procedures followed by Shepherd Company.

1. Total cash receipts are compared to bank deposits daily by someone who has no other cash responsibilities.
2. Time clocks are used for recording time worked by employees.
3. Employees are required to take vacations.
4. Any member of the sales department can approve credit sales.
5. Sam Hill ships goods to customers, bills customers, and receives payment from customers.

Indicate whether procedure is good or weak internal control.

(LO 1, 2)

Instructions

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

<u>Procedure</u>	<u>IC Good or Weak</u>	<u>Related Internal Control Principle</u>
1.		
2.		
3.		
4.		
5.		

Solution

1.

<u>Procedure</u>	<u>IC Good or Weak?</u>	<u>Related Internal Control Principle</u>
1.	Good	Independent internal verification
2.	Good	Physical controls
3.	Good	Human resource controls
4.	Weak	Establishment of responsibility
5.	Weak	Segregation of duties

2. The information below relates to the Cash account in the ledger of Ansel Company.

Balance June 1—\$17,150; Cash deposited—\$64,000.

Balance June 30—\$17,704; Checks written—\$63,746.

Prepare bank reconciliation and adjusting entries.

(LO 3)

The June bank statement shows a balance of \$16,422 on June 30 and the following memoranda.

<u>Credits</u>		<u>Debits</u>	
Collection of \$1,500 note plus interest	\$30	NSF check: Anne Adams	\$425
Interest earned on checking account	\$35	Safety deposit box rent	\$55

At June 30, deposits in transit were \$4,750, and outstanding checks totaled \$2,383.

Instructions

- (a) Prepare the bank reconciliation at June 30.
 (b) Prepare the adjusting entries at June 30, assuming (1) the NSF check was from a customer on account, and (2) no interest had been accrued on the note.

Solution

2. (a)

ANSEL COMPANY
Bank Reconciliation
June 30

Cash balance per bank statement		\$16,422
Add: Deposits in transit		4,750
		21,172
Less: Outstanding checks		2,383
Adjusted cash balance per bank		\$18,789
Cash balance per books		\$17,704
Add: Collection of note receivable (\$1,500 + \$30)	\$1,530	
Interest earned	35	1,565
		19,269
Less: NSF check	425	
Safety deposit box rent	55	480
Adjusted cash balance per books		\$18,789

(b)

June 30	Cash	1,530	
	Notes Receivable		1,500
	Interest Revenue		30
30	Cash	35	
	Interest Revenue		35
30	Accounts Receivable (Anne Adams)	425	
	Cash		425
30	Miscellaneous Expense	55	
	Cash		55

PRACTICE PROBLEM

Prepare bank reconciliation and journalize entries.

(LO 3)

Poorten Company's bank statement for May 2017 shows the following data.

Balance 5/1	\$12,650	Balance 5/31	\$14,280
Debit memorandum:		Credit memorandum:	
NSF check	\$175	Collection of note receivable	\$505

The cash balance per books at May 31 is \$13,319. Your review of the data reveals the following.

1. The NSF check was from Copple Co., a customer.
2. The note collected by the bank was a \$500, 3-month, 12% note. The bank charged a \$10 collection fee. No interest has been accrued.
3. Outstanding checks at May 31 total \$2,410.
4. Deposits in transit at May 31 total \$1,752.
5. A Poorten Company check for \$352, dated May 10, cleared the bank on May 25. The company recorded this check, which was a payment on account, for \$325.

Instructions

- (a) Prepare a bank reconciliation at May 31.
 (b) Journalize the entries required by the reconciliation.

Solution

(a)

POORTEN COMPANY
Bank Reconciliation
 May 31, 2017

Cash balance per bank statement		\$14,280
Add: Deposits in transit		<u>1,752</u>
		16,032
Less: Outstanding checks		<u>2,410</u>
Adjusted cash balance per bank		<u>\$13,622</u>
Cash balance per books		\$13,319
Add: Collection of note receivable \$500, plus \$15 interest, less collection fee \$10		<u>505</u>
		13,824
Less: NSF check	\$175	
Error in recording check	<u>27</u>	<u>202</u>
Adjusted cash balance per books		<u>\$13,622</u>

(b)

May 31	Cash	505		
	Miscellaneous Expense	10		
	Notes Receivable		500	
	Interest Revenue		15	
	(To record collection of note by bank)			
31	Accounts Receivable—Copples Co.	175		
	Cash		175	
	(To record NSF check from Copples Co.)			
31	Accounts Payable	27		
	Cash		27	
	(To correct error in recording check)			

WileyPLUS

Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

QUESTIONS

1. A local bank reported that it lost \$150,000 as the result of an employee fraud. Edward Jasso is not clear on what is meant by an “employee fraud.” Explain the meaning of fraud to Edward and give an example of frauds that might occur at a bank.
2. Fraud experts often say that there are three primary factors that contribute to employee fraud. Identify the three factors and explain what is meant by each.
3. Identify and describe the five components of a good internal control system.
4. “Internal control is concerned only with enhancing the accuracy of the accounting records.” Do you agree? Explain.
5. What principles of internal control apply to most organizations?
6. At the corner grocery store, all sales clerks make change out of one cash register drawer. Is this a violation of internal control? Why?
7. Liz Kelso is reviewing the principle of segregation of duties. What are the two common applications of this principle?
8. How do documentation procedures contribute to good internal control?
9. What internal control objectives are met by physical controls?
10. (a) Explain the control principle of independent internal verification. (b) What practices are important in applying this principle?
11. The management of Nickle Company asks you, as the company accountant, to explain (a) the concept

of reasonable assurance in internal control and (b) the importance of the human factor in internal control.

12. Riverside Fertilizer Co. owns the following assets at the balance sheet date.

Cash in bank savings account	\$ 8,000
Cash on hand	850
Cash refund due from the IRS	1,000
Checking account balance	14,000
Postdated checks	500

What amount should Riverside report as cash in the balance sheet?

13. What principle(s) of internal control is (are) involved in making daily cash counts of over-the-counter receipts?
14. Seaton Department Stores has just installed new electronic cash registers in its stores. How do cash registers improve internal control over cash receipts?
15. At Kellum Wholesale Company, two mail clerks open all mail receipts. How does this strengthen internal control?
16. "To have maximum effective internal control over cash disbursements, all payments should be made by check." Is this true? Explain.
17. Ken Deangelo Company's internal controls over cash disbursements provide for the treasurer to sign checks imprinted by a check-writing machine in indelible ink after comparing the check with the approved invoice. Identify the internal control principles that are present in these controls.

18. How do the principles of (a) physical controls and (b) documentation controls apply to cash disbursements?
19. (a) What is a voucher system? (b) What principles of internal control apply to a voucher system?
20. What is the essential feature of an electronic funds transfer (EFT) procedure?
21. (a) Identify the three activities that pertain to a petty cash fund, and indicate an internal control principle that is applicable to each activity. (b) When are journal entries required in the operation of a petty cash fund?
22. "The use of a bank contributes significantly to good internal control over cash." Is this true? Why or why not?
23. Anna Korte is confused about the lack of agreement between the cash balance per books and the balance per bank. Explain the causes for the lack of agreement to Anna, and give an example of each cause.
24. What are the four steps involved in finding differences between the balance per books and balance per bank?
25. Heather Kemp asks your help concerning an NSF check. Explain to Heather (a) what an NSF check is, (b) how it is treated in a bank reconciliation, and (c) whether it will require an adjusting entry.
26. (a) "Cash equivalents are the same as cash." Do you agree? Explain. (b) How should restricted cash funds be reported on the balance sheet?
27. At what amount does **Apple** report cash and cash equivalents in its 2013 consolidated balance sheet?

BRIEF EXERCISES

Identify fraud triangle concepts.

(LO 1)

BE7-1 Match each situation with the fraud triangle factor—opportunity, financial pressure, or rationalization—that best describes it.

1. An employee's monthly credit card payments are nearly 75% of his or her monthly earnings.
2. An employee earns minimum wage at a firm that has reported record earnings for each of the last five years.
3. An employee has an expensive gambling habit.
4. An employee has check-writing and -signing responsibilities for a small company, as well as reconciling the bank account.

Indicate internal control concepts.

(LO 1)

BE7-2 Shelly Eckert has prepared the following list of statements about internal control.

1. One of the objectives of internal control is to safeguard assets from employee theft, robbery, and unauthorized use.
2. One of the objectives of internal control is to enhance the accuracy and reliability of the accounting records.
3. No laws require U.S. corporations to maintain an adequate system of internal control.

Identify each statement as true or false. If false, indicate how to correct the statement.

Explain the importance of internal control.

(LO 1)

BE7-3 Jessica Mahan is the new owner of Penny Parking. She has heard about internal control but is not clear about its importance for her business. Explain to Jessica the four purposes of internal control and give her one application of each purpose for Penny Parking.

Identify internal control principles.

(LO 1)

BE7-4 The internal control procedures in Valentine Company provide that:

1. Employees who have physical custody of assets do not have access to the accounting records.
 2. Each month, the assets on hand are compared to the accounting records by an internal auditor.
 3. A prenumbered shipping document is prepared for each shipment of goods to customers.
- Identify the principles of internal control that are being followed.

BE7-5 Rosenquist Company has the following internal control procedures over cash receipts. Identify the internal control principle that is applicable to each procedure.

1. All over-the-counter receipts are entered in cash registers.
2. All cashiers are bonded.
3. Daily cash counts are made by cashier department supervisors.
4. The duties of receiving cash, recording cash, and custody of cash are assigned to different individuals.
5. Only cashiers may operate cash registers.

Identify the internal control principles applicable to cash receipts.

(LO 2)

BE7-6 The cash register tape for Bluestem Industries reported sales of \$6,871.50. Record the journal entry that would be necessary for each of the following situations. (a) Cash to be accounted for exceeds cash on hand by \$50.75. (b) Cash on hand exceeds cash to be accounted for by \$28.32.

Make journal entries for cash overage and shortfall.

(LO 2)

BE7-7 While examining cash receipts information, the accounting department determined the following information: opening cash balance \$160, cash on hand \$1,125.74, and cash sales per register tape \$980.83. Prepare the required journal entry based upon the cash count sheet.

Make journal entry using cash count sheet.

(LO 2)

BE7-8 Pennington Company has the following internal control procedures over cash disbursements. Identify the internal control principle that is applicable to each procedure.

1. Company checks are prenumbered.
2. The bank statement is reconciled monthly by an internal auditor.
3. Blank checks are stored in a safe in the treasurer's office.
4. Only the treasurer or assistant treasurer may sign checks.
5. Check-signers are not allowed to record cash disbursement transactions.

Identify the internal control principles applicable to cash disbursements.

(LO 2)

BE7-9 On March 20, Dody's petty cash fund of \$100 is replenished when the fund contains \$9 in cash and receipts for postage \$52, freight-out \$26, and travel expense \$10. Prepare the journal entry to record the replenishment of the petty cash fund.

Prepare entry to replenish a petty cash fund.

(LO 2)

BE7-10 Lance Bachman is uncertain about the control features of a bank account. Explain the control benefits of (a) a check and (b) a bank statement.

Identify the control features of a bank account.

(LO 3)

BE7-11 The following reconciling items are applicable to the bank reconciliation for Ellington Company: (1) outstanding checks, (2) bank debit memorandum for service charge, (3) bank credit memorandum for collecting a note for the depositor, and (4) deposits in transit. Indicate how each item should be shown on a bank reconciliation.

Indicate location of reconciling items in a bank reconciliation.

(LO 3)

BE7-12 Using the data in BE7-11, indicate (a) the items that will result in an adjustment to the depositor's records and (b) why the other items do not require adjustment.

Identify reconciling items that require adjusting entries.

(LO 3)

BE7-13 At July 31, Ramirez Company has the following bank information: cash balance per bank \$7,420, outstanding checks \$762, deposits in transit \$1,620, and a bank service charge \$20. Determine the adjusted cash balance per bank at July 31.

Prepare partial bank reconciliation.

(LO 3)

BE7-14 At August 31, Pratt Company has a cash balance per books of \$9,500 and the following additional data from the bank statement: charge for printing Pratt Company checks \$35, interest earned on checking account balance \$40, and outstanding checks \$800. Determine the adjusted cash balance per books at August 31.

Prepare partial bank reconciliation.

(LO 3)

BE7-15 Zhang Company has the following cash balances: Cash in Bank \$15,742, Payroll Bank Account \$6,000, and Plant Expansion Fund Cash \$25,000 to be used two years from now. Explain how each balance should be reported on the balance sheet.

Explain the statement presentation of cash balances.

(LO 4)

DO IT! Exercises

Identify violations of control activities.

(LO 1)

DO IT! 7-1 Identify which control activity is violated in each of the following situations, and explain how the situation creates an opportunity for fraud or inappropriate accounting practices.

1. Once a month, the sales department sends sales invoices to the accounting department to be recorded.
2. Leah Hutcherson orders merchandise for Rice Lake Company; she also receives merchandise and authorizes payment for merchandise.
3. Several clerks at Great Foods use the same cash register drawer.

Design system of internal control over cash receipts.

(LO 2)

DO IT! 7-2a Gary Stanten is concerned with control over mail receipts at Gary's Sporting Goods. All mail receipts are opened by Al Krane. Al sends the checks to the accounting department, where they are stamped "For Deposit Only." The accounting department records and deposits the mail receipts weekly. Gary asks for your help in installing a good system of internal control over mail receipts.

Make journal entries for petty cash fund.

(LO 2)

DO IT! 7-2b Wilkinson Company established a \$100 petty cash fund on August 1. On August 31, the fund had \$7 cash remaining and petty cash receipts for postage \$31, office supplies \$42, and miscellaneous expense \$16. Prepare journal entries to establish the fund on August 1 and replenish the fund on August 31.

Explain treatment of items in bank reconciliation.

(LO 3)

DO IT! 7-3 Roger Richman owns Richman Blankets. He asks you to explain how he should treat the following reconciling items when reconciling the company's bank account.

1. Outstanding checks.
2. A deposit in transit.
3. The bank charged to the company account a check written by another company.
4. A debit memorandum for a bank service charge.

Analyze statements about the reporting of cash.

(LO 4)

DO IT! 7-4 Indicate whether each of the following statements is true or false.

1. A company has the following assets at the end of the year: cash on hand \$40,000, cash refund due from customer \$30,000, and checking account balance \$22,000. Cash and cash equivalents is therefore \$62,000.
2. A company that has received NSF checks should report these checks as a current liability on the balance sheet.
3. Restricted cash that is a current asset is reported as part of cash and cash equivalents.
4. A company has cash in the bank of \$50,000, petty cash of \$400, and stock investments of \$100,000. Total cash and cash equivalents is therefore \$50,400.

EXERCISES

Identify the principles of internal control.

(LO 1)

E7-1 Eve Herschel is the owner of Herschel's Pizza. Herschel's is operated strictly on a carryout basis. Customers pick up their orders at a counter where a clerk exchanges the pizza for cash. While at the counter, the customer can see other employees making the pizzas and the large ovens in which the pizzas are baked.

Instructions

Identify the six principles of internal control and give an example of each principle that you might observe when picking up your pizza. (*Note:* It may not be possible to observe all the principles.)

Identify internal control weaknesses over cash receipts and suggest improvements.

(LO 1, 2)

E7-2 The following control procedures are used at Torres Company for over-the-counter cash receipts.

1. To minimize the risk of robbery, cash in excess of \$100 is stored in an unlocked attaché case in the stockroom until it is deposited in the bank.
2. All over-the-counter receipts are processed by three clerks who use a cash register with a single cash drawer.
3. The company accountant makes the bank deposit and then records the day's receipts.

4. At the end of each day, the total receipts are counted by the cashier on duty and reconciled to the cash register total.
5. Cashiers are experienced; they are not bonded.

Instructions

- (a) For each procedure, explain the weakness in internal control, and identify the control principle that is violated.
- (b) For each weakness, suggest a change in procedure that will result in good internal control.

E7-3 The following control procedures are used in Mendy Lang's Boutique Shoppe for cash disbursements.

1. The company accountant prepares the bank reconciliation and reports any discrepancies to the owner.
2. The store manager personally approves all payments before signing and issuing checks.
3. Each week, 100 company checks are left in an unmarked envelope on a shelf behind the cash register.
4. After payment, bills are filed in a paid invoice folder.
5. The company checks are unnumbered.

Instructions

- (a) For each procedure, explain the weakness in internal control, and identify the internal control principle that is violated.
- (b) For each weakness, suggest a change in the procedure that will result in good internal control.

Identify internal control weaknesses over cash disbursements and suggest improvements.

(LO 1, 2)

E7-4 At Danner Company, checks are not prenumbered because both the purchasing agent and the treasurer are authorized to issue checks. Each signer has access to unissued checks kept in an unlocked file cabinet. The purchasing agent pays all bills pertaining to goods purchased for resale. Prior to payment, the purchasing agent determines that the goods have been received and verifies the mathematical accuracy of the vendor's invoice. After payment, the invoice is filed by the vendor name, and the purchasing agent records the payment in the cash disbursements journal. The treasurer pays all other bills following approval by authorized employees. After payment, the treasurer stamps all bills PAID, files them by payment date, and records the checks in the cash disbursements journal. Danner Company maintains one checking account that is reconciled by the treasurer.

Instructions

- (a) List the weaknesses in internal control over cash disbursements.
- (b)  Write a memo to the company treasurer indicating your recommendations for improvement.

Identify internal control weaknesses for cash disbursements and suggest improvements.

(LO 2)

E7-5 Listed below are five procedures followed by Eikenberry Company.

1. Several individuals operate the cash register using the same register drawer.
2. A monthly bank reconciliation is prepared by someone who has no other cash responsibilities.
3. Joe Cockrell writes checks and also records cash payment journal entries.
4. One individual orders inventory, while a different individual authorizes payments.
5. Unnumbered sales invoices from credit sales are forwarded to the accounting department every four weeks for recording.

Instructions

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

Indicate whether procedure is good or weak internal control.

(LO 1, 2)

<u>Procedure</u>	<u>IC Good or Weak?</u>	<u>Related Internal Control Principle</u>
1.		
2.		
3.		
4.		
5.		

Indicate whether procedure is good or weak internal control. (LO 1, 2)

E7-6 Listed below are five procedures followed by Gilmore Company.

1. Employees are required to take vacations.
2. Any member of the sales department can approve credit sales.
3. Paul Jaggard ships goods to customers, bills customers, and receives payment from customers.
4. Total cash receipts are compared to bank deposits daily by someone who has no other cash responsibilities.
5. Time clocks are used for recording time worked by employees.

Instructions

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

<u>Procedure</u>	<u>IC Good or Weak?</u>	<u>Related Internal Control Principle</u>

3.		
4.		
5.		

Prepare journal entries for a petty cash fund. (LO 2)

E7-7 Setterstrom Company established a petty cash fund on May 1, cashing a check for \$100. The company reimbursed the fund on June 1 and July 1 with the following results.

June 1: Cash in fund \$1.75. Receipts: delivery expense \$31.25, postage expense \$39.00, and miscellaneous expense \$25.00.

July 1: Cash in fund \$3.25. Receipts: delivery expense \$21.00, entertainment expense \$51.00, and miscellaneous expense \$24.75.

On July 10, Setterstrom increased the fund from \$100 to \$130.

Instructions

Prepare journal entries for Setterstrom Company for May 1, June 1, July 1, and July 10.

Prepare journal entries for a petty cash fund. (LO 2)

E7-8 Horvath Company uses an imprest petty cash system. The fund was established on March 1 with a balance of \$100. During March, the following petty cash receipts were found in the petty cash box.

<u>Date</u>	<u>Receipt No.</u>	<u>For</u>	<u>Amount</u>
3/5	1	Stamp Inventory	\$39
7	2	Freight-Out	21
9	3	Miscellaneous Expense	6
11	4	Travel Expense	24
14	5	Miscellaneous Expense	5

The fund was replenished on March 15 when the fund contained \$2 in cash. On March 20, the amount in the fund was increased to \$175.

Instructions

Journalize the entries in March that pertain to the operation of the petty cash fund.

Prepare bank reconciliation and adjusting entries. (LO 3)

E7-9 Don Wyatt is unable to reconcile the bank balance at January 31. Don's reconciliation is as follows.

Cash balance per bank	\$3,560.20
Add: NSF check	490.00
Less: Bank service charge	25.00
Adjusted balance per bank	<u>\$4,025.20</u>
Cash balance per books	\$3,875.20
Less: Deposits in transit	530.00
Add: Outstanding checks	730.00
Adjusted balance per books	<u>\$4,075.20</u>

Instructions

- Prepare a correct bank reconciliation.
- Journalize the entries required by the reconciliation.

E7-10 On April 30, the bank reconciliation of Westbrook Company shows three outstanding checks: no. 254, \$650; no. 255, \$620; and no. 257, \$410. The May bank statement and the May cash payments journal are shown as follows.

Determine outstanding checks.

(LO 3)

Bank Statement			Cash Payments Journal		
Checks Paid			Checks Issued		
Date	Check No.	Amount	Date	Check No.	Amount
5/4	254	\$650	5/2	258	\$159
5/2	257	410	5/5	259	275
5/17	258	159	5/10	260	890
5/12	259	275	5/15	261	500
5/20	261	500	5/22	262	750
5/29	263	480	5/24	263	480
5/30	262	750	5/29	264	560

Instructions

Using Step 2 in the reconciliation procedure, list the outstanding checks at May 31.

E7-11 The following information pertains to Crane Video Company.

- Cash balance per bank, July 31, \$7,263.
- July bank service charge not recorded by the depositor \$28.
- Cash balance per books, July 31, \$7,284.
- Deposits in transit, July 31, \$1,300.
- Bank collected \$700 note for Crane in July, plus interest \$36, less fee \$20. The collection has not been recorded by Crane, and no interest has been accrued.
- Outstanding checks, July 31, \$591.

Prepare bank reconciliation and adjusting entries.

(LO 3)

**Instructions**

- Prepare a bank reconciliation at July 31.
- Journalize the adjusting entries at July 31 on the books of Crane Video Company.

E7-12 The information below relates to the Cash account in the ledger of Minton Company.

Balance September 1—\$17,150; Cash deposited—\$64,000.

Balance September 30—\$17,404; Checks written—\$63,746.

The September bank statement shows a balance of \$16,422 on September 30 and the following memoranda.

Prepare bank reconciliation and adjusting entries.

(LO 3)

Credits		Debits	
Collection of \$2,500 note plus interest	\$30 \$2,530	NSF check: Richard Nance	\$425
Interest earned on checking account	\$45	Safety deposit box rent	\$65

At September 30, deposits in transit were \$5,450, and outstanding checks totaled \$2,383.

Instructions

- Prepare the bank reconciliation at September 30.
- Prepare the adjusting entries at September 30, assuming (1) the NSF check was from a customer on account, and (2) no interest had been accrued on the note.

E7-13 The cash records of Dawes Company show the following four situations.

- The June 30 bank reconciliation indicated that deposits in transit total \$920. During July, the general ledger account Cash shows deposits of \$15,750, but the bank statement indicates that only \$15,600 in deposits were received during the month.
- The June 30 bank reconciliation also reported outstanding checks of \$680. During the month of July, Dawes Company's books show that \$17,200 of checks were issued. The bank statement showed that \$16,400 of checks cleared the bank in July.

Compute deposits in transit and outstanding checks for two bank reconciliations.

(LO 3)

3. In September, deposits per the bank statement totaled \$26,700, deposits per books were \$26,400, and deposits in transit at September 30 were \$2,100.
4. In September, cash disbursements per books were \$23,700, checks clearing the bank were \$25,000, and outstanding checks at September 30 were \$2,100.

There were no bank debit or credit memoranda. No errors were made by either the bank or Dawes Company.

Instructions

Answer the following questions.

- (a) In situation (1), what were the deposits in transit at July 31?
- (b) In situation (2), what were the outstanding checks at July 31?
- (c) In situation (3), what were the deposits in transit at August 31?
- (d) In situation (4), what were the outstanding checks at August 31?

Show presentation of cash in financial statements.

(LO 4)

E7-14 Wynn Company has recorded the following items in its financial records.

Cash in bank	\$ 42,000
Cash in plant expansion fund	100,000
Cash on hand	12,000
Highly liquid investments	34,000
Petty cash	500
Receivables from customers	89,000
Stock investments	61,000

The highly liquid investments had maturities of 3 months or less when they were purchased. The stock investments will be sold in the next 6 to 12 months. The plant expansion project will begin in 3 years.

Instructions

- (a) What amount should Wynn report as “Cash and cash equivalents” on its balance sheet?
- (b) Where should the items not included in part (a) be reported on the balance sheet?

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book’s companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Identify internal control principles over cash disbursements.

(LO 1, 2)

P7-1A Bolz Office Supply Company recently changed its system of internal control over cash disbursements. The system includes the following features.

Instead of being unnumbered and manually prepared, all checks must now be pre-numbered and prepared by using the new accounts payable software purchased by the company. Before a check can be issued, each invoice must have the approval of Kathy Moon, the purchasing agent, and Robin Self, the receiving department supervisor. Checks must be signed by either Jennifer Edwards, the treasurer, or Rich Woodruff, the assistant treasurer. Before signing a check, the signer is expected to compare the amount of the check with the amount on the invoice.

After signing a check, the signer stamps the invoice PAID and inserts (within the stamp) the date, check number, and amount of the check. The “paid” invoice is then sent to the accounting department for recording.

Blank checks are stored in a safe in the treasurer’s office. The combination to the safe is known only by the treasurer and assistant treasurer. Each month, the bank statement is reconciled with the bank balance per books by the assistant chief accountant. All employees who handle or account for cash are bonded.

Instructions

Identify the internal control principles and their application to cash disbursements of Bolz Office Supply Company.

P7-2A Forney Company maintains a petty cash fund for small expenditures. The following transactions occurred over a 2-month period.

- July 1 Established petty cash fund by writing a check on Scranton Bank for \$200.
 15 Replenished the petty cash fund by writing a check for \$196.00. On this date, the fund consisted of \$4.00 in cash and the following petty cash receipts: freight-out \$92.00, postage expense \$42.40, entertainment expense \$46.60, and miscellaneous expense \$11.20.
 31 Replenished the petty cash fund by writing a check for \$192.00. At this date, the fund consisted of \$8.00 in cash and the following petty cash receipts: freight-out \$82.10, charitable contributions expense \$45.00, postage expense \$25.50, and miscellaneous expense \$39.40.
 Aug. 15 Replenished the petty cash fund by writing a check for \$187.00. On this date, the fund consisted of \$13.00 in cash and the following petty cash receipts: freight-out \$77.60, entertainment expense \$43.00, postage expense \$33.00, and miscellaneous expense \$37.00.
 16 Increased the amount of the petty cash fund to \$300 by writing a check for \$100.
 31 Replenished the petty cash fund by writing a check for \$284.00. On this date, the fund consisted of \$16 in cash and the following petty cash receipts: postage expense \$140.00, travel expense \$95.60, and freight-out \$47.10.

Journalize and post petty cash fund transactions.

(LO 2)

**Instructions**

- (a) Journalize the petty cash transactions.
 (b) Post to the Petty Cash account.
 (c) What internal control features exist in a petty cash fund?

- (a) July 15, Cash short \$3.80
 (b) Aug. 31 balance \$300

P7-3A On May 31, 2017, Reber Company had a cash balance per books of \$6,781.50. The bank statement from New York State Bank on that date showed a balance of \$6,404.60. A comparison of the statement with the Cash account revealed the following facts.

Prepare a bank reconciliation and adjusting entries.

(LO 3)

- The statement included a debit memo of \$40 for the printing of additional company checks.
- Cash sales of \$836.15 on May 12 were deposited in the bank. The cash receipts journal entry and the deposit slip were incorrectly made for \$886.15. The bank credited Reber Company for the correct amount.
- Outstanding checks at May 31 totaled \$576.25. Deposits in transit were \$2,416.15.
- On May 18, the company issued check no. 1181 for \$685 to Lynda Carsen on account. The check, which cleared the bank in May, was incorrectly journalized and posted by Reber Company for \$658.
- A \$3,000 note receivable was collected by the bank for Reber Company on May 31 plus \$80 interest. The bank charged a collection fee of \$20. No interest has been accrued on the note.
- Included with the canceled checks was a check issued by Stiner Company to Ted Cress for \$800 that was incorrectly charged to Reber Company by the bank.
- On May 31, the bank statement showed an NSF charge of \$680 for a check issued by Sue Allison, a customer, to Reber Company on account.

Instructions

- (a) Prepare the bank reconciliation at May 31, 2017.
 (b) Prepare the necessary adjusting entries for Reber Company at May 31, 2017.

- (a) Adjusted cash balance per bank \$9,044.50

Prepare a bank reconciliation and adjusting entries from detailed data.

(LO 3)

P7-4A The bank portion of the bank reconciliation for Langer Company at November 30, 2017, was as follows.

LANGER COMPANY
Bank Reconciliation
November 30, 2017

Cash balance per bank		\$14,367.90
Add: Deposits in transit		2,530.20
		16,898.10
Less: Outstanding checks		
Check Number	Check Amount	
3451	\$2,260.40	
3470	720.10	
3471	844.50	
3472	1,426.80	
3474	1,050.00	
		6,301.80
Adjusted cash balance per bank		\$10,596.30

The adjusted cash balance per bank agreed with the cash balance per books at November 30. The December bank statement showed the following checks and deposits.

Bank Statement				
Checks			Deposits	
<u>Date</u>	<u>Number</u>	<u>Amount</u>	<u>Date</u>	<u>Amount</u>
12-1	3451	\$ 2,260.40	12-1	\$ 2,530.20
12-2	3471	844.50	12-4	1,211.60
12-7	3472	1,426.80	12-8	2,365.10
12-4	3475	1,640.70	12-16	2,672.70
12-8	3476	1,300.00	12-21	2,945.00
12-10	3477	2,130.00	12-26	2,567.30
12-15	3479	3,080.00	12-29	2,836.00
12-27	3480	600.00	12-30	1,025.00
12-30	3482	475.50	Total	\$18,152.90
12-29	3483	1,140.00		
12-31	3485	540.80		
	Total	\$15,438.70		

The cash records per books for December showed the following.

Cash Payments Journal						Cash Receipts Journal	
<u>Date</u>	<u>Number</u>	<u>Amount</u>	<u>Date</u>	<u>Number</u>	<u>Amount</u>	<u>Date</u>	<u>Amount</u>
12-1	3475	\$1,640.70	12-20	3482	\$ 475.50	12-3	\$ 1,211.60
12-2	3476	1,300.00	12-22	3483	1,140.00	12-7	2,365.10
12-2	3477	2,130.00	12-23	3484	798.00	12-15	2,672.70
12-4	3478	621.30	12-24	3485	450.80	12-20	2,954.00
12-8	3479	3,080.00	12-30	3486	889.50	12-25	2,567.30
12-10	3480	600.00	Total		\$13,933.20	12-28	2,836.00
12-17	3481	807.40				12-30	1,025.00
						12-31	1,690.40
						Total	\$17,322.10

The bank statement contained two memoranda:

1. A credit of \$5,145 for the collection of a \$5,000 note for Langer Company plus interest of \$160 and less a collection fee of \$15. Langer Company has not accrued any interest on the note.
2. A debit of \$572.80 for an NSF check written by L. Rees, a customer. At December 31, the check had not been redeposited in the bank.

At December 31, the cash balance per books was \$12,485.20, and the cash balance per the bank statement was \$20,154.30. The bank did not make any errors, but two errors were made by Langer Company.

Instructions

- Using the four steps in the reconciliation procedure, prepare a bank reconciliation at December 31.
- Prepare the adjusting entries based on the reconciliation. (*Hint:* The correction of any errors pertaining to recording checks should be made to Accounts Payable. The correction of any errors relating to recording cash receipts should be made to Accounts Receivable.)

(a) Adjusted balance per books \$16,958.40

P7-5A Rodriguez Company maintains a checking account at the Imura Bank. At July 31, selected data from the ledger balance and the bank statement are shown below.

Prepare a bank reconciliation and adjusting entries.

(LO 3)

	Cash in Bank	
	Per Books	Per Bank
Balance, July 1	\$17,600	\$15,800
July receipts	81,400	
July credits		83,470
July disbursements	77,150	
July debits		74,756
Balance, July 31	\$21,850	\$24,514

Analysis of the bank data reveals that the credits consist of \$79,000 of July deposits and a credit memorandum of \$4,470 for the collection of a \$4,400 note plus interest revenue of \$70. The July debits per bank consist of checks cleared \$74,700 and a debit memorandum of \$56 for printing additional company checks.

You also discover the following errors involving July checks: (1) A check for \$230 to a creditor on account that cleared the bank in July was journalized and posted as \$320. (2) A salary check to an employee for \$255 was recorded by the bank for \$155.

The June 30 bank reconciliation contained only two reconciling items: deposits in transit \$8,000 and outstanding checks of \$6,200.

Instructions

- Prepare a bank reconciliation at July 31, 2017.
- Journalize the adjusting entries to be made by Rodriguez Company. Assume that interest on the note has not been accrued.

(a) Adjusted balance per books \$26,354

P7-6A Rondelli Middle School wants to raise money for a new sound system for its auditorium. The primary fund-raising event is a dance at which the famous disc jockey D.J. Sound will play classic and not-so-classic dance tunes. Matt Ballester, the music and theater instructor, has been given the responsibility for coordinating the fund-raising efforts. This is Matt's first experience with fund-raising. He decides to put the eighth-grade choir in charge of the event; he will be a relatively passive observer.

Identify internal control weaknesses in cash receipts and cash disbursements.

(LO 1, 2)

Matt had 500 unnumbered tickets printed for the dance. He left the tickets in a box on his desk and told the choir students to take as many tickets as they thought they could sell for \$5 each. In order to ensure that no extra tickets would be floating around, he told them to dispose of any unsold tickets. When the students received payment for the tickets, they were to bring the cash back to Matt and he would put it in a locked box in his desk drawer.

Some of the students were responsible for decorating the gymnasium for the dance. Matt gave each of them a key to the money box and told them that if they took money out to purchase materials, they should put a note in the box saying how much they took and what it was used for. After 2 weeks, the money box appeared to be getting full, so Matt asked Jeff Kenney to count the money, prepare a deposit slip, and deposit the money in a bank account Matt had opened.

The day of the dance, Matt wrote a check from the account to pay the DJ. D.J. Sound, however, said that he accepted only cash and did not give receipts. So Matt took \$200 out of the cash box and gave it to D.J. At the dance, Matt had Sam Cooper working at the entrance to the gymnasium, collecting tickets from students, and selling tickets to those who had not pre-purchased them. Matt estimated that 400 students attended the dance.

The following day, Matt closed out the bank account, which had \$250 in it, and gave that amount plus the \$180 in the cash box to Principal Finke. Principal Finke seemed

surprised that, after generating roughly \$2,000 in sales, the dance netted only \$430 in cash. Matt did not know how to respond.

Instructions

Identify as many internal control weaknesses as you can in this scenario, and suggest how each could be addressed.

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEM

CP7 On December 1, 2017, Fullerton Company had the following account balances.

	<u>Debit</u>		<u>Credit</u>
Cash	\$18,200	Accumulated Depreciation—	
Notes Receivable	2,200	Equipment	\$ 3,000
Accounts Receivable	7,500	Accounts Payable	6,100
Inventory	16,000	Common Stock	50,000
Prepaid Insurance	1,600	Retained Earnings	14,400
Equipment	28,000		<u>\$73,500</u>
	<u>\$73,500</u>		

During December, the company completed the following transactions.

- Dec. 7 Received \$3,600 cash from customers in payment of account (no discount allowed).
 12 Purchased merchandise on account from Vance Co. \$12,000, terms 1/10, n/30.
 17 Sold merchandise on account \$16,000, terms 2/10, n/30. The cost of the merchandise sold was \$10,000.
 19 Paid salaries \$2,200.
 22 Paid Vance Co. in full, less discount.
 26 Received collections in full, less discounts, from customers billed on December 17.
 31 Received \$2,700 cash from customers in payment of account (no discount allowed).

Adjustment data:

1. Depreciation \$200 per month.
2. Insurance expired \$400.

Instructions

- (a) Journalize the December transactions. (Assume a perpetual inventory system.)
- (b) Enter the December 1 balances in the ledger T-accounts and post the December transactions. Use Cost of Goods Sold, Depreciation Expense, Insurance Expense, Salaries and Wages Expense, Sales Revenue, and Sales Discounts.
- (c) The statement from Jackson County Bank on December 31 showed a balance of \$26,130. A comparison of the bank statement with the Cash account revealed the following facts.
 1. The bank collected a note receivable of \$2,200 for Fullerton Company on December 15.
 2. The December 31 receipts were deposited in a night deposit vault on December 31. These deposits were recorded by the bank in January.
 3. Checks outstanding on December 31 totaled \$1,210.
 4. On December 31, the bank statement showed an NSF charge of \$680 for a check received by the company from L. Bryan, a customer, on account.

Prepare a bank reconciliation as of December 31 based on the available information. (*Hint:* The cash balance per books is \$26,100. This can be proven by finding the balance in the Cash account from parts (a) and (b).)

- (d) Journalize the adjusting entries resulting from the bank reconciliation and adjustment data.
- (e) Post the adjusting entries to the ledger T-accounts.
- (f) Prepare an adjusted trial balance.
- (g) Prepare an income statement for December and a classified balance sheet at December 31.

CONTINUING PROBLEM

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 6.)

CC7 Part 1 Natalie is struggling to keep up with the recording of her accounting transactions. She is spending a lot of time marketing and selling mixers and giving her cookie classes. Her friend John is an accounting student who runs his own accounting service. He has asked Natalie if she would like to have him do her accounting. John and Natalie meet and discuss her business.

Part 2 Natalie decides that she cannot afford to hire John to do her accounting. One way that she can ensure that her cash account does not have any errors and is accurate and up-to-date is to prepare a bank reconciliation at the end of each month. Natalie would like you to help her.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP7-1 The financial statements of **Apple Inc.** are presented in Appendix A at the end of this textbook. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

- What comments, if any, are made about cash in the report of the independent registered public accounting firm?
- What data about cash and cash equivalents are shown in the consolidated balance sheet?
- In its notes to Consolidated Financial Statements, how does Apple define cash equivalents?
- In management's Annual Report on Internal Control over Financial Reporting (Item 9A), what does Apple's management say about internal control?

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP7-2 **PepsiCo's** financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- Based on the information contained in these financial statements, determine each of the following for each company:
 - Cash and cash equivalents balance at December 28, 2013, for PepsiCo and at December 31, 2013, for Coca-Cola.
 - Increase (decrease) in cash and cash equivalents from 2012 to 2013.
 - Cash provided by operating activities during the year ended December 2013 (from statement of cash flows).
- What conclusions concerning the management of cash can be drawn from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP7-3 **Amazon.com, Inc.'s** financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the

complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine each of the following for each company:
- (1) Cash and cash equivalents balance at December 31, 2013, for Amazon and at January 31, 2014, for Wal-Mart.
 - (2) Increase (decrease) in cash and cash equivalents from 2012 to 2013.
 - (3) Net cash provided by operating activities during the year ended December 31, 2013, for Amazon and January 31, 2014, for Wal-Mart from statement of cash flows.
- (b) What conclusions concerning the management of cash can be drawn from these data?

Real-World Focus

BYP7-4 All organizations should have systems of internal control. Universities are no exception. This site discusses the basics of internal control in a university setting.

Address: www.bc.edu/offices/audit/controls, or go to www.wiley.com/college/wegandt

Steps: Go to the site shown above.

Instructions

The home page of this site provides links to pages that answer critical questions. Use these links to answer the following questions.

- (a) In a university setting, who has responsibility for evaluating the adequacy of the system of internal control?
- (b) What are some red flags indicating white collar crime?
- (c) What role does an internal audit play at Boston College?
- (d) What are two IT controls over computer operations?

CRITICAL THINKING

Decision-Making Across the Organization

BYP7-5 The board of trustees of a local church is concerned about the internal accounting controls for the offering collections made at weekly services. The trustees ask you to serve on a three-person audit team with the internal auditor of a local college and a CPA who has just joined the church.

At a meeting of the audit team and the board of trustees, you learn the following.

1. The church's board of trustees has delegated responsibility for the financial management and audit of the financial records to the finance committee. This group prepares the annual budget and approves major disbursements. It is not involved in collections or recordkeeping. No audit has been made in recent years because the same trusted employee has kept church records and served as financial secretary for 15 years. The church does not carry any fidelity insurance.
2. The collection at the weekly service is taken by a team of ushers who volunteer to serve one month. The ushers take the collection plates to a basement office at the rear of the church. They hand their plates to the head usher and return to the church service. After all plates have been turned in, the head usher counts the cash received. The head usher then places the cash in the church safe along with a notation of the amount counted. The head usher volunteers to serve for 3 months.
3. The next morning, the financial secretary opens the safe and recounts the collection. The secretary withholds \$150–\$200 in cash, depending on the cash expenditures expected for the week, and deposits the remainder of the collections in the bank. To facilitate the deposit, church members who contribute by check are asked to make their checks payable to "Cash."
4. Each month, the financial secretary reconciles the bank statement and submits a copy of the reconciliation to the board of trustees. The reconciliations have rarely contained any bank errors and have never shown any errors per books.

Instructions

With the class divided into groups, answer the following.

- Indicate the weaknesses in internal accounting control over the handling of collections.
- List the improvements in internal control procedures that you plan to make at the next meeting of the audit team for (1) the ushers, (2) the head usher, (3) the financial secretary, and (4) the finance committee.
- What church policies should be changed to improve internal control?

Communication Activity

BYP7-6 As a new auditor for the CPA firm of Eaton, Quayle, and Hale, you have been assigned to review the internal controls over mail cash receipts of Pritchard Company. Your review reveals the following. Checks are promptly endorsed “For Deposit Only,” but no list of the checks is prepared by the person opening the mail. The mail is opened either by the cashier or by the employee who maintains the accounts receivable records. Mail receipts are deposited in the bank weekly by the cashier.

Instructions

Write a letter to Danny Peak, owner of Pritchard Company, explaining the weaknesses in internal control and your recommendations for improving the system.

Ethics Case

BYP7-7 You are the assistant controller in charge of general ledger accounting at Linbarger Bottling Company. Your company has a large loan from an insurance company. The loan agreement requires that the company’s cash account balance be maintained at \$200,000 or more, as reported monthly.

At June 30, the cash balance is \$80,000, which you report to Lisa Infante, the financial vice president. Lisa excitedly instructs you to keep the cash receipts book open for one additional day for purposes of the June 30 report to the insurance company. Lisa says, “If we don’t get that cash balance over \$200,000, we’ll default on our loan agreement. They could close us down, put us all out of our jobs!” Lisa continues, “I talked to Oconto Distributors (one of Linbarger’s largest customers) this morning. They said they sent us a check for \$150,000 yesterday. We should receive it tomorrow. If we include just that one check in our cash balance, we’ll be in the clear. It’s in the mail!”

**Instructions**

- Who will suffer negative effects if you do not comply with Lisa Infante’s instructions? Who will suffer if you do comply?
- What are the ethical considerations in this case?
- What alternatives do you have?

All About You

BYP7-8 The print and electronic media are full of stories about potential security risks that may arise from your computer or smartphone. It is important to keep in mind, however, that there are also many other ways that your identity can be stolen. The federal government provides many resources to help protect you from identity thieves.

Instructions

Go to <http://onguardonline.gov/idtheft.html>, click **Video and Media**, and then click on **ID Theft Faceoff**. Complete the quiz provided there.

FASB Codification Activity

BYP7-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- How is cash defined in the Codification?
- How are cash equivalents defined in the Codification?
- What are the disclosure requirements related to cash and cash equivalents?

A Look at IFRS

LEARNING
OBJECTIVE

5

Compare the accounting for fraud, internal control, and cash under GAAP and IFRS.

Fraud can occur anywhere. Because the three main factors that contribute to fraud are universal in nature, the principles of internal control activities are used globally by companies. While Sarbanes-Oxley (SOX) does not apply to non-U.S. companies, most large international companies have internal controls similar to those indicated in the chapter. IFRS and GAAP are also very similar in accounting for cash. *IAS No. 1 (revised)*, “Presentation of Financial Statements,” is the only standard that discusses issues specifically related to cash.

Relevant Facts

Following are the key similarities and differences between GAAP and IFRS related to fraud, internal control, and cash.

Similarities

- The fraud triangle discussed in this chapter is applicable to all international companies. Some of the major frauds on an international basis are **Parmalat** (Italy), **Royal Ahold** (the Netherlands), and **Satyam Computer Services** (India).
- Rising economic crime poses a growing threat to companies, with 34% of all organizations worldwide being victims of fraud in a recent 12-month period.
- Accounting scandals both in the United States and internationally have re-ignited the debate over the relative merits of GAAP, which takes a “rules-based” approach to accounting, versus IFRS, which takes a “principles-based” approach. The FASB announced that it intends to introduce more principles-based standards.
- On a lighter note, at one time the Ig Nobel Prize in Economics went to the CEOs of those companies involved in the corporate accounting scandals of that year for “adapting the mathematical concept of imaginary numbers for use in the business world.” A parody of the Nobel Prizes, the Ig Nobel Prizes (read Ignoble, as not noble) are given each year in early October for 10 achievements that “first make people laugh, and then make them think.” Organized by the scientific humor magazine *Annals of Improbable Research (AIR)*, they are presented by a group that includes genuine Nobel laureates at a ceremony at Harvard University’s Sanders Theater (see en.wikipedia.org/wiki/Ig_Nobel_Prize).
- Internal controls are a system of checks and balances designed to prevent and detect fraud and errors. While most companies have these systems in place, many have never completely documented them, nor had an independent auditor attest to their effectiveness. Both of these actions are required under SOX.
- Companies find that internal control review is a costly process but badly needed. One study estimates the cost of SOX compliance for U.S. companies at over \$35 billion, with audit fees doubling in the first year of compliance. At the same time, examination of internal controls indicates lingering problems in the way companies operate. One study of first compliance with the internal-control testing provisions documented material weaknesses for about 13% of companies reporting in a two-year period (*PricewaterhouseCoopers’ Global Economic Crime Survey*, 2005).
- The accounting and internal control procedures related to cash are essentially the same under both IFRS and this textbook. In addition, the definition used for cash equivalents is the same.
- Most companies report cash and cash equivalents together under IFRS, as shown in this textbook. In addition, IFRS follows the same accounting policies related to the reporting of restricted cash.

Differences

- The SOX internal control standards apply only to companies listed on U.S. exchanges. There is continuing debate over whether foreign issuers should have to comply with this extra layer of regulation.

Looking to the Future

Ethics has become a very important aspect of reporting. Different cultures have different perspectives on bribery and other questionable activities, and consequently penalties for engaging in such activities vary considerably across countries.

High-quality international accounting requires both high-quality accounting standards and high-quality auditing. Similar to the convergence of GAAP and IFRS, there is movement to improve international auditing standards. The International Auditing and Assurance Standards Board (IAASB) functions as an independent standard-setting body. It works to establish high-quality auditing and assurance and quality-control standards throughout the world. Whether the IAASB adopts internal control provisions similar to those in SOX remains to be seen. You can follow developments in the international audit arena at <http://www.ifac.org/iaasb/>.

IFRS Practice

IFRS Self-Test Questions

- Non-U.S. companies that follow IFRS:
 - do not normally use the principles of internal control activities described in this textbook.
 - often offset cash with accounts payable on the balance sheet.
 - are not required to follow SOX.
 - None of the above.
- The Sarbanes-Oxley Act applies to:
 - all U.S. companies listed on U.S. exchanges.
 - all companies that list stock on any stock exchange in any country.
 - all European companies listed on European exchanges.
 - Both (a) and (c).
- High-quality international accounting requires both high-quality accounting standards and:
 - a reconsideration of SOX to make it less onerous.
 - high-quality auditing standards.
 - government intervention to ensure that the public interest is protected.
 - the development of new principles of internal control activities.

IFRS Exercise

IFRS7-1 Some people argue that the internal control requirements of the Sarbanes-Oxley Act (SOX) put U.S. companies at a competitive disadvantage to companies outside the United States. Discuss the competitive implications (both pros and cons) of SOX.

International Financial Reporting Problem: Louis Vuitton

IFRS7-2 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Using the notes to the company's financial statements, what are Louis Vuitton's accounting policies related to cash and cash equivalents?

Answers to IFRS Self-Test Questions

1. c 2. a 3. b

8

Accounting for Receivables

CHAPTER PREVIEW As indicated in the Feature Story below, receivables are a significant asset for many pharmaceutical companies. Because a large portion of sales in the United States are credit sales, receivables are important to companies in other industries as well. As a consequence, companies must pay close attention to their receivables and manage them carefully. In this chapter, you will learn what journal entries companies make when they sell products, when they collect cash from those sales, and when they write off accounts they cannot collect.

FEATURE STORY

A Dose of Careful Management Keeps Receivables Healthy

"Sometimes you have to know when to be very tough, and sometimes you can give them a bit of a break," said Vivi Su. She wasn't talking about her children but about the customers of a subsidiary of former pharmaceutical company **Whitehall-Robins**, where she worked as supervisor of credit and collections.

For example, while the company's regular terms were 1/15, n/30 (1% discount if paid within 15 days), a customer might have asked for and received a few days of grace and still got the discount. Or a customer might have placed orders above its credit limit, in which case, depending on its payment history and the circumstances, Ms. Su might have authorized shipment of the goods anyway.

"It's not about drawing a line in the sand, and that's all," she explained. "You want a good relationship with your customers—but you also need to bring in the money."

"The money," in Whitehall-Robins' case, amounted to some \$170 million in sales a year. Nearly all of it came in through the credit accounts Ms. Su managed. The process started with the decision to grant a customer an account in the first place. The sales rep gave the customer a credit application. "My department reviews this application very carefully; a customer needs to supply three good references, and we also run a check with a credit firm like **Equifax**. If we accept them, then

based on their size and history, we assign a credit limit," Ms. Su explained.

Once accounts were established, "I get an aging report every single day," said Ms. Su. "The rule of thumb is that we should always have at least 85% of receivables current—meaning they were billed less than 30 days ago," she continued. "But we try to do even better than that—I like to see 90%."

At 15 days overdue, Whitehall-Robins phoned the client. After 45 days, Ms. Su noted, "I send a letter. Then a second notice is sent in writing. After the third and final notice, the client has 10 days to pay, and then I hand it over to a collection agency, and it's out of my hands."

Ms. Su's boss, Terry Norton, recorded an estimate for bad debts every year, based on a percentage of receivables. The percentage depended on the current aging history. He also calculated and monitored the company's accounts receivable turnover, which the company reported in its financial statements.

Ms. Su knew that she and Mr. Norton were crucial to the profitability of Whitehall-Robins. "Receivables are generally the second-largest asset of any company (after its capital assets)," she pointed out. "So it's no wonder we keep a very close eye on them."

4

Analysis of Receivables

Go to the **REVIEW AND PRACTICE** section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit **WileyPLUS with ORION** for additional tutorials and practice opportunities.

Explain how companies recognize accounts receivable.**Types of Receivables**

The term **receivables** refers to amounts due from individuals and companies. Receivables are claims that are expected to be collected in cash. The management of receivables is a very important activity for any company that sells goods or services on credit.

Receivables are important because they represent one of a company's most liquid assets. For many companies, receivables are also one of the largest assets. For example, receivables represent 13.7% of the current assets of pharmaceutical giant **Rite Aid**. Illustration 8-1 lists receivables as a percentage of total assets for five other well-known companies in a recent year.

Illustration 8-1

Receivables as a percentage of assets

Company	Receivables as a Percentage of Total Assets
Ford Motor Company	43.2%
General Electric	41.5
Minnesota Mining and Manufacturing Company (3M)	12.7
DuPont Co.	11.7
Intel Corporation	3.9

The relative significance of a company's receivables as a percentage of its assets depends on various factors: its industry, the time of year, whether it extends long-term financing, and its credit policies. To reflect important differences among receivables, they are frequently classified as (1) accounts receivable, (2) notes receivable, and (3) other receivables.

Accounts receivable are amounts customers owe on account. They result from the sale of goods and services. Companies generally expect to collect accounts receivable within 30 to 60 days. They are usually the most significant type of claim held by a company.

Notes receivable are a written promise (as evidenced by a formal instrument) for amounts to be received. The note normally requires the collection of interest and extends for time periods of 60–90 days or longer. Notes and accounts receivable that result from sales transactions are often called **trade receivables**.

Other receivables include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable. These do not generally result from the operations of the business. Therefore, they are generally classified and reported as separate items in the balance sheet.

ETHICS NOTE

Companies report receivables from employees separately in the financial statements. The reason: Sometimes these receivables are not the result of an "arm's-length" transaction.

ETHICS NOTE

In exchange for lower interest rates, some companies have eliminated the 25-day grace period before finance charges kick in. Be sure you read the fine print in any credit agreement you sign.

Recognizing Accounts Receivable

Recognizing accounts receivable is relatively straightforward. A service organization records a receivable when it performs a service on account. A merchandiser records accounts receivable at the point of sale of merchandise on account. When a merchandiser sells goods, it increases (debits) Accounts Receivable and increases (credits) Sales Revenue.

The seller may offer terms that encourage early payment by providing a discount. Sales returns also reduce receivables. The buyer might find some of the goods unacceptable and choose to return the unwanted goods.

To review, assume that Jordache Co. on July 1, 2017, sells merchandise on account to Polo Company for \$1,000, terms 2/10, n/30. On July 5, Polo returns

merchandise with a sales price of \$100 to Jordache Co. On July 11, Jordache receives payment from Polo Company for the balance due. The journal entries to record these transactions on the books of Jordache Co. are as follows. **(Cost of goods sold entries are omitted.)**

July 1	Accounts Receivable—Polo Company	1,000	
	Sales Revenue		1,000
	(To record sales on account)		
July 5	Sales Returns and Allowances	100	
	Accounts Receivable—Polo Company		100
	(To record merchandise returned)		
July 11	Cash (\$900 – \$18)	882	
	Sales Discounts (\$900 × .02)	18	
	Accounts Receivable—Polo Company		900
	(To record collection of accounts receivable)		

Helpful Hint

These entries are the same as those described in Chapter 5. For simplicity, we have omitted inventory and cost of goods sold from this set of journal entries and from end-of-chapter material.

Some retailers issue their own credit cards. When you use a retailer's credit card (JCPenney, for example), the retailer charges interest on the balance due if not paid within a specified period (usually 25–30 days).

To illustrate, assume that you use your JCPenney Company credit card to purchase clothing with a sales price of \$300 on June 1, 2017. JCPenney will increase (debit) Accounts Receivable for \$300 and increase (credit) Sales Revenue for \$300 (cost of goods sold entry omitted) as follows.

June 1	Accounts Receivable	300	
	Sales Revenue		300
	(To record sale of merchandise)		

A	=	L	+	SE

Cash Flows
no effect

Assuming that you owe \$300 at the end of the month and JCPenney charges 1.5% per month on the balance due, the adjusting entry that JCPenney makes to record interest revenue of \$4.50 ($\$300 \times 1.5\%$) on June 30 is as follows.

June 30	Accounts Receivable	4.50	
	Interest Revenue		4.50
	(To record interest on amount due)		

A	=	L	+	SE
+4.50				+4.50 Rev

Cash Flows
no effect

Interest revenue is often substantial for many retailers.

ANATOMY OF A FRAUD

Tasaneer was the accounts receivable clerk for a large nonprofit foundation that provided performance and exhibition space for the performing and visual arts. Her responsibilities included activities normally assigned to an accounts receivable clerk, such as recording revenues from various sources (donations, facility rental fees, ticket revenue, and bar receipts). However, she was also responsible for handling all cash and checks from the time they were received until the time she deposited them, as well as preparing the bank reconciliation. Tasaneer took advantage of her situation by falsifying bank deposits and bank reconciliations so that she could steal cash from the bar receipts. Since nobody else logged the donations or matched the donation receipts to pledges prior to Tasaneer receiving them, she was able to offset the cash that was stolen against donations that she received but didn't record. Her crime was made easier by the fact that her boss, the company's controller, only did a very superficial review of the bank reconciliation and thus didn't notice that some numbers had been cut out from other documents and taped onto the bank reconciliation.

Total take: \$1.5 million

THE MISSING CONTROLS

Segregation of duties. The foundation should not have allowed an accounts receivable clerk, whose job was to record receivables, to also handle cash, record cash, make deposits, and especially prepare the bank reconciliation.

Independent internal verification. The controller was supposed to perform a thorough review of the bank reconciliation. Because he did not, he was terminated from his position.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 183–194.

DO IT!**1****Recognizing Accounts Receivable**

On May 1, Wilton sold merchandise on account to Bates for \$50,000 terms 3/15, net 45. On May 4, Bates returns merchandise with a sales price of \$2,000. On May 16, Wilton receives payment from Bates for the balance due. Prepare journal entries to record the May transactions on Wilton's books. (You may ignore cost of goods sold entries and explanations.)

Solution**Action Plan**

- ✓ Prepare entry to record the receivable and related return.
- ✓ Compute the sales discount and related entry.

May 1	Accounts Receivable—Bates	50,000	
	Sales Revenue		50,000
4	Sales Returns and Allowances	2,000	
	Accounts Receivable—Bates		2,000
16	Cash (\$48,000 – \$1,440)	46,560	
	Sales Discounts (\$48,000 × .03)	1,440	
	Accounts Receivable—Bates		48,000

LEARNING OBJECTIVE

2**Describe how companies value accounts receivable and record their disposition.****Valuing Accounts Receivable**

Once companies record receivables in the accounts, the next question is: How should they report receivables in the financial statements? Companies report accounts receivable on the balance sheet as an asset. But determining the **amount** to report is sometimes difficult because some receivables will become uncollectible.

Each customer must satisfy the credit requirements of the seller before the credit sale is approved. Inevitably, though, some accounts receivable become uncollectible. For example, a customer may not be able to pay because of a decline in its sales revenue due to a downturn in the economy. Similarly, individuals may be laid off from their jobs or faced with unexpected hospital bills. Companies record credit losses as **Bad Debt Expense** (or Uncollectible Accounts Expense). Such losses are a normal and necessary risk of doing business on a credit basis.

When U.S. home prices fell, home foreclosures rose, and the economy in general slowed as a result of the financial crisis of 2008, lenders experienced huge increases in their bad debt expense. For example, during one quarter **Wachovia** (a large U.S. bank now owned by **Wells Fargo**) increased bad debt expense from

Alternative Terminology

You will sometimes see *Bad Debt Expense* called *Uncollectible Accounts Expense*.

\$108 million to \$408 million. Similarly, **American Express** increased its bad debt expense by 70%.

Two methods are used in accounting for uncollectible accounts: (1) the direct write-off method and (2) the allowance method. The following sections explain these methods.

DIRECT WRITE-OFF METHOD FOR UNCOLLECTIBLE ACCOUNTS

Under the **direct write-off method**, when a company determines a particular account to be uncollectible, it charges the loss to Bad Debt Expense. Assume, for example, that Warden Co. writes off as uncollectible M. E. Doran’s \$200 balance on December 12. Warden’s entry is as follows.

Dec. 12	Bad Debt Expense Accounts Receivable—M. E. Doran (To record write-off of M. E. Doran account)	200 200	200
---------	---	----------------	-----

A	=	L	+	SE
-200 -200 Exp				
Cash Flows no effect				

Under this method, Bad Debt Expense will show only **actual losses** from uncollectibles. The company will report accounts receivable at its gross amount.

Although this method is simple, its use can reduce the usefulness of both the income statement and balance sheet. Consider the following example. Assume that in 2017, Quick Buck Computer Company decided it could increase its revenues by offering computers to college students without requiring any money down and with no credit-approval process. On campuses across the country, it distributed one million computers with a selling price of \$800 each. This increased Quick Buck’s revenues and receivables by \$800 million. The promotion was a huge success! The 2017 balance sheet and income statement looked great. Unfortunately, during 2018, nearly 40% of the customers defaulted on their loans. This made the 2018 income statement and balance sheet look terrible. Illustration 8-2 shows the effect of these events on the financial statements if the direct write-off method is used.

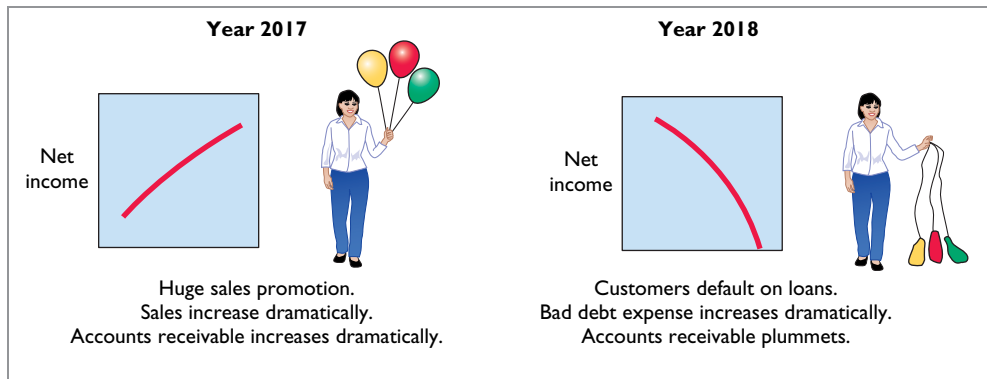

Illustration 8-2
Effects of direct write-off method

Under the direct write-off method, companies often record bad debt expense in a period different from the period in which they record the revenue. The method does not attempt to match bad debt expense to sales revenue in the income statement. Nor does the direct write-off method show accounts receivable in the balance sheet at the amount the company actually expects to receive. **Consequently, unless bad debt losses are insignificant, the direct write-off method is not acceptable for financial reporting purposes.**

ALLOWANCE METHOD FOR UNCOLLECTIBLE ACCOUNTS

The **allowance method** of accounting for bad debts involves estimating uncollectible accounts at the end of each period. This provides better matching on the income statement. It also ensures that companies state receivables on the balance sheet at their cash (net) realizable value. **Cash (net) realizable value** is the

Helpful Hint

In this context, *material* means significant or important to financial statement users.

net amount the company expects to receive in cash. It excludes amounts that the company estimates it will not collect. Thus, this method reduces receivables in the balance sheet by the amount of estimated uncollectible receivables.

GAAP requires the allowance method for financial reporting purposes when bad debts are material in amount. This method has three essential features:

1. Companies **estimate** uncollectible accounts receivable. They match this estimated expense **against revenues** in the same accounting period in which they record the revenues.
2. Companies debit estimated uncollectibles to Bad Debt Expense and credit them to Allowance for Doubtful Accounts through an adjusting entry at the end of each period. Allowance for Doubtful Accounts is a contra account to Accounts Receivable.
3. When companies write off a specific account, they debit actual uncollectibles to Allowance for Doubtful Accounts and credit that amount to Accounts Receivable.

RECORDING ESTIMATED UNCOLLECTIBLES To illustrate the allowance method, assume that Hampson Furniture has credit sales of \$1,200,000 in 2017. Of this amount, \$200,000 remains uncollected at December 31. The credit manager estimates that \$12,000 of these sales will be uncollectible. The adjusting entry to record the estimated uncollectibles increases (debits) Bad Debt Expense and increases (credits) Allowance for Doubtful Accounts, as follows.

A	=	L	+	SE
				-12,000 Exp
-12,000				
Cash Flows				
no effect				

Dec. 31	Bad Debt Expense	12,000	
	Allowance for Doubtful Accounts		12,000
	(To record estimate of uncollectible accounts)		

Hampson reports Bad Debt Expense in the income statement as an operating expense (usually as a selling expense). Thus, the estimated uncollectibles are matched with sales in 2017. Hampson records the expense in the same year it made the sales.

Allowance for Doubtful Accounts shows the estimated amount of claims on customers that the company expects will become uncollectible in the future. Companies use a contra account instead of a direct credit to Accounts Receivable because they do not know which customers will not pay. The credit balance in the allowance account will absorb the specific write-offs when they occur. As Illustration 8-3 shows, the company deducts the allowance account from accounts receivable in the current assets section of the balance sheet.

Illustration 8-3

Presentation of allowance for doubtful accounts

HAMPSON FURNITURE			
Balance Sheet (partial)			
Current assets			
Cash			\$ 14,800
Accounts receivable	\$200,000		
Less: Allowance for doubtful accounts	12,000		188,000
Inventory			310,000
Supplies			25,000
Total current assets			\$ 537,800

The amount of \$188,000 in Illustration 8-3 represents the expected **cash realizable value** of the accounts receivable at the statement date. **Companies do not close Allowance for Doubtful Accounts at the end of the fiscal year.**

RECORDING THE WRITE-OFF OF AN UNCOLLECTIBLE ACCOUNT As described in the Feature Story, companies use various methods of collecting past-due accounts, such as letters, calls, and legal action. When they have exhausted all means of collecting a past-due account and collection appears impossible, the company writes

Helpful Hint

Cash realizable value is sometimes referred to as *accounts receivable (net)*.

off the account. In the credit card industry, for example, it is standard practice to write off accounts that are 210 days past due. To prevent premature or unauthorized write-offs, authorized management personnel should formally approve each write-off. To maintain segregation of duties, the employee authorized to write off accounts should not have daily responsibilities related to cash or receivables.

To illustrate a receivables write-off, assume that the financial vice president of Hampson Furniture authorizes a write-off of the \$500 balance owed by R. A. Ware on March 1, 2018. The entry to record the write-off is as follows.

Mar. 1	Allowance for Doubtful Accounts Accounts Receivable—R. A. Ware (Write-off of R. A. Ware account)	500	500
--------	--	-----	-----

A	=	L	+	SE
+500				
-500				
Cash Flows				
no effect				

Bad Debt Expense does not increase when the write-off occurs. **Under the allowance method, companies debit every bad debt write-off to the allowance account rather than to Bad Debt Expense.** A debit to Bad Debt Expense would be incorrect because the company has already recognized the expense when it made the adjusting entry for estimated bad debts. Instead, the entry to record the write-off of an uncollectible account reduces both Accounts Receivable and Allowance for Doubtful Accounts. After posting, the general ledger accounts appear as shown in Illustration 8-4.

Accounts Receivable		Allowance for Doubtful Accounts	
Jan. 1 Bal. 200,000	Mar. 1	Mar. 1	Jan. 1 Bal. 12,000
	500	500	Mar. 1 Bal. 11,500
Mar. 1 Bal. 199,500			

Illustration 8-4
General ledger balances after write-off

A write-off affects **only balance sheet accounts**—not income statement accounts. The write-off of the account reduces both Accounts Receivable and Allowance for Doubtful Accounts. Cash realizable value in the balance sheet, therefore, remains the same, as Illustration 8-5 shows.

	Before Write-Off	After Write-Off
Accounts receivable	\$ 200,000	\$ 199,500
Allowance for doubtful accounts	12,000	11,500
Cash realizable value	\$188,000	\$188,000

Illustration 8-5
Cash realizable value comparison

RECOVERY OF AN UNCOLLECTIBLE ACCOUNT Occasionally, a company collects from a customer after it has written off the account as uncollectible. The company makes two entries to record the recovery of a bad debt. (1) It reverses the entry made in writing off the account. This reinstates the customer's account. (2) It journalizes the collection in the usual manner.

To illustrate, assume that on July 1, R. A. Ware pays the \$500 amount that Hampson had written off on March 1. Hampson makes the following entries.

(1)			
July 1	Accounts Receivable—R. A. Ware Allowance for Doubtful Accounts (To reverse write-off of R. A. Ware account)	500	500
(2)			
July 1	Cash Accounts Receivable—R. A. Ware (To record collection from R. A. Ware)	500	500

A	=	L	+	SE
+500				
-500				
Cash Flows				
no effect				

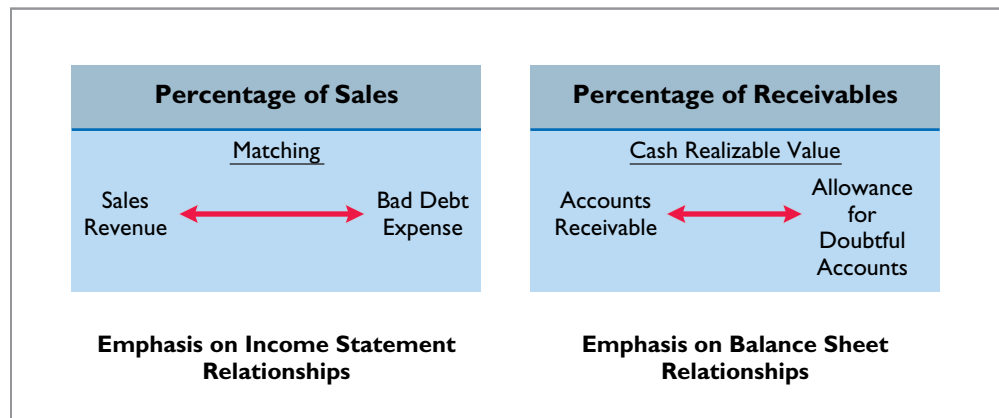

A	=	L	+	SE
+500				
-500				
Cash Flows				
+500				

Note that the recovery of a bad debt, like the write-off of a bad debt, affects **only balance sheet accounts**. The net effect of the two entries above is a debit

to Cash and a credit to Allowance for Doubtful Accounts for \$500. Accounts Receivable and Allowance for Doubtful Accounts both increase in entry (1) for two reasons. First, the company made an error in judgment when it wrote off the account receivable. Second, after R. A. Ware did pay, Accounts Receivable in the general ledger and Ware’s account in the subsidiary ledger should show the collection for possible future credit purposes.

ESTIMATING THE ALLOWANCE For Hampson Furniture in Illustration 8-3, the amount of the expected uncollectibles was given. However, in “real life,” companies must estimate that amount when they use the allowance method. Two bases are used to determine this amount: **(1) percentage of sales** and **(2) percentage of receivables**. Both bases are generally accepted. The choice is a management decision. It depends on the relative emphasis that management wishes to give to expenses and revenues on the one hand or to cash realizable value of the accounts receivable on the other. The choice is whether to emphasize income statement or balance sheet relationships. Illustration 8-6 compares the two bases.

Illustration 8-6
Comparison of bases for estimating uncollectibles

The percentage-of-sales basis results in a better matching of expenses with revenues—an income statement viewpoint. The percentage-of-receivables basis produces the better estimate of cash realizable value—a balance sheet viewpoint. Under both bases, the company must determine its past experience with bad debt losses.

Percentage-of-Sales In the **percentage-of-sales basis**, management estimates what percentage of credit sales will be uncollectible. This percentage is based on past experience and anticipated credit policy.

The company applies this percentage to either total credit sales or net credit sales of the current year. To illustrate, assume that Gonzalez Company elects to use the percentage-of-sales basis. It concludes that 1% of net credit sales will become uncollectible. If net credit sales for 2017 are \$800,000, the estimated bad debt expense is \$8,000 (1% × \$800,000). The adjusting entry is as follows.

A	=	L	+	SE
-8,000				-8,000 Exp
Cash Flows				
no effect				

Dec. 31	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; border-right: 1px solid black; padding: 5px;">Bad Debt Expense</td> <td style="width: 50%; padding: 5px;">8,000</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;"> Allowance for Doubtful Accounts</td> <td style="padding: 5px;">8,000</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;"> (To record estimated bad debts for year)</td> <td style="padding: 5px;"></td> </tr> </table>	Bad Debt Expense	8,000	Allowance for Doubtful Accounts	8,000	(To record estimated bad debts for year)	
Bad Debt Expense	8,000						
Allowance for Doubtful Accounts	8,000						
(To record estimated bad debts for year)							

After the adjusting entry is posted, assuming the allowance account already has a credit balance of \$1,723, the accounts of Gonzalez Company will show the following.

Illustration 8-7
Bad debt accounts after posting

Bad Debt Expense	Allowance for Doubtful Accounts
Dec. 31 Adj. 8,000	Jan. 1 Bal. 1,723
	Dec. 31 Adj. 8,000
	Dec. 31 Bal. 9,723

This basis of estimating uncollectibles emphasizes the matching of expenses with revenues. As a result, Bad Debt Expense will show a direct percentage relationship to the sales base on which it is computed. **When the company makes the adjusting entry, it disregards the existing balance in Allowance for Doubtful Accounts.** The adjusted balance in this account should be a reasonable approximation of the realizable value of the receivables. If actual write-offs differ significantly from the amount estimated, the company should modify the percentage for future years.

Percentage-of-Receivables Under the **percentage-of-receivables basis**, management estimates what percentage of receivables will result in losses from uncollectible accounts. The company prepares an **aging schedule**, in which it classifies customer balances by the length of time they have been unpaid. Because of its emphasis on time, the analysis is often called **aging the accounts receivable**. In the Feature Story, **Whitehall-Robins** prepared an aging report daily.

After the company arranges the accounts by age, it determines the expected bad debt losses. It applies percentages based on past experience to the totals in each category. The longer a receivable is past due, the less likely it is to be collected. Thus, the estimated percentage of uncollectible debts increases as the number of days past due increases. Illustration 8-8 shows an aging schedule for Dart Company. Note that the estimated percentage uncollectible increases from 2% to 40% as the number of days past due increases.

Helpful Hint

Where appropriate, companies may use only a single percentage rate.

Worksheet.xls

11	Estimated Percentage Uncollectible		2%	4%	10%	20%	40%
12	Total Estimated Bad Debts	\$ 2,228	\$ 540	\$ 228	\$ 300	\$ 400	\$ 760
13							

Illustration 8-8

Aging schedule

Helpful Hint

The older categories have higher percentages because the longer an account is past due, the less likely it is to be collected.

Total estimated bad debts for Dart Company (\$2,228) represent the amount of existing customer claims the company expects will become uncollectible in the future. This amount represents the **required balance** in Allowance for Doubtful Accounts at the balance sheet date. **The amount of the bad debt adjusting entry is the difference between the required balance and the existing balance in the allowance account.** If the trial balance shows Allowance for Doubtful Accounts with a credit balance of \$528, the company will make an adjusting entry for \$1,700 (\$2,228 – \$528), as shown here.

Dec. 31	Bad Debt Expense	1,700	
	Allowance for Doubtful Accounts		1,700
	(To adjust allowance account to total estimated uncollectibles)		

A	=	L	+	SE
				-1,700 Exp
-1,700				
Cash Flows				
no effect				

After Dart posts its adjusting entry, its accounts will appear as follows.

Illustration 8-9

Bad debt accounts after posting

Bad Debt Expense		Allowance for Doubtful Accounts	
Dec. 31 Adj.	1,700		Bal. 528
			Dec. 31 Adj. 1,700
			Bal. 2,228

Occasionally, the allowance account will have a **debit balance** prior to adjustment. This occurs when write-offs during the year have exceeded previous provisions for bad debts. In such a case, the company **adds the debit balance to the required balance** when it makes the adjusting entry. Thus, if there had been a \$500 debit balance in the allowance account before adjustment, the adjusting entry would have been for \$2,728 (\$2,228 + \$500) to arrive at a credit balance of \$2,228 (see T-account in margin). The percentage-of-receivables basis will normally result in the better approximation of cash realizable value.

Cookie Jar Allowances

There are many pressures on companies to achieve earnings targets. For managers, poor earnings can lead to dismissal or lack of promotion. It is not surprising then that management may be tempted to look for ways to boost their earnings number.

One way a company can achieve greater earnings is

to lower its estimate of what is needed in its Allowance for Doubtful Accounts (sometimes referred to as “tapping the cooking jar”). For example, suppose a company has an Allowance for Doubtful Accounts of \$10 million

and decides to reduce this balance to \$9 million. As a result of this change, Bad Debt Expense decreases by \$1 million and earnings increase by \$1 million.

Large banks such as **JP Morgan Chase**, **Wells Fargo**, and **Bank of America** recently decreased their Allowance for Doubtful Accounts by over \$4 billion. These reductions came at a time when these big banks were still suffering from lower mortgage lending and trading activity, both of which lead to lower earnings. They justified these reductions in the allowance balances by noting that credit quality and economic conditions had improved. This may be so, but it sure is great to have a cookie jar that might be tapped when a boost in earnings is needed.

How might investors determine that a company is managing its earnings? (Go to **WileyPLUS** for this answer and additional questions.)

Disposing of Accounts Receivable

In the normal course of events, companies collect accounts receivable in cash and remove the receivables from the books. However, as credit sales and receivables have grown in significance, the “normal course of events” has changed. Companies now frequently sell their receivables to another company for cash, thereby shortening the cash-to-cash operating cycle.

Companies sell receivables for two major reasons. First, **they may be the only reasonable source of cash**. When money is tight, companies may not be able to borrow money in the usual credit markets. Or if money is available, the cost of borrowing may be prohibitive.

A second reason for selling receivables is that **billing and collection are often time-consuming and costly**. It is often easier for a retailer to sell the receivables to another party with expertise in billing and collection matters. Credit card companies such as **MasterCard**, **Visa**, and **Discover** specialize in billing and collecting accounts receivable.

SALE OF RECEIVABLES

A common sale of receivables is a sale to a factor. A **factor** is a finance company or bank that buys receivables from businesses and then collects the payments directly from the customers. Factoring is a multibillion dollar business.

Factoring arrangements vary widely. Typically, the factor charges a commission to the company that is selling the receivables. This fee ranges from 1–3% of the amount of receivables purchased. To illustrate, assume that Hendredon Furniture factors \$600,000 of receivables to Federal Factors. Federal Factors assesses a service charge of 2% of the amount of receivables sold. The journal entry to record the sale by Hendredon Furniture on April 2, 2017, is as follows.

Apr. 2	Cash	588,000	
	Service Charge Expense (2% × \$600,000)	12,000	
	Accounts Receivable		600,000
	(To record the sale of accounts receivable)		

If Hendredon often sells its receivables, it records the service charge expense as a selling expense. If the company infrequently sells receivables, it may report this amount in the “Other expenses and losses” section of the income statement.

<hr/>				
Cash Flows				
+588,000				

CREDIT CARD SALES

Over one billion credit cards are in use in the United States—more than three credit cards for every man, woman, and child in this country. **Visa**, **MasterCard**, and **American Express** are the national credit cards that most individuals use. Three parties are involved when national credit cards are used in retail sales: (1) the credit card issuer, who is independent of the retailer; (2) the retailer; and (3) the customer. A retailer’s acceptance of a national credit card is another form of selling (factoring) the receivable.

Illustration 8-10 shows the major advantages of national credit cards to the retailer. In exchange for these advantages, the retailer pays the credit card issuer a fee of 2–6% of the invoice price for its services.

Illustration 8-10

Advantages of credit cards to the retailer

ACCOUNTING FOR CREDIT CARD SALES The retailer generally considers sales from the use of national credit card sales as **cash sales**. The retailer must pay to the bank that issues the card a fee for processing the transactions. The retailer records the credit card slips in a similar manner as checks deposited from a cash sale.

To illustrate, Anita Ferreri purchases \$1,000 of compact discs for her restaurant from Karen Kerr Music Co., using her Visa First Bank Card. First Bank charges a service fee of 3%. The entry to record this transaction by Karen Kerr Music on March 22, 2017, is as follows.

How Does a Credit Card Work?

Most of you know how to use a credit card, but do you know what happens in the transaction and how the transaction is processed? Suppose that you use a **Visa** card to purchase some new ties at **Nordstrom**. The salesperson swipes your card, which allows the information on the magnetic strip on the back of

the card to be read. The salesperson then enters in the amount of the purchase. The machine contacts the Visa computer, which routes the call back to the bank that issued your Visa card. The issuing bank verifies that the account exists, that the card is not stolen, and that you have not exceeded your credit limit. At this point, the slip is printed, which you sign.

Visa acts as the clearing agent for the transaction. It transfers funds from the issuing bank to Nordstrom's bank account. Generally this transfer of funds, from sale to the receipt of funds in the merchant's account, takes two to three days.

In the meantime, Visa puts a pending charge on your account for the amount of the tie purchase; that amount counts immediately against your available credit limit. At the end of the billing period, Visa sends you an invoice (your credit card bill) which shows the various charges you made, and the amounts that Visa expended on your behalf, for the month. You then must "pay the piper" for your stylish new ties.

Assume that Nordstrom prepares a bank reconciliation at the end of each month. If some credit card sales have not been processed by the bank, how should Nordstrom treat these transactions on its bank reconciliation? (Go to [WileyPLUS](#) for this answer and additional questions.)

DO IT! 2 Uncollectible Accounts Receivable

Brule Co. has been in business for five years. The unadjusted trial balance at the end of the current year shows:

Accounts Receivable	\$30,000 Dr.
Sales Revenue	\$180,000 Cr.
Allowance for Doubtful Accounts	\$2,000 Dr.

Action Plan

- ✓ Estimate the amount the company does not expect to collect.
- ✓ Consider the existing balance in the allowance account when using the percentage-of-receivables basis.
- ✓ Report receivables at their cash (net) realizable value.

Brule estimates bad debts to be 10% of receivables. Prepare the entry necessary to adjust Allowance for Doubtful Accounts.

Solution

The following entry should be made to bring the balance in Allowance for Doubtful Accounts up to a normal credit balance of \$3,000 (10% × \$30,000):

Bad Debt Expense [(10% × \$30,000) + \$2,000]	5,000		5,000
Allowance for Doubtful Accounts			
(To record estimate of uncollectible accounts)

LEARNING
OBJECTIVE

3

Explain how companies recognize notes receivable.

Companies may also grant credit in exchange for a formal credit instrument known as a promissory note. A **promissory note** is a written promise to pay a specified amount of money on demand or at a definite time. Promissory notes may be used (1) when individuals and companies lend or borrow money, (2) when the amount of the transaction and the credit period exceed normal limits, or (3) in settlement of accounts receivable.

In a promissory note, the party making the promise to pay is called the **maker**. The party to whom payment is to be made is called the **payee**. The note may specifically identify the payee by name or may designate the payee simply as the bearer of the note.

In the note shown in Illustration 8-11, Calhoun Company is the maker and Wilma Company is the payee. To Wilma Company, the promissory note is a note receivable. To Calhoun Company, it is a note payable.

The illustration shows a promissory note with the following details:

- Amount:** \$1,000
- Date:** Chicago, Illinois, May 1, 2017
- Term:** 2 months after date
- Payee:** Wilma Company
- Interest Rate:** 12%
- Maker:** Calhoun Company, signed by Phyllis Miller, Treasurer
- Text:** "We promise to pay" and "for value received with annual interest at 12%"
- Amount in Words:** One Thousand and no/100 dollars

Illustration 8-11
Promissory note

Helpful Hint

For this note, the maker, Calhoun Company, debits Cash and credits Notes Payable. The payee, Wilma Company, debits Notes Receivable and credits Cash.

Notes receivable give the holder a stronger legal claim to assets than do accounts receivable. Like accounts receivable, notes receivable can be readily sold to another party. Promissory notes are negotiable instruments (as are checks), which means that they can be transferred to another party by endorsement.

Companies frequently accept notes receivable from customers who need to extend the payment of an outstanding account receivable. They often require such notes from high-risk customers. In some industries (such as the pleasure and sport boat industry), all credit sales are supported by notes. The majority of notes, however, originate from loans.

The basic issues in accounting for notes receivable are the same as those for accounts receivable. On the following pages, we look at these issues. Before we do, however, we need to consider two issues that do not apply to accounts receivable: determining the maturity date and computing interest.

Determining the Maturity Date

When the life of a note is expressed in terms of months, you find the date when it matures by counting the months from the date of issue. For example, the maturity date of a three-month note dated May 1 is August 1. A note drawn on the last day of a month matures on the last day of a subsequent month. That is, a July 31 note due in two months matures on September 30.

When the due date is stated in terms of days, you need to count the exact number of days to determine the maturity date. In counting, **omit the date the note is issued but include the due date**. For example, the maturity date of a 60-day note dated July 17 is September 15, computed as follows.

Illustration 8-12
Computation of maturity date

Term of note		60 days
July (31 – 17)	14	
August	<u>31</u>	<u>45</u>
Maturity date: September		<u>15</u>

Illustration 8-13 shows three ways of stating the maturity date of a promissory note.

Illustration 8-13
Maturity date of different notes

Computing Interest

Illustration 8-14 gives the basic formula for computing interest on an interest-bearing note.

Illustration 8-14
Formula for computing interest

$$\text{Face Value of Note} \times \text{Annual Interest Rate} \times \text{Time in Terms of One Year} = \text{Interest}$$

Helpful Hint

The interest rate specified is the *annual* rate.

The interest rate specified in a note is an **annual** rate of interest. The time factor in the formula in Illustration 8-14 expresses the fraction of a year that the note is outstanding. When the maturity date is stated in days, the time factor is often the number of days divided by 360. When counting days, omit the date that the note is issued but include the due date. When the due date is stated in months, the time factor is the number of months divided by 12. Illustration 8-15 shows computation of interest for various time periods.

Illustration 8-15
Computation of interest

Terms of Note	Interest Computation
\$ 730, 12%, 120 days	$\text{Face} \times \text{Rate} \times \text{Time} = \text{Interest}$ $\$ 730 \times 12\% \times \mathbf{120/360} = \$ 29.20$
\$1,000, 9%, 6 months	$\$1,000 \times 9\% \times \mathbf{6/12} = \$ 45.00$
\$2,000, 6%, 1 year	$\$2,000 \times 6\% \times \mathbf{1/1} = \120.00

There are different ways to calculate interest. For example, the computation in Illustration 8-15 assumes 360 days for the length of the year. Most financial instruments use 365 days to compute interest. *For homework problems, assume 360 days to simplify computations.*

Recognizing Notes Receivable

To illustrate the basic entry for notes receivable, we will use Calhoun Company's \$1,000, two-month, 12% promissory note dated May 1. Assuming that Calhoun Company wrote the note to settle an open account, Wilma Company makes the following entry for the receipt of the note.

May 1	Notes Receivable Accounts Receivable—Calhoun Company (To record acceptance of Calhoun Company note)	1,000	1,000
-------	--	-------	-------

A	=	L	+	SE
+1,000				
-1,000				
Cash Flows				
no effect				

The company records the note receivable at its **face value**, the amount shown on the face of the note. No interest revenue is reported when the note is accepted because the revenue recognition principle does not recognize revenue until the performance obligation is satisfied. Interest is earned (accrued) as time passes.

If a company lends money using a note, the entry is a debit to Notes Receivable and a credit to Cash in the amount of the loan.

DO IT! 3 Recognizing Notes Receivable

Gambit Stores accepts from Leonard Co. a \$3,400, 90-day, 6% note dated May 10 in settlement of Leonard's overdue account. (a) What is the maturity date of the note? (b) What is the interest payable at the maturity date?

Solution

(a) The maturity date is August 8, computed as follows.

Term of note:		90 days
May (31–10)	21	
June	30	
July	<u>31</u>	<u>82</u>
Maturity date: August		<u>8</u>

(b) The interest payable at the maturity date is \$51, computed as follows.

Face	×	Rate	×	Time	=	Interest
\$3,400	×	6%	×	90/360	=	\$51

Related exercise material: **BE8-9, BE8-10, BE8-11, E8-10, E8-11, and DO IT! 8-3.**

Action Plan

- ✓ Count the exact number of days to determine the maturity date. Omit the date the note is issued, but include the due date.
- ✓ Compute the accrued interest.

LEARNING OBJECTIVE

4

Describe how companies value notes receivable, record their disposition, and present and analyze receivables.

Valuing Notes Receivable

Valuing short-term notes receivable is the same as valuing accounts receivable. Like accounts receivable, companies report short-term notes receivable at their **cash (net) realizable value**. The notes receivable allowance account is Allowance for Doubtful Accounts. The estimations involved in determining cash realizable value and in recording bad debt expense and the related allowance are done similarly to accounts receivable.

Disposing of Notes Receivable

Notes may be held to their maturity date, at which time the face value plus accrued interest is due. In some situations, the maker of the note defaults, and the payee must make an appropriate adjustment. In other situations, similar to accounts receivable, the holder of the note speeds up the conversion to cash by selling the receivables (as described later in this chapter).

HONOR OF NOTES RECEIVABLE

A note is **honored** when its maker pays in full at its maturity date. For each interest-bearing note, the **amount due at maturity** is the face value of the note plus interest for the length of time specified on the note.

To illustrate, assume that Wolder Co. lends Higley Co. \$10,000 on June 1, accepting a five-month, 9% interest note. In this situation, interest is \$375 ($\$10,000 \times 9\% \times \frac{5}{12}$). The amount due, **the maturity value**, is \$10,375 ($\$10,000 + \375). To obtain payment, Wolder (the payee) must present the note either to Higley Co. (the maker) or to the maker's agent, such as a bank. If Wolder presents the note to Higley Co. on November 1, the maturity date, Wolder's entry to record the collection is as follows.

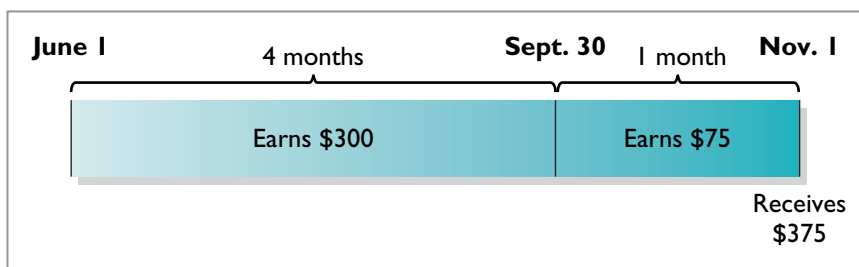

A	=	L	+	SE	
+10,375					
-10,000					
					+375 Rev
Cash Flows					
+10,375					

Nov. 1	Cash Notes Receivable Interest Revenue ($\$10,000 \times 9\% \times \frac{5}{12}$) (To record collection of Higley note and interest)	10,375	10,000 375
--------	--	--------	---------------

ACCRUAL OF INTEREST RECEIVABLE

Suppose instead that Wolder Co. prepares financial statements as of September 30. The timeline in Illustration 8-16 presents this situation.

Illustration 8-16
Timeline of interest earned

To reflect interest earned but not yet received, Wolder must accrue interest on September 30. In this case, the adjusting entry by Wolder is for four months of interest, or \$300, as shown below.

A	=	L	+	SE	
+300					
					+300 Rev
Cash Flows					
no effect					

Sept. 30	Interest Receivable ($\$10,000 \times 9\% \times \frac{4}{12}$) Interest Revenue (To accrue 4 months' interest on Higley note)	300	300
----------	--	-----	-----

At the note's maturity on November 1, Wolder receives \$10,375. This amount represents repayment of the \$10,000 note as well as five months of interest, or \$375, as shown below. The \$375 is comprised of the \$300 Interest Receivable accrued on September 30 plus \$75 earned during October. Wolder's entry to record the honoring of the Higley note on November 1 is as follows.

A	=	L	+	SE	
+10,375					
-10,000					
-300					
					+75 Rev
Cash Flows					
+10,375					

Nov. 1	Cash [$\$10,000 + (\$10,000 \times 9\% \times \frac{5}{12})$] Notes Receivable Interest Receivable Interest Revenue ($\$10,000 \times 9\% \times \frac{1}{12}$) (To record collection of Higley note and interest)	10,375	10,000 300 75
--------	--	--------	---------------------

In this case, Wolder credits Interest Receivable because the receivable was established in the adjusting entry on September 30.

DISHONOR OF NOTES RECEIVABLE

A **dishonored (defaulted) note** is a note that is not paid in full at maturity. A dishonored note receivable is no longer negotiable. However, the payee still has a claim against the maker of the note for both the note and the interest. Therefore, the note holder usually transfers the Notes Receivable account to an Accounts Receivable account.

To illustrate, assume that Higley Co. on November 1 indicates that it cannot pay at the present time. The entry to record the dishonor of the note depends on whether Wolder Co. expects eventual collection. If it does expect eventual collection, Wolder Co. debits the amount due (face value and interest) on the note to Accounts Receivable. It would make the following entry at the time the note is dishonored (assuming no previous accrual of interest).

Nov. 1	Accounts Receivable—Higley Notes Receivable Interest Revenue (To record the dishonor of Higley note)	10,375 10,000 375		10,000 375
--------	---	---------------------------------	--	---------------

A	=	L	+	SE
+10,375				
-10,000				
				+375 Rev

Cash Flows
no effect

If instead on November 1 there is no hope of collection, the note holder would write off the face value of the note by debiting Allowance for Doubtful Accounts. No interest revenue would be recorded because collection will not occur.

SALE OF NOTES RECEIVABLE

The accounting for the sale of notes receivable is recorded similarly to the sale of accounts receivable. The accounting entries for the sale of notes receivable are left for a more advanced course.

Accounting Across the Organization

Countrywide Financial Corporation

© Andy Dean/iStockphoto

Bad Information Can Lead to Bad Loans

Many factors have contributed to the recent credit crisis. One significant factor that resulted in many bad loans was a failure by lenders to investigate loan customers sufficiently. For example, **Countrywide Financial Corporation** wrote many loans under its "Fast and Easy" loan program. That program allowed borrowers to provide little or no documentation for their income or their assets. Other lenders had similar programs, which earned the nickname "liars' loans." One study found that in these situations, 60% of applicants overstated their incomes by more than 50% in order to qualify for a loan. Critics of the banking industry say that because loan officers were compensated for loan volume and because banks were selling the loans to investors rather than holding them, the lenders had little incentive to investigate the borrowers' creditworthiness.

Sources: Glenn R. Simpson and James R. Hagerty, "Countrywide Loss Focuses Attention on Underwriting," *Wall Street Journal* (April 30, 2008), p. B1; and Michael Corkery, "Fraud Seen as Driver in Wave of Foreclosures," *Wall Street Journal* (December 21, 2007), p. A1.

Statement Presentation and Analysis

PRESENTATION

Companies should identify in the balance sheet or in the notes to the financial statements each of the major types of receivables. Short-term receivables appear in the current assets section of the balance sheet. Short-term investments appear

before short-term receivables because these investments are more liquid (nearer to cash). Companies report both the gross amount of receivables and the allowance for doubtful accounts.

In a multiple-step income statement, companies report bad debt expense and service charge expense as selling expenses in the operating expenses section. Interest revenue appears under “Other revenues and gains” in the nonoperating activities section of the income statement.

ANALYSIS

Investors and corporate managers compute financial ratios to evaluate the liquidity of a company’s accounts receivable. They use the **accounts receivable turnover** to assess the liquidity of the receivables. This ratio measures the number of times, on average, the company collects accounts receivable during the period. It is computed by dividing net credit sales (net sales less cash sales) by the average net accounts receivable during the year. Unless seasonal factors are significant, average net accounts receivable outstanding can be computed from the beginning and ending balances of net accounts receivable.

For example, in 2013 **Cisco Systems** had net sales of \$38,029 million for the year. It had a beginning accounts receivable (net) balance of \$4,369 million and an ending accounts receivable (net) balance of \$5,470 million. Assuming that Cisco’s sales were all on credit, its accounts receivable turnover is computed as follows.

Illustration 8-17

Accounts receivable turnover and computation

Net Credit Sales	÷	Average Net Accounts Receivable	=	Accounts Receivable Turnover
\$38,029	÷	$\frac{\$4,369 + \$5,470}{2}$	=	7.7 times

The result indicates an accounts receivable turnover of 7.7 times per year. The higher the turnover, the more liquid the company’s receivables.

A variant of the accounts receivable turnover that makes the liquidity even more evident is its conversion into an **average collection period** in terms of days. This is done by dividing the accounts receivable turnover into 365 days. For example, Cisco’s turnover of 7.7 times is divided into 365 days, as shown in Illustration 8-18, to obtain approximately 47 days. This means that it takes Cisco 47 days to collect its accounts receivable.

Illustration 8-18

Average collection period for receivables formula and computation

Days in Year	÷	Accounts Receivable Turnover	=	Average Collection Period in Days
365 days	÷	7.7 times	=	47 days

Companies frequently use the average collection period to assess the effectiveness of a company’s credit and collection policies. The general rule is that the collection period should not greatly exceed the credit term period (that is, the time allowed for payment).

DO IT! 4 Analysis of Receivables

In 2017, Phil Mickelson Company has net credit sales of \$923,795 for the year. It had a beginning accounts receivable (net) balance of \$38,275 and an ending accounts receivable (net) balance of \$35,988. Compute Phil Mickelson Company's (a) accounts receivable turnover and (b) average collection period in days.

Solution

(a)	Net credit sales	÷	Average net accounts receivable	=	Accounts receivable turnover
	\$923,795	÷	$\frac{\$38,275 + \$35,988}{2}$	=	24.9 times
(b)	Days in year	÷	Accounts receivable turnover	=	Average collection period in days
	365	÷	24.9 times	=	14.7 days

Related exercise material: **BE8-12, E8-14, and DO IT! 8-4.**

Action Plan

- ✓ Review the formula to compute the accounts receivable turnover.
- ✓ Make sure that both the beginning and ending accounts receivable balances are considered in the computation.
- ✓ Review the formula to compute the average collection period in days.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 Explain how companies recognize accounts receivable.** Receivables are frequently classified as (1) accounts, (2) notes, and (3) other. Accounts receivable are amounts customers owe on account. Notes receivable are claims for which lenders issue formal instruments of credit as proof of the debt. Other receivables include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable.

Companies record accounts receivable when they perform a service on account or at the point of sale of merchandise on account. Accounts receivable are reduced by sales returns and allowances. Cash discounts reduce the amount received on accounts receivable. When interest is charged on a past due receivable, the company adds this interest to the accounts receivable balance and recognizes it as interest revenue.

- 2 Describe how companies value accounts receivable and record their disposition.** There are two methods of accounting for uncollectible accounts: the allowance method and the direct write-off method. Companies may use either the percentage-of-sales or the percentage-of-receivables basis to estimate uncollectible accounts using the allowance method. The percentage-of-sales basis emphasizes the expense recognition (matching) principle. The percentage-of-receivables basis emphasizes the cash realizable value of the accounts receivable. An aging schedule is often used with this basis.

When a company collects an account receivable, it credits Accounts Receivable. When a company sells (factors) an account receivable, a service charge expense reduces the amount received.

- 3 Explain how companies recognize notes receivable.** For a note stated in months, the maturity date is found by counting the months from the date of issue. For a note stated in days, the number of days is counted, omitting the issue date and counting the due date. The formula for computing interest is Face value \times Interest rate \times Time.

Companies record notes receivable at face value. In some cases, it is necessary to accrue interest prior to maturity. In this case, companies debit Interest Receivable and credit Interest Revenue.

- 4 Describe how companies value notes receivable, record their disposition, and present and analyze receivables.** As with accounts receivable, companies report notes receivable at their cash (net) realizable value. The notes receivable allowance account is Allowance for Doubtful Accounts. The computation and estimations involved in valuing notes receivable at cash realizable value, and in recording the proper amount of bad debt expense and the related allowance, are similar to those for accounts receivable.
- Notes can be held to maturity. At that time the face value plus accrued interest is due, and the note is removed from the accounts. In many cases, the holder of the note speeds up the conversion by selling the

receivable to another party (a factor). In some situations, the maker of the note dishonors the note (defaults), in which case the company transfers the note and accrued interest to an account receivable or writes off the note.

Companies should identify in the balance sheet or in the notes to the financial statements each major type of receivable. Short-term receivables are considered current assets. Companies report the gross

amount of receivables and the allowance for doubtful accounts. They report bad debt and service charge expenses in the multiple-step income statement as operating (selling) expenses. Interest revenue appears under other revenues and gains in the nonoperating activities section of the statement. Managers and investors evaluate accounts receivable for liquidity by computing a turnover ratio and an average collection period.

GLOSSARY REVIEW

Accounts receivable Amounts owed by customers on account. (p. 358).

Accounts receivable turnover A measure of the liquidity of accounts receivable; computed by dividing net credit sales by average net accounts receivable. (p. 374).

Aging the accounts receivable The analysis of customer balances by the length of time they have been unpaid. (p. 365).

Allowance method A method of accounting for bad debts that involves estimating uncollectible accounts at the end of each period. (p. 361).

Average collection period The average amount of time that a receivable is outstanding; calculated by dividing 365 days by the accounts receivable turnover. (p. 374).

Bad Debt Expense An expense account to record uncollectible receivables. (p. 360).

Cash (net) realizable value The net amount a company expects to receive in cash. (p. 361).

Direct write-off method A method of accounting for bad debts that involves expensing accounts at the time they are determined to be uncollectible. (p. 361).

Dishonored (defaulted) note A note that is not paid in full at maturity. (p. 373).

Factor A finance company or bank that buys receivables from businesses and then collects the payments directly from the customers. (p. 367).

Maker The party in a promissory note who is making the promise to pay. (p. 369).

Notes receivable Written promise (as evidenced by a formal instrument) for amounts to be received. (p. 358).

Other receivables Various forms of nontrade receivables, such as interest receivable and income taxes refundable. (p. 358).

Payee The party to whom payment of a promissory note is to be made. (p. 369).

Percentage-of-receivables basis Management estimates what percentage of receivables will result in losses from uncollectible accounts. (p. 365).

Percentage-of-sales basis Management estimates what percentage of credit sales will be uncollectible. (p. 364).

Promissory note A written promise to pay a specified amount of money on demand or at a definite time. (p. 369).

Receivables Amounts due from individuals and other companies. (p. 358).

Trade receivables Notes and accounts receivable that result from sales transactions. (p. 358).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Receivables are frequently classified as:
 (a) accounts receivable, company receivables, and other receivables.
 (b) accounts receivable, notes receivable, and employee receivables.
 (c) accounts receivable and general receivables.
 (d) accounts receivable, notes receivable, and other receivables.
- (LO 1) 2. Buehler Company on June 15 sells merchandise on account to Chaz Co. for \$1,000, terms 2/10, n/30. On June 20, Chaz Co. returns merchandise worth \$300 to Buehler Company. On June 24, payment is received from Chaz Co. for the balance due. What is the amount of cash received?
 (a) \$700. (c) \$686.
 (b) \$680. (d) None of the above.
- (LO 2) 3. Which of the following approaches for bad debts is best described as a balance sheet method?
 (a) Percentage-of-receivables basis.
 (b) Direct write-off method.
 (c) Percentage-of-sales basis.
 (d) Both percentage-of-receivables basis and direct write-off method.
4. Hughes Company has a credit balance of \$5,000 in its Allowance for Doubtful Accounts before any adjustments are made at the end of the year. Based on review and aging of its accounts receivable at the end of the year, Hughes estimates that \$60,000 of its receivables are uncollectible. The amount of bad debt expense which should be reported for the year is:
 (a) \$5,000. (c) \$60,000.
 (b) \$55,000. (d) \$65,000.
5. Use the same information as in Question 4, except that Hughes has a debit balance of \$5,000 in its Allowance for Doubtful Accounts before any adjustments are made at the end of the year. In this situation, the amount of bad debt expense that should be reported for the year is:
 (a) \$5,000. (c) \$60,000.
 (b) \$55,000. (d) \$65,000.

- (LO 2) 6. Net sales for the month are \$800,000, and bad debts are expected to be 1.5% of net sales. The company uses the percentage-of-sales basis. If Allowance for Doubtful Accounts has a credit balance of \$15,000 before adjustment, what is the balance after adjustment?
 (a) \$15,000. (c) \$23,000.
 (b) \$27,000. (d) \$31,000.
- (LO 2) 7. In 2017, Roso Carlson Company had net credit sales of \$750,000. On January 1, 2017, Allowance for Doubtful Accounts had a credit balance of \$18,000. During 2017, \$30,000 of uncollectible accounts receivable were written off. Past experience indicates that 3% of net credit sales become uncollectible. What should be the adjusted balance of Allowance for Doubtful Accounts at December 31, 2017?
 (a) \$10,050. (c) \$22,500.
 (b) \$10,500. (d) \$40,500.
- (LO 2) 8. An analysis and aging of the accounts receivable of Prince Company at December 31 reveals the following data.
- | | |
|--|-----------|
| Accounts receivable | \$800,000 |
| Allowance for doubtful accounts
per books before adjustment | 50,000 |
| Amounts expected to become
uncollectible | 65,000 |
- The cash realizable value of the accounts receivable at December 31, after adjustment, is:
 (a) \$685,000. (c) \$800,000.
 (b) \$750,000. (d) \$735,000.
- (LO 2) 9. Which of the following statements about Visa credit card sales is **incorrect**?
 (a) The credit card issuer makes the credit investigation of the customer.
 (b) The retailer is not involved in the collection process.
 (c) Two parties are involved.
 (d) The retailer receives cash more quickly than it would from individual customers on account.
- (LO 2) 10. Blinka Retailers accepted \$50,000 of Citibank Visa credit card charges for merchandise sold on July 1. Citibank charges 4% for its credit card use. The entry to record this transaction by Blinka Retailers will include a credit to Sales Revenue of \$50,000 and a debit(s) to:
 (a) Cash \$48,000
 and Service Charge Expense \$2,000
 (b) Accounts Receivable \$48,000
 and Service Charge Expense \$2,000
 (c) Cash \$50,000
 (d) Accounts Receivable \$50,000
11. One of the following statements about promissory notes is incorrect. The **incorrect** statement is:
 (a) The party making the promise to pay is called the maker.
 (b) The party to whom payment is to be made is called the payee.
 (c) A promissory note is not a negotiable instrument.
 (d) A promissory note is often required from high-risk customers.
12. Foti Co. accepts a \$1,000, 3-month, 6% promissory note in settlement of an account with Bartelt Co. The entry to record this transaction is as follows.
 (a) Notes Receivable 1,015
 Accounts Receivable 1,015
 (b) Notes Receivable 1,000
 Accounts Receivable 1,000
 (c) Notes Receivable 1,000
 Sales Revenue 1,000
 (d) Notes Receivable 1,030
 Accounts Receivable 1,030
13. Ginter Co. holds Kolar Inc.'s \$10,000, 120-day, 9% note. The entry made by Ginter Co. when the note is collected, assuming no interest has been previously accrued, is:
 (a) Cash 10,300
 Notes Receivable 10,300
 (b) Cash 10,000
 Notes Receivable 10,000
 (c) Accounts Receivable 10,300
 Notes Receivable 10,000
 Interest Revenue 300
 (d) Cash 10,300
 Notes Receivable 10,000
 Interest Revenue 300
14. Accounts and notes receivable are reported in the current assets section of the balance sheet at:
 (a) cash (net) realizable value.
 (b) net book value.
 (c) lower-of-cost-or-net realizable value.
 (d) invoice cost.
15. Oliveras Company had net credit sales during the year of \$800,000 and cost of goods sold of \$500,000. The balance in accounts receivable at the beginning of the year was \$100,000, and the end of the year it was \$150,000. What were the accounts receivable turnover and the average collection period in days?
 (a) 4.0 and 91.3 days.
 (b) 5.3 and 68.9 days.
 (c) 6.4 and 57 days.
 (d) 8.0 and 45.6 days.

Solutions

1. (d) Receivables are frequently classified as accounts receivable, notes receivable, and other receivables. The other choices are incorrect because receivables are not frequently classified as (a) company receivables, (b) employee receivables, or (c) general receivables.
2. (c) Because payment is received within 10 days of the purchase, the cash received is \$686 $[[\$1,000 - \$300] - [(\$1,000 - \$300) \times 2\%]]$. The other choices are incorrect because (a) \$700 does not consider the 2% discount; (b) the amount of the discount is based upon the amount after the return is granted ($\$700 \times 2\%$), not the amount before the return of merchandise ($\$1,000 \times 2\%$); and (d) there is a correct answer.
3. (a) The percentage-of-receivables basis is a balance sheet method because it emphasizes the cash (net) realizable value of accounts receivable. The other choices are incorrect because (b) the direct write-off method is neither a balance sheet nor an

income statement method for accounting for bad debts, (c) the percentage-of-sales basis is an income statement method because it results in a better matching of expenses with revenues, and (d) only the percentage-of-receivables basis is a balance sheet method, not the direct write-off method.

4. (b) By crediting Allowance for Doubtful Accounts for \$55,000, the new balance will be the required balance of \$60,000. This adjusting entry debits Bad Debt Expense for \$55,000 and credits Allowance for Doubtful Accounts for \$55,000, not (a) \$5,000, (c) \$60,000, or (d) \$65,000.

5. (d) By crediting Allowance for Doubtful Accounts for \$65,000, the new balance will be the required balance of \$60,000. This adjusting entry debits Bad Debt Expense for \$65,000 and credits Allowance for Doubtful Accounts for \$65,000, not (a) \$5,000, (b) \$55,000, or (c) \$60,000.

6. (b) Net sales times the percentage expected to default equals the amount of bad debt expense for the year ($\$800,000 \times 1.5\% = \$12,000$). Because this adjusting entry credits Allowance for Doubtful Accounts, the balance after adjustment is $\$27,000 (\$15,000 + \$12,000)$, not (a) \$15,000, (c) \$23,000, or (d) \$31,000.

7. (b) The accounts written off during the year will result in a \$30,000 debit to Allowance for Doubtful Accounts. The adjusting entry for bad debts will include a \$22,500 credit ($\$750,000 \times 3\%$) to Allowance for Doubtful Accounts. Combining the beginning balance of \$18,000 credit, the \$30,000 debit, and the \$22,500 credit leaves a credit balance of \$10,500 in the allowance account, not (a) \$10,050, (c) \$22,500, or (d) \$40,500.

8. (d) Accounts Receivable less the expected uncollectible amount equals the cash realizable value of \$735,000 ($\$800,000 - \$65,000$), not (a) \$685,000, (b) \$750,000, or (c) \$800,000.

9. (c) There are three parties, not two, involved in Visa credit card sales: the credit card company, the retailer, and the customer. The other choices are true statements.

10. (a) Credit card sales are considered cash sales. Cash is debited \$48,000 for the net amount received ($\$50,000 - \$2,000$ for credit card use fee), and Service Charge Expense is debited \$2,000 for the 4% credit card use fee ($\$50,000 \times 4\%$). The other choices are therefore incorrect.

11. (c) A promissory note is a negotiable instrument. The other choices are true statements.

12. (b) Notes Receivable is recorded at face value (\$1,000). No interest on the note is recorded until it is earned. Accounts Receivable is credited because no new sales have been made. The other choices are therefore incorrect.

13. (d) Cash is debited for its maturity value [$\$10,000 + \text{interest earned } (\$10,000 \times 1/3 \times 9\%)$], Notes Receivable credited for its face value, and Interest Revenue credited for the amount of interest earned. The other choices are therefore incorrect.

14. (a) Accounts Receivable is reported in the current assets section of the balance sheet at the gross amount less the allowance for doubtful accounts, not at (b) net book value, (c) lower-of-cost-or-net realizable value, or (d) invoice cost.

15. (c) The accounts receivable turnover is 6.4 [$\$800,000 / (\$100,000 + \$150,000) / 2$]. The average collection period in days is 57 days ($365 / 6.4$). The other choices are therefore incorrect.

PRACTICE EXERCISES

Journalize entries to record allowance for doubtful accounts using two different bases.

(LO 2)

1. The ledger of J.C. Cobb Company at the end of the current year shows Accounts Receivable \$150,000, Sales Revenue \$850,000, and Sales Returns and Allowances \$30,000.

Instructions

- If J.C. Cobb uses the direct write-off method to account for uncollectible accounts, journalize the adjusting entry at December 31, assuming J.C. Cobb determines that M. Jack's \$1,500 balance is uncollectible.
- If Allowance for Doubtful Accounts has a credit balance of \$2,400 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be (1) 1.5% of net sales, and (2) 10% of accounts receivable.
- If Allowance for Doubtful Accounts has a debit balance of \$200 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be (1) 0.75% of net sales and (2) 6% of accounts receivable.

Solution

1. (a)	Dec. 31	Bad Debt Expense	1,500	
		Accounts Receivable—M. Jack		1,500
(b) (1)	Dec. 31	Bad Debt Expense		
		[($\$850,000 - \$30,000$) \times 1.5%]	12,300	
		Allowance for Doubtful		12,300
		Accounts		
(2)	Dec. 31	Bad Debt Expense	12,600	
		Allowance for Doubtful Accounts		
		[($\$150,000 \times 10\%$) - \$2,400]		12,600

(c) (1) Dec. 31	Bad Debt Expense [($\$850,000 - \$30,000$) \times 0.75%] Allowance for Doubtful Accounts	6,150	6,150
(2) Dec. 31	Bad Debt Expense Allowance for Doubtful Accounts [($\$150,000 \times 6%$) + $\$200$]	9,200	9,200

2. Troope Supply Co. has the following transactions related to notes receivable during the last 3 months of 2017.

- Oct. 1 Loaned \$16,000 cash to Juan Vasquez on a 1-year, 10% note.
 Dec. 11 Sold goods to A. Palmer, Inc., receiving a \$6,750, 90-day, 8% note.
 16 Received a \$6,400, 6-month, 9% note in exchange for J. Nicholas's outstanding accounts receivable.
 31 Accrued interest revenue on all notes receivable.

Journalize entries for notes receivable transactions.

(LO 3, 4)

Instructions

- (a) Journalize the transactions for Troup Supply Co.
 (b) Record the collection of the Vasques note at its maturity in 2018.

Solution

2. (a)	2017		
Oct. 1	Notes Receivable	16,000	16,000
	Cash		
Dec. 11	Notes Receivable	6,750	6,750
	Sales Revenue		
16	Notes Receivable	6,400	6,400
	Accounts Receivable—Nicholas		
31	Interest Receivable	454	454
	Interest Revenue*		
*Calculation of interest revenue:			
	Vasquez's note:	$\$16,000 \times 10\% \times \frac{3}{12} = \400	
	Palmer's note:	$6,750 \times 8\% \times \frac{20}{360} = 30$	
	Nicholas's note:	$6,400 \times 9\% \times \frac{15}{360} = 24$	
	Total accrued interest	<u>\$454</u>	
(b)	2018		
Oct. 1	Cash	17,600	
	Interest Receivable		400
	Interest Revenue**		1,200
	Notes Receivable		16,000
**($\$16,000 \times 10\% \times \frac{9}{12}$)			

PRACTICE PROBLEM

The following selected transactions relate to Dylan Company.

- Mar. 1 Sold \$20,000 of merchandise to Potter Company, terms 2/10, n/30.
 11 Received payment in full from Potter Company for balance due on existing accounts receivable.
 12 Accepted Juno Company's \$20,000, 6-month, 12% note for balance due.
 13 Made Dylan Company credit card sales for \$13,200.
 15 Made Visa credit card sales totaling \$6,700. A 3% service fee is charged by Visa.
 Apr. 11 Sold accounts receivable of \$8,000 to Harcot Factor. Harcot Factor assesses a service charge of 2% of the amount of receivables sold.
 13 Received collections of \$8,200 on Dylan Company credit card sales and added finance charges of 1.5% to the remaining balances.
 May 10 Wrote off as uncollectible \$16,000 of accounts receivable. Dylan uses the percentage-of-sales basis to estimate bad debts.

Prepare entries for various receivables transactions.

(LO 1, 2, 3, 4)

- June 30 Credit sales recorded during the first 6 months total \$2,000,000. The bad debt percentage is 1% of credit sales. At June 30, the balance in the allowance account is \$3,500 before adjustment.
- July 16 One of the accounts receivable written off in May was from J. Simon, who pays the amount due, \$4,000, in full.

Instructions

Prepare the journal entries for the transactions. (Ignore entries for cost of goods sold.)

Solution

Mar.	1	Accounts Receivable—Potter Sales Revenue (To record sales on account)	20,000	20,000
	11	Cash Sales Discounts (2% × \$20,000) Accounts Receivable—Potter (To record collection of accounts receivable)	19,600 400	20,000
	12	Notes Receivable Accounts Receivable—Juno (To record acceptance of Juno Company note)	20,000	20,000
	13	Accounts Receivable Sales Revenue (To record company credit card sales)	13,200	13,200
	15	Cash Service Charge Expense (3% × \$6,700) Sales Revenue (To record credit card sales)	6,499 201	6,700
Apr.	11	Cash Service Charge Expense (2% × \$8,000) Accounts Receivable (To record sale of receivables to factor)	7,840 160	8,000
	13	Cash Accounts Receivable (To record collection of accounts receivable) Accounts Receivable [(\$13,200 – \$8,200) × 1.5%] Interest Revenue (To record interest on amount due)	8,200 75	8,200 75
May	10	Allowance for Doubtful Accounts Accounts Receivable (To record write-off of accounts receivable)	16,000	16,000
June	30	Bad Debt Expense (\$2,000,000 × 1%) Allowance for Doubtful Accounts (To record estimate of uncollectible accounts)	20,000	20,000
July	16	Accounts Receivable—J. Simon Allowance for Doubtful Accounts (To reverse write-off of accounts receivable)	4,000	4,000
		Cash Accounts Receivable—J. Simon (To record collection of accounts receivable)	4,000	4,000

QUESTIONS

- What is the difference between an account receivable and a note receivable?
- What are some common types of receivables other than accounts receivable and notes receivable?
- Texaco Oil Company** issues its own credit cards. Assume that Texaco charges you \$40 interest on an unpaid balance. Prepare the journal entry that Texaco makes to record this revenue.
- What are the essential features of the allowance method of accounting for bad debts?
- Roger Holloway cannot understand why cash realizable value does not decrease when an uncollectible account is written off under the allowance method. Clarify this point for Roger.
- Distinguish between the two bases that may be used in estimating uncollectible accounts.
- Borke Company has a credit balance of \$3,000 in Allowance for Doubtful Accounts. The estimated bad debt expense under the percentage-of-sales basis is \$4,100. The total estimated uncollectibles under the percentage-of-receivables basis is \$5,800. Prepare the adjusting entry under each basis.
- How are bad debts accounted for under the direct write-off method? What are the disadvantages of this method?
- Freida Company accepts both its own credit cards and national credit cards. What are the advantages of accepting both types of cards?
- An article recently appeared in the *Wall Street Journal* indicating that companies are selling their receivables at a record rate. Why are companies selling their receivables?
- Westside Textiles decides to sell \$800,000 of its accounts receivable to First Factors Inc. First Factors assesses a service charge of 3% of the amount of receivables sold. Prepare the journal entry that Westside Textiles makes to record this sale.
- Your roommate is uncertain about the advantages of a promissory note. Compare the advantages of a note receivable with those of an account receivable.
- How may the maturity date of a promissory note be stated?
- Indicate the maturity date of each of the following promissory notes:

Date of Note	Terms
(a) March 13	one year after date of note
(b) May 4	3 months after date
(c) June 20	30 days after date
(d) July 1	60 days after date
- Compute the missing amounts for each of the following notes.

	Principal	Annual Interest Rate	Time	Total Interest
(a)	?	9%	120 days	\$ 450
(b)	\$30,000	10%	3 years	?
(c)	\$60,000	?	5 months	\$1,500
(d)	\$45,000	8%	?	\$1,200
- In determining interest revenue, some financial institutions use 365 days per year and others use 360 days. Why might a financial institution use 360 days?
- Jana Company dishonors a note at maturity. What are the options available to the lender?
- General Motors Corporation** has accounts receivable and notes receivable. How should the receivables be reported on the balance sheet?
- The accounts receivable turnover is 8.14, and average net accounts receivable during the period is \$400,000. What is the amount of net credit sales for the period?
- What percentage does **Apple's** 2013 allowance for doubtful accounts represent as a percentage of its gross receivables?

BRIEF EXERCISES

BE8-1 Presented below are three receivables transactions. Indicate whether these receivables are reported as accounts receivable, notes receivable, or other receivables on a balance sheet.

- Sold merchandise on account for \$64,000 to a customer.
- Received a promissory note of \$57,000 for services performed.
- Advanced \$10,000 to an employee.

Identify different types of receivables.

(LO 1)

BE8-2 Record the following transactions on the books of RAS Co.

- On July 1, RAS Co. sold merchandise on account to Waegelein Inc. for \$17,200, terms 2/10, n/30.
- On July 8, Waegelein Inc. returned merchandise worth \$3,800 to RAS Co.
- On July 11, Waegelein Inc. paid for the merchandise.

Record basic accounts receivable transactions.

(LO 1)

Prepare entry for allowance method and partial balance sheet.

(LO 2, 4)

BE8-3 During its first year of operations, Gavin Company had credit sales of \$3,000,000; \$600,000 remained uncollected at year-end. The credit manager estimates that \$31,000 of these receivables will become uncollectible.

- Prepare the journal entry to record the estimated uncollectibles.
- Prepare the current assets section of the balance sheet for Gavin Company. Assume that in addition to the receivables it has cash of \$90,000, inventory of \$130,000, and prepaid insurance of \$7,500.

Prepare entry for write-off; determine cash realizable value.

(LO 2)

BE8-4 At the end of 2017, Carpenter Co. has accounts receivable of \$700,000 and an allowance for doubtful accounts of \$54,000. On January 24, 2018, the company learns that its receivable from Megan Gray is not collectible, and management authorizes a write-off of \$6,200.

- Prepare the journal entry to record the write-off.
- What is the cash realizable value of the accounts receivable (1) before the write-off and (2) after the write-off?

Prepare entries for collection of bad debt write-off.

(LO 2)

BE8-5 Assume the same information as BE8-4. On March 4, 2018, Carpenter Co. receives payment of \$6,200 in full from Megan Gray. Prepare the journal entries to record this transaction.

Prepare entry using percentage-of-sales method.

(LO 2)

BE8-6 Farr Co. elects to use the percentage-of-sales basis in 2017 to record bad debt expense. It estimates that 2% of net credit sales will become uncollectible. Sales revenues are \$800,000 for 2017, sales returns and allowances are \$40,000, and the allowance for doubtful accounts has a credit balance of \$9,000. Prepare the adjusting entry to record bad debt expense in 2017.

Prepare entry using percentage-of-receivables method.

(LO 2)

BE8-7 Kingston Co. uses the percentage-of-receivables basis to record bad debt expense. It estimates that 1% of accounts receivable will become uncollectible. Accounts receivable are \$420,000 at the end of the year, and the allowance for doubtful accounts has a credit balance of \$1,500.

- Prepare the adjusting journal entry to record bad debt expense for the year.
- If the allowance for doubtful accounts had a debit balance of \$800 instead of a credit balance of \$1,500, determine the amount to be reported for bad debt expense.

Prepare entries to dispose of accounts receivable.

(LO 2)

BE8-8 Presented below are two independent transactions.

- Tony's Restaurant accepted a Visa card in payment of a \$175 lunch bill. The bank charges a 4% fee. What entry should Tony's make?
- Larkin Company sold its accounts receivable of \$60,000. What entry should Larkin make, given a service charge of 3% on the amount of receivables sold?

Compute interest and determine maturity dates on notes.

(LO 3)

BE8-9 Compute interest and find the maturity date for the following notes.

	<u>Date of Note</u>	<u>Principal</u>	<u>Interest Rate (%)</u>	<u>Terms</u>
(a)	June 10	\$80,000	6%	60 days
(b)	July 14	\$64,000	7%	90 days
(c)	April 27	\$12,000	8%	75 days

Determine maturity dates and compute interest and rates on notes.

(LO 3)

BE8-10 Presented below are data on three promissory notes. Determine the missing amounts.

	<u>Date of Note</u>	<u>Terms</u>	<u>Maturity Date</u>	<u>Principal</u>	<u>Annual Interest Rate</u>	<u>Total Interest</u>
(a)	April 1	60 days	?	\$600,000	6%	?
(b)	July 2	30 days	?	90,000	?	\$600
(c)	March 7	6 months	?	120,000	10%	?

Prepare entry for note receivable exchanged for account receivable.

(LO 3)

BE8-11 On January 10, 2017, Perez Co. sold merchandise on account to Robertsen Co. for \$15,600, n/30. On February 9, Robertsen Co. gave Perez Co. a 10% promissory note in settlement of this account. Prepare the journal entry to record the sale and the settlement of the account receivable.

BE8-12 The financial statements of **Minnesota Mining and Manufacturing Company (3M)** report net sales of \$20.0 billion. Accounts receivable (net) are \$2.7 billion at the beginning of the year and \$2.8 billion at the end of the year. Compute 3M's accounts receivable turnover. Compute 3M's average collection period for accounts receivable in days.

Compute ratios to analyze receivables.

(LO 4)

DO IT! Exercises

DO IT! 8-1 On March 1, Lincoln sold merchandise on account to Amelia Company for \$28,000, terms 1/10, net 45. On March 6, Amelia returns merchandise with a sales price of \$1,000. On March 11, Lincoln receives payment from Amelia for the balance due. Prepare journal entries to record the March transactions on Lincoln's books. (You may ignore cost of goods sold entries and explanations.)

Prepare entries to recognize accounts receivable.

(LO 1)

DO IT! 8-2 Gonzalez Company has been in business for several years. At the end of the current year, the ledger shows:

Accounts Receivable	\$ 310,000 Dr.
Sales Revenue	2,200,000 Cr.
Allowance for Doubtful Accounts	6,100 Cr.

Prepare entry for uncollectible accounts.

(LO 2)

Bad debts are estimated to be 5% of accounts receivable. Prepare the entry to adjust Allowance for Doubtful Accounts.

DO IT! 8-3 Gentry Wholesalers accepts from Benton Stores a \$6,200, 4-month, 9% note dated May 31 in settlement of Benton's overdue account. (a) What is the maturity date of the note? (b) What is the interest payable at the maturity date?

Compute maturity date and interest on note.

(LO 3)

DO IT! 8-4 In 2017, Wainwright Company has net credit sales of \$1,300,000 for the year. It had a beginning accounts receivable (net) balance of \$101,000 and an ending accounts receivable (net) balance of \$107,000. Compute Wainwright Company's (a) accounts receivable turnover and (b) average collection period in days.

Compute ratios for receivables.

(LO 4)

EXERCISES

E8-1 Presented below are selected transactions of Molina Company. Molina sells in large quantities to other companies and also sells its product in a small retail outlet.

Journalize entries related to accounts receivable.

- March 1 Sold merchandise on account to Dodson Company for \$5,000, terms 2/10, n/30.
- 3 Dodson Company returned merchandise worth \$500 to Molina.
- 9 Molina collected the amount due from Dodson Company from the March 1 sale.
- 15 Molina sold merchandise for \$400 in its retail outlet. The customer used his Molina credit card.
- 31 Molina added 1.5% monthly interest to the customer's credit card balance.

(LO 1)

Instructions

Prepare journal entries for the transactions above.

E8-2 Presented below are two independent situations.

Journalize entries for recognizing accounts receivable.

- (a) On January 6, Brumbaugh Co. sells merchandise on account to Pryor Inc. for \$7,000, terms 2/10, n/30. On January 16, Pryor Inc. pays the amount due. Prepare the entries on Brumbaugh's books to record the sale and related collection.
- (b) On January 10, Andrew Farley uses his Paltrow Co. credit card to purchase merchandise from Paltrow Co. for \$9,000. On February 10, Farley is billed for the amount due of \$9,000. On February 12, Farley pays \$5,000 on the balance due. On March 10, Farley is billed for the amount due, including interest at 1% per month on the unpaid balance as of February 12. Prepare the entries on Paltrow Co.'s books related to the transactions that occurred on January 10, February 12, and March 10.

(LO 1)

Journalize entries to record allowance for doubtful accounts using two different bases.

(LO 2)

E8-3 The ledger of Costello Company at the end of the current year shows Accounts Receivable \$110,000, Sales Revenue \$840,000, and Sales Returns and Allowances \$20,000.

Instructions

- If Costello uses the direct write-off method to account for uncollectible accounts, journalize the adjusting entry at December 31, assuming Costello determines that L. Dole's \$1,400 balance is uncollectible.
- If Allowance for Doubtful Accounts has a credit balance of \$2,100 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be (1) 1% of net sales, and (2) 10% of accounts receivable.
- If Allowance for Doubtful Accounts has a debit balance of \$200 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be (1) 0.75% of net sales and (2) 6% of accounts receivable.

E8-4 Menge Company has accounts receivable of \$93,100 at March 31. Credit terms are 2/10, n/30. At March 31, Allowance for Doubtful Accounts has a credit balance of \$1,200 prior to adjustment. The company uses the percentage-of-receivables basis for estimating uncollectible accounts. The company's estimate of bad debts is shown below.

<u>Age of Accounts</u>	<u>Balance, March 31</u>	<u>Estimated Percentage Uncollectible</u>
1–30 days	\$60,000	2.0%
31–60 days	17,600	5.0%
61–90 days	8,500	20.0%
Over 90 days	7,000	50.0%
	<u>\$93,100</u>	

Instructions

- Determine the total estimated uncollectibles.
- Prepare the adjusting entry at March 31 to record bad debt expense.

Journalize write-off and recovery.

(LO 2)

E8-5 At December 31, 2016, Finzelberg Company had a credit balance of \$15,000 in Allowance for Doubtful Accounts. During 2017, Finzelberg wrote off accounts totaling \$11,000. One of those accounts (\$1,800) was later collected. At December 31, 2017, an aging schedule indicated that the balance in Allowance for Doubtful Accounts should be \$19,000.

Instructions

Prepare journal entries to record the 2017 transactions of Finzelberg Company.

Journalize percentage-of-sales basis, write-off, recovery.

(LO 2)

E8-6 On December 31, 2017, Ling Co. estimated that 2% of its net sales of \$450,000 will become uncollectible. The company recorded this amount as an addition to Allowance for Doubtful Accounts. On May 11, 2018, Ling Co. determined that the Jeff Shoemaker account was uncollectible and wrote off \$1,100. On June 12, 2018, Shoemaker paid the amount previously written off.

Instructions

Prepare the journal entries on December 31, 2017, May 11, 2018, and June 12, 2018.

Journalize entries for the sale of accounts receivable.

(LO 2)

E8-7 Presented below are two independent situations.

- On March 3, Kitselman Appliances sells \$650,000 of its receivables to Ervay Factors Inc. Ervay Factors assesses a finance charge of 3% of the amount of receivables sold. Prepare the entry on Kitselman Appliances' books to record the sale of the receivables.
- On May 10, Fillmore Company sold merchandise for \$3,000 and accepted the customer's America Bank MasterCard. America Bank charges a 4% service charge for credit card sales. Prepare the entry on Fillmore Company's books to record the sale of merchandise.

E8-8 Presented below are two independent situations.

- (a) On April 2, Jennifer Elston uses her **JCPenney Company** credit card to purchase merchandise from a JCPenney store for \$1,500. On May 1, Elston is billed for the \$1,500 amount due. Elston pays \$500 on the balance due on May 3. Elston receives a bill dated June 1 for the amount due, including interest at 1.0% per month on the unpaid balance as of May 3. Prepare the entries on JCPenney Co.'s books related to the transactions that occurred on April 2, May 3, and June 1.
- (b) On July 4, Spangler's Restaurant accepts a Visa card for a \$200 dinner bill. Visa charges a 2% service fee. Prepare the entry on Spangler's books related to this transaction.

Journalize entries for credit card sales.

(LO 2)

E8-9 Colaw Stores accepts both its own and national credit cards. During the year, the following selected summary transactions occurred.

- Jan. 15 Made Colaw credit card sales totaling \$18,000. (There were no balances prior to January 15.)
- 20 Made Visa credit card sales (service charge fee 2%) totaling \$4,500.
- Feb. 10 Collected \$10,000 on Colaw credit card sales.
- 15 Added finance charges of 1.5% to Colaw credit card account balances.

Journalize credit card sales, and indicate the statement presentation of financing charges and service charge expense.

(LO 2)

Instructions

Journalize the transactions for Colaw Stores.

E8-10 Elburn Supply Co. has the following transactions related to notes receivable during the last 2 months of 2017. The company does not make entries to accrue interest except at December 31.

- Nov. 1 Loaned \$30,000 cash to Manny Lopez on a 12 month, 10% note.
- Dec. 11 Sold goods to Ralph Kremer, Inc., receiving a \$6,750, 90-day, 8% note.
- 16 Received a \$4,000, 180 day, 9% note in exchange for Joe Fernetti's outstanding accounts receivable.
- 31 Accrued interest revenue on all notes receivable.

Journalize entries for notes receivable transactions.

(LO 3)

Instructions

- (a) Journalize the transactions for Elburn Supply Co.
- (b) Record the collection of the Lopez note at its maturity in 2018.

E8-11 Record the following transactions for Redeker Co. in the general journal.

2017

- May 1 Received a \$9,000, 12-month, 10% note in exchange for Mark Chamber's outstanding accounts receivable.
- Dec. 31 Accrued interest on the Chamber note.
- Dec. 31 Closed the interest revenue account.

2018

- May 1 Received principal plus interest on the Chamber note. (No interest has been accrued in 2018.)

Journalize entries for notes receivable.

(LO 3, 4)

E8-12 Vandiver Company had the following select transactions.

- Apr. 1, 2017 Accepted Goodwin Company's 12-month, 12% note in settlement of a \$30,000 account receivable.
- July 1, 2017 Loaned \$25,000 cash to Thomas Slocombe on a 9-month, 10% note.
- Dec. 31, 2017 Accrued interest on all notes receivable.
- Apr. 1, 2018 Received principal plus interest on the Goodwin note.
- Apr. 1, 2018 Thomas Slocombe dishonored its note; Vandiver expects it will eventually collect.

Prepare entries for notes receivable transactions.

(LO 3, 4)

Instructions

Prepare journal entries to record the transactions. Vandiver prepares adjusting entries once a year on December 31.

Journalize entries for dishonor of notes receivable.

(LO 3, 4)

E8-13 On May 2, McLain Company lends \$9,000 to Chang, Inc., issuing a 6-month, 9% note. At the maturity date, November 2, Chang indicates that it cannot pay.

Instructions

- Prepare the entry to record the issuance of the note.
- Prepare the entry to record the dishonor of the note, assuming that McLain Company expects collection will occur.
- Prepare the entry to record the dishonor of the note, assuming that McLain Company does not expect collection in the future.

Compute accounts receivable turnover and average collection period.

(LO 4)

E8-14 Kerwick Company had accounts receivable of \$100,000 on January 1, 2017. The only transactions that affected accounts receivable during 2017 were net credit sales of \$1,000,000, cash collections of \$920,000, and accounts written off of \$30,000.

Instructions

- Compute the ending balance of accounts receivable.
- Compute the accounts receivable turnover for 2017.
- Compute the average collection period in days.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Prepare journal entries related to bad debt expense.

(LO 1, 2, 4)

P8-1A At December 31, 2016, House Co. reported the following information on its balance sheet.

Accounts receivable	\$960,000
Less: Allowance for doubtful accounts	80,000

During 2017, the company had the following transactions related to receivables.

1. Sales on account	\$3,700,000
2. Sales returns and allowances	50,000
3. Collections of accounts receivable	2,810,000
4. Write-offs of accounts receivable deemed uncollectible	90,000
5. Recovery of bad debts previously written off as uncollectible	29,000

Instructions

(b) Accounts receivable
\$1,710,000
ADA \$19,000

(c) Bad debt expense \$96,000

- Prepare the journal entries to record each of these five transactions. Assume that no cash discounts were taken on the collections of accounts receivable.
- Enter the January 1, 2017, balances in Accounts Receivable and Allowance for Doubtful Accounts, post the entries to the two accounts (use T-accounts), and determine the balances.
- Prepare the journal entry to record bad debt expense for 2017, assuming that an aging of accounts receivable indicates that expected bad debts are \$115,000.
- Compute the accounts receivable turnover for 2017, assuming the expected bad debt information provided in (c).

Compute bad debt amounts.

(LO 2)

P8-2A Information related to Mingenback Company for 2017 is summarized below.

Total credit sales	\$2,500,000
Accounts receivable at December 31	875,000
Bad debts written off	33,000

Instructions

- What amount of bad debt expense will Mingenback Company report if it uses the direct write-off method of accounting for bad debts?

- (b) Assume that Mingenback Company estimates its bad debt expense to be 2% of credit sales. What amount of bad debt expense will Mingenback record if it has an Allowance for Doubtful Accounts credit balance of \$4,000?
- (c) Assume that Mingenback Company estimates its bad debt expense based on 6% of accounts receivable. What amount of bad debt expense will Mingenback record if it has an Allowance for Doubtful Accounts credit balance of \$3,000?
- (d) Assume the same facts as in (c), except that there is a \$3,000 debit balance in Allowance for Doubtful Accounts. What amount of bad debt expense will Mingenback record?
- (e)  What is the weakness of the direct write-off method of reporting bad debt expense?

P8-3A Presented below is an aging schedule for Halleran Company.

Journalize entries to record transactions related to bad debts.

(LO 2)

Worksheet.xls							
P18 fx							
	A	B	C	D	E	F	G
1				Number of Days Past Due			
2			Not				
3	Customer	Total	Yet Due	1-30	31-60	61-90	Over 90
4	Anders	\$ 22,000		\$10,000	\$12,000		
5	Blake	40,000	\$ 40,000				
6	Coulson	57,000	16,000	6,000		\$35,000	
7	Deleon	34,000					\$34,000
8	Others	132,000	96,000	16,000	14,000		6,000
9		<u>\$285,000</u>	<u>\$152,000</u>	<u>\$32,000</u>	<u>\$26,000</u>	<u>\$35,000</u>	<u>\$40,000</u>
10	Estimated Percentage Uncollectible		3%	6%	13%	25%	50%
11	Total Estimated Bad Debts	<u>\$ 38,610</u>	<u>\$ 4,560</u>	<u>\$ 1,920</u>	<u>\$ 3,380</u>	<u>\$ 8,750</u>	<u>\$20,000</u>
12							

At December 31, 2017, the unadjusted balance in Allowance for Doubtful Accounts is a credit of \$12,000.

Instructions

- (a) Journalize and post the adjusting entry for bad debts at December 31, 2017.
- (b) Journalize and post to the allowance account the following events and transactions in the year 2018.
 - (1) On March 31, a \$1,000 customer balance originating in 2017 is judged uncollectible.
 - (2) On May 31, a check for \$1,000 is received from the customer whose account was written off as uncollectible on March 31.
- (c) Journalize the adjusting entry for bad debts on December 31, 2018, assuming that the unadjusted balance in Allowance for Doubtful Accounts is a debit of \$800 and the aging schedule indicates that total estimated bad debts will be \$31,600.

(a) Bad debt expense \$26,610

(c) Bad debt expense \$32,400

P8-4A Rigney Inc. uses the allowance method to estimate uncollectible accounts receivable. The company produced the following aging of the accounts receivable at year-end.

Journalize transactions related to bad debts.

(LO 2)

Worksheet.xls							
P18 fx							
	A	B	C	D	E	F	G
1			Number of Days Outstanding				
2							
3		Total	0-30	31-60	61-90	91-120	Over 120
4	Accounts receivable	200,000	77,000	46,000	39,000	23,000	15,000
5	% uncollectible		1%	4%	5%	8%	20%
6	Estimated bad debts						
7							

(a) Tot. est. bad debts \$9,400

Instructions

- Calculate the total estimated bad debts based on the above information.
- Prepare the year-end adjusting journal entry to record the bad debts using the aged uncollectible accounts receivable determined in (a). Assume the current balance in Allowance for Doubtful Accounts is a \$8,000 debit.
- Of the above accounts, \$5,000 is determined to be specifically uncollectible. Prepare the journal entry to write off the uncollectible account.
- The company collects \$5,000 subsequently on a specific account that had previously been determined to be uncollectible in (c). Prepare the journal entry(ies) necessary to restore the account and record the cash collection.
- Comment on how your answers to (a)–(d) would change if Rigney Inc. used 4% of **total** accounts receivable rather than aging the accounts receivable. What are the advantages to the company of aging the accounts receivable rather than applying a percentage to total accounts receivable?

Journalize entries to record transactions related to bad debts.

(LO 2)

P8-5A At December 31, 2017, the trial balance of Darby Company contained the following amounts before adjustment.

	<u>Debit</u>	<u>Credit</u>
Accounts Receivable	\$385,000	
Allowance for Doubtful Accounts		\$ 1,000
Sales Revenue		970,000

Instructions

(b) (2) \$9,700

- Based on the information given, which method of accounting for bad debts is Darby Company using—the direct write-off method or the allowance method? How can you tell?
- Prepare the adjusting entry at December 31, 2017, for bad debt expense under each of the following independent assumptions.
 - An aging schedule indicates that \$11,750 of accounts receivable will be uncollectible.
 - The company estimates that 1% of sales will be uncollectible.
- Repeat part (b) assuming that instead of a credit balance there is a \$1,000 debit balance in Allowance for Doubtful Accounts.
- During the next month, January 2018, a \$3,000 account receivable is written off as uncollectible. Prepare the journal entry to record the write-off.
- Repeat part (d) assuming that Darby uses the direct write-off method instead of the allowance method in accounting for uncollectible accounts receivable.
-  What type of account is Allowance for Doubtful Accounts? How does it affect how accounts receivable is reported on the balance sheet at the end of the accounting period?

Prepare entries for various notes receivable transactions.

(LO 1, 2, 3, 4)

P8-6A Farwell Company closes its books monthly. On September 30, selected ledger account balances are:

Notes Receivable	\$37,000
Interest Receivable	183

Notes Receivable include the following.

<u>Date</u>	<u>Maker</u>	<u>Face</u>	<u>Term</u>	<u>Interest</u>
Aug. 16	K. Goza Inc.	\$12,000	60 days	8%
Aug. 25	Holt Co.	9,000	60 days	7%
Sept. 30	Noblitt Corp.	16,000	6 months	9%

Interest is computed using a 360-day year. During October, the following transactions were completed.

- Oct. 7 Made sales of \$6,900 on Farwell credit cards.
- 12 Made sales of \$900 on MasterCard credit cards. The credit card service charge is 3%.
- 15 Added \$460 to Farwell customer balances for finance charges on unpaid balances.
- 15 Received payment in full from K. Goza Inc. on the amount due.
- 24 Received notice that the Holt note has been dishonored. (Assume that Holt is expected to pay in the future.)

Instructions

- (a) Journalize the October transactions and the October 31 adjusting entry for accrued interest receivable. There was no opening balance in accounts receivable.
- (b) Enter the balances at October 1 in the receivable accounts. Post the entries to all of the receivable accounts.
- (c) Show the balance sheet presentation of the receivable accounts at October 31.

- (b) Accounts receivable
\$16,465
- (c) Total receivables \$32,585

P8-7A On January 1, 2017, Harter Company had Accounts Receivable \$139,000, Notes Receivable \$25,000, and Allowance for Doubtful Accounts \$13,200. The note receivable is from Willingham Company. It is a 4-month, 9% note dated December 31, 2016. Harter Company prepares financial statements annually at December 31. During the year, the following selected transactions occurred.

Prepare entries for various receivable transactions.

(LO 1, 2, 3, 4)

- Jan. 5 Sold \$20,000 of merchandise to Sheldon Company, terms n/15.
20 Accepted Sheldon Company's \$20,000, 3-month, 8% note for balance due.
- Feb. 18 Sold \$8,000 of merchandise to Patwary Company and accepted Patwary's \$8,000, 6-month, 9% note for the amount due.
- Apr. 20 Collected Sheldon Company note in full.
30 Received payment in full from Willingham Company on the amount due.
- May 25 Accepted Potter Inc.'s \$6,000, 3-month, 7% note in settlement of a past-due balance on account.
- Aug. 18 Received payment in full from Patwary Company on note due.
25 The Potter Inc. note was dishonored. Potter Inc. is not bankrupt; future payment is anticipated.
- Sept. 1 Sold \$12,000 of merchandise to Stanbrough Company and accepted a \$12,000, 6-month, 10% note for the amount due.

Instructions

Journalize the transactions.

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEM

CP8 Winter Company's balance sheet at December 31, 2016, is presented below.

WINTER COMPANY			
Balance Sheet			
December 31, 2016			
Cash	\$13,100	Accounts payable	\$ 8,750
Accounts receivable	19,780	Common stock	20,000
Allowance for doubtful accounts	(800)	Retained earnings	12,730
Inventory	9,400		<u>41,480</u>
	<u>\$41,480</u>		<u>\$41,480</u>

During January 2017, the following transactions occurred. Winter uses the perpetual inventory method.

- Jan. 1 Winter accepted a 4-month, 8% note from Merando Company in payment of Merando's \$1,200 account.
 3 Winter wrote off as uncollectible the accounts of Inwood Corporation (\$450) and Goza Company (\$280).
 8 Winter purchased \$17,200 of inventory on account.
 11 Winter sold for \$28,000 on account inventory that cost \$19,600.
 15 Winter sold inventory that cost \$700 to Mark Lauber for \$1,000. Lauber charged this amount on his Visa First Bank card. The service fee charged Winter by First Bank is 3%.
 17 Winter collected \$22,900 from customers on account.
 21 Winter paid \$14,300 on accounts payable.
 24 Winter received payment in full (\$280) from Goza Company on the account written off on January 3.
 27 Winter purchased supplies for \$1,400 cash.
 31 Winter paid other operating expenses, \$3,718.

Adjustment data:

1. Interest is recorded for the month on the note from January 1.
2. Bad debts are expected to be 6% of the January 31, 2017, accounts receivable.
3. A count of supplies on January 31, 2017, reveals that \$560 remains unused.

Instructions

(You may want to set up T-accounts to determine ending balances.)

(b) Totals \$74,765
 (c) Total assets
 \$47,473

- (a) Prepare journal entries for the transactions listed above and adjusting entries. (Include entries for cost of goods sold using the perpetual system.)
- (b) Prepare an adjusted trial balance at January 31, 2017.
- (c) Prepare an income statement and a retained earnings statement for the month ending January 31, 2017, and a balance sheet as of January 31, 2017.

CONTINUING PROBLEM

© leungchopan/
Shutterstock

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 7.)

CC8 One of Natalie's friends, Curtis Lesperance, runs a coffee shop where he sells specialty coffees and prepares and sells muffins and cookies. He is eager to buy one of Natalie's fine European mixers, which would enable him to make larger batches of muffins and cookies. However, Curtis cannot afford to pay for the mixer for at least 30 days. He asks Natalie if she would be willing to sell him the mixer on credit. Natalie comes to you for advice.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: RLF Company

BYP8-1 RLF Company sells office equipment and supplies to many organizations in the city and surrounding area on contract terms of 2/10, n/30. In the past, over 75% of the credit customers have taken advantage of the discount by paying within 10 days of the invoice date.

The number of customers taking the full 30 days to pay has increased within the last year. Current indications are that less than 60% of the customers are now taking the discount. Bad debts as a percentage of gross credit sales have risen from the 2.5% provided in past years to about 4.5% in the current year.

The company's Finance Committee has requested more information on the collections of accounts receivable. The controller responded to this request with the report reproduced below.

RLF COMPANY
Accounts Receivable Collections
May 31, 2017

The fact that some credit accounts will prove uncollectible is normal. Annual bad debt write-offs have been 2.5% of gross credit sales over the past 5 years. During the last fiscal year, this percentage increased to slightly less than 4.5%. The current Accounts Receivable balance is \$1,400,000. The condition of this balance in terms of age and probability of collection is as follows.

<u>Proportion of Total</u>	<u>Age Categories</u>	<u>Probability of Collection</u>
60%	not yet due	98%
22%	less than 30 days past due	96%
9%	30 to 60 days past due	94%
5%	61 to 120 days past due	91%
2½%	121 to 180 days past due	75%
1½%	over 180 days past due	30%

Allowance for Doubtful Accounts had a credit balance of \$29,500 on June 1, 2016. RLF has provided for a monthly bad debt expense accrual during the current fiscal year based on the assumption that 4.5% of gross credit sales will be uncollectible. Total gross credit sales for the 2016–2017 fiscal year amounted to \$2,900,000. Write-offs of bad accounts during the year totaled \$102,000.

Instructions

- (a) Prepare an accounts receivable aging schedule for RLF Company using the age categories identified in the controller's report to the Finance Committee showing the following.
 - (1) The amount of accounts receivable outstanding for each age category and in total.
 - (2) The estimated amount that is uncollectible for each category and in total.
- (b) Compute the amount of the year-end adjustment necessary to bring Allowance for Doubtful Accounts to the balance indicated by the age analysis. Then prepare the necessary journal entry to adjust the accounting records.
- (c) In a recessionary environment with tight credit and high interest rates:
 - (1) Identify steps RLF Company might consider to improve the accounts receivable situation.
 - (2) Then evaluate each step identified in terms of the risks and costs involved.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP8-2 PepsiCo, Inc.'s financial statements are presented in Appendix B. Financial statements of The Coca-Cola Company are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- (a) Based on the information in these financial statements, compute the following 2013 ratios for each company. (Assume all sales are credit sales and that PepsiCo's receivables on its balance sheet are all trade receivables.)
 - (1) Accounts receivable turnover.
 - (2) Average collection period for receivables.
- (b) What conclusions about managing accounts receivable can you draw from these data?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP8-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of Wal-Mart Stores, Inc. are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- (a) Based on the information in these financial statements, compute the following ratios for each company (for the most recent year shown). (Assume all sales are credit sales.)
- (1) Accounts receivable turnover.
 - (2) Average collection period for receivables.
- (b) What conclusions about managing accounts receivable can you draw from these data?

Real-World Focus

BYP8-4 Purpose: To learn more about factoring.

Address: www.comcapfactoring.com, or go to www.wiley.com/college/weygandt

Steps: Go to the website, click on **Invoice Factoring**, and answer the following questions.

- (a) What are some of the benefits of factoring?
- (b) What is the range of the percentages of the typical discount rate?
- (c) If a company factors its receivables, what percentage of the value of the receivables can it expect to receive from the factor in the form of cash, and how quickly will it receive the cash?

CRITICAL THINKING**Decision-Making Across the Organization**

BYP8-5 Carol and Sam Foyle own Campus Fashions. From its inception, Campus Fashions has sold merchandise on either a cash or credit basis, but no credit cards have been accepted. During the past several months, the Foyles have begun to question their sales policies. First, they have lost some sales because of refusing to accept credit cards. Second, representatives of two metropolitan banks have been persuasive in almost convincing them to accept their national credit cards. One bank, City National Bank, has stated that its credit card fee is 4%.

The Foyles decide that they should determine the cost of carrying their own credit sales. From the accounting records of the past 3 years, they accumulate the following data.

	<u>2018</u>	<u>2017</u>	<u>2016</u>
Net credit sales	\$500,000	\$550,000	\$400,000
Collection agency fees for slow-paying customers	2,450	2,500	2,300
Salary of part-time accounts receivable clerk	4,100	4,100	4,100

Uncollectible account expense is 1.6% for net credit sales, billing and mailing costs 0.5%, and credit investigation fee on new customers is 0.15%.

Carol and Sam also determine that the average accounts receivable balance outstanding during the year is 5% of net credit sales. The Foyles estimate that they could earn an average of 8% annually on cash invested in other business opportunities.

Instructions

With the class divided into groups, answer the following.

- (a) Prepare a table showing, for each year, total credit and collection expenses in dollars and as a percentage of net credit sales.
- (b) Determine the net credit and collection expense in dollars and as a percentage of sales after considering the revenue not earned from other investment opportunities.
- (c) Discuss both the financial and nonfinancial factors that are relevant to the decision.

Communication Activity

BYP8-6 Jill Epp, a friend of yours, overheard a discussion at work about changes her employer wants to make in accounting for uncollectible accounts. Jill knows little about accounting, and she asks you to help make sense of what she heard. Specifically, she asks you to explain the differences between the percentage-of-sales, percentage-of-receivables, and the direct write-off methods for uncollectible accounts.

Instructions

In a letter of one page (or less), explain to Jill the three methods of accounting for uncollectibles. Be sure to discuss differences among these methods.

Ethics Case

BYP8-7 The controller of Diaz Co. believes that the yearly allowance for doubtful accounts for Diaz Co. should be 2% of net credit sales. The president of Diaz Co., nervous that the stockholders might expect the company to sustain its 10% growth rate, suggests that the controller increase the allowance for doubtful accounts to 4%. The president thinks that the lower net income, which reflects a 6% growth rate, will be a more sustainable rate for Diaz Co.

Instructions

- Who are the stakeholders in this case?
- Does the president's request pose an ethical dilemma for the controller?
- Should the controller be concerned with Diaz Co.'s growth rate? Explain your answer.

All About You

BYP8-8 Credit card usage in the United States is substantial. Many startup companies use credit cards as a way to help meet short-term financial needs. The most common forms of debt for startups are use of credit cards and loans from relatives.

Suppose that you start up Brothers Sandwich Shop. You invested your savings of \$20,000 and borrowed \$70,000 from your relatives. Although sales in the first few months are good, you see that you may not have sufficient cash to pay expenses and maintain your inventory at acceptable levels, at least in the short term. You decide you may need to use one or more credit cards to fund the possible cash shortfall.

Instructions

- Go to the Internet and find two sources that provide insight into how to compare credit card terms.
- Develop a list, in descending order of importance, as to what features are most important to you in selecting a credit card for your business.
- Examine the features of your present credit card. (If you do not have a credit card, select a likely one online for this exercise.) Given your analysis above, what are the three major disadvantages of your present credit card?

FASB Codification Activity

BYP8-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- How are receivables defined in the Codification?
- What are the conditions under which losses from uncollectible receivables (Bad Debt Expense) should be reported?

A Look at IFRS

LEARNING
OBJECTIVE

5

Compare the accounting for receivables under GAAP and IFRS.

The basic accounting and reporting issues related to the recognition, measurement, and disposition of receivables are essentially the same between IFRS and GAAP.

Key Points

Following are the key similarities and differences between GAAP and IFRS related to the accounting for receivables.

Similarities

- The recording of receivables, recognition of sales returns and allowances and sales discounts, and the allowance method to record bad debts are the same between GAAP and IFRS.
- Both IFRS and GAAP often use the term impairment to indicate that a receivable or a percentage of receivables may not be collected.
- The FASB and IASB have worked to implement fair value measurement (the amount they currently could be sold for) for financial instruments, such as receivables. Both Boards have faced bitter opposition from various factions.

Differences

- Although IFRS implies that receivables with different characteristics should be reported separately, there is no standard that mandates this segregation.
- IFRS and GAAP differ in the criteria used to determine how to record a factoring transaction. IFRS uses a combination approach focused on risks and rewards and loss of control. GAAP uses loss of control as the primary criterion. In addition, IFRS permits partial derecognition of receivables; GAAP does not.

Looking to the Future

The question of recording fair values for financial instruments will continue to be an important issue to resolve as the Boards work toward convergence. Both the IASB and the FASB have indicated that they believe that financial statements would be more transparent and understandable if companies recorded and reported all financial instruments at fair value. That said, in *IFRS 9*, which was issued in 2009, the IASB created a split model, where some financial instruments are recorded at fair value, but other financial assets, such as loans and receivables, can be accounted for at amortized cost if certain criteria are met. Critics say that this can result in two companies with identical securities accounting for those securities in different ways. A proposal by the FASB would require that practically all equity instruments be reported at fair value, and that debt instruments may or may not be reported at fair value depending on whether certain criteria are met.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following statements is **false**?
 - (a) Receivables include equity securities purchased by the company.
 - (b) Receivables include credit card receivables.
 - (c) Receivables include amounts owed by employees as a result of company loans to employees.
 - (d) Receivables include amounts resulting from transactions with customers.
2. In recording a factoring transaction:
 - (a) IFRS focuses on loss of control.
 - (b) GAAP focuses on loss of control and risks and rewards.
 - (c) IFRS and GAAP allow partial derecognition.
 - (d) IFRS allows partial derecognition.
3. Under IFRS:
 - (a) the entry to record estimated uncollected accounts is the same as GAAP.
 - (b) it is always acceptable to use the direct write-off method.
 - (c) all financial instruments are recorded at fair value.
 - (d) None of the above.

International Financial Reporting Problem: Louis Vuitton

IFRS8-1 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Use the company's annual report to answer the following questions.

- (a) What is the accounting policy related to accounting for trade accounts receivable?
- (b) According to the notes to the financial statements, what accounted for the difference between gross trade accounts receivable and net accounts receivable?
- (c) According to the notes to the financial statements, what was the major reason why the balance in receivables increased relative to the previous year?
- (d) Using information in the notes to the financial statements, determine what percentage the provision for impairment of receivables was as a percentage of total trade receivables for 2013 and 2012. How did the ratio change from 2012 to 2013, and what does this suggest about the company's receivables?

Answers to IFRS Self-Test Questions

1. a 2. d 3. a

Plant Assets, Natural Resources, and Intangible Assets

CHAPTER PREVIEW The accounting for long-term assets has important implications for a company's reported results. In this chapter, we explain the application of the historical cost principle of accounting to property, plant, and equipment, such as **Rent-A-Wreck** vehicles, as well as to natural resources and intangible assets, such as the "Rent-A-Wreck" trademark. We also describe the methods that companies may use to allocate an asset's cost over its useful life. In addition, we discuss the accounting for expenditures incurred during the useful life of assets, such as the cost of replacing tires and brake pads on rental cars.

FEATURE STORY

How Much for a Ride to the Beach?

It's spring break. Your plane has landed, you've finally found your bags, and you're dying to hit the beach—but first you need a "vehicular unit" to get you there. As you turn away from baggage claim, you see a long row of rental agency booths. Many are names that you know—**Hertz**, **Avis**, and **Budget**. But a booth at the far end catches your eye—**Rent-A-Wreck**. Now there's a company making a clear statement!

Any company that relies on equipment to generate revenues must make decisions about what kind of equipment to buy, how long to keep it, and how vigorously to maintain it. Rent-A-Wreck has decided to rent used rather than new cars and trucks. It rents these vehicles across the United States, Europe, and Asia. While the big-name agencies push vehicles with that "new car smell," Rent-A-Wreck competes on price.

Rent-A-Wreck's message is simple: Rent a used car and save some cash. It's not a message that appeals to everyone.

If you're a marketing executive wanting to impress a big client, you probably don't want to pull up in a Rent-A-Wreck car. But if you want to get from point A to point B for the minimum cash per mile, then Rent-A-Wreck is playing your tune. The company's message seems to be getting across to the right clientele. Revenues have increased significantly.

When you rent a car from Rent-A-Wreck, you are renting from an independent businessperson. This owner has paid a "franchise fee" for the right to use the Rent-A-Wreck name. In order to gain a franchise, he or she must meet financial and other criteria, and must agree to run the rental agency according to rules prescribed by Rent-A-Wreck. Some of these rules require that each franchise maintain its cars in a reasonable fashion. This ensures that, though you won't be cruising down Daytona Beach's Atlantic Avenue in a Mercedes convertible, you can be reasonably assured that you won't be calling a towtruck.

5

Asset Turnover

Go to the **REVIEW AND PRACTICE** section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit **WileyPLUS with ORION** for additional tutorials and practice opportunities.

Explain the accounting for plant asset expenditures.

Plant assets are resources that have three characteristics. They have a physical substance (a definite size and shape), are used in the operations of a business, and are not intended for sale to customers. They are also called **property, plant, and equipment**; **plant and equipment**; and **fixed assets**. These assets are expected to be of use to the company for a number of years. Except for land, plant assets decline in service potential over their useful lives.

Because plant assets play a key role in ongoing operations, companies keep plant assets in good operating condition. They also replace worn-out or outdated plant assets, and expand productive resources as needed. Many companies have substantial investments in plant assets. Illustration 9-1 shows the percentages of plant assets in relation to total assets of companies in a number of industries.

Illustration 9-1

Percentages of plant assets in relation to total assets

Determining the Cost of Plant Assets

The historical cost principle requires that companies record plant assets at cost. Thus, **Rent-A-Wreck** records its vehicles at cost. **Cost consists of all expenditures necessary to acquire the asset and make it ready for its intended use.** For example, the cost of factory machinery includes the purchase price, freight costs paid by the purchaser, and installation costs. Once cost is established, the company uses that amount as the basis of accounting for the plant asset over its useful life.

In the following sections, we explain the application of the historical cost principle to each of the major classes of plant assets.

LAND

Companies often use **land** as a building site for a manufacturing plant or office building. The cost of land includes (1) the cash purchase price, (2) closing costs such as title and attorney's fees, (3) real estate brokers' commissions, and (4) accrued property taxes and other liens assumed by the purchaser. For example, if the cash price is \$50,000 and the purchaser agrees to pay accrued taxes of \$5,000, the cost of the land is \$55,000.

Companies record as debits (increases) to the Land account all necessary costs incurred to make land **ready for its intended use**. When a company acquires vacant land, these costs include expenditures for clearing, draining, filling, and grading. Sometimes the land has a building on it that must be removed before construction of a new building. In this case, the company debits to the Land account all demolition and removal costs, less any proceeds from salvaged materials.

Helpful Hint

Management's intended use is important in applying the historical cost principle.

To illustrate, assume that Hayes Company acquires real estate at a cash cost of \$100,000. The property contains an old warehouse that is razed at a net cost of \$6,000 (\$7,500 in costs less \$1,500 proceeds from salvaged materials). Additional expenditures are the attorney's fee, \$1,000, and the real estate broker's commission, \$8,000. The cost of the land is \$115,000, computed as shown in Illustration 9-2.

<u>Land</u>	
Cash price of property	\$ 100,000
Net removal cost of warehouse (\$7,500 – \$1,500)	6,000
Attorney's fee	1,000
Real estate broker's commission	8,000
Cost of land	<u>\$115,000</u>

Illustration 9-2

Computation of cost of land

Hayes makes the following entry to record the acquisition of the land.

Land	115,000	
Cash		115,000
(To record purchase of land)		

A	=	L	+	SE
+115,000				
-115,000				
<hr/>				
Cash Flows				
-115,000				

LAND IMPROVEMENTS

Land improvements are structural additions made to land. Examples are driveways, parking lots, fences, landscaping, and underground sprinklers. The cost of land improvements includes all expenditures necessary to make the improvements ready for their intended use. For example, the cost of a new parking lot for **Home Depot** includes the amount paid for paving, fencing, and lighting. Thus, Home Depot debits to Land Improvements the total of all of these costs.

Land improvements have limited useful lives. Even when well-maintained, they will eventually need to be replaced. As a result, companies expense (depreciate) the cost of land improvements over their useful lives.

BUILDINGS

Buildings are facilities used in operations, such as stores, offices, factories, warehouses, and airplane hangars. Companies debit to the Buildings account all necessary expenditures related to the purchase or construction of a building. When a building is **purchased**, such costs include the purchase price, closing costs (attorney's fee, title insurance, etc.), and the real estate broker's commission. Costs to make the building ready for its intended use include expenditures for remodeling and replacing or repairing the roof, floors, electrical wiring, and plumbing. When a new building is **constructed**, cost consists of the contract price plus payments for architects' fees, building permits, and excavation costs.

In addition, companies charge certain interest costs to the Buildings account. Interest costs incurred to finance the project are included in the cost of the building when a significant period of time is required to get the building ready for use. In these circumstances, interest costs are considered as necessary as materials and labor. However, the inclusion of interest costs in the cost of a constructed building is **limited to the construction period**. When construction has been completed, the company records subsequent interest payments on funds borrowed to finance the construction as debits (increases) to Interest Expense.

EQUIPMENT

Equipment includes assets used in operations, such as store check-out counters, office furniture, factory machinery, delivery trucks, and airplanes. The cost of equipment, such as **Rent-A-Wreck** vehicles, consists of the cash purchase price, sales taxes, freight charges, and insurance during transit paid by the purchaser. It also includes expenditures required in assembling, installing, and testing the unit. However, Rent-A-Wreck does not include motor vehicle licenses and accident insurance on company vehicles in the cost of equipment. These costs

represent annual recurring expenditures and do not benefit future periods. Thus, they are treated as **expenses** as they are incurred.

To illustrate, assume Merten Company purchases factory machinery at a cash price of \$50,000. Related expenditures are for sales taxes \$3,000, insurance during shipping \$500, and installation and testing \$1,000. The cost of the factory machinery is \$54,500, as computed in Illustration 9-3.

Illustration 9-3

Computation of cost of factory machinery

<u>Factory Machinery</u>	
Cash price	\$ 50,000
Sales taxes	3,000
Insurance during shipping	500
Installation and testing	<u>1,000</u>
Cost of factory machinery	<u>\$54,500</u>

Merten makes the following summary entry to record the purchase and related expenditures.

A	=	L	+	SE
+54,500				
-54,500				
Cash Flows				
-54,500				

Equipment	54,500	
Cash		54,500

(To record purchase of factory machinery)

For another example, assume that Lenard Company purchases a delivery truck at a cash price of \$22,000. Related expenditures consist of sales taxes \$1,320, painting and lettering \$500, motor vehicle license \$80, and a three-year accident insurance policy \$1,600. The cost of the delivery truck is \$23,820, computed as follows.

Illustration 9-4

Computation of cost of delivery truck

<u>Delivery Truck</u>	
Cash price	\$ 22,000
Sales taxes	1,320
Painting and lettering	<u>500</u>
Cost of delivery truck	<u>\$23,820</u>

Lenard treats the cost of the motor vehicle license as an expense and the cost of the insurance policy as a prepaid asset. Thus, Lenard makes the following entry to record the purchase of the truck and related expenditures:

A	=	L	+	SE
+23,820				
+ 1,600				-80 Exp
-25,500				
Cash Flows				
-25,500				

Equipment	23,820	
License Expense	80	
Prepaid Insurance	1,600	
Cash		25,500

(To record purchase of delivery truck and related expenditures)

Expenditures During Useful Life

During the useful life of a plant asset, a company may incur costs for ordinary repairs, additions, or improvements. **Ordinary repairs** are expenditures to **maintain** the operating efficiency and productive life of the unit. They usually are small amounts that occur frequently. Examples are motor tune-ups and oil changes, the painting of buildings, and the replacing of worn-out gears on machinery. Companies record such repairs as debits to Maintenance and Repairs Expense as they are incurred. Because they are immediately charged as an expense against revenues, these costs are often referred to as **revenue expenditures**.

In contrast, **additions and improvements** are costs incurred to **increase** the operating efficiency, productive capacity, or useful life of a plant asset. They are

usually material in amount and occur infrequently. Additions and improvements increase the company's investment in productive facilities. Companies generally debit these amounts to the plant asset affected. They are often referred to as **capital expenditures**.

Companies must use good judgment in deciding between a revenue expenditure and capital expenditure. For example, assume that Rodriguez Co. purchases a number of wastepaper baskets. The proper accounting would appear to be to capitalize and then depreciate these wastepaper baskets over their useful lives. However, Rodriguez will generally expense these wastepaper baskets immediately. This practice is justified on the basis of **materiality**. Materiality refers to the impact of an item's size on a company's financial operations. The **materiality concept** states that if an item would not make a difference in decision-making, the company does not have to follow GAAP in reporting that item.

ANATOMY OF A FRAUD

Bernie Ebbers was the founder and CEO of the phone company **WorldCom**. The company engaged in a series of increasingly large, debt-financed acquisitions of other companies. These acquisitions made the company grow quickly, which made the stock price increase dramatically. However, because the acquired companies all had different accounting systems, WorldCom's financial records were a mess. When WorldCom's performance started to flatten out, Bernie coerced WorldCom's accountants to engage in a number of fraudulent activities to make net income look better than it really was and thus prop up the stock price. One of these frauds involved treating \$7 billion of line costs as capital expenditures. The line costs, which were rental fees paid to other phone companies to use their phone lines, had always been properly expensed in previous years. Capitalization delayed expense recognition to future periods and thus boosted current-period profits.

Total take: \$7 billion

THE MISSING CONTROLS

Documentation procedures. The company's accounting system was a disorganized collection of non-integrated systems, which resulted from a series of corporate acquisitions. Top management took advantage of this disorganization to conceal its fraudulent activities.

Independent internal verification. A fraud of this size should have been detected by a routine comparison of the actual physical assets with the list of physical assets shown in the accounting records.

Accounting Across the Organization

© Brian Raisbeck/iStockphoto

Many U.S. Firms Use Leases

Leasing is big business for U.S. companies. For example, business investment in equipment in a recent year totaled \$800 billion. Leasing accounted for about 33% of all business investment (\$264 billion).

Who does the most leasing? Interestingly, major banks such as **Continental Bank**, **J.P. Morgan Leasing**, and **US**

Bancorp Equipment Finance are the major lessors. Also, many companies have established separate leasing companies, such as **Boeing Capital Corporation**, **Dell Financial Services**, and **John Deere Capital Corporation**. And, as an excellent example of the magnitude of leasing, leased planes account for nearly 40% of the U.S. fleet of commercial airlines. Leasing is also becoming more common in the hotel industry. **Marriott**, **Hilton**, and **InterContinental** are increasingly choosing to lease hotels that are owned by someone else.

Why might airline managers choose to lease rather than purchase their planes? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!**1****Cost of Plant Assets**

Assume that Drummond Heating and Cooling Co. purchases a delivery truck for \$15,000 cash, plus sales taxes of \$900 and delivery costs of \$500. The buyer also pays \$200 for painting and lettering, \$600 for an annual insurance policy, and \$80 for a motor vehicle license. Explain how each of these costs would be accounted for.

Action Plan

- ✓ Identify expenditures made in order to get delivery equipment ready for its intended use.
- ✓ Treat operating costs as expenses.

Solution

The first four payments (\$15,000, \$900, \$500, and \$200) are expenditures necessary to make the truck ready for its intended use. Thus, the cost of the truck is \$16,600. The payments for insurance and the license are operating costs and therefore are expensed.

LEARNING OBJECTIVE**2****Apply depreciation methods to plant assets.**

As explained in Chapter 3, **depreciation is the process of allocating to expense the cost of a plant asset over its useful (service) life in a rational and systematic manner.** Cost allocation enables companies to properly match expenses with revenues in accordance with the expense recognition principle, as shown in Illustration 9-5.

Illustration 9-5

Depreciation as a cost allocation concept

**ETHICS NOTE**

When a business is acquired, proper allocation of the purchase price to various asset classes is important since different depreciation treatments can materially affect income. For example, buildings are depreciated, but land is not.

It is important to understand that **depreciation is a process of cost allocation. It is not a process of asset valuation.** No attempt is made to measure the change in an asset's fair value during ownership. So, the **book value** (cost less accumulated depreciation) of a plant asset may be quite different from its fair value. In fact, if an asset is fully depreciated, it can have a zero book value but still have a fair value.

Depreciation applies to three classes of plant assets: land improvements, buildings, and equipment. Each asset in these classes is considered to be a **depreciable asset**. Why? Because the usefulness to the company and revenue-producing ability of each asset will decline over the asset's useful life. Depreciation **does not apply to land** because its usefulness and revenue-producing ability generally remain intact over time. In fact, in many cases, the usefulness of land is greater over time because of the scarcity of good land sites. Thus, **land is not a depreciable asset.**

During a depreciable asset's useful life, its revenue-producing ability declines because of **wear and tear**. A delivery truck that has been driven 100,000 miles will be less useful to a company than one driven only 800 miles.

Revenue-producing ability may also decline because of obsolescence. **Obsolescence** is the process of becoming out of date before the asset physically

wears out. For example, major airlines moved from Chicago's Midway Airport to Chicago-O'Hare International Airport because Midway's runways were too short for jumbo jets. Similarly, many companies replace their computers long before they originally planned to do so because technological improvements make the old computers obsolete.

Recognizing depreciation on an asset does not result in an accumulation of cash for replacement of the asset. The balance in Accumulated Depreciation represents the total amount of the asset's cost that the company has charged to expense. It is not a cash fund.

Note that the concept of depreciation is consistent with the going concern assumption. The **going concern assumption** states that the company will continue in operation for the foreseeable future. If a company does not use a going concern assumption, then plant assets should be stated at their fair value. In that case, depreciation of these assets is not needed.

Factors in Computing Depreciation

Three factors affect the computation of depreciation, as shown in Illustration 9-6.

Illustration 9-6

Three factors in computing depreciation

Helpful Hint

Depreciation expense is reported on the income statement. Accumulated depreciation is reported on the balance sheet as a deduction from plant assets.

- 1. Cost.** Earlier, we explained the issues affecting the cost of a depreciable asset. Recall that companies record plant assets at cost, in accordance with the historical cost principle.
- 2. Useful life.** **Useful life** is an estimate of the expected productive life, also called service life, of the asset for its owner. Useful life may be expressed in terms of time, units of activity (such as machine hours), or units of output. Useful life is an estimate. In making the estimate, management considers such factors as the intended use of the asset, its expected repair and maintenance, and its vulnerability to obsolescence. Past experience with similar assets is often helpful in deciding on expected useful life. We might reasonably expect **Rent-A-Wreck** and **Avis** to use different estimated useful lives for their vehicles.
- 3. Salvage value.** **Salvage value** is an estimate of the asset's value at the end of its useful life. This value may be based on the asset's worth as scrap or on its expected trade-in value. Like useful life, salvage value is an estimate. In making the estimate, management considers how it plans to dispose of the asset and its experience with similar assets.

Alternative Terminology

Another term sometimes used for salvage value is *residual value*.

Depreciation Methods

Depreciation is generally computed using one of the following methods:

1. Straight-line
2. Units-of-activity
3. Declining-balance

Each method is acceptable under generally accepted accounting principles. Management selects the method(s) it believes to be appropriate. The objective is

to select the method that best measures an asset’s contribution to revenue over its useful life. Once a company chooses a method, it should apply it consistently over the useful life of the asset. Consistency enhances the comparability of financial statements. Depreciation affects the balance sheet through accumulated depreciation and the income statement through depreciation expense.

We will compare the three depreciation methods using the following data for a small delivery truck purchased by Barb’s Florists on January 1, 2017.

Illustration 9-7
Delivery truck data

Cost	\$ 13,000
Expected salvage value	\$ 1,000
Estimated useful life in years	5
Estimated useful life in miles	100,000

Illustration 9-8
Use of depreciation methods in large U.S. companies

Illustration 9-8 (in the margin) shows the use of the primary depreciation methods in a sample of the largest companies in the United States. No matter what method is used, the total amount depreciated over the useful life of the asset is its depreciable cost. **Depreciable cost** is equal to the cost of the asset less its salvage value.

STRAIGHT-LINE METHOD

Under the **straight-line method**, companies expense the same amount of depreciation for each year of the asset’s useful life. It is measured solely by the passage of time.

To compute depreciation expense under the straight-line method, companies need to determine depreciable cost. As indicated above, depreciable cost is the cost of the asset less its salvage value. It represents the total amount subject to depreciation. Under the straight-line method, to determine annual depreciation expense, we divide depreciable cost by the asset’s useful life. Illustration 9-9 shows the computation of the first year’s depreciation expense for Barb’s Florists.

Illustration 9-9
Formula for straight-line method

Cost	–	Salvage Value	=	Depreciable Cost
\$13,000	–	\$1,000	=	\$12,000
↓				
Depreciable Cost	÷	Useful Life (in years)	=	Annual Depreciation Expense
\$12,000	÷	5	=	\$2,400

Alternatively, we also can compute an annual **rate** of depreciation. In this case, the rate is 20% (100% ÷ 5 years). When a company uses an annual straight-line rate, it applies the percentage rate to the depreciable cost of the asset. Illustration 9-10 shows a **depreciation schedule** using an annual rate.

Illustration 9-10
Straight-line depreciation schedule

BARB’S FLORISTS					
Year	Computation		Annual Depreciation Expense	End of Year	
	Depreciable Cost	× Depreciation Rate		Accumulated Depreciation	Book Value
2017	\$12,000	× 20%	\$2,400	\$ 2,400	\$10,600*
2018	12,000	× 20	2,400	4,800	8,200
2019	12,000	× 20	2,400	7,200	5,800
2020	12,000	× 20	2,400	9,600	3,400
2021	12,000	× 20	2,400	12,000	1,000

*Book value = Cost – Accumulated depreciation = (\$13,000 – \$2,400).

Note that the depreciation expense of \$2,400 is the same each year. The book value (computed as cost minus accumulated depreciation) at the end of the useful life is equal to the expected \$1,000 salvage value.

What happens to these computations for an asset purchased **during** the year, rather than on January 1? In that case, it is necessary to **prorate the annual depreciation** on a time basis. If Barb's Florists had purchased the delivery truck on April 1, 2017, the company would own the truck for nine months of the first year (April–December). Thus, depreciation for 2017 would be \$1,800 ($\$12,000 \times 20\% \times 9/12$ of a year).

The straight-line method predominates in practice. Such large companies as **Campbell Soup**, **Marriott**, and **General Mills** use the straight-line method. It is simple to apply, and it matches expenses with revenues when the use of the asset is reasonably uniform throughout the service life.

DO IT! 2a Straight-Line Depreciation

On January 1, 2017, Iron Mountain Ski Corporation purchased a new snow-grooming machine for \$50,000. The machine is estimated to have a 10-year life with a \$2,000 salvage value. What journal entry would Iron Mountain Ski Corporation make at December 31, 2017, if it uses the straight-line method of depreciation?

Solution

$$\text{Depreciation expense} = \frac{\text{Cost} - \text{Salvage value}}{\text{Useful life}} = \frac{\$50,000 - \$2,000}{10} = \$4,800$$

The entry to record the first year's depreciation would be:

Dec. 31	Depreciation Expense	4,800		
	Accumulated Depreciation—Equipment		4,800	
	(To record annual depreciation on snow-grooming machine)			

Action Plan

- ✓ Calculate depreciable cost (Cost – Salvage value).
- ✓ Divide the depreciable cost by the asset's estimated useful life.

Related exercise material: **BE9-4**, **BE9-5**, **E9-4**, and **DO IT! 9-2a**.

UNITS-OF-ACTIVITY METHOD

Under the **units-of-activity method**, useful life is expressed in terms of the total units of production or use expected from the asset, rather than as a time period. The units-of-activity method is ideally suited to factory machinery. Manufacturing companies can measure production in units of output or in machine hours. This method can also be used for such assets as delivery equipment (miles driven) and airplanes (hours in use). The units-of-activity method is generally not suitable for buildings or furniture because depreciation for these assets is more a function of time than of use.

To use this method, companies estimate the total units of activity for the entire useful life, and then divide these units into depreciable cost. The resulting number represents the depreciable cost per unit. The depreciable cost per unit is then applied to the units of activity during the year to determine the annual depreciation expense.

To illustrate, assume that Barb's Florists drives its delivery truck 15,000 miles in the first year. Illustration 9-11 (page 406) shows the units-of-activity formula and the computation of the first year's depreciation expense.

Alternative Terminology

Another term often used is the *units-of-production method*.

Helpful Hint

Under any method, depreciation stops when the asset's book value equals expected salvage value.

Illustration 9-11

Formula for units-of-activity method

Depreciable Cost	÷	Total Units of Activity	=	Depreciable Cost per Unit
\$12,000	÷	100,000 miles	=	\$0.12
↓				
Depreciable Cost per Unit	×	Units of Activity during the Year	=	Annual Depreciation Expense
\$0.12	×	15,000 miles	=	\$1,800

The units-of-activity depreciation schedule, using assumed mileage, is as follows.

Illustration 9-12

Units-of-activity depreciation schedule

BARB'S FLORISTS						
Year	Computation		=	Annual Depreciation Expense	End of Year	
	Units of Activity	× Depreciable Cost/Unit			Accumulated Depreciation	Book Value
2017	15,000	× \$0.12		\$1,800	\$ 1,800	\$11,200*
2018	30,000	× 0.12		3,600	5,400	7,600
2019	20,000	× 0.12		2,400	7,800	5,200
2020	25,000	× 0.12		3,000	10,800	2,200
2021	10,000	× 0.12		1,200	12,000	1,000
*(\$13,000 - \$1,800).						

This method is easy to apply for assets purchased mid-year. In such a case, the company computes the depreciation using the productivity of the asset for the partial year.

The units-of-activity method is not nearly as popular as the straight-line method (see Illustration 9-8, page 404) primarily because it is often difficult for companies to reasonably estimate total activity. However, some very large companies, such as **Chevron** and **Boise Cascade** (a forestry company), do use this method. When the productivity of an asset varies significantly from one period to another, the units-of-activity method results in the best matching of expenses with revenues.

DECLINING-BALANCE METHOD

The **declining-balance method** produces a decreasing annual depreciation expense over the asset's useful life. The method is so named because the periodic depreciation is based on a **declining book value** (cost less accumulated depreciation) of the asset. With this method, companies compute annual depreciation expense by multiplying the book value at the beginning of the year by the declining-balance depreciation rate. **The depreciation rate remains constant from year to year, but the book value to which the rate is applied declines each year.**

At the beginning of the first year, book value is the cost of the asset. This is because the balance in accumulated depreciation at the beginning of the asset's useful life is zero. In subsequent years, book value is the difference between cost and accumulated depreciation to date. Unlike the other depreciation methods, the declining-balance method **ignores salvage value in determining the amount to which the declining-balance rate is applied.** Salvage value, however, does limit the total depreciation that can be taken. Depreciation stops when the asset's book value equals expected salvage value.

A common declining-balance rate is double the straight-line rate. The method is often called the **double-declining-balance method**. If Barb's Florists uses the double-declining-balance method, it uses a depreciation rate of 40% ($2 \times$ the straight-line rate of 20%). Illustration 9-13 shows the declining-balance formula and the computation of the first year's depreciation on the delivery truck.

Book Value at Beginning of Year	×	Declining- Balance Rate	=	Annual Depreciation Expense
\$13,000	×	40%	=	\$5,200

Illustration 9-13

Formula for declining-balance method

The depreciation schedule under this method is as follows.

BARB'S FLORISTS						
Year	Computation		=	Annual Depreciation Expense	End of Year	
	Book Value Beginning of Year	× Depreciation Rate			Accumulated Depreciation	Book Value
2017	\$13,000	40%		\$5,200	\$ 5,200	\$7,800
2018	7,800	40		3,120	8,320	4,680
2019	4,680	40		1,872	10,192	2,808
2020	2,808	40		1,123	11,315	1,685
2021	1,685	40		685*	12,000	1,000

*Computation of \$674 ($\$1,685 \times 40\%$) is adjusted to \$685 in order for book value to equal salvage value.

Illustration 9-14

Double-declining-balance depreciation schedule

The delivery equipment is 69% depreciated ($\$8,320 \div \$12,000$) at the end of the second year. Under the straight-line method, the truck would be depreciated 40% ($\$4,800 \div \$12,000$) at that time. Because the declining-balance method produces higher depreciation expense in the early years than in the later years, it is considered an **accelerated-depreciation method**. The declining-balance method is compatible with the expense recognition principle. It matches the higher depreciation expense in early years with the higher benefits received in these years. It also recognizes lower depreciation expense in later years, when the asset's contribution to revenue is less. Some assets lose usefulness rapidly because of obsolescence. In these cases, the declining-balance method provides the most appropriate depreciation amount.

When a company purchases an asset during the year, it must prorate the first year's declining-balance depreciation on a time basis. For example, if Barb's Florists had purchased the truck on April 1, 2017, depreciation for 2017 would become \$3,900 ($\$13,000 \times 40\% \times 9/12$). The book value at the beginning of 2018 is then \$9,100 ($\$13,000 - \$3,900$), and the 2018 depreciation is \$3,640 ($\$9,100 \times 40\%$). Subsequent computations would follow from those amounts.

COMPARISON OF METHODS

Illustration 9-15 compares annual and total depreciation expense under each of the three methods for Barb's Florists.

Year	Straight- Line	Units-of- Activity	Declining- Balance
2017	\$ 2,400	\$ 1,800	\$ 5,200
2018	2,400	3,600	3,120
2019	2,400	2,400	1,872
2020	2,400	3,000	1,123
2021	2,400	1,200	685
	\$12,000	\$12,000	\$12,000

Illustration 9-15

Comparison of depreciation methods

Helpful Hint

The method recommended for an asset that is expected to be significantly more productive in the first half of its useful life is the declining-balance method.

Annual depreciation varies considerably among the methods, but **total depreciation expense is the same (\$12,000) for the five-year period** under all three methods. Each method is acceptable in accounting because each recognizes in a rational and systematic manner the decline in service potential of the asset. Illustration 9-16 graphs the depreciation expense pattern under each method.

Illustration 9-16
Patterns of depreciation

Depreciation and Income Taxes

The Internal Revenue Service (IRS) allows taxpayers to deduct depreciation expense when they compute taxable income. However, the IRS does not require taxpayers to use the same depreciation method on the tax return that is used in preparing financial statements.

Many corporations use straight-line in their financial statements to maximize net income. At the same time, they use a special accelerated-depreciation method on their tax returns to minimize their income taxes. Taxpayers must use on their tax returns either the straight-line method or a special accelerated-depreciation method called the **Modified Accelerated Cost Recovery System (MACRS)**.

Revising Periodic Depreciation

Depreciation is one example of the use of estimation in the accounting process. Management should periodically review annual depreciation expense. If wear and tear or obsolescence indicate that annual depreciation estimates are inadequate or excessive, the company should change the amount of depreciation expense.

When a change in an estimate is required, the company makes the change in **current and future years. It does not change depreciation in prior periods.** The rationale is that continual restatement of prior periods would adversely affect confidence in financial statements.

To determine the new annual depreciation expense, the company first computes the asset's depreciable cost at the time of the revision. It then allocates the revised depreciable cost to the remaining useful life.

To illustrate, assume that Barb's Florists decides on January 1, 2020, to extend the useful life of the truck by one year (a total life of six years) and increase its salvage value to \$2,200. The company has used the straight-line method to depreciate the asset to date. Depreciation per year was \$2,400 $[(\$13,000 - \$1,000) \div 5]$. Accumulated depreciation after three years (2017–2019) is \$7,200 $(\$2,400 \times 3)$, and book value is \$5,800 $(\$13,000 - \$7,200)$. The new annual depreciation is \$1,200, computed as shown in Illustration 9-17.

Helpful Hint

Use a step-by-step approach: (1) determine new depreciable cost; (2) divide by remaining useful life.

Book value, 1/1/20	\$ 5,800
Less: Salvage value	<u>2,200</u>
Depreciable cost	\$ 3,600
Remaining useful life	<u>3 years</u> (2020–2022)
Revised annual depreciation (\$3,600 ÷ 3)	<u>\$ 1,200</u>

Illustration 9-17
Revised depreciation
computation

Barb's Florists makes no entry for the change in estimate. On December 31, 2020, during the preparation of adjusting entries, it records depreciation expense of \$1,200. Companies must describe in the financial statements significant changes in estimates.

DO IT! 2b Revised Depreciation

Chambers Corporation purchased a piece of equipment for \$36,000. It estimated a 6-year life and \$6,000 salvage value. Thus, straight-line depreciation was \$5,000 per year $[(\$36,000 - \$6,000) \div 6]$. At the end of year three (before the depreciation adjustment), it estimated the new total life to be 10 years and the new salvage value to be \$2,000. Compute the revised depreciation.

Solution

Original depreciation expense = $[(\$36,000 - \$6,000) \div 6] = \$5,000$

Accumulated depreciation after 2 years = $2 \times \$5,000 = \$10,000$

Book value = $\$36,000 - \$10,000 = \$26,000$

Book value after 2 years of depreciation	\$ 26,000
Less: New salvage value	<u>2,000</u>
Depreciable cost	\$ 24,000
Remaining useful life	<u>8 years</u>
Revised annual depreciation ($\$24,000 \div 8$)	<u>\$ 3,000</u>

Action Plan

- ✓ Calculate depreciable cost.
- ✓ Divide depreciable cost by new remaining life.

LEARNING OBJECTIVE

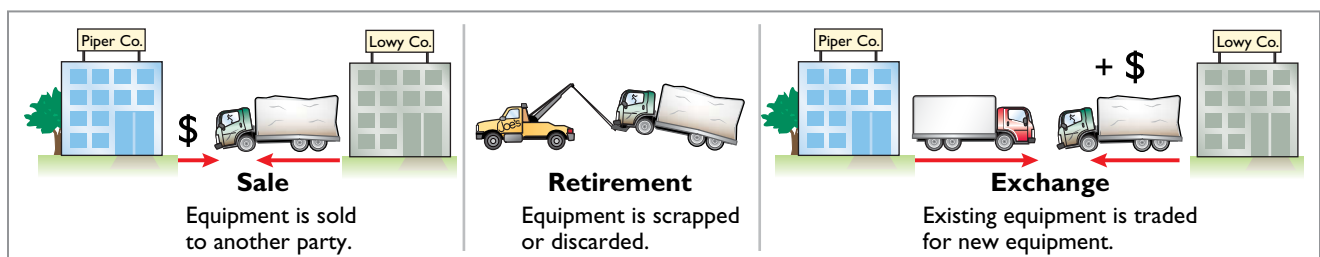

3

Explain how to account for the disposal of plant assets.

Companies dispose of plant assets that are no longer useful to them. Illustration 9-18 shows the three ways in which companies make plant asset disposals.

Illustration 9-18

Methods of plant asset disposal

Whatever the disposal method, the company must determine the book value of the plant asset at the disposal date to determine the gain or loss. Recall that the book value is the difference between the cost of the plant asset and the accumulated depreciation to date. If the disposal does not occur on the first day of the year, the company must record depreciation for the fraction of the year to the date of disposal. The company then eliminates the book value by reducing (debiting) Accumulated Depreciation for the total depreciation associated with that asset to the date of disposal and reducing (crediting) the asset account for the cost of the asset.

In this chapter, we examine the accounting for the retirement and sale of plant assets. In the appendix to the chapter, we discuss and illustrate the accounting for exchanges of plant assets.

Retirement of Plant Assets

To illustrate the retirement of plant assets, assume that Hobart Company retires its computer printers, which cost \$32,000. The accumulated depreciation on these printers is \$32,000. The equipment, therefore, is fully depreciated (zero book value). The entry to record this retirement is as follows.

A	=	L	+	SE
+32,000				
-32,000				
<hr/>				
Cash Flows				
no effect				

Accumulated Depreciation—Equipment	32,000		
Equipment			32,000
(To record retirement of fully depreciated equipment)			

What happens if a fully depreciated plant asset is still useful to the company? In this case, the asset and its accumulated depreciation continue to be reported on the balance sheet, without further depreciation adjustment, until the company retires the asset. Reporting the asset and related accumulated depreciation on the balance sheet informs the financial statement reader that the asset is still in use. Once fully depreciated, no additional depreciation should be taken, even if an asset is still being used. In no situation can the accumulated depreciation on a plant asset exceed its cost.

If a company retires a plant asset before it is fully depreciated and no cash is received for scrap or salvage value, a loss on disposal occurs. For example, assume that Sunset Company discards delivery equipment that cost \$18,000 and has accumulated depreciation of \$14,000. The entry is as follows.

A	=	L	+	SE
+14,000				
		-4,000 Exp		
-18,000				
<hr/>				
Cash Flows				
no effect				

Accumulated Depreciation—Equipment	14,000		
Loss on Disposal of Plant Assets			4,000
Equipment			18,000
(To record retirement of delivery equipment at a loss)			

Companies report a loss on disposal of plant assets in the “Other expenses and losses” section of the income statement.

Sale of Plant Assets

In a disposal by sale, the company compares the book value of the asset with the proceeds received from the sale. If the proceeds of the sale **exceed** the book value of the plant asset, **a gain on disposal occurs**. If the proceeds of the sale **are less than** the book value of the plant asset sold, **a loss on disposal occurs**.

Only by coincidence will the book value and the fair value of the asset be the same when the asset is sold. Gains and losses on sales of plant assets are therefore quite common. For example, **Delta Airlines** reported a \$94,343,000 gain on the sale of five **Boeing** B727-200 aircraft and five **Lockheed** L-1011-1 aircraft.

GAIN ON SALE

To illustrate a gain on sale of plant assets, assume that on July 1, 2017, Wright Company sells office furniture for \$16,000 cash. The office furniture originally

cost \$60,000. As of January 1, 2017, it had accumulated depreciation of \$41,000. Depreciation for the first six months of 2017 is \$8,000. Wright records depreciation expense and updates accumulated depreciation to July 1 with the following entry.

July 1	Depreciation Expense	8,000	
	Accumulated Depreciation—Equipment		8,000
	(To record depreciation expense for the first 6 months of 2017)		

A	=	L	+	SE
				-8,000 Exp
				-8,000
Cash Flows				
no effect				

After the accumulated depreciation balance is updated, the company computes the gain or loss. The gain or loss is the difference between the proceeds from the sale and the book value at the date of disposal. Illustration 9-19 shows this computation for Wright Company, which has a gain on disposal of \$5,000.

Cost of office furniture	\$60,000
Less: Accumulated depreciation (\$41,000 + \$8,000)	49,000
Book value at date of disposal	11,000
Proceeds from sale	16,000
Gain on disposal of plant asset	\$ 5,000

Illustration 9-19
Computation of gain on disposal

Wright records the sale and the gain on disposal of the plant asset as follows.

July 1	Cash	16,000	
	Accumulated Depreciation—Equipment	49,000	
	Equipment		60,000
	Gain on Disposal of Plant Assets		5,000
	(To record sale of office furniture at a gain)		

A	=	L	+	SE
+16,000				
+49,000				
-60,000				
				+5,000 Rev
Cash Flows				
+16,000 				

Companies report a gain on disposal of plant assets in the “Other revenues and gains” section of the income statement.

LOSS ON SALE

Assume that instead of selling the office furniture for \$16,000, Wright sells it for \$9,000. In this case, Wright computes a loss of \$2,000 as follows.

Cost of office furniture	\$60,000
Less: Accumulated depreciation	49,000
Book value at date of disposal	11,000
Proceeds from sale	9,000
Loss on disposal of plant asset	\$ 2,000

Illustration 9-20
Computation of loss on disposal

Wright records the sale and the loss on disposal of the plant asset as follows.

July 1	Cash	9,000	
	Accumulated Depreciation—Equipment	49,000	
	Loss on Disposal of Plant Assets	2,000	
	Equipment		60,000
	(To record sale of office furniture at a loss)		

A	=	L	+	SE
+ 9,000				
+49,000				
				-2,000 Exp
				-60,000
Cash Flows				
+9,000 				

Companies report a loss on disposal of plant assets in the “Other expenses and losses” section of the income statement.

DO IT!

3

Plant Asset Disposal

Overland Trucking has an old truck that cost \$30,000, and it has accumulated depreciation of \$16,000 on this truck. Overland has decided to sell the truck. (a) What entry would Overland Trucking make to record the sale of the truck for \$17,000 cash? (b) What entry would Overland Trucking make to record the sale of the truck for \$10,000 cash?

Solution

Action Plan

- ✓ At the time of disposal, determine the book value of the asset.
- ✓ Compare the asset's book value with the proceeds received to determine whether a gain or loss has occurred.

(a) Sale of truck for cash at a gain:

Cash	17,000		
Accumulated Depreciation—Equipment	16,000		
Equipment			30,000
Gain on Disposal of Plant Assets [\$17,000 – (\$30,000 – \$16,000)] (To record sale of truck at a gain)			3,000

(b) Sale of truck for cash at a loss:

Cash	10,000		
Accumulated Depreciation—Equipment	16,000		
Loss on Disposal of Plant Assets [\$10,000 – (\$30,000 – \$16,000)] Equipment (To record sale of truck at a loss)			30,000
	4,000

LEARNING
OBJECTIVE

4

Describe how to account for natural resources and intangible assets.

Natural Resources

Natural resources consist of standing timber and underground deposits of oil, gas, and minerals. These long-lived productive assets have two distinguishing characteristics: (1) they are physically extracted in operations (such as mining, cutting, or pumping), and (2) they are replaceable only by an act of nature.

The acquisition cost of a natural resource is the price needed to acquire the resource **and** prepare it for its intended use. For an already-discovered resource, such as an existing coal mine, cost is the price paid for the property.

Depletion

The allocation of the cost of natural resources in a rational and systematic manner over the resource's useful life is called **depletion**. (That is, depletion is to natural resources as depreciation is to plant assets.) **Companies generally use the units-of-activity method** (learned earlier in the chapter) **to compute depletion**. The reason is that **depletion generally is a function of the units extracted during the year**.

Under the units-of-activity method, companies divide the total cost of the natural resource minus salvage value by the number of units estimated to be in the resource. The result is a **depletion cost per unit**. To compute depletion, the cost per unit is then multiplied by the number of units extracted.

To illustrate, assume that Lane Coal Company invests \$5 million in a mine estimated to have 1 million tons of coal and no salvage value. Illustration 9-21 shows the computation of the depletion cost per unit.

Helpful Hint

On a balance sheet, natural resources may be described more specifically as *timberlands, mineral deposits, oil reserves*, and so on.

$\frac{\text{Total Cost – Salvage Value}}{\text{Total Estimated Units Available}} = \text{Depletion Cost per Unit}$
$\frac{\$5,000,000}{1,000,000} = \5.00 per ton

Illustration 9-21
Computation of depletion cost per unit

If Lane extracts 250,000 tons in the first year, then the depletion for the year is \$1,250,000 (250,000 tons × \$5). It records the depletion as follows.

Inventory (coal)	1,250,000	
Accumulated Depletion		1,250,000

A	=	L	+	SE
+1,250,000				
–1,250,000				

Cash Flows
no effect

Lane debits Inventory for the total depletion for the year and credits Accumulated Depletion to reduce the carrying value of the natural resource. Accumulated Depletion is a contra asset similar to Accumulated Depreciation. Lane credits Inventory when it sells the inventory and debits Cost of Goods Sold. The amount not sold remains in inventory and is reported in the current assets section of the balance sheet.

Some companies do not use an Accumulated Depletion account. In such cases, the company credits the amount of depletion directly to the natural resources account.

Sustainability Report Please

Sustainability reports identify how the company is meeting its corporate social responsibilities. Many companies, both large and small, are now issuing these reports. For example, companies such as Disney, Best Buy, Microsoft, Ford, and ConocoPhillips issue these

reports. Presented below is an adapted section of a recent BHP Billiton (a global mining, oil, and gas company) sustainability report on its environmental policies. These policies are to (1) take action to address the challenges of climate change, (2) set and achieve targets that reduce pollution, and (3) enhance biodiversity by assessing and considering ecological values and land-use aspects. Here is how BHP Billiton measures the success or failure of some of these policies:

Environment	Commentary	Target Date
We will maintain total greenhouse gas emissions below FY2006 levels.	FY2013 greenhouse gas emissions were lower than the FY2006 baseline.	30 June 2017
All operations to offset impacts to biodiversity and the related benefits derived from ecosystems.	Land and Biodiversity Management Plans were developed at all our operations.	Annual
We will finance the conservation and continuing management of areas of high biodiversity and ecosystem value.	Two projects of international conservation significance were established—the Five Rivers Conservation Project, in Australia, and the Valdivian Coastal Reserve Conservation Project, in Chile.	30 June 2017

In addition to the environment, BHP Billiton has sections in its sustainability report which discuss people, safety, health, and community.

Why do you believe companies issue sustainability reports? (Go to WileyPLUS for this answer and additional questions.)

Intangible Assets

Intangible assets are rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance. Evidence of intangibles may exist in the form of contracts or licenses. Intangibles may arise from the following sources:

1. Government grants, such as patents, copyrights, licenses, trademarks, and trade names.
2. Acquisition of another business, in which the purchase price includes a payment for **goodwill**.
3. Private monopolistic arrangements arising from contractual agreements, such as franchises and leases.

Some widely known intangibles are **Microsoft's** patents, **McDonald's** franchises, **Apple's** trade name iPod, J.K. Rowling's copyrights on the *Harry Potter* books, and the trademark **Rent-A-Wreck** in the Feature Story.

Accounting for Intangible Assets

Companies record intangible assets at cost. This cost consists of all expenditures necessary for the company to acquire the right, privilege, or competitive advantage. Intangibles are categorized as having either a limited life or an indefinite life. If an intangible has a **limited life**, the company allocates its cost over the asset's useful life using a process similar to depreciation. The process of allocating the cost of intangibles is referred to as **amortization**. The cost of intangible assets with **indefinite lives should not be amortized**.

To record amortization of an intangible asset, a company increases (debits) Amortization Expense and decreases (credits) the specific intangible asset. (Unlike depreciation, no contra account, such as Accumulated Amortization, is usually used.)

Intangible assets are typically amortized on a straight-line basis. For example, the legal life of a patent is 20 years. Companies **amortize the cost of a patent over its 20-year life or its useful life, whichever is shorter**. To illustrate the computation of patent amortization, assume that National Labs purchases a patent at a cost of \$60,000. If National estimates the useful life of the patent to be eight years, the annual amortization expense is \$7,500 ($\$60,000 \div 8$). National records the annual amortization as follows.

A	=	L	+	SE
-7,500		-7,500 Exp		
Cash Flows				
no effect				

Dec. 31	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="border-right: 1px solid black; padding: 5px;">Amortization Expense</td> <td style="padding: 5px;">7,500</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;"> Patents</td> <td style="padding: 5px;">7,500</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;"> (To record patent amortization)</td> <td></td> </tr> </table>	Amortization Expense	7,500	Patents	7,500	(To record patent amortization)		
Amortization Expense	7,500							
Patents	7,500							
(To record patent amortization)								

Companies classify Amortization Expense as an operating expense in the income statement.

There is a difference between intangible assets and plant assets in determining cost. For plant assets, cost includes both the purchase price of the asset and the costs incurred in designing and constructing the asset. In contrast, the initial cost for an intangible asset includes **only the purchase price**. Companies expense any costs incurred in developing an intangible asset.

PATENTS

A **patent** is an exclusive right issued by the U.S. Patent Office that enables the recipient to manufacture, sell, or otherwise control an invention for a period of 20 years from the date of the grant. A patent is nonrenewable. But, companies can extend the legal life of a patent by obtaining new patents for improvements or other changes in the basic design. **The initial cost of a patent is the cash or cash equivalent price paid to acquire the patent.**

The saying, "A patent is only as good as the money you're prepared to spend defending it," is very true. Many patents are subject to litigation by competitors.

Any legal costs an owner incurs in successfully defending a patent in an infringement suit are considered necessary to establish the patent's validity. **The owner adds those costs to the Patents account and amortizes them over the remaining life of the patent.**

The patent holder amortizes the cost of a patent over its 20-year legal life or its useful life, whichever is shorter. Companies consider obsolescence and inadequacy in determining useful life. These factors may cause a patent to become economically ineffective before the end of its legal life.

COPYRIGHTS

The federal government grants **copyrights**, which give the owner the exclusive right to reproduce and sell an artistic or published work. Copyrights extend for the life of the creator plus 70 years. The cost of a copyright is the **cost of acquiring and defending it**. The cost may be only the small fee paid to the U.S. Copyright Office. Or, it may amount to much more if an infringement suit is involved.

The useful life of a copyright generally is significantly shorter than its legal life. Therefore, copyrights usually are amortized over a relatively short period of time.

TRADEMARKS AND TRADE NAMES

A **trademark** or **trade name** is a word, phrase, jingle, or symbol that identifies a particular enterprise or product. Trade names like Wheaties, Monopoly, Big Mac, Kleenex, Coca-Cola, and Jeep create immediate product identification. They also generally enhance the sale of the product. The creator or original user may obtain exclusive legal right to the trademark or trade name by registering it with the U.S. Patent Office. Such registration provides 20 years of protection. The registration may be renewed indefinitely as long as the trademark or trade name is in use.

If a company purchases the trademark or trade name, its cost is the purchase price. If a company develops and maintains the trademark or trade name, any costs related to these activities are expensed as incurred. Because trademarks and trade names have indefinite lives, they are not amortized.

FRANCHISES

When you fill up your tank at the corner **Shell** station, eat lunch at **Subway**, or rent a car from **Rent-A-Wreck**, you are dealing with franchises. A **franchise** is a contractual arrangement between a franchisor and a franchisee. The franchisor grants the franchisee the right to sell certain products, perform specific services, or use certain trademarks or trade names, usually within a designated geographic area.

Another type of franchise is a **license**. A license granted by a governmental body permits a company to use public property in performing its services. Examples are the use of city streets for a bus line or taxi service, the use of public land for telephone and electric lines, and the use of airwaves for radio or TV broadcasting. In a recent license agreement, **FOX**, **CBS**, and **NBC** agreed to pay \$27.9 billion for the right to broadcast **NFL** football games over an eight-year period. Franchises and licenses may be granted for a definite period of time, an indefinite period, or perpetually.

When a company incurs costs in connection with the purchase of a franchise or license, it should recognize an intangible asset. Companies should amortize the cost of a limited-life franchise (or license) over its useful life. If the life is indefinite, the cost is not amortized. Annual payments made under a franchise agreement are recorded as **operating expenses** in the period in which they are incurred.

GOODWILL

Usually, the largest intangible asset that appears on a company's balance sheet is goodwill. **Goodwill** represents the value of all favorable attributes that relate to a company that are not attributable to any other specific asset. These include exceptional management, desirable location, good customer relations, skilled

employees, high-quality products, and harmonious relations with labor unions. Goodwill is unique. Unlike assets such as investments and plant assets, which can be sold **individually** in the marketplace, goodwill can be identified only with the business **as a whole**.

If goodwill can be identified only with the business as a whole, how can its amount be determined? One could try to put a dollar value on the factors listed above (exceptional management, desirable location, and so on). But, the results would be very subjective, and such subjective valuations would not contribute to the reliability of financial statements. **Therefore, companies record goodwill only when an entire business is purchased. In that case, goodwill is the excess of cost over the fair value of the net assets (assets less liabilities) acquired.**

In recording the purchase of a business, the company debits (increases) the identifiable acquired assets, credits liabilities at their fair values, credits cash for the purchase price, and records the difference as goodwill. **Goodwill is not amortized** because it is considered to have an indefinite life. Companies report goodwill in the balance sheet under intangible assets.

Accounting Across the Organization

Google

We Want to Own Glass

Google, which has trademarked the term “Google Glass,” now wants to trademark the term “Glass.” Why? Because the simple word Glass has marketing advantages over the term Google

Glass. It is easy to remember and is more universal. Regulators, however, are balking at Google’s request. They say that the possible trademark is too similar to other existing or pending software trademarks that contain the word “glass.” Also, regulators suggest that the term Glass is merely descriptive and therefore lacks trademark protection. For

example, regulators note that a company that makes salsa could not trademark the term “Spicy Salsa.”

BorderStylo LLC, which developed a Web-browser extension called Write on Glass, has filed a notice of opposition to Google’s request. Google is fighting back and has sent the trademark examiner a 1,928-page application defense.

Source: Jacob Gershman, “Google Wants to Own ‘Glass,’” *Wall Street Journal* (April 4, 2014), p. B5.

If Google is successful in registering the term Glass, where will this trademark be reported on its financial statements? (Go to WileyPLUS for this answer and additional questions.)

Helpful Hint

Research and development (R&D) costs are not intangible assets. But because they may lead to patents and copyrights, we discuss them in this section.

Research and Development Costs

Research and development costs are expenditures that may lead to patents, copyrights, new processes, and new products. Many companies spend considerable sums of money on research and development (R&D). For example, in a recent year, IBM spent over \$5.1 billion on R&D.

Research and development costs present accounting problems. For one thing, it is sometimes difficult to assign the costs to specific projects. Also, there are uncertainties in identifying the extent and timing of future benefits. As a result, companies usually record R&D costs **as an expense when incurred**, whether the research and development is successful or not.

To illustrate, assume that Laser Scanner Company spent \$3 million on R&D that resulted in two highly successful patents. It spent \$20,000 on legal fees for the patents. The company would add the lawyers’ fees to the Patents account. The R&D costs, however, cannot be included in the cost of the patents. Instead, the company would record the R&D costs as an expense when incurred.

Many disagree with this accounting approach. They argue that expensing R&D costs leads to understated assets and net income. Others, however, argue that capitalizing these costs will lead to highly speculative assets on the balance sheet. Who is right is difficult to determine.

Related exercise material: **BE9-11, BE9-12, E9-11, E9-12, E9-13, and DO IT! 9-4.**

Action Plan

- ✓ Know that the accounting for intangibles often depends on whether the item has a finite or indefinite life.
- ✓ Recognize the many similarities and differences between the accounting for natural resources, plant assets, and intangible assets.

LEARNING OBJECTIVE**5****Discuss how plant assets, natural resources, and intangible assets are reported and analyzed.****Presentation**

Usually, companies combine plant assets and natural resources under “Property, plant, and equipment” in the balance sheet. They show intangibles separately. Companies disclose either in the balance sheet or the notes the balances of the major classes of assets, such as land, buildings, and equipment, and accumulated depreciation by major classes or in total. In addition, they should describe the depreciation and amortization methods that were used, as well as disclose the amount of depreciation and amortization expense for the period.

Illustration 9-22 (page 418) shows a typical financial statement presentation of property, plant, and equipment and intangibles for **The Procter & Gamble Company (P&G)** in its 2013 balance sheet. The notes to P&G’s financial statements present greater details about the accounting for its long-term tangible and intangible assets.

Illustration 9-22

P&G's presentation of property, plant, and equipment, and intangible assets

THE PROCTER & GAMBLE COMPANY		
Balance Sheet (partial)		
(in millions)		
	June 30	
	2013	2012
Property, plant, and equipment		
Buildings	\$ 7,829	\$ 7,324
Machinery and equipment	34,305	32,029
Land	878	880
	43,012	40,233
Accumulated depreciation	(21,346)	(19,856)
Net property, plant, and equipment	21,666	20,377
Goodwill and other intangible assets		
Goodwill	55,188	53,773
Trademarks and other intangible assets, net	31,572	30,988
Net goodwill and other intangible assets	\$86,760	\$84,761

Illustration 9-23 shows another comprehensive presentation of property, plant, and equipment from the balance sheet of **Owens-Illinois**. The notes to the financial statements of Owens-Illinois identify the major classes of property, plant, and equipment. They also indicate that depreciation and amortization are by the straight-line method, and depletion is by the units-of-activity method.

Illustration 9-23

Owens-Illinois' presentation of property, plant, and equipment, and intangible assets

OWENS-ILLINOIS, INC.		
Balance Sheet (partial)		
(in millions)		
Property, plant, and equipment		
Timberlands, at cost, less accumulated depletion		\$ 95.4
Buildings and equipment, at cost	\$2,207.1	
Less: Accumulated depreciation	1,229.0	978.1
Total property, plant, and equipment		\$1,073.5
Intangibles		
Patents		410.0
Total		\$1,483.5

Analysis

Using ratios, we can analyze how efficiently a company uses its assets to generate sales. The **asset turnover** analyzes the productivity of a company's assets. It tells us how many dollars of sales a company generates for each dollar invested in assets. This ratio is computed by dividing net sales by average total assets for the period. Illustration 9-24 shows the computation of the asset turnover for **The Procter & Gamble Company**. P&G's net sales for 2013 were \$84,167 million. Its total ending assets were \$139,263 million, and beginning assets were \$132,244 million.

Illustration 9-24

Asset turnover formula and computation

Net Sales	÷	Average Total Assets	=	Asset Turnover
\$84,167	÷	$\frac{\$132,244 + \$139,263}{2}$	=	.62 times

Thus, each dollar invested in assets produced \$0.62 in sales for P&G. If a company is using its assets efficiently, each dollar of assets will create a high amount of sales. This ratio varies greatly among different industries—from those that are asset-intensive (utilities) to those that are not (services).

DO IT!**5****Asset Turnover**

Paramour Company reported net income of \$180,000, net sales of \$420,000, and had total assets of \$460,000 on January 1, 2017, and total assets on December 31, 2017, of \$540,000 billion. Determine Paramour's asset turnover for 2017.

Solution

The asset turnover for Paramour Company is computed as follows.

Net Sales	÷	Average Total Assets	=	Asset Turnover
\$420,000	÷	$\frac{\$460,000 + \$540,000}{2}$	=	.84

Related exercise material: **BE9-14, E9-14, and DO IT! 9-5.**

Action Plan

- ✓ Recognize that the asset turnover analyzes the productivity of a company's assets.
- ✓ Know the formula Net sales ÷ Average total assets equals Asset turnover.

LEARNING OBJECTIVE**6****APPENDIX 9A: Explain how to account for the exchange of plant assets.**

Ordinarily, companies record a gain or loss on the exchange of plant assets. The rationale for recognizing a gain or loss is that most exchanges have **commercial substance**. An exchange has commercial substance if the future cash flows change as a result of the exchange.

To illustrate, Ramos Co. exchanges some of its equipment for land held by Brodhead Inc. It is likely that the timing and amount of the cash flows arising from the land will differ significantly from the cash flows arising from the equipment. As a result, both Ramos and Brodhead are in different economic positions. Therefore, **the exchange has commercial substance**, and the companies recognize a gain or loss in the exchange. Because most exchanges have commercial substance (even when similar assets are exchanged), we illustrate only this type of situation for both a loss and a gain.

Loss Treatment

To illustrate an exchange that results in a loss, assume that Roland Company exchanged a set of used trucks plus cash for a new semi-truck. The used trucks have a combined book value of \$42,000 (cost \$64,000 less \$22,000 accumulated depreciation). Roland's purchasing agent, experienced in the secondhand market, indicates that the used trucks have a fair value of \$26,000. In addition to the trucks, Roland must pay \$17,000 for the semi-truck. Roland computes the cost of the semi-truck as follows.

Fair value of used trucks	\$26,000
Cash paid	<u>17,000</u>
Cost of semi-truck	<u><u>\$43,000</u></u>

Illustration 9A-1
Cost of semi-truck

Roland incurs a loss on disposal of plant assets of \$16,000 on this exchange. The reason is that the book value of the used trucks is greater than the fair value of these trucks. The computation is as follows.

Illustration 9A-2

Computation of loss on disposal

A	=	L	+	SE
+43,000				
+22,000				
		-16,000 Exp		
-64,000				
-17,000				
<hr/>				
Cash Flows				
-17,000				

Book value of used trucks (\$64,000 – \$22,000)	\$ 42,000
Fair value of used trucks	<u>26,000</u>
Loss on disposal of plant assets	<u>\$16,000</u>

In recording an exchange at a loss, three steps are required: (1) eliminate the book value of the asset given up, (2) record the cost of the asset acquired, and (3) recognize the loss on disposal of plant assets. Roland Company thus records the exchange on the loss as follows.

Equipment (new)	43,000	
Accumulated Depreciation—Equipment	22,000	
Loss on Disposal of Plant Assets	16,000	
Equipment (old)		64,000
Cash		17,000

(To record exchange of used trucks for semi-truck)

Gain Treatment

To illustrate a gain situation, assume that Mark Express Delivery decides to exchange its old delivery equipment plus cash of \$3,000 for new delivery equipment. The book value of the old delivery equipment is \$12,000 (cost \$40,000 less accumulated depreciation \$28,000). The fair value of the old delivery equipment is \$19,000.

The cost of the new asset is the fair value of the old asset exchanged plus any cash paid (or other consideration given up). The cost of the new delivery equipment is \$22,000, computed as follows.

Illustration 9A-3

Cost of new delivery equipment

Fair value of old delivery equipment	\$ 19,000
Cash paid	<u>3,000</u>
Cost of new delivery equipment	<u>\$22,000</u>

A gain results when the fair value of the old delivery equipment is greater than its book value. For Mark Express, there is a gain of \$7,000 on disposal of plant assets, computed as follows.

Illustration 9A-4

Computation of gain on disposal

A	=	L	+	SE
+22,000				
+28,000				
-40,000				
		+7,000 Rev		
- 3,000				
<hr/>				
Cash Flows				
- 3,000				

Fair value of old delivery equipment	\$19,000
Book value of old delivery equipment (\$40,000 – \$28,000)	<u>12,000</u>
Gain on disposal of plant assets	<u>\$ 7,000</u>

Mark Express Delivery records the exchange as follows.

Equipment (new)	22,000	
Accumulated Depreciation—Equipment (old)	28,000	
Equipment (old)		40,000
Gain on Disposal of Plant Assets		7,000
Cash		3,000

(To record exchange of old delivery equipment for new delivery equipment)

In recording an exchange at a gain, the following three steps are involved: (1) eliminate the book value of the asset given up, (2) record the cost of the asset acquired, and (3) recognize the gain on disposal of plant assets. Accounting for exchanges of plant assets becomes more complex if the transaction does not have commercial substance. This issue is discussed in more advanced accounting classes.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

1 Explain the accounting for plant asset expenditures.

The cost of plant assets includes all expenditures necessary to acquire the asset and make it ready for its intended use. Once cost is established, the company uses that amount as the basis of accounting for the plant assets over its useful life.

Companies incur revenue expenditures to maintain the operating efficiency and productive life of an asset. They debit these expenditures to Maintenance and Repairs Expense as incurred. Capital expenditures increase the operating efficiency, productive capacity, or expected useful life of the asset. Companies generally debit these expenditures to the plant asset affected.

2 Apply depreciation methods to plant assets.

Depreciation is the allocation of the cost of a plant asset to expense over its useful (service) life in a rational and systematic manner. Depreciation is not a process of valuation, nor is it a process that results in an accumulation of cash.

Three depreciation methods are:

Method	Effect on Annual Depreciation	Formula
Straight-line	Constant amount	Depreciable cost ÷ Useful life (in years)
Units-of-activity	Varying amount	Depreciable cost per unit × Units of activity during the year
Declining-balance	Decreasing amount	Book value at beginning of year × Declining-balance rate

Companies make revisions of periodic depreciation in present and future periods, not retroactively. They determine the new annual depreciation by dividing the depreciable cost at the time of the revision by the remaining useful life.

3 Explain how to account for the disposal of plant assets.

The accounting for disposal of a plant asset through

retirement or sale is as follows. (a) Eliminate the book value of the plant asset at the date of disposal. (b) Record cash proceeds, if any. (c) Account for the difference between the book value and the cash proceeds as a gain or loss on disposal.

4 Describe how to account for natural resources and intangible assets.

Companies compute depletion cost per unit by dividing the total cost of the natural resource minus salvage value by the number of units estimated to be in the resource. They then multiply the depletion cost per unit by the number of units extracted and sold.

The process of allocating the cost of an intangible asset is referred to as amortization. The cost of intangible assets with indefinite lives is not amortized. Companies normally use the straight-line method for amortizing intangible assets.

5 Discuss how plant assets, natural resources, and intangible assets are reported and analyzed.

Companies usually combine plant assets and natural resources under property, plant, and equipment. They show intangibles separately under intangible assets. Either within the balance sheet or in the notes, companies should disclose the balances of the major classes of assets, such as land, buildings, and equipment, and accumulated depreciation by major classes or in total. They also should describe the depreciation and amortization methods used, and should disclose the amount of depreciation and amortization expense for the period. The asset turnover measures the productivity of a company's assets in generating sales.

*6 Explain how to account for the exchange of plant assets.

Ordinarily, companies record a gain or loss on the exchange of plant assets. The rationale for recognizing a gain or loss is that most exchanges have commercial substance. An exchange has commercial substance if the future cash flows change as a result of the exchange.

GLOSSARY REVIEW

Accelerated-depreciation method Depreciation method that produces higher depreciation expense in the early years than in the later years. (p. 407).

Additions and improvements Costs incurred to increase the operating efficiency, productive capacity, or useful life of a plant asset. (p. 400).

Amortization The allocation of the cost of an intangible asset to expense over its useful life in a systematic and rational manner. (p. 414).

Asset turnover A measure of how efficiently a company uses its assets to generate sales; calculated as net sales divided by average total assets. (p. 418).

Capital expenditures Expenditures that increase the company's investment in productive facilities. (p. 401).

Copyrights Exclusive grant from the federal government that allows the owner to reproduce and sell an artistic or published work. (p. 415).

Declining-balance method Depreciation method that applies a constant rate to the declining book value of the asset and produces a decreasing annual depreciation expense over the useful life of the asset. (p. 406).

Depletion The allocation of the cost of a natural resource to expense in a rational and systematic manner over the resource's useful life. (p. 412).

Depreciable cost The cost of a plant asset less its salvage value. (p. 404).

Depreciation The process of allocating to expense the cost of a plant asset over its useful (service) life in a rational and systematic manner. (p. 402).

Franchise (license) A contractual arrangement under which the franchisor grants the franchisee the right to sell certain products, perform specific services, or use certain trademarks or trade names, usually within a designated geographic area. (p. 415).

Going concern assumption States that the company will continue in operation for the foreseeable future. (p. 403).

Goodwill The value of all favorable attributes that relate to a company that is not attributable to any other specific asset. (p. 415).

Intangible assets Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance. (p. 414).

Materiality concept If an item would not make a difference in decision-making, a company does not have to follow GAAP in reporting it. (p. 401).

Natural resources Assets that consist of standing timber and underground deposits of oil, gas, and minerals. (p. 412).

Ordinary repairs Expenditures to maintain the operating efficiency and productive life of the unit. (p. 400).

Patent An exclusive right issued by the U.S. Patent Office that enables the recipient to manufacture, sell, or otherwise control an invention for a period of 20 years from the date of the grant. (p. 414).

Plant assets Tangible resources that are used in the operations of the business and are not intended for sale to customers. (p. 398).

Research and development (R&D) costs Expenditures that may lead to patents, copyrights, new processes, or new products. (p. 416).

Revenue expenditures Expenditures that are immediately charged against revenues as an expense. (p. 400).

Salvage value An estimate of an asset's value at the end of its useful life. (p. 403).

Straight-line method Depreciation method in which periodic depreciation is the same for each year of the asset's useful life. (p. 404).

Trademark (trade name) A word, phrase, jingle, or symbol that identifies a particular enterprise or product. (p. 415).

Units-of-activity method Depreciation method in which useful life is expressed in terms of the total units of production or use expected from an asset. (p. 405).

Useful life An estimate of the expected productive life, also called service life, of an asset. (p. 403).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Erin Danielle Company purchased equipment and incurred the following costs.

Cash price	\$24,000
Sales taxes	1,200
Insurance during transit	200
Installation and testing	400
Total costs	<u>\$25,800</u>

What amount should be recorded as the cost of the equipment?

- (a) \$24,000. (c) \$25,400.
 (b) \$25,200. (d) \$25,800.
- (LO 1) 2. Additions to plant assets are:
 (a) revenue expenditures.
 (b) debited to the Maintenance and Repairs Expense account.
 (c) debited to the Purchases account.
 (d) capital expenditures.
- (LO 2) 3. Depreciation is a process of:
 (a) valuation. (c) cash accumulation.
 (b) cost allocation. (d) appraisal.
- (LO 2) 4. Micah Bartlett Company purchased equipment on January 1, 2016, at a total invoice cost of \$400,000. The equipment has an estimated salvage value of \$10,000 and an estimated useful life of 5 years. The amount of accumulated depreciation at December 31,

2017, if the straight-line method of depreciation is used, is:

- (a) \$80,000. (c) \$78,000.
 (b) \$160,000. (d) \$156,000.
5. Ann Torbert purchased a truck for \$11,000 on January 1, 2016. The truck will have an estimated salvage value of \$1,000 at the end of 5 years. Using the units-of-activity method, the balance in accumulated depreciation at December 31, 2017, can be computed by the following formula: (LO 2)
- (a) $(\$11,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2017}$.
 (b) $(\$10,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2017}$.
 (c) $(\$11,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2016 and 2017}$.
 (d) $(\$10,000 \div \text{Total estimated activity}) \times \text{Units of activity for 2016 and 2017}$.
6. Jefferson Company purchased a piece of equipment on January 1, 2017. The equipment cost \$60,000 and has an estimated life of 8 years and a salvage value of \$8,000. What was the depreciation expense for the asset for 2018 under the double-declining-balance method? (LO 2)
- (a) \$6,500. (c) \$15,000.
 (b) \$11,250. (d) \$6,562.

- (LO 2) 7. When there is a change in estimated depreciation:
 (a) previous depreciation should be corrected.
 (b) current and future years' depreciation should be revised.
 (c) only future years' depreciation should be revised.
 (d) None of the above.
- (LO 2) 8. Able Towing Company purchased a tow truck for \$60,000 on January 1, 2015. It was originally depreciated on a straight-line basis over 10 years with an assumed salvage value of \$12,000. On December 31, 2017, before adjusting entries had been made, the company decided to change the remaining estimated life to 4 years (including 2017) and the salvage value to \$2,000. What was the depreciation expense for 2017?
 (a) \$6,000. (c) \$15,000.
 (b) \$4,800. (d) \$12,100.
- (LO 3) 9. Bennie Razor Company has decided to sell one of its old manufacturing machines on June 30, 2017. The machine was purchased for \$80,000 on January 1, 2013, and was depreciated on a straight-line basis for 10 years assuming no salvage value. If the machine was sold for \$26,000, what was the amount of the gain or loss recorded at the time of the sale?
 (a) \$18,000. (c) \$22,000.
 (b) \$54,000. (d) \$46,000.
- (LO 4) 10. Maggie Sharrer Company expects to extract 20 million tons of coal from a mine that cost \$12 million. If no salvage value is expected and 2 million tons are mined in the first year, the entry to record depletion will include a:
 (a) debit to Accumulated Depletion of \$2,000,000.
 (b) credit to Depletion Expense of \$1,200,000.
 (c) debit to Inventory of \$1,200,000.
 (d) credit to Accumulated Depletion of \$2,000,000.
- (LO 4) 11. Which of the following statements is **false**?
 (a) If an intangible asset has a finite life, it should be amortized.
 (b) The amortization period of an intangible asset can exceed 20 years.
 (c) Goodwill is recorded only when a business is purchased.
 (d) Research and development costs are expensed when incurred, except when the research and development expenditures result in a successful patent.
12. Martha Beyerlein Company incurred \$150,000 of research and development costs in its laboratory to develop a patent granted on January 2, 2017. On July 31, 2017, Beyerlein paid \$35,000 for legal fees in a successful defense of the patent. The total amount debited to Patents through July 31, 2017, should be:
 (a) \$150,000. (c) \$185,000.
 (b) \$35,000. (d) \$170,000.
13. Indicate which of the following statements is **true**. (LO 5)
 (a) Since intangible assets lack physical substance, they need be disclosed only in the notes to the financial statements.
 (b) Goodwill should be reported as a contra account in the stockholders' equity section.
 (c) Totals of major classes of assets can be shown in the balance sheet, with asset details disclosed in the notes to the financial statements.
 (d) Intangible assets are typically combined with plant assets and natural resources, and shown in the property, plant, and equipment section.
14. Lake Coffee Company reported net sales of \$180,000, net income of \$54,000, beginning total assets of \$200,000, and ending total assets of \$300,000. What was the company's asset turnover? (LO 5)
 (a) 0.90. (c) 0.72.
 (b) 0.20. (d) 1.39.
- *15. Schopenhauer Company exchanged an old machine, with a book value of \$39,000 and a fair value of \$35,000, and paid \$10,000 cash for a similar new machine. The transaction has commercial substance. At what amount should the machine acquired in the exchange be recorded on Schopenhauer's books? (LO 6)
 (a) \$45,000. (c) \$49,000.
 (b) \$46,000. (d) \$50,000.
- *16. In exchanges of assets in which the exchange has commercial substance: (LO 6)
 (a) neither gains nor losses are recognized immediately.
 (b) gains, but not losses, are recognized immediately.
 (c) losses, but not gains, are recognized immediately.
 (d) both gains and losses are recognized immediately.

Solutions

1. (d) All of the costs (\$1,200 + \$200 + \$400) in addition to the cash price (\$24,000) should be included in the cost of the equipment because they were necessary expenditures to acquire the asset and make it ready for its intended use. The other choices are therefore incorrect.
2. (d) When an addition is made to plant assets, it is intended to increase productive capacity, increase the assets' useful life, or increase the efficiency of the assets. This is called a capital expenditure. The other choices are incorrect because (a) additions to plant assets are not revenue expenditures because the additions will have a long-term useful life whereas revenue expenditures are minor repairs and maintenance that do not prolong the life of the assets; (b) additions to plant assets are debited to Plant Assets, not Maintenance and Repairs Expense, because the Maintenance and Repairs Expense account is used to record expenditures not intended to increase the life of the assets; and (c) additions to plant assets are debited to Plant Assets, not Purchases, because the Purchases account is used to record assets intended for resale (inventory).
3. (b) Depreciation is a process of allocating the cost of an asset over its useful life, not a process of (a) valuation, (c) cash accumulation, or (d) appraisal.
4. (d) Accumulated depreciation will be the sum of 2 years of depreciation expense. Annual depreciation for this asset is $(\$400,000 - \$10,000)/5 = \$78,000$. The sum of 2 years' depreciation is therefore \$156,000 ($\$78,000 + \$78,000$), not (a) \$80,000, (b) \$160,000, or (c) \$78,000.
5. (d) The units-of-activity method takes salvage value into consideration; therefore, the depreciable cost is \$10,000. This amount is divided by total estimated activity. The resulting number is multiplied by the units of activity used in 2016 and 2017 to compute the accumulated depreciation at the end of 2017, the second year of the asset's use. The other choices are therefore incorrect.

6. (b) For the double-declining method, the depreciation rate would be 25% or $(1/8 \times 2)$. For 2017, annual depreciation expense is \$15,000 ($\$60,000 \text{ book value} \times 25\%$); for 2018, annual depreciation expense is \$11,250 $[(\$60,000 - \$15,000) \times 25\%]$, not (a) \$6,500, (c) \$15,000, or (d) \$6,562.

7. (b) When there is a change in estimated depreciation, the current and future years' depreciation computation should reflect the new estimates. The other choices are incorrect because (a) previous years' depreciation should not be adjusted when new estimates are made for depreciation, and (c) when there is a change in estimated depreciation, the current and future years' depreciation computation should reflect the new estimates. Choice (d) is wrong because there is a correct answer.

8. (d) First, calculate accumulated depreciation from January 1, 2015, through December 31, 2016, which is \$9,600 $[(\$60,000 - \$12,000)/10 \text{ years}] \times 2 \text{ years}$. Next, calculate the revised depreciable cost, which is \$48,400 $(\$60,000 - \$9,600 - \$2,000)$. Thus, the depreciation expense for 2017 is \$12,100 $(\$48,400/4)$, not (a) \$6,000, (b) \$4,800, or (c) \$15,000.

9. (a) First, the book value needs to be determined. The accumulated depreciation as of June 30, 2017, is \$36,000 $[(\$80,000/10) \times 4.5 \text{ years}]$. Thus, the cost of the machine less accumulated depreciation equals \$44,000 $(\$80,000 - \$36,000)$. The loss recorded at the time of sale is \$18,000 $(\$26,000 - \$44,000)$, not (b) \$54,000, (c) \$22,000, or (d) \$46,000.

10. (c) The amount of depletion is determined by computing the depletion per unit $(\$12 \text{ million}/20 \text{ million tons} = \$0.60 \text{ per ton})$ and then multiplying that amount times the number of units extracted during the year $(2 \text{ million tons} \times \$0.60 = \$1,200,000)$. This amount is debited to Inventory and credited to Accumulated Depletion. The other choices are therefore incorrect.

11. (d) Research and development (R&D) costs are expensed when incurred, regardless of whether the research and development expenditures result in a successful patent or not. The other choices are true statements.

12. (b) Because the \$150,000 was spent developing the patent rather than buying it from another firm, it is debited to Research and Development Expense. Only the \$35,000 spent on the successful defense can be debited to Patents, not (a) \$150,000, (c) \$185,000, or (d) \$170,000.

13. (c) Reporting only totals of major classes of assets in the balance sheet is appropriate. Additional details can be shown in the notes to the financial statements. The other choices are false statements.

14. (c) Asset turnover = Net sales $(\$180,000)/\text{Average total assets} [(\$200,000 + \$300,000)/2] = 0.72 \text{ times}$, not (a) 0.90, (b) 0.20, or (d) 1.39 times.

*15. (a) When an exchange has commercial substance, the debit to the new asset is equal to the fair value of the old asset plus the cash paid $(\$35,000 + \$10,000 = \$45,000)$, not (b) \$46,000, (c) \$49,000, or (d) \$50,000.

*16. (d) Both gains and losses are recognized immediately when an exchange of assets has commercial substance. The other choices are therefore incorrect.

PRACTICE EXERCISES

Determine depreciation for partial periods.

(LO 2)

1. Winston Company purchased a new machine on October 1, 2017, at a cost of \$120,000. The company estimated that the machine will have a salvage value of \$12,000. The machine is expected to be used for 12,000 working hours during its 4-year life.

Instructions

Compute the depreciation expense under the following methods for the year indicated.

(a) Straight-line for 2017.

(b) Units-of-activity for 2017, assuming machine usage was 1,700 hours.

(c) Declining-balance using double the straight-line rate for 2017 and 2018.

Solution

1. (a) Straight-line method:

$$\left(\frac{\$120,000 - \$12,000}{4} \right) = \$27,000 \text{ per year}$$

$$2017 \text{ depreciation} = \$27,000 \times 3/12 = \underline{\underline{\$6,750}}$$

(b) Units-of-activity method:

$$\left(\frac{\$120,000 - \$12,000}{12,000} \right) = \$9 \text{ per hour}$$

$$2017 \text{ depreciation} = 1,700 \text{ hours} \times \$9 = \underline{\underline{\$15,300}}$$

(c) Declining-balance method:

$$2017 \text{ depreciation} = \$120,000 \times 50\% \times 3/12 = \underline{\underline{\$15,000}}$$

$$\text{Book value January 1, 2018} = \$120,000 - \$15,000 = \underline{\underline{\$105,000}}$$

$$2018 \text{ depreciation} = \$105,000 \times 50\% = \underline{\underline{\$52,500}}$$

2. Lake Company, organized in 2017, has the following transactions related to intangible assets.

1/2/17	Purchased patent (8-year life)	\$560,000
4/1/17	Goodwill purchased (indefinite life)	360,000
7/1/17	10-year franchise; expiration date 7/1/2027	440,000
9/1/17	Research and development costs	185,000

Prepare entries to set up appropriate accounts for different intangibles; amortize intangible assets.

(LO 4)

Instructions

Prepare the necessary entries to record these intangibles. All costs incurred were for cash. Make the adjusting entries as of December 31, 2017, recording any necessary amortization and reflecting all balances accurately as of that date.

Solution

2.	1/2/17	Patents	560,000	
		Cash		560,000
	4/1/17	Goodwill	360,000	
		Cash		360,000
		(Part of the entry to record purchase of another company)		
	7/1/17	Franchises	440,000	
		Cash		440,000
	9/1/17	Research and Development Expense	185,000	
		Cash		185,000
	12/31/17	Amortization Expense	92,000	
		(\$560,000 ÷ 8) + [(\$440,000 ÷ 10) × 1/2]		
		Patents		70,000
		Franchises		22,000

Ending balances. 12/31/17:
 Patents = \$490,000 (\$560,000 – \$70,000)
 Goodwill = \$360,000
 Franchises = \$418,000 (\$440,000 – \$22,000)
 R&D expense = \$185,000

PRACTICE PROBLEMS

1. DuPage Company purchases a factory machine at a cost of \$18,000 on January 1, 2017. DuPage expects the machine to have a salvage value of \$2,000 at the end of its 4-year useful life.

Compute depreciation under different methods.

(LO 2)

During its useful life, the machine is expected to be used 160,000 hours. Actual annual hourly use was 2017, 40,000; 2018, 60,000; 2019, 35,000; and 2020, 25,000.

Instructions

Prepare depreciation schedules for the following methods: (a) straight-line, (b) units-of-activity, and (c) declining-balance using double the straight-line rate.

Solution

1. (a)						
Straight-Line Method						
	Computation				End of Year	
Year	Depreciable Cost*	×	Depreciation Rate	=	Annual Depreciation Expense	End of Year Accumulated Depreciation
						Book Value
2017	\$16,000		25%		\$4,000	\$4,000
2018	16,000		25%		4,000	8,000
2019	16,000		25%		4,000	12,000
2020	16,000		25%		4,000	16,000
						\$14,000**

*\$18,000 – \$2,000.
 **\$18,000 – \$4,000.

(b)

Units-of-Activity Method							
Year	Computation			=	Annual Depreciation Expense	End of Year	
	Units of Activity	×	Depreciable Cost/Unit			Accumulated Depreciation	Book Value
2017	40,000		\$0.10*		\$4,000	\$ 4,000	\$14,000
2018	60,000		0.10		6,000	10,000	8,000
2019	35,000		0.10		3,500	13,500	4,500
2020	25,000		0.10		2,500	16,000	2,000

*($\$18,000 - \$2,000$) \div 160,000.

(c)

Declining-Balance Method							
Year	Computation			=	Annual Depreciation Expense	End of Year	
	Book Value Beginning of Year	×	Depreciation Rate*			Accumulated Depreciation	Book Value
2017	\$18,000		50%		\$9,000	\$ 9,000	\$9,000
2018	9,000		50%		4,500	13,500	4,500
2019	4,500		50%		2,250	15,750	2,250
2020	2,250		50%		250**	16,000	2,000

* $\frac{1}{4} \times 2$.
**Adjusted to \$250 because ending book value should not be less than expected salvage value.

Record disposal of plant asset.

(LO 3)

2. On January 1, 2017, Skyline Limousine Co. purchased a limo at an acquisition cost of \$28,000. The vehicle has been depreciated by the straight-line method using a 4-year service life and a \$4,000 salvage value. The company's fiscal year ends on December 31.

Instructions

Prepare the journal entry or entries to record the disposal of the limousine assuming that it was:

- Retired and scrapped with no salvage value on January 1, 2021.
- Sold for \$5,000 on July 1, 2020.

Solution

2. (a) 1/1/21	Accumulated Depreciation—Equipment	24,000	
	Loss on Disposal of Plant Assets	4,000	
	Equipment		28,000
	(To record retirement of limousine)		
(b) 7/1/20	Depreciation Expense*	3,000	
	Accumulated Depreciation—Equipment		3,000
	(To record depreciation to date of disposal)		
	Cash	5,000	
	Accumulated Depreciation—Equipment**	21,000	
	Loss on Disposal of Plant Assets	2,000	
	Equipment		28,000
	(To record sale of limousine)		

* $[(\$28,000 - \$4,000) \div 4] \times \frac{1}{2}$.

** $[(\$28,000 - \$4,000) \div 4] \times 3 = \$18,000; \$18,000 + \$3,000$.

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

QUESTIONS

1. Sid Watney is uncertain about the applicability of the historical cost principle to plant assets. Explain the principle to Sid.
2. What are some examples of land improvements?
3. Lynn Company acquires the land and building owned by Noble Company. What types of costs may be incurred to make the asset ready for its intended use if Lynn Company wants to use (a) only the land, and (b) both the land and the building?
4. In a recent newspaper release, the president of Downs Company asserted that something has to be done about depreciation. The president said, "Depreciation does not come close to accumulating the cash needed to replace the asset at the end of its useful life." What is your response to the president?
5. Andrew is studying for the next accounting examination. He asks your help on two questions: (a) What is salvage value? (b) Is salvage value used in determining periodic depreciation under each depreciation method? Answer Andrew's questions.
6. Contrast the straight-line method and the units-of-activity method as to (a) useful life, and (b) the pattern of periodic depreciation over useful life.
7. Contrast the effects of the three depreciation methods on annual depreciation expense.
8. In the fourth year of an asset's 5-year useful life, the company decides that the asset will have a 6-year service life. How should the revision of depreciation be recorded? Why?
9. Distinguish between revenue expenditures and capital expenditures during useful life.
10. How is a gain or loss on the sale of a plant asset computed?
11. Romero Corporation owns a machine that is fully depreciated but is still being used. How should Romero account for this asset and report it in the financial statements?
12. What are natural resources, and what are their distinguishing characteristics?
13. Explain the concept of depletion and how it is computed.
14. What are the similarities and differences between the terms depreciation, depletion, and amortization?
15. Rowand Company hires an accounting intern who says that intangible assets should always be amortized over their legal lives. Is the intern correct? Explain.
16. Goodwill has been defined as the value of all favorable attributes that relate to a business. What types of attributes could result in goodwill?
17. Jimmy West, a business major, is working on a case problem for one of his classes. In the case problem, the company needs to raise cash to market a new product it developed. Ron Thayer, an engineering major, takes one look at the company's balance sheet and says, "This company has an awful lot of goodwill. Why don't you recommend that it sell some of it to raise cash?" How should Jimmy respond to Ron?
18. Under what conditions is goodwill recorded?
19. Often, research and development costs provide companies with benefits that last a number of years. (For example, these costs can lead to the development of a patent that will increase the company's income for many years.) However, generally accepted accounting principles require that such costs be recorded as an expense when incurred. Why?
20. **McDonald's Corporation** reports total average assets of \$28.9 billion and net sales of \$20.5 billion. What is the company's asset turnover?
21. Stark Corporation and Zuber Corporation operate in the same industry. Stark uses the straight-line method to account for depreciation; Zuber uses an accelerated method. Explain what complications might arise in trying to compare the results of these two companies.
22. Gomez Corporation uses straight-line depreciation for financial reporting purposes but an accelerated method for tax purposes. Is it acceptable to use different methods for the two purposes? What is Gomez's motivation for doing this?
23. You are comparing two companies in the same industry. You have determined that Ace Corp. depreciates its plant assets over a 40-year life, whereas Liu Corp. depreciates its plant assets over a 20-year life. Discuss the implications this has for comparing the results of the two companies.
24. Sosa Company is doing significant work to revitalize its warehouses. It is not sure whether it should capitalize these costs or expense them. What are the implications for current-year net income and future net income of expensing versus capitalizing these costs?
- * 25. When assets are exchanged in a transaction involving commercial substance, how is the gain or loss on disposal of plant assets computed?
- * 26. Unruh Refrigeration Company trades in an old machine on a new model when the fair value of the old machine is greater than its book value. The transaction has commercial substance. Should Unruh recognize a gain on disposal of plant assets? If the fair value of the old machine is less than its book value, should Unruh recognize a loss on disposal of plant assets?

BRIEF EXERCISES

Determine the cost of land.

(LO 1)

BE9-1 The following expenditures were incurred by McCoy Company in purchasing land: cash price \$50,000, accrued taxes \$3,000, attorneys' fees \$2,500, real estate broker's commission \$2,000, and clearing and grading \$3,500. What is the cost of the land?

Determine the cost of a truck.

(LO 1)

BE9-2 Rich Castillo Company incurs the following expenditures in purchasing a truck: cash price \$30,000, accident insurance \$2,000, sales taxes \$2,100, motor vehicle license \$100, and painting and lettering \$400. What is the cost of the truck?

Prepare entries for delivery truck costs.

(LO 1)

BE9-3 Flaherty Company had the following two transactions related to its delivery truck.

1. Paid \$45 for an oil change.
2. Paid \$400 to install a special gear unit, which increases the operating efficiency of the truck.

Prepare Flaherty's journal entries to record these two transactions.

Compute straight-line depreciation.

(LO 2)

BE9-4 Corales Company acquires a delivery truck at a cost of \$38,000. The truck is expected to have a salvage value of \$6,000 at the end of its 4-year useful life. Compute annual depreciation expense for the first and second years using the straight-line method.

Compute depreciation and evaluate treatment.

(LO 2)

BE9-5 Chisenhall Company purchased land and a building on January 1, 2017. Management's best estimate of the value of the land was \$100,000 and of the building \$200,000. However, management told the accounting department to record the land at \$220,000 and the building at \$80,000. The building is being depreciated on a straight-line basis over 15 years with no salvage value. Why do you suppose management requested this accounting treatment? Is it ethical?

Compute declining-balance depreciation.

(LO 2)

BE9-6 Depreciation information for Corales Company is given in BE9-4. Assuming the declining-balance depreciation rate is double the straight-line rate, compute annual depreciation for the first and second years under the declining-balance method.

Compute depreciation using the units-of-activity method.

(LO 2)

BE9-7 Rosco Taxi Service uses the units-of-activity method in computing depreciation on its taxicabs. Each cab is expected to be driven 150,000 miles. Taxi no. 10 cost \$39,500 and is expected to have a salvage value of \$500. Taxi no. 10 is driven 30,000 miles in year 1 and 20,000 miles in year 2. Compute the depreciation for each year.

Compute revised depreciation.

(LO 2)

BE9-8 On January 1, 2017, the Morgantown Company ledger shows Equipment \$32,000 and Accumulated Depreciation—Equipment \$9,000. The depreciation resulted from using the straight-line method with a useful life of 10 years and a salvage value of \$2,000. On this date, the company concludes that the equipment has a remaining useful life of only 4 years with the same salvage value. Compute the revised annual depreciation.

Prepare entries for disposal by retirement.

(LO 3)

BE9-9 Prepare journal entries to record the following.

- (a) Sound Tracker Company retires its delivery equipment, which cost \$41,000. Accumulated depreciation is also \$41,000 on this delivery equipment. No salvage value is received.
- (b) Assume the same information as (a), except that accumulated depreciation is \$37,000, instead of \$41,000, on the delivery equipment.

Prepare entries for disposal by sale.

(LO 3)

BE9-10 Gunkelson Company sells equipment on September 30, 2017, for \$18,000 cash. The equipment originally cost \$72,000 and as of January 1, 2017, had accumulated depreciation of \$42,000. Depreciation for the first 9 months of 2017 is \$5,250. Prepare the journal entries to (a) update depreciation to September 30, 2017, and (b) record the sale of the equipment.

Prepare depletion entry and balance sheet presentation for natural resources.

(LO 4)

BE9-11 Franceour Mining Co. purchased for \$7 million a mine that is estimated to have 35 million tons of ore and no salvage value. In the first year, 5 million tons of ore are extracted.

- (a) Prepare the journal entry to record depletion for the first year.
- (b) Show how this mine is reported on the balance sheet at the end of the first year.

BE9-12 Campanez Company purchases a patent for \$140,000 on January 2, 2017. Its estimated useful life is 10 years.

- (a) Prepare the journal entry to record amortization expense for the first year.
 (b) Show how this patent is reported on the balance sheet at the end of the first year.

Prepare amortization expense entry and balance sheet presentation for intangibles.

(LO 4)

BE9-13 Information related to plant assets, natural resources, and intangibles at the end of 2017 for Dent Company is as follows: buildings \$1,100,000, accumulated depreciation—buildings \$600,000, goodwill \$410,000, coal mine \$500,000, and accumulated depletion—coal mine \$108,000. Prepare a partial balance sheet of Dent Company for these items.

Classify long-lived assets on balance sheet.

(LO 5)

BE9-14 In a recent annual report, **Target** reported beginning total assets of \$44.1 billion, ending total assets of \$44.5 billion, and net sales of \$63.4 billion. Compute Target's asset turnover.

Calculate asset turnover.

(LO 5)

***BE9-15** Olathe Company exchanges old delivery equipment for new delivery equipment. The book value of the old delivery equipment is \$31,000 (cost \$61,000 less accumulated depreciation \$30,000). Its fair value is \$24,000, and cash of \$5,000 is paid. Prepare the entry to record the exchange, assuming the transaction has commercial substance.

Prepare entry for disposal by exchange.

(LO 6)

***BE9-16** Assume the same information as BE9-15, except that the fair value of the old delivery equipment is \$33,000. Prepare the entry to record the exchange.

Prepare entry for disposal by exchange.

(LO 6)

DO IT! Exercises

DO IT! 9-1 Lofton Company purchased a delivery truck. The total cash payment was \$27,900, including the following items.

Negotiated purchase price	\$24,000
Installation of special shelving	1,100
Painting and lettering	900
Motor vehicle license	100
Annual insurance policy	500
Sales tax	1,300
Total paid	\$27,900

Explain accounting for cost of plant assets.

(LO 1)

Explain how each of these costs would be accounted for.

DO IT! 9-2a On January 1, 2017, Emporia Country Club purchased a new riding mower for \$15,000. The mower is expected to have an 8-year life with a \$3,000 salvage value. What journal entry would Emporia make at December 31, 2017, if it uses straight-line depreciation?

Calculate depreciation expense and make journal entry.

(LO 2)

DO IT! 9-2b Pinewood Corporation purchased a piece of equipment for \$70,000. It estimated an 8-year life and a \$2,000 salvage value. At the end of year four (before the depreciation adjustment), it estimated the new total life to be 10 years and the new salvage value to be \$6,000. Compute the revised depreciation.

Calculate revised depreciation.

(LO 2)

DO IT! 9-3 Napoli Manufacturing has old equipment that cost \$52,000. The equipment has accumulated depreciation of \$28,000. Napoli has decided to sell the equipment.

Make journal entries to record plant asset disposal.

- (a) What entry would Napoli make to record the sale of the equipment for \$26,000 cash?
 (b) What entry would Napoli make to record the sale of the equipment for \$15,000 cash?

(LO 3)

DO IT! 9-4 Match the statement with the term most directly associated with it.

Goodwill	Amortization
Intangible assets	Franchises
Research and development costs	

Match intangibles classifications concepts.

(LO 4)

- _____ Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance.
- _____ The allocation of the cost of an intangible asset to expense in a rational and systematic manner.

3. _____ A right to sell certain products or services, or use certain trademarks or trade names, within a designated geographic area.
4. _____ Costs incurred by a company that often lead to patents or new products. These costs must be expensed as incurred.
5. _____ The excess of the cost of a company over the fair value of the net assets acquired.

Calculate asset turnover.

(LO 5)

DO IT! 9-5 For 2017, Sale Company reported beginning total assets of \$300,000 and ending total assets of \$340,000. Its net income for this period was \$50,000, and its net sales were \$400,000. Compute the company's asset turnover for 2017.

EXERCISES

Determine cost of plant acquisitions.

(LO 1)

E9-1 The following expenditures relating to plant assets were made by Prather Company during the first 2 months of 2017.

1. Paid \$5,000 of accrued taxes at time plant site was acquired.
2. Paid \$200 insurance to cover possible accident loss on new factory machinery while the machinery was in transit.
3. Paid \$850 sales taxes on new delivery truck.
4. Paid \$17,500 for parking lots and driveways on new plant site.
5. Paid \$250 to have company name and advertising slogan painted on new delivery truck.
6. Paid \$8,000 for installation of new factory machinery.
7. Paid \$900 for one-year accident insurance policy on new delivery truck.
8. Paid \$75 motor vehicle license fee on the new truck.

Instructions

- (a)  Explain the application of the historical cost principle in determining the acquisition cost of plant assets.
- (b) List the numbers of the foregoing transactions, and opposite each indicate the account title to which each expenditure should be debited.

Determine property, plant, and equipment costs.

(LO 1)

E9-2 Benedict Company incurred the following costs.

1. Sales tax on factory machinery purchased	\$ 5,000
2. Painting of and lettering on truck immediately upon purchase	700
3. Installation and testing of factory machinery	2,000
4. Real estate broker's commission on land purchased	3,500
5. Insurance premium paid for first year's insurance on new truck	880
6. Cost of landscaping on property purchased	7,200
7. Cost of paving parking lot for new building constructed	17,900
8. Cost of clearing, draining, and filling land	13,300
9. Architect's fees on self-constructed building	10,000

Instructions

Indicate to which account Benedict would debit each of the costs.

Determine acquisition costs of land.

(LO 1)

E9-3 On March 1, 2017, Westmorlan Company acquired real estate on which it planned to construct a small office building. The company paid \$75,000 in cash. An old warehouse on the property was razed at a cost of \$8,600; the salvaged materials were sold for \$1,700. Additional expenditures before construction began included \$1,100 attorney's fee for work concerning the land purchase, \$5,000 real estate broker's fee, \$7,800 architect's fee, and \$14,000 to put in driveways and a parking lot.

Instructions

- (a) Determine the amount to be reported as the cost of the land.
- (b) For each cost not used in part (a), indicate the account to be debited.

Understand depreciation concepts.

(LO 2)

E9-4 Tom Parkey has prepared the following list of statements about depreciation.

1. Depreciation is a process of asset valuation, not cost allocation.
2. Depreciation provides for the proper matching of expenses with revenues.
3. The book value of a plant asset should approximate its fair value.

4. Depreciation applies to three classes of plant assets: land, buildings, and equipment.
5. Depreciation does not apply to a building because its usefulness and revenue-producing ability generally remain intact over time.
6. The revenue-producing ability of a depreciable asset will decline due to wear and tear and to obsolescence.
7. Recognizing depreciation on an asset results in an accumulation of cash for replacement of the asset.
8. The balance in accumulated depreciation represents the total cost that has been charged to expense.
9. Depreciation expense and accumulated depreciation are reported on the income statement.
10. Four factors affect the computation of depreciation: cost, useful life, salvage value, and residual value.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E9-5 Yello Bus Lines uses the units-of-activity method in depreciating its buses. One bus was purchased on January 1, 2017, at a cost of \$148,000. Over its 4-year useful life, the bus is expected to be driven 100,000 miles. Salvage value is expected to be \$8,000.

Compute depreciation under units-of-activity method.

(LO 2)

Instructions

- (a) Compute the depreciable cost per unit.
- (b) Prepare a depreciation schedule assuming actual mileage was: 2017, 26,000; 2018, 32,000; 2019, 25,000; and 2020, 17,000.

E9-6 Rottino Company purchased a new machine on October 1, 2017, at a cost of \$150,000. The company estimated that the machine will have a salvage value of \$12,000. The machine is expected to be used for 10,000 working hours during its 5-year life.

Determine depreciation for partial periods.

(LO 2)

Instructions

Compute the depreciation expense under the following methods for the year indicated.

- (a) Straight-line for 2017.
- (b) Units-of-activity for 2017, assuming machine usage was 1,700 hours.
- (c) Declining-balance using double the straight-line rate for 2017 and 2018.

E9-7 Linton Company purchased a delivery truck for \$34,000 on January 1, 2017. The truck has an expected salvage value of \$2,000, and is expected to be driven 100,000 miles over its estimated useful life of 8 years. Actual miles driven were 15,000 in 2017 and 12,000 in 2018.

Compute depreciation using different methods.

(LO 2)

Instructions

- (a) Compute depreciation expense for 2017 and 2018 using (1) the straight-line method, (2) the units-of-activity method, and (3) the double-declining-balance method.
- (b) Assume that Linton uses the straight-line method.
 - (1) Prepare the journal entry to record 2017 depreciation.
 - (2) Show how the truck would be reported in the December 31, 2017, balance sheet.

E9-8 Terry Wade, the new controller of Hellickson Company, has reviewed the expected useful lives and salvage values of selected depreciable assets at the beginning of 2017. His findings are as follows.

Compute revised annual depreciation.

(LO 2)

Type of Asset	Date Acquired	Cost	Accumulated Depreciation 1/1/17	Useful Life in Years		Salvage Value	
				Old	Proposed	Old	Proposed
Building	1/1/11	\$800,000	\$114,000	40	50	\$40,000	\$26,000
Warehouse	1/1/12	100,000	19,000	25	20	5,000	6,000

All assets are depreciated by the straight-line method. Hellickson Company uses a calendar year in preparing annual financial statements. After discussion, management has agreed to accept Terry's proposed changes.

Instructions

- (a) Compute the revised annual depreciation on each asset in 2017. (Show computations.)
- (b) Prepare the entry (or entries) to record depreciation on the building in 2017.

Journalize entries for disposal of plant assets.

(LO 3)

E9-9 Presented below are selected transactions at Ridge Company for 2017.

- Jan. 1 Retired a piece of machinery that was purchased on January 1, 2007. The machine cost \$62,000 on that date. It had a useful life of 10 years with no salvage value.
- June 30 Sold a computer that was purchased on January 1, 2014. The computer cost \$45,000. It had a useful life of 5 years with no salvage value. The computer was sold for \$14,000.
- Dec. 31 Discarded a delivery truck that was purchased on January 1, 2013. The truck cost \$33,000. It was depreciated based on a 6-year useful life with a \$3,000 salvage value.

Instructions

Journalize all entries required on the above dates, including entries to update depreciation, where applicable, on assets disposed of. Ridge Company uses straight-line depreciation. (Assume depreciation is up to date as of December 31, 2016.)

Journalize entries for disposal of equipment.

(LO 3)

E9-10 Pryce Company owns equipment that cost \$65,000 when purchased on January 1, 2014. It has been depreciated using the straight-line method based on an estimated salvage value of \$5,000 and an estimated useful life of 5 years.

Instructions

Prepare Pryce Company's journal entries to record the sale of the equipment in these four independent situations.

- (a) Sold for \$31,000 on January 1, 2017.
- (b) Sold for \$31,000 on May 1, 2017.
- (c) Sold for \$11,000 on January 1, 2017.
- (d) Sold for \$11,000 on October 1, 2017.

Journalize entries for natural resources depletion.

(LO 4)

E9-11 On July 1, 2017, Friedman Inc. invested \$720,000 in a mine estimated to have 900,000 tons of ore of uniform grade. During the last 6 months of 2017, 100,000 tons of ore were mined.

Instructions

- (a) Prepare the journal entry to record depletion.
- (b) Assume that the 100,000 tons of ore were mined, but only 80,000 units were sold. How are the costs applicable to the 20,000 unsold units reported?

Prepare adjusting entries for amortization.

(LO 4)

E9-12 The following are selected 2017 transactions of Pedigo Corporation.

- Jan. 1 Purchased a small company and recorded goodwill of \$150,000. Its useful life is indefinite.
- May 1 Purchased for \$75,000 a patent with an estimated useful life of 5 years and a legal life of 20 years.

Instructions

Prepare necessary adjusting entries at December 31 to record amortization required by the events above.

Prepare entries to set up appropriate accounts for different intangibles; amortize intangible assets.

(LO 4)

E9-13 Gill Company, organized in 2017, has the following transactions related to intangible assets.

1/2/17	Purchased patent (7-year life)	\$595,000
4/1/17	Goodwill purchased (indefinite life)	360,000
7/1/17	10-year franchise; expiration date 7/1/2027	480,000
9/1/17	Research and development costs	185,000

Instructions

Prepare the necessary entries to record these intangibles. All costs incurred were for cash. Make the adjusting entries as of December 31, 2017, recording any necessary amortization and reflecting all balances accurately as of that date.

Calculate asset turnover.

(LO 5)

E9-14 During 2017, Paola Corporation reported net sales of \$3,500,000 and net income of \$1,500,000. Its balance sheet reported average total assets of \$1,400,000.

Instructions

Calculate the asset turnover.

*** E9-15** Presented below are two independent transactions. Both transactions have commercial substance.

1. Mercy Co. exchanged old trucks (cost \$64,000 less \$22,000 accumulated depreciation) plus cash of \$17,000 for new trucks. The old trucks had a fair value of \$38,000.
2. Pence Inc. trades its used machine (cost \$12,000 less \$4,000 accumulated depreciation) for a new machine. In addition to exchanging the old machine (which had a fair value of \$11,000), Pence also paid cash of \$3,000.

Journalize entries for exchanges.

(LO 6)

Instructions

- (a) Prepare the entry to record the exchange of assets by Mercy Co.
- (b) Prepare the entry to record the exchange of assets by Pence Inc.

*** E9-16** Rizzo's Delivery Company and Overland's Express Delivery exchanged delivery trucks on January 1, 2017. Rizzo's truck cost \$22,000. It has accumulated depreciation of \$15,000 and a fair value of \$3,000. Overland's truck cost \$10,000. It has accumulated depreciation of \$8,000 and a fair value of \$3,000. The transaction has commercial substance.

Journalize entries for the exchange of plant assets.

(LO 6)

Instructions

- (a) Journalize the exchange for Rizzo's Delivery Company.
- (b) Journalize the exchange for Overland's Express Delivery.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/veygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

P9-1A Venable Company was organized on January 1. During the first year of operations, the following plant asset expenditures and receipts were recorded in random order:

Determine acquisition costs of land and building.

(LO 1)

	<u>Debit</u>	
1. Cost of filling and grading the land		\$ 4,000
2. Full payment to building contractor		690,000
3. Real estate taxes on land paid for the current year		5,000
4. Cost of real estate purchased as a plant site (land \$100,000 and building \$45,000)		145,000
5. Excavation costs for new building		35,000
6. Architect's fees on building plans		10,000
7. Accrued real estate taxes paid at time of purchase of real estate		2,000
8. Cost of parking lots and driveways		14,000
9. Cost of demolishing building to make land suitable for construction of new building		25,000
		\$930,000
	<u>Credit</u>	
10. Proceeds from salvage of demolished building		\$ 3,500

Instructions

Analyze the foregoing transactions using the following column headings. Insert the number of each transaction in the Item column, and then insert the amounts in the other appropriate columns. For amounts entered in the Other Accounts column, also indicate the account titles.

<u>Item</u>	<u>Land</u>	<u>Buildings</u>	<u>Other Accounts</u>
-------------	-------------	------------------	-----------------------

<u>Totals</u>
Land \$172,500
Buildings \$735,000

P9-2A In recent years, Avery Transportation purchased three used buses. Because of frequent turnover in the accounting department, a different accountant selected the depreciation method for each bus, and various methods were selected. Information concerning the buses is shown on the next page.

Compute depreciation under different methods.

(LO 2)

<u>Bus</u>	<u>Acquired</u>	<u>Cost</u>	<u>Salvage Value</u>	<u>Useful Life in Years</u>	<u>Depreciation Method</u>
1	1/1/15	\$ 96,000	\$ 6,000	5	Straight-line
2	1/1/15	110,000	10,000	4	Declining-balance
3	1/1/16	92,000	8,000	5	Units-of-activity

For the declining-balance method, the company uses the double-declining rate. For the units-of-activity method, total miles are expected to be 120,000. Actual miles of use in the first 3 years were 2016, 24,000; 2017, 34,000; and 2018, 30,000.

Instructions

(a) Bus 2, 2016, \$82,500

- (a) Compute the amount of accumulated depreciation on each bus at December 31, 2017.
 (b) If Bus 2 was purchased on April 1 instead of January 1, what is the depreciation expense for this bus in (1) 2015 and (2) 2016?

Compute depreciation under different methods.

(LO 2)

P9-3A On January 1, 2017, Evers Company purchased the following two machines for use in its production process.

Machine A: The cash price of this machine was \$48,000. Related expenditures included: sales tax \$1,700, shipping costs \$150, insurance during shipping \$80, installation and testing costs \$70, and \$100 of oil and lubricants to be used with the machinery during its first year of operations. Evers estimates that the useful life of the machine is 5 years with a \$5,000 salvage value remaining at the end of that time period. Assume that the straight-line method of depreciation is used.

Machine B: The recorded cost of this machine was \$180,000. Evers estimates that the useful life of the machine is 4 years with a \$10,000 salvage value remaining at the end of that time period.

Instructions

- (a) Prepare the following for Machine A.
 (1) The journal entry to record its purchase on January 1, 2017.
 (2) The journal entry to record annual depreciation at December 31, 2017.
 (b) Calculate the amount of depreciation expense that Evers should record for Machine B each year of its useful life under the following assumptions.
 (1) Evers uses the straight-line method of depreciation.
 (2) Evers uses the declining-balance method. The rate used is twice the straight-line rate.
 (3) Evers uses the units-of-activity method and estimates that the useful life of the machine is 125,000 units. Actual usage is as follows: 2017, 45,000 units; 2018, 35,000 units; 2019, 25,000 units; 2020, 20,000 units.
 (c) Which method used to calculate depreciation on Machine B reports the highest amount of depreciation expense in year 1 (2017)? The highest amount in year 4 (2020)? The highest total amount over the 4-year period?

(b) (2) 2017 DDB depreciation \$90,000

Calculate revisions to depreciation expense.

(LO 2)

P9-4A At the beginning of 2015, Mazzaro Company acquired equipment costing \$120,000. It was estimated that this equipment would have a useful life of 6 years and a salvage value of \$12,000 at that time. The straight-line method of depreciation was considered the most appropriate to use with this type of equipment. Depreciation is to be recorded at the end of each year.

During 2017 (the third year of the equipment's life), the company's engineers reconsidered their expectations and estimated that the equipment's useful life would probably be 7 years (in total) instead of 6 years. The estimated salvage value was not changed at that time. However, during 2020, the estimated salvage value was reduced to \$5,000.

Instructions

Indicate how much depreciation expense should be recorded each year for this equipment, by completing the following table.

<u>Year</u>	<u>Depreciation Expense</u>	<u>Accumulated Depreciation</u>
2015		
2016		
2017		
2018		
2019		
2020		
2021		

2021 depreciation expense \$17,900

P9-5A At December 31, 2017, Grand Company reported the following as plant assets.

Land		\$ 4,000,000
Buildings	\$28,500,000	
Less: Accumulated depreciation—buildings	<u>12,100,000</u>	16,400,000
Equipment	48,000,000	
Less: Accumulated depreciation—equipment	<u>5,000,000</u>	<u>43,000,000</u>
Total plant assets		<u>\$63,400,000</u>

During 2018, the following selected cash transactions occurred.

- April 1 Purchased land for \$2,130,000.
 May 1 Sold equipment that cost \$750,000 when purchased on January 1, 2014. The equipment was sold for \$450,000.
 June 1 Sold land purchased on June 1, 2008, for \$1,500,000. The land cost \$400,000.
 July 1 Purchased equipment for \$2,500,000.
 Dec. 31 Retired equipment that cost \$500,000 when purchased on December 31, 2008. The company received no proceeds related to salvage.

Instructions

- (a) Journalize the above transactions. The company uses straight-line depreciation for buildings and equipment. The buildings are estimated to have a 50-year life and no salvage value. The equipment is estimated to have a 10-year useful life and no salvage value. Update depreciation on assets disposed of at the time of sale or retirement.
 (b) Record adjusting entries for depreciation for 2018.
 (c) Prepare the plant assets section of Grand's balance sheet at December 31, 2018.

Journalize a series of equipment transactions related to purchase, sale, retirement, and depreciation.

(LO 2, 3, 5)

- (b) Depreciation Expense—
Buildings \$570,000;
Equipment \$4,800,000
 (c) Total plant assets
\$61,760,000

P9-6A Ceda Co. has equipment that cost \$80,000 and that has been depreciated \$50,000.

Instructions

Record the disposal under the following assumptions.

- (a) It was scrapped as having no value.
 (b) It was sold for \$21,000.
 (c) It was sold for \$31,000.

Record disposals.

(LO 4)

- (b) \$9,000 loss

P9-7A The intangible assets section of Sappelt Company at December 31, 2017, is presented below.

Patents (\$70,000 cost less \$7,000 amortization)	\$63,000
Franchises (\$48,000 cost less \$19,200 amortization)	<u>28,800</u>
Total	<u>\$91,800</u>

The patent was acquired in January 2017 and has a useful life of 10 years. The franchise was acquired in January 2014 and also has a useful life of 10 years. The following cash transactions may have affected intangible assets during 2018.

- Jan. 2 Paid \$27,000 legal costs to successfully defend the patent against infringement by another company.
 Jan.–June Developed a new product, incurring \$140,000 in research and development costs. A patent was granted for the product on July 1. Its useful life is equal to its legal life.
 Sept. 1 Paid \$50,000 to an extremely large defensive lineman to appear in commercials advertising the company's products. The commercials will air in September and October.
 Oct. 1 Acquired a franchise for \$140,000. The franchise has a useful life of 50 years.

Prepare entries to record transactions related to acquisition and amortization of intangibles; prepare the intangible assets section.

(LO 4, 5)

Instructions

- (a) Prepare journal entries to record the transactions above.
 (b) Prepare journal entries to record the 2018 amortization expense.
 (c) Prepare the intangible assets section of the balance sheet at December 31, 2018.

- (b) Amortization Expense (patents) \$10,000 Amortization Expense (franchises) \$5,500
 (c) Total intangible assets \$243,300

P9-8A Due to rapid turnover in the accounting department, a number of transactions involving intangible assets were improperly recorded by Goins Company in 2017.

1. Goins developed a new manufacturing process, incurring research and development costs of \$136,000. The company also purchased a patent for \$60,000. In early January,

Prepare entries to correct errors made in recording and amortizing intangible assets.

(LO 4)

Goins capitalized \$196,000 as the cost of the patents. Patent amortization expense of \$19,600 was recorded based on a 10-year useful life.

2. On July 1, 2017, Goins purchased a small company and as a result acquired goodwill of \$92,000. Goins recorded a half-year's amortization in 2017, based on a 50-year life (\$920 amortization). The goodwill has an indefinite life.

Instructions

1. R&D Exp. \$136,000

Prepare all journal entries necessary to correct any errors made during 2017. Assume the books have not yet been closed for 2017.

Calculate and comment on asset turnover.

(LO 5)

P9-9A LaPorta Company and Lott Corporation, two corporations of roughly the same size, are both involved in the manufacture of in-line skates. Each company depreciates its plant assets using the straight-line approach. An investigation of their financial statements reveals the following information.

	<u>LaPorta Co.</u>	<u>Lott Corp.</u>
Net income	\$ 800,000	\$1,000,000
Sales revenue	1,300,000	1,180,000
Average total assets	2,500,000	2,000,000
Average plant assets	1,800,000	1,000,000

Instructions

- For each company, calculate the asset turnover.
- Based on your calculations in part (a), comment on the relative effectiveness of the two companies in using their assets to generate sales and produce net income.

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEM: CHAPTERS 3 TO 9

CP9 Hassellhouf Company's trial balance at December 31, 2017, is presented below and on page 437. All 2017 transactions have been recorded except for the items described on page 437.

	<u>Debit</u>	<u>Credit</u>
Cash	\$ 28,000	
Accounts Receivable	36,800	
Notes Receivable	10,000	
Interest Receivable	–0–	
Inventory	36,200	
Prepaid Insurance	3,600	
Land	20,000	
Buildings	150,000	
Equipment	60,000	
Patents	9,000	
Allowance for Doubtful Accounts		\$ 500
Accumulated Depreciation—Buildings		50,000
Accumulated Depreciation—Equipment		24,000
Accounts Payable		27,300
Salaries and Wages Payable		–0–
Unearned Rent Revenue		6,000
Notes Payable (due in 2018)		11,000
Interest Payable		–0–

	<u>Debit</u>	<u>Credit</u>
Notes Payable (due after 2018)		30,000
Common Stock		50,000
Retained Earnings		63,600
Dividends	12,000	
Sales Revenue		905,000
Interest Revenue		-0-
Rent Revenue		-0-
Gain on Disposal of Plant Assets		-0-
Bad Debt Expense	-0-	
Cost of Goods Sold	630,000	
Depreciation Expense	-0-	
Insurance Expense	-0-	
Interest Expense	-0-	
Other Operating Expenses	61,800	
Amortization Expense	-0-	
Salaries and Wages Expense	110,000	
Total	<u>\$1,167,400</u>	<u>\$1,167,400</u>

Unrecorded transactions:

- On May 1, 2017, Hassellhouf purchased equipment for \$21,200 plus sales taxes of \$1,600 (all paid in cash).
- On July 1, 2017, Hassellhouf sold for \$3,500 equipment which originally cost \$5,000. Accumulated depreciation on this equipment at January 1, 2017, was \$1,800; 2017 depreciation prior to the sale of the equipment was \$450.
- On December 31, 2017, Hassellhouf sold on account \$9,000 of inventory that cost \$6,300.
- Hassellhouf estimates that uncollectible accounts receivable at year-end is \$3,500.
- The note receivable is a one-year, 8% note dated April 1, 2017. No interest has been recorded.
- The balance in prepaid insurance represents payment of a \$3,600 6-month premium on September 1, 2017.
- The building is being depreciated using the straight-line method over 30 years. The salvage value is \$30,000.
- The equipment owned prior to this year is being depreciated using the straight-line method over 5 years. The salvage value is 10% of cost.
- The equipment purchased on May 1, 2017, is being depreciated using the straight-line method over 5 years, with a salvage value of \$1,800.
- The patent was acquired on January 1, 2017, and has a useful life of 10 years from that date.
- Unpaid salaries and wages at December 31, 2017, total \$5,200.
- The unearned rent revenue of \$6,000 was received on December 1, 2017, for 3 months' rent.
- Both the short-term and long-term notes payable are dated January 1, 2017, and carry a 9% interest rate. All interest is payable in the next 12 months.

Instructions

- Prepare journal entries for the transactions listed above.
- Prepare an updated December 31, 2017, trial balance.
- Prepare a 2017 income statement and a retained earnings statement.
- Prepare a December 31, 2017, classified balance sheet.

(b) Totals
\$1,205,040

(d) Total assets
\$259,200

CONTINUING PROBLEM

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 8.)

CC9 Natalie is also thinking of buying a van that will be used only for business. Natalie is concerned about the impact of the van's cost on her income statement and balance sheet. She has come to you for advice on calculating the van's depreciation.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP9-1 The financial statements of **Apple Inc.** are presented in Appendix A. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

Refer to Apple's financial statements and answer the following questions.

- What was the total cost and book value of property, plant, and equipment at September 28, 2013?
- What was the amount of depreciation and amortization expense for each of the three years 2011–2013?
- Using the statement of cash flows, what is the amount of capital spending in 2013 and 2012?
- Where does the company disclose its intangible assets, and what types of intangibles did it have at September 28, 2013?

Comparative Analysis Problem:
PepsiCo, Inc. vs. The Coca-Cola Company

BYP9-2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- Compute the asset turnover for each company for 2013.
- What conclusions concerning the efficiency of assets can be drawn from these data?

Comparative Analysis Problem:
Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP9-3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- Compute the asset turnover for each company for 2013.
- What conclusions concerning the efficiency of assets can be drawn from these data?

Real-World Focus

BYP9-4 A company's annual report identifies the amount of its plant assets and the depreciation method used.

Address: www.annualreports.com, or go to www.wiley.com/college/weygandt

Steps

1. Select a particular company.
2. Search by company name.
3. Follow instructions below.

Instructions

Answer the following questions.

- (a) What is the name of the company?
- (b) What is the Internet address of the annual report?
- (c) At fiscal year-end, what is the net amount of its plant assets?
- (d) What is the accumulated depreciation?
- (e) Which method of depreciation does the company use?

CRITICAL THINKING

Decision-Making Across the Organization

BYP9-5 Pinson Company and Estes Company are two proprietorships that are similar in many respects. One difference is that Pinson Company uses the straight-line method and Estes Company uses the declining-balance method at double the straight-line rate. On January 2, 2015, both companies acquired the depreciable assets shown below.

Asset	Cost	Salvage Value	Useful Life
Buildings	\$360,000	\$20,000	40 years
Equipment	130,000	10,000	10 years

Including the appropriate depreciation charges, annual net income for the companies in the years 2015, 2016, and 2017 and total income for the 3 years were as follows.

	2015	2016	2017	Total
Pinson Company	\$84,000	\$88,400	\$90,000	\$262,400
Estes Company	68,000	76,000	85,000	229,000

At December 31, 2017, the balance sheets of the two companies are similar except that Estes Company has more cash than Pinson Company.

Lynda Peace is interested in buying one of the companies. She comes to you for advice.

Instructions

With the class divided into groups, answer the following.

- (a) Determine the annual and total depreciation recorded by each company during the 3 years.
- (b) Assuming that Estes Company also uses the straight-line method of depreciation instead of the declining-balance method as in (a), prepare comparative income data for the 3 years.
- (c) Which company should Lynda Peace buy? Why?

Communication Activity

BYP9-6 The chapter presented some concerns regarding the current accounting standards for research and development expenditures.

Instructions

Assume that you are either (a) the president of a company that is very dependent on ongoing research and development, writing a memo to the FASB complaining about the current accounting standards regarding research and development, or (b) the FASB member defending the current standards regarding research and development. Your memo should address the following questions.

1. By requiring expensing of R&D, do you think companies will spend less on R&D? Why or why not? What are the possible implications for the competitiveness of U.S. companies?
2. If a company makes a commitment to spend money for R&D, it must believe it has future benefits. Shouldn't these costs therefore be capitalized just like the purchase of any long-lived asset that is believed to have future benefits?

Ethics Case

BYP9-7 Turner Container Company is suffering declining sales of its principal product, nonbiodegradable plastic cartons. The president, Robert Griffin, instructs his controller, Alexis Landrum, to lengthen asset lives to reduce depreciation expense. A processing line of automated plastic extruding equipment, purchased for \$3.5 million in January 2017, was originally estimated to have a useful life of 8 years and a salvage value of \$300,000. Depreciation has been recorded for 2 years on that basis. Robert wants the estimated life changed to 12 years total, and the straight-line method continued. Alexis is hesitant to make the change, believing it is unethical to increase net income in this manner. Robert says, "Hey, the life is only an estimate, and I've heard that our competition uses a 12-year life on their production equipment."

Instructions

- (a) Who are the stakeholders in this situation?
- (b) Is the change in asset life unethical, or is it simply a good business practice by an astute president?
- (c) What is the effect of Robert Griffin's proposed change on income before taxes in the year of change?

All About You

BYP9-8 The Feature Story at the beginning of the chapter discussed the company **Rent-A-Wreck**. Note that the trade name Rent-A-Wreck is a very important asset to the company, as it creates immediate product identification. As indicated in the chapter, companies invest substantial sums to ensure that their product is well-known to the consumer. Test your knowledge of who owns some famous brands and their impact on the financial statements.

Instructions

- (a) Provide an answer to the four multiple-choice questions below.
 - (1) Which company owns both Taco Bell and Pizza Hut?

(a) McDonald's.	(c) Yum Brands.
(b) CKE.	(d) Wendy's.
 - (2) Dairy Queen belongs to:

(a) Breyer.	(c) GE.
(b) Berkshire Hathaway.	(d) The Coca-Cola Company.
 - (3) Philip Morris, the cigarette maker, is owned by:

(a) Altria.	(c) Boeing.
(b) GE.	(d) ExxonMobil.
 - (4) AOL, a major Internet provider, belongs to:

(a) Microsoft.	(c) NBC.
(b) Cisco.	(d) Time Warner.
- (b) How do you think the value of these brands is reported on the appropriate company's balance sheet?

FASB Codification Activity

BYP9-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- (a) What does it mean to capitalize an item?
- (b) What is the definition provided for an intangible asset?
- (c) Your great-uncle, who is a CPA, is impressed that you are taking an accounting class. Based on his experience, he believes that depreciation is something that companies do based on past practice, not on the basis of authoritative guidance. Provide the authoritative literature to support the practice of fixed-asset depreciation.

A Look at IFRS

LEARNING
OBJECTIVE

7

Compare the accounting for long-lived assets under GAAP and IFRS.

IFRS follows most of the same principles as GAAP in the accounting for property, plant, and equipment. There are, however, some significant differences in the implementation. IFRS allows the use of revaluation of property, plant, and equipment, and it also requires the use of component depreciation. In addition, there are some significant differences in the accounting for both intangible assets and impairments.

Key Points

The following are the key similarities and differences between GAAP and IFRS as related to the recording process for long-lived assets.

Similarities

- The definition for plant assets for both IFRS and GAAP is essentially the same.
- Both IFRS and GAAP follow the historical cost principle when accounting for property, plant, and equipment at date of acquisition. Cost consists of all expenditures necessary to acquire the asset and make it ready for its intended use.
- Under both IFRS and GAAP, interest costs incurred during construction are capitalized. Recently, IFRS converged to GAAP requirements in this area.
- IFRS also views depreciation as an allocation of cost over an asset's useful life. IFRS permits the same depreciation methods (e.g., straight-line, accelerated, and units-of-activity) as GAAP.
- Under both GAAP and IFRS, changes in the depreciation method used and changes in useful life are handled in current and future periods. Prior periods are not affected. GAAP recently conformed to international standards in the accounting for changes in depreciation methods.
- The accounting for subsequent expenditures (such as ordinary repairs and additions) are essentially the same under IFRS and GAAP.
- The accounting for plant asset disposals is essentially the same under IFRS and GAAP.
- Initial costs to acquire natural resources are essentially the same under IFRS and GAAP.
- The definition of intangible assets is essentially the same under IFRS and GAAP.
- The accounting for exchanges of nonmonetary assets has recently converged between IFRS and GAAP. GAAP now requires that gains on exchanges of nonmonetary assets be recognized if the exchange has commercial substance. This is the same framework used in IFRS.

Differences

- IFRS uses the term **residual value** rather than salvage value to refer to an owner's estimate of an asset's value at the end of its useful life for that owner.
- IFRS allows companies to revalue plant assets to fair value at the reporting date. Companies that choose to use the revaluation framework must follow revaluation procedures. If revaluation is used, it must be applied to all assets in a class of assets. Assets that are experiencing rapid price changes must be revalued on an annual basis, otherwise less frequent revaluation is acceptable.

- IFRS requires component depreciation. **Component depreciation** specifies that any significant parts of a depreciable asset that have different estimated useful lives should be separately depreciated. Component depreciation is allowed under GAAP but is seldom used.
- As in GAAP, under IFRS the costs associated with research and development are segregated into the two components. Costs in the research phase are always expensed under both IFRS and GAAP. Under IFRS, however, costs in the development phase are capitalized as Development Costs once technological feasibility is achieved.
- IFRS permits revaluation of intangible assets (except for goodwill). GAAP prohibits revaluation of intangible assets.

Looking to the Future

The IASB and FASB have identified a project that would consider expanded recognition of internally generated intangible assets. IFRS permits more recognition of intangibles compared to GAAP.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following statements is **correct**?
 - (a) Both IFRS and GAAP permit revaluation of property, plant, and equipment and intangible assets (except for goodwill).
 - (b) IFRS permits revaluation of property, plant, and equipment and intangible assets (except for goodwill).
 - (c) Both IFRS and GAAP permit revaluation of property, plant, and equipment but not intangible assets.
 - (d) GAAP permits revaluation of property, plant, and equipment but not intangible assets.
2. Research and development costs are:
 - (a) expensed under GAAP.
 - (b) expensed under IFRS.
 - (c) expensed under both GAAP and IFRS.
 - (d) None of the above.
3. Under IFRS, value-in-use is defined as:
 - (a) net realizable value.
 - (b) fair value.
 - (c) future cash flows discounted to present value.
 - (d) total future undiscounted cash flows.

IFRS Exercises

IFRS9-1 What is component depreciation, and when must it be used?

IFRS9-2 What is revaluation of plant assets? When should revaluation be applied?

IFRS9-3 Some product development expenditures are recorded as development expenses and others as development costs. Explain the difference between these accounts and how a company decides which classification is appropriate.

International Financial Statement Analysis: Louis Vuitton

IFRS9-4 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Use the company's annual report to answer the following questions.

- (a) According to the notes to the financial statements, what method or methods does the company use to depreciate "property, plant, and equipment?" What rate(s) does it use to depreciate property, plant, and equipment?
- (b) Using the notes to the financial statements, identify the brands and trade names that are most significant to the company.
- (c) Using the notes to the financial statements, determine (1) the balance in Accumulated Amortization and Impairment for intangible assets (other than goodwill), and (2) the balance in Accumulated Depreciation for property, plant, and equipment. (Round your amounts to the nearest thousand.)

Answers to IFRS Self-Test Questions

Liabilities

CHAPTER PREVIEW Inventor-entrepreneur Wilbert Murdock, as the Feature Story below notes, had to use multiple credit cards to finance his business ventures. Murdock's credit card debts would be classified as **current liabilities** because they are due every month. Yet, by making minimal payments and paying high interest each month, Murdock used this credit source long-term. Some credit card balances remain outstanding for years as they accumulate interest.

FEATURE STORY

Financing His Dreams

What would you do if you had a great idea for a new product but couldn't come up with the cash to get the business off the ground? Small businesses often cannot attract investors. Nor can they obtain traditional debt financing through bank loans or bond issuances. Instead, they often resort to unusual, and costly, forms of nontraditional financing.

Such was the case for Wilbert Murdock. Murdock grew up in a New York housing project and always had great ambitions. His entrepreneurial spirit led him into some business ventures that failed: a medical diagnostic tool, a device to eliminate carpal tunnel syndrome, custom-designed sneakers, and a device to keep people from falling asleep while driving.

Another idea was computerized golf clubs that analyze a golfer's swing and provide immediate feedback. Murdock saw great potential in the idea. Many golfers are willing to shell out considerable sums of money for devices that might improve their game. But Murdock had no cash to develop his product, and banks and other lenders had shied away.

Rather than give up, Murdock resorted to credit cards—in a big way. He quickly owed \$25,000 to credit card companies.

While funding a business with credit cards might sound unusual, it isn't. A recent study found that one-third of businesses with fewer than 20 employees financed at least part of their operations with credit cards. As Murdock explained, credit cards are an appealing way to finance a start-up because "credit-card companies don't care how the money is spent." However, they do care how they are paid. And so Murdock faced high interest charges and a barrage of credit card collection letters.

Murdock's debt forced him to sacrifice nearly everything in order to keep his business afloat. His car stopped running, he barely had enough money to buy food, and he lived and worked out of a dimly lit apartment in his mother's basement. Through it all he tried to maintain a positive spirit, joking that, if he becomes successful, he might some day get to appear in an **American Express** commercial.

- Use of ratios
- Debt and equity financing

DO IT!

- 5 Analyzing Liabilities

Go to the **REVIEW AND PRACTICE** section at the end of the chapter for a review of key concepts and practice applications with solutions.

Visit **WileyPLUS with ORION** for additional tutorials and practice opportunities.

What Is a Current Liability?

You have learned that liabilities are defined as “creditors’ claims on total assets” and as “existing debts and obligations.” Companies must settle or pay these claims, debts, and obligations at some time in the future by transferring assets or services. The future date on which they are due or payable (the maturity date) is a significant feature of liabilities.

As explained in Chapter 4, a **current liability** is a debt that a company expects to pay within one year or the operating cycle, whichever is longer. Debts that do not meet this criterion are **long-term liabilities**.

Financial statement users want to know whether a company’s obligations are current or long-term. A company that has more current liabilities than current assets often lacks liquidity, or short-term debt-paying ability. In addition, users want to know the types of liabilities a company has. If a company declares bankruptcy, a specific, predetermined order of payment to creditors exists. Thus, the amount and type of liabilities are of critical importance.

The different types of current liabilities include notes payable, accounts payable, unearned revenues, and accrued liabilities such as taxes, salaries and wages, and interest payable. In the sections that follow, we discuss common types of current liabilities.

Helpful Hint

In previous chapters, we explained the entries for accounts payable and the adjusting entries for some current liabilities.

Notes Payable

Companies record obligations in the form of written notes as **notes payable**. Notes payable are often used instead of accounts payable because they give the lender formal proof of the obligation in case legal remedies are needed to collect the debt. Companies frequently issue notes payable to meet short-term financing needs. Notes payable usually require the borrower to pay interest.

Notes are issued for varying periods of time. **Those due for payment within one year of the balance sheet date are usually classified as current liabilities.**

To illustrate the accounting for notes payable, assume that First National Bank agrees to lend \$100,000 on September 1, 2017, if Cole Williams Co. signs a \$100,000, 12%, four-month note maturing on January 1. When a company issues an interest-bearing note, the amount of assets it receives upon issuance of the note generally equals the note’s face value. Cole Williams therefore will receive \$100,000 cash and will make the following journal entry.

A	=	L	+	SE
+100,000		+100,000		
Cash Flows				
+100,000				

Sept. 1	Cash	100,000	
	Notes Payable		100,000
	(To record issuance of 12%, 4-month note to First National Bank)		

Interest accrues over the life of the note, and the company must periodically record that accrual. If Cole Williams prepares financial statements annually, it makes an adjusting entry at December 31 to recognize interest expense and interest payable of \$4,000 ($\$100,000 \times 12\% \times 4/12$). Illustration 10-1 shows the formula for computing interest and its application to Cole Williams’ note.

Illustration 10-1
Formula for computing interest

Face Value of Note	×	Annual Interest Rate	×	Time in Terms of One Year	=	Interest
\$100,000	×	12%	×	4/12	=	\$4,000

Cole Williams makes an adjusting entry as follows.

Dec. 31	Interest Expense	4,000		
	Interest Payable		4,000	
	(To accrue interest for 4 months on First National Bank note)			

A	=	L	+	SE
				-4,000 Exp
				+4,000
<hr/>				
Cash Flows				
no effect				

In the December 31 financial statements, the current liabilities section of the balance sheet will show notes payable \$100,000 and interest payable \$4,000. In addition, the company will report interest expense of \$4,000 under “Other expenses and losses” in the income statement. If Cole Williams prepared financial statements monthly, the adjusting entry at the end of each month would be \$1,000 ($\$100,000 \times 12\% \times 1/12$).

At maturity (January 1, 2018), Cole Williams must pay the face value of the note (\$100,000) plus \$4,000 interest ($\$100,000 \times 12\% \times 4/12$). It records payment of the note and accrued interest as follows.

Jan. 1	Notes Payable	100,000		
	Interest Payable	4,000		
	Cash		104,000	
	(To record payment of First National Bank interest-bearing note and accrued interest at maturity)			

A	=	L	+	SE
		-100,000		-4,000
				-104,000
<hr/>				
Cash Flows				
-104,000 				

Sales Taxes Payable

Many of the products we purchase at retail stores are subject to sales taxes. Many states also are now collecting sales taxes on purchases made on the Internet as well. Sales taxes are expressed as a percentage of the sales price. The selling company collects the tax from the customer when the sale occurs. Periodically (usually monthly), the retailer remits the collections to the state’s department of revenue. Collecting sales taxes is important. For example, the State of New York recently sued **Sprint Corporation** for \$300 million for its alleged failure to collect sales taxes on phone calls.

Under most state sales tax laws, the selling company must enter separately in the cash register the amount of the sale and the amount of the sales tax collected. (Gasoline sales are a major exception.) The company then uses the cash register readings to credit Sales Revenue and Sales Taxes Payable. For example, if the March 25 cash register reading for Cooley Grocery shows sales of \$10,000 and sales taxes of \$600 (sales tax rate of 6%), the journal entry is as follows.

Mar. 25	Cash	10,600		
	Sales Revenue		10,000	
	Sales Taxes Payable		600	
	(To record daily sales and sales taxes)			

A	=	L	+	SE
		+10,600		+10,000 Rev
				+600
<hr/>				
Cash Flows				
+10,600 				

When the company remits the taxes to the taxing agency, it debits Sales Taxes Payable and credits Cash. The company does not report sales taxes as an expense. It simply forwards to the government the amount paid by the customers. Thus, Cooley Grocery serves only as a **collection agent** for the taxing authority.

Sometimes companies do not enter sales taxes separately in the cash register. To determine the amount of sales in such cases, divide total receipts by 100% plus the sales tax percentage. For example, assume that Cooley Grocery enters total receipts of \$10,600. The receipts from the sales are equal to the sales price (100%) plus the tax percentage (6% of sales), or 1.06 times the sales total. We can compute the sales amount as follows.

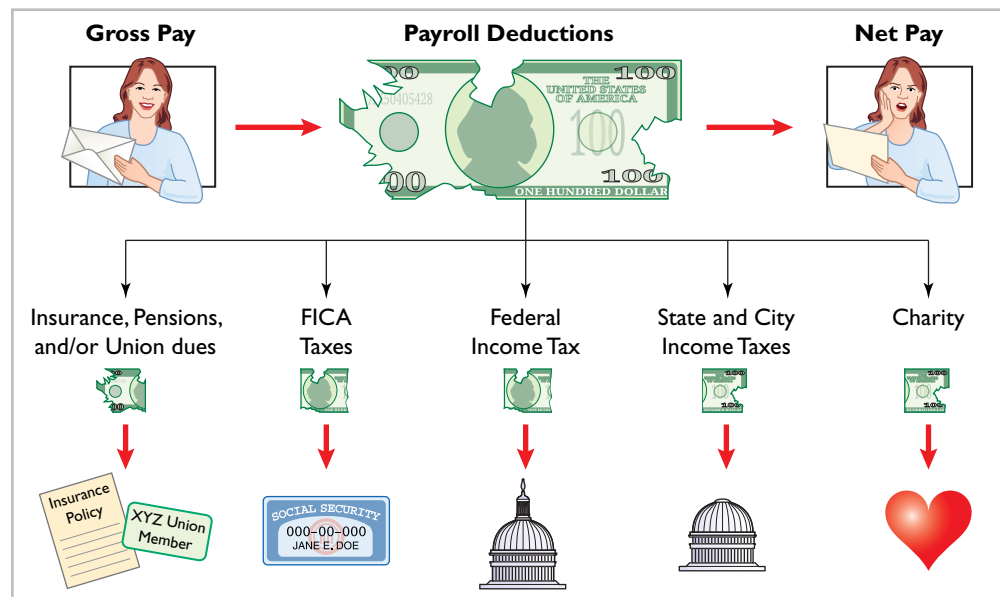

$$\$10,600 \div 1.06 = \$10,000$$

Thus, we can find the sales tax amount of \$600 by either (1) subtracting sales from total receipts (\$10,600 – \$10,000) or (2) multiply sales by the sales tax rate (\$10,000 × .06).

Payroll and Payroll Taxes Payable

Assume that Susan Alena works 40 hours this week for Pepitone Inc., earning a wage of \$10 per hour. Will Susan receive a \$400 check at the end of the week? Not likely. The reason: Pepitone is required to withhold amounts from her wages to pay various governmental authorities. For example, Pepitone will withhold amounts for Social Security taxes¹ and for federal and state income taxes. If these withholdings total \$100, Susan will receive a check for only \$300. Illustration 10-2 summarizes the types of payroll deductions that normally occur for most companies.

Illustration 10-2
Payroll deductions

As a result of these deductions, companies withhold from employee paychecks amounts that must be paid to other parties. Pepitone therefore has incurred a liability to pay these third parties and must report this liability in its balance sheet.

As a second illustration, assume that Cargo Corporation records its payroll for the week of March 7 with the journal entry shown below.

A	=	L	+	SE
		-100,000 Exp		
		+7,650		
		+21,864		
		+2,922		
		+67,564		
Cash Flows				
no effect				

Mar. 7	Salaries and Wages Expense	100,000	
	FICA Taxes Payable		7,650
	Federal Income Taxes Payable		21,864
	State Income Taxes Payable		2,922
	Salaries and Wages Payable		67,564
	(To record payroll and withholding taxes for the week ending March 7)		

¹Social Security taxes are commonly called FICA taxes. In 1937, Congress enacted the Federal Insurance Contribution Act (FICA). As can be seen in the journal entry and the payroll tax journal entry on the next page, the employee and employer must make equal contributions to Social Security. The Social Security rate in 2014 was 7.65%. Our examples and homework use 7.65% for both.

Cargo then records payment of this payroll on March 7 as follows.

Mar. 7	Salaries and Wages Payable	67,564	67,564
	Cash		
	(To record payment of the March 7 payroll)		

A	=	L	+	SE
		-67,564		
		-67,564		
Cash Flows				
		-67,564		

In this case, Cargo reports \$100,000 in salaries and wages expense. In addition, it reports liabilities for the salaries and wages payable as well as liabilities to governmental agencies. Rather than pay the employees \$100,000, Cargo instead must withhold the taxes and make the tax payments directly. In summary, Cargo is essentially serving as a tax collector.

In addition to the liabilities incurred as a result of withholdings, employers also incur a second type of payroll-related liability. With every payroll, the employer incurs liabilities to pay various **payroll taxes** levied upon the employer. These payroll taxes include the **employer's share** of Social Security (FICA) taxes and state and federal unemployment taxes. Based on Cargo Corp.'s \$100,000 payroll, the company would record the employer's expense and liability for these payroll taxes as follows.

Mar. 7	Payroll Tax Expense	13,850	
	FICA Taxes Payable		7,650
	Federal Unemployment Taxes Payable		800
	State Unemployment Taxes Payable		5,400
	(To record employer's payroll taxes on March 7 payroll)		

A	=	L	+	SE
		-13,850 Exp		
		+7,650		
		+800		
		+5,400		
Cash Flows				
				no effect

Companies classify the payroll and payroll tax liability accounts as current liabilities because they must be paid to employees or remitted to taxing authorities periodically and in the near term. Taxing authorities impose substantial fines and penalties on employers if the withholding and payroll taxes are not computed correctly and paid on time.

ANATOMY OF A FRAUD

Art was a custodial supervisor for a large school district. The district was supposed to employ between 35 and 40 regular custodians, as well as 3 or 4 substitute custodians to fill in when regular custodians were absent. Instead, in addition to the regular custodians, Art "hired" 77 substitutes. In fact, almost none of these people worked for the district. Instead, Art submitted time cards for these people, collected their checks at the district office, and personally distributed the checks to the "employees." If a substitute's check was for \$1,200, that person would cash the check, keep \$200, and pay Art \$1,000.

Total take: \$150,000

THE MISSING CONTROLS

Human resource controls. Thorough background checks should be performed. No employees should begin work until they have been approved by the Board of Education and entered into the payroll system. No employees should be entered into the payroll system until they have been approved by a supervisor. All paychecks should be distributed directly to employees at the official school locations by designated employees.

Independent internal verification. Budgets should be reviewed monthly to identify situations where actual costs significantly exceed budgeted amounts.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 164–171.

DO IT! 1a **Wages and Payroll Taxes**

During the month of September, Lake Corporation's employees earned wages of \$60,000. Withholdings related to these wages were \$4,590 for Social Security (FICA), \$6,500 for federal income tax, and \$2,000 for state income tax. Costs incurred for unemployment taxes were \$90 for federal and \$150 for state.

Prepare the September 30 journal entries for (a) salaries and wages expense and salaries and wages payable, assuming that all September wages will be paid in October, and (b) the company's payroll tax expense.

Solution**Action Plan**

- ✓ Remember that wages earned are an expense to the company, but withholdings reduce the amount due to be paid to the employee.
- ✓ Payroll taxes are taxes the company incurs related to its employees.

(a) To determine wages payable, reduce wages expense by the withholdings for FICA, federal income tax, and state income tax.

Sept. 30	Salaries and Wages Expense	60,000	
	FICA Taxes Payable		4,590
	Federal Income Taxes Payable		6,500
	State Income Taxes Payable		2,000
	Salaries and Wages Payable		46,910

(b) Payroll taxes would be for the company's share of FICA, as well as for federal and state unemployment tax.

Sept. 30	Payroll Tax Expense	4,830	
	FICA Taxes Payable		4,590
	Federal Unemployment Taxes Payable		90
	State Unemployment Taxes Payable		150

Unearned Revenues

A magazine publisher, such as **Sports Illustrated**, receives customers' checks when they order magazines. An airline company, such as **Southwest Airlines**, often receives cash when it sells tickets for future flights. Season tickets for concerts, sporting events, and theater programs are also paid for in advance. How do companies account for unearned revenues that are received before goods are delivered or services are performed?

1. When a company receives the advance payment, it debits Cash and credits a current liability account identifying the source of the unearned revenue.
2. When the company recognizes revenue, it debits an unearned revenue account and credits a revenue account.

To illustrate, assume that Superior University sells 10,000 season football tickets at \$50 each for its five-game home schedule. The university makes the following entry for the sale of season tickets.

A	=	L	+	SE
+500,000				
		+500,000		

Cash Flows
+500,000

A	=	L	+	SE
		-100,000		
		+100,000 Rev		

Cash Flows
no effect

Aug. 6	Cash	500,000	
	Unearned Ticket Revenue		500,000
	(To record sale of 10,000 season tickets)		

As each game is completed, Superior records the recognition of revenue with the following entry.

Sept. 7	Unearned Ticket Revenue	100,000	
	Ticket Revenue		100,000
	(To record football ticket revenue)		

The account Unearned Ticket Revenue represents unearned revenue, and Superior reports it as a current liability. As the school recognizes revenue, it

reclassifies the amount from unearned revenue to Ticket Revenue. Unearned revenue is substantial for some companies. In the airline industry, for example, tickets sold for future flights represent almost 50% of total current liabilities. At **United Air Lines**, unearned ticket revenue is its largest current liability, recently amounting to over \$1 billion.

Illustration 10-3 shows specific unearned revenue and revenue accounts used in selected types of businesses.

Type of Business	Account Title	
	Unearned Revenue	Revenue
Airline	Unearned Ticket Revenue	Ticket Revenue
Magazine publisher	Unearned Subscription Revenue	Subscription Revenue
Hotel	Unearned Rent Revenue	Rent Revenue

Illustration 10-3

Unearned revenue and revenue accounts

Current Maturities of Long-Term Debt

Companies often have a portion of long-term debt that comes due in the current year. That amount is considered a current liability. As an example, assume that Wendy Construction issues a five-year, interest-bearing \$25,000 note on January 1, 2017. This note specifies that each January 1, starting January 1, 2018, Wendy should pay \$5,000 of the note. When the company prepares financial statements on December 31, 2017, it should report \$5,000 as a current liability and \$20,000 as a long-term liability. (The \$5,000 amount is the portion of the note that is due to be paid within the next 12 months.) Companies often identify current maturities of long-term debt on the balance sheet as **long-term debt due within one year**. In a recent year, **General Motors** had \$724 million of such debt.

It is not necessary to prepare an adjusting entry to recognize the current maturity of long-term debt. At the balance sheet date, all obligations due within one year are classified as current, and all other obligations as long-term.

DO IT! 1b Current Liabilities

You and several classmates are studying for the next accounting examination. They ask you to answer the following questions.

1. If cash is borrowed on a \$50,000, 6-month, 12% note on September 1, how much interest expense would be incurred by December 31?
2. How is the sales tax amount determined when the cash register total includes sales taxes?
3. If \$15,000 is collected in advance on November 1 for 3 months' rent, what amount of rent revenue should be recognized by December 31?

Solution

1. $\$50,000 \times 12\% \times 4/12 = \$2,000$
2. First, divide the total cash register receipts by 100% plus the sales tax percentage to find the sales revenue amount. Second, subtract the sales revenue amount from the total cash register receipts to determine the sales taxes.
3. $\$15,000 \times 2/3 = \$10,000$

Related exercise material: **BE10-1, BE10-2, BE10-3, BE10-4, E10-1, E10-2, E10-3, E10-4, and DO IT! 10-1b.**

Action Plan

- ✓ Use the interest formula: Face value of note \times Annual interest rate \times Time in terms of one year.
- ✓ Divide total receipts by 100% plus the tax rate to determine sales revenue; then subtract sales revenue from the total receipts.
- ✓ Determine what fraction of the total unearned rent should be recognized this year.

Describe the major characteristics of bonds.

Long-term liabilities are obligations that a company expects to pay more than one year in the future. In this section, we explain the accounting for the principal types of obligations reported in the long-term liabilities section of the balance sheet. These obligations often are in the form of bonds or long-term notes.

Bonds are a form of interest-bearing note payable issued by corporations, universities, and governmental agencies. Bonds, like common stock, are sold in small denominations (usually \$1,000 or multiples of \$1,000). As a result, bonds attract many investors. When a corporation issues bonds, it is borrowing money. The person who buys the bonds (the bondholder) is investing in bonds.

Types of Bonds

Bonds may have many different features. In the following sections, we describe the types of bonds commonly issued.

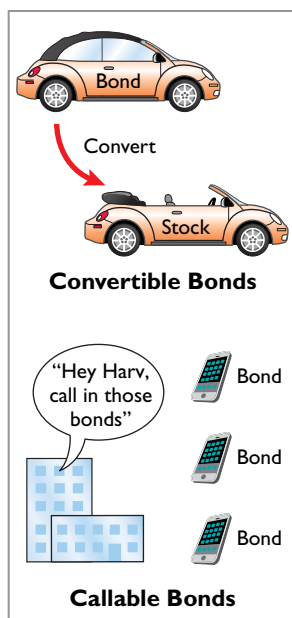

SECURED AND UNSECURED BONDS

Secured bonds have specific assets of the issuer pledged as collateral for the bonds. A bond secured by real estate, for example, is called a **mortgage bond**. A bond secured by specific assets set aside to redeem (retire) the bonds is called a **sinking fund bond**.

Unsecured bonds, also called **debenture bonds**, are issued against the general credit of the borrower. Companies with good credit ratings use these bonds extensively. For example, at one time, **DuPont** reported over \$2 billion of debenture bonds outstanding.

CONVERTIBLE AND CALLABLE BONDS

Bonds that can be converted into common stock at the bondholder's option are **convertible bonds**. The conversion feature generally is attractive to bond buyers. Bonds that the issuing company can redeem (buy back) at a stated dollar amount prior to maturity are **callable bonds**. A call feature is included in nearly all corporate bond issues.

Issuing Procedures

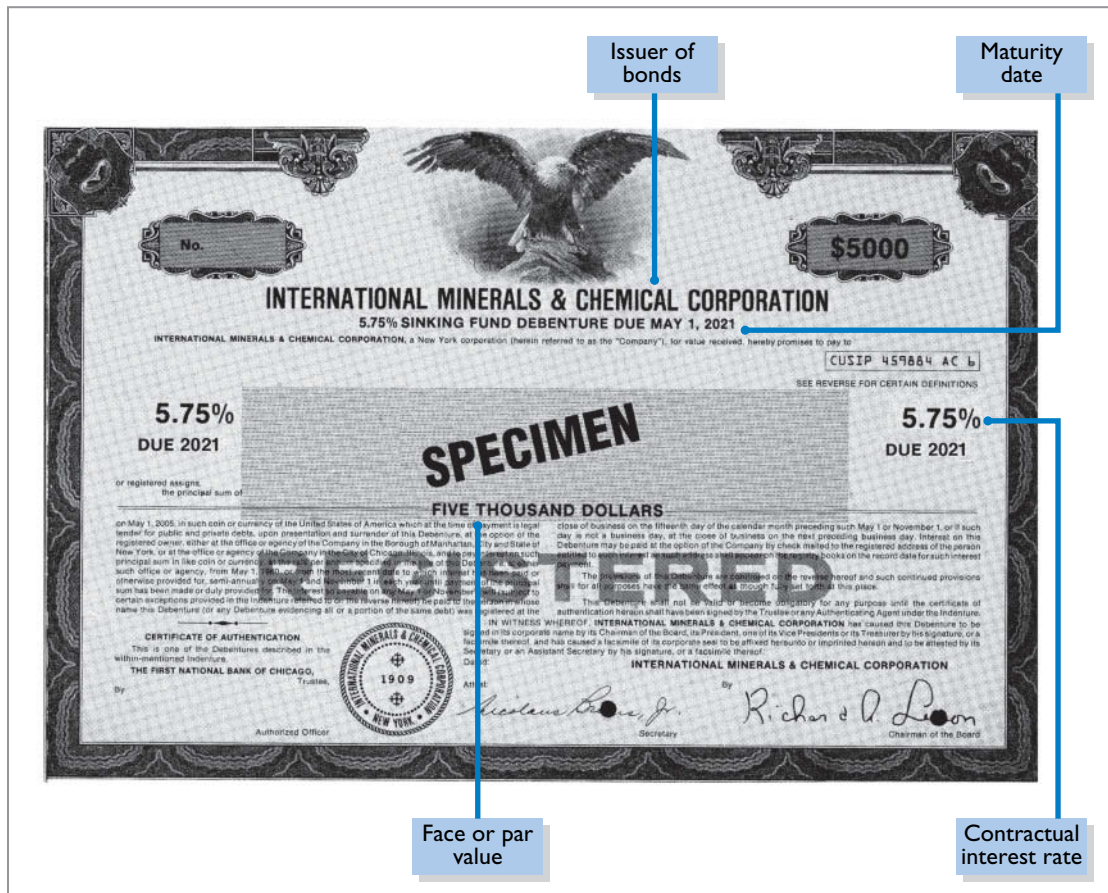

State laws grant corporations the power to issue bonds. Both the board of directors and stockholders usually must approve bond issues. **In authorizing the bond issue, the board of directors must stipulate the number of bonds to be authorized, total face value, and contractual interest rate.** The total bond authorization often exceeds the number of bonds the company originally issues. This gives the corporation the flexibility to issue more bonds, if needed, to meet future cash requirements.

The **face value** is the amount of principal due at the maturity date. The **maturity date** is the date that the final payment is due to the investor from the issuing company. The **contractual interest rate**, often referred to as the **stated rate**, is the rate used to determine the amount of cash interest the issuing company pays and the investor receives. Usually, the contractual rate is stated as an annual rate.

The terms of the bond issue are set forth in a legal document called a **bond indenture**. The indenture shows the terms and summarizes the rights of the bondholders and their trustees, and the obligations of the issuing company. The **trustee** (usually a financial institution) keeps records of each bondholder, maintains custody of unissued bonds, and holds conditional title to pledged property.

In addition, the issuing company arranges for the printing of **bond certificates**. The indenture and the certificate are separate documents. As shown in Illustration 10-4, a bond certificate provides the following information: name of the issuer, face value, contractual interest rate, and maturity date. An investment company that specializes in selling securities generally sells the bonds for the issuing company.

Illustration 10-4
Bond certificate

Bond Trading

Bondholders have the opportunity to convert their holdings into cash at any time by selling the bonds at the current market price on national securities exchanges. **Bond prices are quoted as a percentage of the face value of the bond, which is usually \$1,000.** A \$1,000 bond with a quoted price of 97 means that the selling price of the bond is 97% of face value, or \$970. Newspapers and the financial press publish bond prices and trading activity daily, as shown in Illustration 10-5.

Bonds	Maturity	Close	Yield	Est. Volume (000)
Boeing Co. 5.125	Feb. 15, 2017	96.595	5.747	33,965

Illustration 10-5
Market information for bonds

This bond listing indicates that **Boeing Co.** has outstanding 5.125%, \$1,000 bonds that mature in 2017. They currently yield a 5.747% return. On this day, \$33,965,000 of these bonds were traded. At the close of trading, the price was 96.595% of face value, or \$965.95.

A corporation makes journal entries **only when it issues or buys back bonds**, or when bondholders convert bonds into common stock. For example,

Helpful Hint
The price of a \$1,000 bond trading at $95\frac{1}{4}$ is \$952.50.

DuPont does not journalize transactions between its bondholders and other investors. If Tom Smith sells his DuPont bonds to Faith Jones, DuPont does not journalize the transaction.

Determining the Market Price of a Bond

If you were an investor wanting to purchase a bond, how would you determine how much to pay? To be more specific, assume that Coronet, Inc. issues a **zero-interest bond** (pays no interest) with a face value of \$1,000,000 due in 20 years. For this bond, the only cash you receive is a million dollars at the end of 20 years. Would you pay a million dollars for this bond? We hope not! A million dollars received 20 years from now is not the same as a million dollars received today.

The term **time value of money** is used to indicate the relationship between time and money—that a dollar received today is worth more than a dollar promised at some time in the future. If you had \$1 million today, you would invest it. From that investment, you would earn interest such that at the end of 20 years, you would have much more than \$1 million. Thus, if someone is going to pay you \$1 million 20 years from now, you would want to find its equivalent today, or its present value. In other words, you would want to determine the value today of the amount to be received in the future after taking into account current interest rates.

The current market price (present value) of a bond is the value at which it should sell in the marketplace. Market price therefore is a function of the three factors that determine present value: (1) the dollar amounts to be received, (2) the length of time until the amounts are received, and (3) the market rate of interest. The **market interest rate** is the rate investors demand for loaning funds.

To illustrate, assume that Acropolis Company on January 1, 2017, issues \$100,000 of 9% bonds, due in five years, with interest payable annually at year-end. The purchaser of the bonds would receive the following two types of cash payments: (1) **principal** of \$100,000 to be paid at maturity, and (2) five \$9,000 **interest payments** (\$100,000 × 9%) over the term of the bonds. Illustration 10-6 shows a time diagram depicting both cash flows.

Illustration 10-6

Time diagram depicting cash flows

The current market price of a bond is equal to the present value of all the future cash payments promised by the bond. Illustration 10-7 lists and totals the present values of these amounts, assuming the market rate of interest is 9%.

Illustration 10-7

Computing the market price of bonds

Present value of \$100,000 received in 5 years	\$ 64,993
Present value of \$9,000 received annually for 5 years	35,007
Market price of bonds	<u><u>\$100,000</u></u>

Tables are available to provide the present value numbers to be used, or these values can be determined mathematically or with financial calculators.² Appendix D, near the end of the textbook, provides further discussion of the concepts and the mechanics of the time value of money computations.

²For those knowledgeable in the use of present value tables, the computations in the example shown in Illustration 10-7 are $\$100,000 \times .64993 = \$64,993$, and $\$9,000 \times 3.88965 = \$35,007$ (rounded).

Investor Insight

© alphaspirt/Shutterstock

Running Hot!

Recently, the market for bonds was running hot. For example, consider these two large deals: **Apple Inc.** sold \$17 billion of debt, which at the time was the largest corporate bond ever sold. But shortly thereafter, it was beat by **Verizon Communications Inc.**, which sold \$49 billion of debt. The following chart highlights the increased issuance of bonds.

As one expert noted about these increases, "Companies are taking advantage of this lower-rate environment in the limited period of time it is going to be around." An interesting aspect of these bond issuances is that companies, like **Philip Morris International**, **Medtronic, Inc.**, and **Simon Properties**, are even selling 30-year bonds. These bond issuers are benefitting from "a massive sentiment shift," says one bond expert. The belief that the economy will recover is making investors more comfortable holding longer-term bonds, as they search for investments that offer better returns than U.S. Treasury bonds.

Sources: Vipal Monga, "The Big Number," *Wall Street Journal* (March 20, 2012), p. B5; and Mike Cherney, "Renewed Embrace of Bonds Sparks Boom," *Wall Street Journal* (March 8–9, 2014), p. B5.

What are the advantages for companies of issuing 30-years bonds instead of 5-year bonds? (Go to **WileyPLUS** for this answer and additional questions.)

2

Bond Terminology

State whether each of the following statements is true or false. If false, indicate how to correct the statement.

- _____ 1. Mortgage bonds and sinking fund bonds are both examples of secured bonds.
- _____ 2. Unsecured bonds are also known as debenture bonds.
- _____ 3. The stated rate is the rate investors demand for loaning funds.
- _____ 4. The face value is the amount of principal the issuing company must pay at the maturity date.
- _____ 5. The market price of a bond is equal to its maturity value.

Solution

1. True. 2. True. 3. False. The stated rate is the contractual interest rate used to determine the amount of cash interest the borrower pays. 4. True. 5. False. The market price of a bond is the value at which it should sell in the marketplace. As a result, the market price of the bond and its maturity value are often different.

Action Plan

- ✓ Review the types of bonds and the basic terms associated with bonds.

Related exercise material: **E10-7** and **DO IT! 10-2**.

LEARNING
OBJECTIVE

3

Explain how to account for bond transactions.

As indicated earlier, a corporation records bond transactions when it issues (sells) or redeems (buys back) bonds and when bondholders convert bonds into common stock. If bondholders sell their bond investments to other investors, the issuing company receives no further money on the transaction, **nor does the issuing company journalize the transaction** (although it does keep records of the names of bondholders in some cases).

Bonds may be issued at face value, below face value (discount), or above face value (premium). Bond prices for both new issues and existing bonds are quoted as a **percentage of the face value of the bond**. **Face value is usually \$1,000**. Thus, a \$1,000 bond with a quoted price of 97 means that the selling price of the bond is 97% of face value, or \$970.

Issuing Bonds at Face Value

To illustrate the accounting for bonds issued at face value, assume that on January 1, 2017, Candlestick, Inc. issues \$100,000, five-year, 10% bonds at 100 (100% of face value). The entry to record the sale is as follows.

A	=	L	+	SE
+100,000		+100,000		
<hr/>				
Cash Flows				
+100,000				

Jan. 1	Cash	100,000	
	Bonds Payable		100,000
	(To record sale of bonds at face value)		

Candlestick reports bonds payable in the long-term liabilities section of the balance sheet because the maturity date is January 1, 2022 (more than one year away).

Over the term (life) of the bonds, companies make entries to record bond interest. Interest on bonds payable is computed in the same manner as interest on notes payable, as explained on page 446. Assume that interest is payable annually on January 1 on the Candlestick bonds. In that case, Candlestick accrues interest of \$10,000 ($\$100,000 \times 10\%$) on December 31. At December 31, Candlestick recognizes the \$10,000 of interest expense incurred with the following entry.

A	=	L	+	SE
		-10,000 Exp		
		+10,000		
<hr/>				
Cash Flows				
no effect				

Dec. 31	Interest Expense	10,000	
	Interest Payable		10,000
	(To accrue bond interest)		

The company classifies interest payable as a current liability because it is scheduled for payment within the next year. When Candlestick pays the interest on January 1, 2018, it debits (decreases) Interest Payable and credits (decreases) Cash for \$10,000.

Candlestick records the payment on January 1 as follows.

A	=	L	+	SE
		-10,000		
-10,000				
<hr/>				
Cash Flows				
-10,000				

Jan. 1	Interest Payable	10,000	
	Cash		10,000
	(To record payment of bond interest)		

Discount or Premium on Bonds

The previous example assumed that the contractual (stated) interest rate and the market (effective) interest rate paid on the bonds were the same. Recall that the **contractual interest rate** is the rate applied to the face (par) value to arrive at the interest paid in a year. The **market interest rate** is the rate investors demand for loaning funds to the corporation. When the contractual interest rate and the market interest rate are the same, bonds sell **at face value (par value)**.

However, market interest rates change daily. The type of bond issued, the state of the economy, current industry conditions, and the company's performance all

affect market interest rates. As a result, contractual and market interest rates often differ. To make bonds salable when the two rates differ, bonds sell below or above face value.

To illustrate, suppose that a company issues 10% bonds at a time when other bonds of similar risk are paying 12%. Investors will not be interested in buying the 10% bonds, so their value will fall below their face value. When a bond is sold for less than its face value, the difference between the face value of a bond and its selling price is called a **discount**. As a result of the decline in the bonds' selling price, the actual interest rate incurred by the company increases to the level of the current market interest rate.

Conversely, if the market rate of interest is **lower than** the contractual interest rate, investors will have to pay more than face value for the bonds. That is, if the market rate of interest is 8% but the contractual interest rate on the bonds is 10%, the price of the bonds will be bid up. When a bond is sold for more than its face value, the difference between the face value and its selling price is called a **premium**. Illustration 10-8 shows these relationships.

Illustration 10-8
Interest rates and bond prices

Issuance of bonds at an amount different from face value is quite common. By the time a company prints the bond certificates and markets the bonds, it will be a coincidence if the market rate and the contractual rate are the same. Thus, the issuance of bonds at a discount does not mean that the issuer's financial strength is suspect. Conversely, the sale of bonds at a premium does not indicate that the financial strength of the issuer is exceptional.

Issuing Bonds at a Discount

To illustrate issuance of bonds at a discount, assume that on January 1, 2017, Candlestick, Inc. sells \$100,000, five-year, 10% bonds for \$98,000 (98% of face value). Interest is payable annually on January 1. The entry to record the issuance is as follows.

Jan. 1	Cash	98,000		
	Discount on Bonds Payable	2,000		
	Bonds Payable			100,000
	(To record sale of bonds at a discount)			

Although Discount on Bonds Payable has a debit balance, **it is not an asset**. Rather, it is a **contra account**. This account is **deducted from bonds payable** on the balance sheet, as shown in Illustration 10-9.

Helpful Hint

Discount on Bonds Payable	
Increase Debit	Decrease Credit

Balance Sheet (partial)		
Long-term liabilities		
Bonds payable	\$100,000	
Less: Discount on bonds payable	2,000	\$98,000

Illustration 10-9
Statement presentation of discount on bonds payable

Helpful Hint

Carrying value (book value) of bonds issued at a discount is determined by subtracting the balance of the discount account from the balance of the Bonds Payable account.

The \$98,000 represents the **carrying (or book) value** of the bonds. On the date of issue, this amount equals the market price of the bonds.

The issuance of bonds below face value—at a discount—causes the total cost of borrowing to differ from the bond interest paid. That is, the issuing corporation must pay not only the contractual interest rate over the term of the bonds but also the face value (rather than the issuance price) at maturity. Therefore, the difference between the issuance price and face value of the bonds—the discount—is an **additional cost of borrowing**. The company records this additional cost as **interest expense** over the life of the bonds. The total cost of borrowing \$98,000 for Candlestick, Inc. is therefore \$52,000, computed as follows.

Illustration 10-10

Total cost of borrowing—
bonds issued at a discount

<u>Bonds Issued at a Discount</u>	
Annual interest payments (\$100,000 × 10% = \$10,000; \$10,000 × 5)	\$ 50,000
Add: Bond discount (\$100,000 – \$98,000)	<u>2,000</u>
Total cost of borrowing	<u>\$52,000</u>

Alternatively, we can compute the total cost of borrowing as follows.

Illustration 10-11

Alternative computation of
total cost of borrowing—bonds
issued at a discount

<u>Bonds Issued at a Discount</u>	
Principal at maturity	\$100,000
Annual interest payments (\$10,000 × 5)	<u>50,000</u>
Cash to be paid to bondholders	150,000
Less: Cash received from bondholders	<u>98,000</u>
Total cost of borrowing	<u>\$ 52,000</u>

To follow the expense recognition principle, companies allocate bond discount to expense in each period in which the bonds are outstanding. This is referred to as **amortizing the discount**. Amortization of the discount **increases** the amount of interest expense reported each period. That is, after the company amortizes the discount, the amount of interest expense it reports in a period will exceed the contractual amount. As shown in Illustration 10-10, for the bonds issued by Candlestick, Inc., total interest expense will exceed the contractual interest by \$2,000 over the life of the bonds.

As the discount is amortized, its balance declines. As a consequence, the carrying value of the bonds will increase, until at maturity the carrying value of the bonds equals their face amount. This is shown in Illustration 10-12. Appendices 10A and 10B at the end of this chapter discuss procedures for amortizing bond discount.

Illustration 10-12

Amortization of bond discount

Issuing Bonds at a Premium

To illustrate the issuance of bonds at a premium, we now assume the Candlestick, Inc. bonds described above sell for \$102,000 (102% of face value) rather than for \$98,000. The entry to record the sale is as follows.

Jan. 1	Cash	102,000	
	Bonds Payable		100,000
	Premium on Bonds Payable		2,000
	(To record sale of bonds at a premium)		

Candlestick adds the premium on bonds payable to the bonds payable amount on the balance sheet, as shown in Illustration 10-13.

CANDLESTICK, INC. Balance Sheet (partial)			
Long-term liabilities			
Bonds payable	\$100,000		
Add: Premium on bonds payable	2,000		\$102,000

The sale of bonds above face value causes the total cost of borrowing to be **less than the bond interest paid**. The reason: The borrower is not required to pay the bond premium at the maturity date of the bonds. Thus, the bond premium is considered to be a **reduction in the cost of borrowing** that reduces bond interest over the life of the bonds. The total cost of borrowing \$102,000 for Candlestick, Inc. is shown in Illustrations 10-14 and 10-15.

Bonds Issued at a Premium	
Annual interest payments (\$100,000 × 10% = \$10,000; \$10,000 × 5)	\$ 50,000
Less: Bond premium (\$102,000 – \$100,000)	2,000
Total cost of borrowing	\$48,000

Alternatively, we can compute the cost of borrowing as follows.

Bonds Issued at a Premium	
Principal at maturity	\$100,000
Annual interest payments (\$10,000 × 5)	50,000
Cash to be paid to bondholders	150,000
Less: Cash received from bondholders	102,000
Total cost of borrowing	\$ 48,000

Similar to bond discount, companies allocate bond premium to expense in each period in which the bonds are outstanding. This is referred to as **amortizing the premium**. Amortization of the premium **decreases** the amount of interest expense reported each period. That is, after the company amortizes the premium, the amount of interest expense it reports in a period will be less than the contractual amount. As shown in Illustration 10-14, for the bonds issued by Candlestick, Inc., contractual interest will exceed the interest expense by \$2,000 over the life of the bonds.

As the premium is amortized, its balance declines. As a consequence, the carrying value of the bonds will decrease, until at maturity the carrying value of the bonds equals their face amount. This is shown in Illustration 10-16 (page 460). Appendices 10A and 10B at the end of this chapter discuss procedures for amortizing bond premium.

DO IT! 3a **Bond Issuance**

Giant Corporation issues \$200,000 of bonds for \$189,000. (a) Prepare the journal entry to record the issuance of the bonds, and (b) show how the bonds would be reported on the balance sheet at the date of issuance.

Solution

Action Plan

- ✓ Record cash received, bonds payable at face value, and the difference as a discount or premium.
- ✓ Report discount as a deduction from bonds payable and premium as an addition to bonds payable.

(a)	Cash	189,000	
	Discount on Bonds Payable	11,000	
	Bonds Payable		200,000
	(To record sale of bonds at a discount)		
(b)	Long-term liabilities		
	Bonds payable	\$200,000	
	Less: Discount on bonds payable	11,000	\$189,000

Related exercise material: **BE10-7, BE10-8, BE10-9, BE10-10, BE10-11, E10-8, E10-9, E10-10, and DO IT! 10-3a.**

Redeeming and Converting Bonds

REDEEMING BONDS AT MATURITY

Regardless of the issue price of bonds, the book value of the bonds at maturity will equal their face value. Assuming that the company pays and records separately the interest for the last interest period, Candlestick records the redemption of its bonds at maturity as follows.

Jan. 1	Bonds Payable	100,000	
	Cash		100,000
	(To record redemption of bonds at maturity)		

REDEEMING BONDS BEFORE MATURITY

Bonds may be redeemed before maturity. A company may decide to redeem bonds before maturity to reduce interest cost and to remove debt from its balance sheet. A company should redeem debt early only if it has sufficient cash resources.

When a company redeems bonds before maturity, it is necessary to (1) eliminate the carrying value of the bonds at the redemption date, (2) record the cash paid, and (3) recognize the gain or loss on redemption. The **carrying value** of the bonds is the face value of the bonds less any remaining bond discount or plus any remaining bond premium at the redemption date.

To illustrate, assume that Candlestick, Inc. has sold its bonds at a premium. At the end of the fourth period, Candlestick redeems these bonds at 103 after

A	=	L	+	SE
		-100,000		
-100,000				
Cash Flows				
-100,000				

Helpful Hint

If a bond is redeemed prior to its maturity date and its carrying value exceeds its redemption price, this results in a gain.

paying the annual interest. Assume that the carrying value of the bonds at the redemption date is \$100,400 (principal \$100,000 and premium \$400). Candlestick records the redemption at the end of the fourth interest period (January 1, 2021) as follows.

Jan. 1	Bonds Payable	100,000	
	Premium on Bonds Payable	400	
	Loss on Bond Redemption	2,600	
	Cash		103,000
	(To record redemption of bonds at 103)		

Note that the loss of \$2,600 is the difference between the cash paid of \$103,000 and the carrying value of the bonds of \$100,400.

CONVERTING BONDS INTO COMMON STOCK

Convertible bonds have features that are attractive both to bondholders and to the issuer. The conversion often gives bondholders an opportunity to benefit if the market price of the common stock increases substantially. Until conversion, though, the bondholder receives interest on the bond. For the issuer of convertible bonds, the bonds sell at a higher price and pay a lower rate of interest than comparable debt securities without the conversion option. Many corporations, such as **Intel**, **Ford**, and **Wells Fargo**, have convertible bonds outstanding.

When the issuing company records a conversion, the company ignores the current market prices of the bonds and stock. Instead, the company transfers the **carrying value** of the bonds to paid-in capital accounts. **No gain or loss is recognized.**

To illustrate, assume that on July 1, Saunders Associates converts \$100,000 bonds sold at face value into 2,000 shares of \$10 par value common stock. Both the bonds and the common stock have a market value of \$130,000. Saunders makes the following entry to record the conversion.

July 1	Bonds Payable	100,000	
	Common Stock		20,000
	Paid-in Capital in Excess of Par—		
	Common Stock		80,000
	(To record bond conversion)		

Note that the company does not consider the current market value of the bonds and stock (\$130,000) in making the entry. This method of recording the bond conversion is often referred to as the **carrying (or book) value method**.

A	=	L	+	SE
		-100,000		
		-400		
				-2,600 Exp
				-103,000
<hr/>				
Cash Flows				
				-103,000

Helpful Hint

When a company records issuance of common stock, it credits the par value of the shares to Common Stock. It also records in a separate paid-in capital account any excess that is above or below par value.

People, Planet, and Profit Insight Unilever

© CarpathianPrince/Shutterstock

How About Some Green Bonds?

Unilever recently began producing popular frozen treats such as Magnums and Cornettos, funded by green bonds. Green bonds are

debt used to fund activities such as renewable-energy projects. In Unilever's case, the proceeds from the sale of green bonds are used to clean up the company's manufacturing operations and cut waste (such as related to energy consumption).

The use of green bonds has taken off as companies now have guidelines as to how to disclose and report on these green-bond proceeds. These standardized

disclosures provide transparency as to how these bonds are used and their effect on overall profitability.

Investors are taking a strong interest in these bonds. Investing companies are installing socially responsible investing teams and have started to integrate sustainability into their investment processes. The disclosures of how companies are using the bond proceeds help investors to make better financial decisions.

Source: Ben Edwards, "Green Bonds Catch On." *Wall Street Journal* (April 3, 2014), p. C5.

Why might standardized disclosure help investors to better understand how proceeds from the sale or issuance of bonds are used? (Go to **WILEYPLUS** for this answer and additional questions.)

DO IT!

3b

Bond Redemption

R & B Inc. issued \$500,000, 10-year bonds at a discount. Prior to maturity, when the carrying value of the bonds is \$496,000, the company redeems the bonds at 98. Prepare the entry to record the redemption of the bonds.

Solution

Action Plan

- ✓ Determine and eliminate the carrying value of the bonds.
- ✓ Record the cash paid.
- ✓ Compute and record the gain or loss (the difference between the first two items).

There is a gain on redemption. The cash paid, \$490,000 ($\$500,000 \times 98\%$), is less than the carrying value of \$496,000. The entry is:

Bonds Payable	500,000	
Discount on Bonds Payable		4,000
Gain on Bond Redemption		6,000
Cash		490,000
(To record redemption of bonds at 98)

LEARNING
OBJECTIVE

4

Explain how to account for long-term notes payable.

The use of notes payable in long-term debt financing is quite common. **Long-term notes payable** are similar to short-term interest-bearing notes payable except that the term of the notes exceeds one year. In periods of unstable interest rates, lenders may tie the interest rate on long-term notes to changes in the market rate for comparable loans.

A long-term note may be secured by a **mortgage** that pledges title to specific assets as security for a loan. Individuals widely use **mortgage notes payable** to purchase homes, and many small and some large companies use them to acquire plant assets. At one time, approximately 18% of **McDonald's** long-term debt related to mortgage notes on land, buildings, and improvements.

Like other long-term notes payable, the mortgage loan terms may stipulate either a **fixed** or an **adjustable** interest rate. The interest rate on a fixed-rate mortgage remains the same over the life of the mortgage. The interest rate on an adjustable-rate mortgage is adjusted periodically to reflect changes in the market rate of interest. Typically, the terms require the borrower to make equal installment payments over the term of the loan. Each payment consists of (1) interest on the unpaid balance of the loan and (2) a reduction of loan principal. While the total amount of the payment remains constant, the interest decreases each period, and the portion applied to the loan principal increases.

Companies initially record mortgage notes payable at face value. They subsequently make entries for each installment payment. To illustrate, assume that Porter Technology Inc. issues a \$500,000, 8%, 20-year mortgage note on December 31, 2017, to obtain needed financing for a new research laboratory. The terms provide for annual installment payments of \$50,926 (not including real estate taxes and insurance). The installment payment schedule for the first four years is as follows.

Interest Period	(A) Cash Payment	(B) Interest Expense (D) × 8%	(C) Reduction of Principal (A) – (B)	(D) Principal Balance (D) – (C)
Issue date				\$500,000
1	\$50,926	\$40,000	\$10,926	489,074
2	50,926	39,126	11,800	477,274
3	50,926	38,182	12,744	464,530
4	50,926	37,162	13,764	450,766

Illustration 10-17

Mortgage installment payment schedule

Porter records the mortgage loan on December 31, 2017, as follows.

Dec. 31	Cash	500,000	500,000
	Mortgage Payable		
	(To record mortgage loan)		

On December 31, 2018, Porter records the first installment payment as follows.

Dec. 31	Interest Expense	40,000	
	Mortgage Payable	10,926	
	Cash		50,926
	(To record annual payment on mortgage)		

In the balance sheet, the company reports the reduction in principal for the next year as a current liability, and it classifies the remaining unpaid principal balance as a long-term liability. At December 31, 2018, the total liability is \$489,074. Of that amount, \$11,800 is current and \$477,274 (\$489,074 – \$11,800) is long-term.

**DO IT!****4****Long-Term Notes**

Cole Research issues a \$250,000, 6%, 20-year mortgage note to obtain needed financing for a new lab. The terms call for annual payments of \$21,796 each. Prepare the entries to record the mortgage loan and the first payment.

Solution

Cash	250,000	250,000
Mortgage Payable		
(To record mortgage loan)		
Interest Expense	15,000*	
Mortgage Payable	6,796	
Cash		21,796
(To record annual payment on mortgage)		

*Interest expense = \$250,000 × 6% = \$15,000

Action Plan

- ✓ Record the issuance of the note as a cash receipt and a liability.
- ✓ Each installment payment consists of interest and payment of principal.

Related exercise material: **BE10-13, E10-13, and DO IT! 10-4.**

Presentation

As indicated in Chapter 4, current liabilities are the first category under liabilities on the balance sheet. Each of the principal types of current liabilities is listed separately. In addition, companies disclose the terms of notes payable and other key information about the individual items in the notes to the financial statements.

Companies seldom list current liabilities in the order of liquidity. The reason is that varying maturity dates may exist for specific obligations such as notes payable. A more common method of presenting current liabilities is to list them by **order of magnitude**, with the largest ones first. Or, as a matter of custom, many companies show notes payable first and then accounts payable, regardless of amount. Then the remaining current liabilities are listed by magnitude. (*Use this approach in your homework.*) Illustration 10-18 provides an adapted excerpt from **Caterpillar Inc.**'s balance sheet, which illustrates its order of presentation.

Illustration 10-18

Balance sheet presentation of current liabilities

CATERPILLAR INC.	
Balance Sheet	
December 31, 2013	
(in millions)	
Assets	
Current assets	\$38,335
Property, plant and equipment (net)	17,075
Other long-term assets	29,486
Total assets	<u>\$84,896</u>
Liabilities and Stockholders' Equity	
Current liabilities	
Short-term borrowings (notes payable)	\$ 3,679
Accounts payable	6,560
Accrued expenses	3,493
Accrued wages, salaries, and employee benefits	1,622
Customer advances	2,360
Dividends payable	382
Other current liabilities	1,849
Long-term debt due within one year	7,352
Total current liabilities	27,297
Noncurrent liabilities	<u>36,721</u>
Total liabilities	64,018
Stockholders' equity	<u>20,878</u>
Total liabilities and stockholders' equity	<u>\$84,896</u>

Helpful Hint

For other examples of current liabilities sections, refer to the **PepsiCo** and **Coca-Cola** balance sheets in Appendices B and C.

Companies report long-term liabilities in a separate section of the balance sheet immediately following current liabilities, as shown in Illustration 10-19. Alternatively, companies may present summary data in the balance sheet, with detailed data (interest rates, maturity dates, conversion privileges, and assets pledged as collateral) shown in a supporting schedule.

LAX CORPORATION Balance Sheet (partial)		
Long-term liabilities		
Bonds payable 10% due in 2022	\$1,000,000	
Less: Discount on bonds payable	<u>80,000</u>	\$ 920,000
Mortgage payable, 11%, due in 2028 and secured by plant assets		<u>500,000</u>
Total long-term liabilities		\$1,420,000

Illustration 10-19
Balance sheet presentation of long-term liabilities

Companies report the current maturities of long-term debt under current liabilities if they are to be paid within one year or the operating cycle, whichever is longer.

Use of Ratios

Use of current and noncurrent classifications makes it possible to analyze a company's liquidity. **Liquidity** refers to the ability to pay maturing obligations and meet unexpected needs for cash. The relationship of current assets to current liabilities is critical in analyzing liquidity. We can express this relationship as a dollar amount (working capital) and as a ratio (the current ratio).

The excess of current assets over current liabilities is **working capital**. Illustration 10-20 shows the formula for the computation of **Caterpillar's** working capital (dollar amounts in millions).

Current Assets	–	Current Liabilities	=	Working Capital
\$38,335	–	\$27,297	=	\$11,038

Illustration 10-20
Working capital formula and computation

As an absolute dollar amount, working capital offers limited informational value. For example, \$1 million of working capital may be more than needed for a small company but inadequate for a large corporation. Also, \$1 million of working capital may be adequate for a company at one time but inadequate at another time.

The **current ratio** permits us to compare the liquidity of different-sized companies and of a single company at different times. The current ratio is calculated as current assets divided by current liabilities. Illustration 10-21 shows the formula for this ratio, along with its computation using Caterpillar's current asset and current liability data (dollar amounts in millions).

Current Assets	÷	Current Liabilities	=	Current Ratio
\$38,335	÷	\$27,297	=	1.40:1

Illustration 10-21
Current ratio formula and computation

Historically, companies and analysts considered a current ratio of 2:1 to be the standard for a good credit rating. In recent years, however, many healthy companies have maintained ratios well below 2:1 by improving management of their current assets and liabilities. Caterpillar's ratio of 1.40:1 is adequate but certainly below the standard of 2:1.

Next, we look at two ratios that provide information about a company's debt-paying ability and long-run solvency. Long-term creditors and stockholders are interested in a company's long-run solvency. Of particular interest is the company's ability to pay interest as it comes due and to repay the face value of the debt at maturity.

ETHICS NOTE

Some companies try to minimize the amount of debt reported on their balance sheet by not reporting certain types of commitments as liabilities. This subject is of intense interest in the financial community.

The **debt to assets ratio** measures the percentage of the total assets provided by creditors. It is computed by dividing total liabilities (both current and long-term liabilities) by total assets. To illustrate, we use data from a recent **Kellogg Company** annual report. The company reported total liabilities of \$8,925 million, total assets of \$11,200 million, interest expense of \$295 million, income taxes of \$476 million, and net income of \$1,208 million. As shown in Illustration 10-22, Kellogg's debt to assets ratio is 79.7%. The higher the percentage of debt to assets, the greater the risk that the company may be unable to meet its maturing obligation.

Illustration 10-22
Debt to assets ratio

Total Liabilities	÷	Total Assets	=	Debt to Assets Ratio
\$8,925	÷	\$11,200	=	79.7%

Times interest earned indicates the company's ability to meet interest payments as they come due. It is computed by dividing the sum of net income, interest expense, and income tax expense by interest expense. As shown in Illustration 10-23, Kellogg's times interest earned is 6.71 times. This interest coverage is considered safe.

Illustration 10-23
Times interest earned

Net Income + Interest Expense + Income Tax Expense	÷	Interest Expense	=	Times Interest Earned
\$1,208 + \$295 + \$476	÷	\$295	=	6.71 times

Investor Insight

Paul Fleet/Alamy

"Covenant-Lite" Debt

In many corporate loans and bond issuances, the lending agreement specifies debt covenants. These covenants typically are specific financial measures, such as minimum levels of retained earnings, cash flows, times interest earned, or other measures that a company must maintain during the life of the loan.

If the company violates a covenant, it is considered to have violated the loan agreement. The creditors can then demand immediate repayment, or they can renegotiate the loan's terms. Covenants protect lenders because they enable lenders to step in and try to get their money back before the borrower gets too deeply into trouble.

During the 1990s, most traditional loans specified between three to six covenants or "triggers." In more recent years, when lots of cash was available, lenders began reducing or completely eliminating covenants from loan agreements in order to be more competitive with other lenders. Lending to weaker companies on easy terms is now common as investors' appetite for higher-yielding debt grows stronger and the Federal Reserve keeps money flowing at ultralow rates. Since the 2008 financial crisis, companies have been able to borrow more without offering investors what were once considered standard protections against possible losses.

Sources: Cynthia Koons, "Risky Business: Growth of 'Covenant-Lite' Debt," *Wall Street Journal* (June 18, 2007), p. C2; and Katy Burne, "More Loans Come with Few Strings Attached," *Wall Street Journal* (June 12, 2014).

How can financial ratios such as those covered in this chapter provide protection for creditors? (Go to [WileyPLUS](#) for this answer and additional questions.)

Debt and Equity Financing

To obtain large amounts of long-term capital, corporate management has to decide whether to issue additional common stock (equity financing), bonds or notes (debt financing), or a combination of the two. This decision is important to

both the company and to investors and creditors. The capital structure of a company provides clues as to the potential profit that can be achieved and the risks taken by the company. Debt financing offers these advantages over common stock, as shown in Illustration 10-24.

Bond Financing	Advantages
	<p>1. Stockholder control is not affected. Bondholders do not have voting rights, so current owners (stockholders) retain full control of the company.</p>
	<p>2. Tax savings result. Bond interest is deductible for tax purposes; dividends on stock are not.</p>
<p>Income Statement</p> <p>EPS</p>	<p>3. Earnings per share (EPS) may be higher. Although bond interest expense reduces net income, earnings per share often is higher under bond financing because no additional shares of common stock are issued.</p>

Illustration 10-24

Advantages of bond financing over common stock

As Illustration 10-24 shows, one reason to issue bonds is that they do not affect stockholder control. Because bondholders do not have voting rights, owners can raise capital with bonds and still maintain corporate control. In addition, bonds are attractive to corporations because the cost of bond interest is tax-deductible. As a result of this tax treatment, which stock dividends do not offer, bonds may result in a lower cost of financing than equity financing.

To illustrate another advantage of bond financing, assume that Microsystems, Inc. is considering two plans for financing the construction of a new \$5 million plant. Plan A involves issuance of 200,000 shares of common stock at the current market price of \$25 per share. Plan B involves issuance of \$5 million, 8% bonds at face value. Income before interest and taxes on the new plant will be \$1.5 million. Income taxes are expected to be 30%. Microsystems currently has 100,000 shares of common stock outstanding. Illustration 10-25 shows the alternative effects on earnings per share.

Helpful Hint

Besides corporations, governmental agencies and universities also issue bonds to raise capital.

	Plan A Issue Stock	Plan B Issue Bonds
Income before interest and taxes	\$1,500,000	\$1,500,000
Interest (8% × \$5,000,000)	—	400,000
Income before income taxes	1,500,000	1,100,000
Income tax expense (30%)	450,000	330,000
Net income	<u>\$1,050,000</u>	<u>\$ 770,000</u>
Outstanding shares	300,000	100,000
Earnings per share	<u>\$3.50</u>	<u>\$7.70</u>

Illustration 10-25

Effects on earnings per share—stocks vs. bonds

Note that net income is \$280,000 less (\$1,050,000 – \$770,000) with long-term debt financing (bonds). However, earnings per share is higher because there are 200,000 fewer shares of common stock outstanding.

One disadvantage in using bonds is that the company must **pay interest** on a periodic basis. In addition, the company must also **repay the principal** at the due date. A company with fluctuating earnings and a relatively weak cash position may have great difficulty making interest payments when earnings are low. Furthermore, when the economy, stock market, or a company's revenues stagnate, debt payments can gobble up cash quickly and limit a company's ability to meet its financial obligations.

DO IT!

5

Analyzing Liabilities

Trout Company provides you with the following balance sheet information as of December 31, 2017.

Current assets	\$10,500	Current liabilities	\$ 8,000
Long-term assets	24,200	Long-term liabilities	16,000
Total assets	<u>\$34,700</u>	Stockholders' equity	<u>10,700</u>
		Total liabilities and stockholders' equity	<u>\$34,700</u>

In addition, Trout reported net income for 2017 of \$14,000, income tax expense of \$2,800, and interest expense of \$900.

Instructions

Action Plan

- ✓ Use the formula for the current ratio:
Current assets ÷ Current liabilities.
- ✓ Use the formula for working capital:
Current assets – Current liabilities.
- ✓ Use the formula for the debt to assets ratio:
Total liabilities ÷ Total assets.

- (a) Compute the current ratio and working capital for Trout for 2017.
- (b) Assume that at the end of 2017, Trout used \$2,000 cash to pay off \$2,000 of accounts payable. How would the current ratio and working capital have changed?
- (c) Compute the debt to assets ratio and the times interest earned for Trout for 2017.

Solution

- (a) Current ratio is 1.31:1 (\$10,500/\$8,000). Working capital is \$2,500 (\$10,500 – \$8,000).
- (b) Current ratio is 1.42:1 (\$8,500/\$6,000). Working capital is \$2,500 (\$8,500 – \$6,000).
- (c) Debt to assets ratio is 69.2% (\$24,000/\$34,700). Times interest earned is 19.67 times [(\$14,000 + \$2,800 + \$900)/\$900].

LEARNING OBJECTIVE

6

APPENDIX 10A: Apply the straight-line method of amortizing bond discount and bond premium.

Amortizing Bond Discount

To follow the expense recognition principle, companies allocate bond discount to expense in each period in which the bonds are outstanding. The **straight-line method of amortization** allocates the same amount to interest expense in each interest period. The calculation is presented in Illustration 10A-1.

Illustration 10A-1

Formula for straight-line method of bond discount amortization

Bond Discount	÷	Number of Interest Periods	=	Bond Discount Amortization
----------------------	---	-----------------------------------	---	-----------------------------------

In the Candlestick, Inc. example (page 457), the company sold \$100,000, five-year, 10% bonds on January 1, 2017, for \$98,000. This resulted in a \$2,000 bond discount (\$100,000 – \$98,000). The bond discount amortization is \$400 (\$2,000 ÷ 5) for each of the five amortization periods. Candlestick records the first accrual of bond interest and the amortization of bond discount on December 31 as follows.

A	=	L	+	SE
		–10,400 Exp		
		+400		
		+10,000		
<hr/>				
Cash Flows				
no effect				

Dec. 31	Interest Expense	10,400	
	Discount on Bonds Payable		400
	Interest Payable		10,000
	(To record accrued bond interest and amortization of bond discount)		

Over the term of the bonds, the balance in Discount on Bonds Payable will decrease annually by the same amount until it has a zero balance at the maturity date of the bonds. Thus, the carrying value of the bonds at maturity will be equal to the face value of the bonds.

Preparing a bond discount amortization schedule, as shown in Illustration 10A-2, is useful to determine interest expense, discount amortization, and the carrying value of the bond. As indicated, the interest expense recorded each period is \$10,400. Also note that the carrying value of the bond increases \$400 each period until it reaches its face value of \$100,000 at the end of period 5.

Alternative Terminology

The amount in the Discount on Bonds Payable account is often referred to as *Unamortized Discount on Bonds Payable*.

16						
17	Column (A) remains constant because the face value of the bonds (\$100,000) is multiplied by the annual contractual interest rate (10%) each period.					
18	Column (B) is computed as the interest paid (Column A) plus the discount amortization (Column C).					
19	Column (C) indicates the discount amortization each period.					
20	Column (D) decreases each period by the same amount until it reaches zero at maturity.					
21	Column (E) increases each period by the amount of discount amortization until it equals the face value at maturity.					

Illustration 10A-2
Bond discount amortization schedule

Amortizing Bond Premium

The amortization of bond premium parallels that of bond discount. Illustration 10A-3 presents the formula for determining bond premium amortization under the straight-line method.

Bond Premium	÷	Number of Interest Periods	=	Bond Premium Amortization
-------------------------	---	---	---	--

Illustration 10A-3
Formula for straight-line method of bond premium amortization

Continuing our example, assume Candlestick, Inc., sells the bonds described above for \$102,000, rather than \$98,000 (see page 459). This results in a bond premium of \$2,000 (\$102,000 – \$100,000). The premium amortization for each

A	=	L	+	SE
				-9,600 Exp
				-400
				+10,000
<hr/>				
Cash Flows				
no effect				

interest period is \$400 ($\$2,000 \div 5$). Candlestick records the first accrual of interest on December 31 as follows.

Dec. 31	Interest Expense	9,600	
	Premium on Bonds Payable	400	
	Interest Payable		10,000
	(To record accrued bond interest and amortization of bond premium)		

Over the term of the bonds, the balance in Premium on Bonds Payable will decrease annually by the same amount until it has a zero balance at maturity.

A bond premium amortization schedule, as shown in Illustration 10A-4, is useful to determine interest expense, premium amortization, and the carrying value of the bond. As indicated, the interest expense Candlestick records each period is \$9,600. Note that the carrying value of the bond decreases \$400 each period until it reaches its face value of \$100,000 at the end of period 5.

Illustration 10A-4
Bond premium amortization schedule

CANDLESTICK, INC. Bond Premium Amortization Schedule Straight-Line Method—Annual Interest Payments \$100,000 of 10%, 5-Year Bonds

	<u>\$50,000</u>	<u>\$48,000</u>	<u>\$2,000</u>		
Column (A) remains constant because the face value of the bonds (\$100,000) is multiplied by the annual contractual interest rate (10%) each period.					
Column (B) is computed as the interest paid (Column A) less the premium amortization (Column C).					
Column (C) indicates the premium amortization each period.					
Column (D) decreases each period by the same amount until it reaches zero at maturity.					
Column (E) decreases each period by the amount of premium amortization until it equals the face value at maturity.					

LEARNING
OBJECTIVE

7

APPENDIX 10B: Apply the effective-interest method of amortizing bond discount and bond premium.

To follow the expense recognition principle, companies allocate bond discount to expense in each period in which the bonds are outstanding. However, to completely comply with the expense recognition principle, interest expense as a percentage of carrying value should not change over the life of the bonds.

This percentage, referred to as the **effective-interest rate**, is established when the bonds are issued and remains constant in each interest period. Unlike the straight-line method, the effective-interest method of amortization accomplishes this result.

Under the **effective-interest method of amortization**, the amortization of bond discount or bond premium results in periodic interest expense equal to a constant percentage of the carrying value of the bonds. The effective-interest method results in **varying amounts** of amortization and interest expense per period but a **constant percentage rate**. In contrast, the straight-line method results in constant amounts of amortization and interest expense per period but a varying percentage rate.

Companies follow three steps under the effective-interest method:

1. Compute the **bond interest expense** by multiplying the carrying value of the bonds at the beginning of the interest period by the effective-interest rate.
2. Compute the **bond interest paid** (or accrued) by multiplying the face value of the bonds by the contractual interest rate.
3. Compute the **amortization amount** by determining the difference between the amounts computed in steps (1) and (2).

Illustration 10B-1 depicts these steps.

(1)		(2)		(3)
Bond Interest Expense		Bond Interest Paid		
Carrying Value of Bonds at Beginning of Period	× Effective- Interest Rate	Face Amount of Bond	× Contractual Interest Rate	= Amortization Amount

Illustration 10B-1

Computation of amortization using effective-interest method

Both the straight-line and effective-interest methods of amortization result in the same total amount of interest expense over the term of the bonds. Furthermore, interest expense each interest period is generally comparable in amount. However, **when the amounts are materially different, generally accepted accounting principles (GAAP) require use of the effective-interest method.**

Amortizing Bond Discount

In the Candlestick, Inc. example (page 457), the company sold \$100,000, five-year, 10% bonds on January 1, 2017, for \$98,000. This resulted in a \$2,000 bond discount (\$100,000 – \$98,000). This discount results in an effective-interest rate of approximately 10.5348%. (The effective-interest rate can be computed using the techniques shown in Appendix G near the end of this textbook.)

Preparing a bond discount amortization schedule as shown in Illustration 10B-2 (page 472) facilitates the recording of interest expense and the discount amortization. Note that interest expense as a percentage of carrying value remains constant at 10.5348%.

Helpful Hint

Note that the amount of periodic interest expense increases over the life of the bonds when the effective-interest method is used for bonds issued at a discount. The reason is that a constant percentage is applied to an increasing bond carrying value to compute interest expense. The carrying value is increasing because of the amortization of the discount.

23						

Illustration 10B-2

Bond discount amortization schedule

For the first interest period, the computations of bond interest expense and the bond discount amortization are as follows.

Illustration 10B-3

Computation of bond discount amortization

Bond interest expense (\$98,000 × 10.5348%)	\$10,324
Less: Bond interest paid (\$100,000 × 10%)	<u>10,000</u>
Bond discount amortization	\$ 324

As a result, Candlestick, Inc. records the accrual of interest and amortization of bond discount on December 31 as follows.

A	=	L	+	SE
		-10,324 Exp		
		+324		
		+10,000		
Cash Flows				
no effect				

Dec. 31	Interest Expense	10,324	
	Discount on Bonds Payable		324
	Interest Payable		10,000
	(To record accrued interest and amortization of bond discount)		

For the second interest period, bond interest expense will be \$10,358 (\$98,324 × 10.5348%), and the discount amortization will be \$358. At December 31, Candlestick makes the following adjusting entry.

A	=	L	+	SE
		-10,358 Exp		
		+358		
		+10,000		
Cash Flows				
no effect				

Dec. 31	Interest Expense	10,358	
	Discount on Bonds Payable		358
	Interest Payable		10,000
	(To record accrued interest and amortization of bond discount)		

Amortizing Bond Premium

Continuing our example, assume Candlestick, Inc. sells the bonds described above for \$102,000 rather than \$98,000 (see page 459). This would result in a bond premium of \$2,000 (\$102,000 – \$100,000). This premium results in an effective-interest rate of approximately 9.4794%. (The effective-interest rate can be solved for using the techniques shown in Appendix G near the end of this textbook.) Illustration 10B-4 shows the bond premium amortization schedule.

Illustration 10B-4

Bond premium amortization schedule

Candlestick Inc.xls					
CANDLESTICK, INC.					
Bond Premium Amortization Schedule					
Effective-Interest Method—Annual Interest Payments					
10% Bonds Issued at 9.4794%					
Interest Periods	(A) Interest to Be Paid (10% × \$100,000)	(B) Interest Expense to Be Recorded (9.4794% × Preceding Bond Carrying Value)	(C) Premium Amortization (A) – (B)	(D) Unamortized Premium (D) – (C)	(E) Bond Carrying Value (\$100,000 + D)
Issue date				\$2,000	\$102,000
1	\$10,000	\$ 9,669 (9.4794% × \$102,000)	\$ 331	1,669	101,669
2	10,000	9,638 (9.4794% × \$101,669)	362	1,307	101,307
3	10,000	9,603 (9.4794% × \$101,307)	397	910	100,910
4	10,000	9,566 (9.4794% × \$100,910)	434	476	100,476
5	10,000	9,524* (9.4794% × \$100,476)	476*	–0–	100,000
	<u>\$50,000</u>	<u>\$48,000</u>	<u>\$2,000</u>		
17	Column (A) remains constant because the face value of the bonds (\$100,000) is multiplied by the contractual interest rate (10%) each period.				
18	Column (B) is computed as the carrying value of the bonds times the annual effective-interest rate (9.4794%).				
19	Column (C) indicates the premium amortization each period.				
20	Column (D) decreases each period until it reaches zero at maturity.				
21	Column (E) decreases each period until it equals face value at maturity.				
23	*Rounded to eliminate remaining discount resulting from rounding the effective rate.				

For the first interest period, the computations of bond interest expense and the bond premium amortization are as follows.

Bond interest paid (\$100,000 × 10%)	\$10,000
Less: Bond interest expense (\$102,000 × 9.4794%)	9,669
Bond premium amortization	\$ 331

Illustration 10B-5

Computation of bond premium amortization

The entry Candlestick makes on December 31 is:

Dec. 31	Interest Expense	9,669	
	Premium on Bonds Payable	331	
	Interest Payable		10,000
	(To record accrued interest and amortization of bond premium)		

A	=	L	+	SE
				–9,669 Exp
				–331
				+10,000

Cash Flows
no effect

For the second interest period, interest expense will be \$9,638, and the premium amortization will be \$362. Note that the amount of periodic interest expense decreases over the life of the bond when companies apply the effective-interest method to bonds issued at a premium. The reason is that a constant percentage is applied to a decreasing bond carrying value to compute interest expense. The carrying value is decreasing because of the amortization of the premium.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

1 Explain how to account for current liabilities. A current liability is a debt that a company expects to pay within one year or the operating cycle, whichever is longer. The major types of current liabilities are notes payable, accounts payable, sales taxes payable, unearned revenues, and accrued liabilities such as taxes, salaries and wages, and interest payable.

When a promissory note is interest-bearing, the amount of assets received upon the issuance of the note is generally equal to the face value of the note. Interest expense accrues over the life of the note. At maturity, the amount paid equals the face value of the note plus accrued interest.

Companies record sales taxes payable at the time the related sales occur. The company serves as a collection agent for the taxing authority. Sales taxes are not an expense to the company. Companies initially record unearned revenues in an unearned revenue account. As a company recognizes revenue, a transfer from unearned revenue to revenue occurs. Companies report the current maturities of long-term debt as a current liability in the balance sheet.

2 Describe the major characteristics of bonds. Bonds can have many different features and may be secured, unsecured, convertible, or callable. The terms of the bond issue are set forth in a bond indenture, and a bond certificate provides the specific information about the bond itself.

3 Explain how to account for bond transactions. When companies issue bonds, they debit Cash for the cash proceeds and credit Bonds Payable for the face value of the bonds. The account Premium on Bonds Payable shows a bond premium. Discount on Bonds Payable shows a bond discount.

When bondholders redeem bonds at maturity, the issuing company credits Cash and debits Bonds Payable for the face value of the bonds. When bonds are redeemed before maturity, the issuing company (a) eliminates

the carrying value of the bonds at the redemption date, (b) records the cash paid, and (c) recognizes the gain or loss on redemption. When bonds are converted to common stock, the issuing company transfers the carrying (or book) value of the bonds to appropriate paid-in capital accounts. No gain or loss is recognized.

4 Explain how to account for long-term notes payable. Each payment consists of (1) interest on the unpaid balance of the loan and (2) a reduction of loan principal. The interest decreases each period, while the portion applied to the loan principal increases.

5 Describe how liabilities are reported and analyzed. Companies should report the nature and amount of each long-term debt in the balance sheet or in the notes accompanying the financial statements.

Companies may sell bonds to investors to raise long-term capital. Bonds offer the following advantages over common stock: (a) stockholder control is not affected, (b) tax savings result, and (c) earnings per share of common stock may be higher.

Stockholders and long-term creditors are interested in a company's long-run solvency. Debt to assets and times interest earned are two ratios that provide information about debt-paying ability and long-run solvency.

***6 Apply the straight-line method of amortizing bond discount and bond premium.** The straight-line method of amortization results in a constant amount of amortization and interest expense per period.

***7 Apply the effective-interest method of amortizing bond discount and bond premium.** The effective-interest method results in varying amounts of amortization and interest expense per period but a constant percentage rate of interest. When the difference between the straight-line and effective-interest method is material, GAAP requires use of the effective-interest method.

GLOSSARY REVIEW

Bond certificate A legal document that indicates the name of the issuer, the face value of the bonds, the contractual interest rate, and maturity date of the bonds. (p. 453).

Bond indenture A legal document that sets forth the terms of the bond issue. (p. 452).

Bonds A form of interest-bearing notes payable issued by corporations, universities, and governmental entities. (p. 452).

Callable bonds Bonds that are subject to redemption (buy back) at a stated dollar amount prior to maturity at the option of the issuer. (p. 452).

Contractual interest rate Rate used to determine the amount of cash interest the borrower pays and the investor receives. (p. 452).

Convertible bonds Bonds that permit bondholders to convert them into common stock at the bondholders' option. (p. 452).

Current ratio A measure of a company's liquidity; computed as current assets divided by current liabilities. (p. 465).

Debenture bonds Bonds issued against the general credit of the borrower. Also called unsecured bonds. (p. 452).

Debt to assets ratio A solvency measure that indicates the percentage of total assets provided by creditors; computed as total liabilities divided by total assets. (p. 466).

Discount (on a bond) The difference between the face value of a bond and its selling price, when the bond is sold for less than its face value. (p. 457).

***Effective-interest method of amortization** A method of amortizing bond discount or bond premium that results in periodic interest expense equal to a constant percentage of the carrying value of the bonds. (p. 471).

***Effective-interest rate** Rate established when bonds are issued that maintains a constant value for interest expense as a percentage of bond carrying value in each interest period. (p. 471).

Face value Amount of principal due at the maturity date of the bond. (p. 452).

Long-term liabilities Obligations expected to be paid more than one year in the future. (p. 452).

Market interest rate The rate investors demand for loaning funds to the corporation. (p. 454).

Maturity date The date on which the final payment on the bond is due from the bond issuer to the investor. (p. 452).

Mortgage bond A bond secured by real estate. (p. 452).

Mortgage notes payable A long-term note secured by a mortgage that pledges title to specific assets as security for a loan. (p. 462).

Notes payable Obligations in the form of written notes. (p. 446).

Premium (on a bond) The difference between the selling price and the face value of a bond, when the bond is sold for more than its face value. (p. 457).

Secured bonds Bonds that have specific assets of the issuer pledged as collateral. (p. 452).

Sinking fund bonds Bonds secured by specific assets set aside to redeem them. (p. 452).

***Straight-line method of amortization** A method of amortizing bond discount or bond premium that allocates the same amount to interest expense in each interest period. (p. 468).

Times interest earned A solvency measure that indicates a company's ability to meet interest payments; computed by dividing the sum of net income, interest expense, and income tax expense by interest expense. (p. 466).

Time value of money The relationship between time and money. A dollar received today is worth more than a dollar promised at some time in the future. (p. 454).

Unsecured bonds Bonds issued against the general credit of the borrower. Also called debenture bonds. (p. 452).

Working capital A measure of a company's liquidity; computed as current assets minus current liabilities. (p. 465).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. The time period for classifying a liability as current is one year or the operating cycle, whichever is:
 (a) longer. (c) probable.
 (b) shorter. (d) possible.
- (LO 1) 2. To be classified as a current liability, a debt must be expected to be paid within:
 (a) one year.
 (b) the operating cycle.
 (c) 2 years.
 (d) (a) or (b), whichever is longer.
- (LO 1) 3. Maggie Sharrer Company borrows \$88,500 on September 1, 2017, from Sandwich State Bank by signing an \$88,500, 12%, one-year note. What is the accrued interest at December 31, 2017?
 (a) \$2,655. (c) \$4,425.
 (b) \$3,540. (d) \$10,620.
- (LO 1) 4. Becky Sherrick Company has total proceeds from sales of \$4,515. If the proceeds include sales taxes of 5%, the amount to be credited to Sales Revenue is:
 (a) \$4,000.
 (b) \$4,300.
 (c) \$4,289.25.
 (d) No correct answer given.
- (LO 1) 5. Employer payroll taxes do **not** include:
 (a) federal unemployment taxes.
 (b) state unemployment taxes.
 (c) federal income taxes.
 (d) FICA taxes.
6. Sensible Insurance Company collected a premium of \$18,000 for a 1-year insurance policy on April 1. What amount should Sensible report as a current liability for Unearned Service Revenue at December 31?
 (a) \$0. (c) \$13,500.
 (b) \$4,500. (d) \$18,000.
7. The term used for bonds that are unsecured is:
 (a) callable bonds.
 (b) U.S. Treasury bonds.
 (c) debenture bonds.
 (d) convertible bonds.
8. Karson Inc. issues 10-year bonds with a maturity value of \$200,000. If the bonds are issued at a premium, this indicates that:
 (a) the contractual interest rate exceeds the market interest rate.
 (b) the market interest rate exceeds the contractual interest rate.
 (c) the contractual interest rate and the market interest rate are the same.
 (d) no relationship exists between the two rates.
9. Gester Corporation redeems its \$100,000 face value bonds at 105 on January 1, following the payment of annual interest. The carrying value of the bonds at the

redemption date is \$103,745. The entry to record the redemption will include a:

- (a) credit of \$3,745 to Loss on Bond Redemption.
- (b) debit of \$3,745 to Premium on Bonds Payable.
- (c) credit of \$1,255 to Gain on Bond Redemption.
- (d) debit of \$5,000 to Premium on Bonds Payable.

(LO 3) 10. Colson Inc. converts \$600,000 of bonds sold at face value into 10,000 shares of common stock, par value \$1. Both the bonds and the stock have a market value of \$760,000. What amount should be credited to Paid-in Capital in Excess of Par—Common Stock as a result of the conversion?

- (a) \$10,000. (c) \$600,000.
- (b) \$160,000. (d) \$590,000.

(LO 4) 11. Andrews Inc. issues a \$497,000, 10% 3-year mortgage note on January 1. The note will be paid in three annual installments of \$200,000, each payable at the end of the year. What is the amount of interest expense that should be recognized by Andrews Inc. in the second year?

- (a) \$16,567. (c) \$34,670.
- (b) \$49,700. (d) \$346,700.

(LO 4) 12. Howard Corporation issued a 20-year mortgage note payable on January 1, 2017. At December 31, 2017, the unpaid principal balance will be reported as:

- (a) a current liability.
- (b) a long-term liability.
- (c) part current and part long-term liability.
- (d) interest payable.

(LO 5) 13. For 2017, Corn Flake Corporation reported net income of \$300,000. Interest expense was \$40,000 and income taxes were \$100,000. The times interest earned was:

- (a) 3 times. (c) 7.5 times.
- (b) 4.4 times. (d) 11 times.

***14.** On December 31, Hurley Corporation issues \$500,000, 5-year, 12% bonds at 96 with interest payable on December 31, 2017. The entry on December 31, 2018, to record payment of bond interest and the amortization of bond discount using the straight-line method will include a:

- (a) debit to Interest Expense \$30,000.
- (b) debit to Interest Expense \$60,000.
- (c) credit to Discount on Bonds Payable \$4,000.
- (d) credit to Discount on Bonds Payable \$2,000.

***15.** For the bonds issued in Question 14, what is the carrying value of the bonds at the end of the third interest period?

- (a) \$492,000. (c) \$486,000.
- (b) \$488,000. (d) \$464,000.

***16.** On January 1, Besalium Inc. issued \$1,000,000, 9% bonds for \$938,554. The market rate of interest for these bonds is 10%. Interest is payable annually on December 31. Besalium uses the effective-interest method of amortizing bond discount. At the end of the first year, Besalium should report unamortized bond discount of:

- (a) \$54,900. (c) \$51,610.
- (b) \$57,591. (d) \$51,000.

***17.** Dias Corporation issued \$1,000,000, 14%, 5-year bonds with interest payable annually on December 31. The bonds sold for \$1,072,096. The market rate of interest for these bonds was 12%. On the first interest date, using the effective-interest method, the debit entry to Interest Expense is for:

- (a) \$120,000. (c) \$128,652.
- (b) \$125,581. (d) \$140,000.

Solutions

- 1. (a)** The time period for classifying a liability as current is one year or the operating cycle, whichever is longer, not (b) shorter, (c) probable, or (d) possible.
- 2. (d)** To be classified as a current liability, a debt must be expected to be paid within one year or the operating cycle. Choices (a) and (b) are both correct, but (d) is the better answer. Choice (c) is incorrect.
- 3. (b)** Accrued interest at 12/31/17 is computed as the face value (\$88,500) times the interest rate (12%) times the portion of the year the debt was outstanding (4 months out of 12), or \$3,540 ($\$88,500 \times 12\% \times \frac{4}{12}$), not (a) \$2,655, (c) \$4,425, or (d) \$10,620.
- 4. (b)** Dividing the total proceeds (\$4,515) by one plus the sales tax rate (1.05) will result in the amount of sales to be credited to the Sales Revenue account of \$4,300 ($\$4,515 \div 1.05$). The other choices are therefore incorrect.
- 5. (c)** Federal income taxes are a payroll deduction, not an employer payroll tax. The employer is merely a collection agent. The other choices are all included in employer payroll taxes.
- 6. (b)** The monthly premium is \$1,500 or \$18,000 divided by 12. Because Sensible has recognized 9 months of insurance revenue (April 1–December 31), 3 months' insurance premium is still unearned. The amount that Sensible should report as Unearned Service Revenue is therefore \$4,500 (3 months \times \$1,500), not (a) \$0, (c) \$13,500, or (d) \$18,000.
- 7. (c)** Debenture bonds are not secured by any collateral. The other choices are incorrect because (a) callable bonds can be paid off or retired by the issuer before they reach their maturity date, (b) U.S. Treasury bonds are secured by the federal government, and (d) convertible bonds permit bondholders to convert them into common stock at the bondholders' option.
- 8. (a)** When bonds are issued at a premium, this indicates that the contractual interest rate is higher than the market interest rate. The other choices are incorrect because (b) when the market interest rate exceeds the contractual interest rate, bonds are sold at a discount; (c) when the contractual interest rate and the market interest rate are the same, bonds will be issued at par; and (d) the relationship between the market rate of interest and the contractual rate of interest determines whether bonds are issued at par, a discount, or a premium.
- 9. (b)** The entry to record the retirement of bonds will include a debit to Bonds Payable of \$100,000, a debit to Premium on Bonds Payable of \$3,745 ($\$103,745 - \$100,000$), a credit to Cash of \$105,000 ($\$100,000 \times 1.05$) and a debit to Loss on Bond Redemption of \$1,255 ($\$105,000 - \$103,745$). The other choices are therefore incorrect.
- 10. (d)** First, the market value in this transaction is ignored. Bonds Payable will be debited for \$600,000; Common Stock will be credited for \$10,000 since this account is always credited for shares issued (10,000) times par value (\$1). The remaining amount,

\$590,000 (\$600,000 – \$10,000) is credited to Paid-in Capital in Excess of Par–Common Stock, not (a) \$10,000, (b) \$160,000, or (c) \$600,000.

11. (c) In the first year, Andrews will recognize \$49,700 of interest expense ($\$497,000 \times 10\%$). After the first payment is made, the amount remaining on the note will be \$346,700 [$\$497,000$ principal – ($\$200,000$ payment – $\$49,700$ interest)]. The remaining balance (\$346,700) is multiplied by the interest rate (10%) to compute the interest expense to be recognized for the second year, \$34,670 ($\$346,700 \times 10\%$), not (a) \$16,567, (b) \$49,700, or (d) \$346,700.

12. (c) Howard Corporation reports the reduction in principal for the next year as a current liability, and it classifies the remaining unpaid principal balance as a long-term liability. The other choices are therefore incorrect.

13. (d) Times interest earned = Net income + Interest expense + Income tax expense ($\$300,000 + \$40,000 + \$100,000 = \$440,000$) divided by Interest expense (\$40,000), which equals 11 times, not (a) 3, (b) 4.4, or (c) 7.5 times.

***14. (c)** [$\$500,000 - (96\% \times \$500,000)$] = \$20,000; $\$20,000 \div 5 = \$4,000$ of discount to amortize annually. As a result, the entry would involve a credit to Discount on Bonds Payable \$4,000. The other choices are therefore incorrect.

***15. (a)** The carrying value of bonds increases by the amount of the periodic discount amortization. Discount amortization using the straight-line method is \$4,000 each period. Total discount amortization for three periods is \$12,000 ($\$4,000 \times 3$ periods) which is added to the initial carrying value (\$480,000) to arrive at \$492,000, the carrying value at the end of the third interest period, not (b) \$488,000, (c) \$486,000, or (d) \$464,000.

***16. (b)** The beginning balance of unamortized discount is \$61,446 ($\$1,000,000 - \$938,554$). The discount amortization is \$3,855, the difference between the cash interest payment of \$90,000 ($\$1,000,000 \times 9\%$) and the interest expense recorded of \$93,855 ($\$938,554 \times 10\%$). This discount amortization (\$3,855) is then subtracted from the beginning balance of unamortized discount (\$61,446), to arrive at a balance of \$57,591 at the end of the first year, not (a) \$54,900, (c) \$51,610, or (d) \$51,000.

***17. (c)** The debit to Interest Expense = $\$1,072,096$ (initial carrying value of bond) $\times 12\%$ (market rate) = \$128,652, not (a) \$120,000, (b) \$125,581, or (d) \$140,000.

PRACTICE EXERCISES

1. On June 1, JetSet Company borrows \$150,000 from First Bank on a 6-month, \$150,000, 8% note.

Prepare entries for interest-bearing notes.

(LO 1)

Instructions

- Prepare the entry on June 1.
- Prepare the adjusting entry on June 30.
- Prepare the entry at maturity (December 1), assuming monthly adjusting entries have been made through November 30.
- What was the total financing cost (interest expense)?

Solution

1. (a) June 1	Cash	150,000	
	Notes Payable		150,000
(b) June 30	Interest Expense	1,000	
	Interest Payable		1,000
	($\$150,000 \times 8\% \times 1/12$)		
(c) Dec. 1	Notes Payable	150,000	
	Interest Payable		156,000
	($\$150,000 \times 8\% \times 6/12$)	6,000	
	Cash		
(d) \$6,000			

2. Global Airlines Company issued \$900,000 of 8%, 10-year bonds on January 1, 2017, at face value. Interest is payable annually on January 1.

Prepare entries for bonds issued at face value.

(LO 3)

Instructions

Prepare the journal entries to record the following events.

- The issuance of the bonds.
- The accrual of interest on December 31.
- The payment of interest on January 1, 2018.
- The redemption of bonds at maturity, assuming interest for the last interest period has been paid and recorded.

Solution

2.	January 1, 2017		
(a) Cash	900,000		900,000
Bonds Payable			
	December 31, 2017		
(b) Interest Expense	72,000		72,000
Interest Payable (\$900,000 × 8%)			
	January 1, 2018		
(c) Interest Payable	72,000		72,000
Cash			
	January 1, 2027		
(d) Bonds Payable	900,000		900,000
Cash			

Prepare entries to record mortgage note and installment payments.

(LO 4)

3. Trawler Company borrowed \$500,000 on December 31, 2017, by issuing a \$500,000, 7% mortgage note payable. The terms call for annual installment payments of \$80,000 on December 31.

Instructions

- Prepare the journal entries to record the mortgage loan and the first two installment payments.
- Indicate the amount of mortgage note payable to be reported as a current liability and as a long-term liability at December 31, 2018.

Solution

3.	December 31, 2017		
(a) Cash	500,000		500,000
Mortgage Payable			
	December 31, 2018		
Interest Expense (\$500,000 × 7%)	35,000		35,000
Mortgage Payable	45,000		45,000
Cash			80,000
	December 31, 2019		
Interest Expense [(\$500,000 – \$45,000) × 7%]	31,850		31,850
Mortgage Payable	48,150		48,150
Cash			80,000
(b) Current: \$48,150			
Long-term: \$406,850 (\$500,000 – \$45,000 – \$48,150)			

PRACTICE PROBLEM

Prepare entries to record issuance of bonds and long-term notes, interest accrued, and bond redemption.

(LO 3, 4)

Snyder Software Inc. has successfully developed a new spreadsheet program. To produce and market the program, the company needed \$1.9 million of additional financing. On January 1, 2017, Snyder borrowed money as follows.

- Snyder issued \$500,000, 11%, 10-year convertible bonds. The bonds sold at face value and pay annual interest on January 1. Each \$1,000 bond is convertible into 30 shares of Snyder's \$20 par value common stock.
- Snyder issued \$1 million, 10%, 10-year bonds at face value. Interest is payable on January 1.
- Snyder also issued a \$400,000, 6%, 15-year mortgage payable. The terms provide for annual installment payments of \$41,185 on December 31.

Instructions

- For the convertible bonds, prepare journal entries for:
 - The issuance of the bonds on January 1, 2017.
 - Interest expense on December 31, 2017.

- (c) The payment of interest on January 1, 2018.
- (d) The conversion of all bonds into common stock on January 1, 2018, when the market price of the common stock was \$67 per share.
2. For the 10-year, 10% bonds:
- (a) Journalize the issuance of the bonds on January 1, 2017.
- (b) Prepare the journal entry for interest expense in 2017.
- (c) Prepare the entry for the redemption of the bonds at 101 on January 1, 2020, after paying the interest due on this date.
3. For the mortgage payable:
- (a) Prepare the entry for the issuance of the note on January 1, 2017.
- (b) Prepare a payment schedule for the first four installment payments.
- (c) Indicate the current and noncurrent amounts for the mortgage payable at December 31, 2017.

Solution

1. (a) 2017			
Jan. 1	Cash	500,000	
	Bonds Payable		500,000
	(To record issue of 11%, 10-year convertible bonds at face value)		
(b) Dec. 31			
	Interest Expense	55,000	
	Interest Payable (\$500,000 × 11%)		55,000
	(To record accrual of annual bond interest)		
(c) 2018			
Jan. 1	Interest Payable	55,000	
	Cash		55,000
	(To record payment of accrued interest)		
(d) Jan. 1			
	Bonds Payable	500,000	
	Common Stock		300,000*
	Paid-in Capital in Excess of Par—Common Stock		200,000
	(To record conversion of bonds into common stock)		
*(\$500,000 ÷ \$1,000 = 500 bonds; 500 × 30 = 15,000 shares; 15,000 × \$20 = \$300,000)			
2. (a) 2017			
Jan. 1	Cash	1,000,000	
	Bonds Payable		1,000,000
	(To record issuance of bonds)		
(b) 2017			
Dec. 31	Interest Expense	100,000	
	Interest Payable (\$1,000,000 × 10%)		100,000
	(To record accrual of annual interest)		
(c) 2020			
Jan. 1	Bonds Payable	1,000,000	
	Loss on Bond Redemption	10,000*	
	Cash		1,010,000
	(To record redemption of bonds at 101)		
*(\$1,010,000 – \$1,000,000)			
3. (a) 2017			
Jan. 1	Cash	400,000	
	Mortgage Payable		400,000
	(To record issuance of mortgage payable)		

(b)	<u>Interest Period</u>	<u>Cash Payment</u>	<u>Interest Expense</u>	<u>Reduction of Principal</u>	<u>Principal Balance</u>
	Issue date				\$400,000
	1	\$41,185	\$24,000	\$17,185	382,815
	2	41,185	22,969	18,216	364,599
	3	41,185	21,876	19,309	345,290
	4	41,185	20,717	20,468	324,822
(c)	Current liability: \$18,216				
	Long-term liability: \$364,599				

WileyPLUS

Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

QUESTIONS

- Lori Randle believes a current liability is a debt that can be expected to be paid in one year. Is Lori correct? Explain.
- Petrocelli Company obtains \$40,000 in cash by signing a 7%, 6-month, \$40,000 note payable to First Bank on July 1. Petrocelli's fiscal year ends on September 30. What information should be reported for the note payable in the annual financial statements?
- (a) Your roommate says, "Sales taxes are reported as an expense in the income statement." Do you agree? Explain.
(b) Jensen Company has cash proceeds from sales of \$8,400. This amount includes \$400 of sales taxes. Give the entry to record the proceeds.
- Ottawa University sold 15,000 season football tickets at \$80 each for its six-game home schedule. What entries should be made (a) when the tickets were sold, and (b) after each game?
- Identify three taxes commonly withheld by the employer from an employee's gross pay.
- (a) What are long-term liabilities? Give three examples.
(b) What is a bond?
- Contrast the following types of bonds: (a) secured and unsecured, and (b) convertible and callable.
- The following terms are important in issuing bonds: (a) face value, (b) contractual interest rate, (c) bond indenture, and (d) bond certificate. Explain each of these terms.
- Describe the two major obligations incurred by a company when bonds are issued.
- Assume that Remington Inc. sold bonds with a face value of \$100,000 for \$104,000. Was the market interest rate equal to, less than, or greater than the bonds' contractual interest rate? Explain.
- If a 7%, 10-year, \$800,000 bond is issued at face value and interest is paid annually, what is the amount of the interest payment at the end of the first period?
- If the Bonds Payable account has a balance of \$900,000 and the Discount on Bonds Payable account has a balance of \$120,000, what is the carrying value of the bonds?
- Which accounts are debited and which are credited if a bond issue originally sold at a premium is redeemed before maturity at 97 immediately following the payment of interest?
- Rattigan Corporation is considering issuing a convertible bond. What is a convertible bond? Discuss the advantages of a convertible bond from the standpoint of (a) the bondholders and (b) the issuing corporation.
- Rob Grier, a friend of yours, has recently purchased a home for \$125,000, paying \$25,000 down and the remainder financed by a 10.5%, 20-year mortgage, payable at \$998.38 per month. At the end of the first month, Rob receives a statement from the bank indicating that only \$123.38 of principal was paid during the month. At this rate, he calculates that it will take over 67 years to pay off the mortgage. Is he right? Discuss.
- In general, what are the requirements for the financial statement presentation of long-term liabilities?
- (a) As a source of long-term financing, what are the major advantages of bonds over common stock?
(b) What are the major disadvantages in using bonds for long-term financing?
- What is liquidity? What are two measures of liquidity?
- *19. Explain the straight-line method of amortizing discount and premium on bonds payable.
- *20. DeWeese Corporation issues \$400,000 of 8%, 5-year bonds on January 1, 2017, at 105. Assuming that the straight-line method is used to amortize the premium, what is the total amount of interest expense for 2017?
- *21. Kelli Deane is discussing the advantages of the effective-interest method of bond amortization with her accounting staff. What do you think Kelli is saying?
- *22. Windsor Corporation issues \$500,000 of 9%, 5-year bonds on January 1, 2017, at 104. If Windsor uses the effective-interest method in amortizing the premium, will the annual interest expense increase or decrease over the life of the bonds? Explain.

BRIEF EXERCISES

- BE10-1** Jamison Company has the following obligations at December 31: (a) a note payable for \$100,000 due in 2 years, (b) a 10-year mortgage payable of \$300,000 payable in ten \$30,000 annual payments, (c) interest payable of \$15,000 on the mortgage, and (d) accounts payable of \$60,000. For each obligation, indicate whether it should be classified as a current liability. (Assume an operating cycle of less than one year.) *Identify whether obligations are current liabilities.* (LO 1)
- BE10-2** Peralta Company borrows \$60,000 on July 1 from the bank by signing a \$60,000, 10%, one-year note payable. *Prepare entries for an interest-bearing note payable.* (LO 1)
- (a) Prepare the journal entry to record the proceeds of the note.
 (b) Prepare the journal entry to record accrued interest at December 31, assuming adjusting entries are made only at the end of the year.
- BE10-3** Coghlan Auto Supply does not segregate sales and sales taxes at the time of sale. The register total for March 16 is \$16,380. All sales are subject to a 5% sales tax. Compute sales taxes payable, and make the entry to record sales taxes payable and sales revenue. *Compute and record sales taxes payable.* (LO 1)
- BE10-4** Derby University sells 4,000 season basketball tickets at \$210 each for its 12-game home schedule. Give the entry to record (a) the sale of the season tickets and (b) the revenue recognized by playing the first home game. *Prepare entries for unearned revenues.* (LO 1)
- BE10-5** Beth Corbin's regular hourly wage rate is \$16, and she receives an hourly rate of \$24 for work in excess of 40 hours. During a January pay period, Beth works 45 hours. Beth's federal income tax withholding is \$95, and she has no voluntary deductions. Compute Beth Corbin's gross earnings and net pay for the pay period. *Compute gross earnings and net pay.* (LO 1)
- BE10-6** Data for Beth Corbin are presented in BE10-5. Prepare the journal entries to record (a) Beth's pay for the period and (b) the payment of Beth's wages. Use January 15 for the end of the pay period and the payment date. *Record a payroll and the payment of wages.* (LO 1)
- BE10-7** Randle Inc. issues \$300,000, 10-year, 8% bonds at 98. Prepare the journal entry to record the sale of these bonds on March 1, 2017. *Prepare entry for bonds issued.* (LO 3)
- BE10-8** Price Company issues \$400,000, 20-year, 7% bonds at 101. Prepare the journal entry to record the sale of these bonds on June 1, 2017. *Prepare entry for bonds issued.* (LO 3)
- BE10-9** Meera Corporation issued 4,000, 8%, 5-year, \$1,000 bonds dated January 1, 2017, at 100. Interest is paid each January 1. *Prepare entries for bonds issued at face value.* (LO 3)
- (a) Prepare the journal entry to record the sale of these bonds on January 1, 2017.
 (b) Prepare the adjusting journal entry on December 31, 2017, to record interest expense.
 (c) Prepare the journal entry on January 1, 2018, to record interest paid.
- BE10-10** Nasreen Company issues \$2 million, 10-year, 8% bonds at 97, with interest payable each January 1. *Prepare entries for bonds sold at a discount and a premium.* (LO 3)
- (a) Prepare the journal entry to record the sale of these bonds on January 1, 2017.
 (b) Assuming instead that the above bonds sold for 104, prepare the journal entry to record the sale of these bonds on January 1, 2017.
- BE10-11** Frankum Company has issued three different bonds during 2017. Interest is payable annually on each of these bonds. *Prepare entries for bonds issued.* (LO 3)
- On January 1, 2017, 1,000, 8%, 5-year, \$1,000 bonds dated January 1, 2017, were issued at face value.
 - On July 1, \$900,000, 9%, 5-year bonds dated July 1, 2017, were issued at 102.
 - On September 1, \$400,000, 7%, 5-year bonds dated September 1, 2017, were issued at 98.
- Prepare the journal entry to record each bond transaction at the date of issuance.

Prepare entry for redemption of bonds.

(LO 3)

BE10-12 The balance sheet for Miley Consulting reports the following information on July 1, 2017.

Long-term liabilities		
Bonds payable	\$1,000,000	
Less: Discount on bonds payable	<u>60,000</u>	\$940,000

Miley decides to redeem these bonds at 101 after paying annual interest. Prepare the journal entry to record the redemption on July 1, 2017.

Prepare entries for long-term notes payable.

(LO 4)

BE10-13 Hanschu Inc. issues an \$800,000, 10%, 10-year mortgage note on December 31, 2017, to obtain financing for a new building. The terms provide for annual installment payments of \$130,196. Prepare the entry to record the mortgage loan on December 31, 2017, and the first installment payment on December 31, 2018.

Prepare statement presentation of long-term liabilities.

(LO 5)

BE10-14 Presented below are long-term liability items for Lind Company at December 31, 2017. Prepare the long-term liabilities section of the balance sheet for Lind Company.

Bonds payable, due 2019	\$600,000
Notes payable, due 2022	80,000
Discount on bonds payable	45,000

Compare bond versus stock financing.

(LO 5)

BE10-15 Moby Inc. is considering two alternatives to finance its construction of a new \$2 million plant.

- Issuance of 200,000 shares of common stock at the market price of \$10 per share.
- Issuance of \$2 million, 8% bonds at face value.

Complete the following table, and indicate which alternative is preferable.

	<u>Issue Stock</u>	<u>Issue Bond</u>
Income before interest and taxes	\$700,000	\$700,000
Interest expense from bonds	<u> </u>	<u> </u>
Income before income taxes		
Income tax expense (30%)	<u> </u>	<u> </u>
Net income	<u>\$ </u>	<u>\$ </u>
Outstanding shares		500,000
Earnings per share	<u> </u>	<u> </u>

Prepare entries for bonds issued at a discount.

(LO 6)

***BE10-16** Sweetwood Company issues \$5 million, 10-year, 9% bonds at 96, with interest payable annually on January 1. The straight-line method is used to amortize bond discount.

- Prepare the journal entry to record the sale of these bonds on January 1, 2017.
- Prepare the adjusting journal entry to record interest expense and bond discount amortization on December 31, 2017.

Prepare entries for bonds issued at a premium.

(LO 6)

***BE10-17** Golden Inc. issues \$4 million, 5-year, 10% bonds at 102, with interest payable annually January 1. The straight-line method is used to amortize bond premium.

- Prepare the journal entry to record the sale of these bonds on January 1, 2017.
- Prepare the adjusting journal entry to record interest expense and bond premium amortization on December 31, 2017.

Use effective-interest method of bond amortization.

(LO 7)

***BE10-18** Presented below is the partial bond discount amortization schedule for Gomez Corp. Gomez uses the effective-interest method of amortization.

<u>Interest Periods</u>	<u>Interest to Be Paid</u>	<u>Interest Expense to Be Recorded</u>	<u>Discount Amortization</u>	<u>Unamortized Discount</u>	<u>Bond Carrying Value</u>
Issue date				\$38,609	\$961,391
1	\$45,000	\$48,070	\$3,070	35,539	964,461
2	45,000	48,223	3,223	32,316	967,684

- Prepare the journal entry to record the payment of interest and the discount amortization at the end of period 1.
-  Explain why interest expense is greater than interest paid.
- Explain why interest expense will increase each period.

DO IT! Exercises

DO IT! 10-1a During the month of February, Morrisey Corporation's employees earned wages of \$74,000. Withholdings related to these wages were \$5,661 for Social Security (FICA), \$7,100 for federal income tax, and \$1,900 for state income tax. Costs incurred for unemployment taxes were \$110 for federal and \$160 for state.

Prepare the February 28 journal entries for (a) salaries and wages expense and salaries and wages payable assuming that all February wages will be paid in March and (b) the company's payroll tax expense.

Prepare entries for payroll and payroll taxes.

(LO 1)

DO IT! 10-1b You and several classmates are studying for the next accounting examination. They ask you to answer the following questions:

1. If cash is borrowed on a \$70,000, 9-month, 6% note on August 1, how much interest expense would be incurred by December 31?
2. The cash register total including sales taxes is \$42,000, and the sales tax rate is 5%. What is the sales taxes payable?
3. If \$45,000 is collected in advance on November 1 for 6-month magazine subscriptions, what amount of subscription revenue should be recognized by December 31?

Answer questions about current liabilities.

(LO 1)

DO IT! 10-2 State whether each of the following statements is true or false. If false, indicate how to correct the statement.

- _____ 1. Mortgage bonds and sinking fund bonds are both examples of debenture bonds.
- _____ 2. Convertible bonds are also known as callable bonds.
- _____ 3. The market rate is the rate investors demand for loaning funds.
- _____ 4. Annual interest on bonds is equal to the face value times the stated rate.
- _____ 5. The present value of a bond is the value at which it should sell in the market.

Evaluate statements about bonds.

(LO 2)

DO IT! 10-3a Eubank Corporation issues \$500,000 of bonds for \$520,000. (a) Prepare the journal entry to record the issuance of the bonds, and (b) show how the bonds would be reported on the balance sheet at the date of issuance.

Prepare journal entry for bond issuance and show balance sheet presentation.

(LO 3)

DO IT! 10-3b Prater Corporation issued \$400,000 of 10-year bonds at a discount. Prior to maturity, when the carrying value of the bonds was \$390,000, the company redeemed the bonds at 99. Prepare the entry to record the redemption of the bonds.

Prepare entry for bond redemption.

(LO 3)

DO IT! 10-4 Detwiler Orchard issues a \$700,000, 6%, 15-year mortgage note to obtain needed financing for a new lab. The terms call for annual payments of \$72,074 each. Prepare the entries to record the mortgage loan and the first installment payment.

Prepare entries for mortgage note and installment payment on note.

(LO 4)

DO IT! 10-5 Grouper Company provides you with the following balance sheet information as of December 31, 2017.

Analyze liabilities.

(LO 5)

Current assets	\$11,500	Current liabilities	\$12,000
Long-term assets	26,500	Long-term liabilities	14,000
Total assets	<u>\$38,000</u>	Stockholders' equity	12,000
		Total liabilities and stockholders' equity	<u>\$38,000</u>

In addition, Grouper reported net income for 2017 of \$16,000, income tax expense of \$3,200, and interest expense of \$1,300.

- (a) Compute the current ratio and working capital for Grouper for 2017.
- (b) Assume that at the end of 2017, Grouper used \$3,000 cash to pay off \$3,000 of accounts payable. How would the current ratio and working capital have changed?
- (c) Compute the debt to assets ratio and the times interest earned ratio for Grouper for 2017.

EXERCISES

Prepare entries for interest-bearing notes.

(LO 1)

E10-1 C.S. Lewis Company had the following transactions involving notes payable.

July 1, 2017	Borrows \$50,000 from First National Bank by signing a 9-month, 8% note.
Nov. 1, 2017	Borrows \$60,000 from Lyon County State Bank by signing a 3-month, 6% note.
Dec. 31, 2017	Prepares adjusting entries.
Feb. 1, 2018	Pays principal and interest to Lyon County State Bank.
Apr. 1, 2018	Pays principal and interest to First National Bank.

Instructions

Prepare journal entries for each of the transactions.

Prepare entries for interest-bearing notes.

(LO 1)

E10-2 On June 1, Merando Company borrows \$90,000 from First Bank on a 6-month, \$90,000, 8% note.

Instructions

- Prepare the entry on June 1.
- Prepare the adjusting entry on June 30.
- Prepare the entry at maturity (December 1), assuming monthly adjusting entries have been made through November 30.
- What was the total financing cost (interest expense)?

Journalize sales and related taxes.

(LO 1)

E10-3 In performing accounting services for small businesses, you encounter the following situations pertaining to cash sales.

- Poole Company enters sales and sales taxes separately in its cash register. On April 10, the register totals are sales \$30,000 and sales taxes \$1,500.
- Waterman Company does not segregate sales and sales taxes. Its register total for April 15 is \$25,680, which includes a 7% sales tax.

Instructions

Prepare the entry to record the sales transactions and related taxes for each client.

Journalize unearned subscription revenue.

(LO 1)

E10-4 Moreno Company publishes a monthly sports magazine, *Fishing Preview*. Subscriptions to the magazine cost \$20 per year. During November 2017, Moreno sells 15,000 subscriptions beginning with the December issue. Moreno prepares financial statements quarterly and recognizes subscription revenue at the end of the quarter. The company uses the accounts Unearned Subscription Revenue and Subscription Revenue.

Instructions

- Prepare the entry in November for the receipt of the subscriptions.
- Prepare the adjusting entry at December 31, 2017, to record sales revenue recognized in December 2017.
- Prepare the adjusting entry at March 31, 2018, to record sales revenue recognized in the first quarter of 2018.

Calculate and record net pay.

(LO 1)

E10-5 Dan Noll's gross earnings for the week were \$1,780, his federal income tax withholding was \$303, and his FICA total was \$136.

Instructions

- What was Noll's net pay for the week?
- Journalize the entry for the recording of his pay in the general journal. (*Note:* Use Salaries and Wages Payable: not Cash.)
- Record the issuing of the check for Noll's pay in the general journal.

Record accrual of payroll taxes.

(LO 1)

E10-6 According to the accountant of Ulster Inc., its payroll taxes for the week were as follows: \$137.68 for FICA taxes, \$13.77 for federal unemployment taxes, and \$92.93 for state unemployment taxes.

Instructions

Journalize the entry to record the accrual of the payroll taxes.

E10-7 Nick Bosch has prepared the following list of statements about bonds.

1. Bonds are a form of interest-bearing notes payable.
2. Secured bonds have specific assets of the issuer pledged as collateral for the bonds.
3. Secured bonds are also known as debenture bonds.
4. A conversion feature may be added to bonds to make them more attractive to bond buyers.
5. The rate used to determine the amount of cash interest the borrower pays is called the stated rate.
6. Bond prices are usually quoted as a percentage of the face value of the bond.
7. The present value of a bond is the value at which it should sell in the marketplace.

Evaluate statements about bonds.

(LO 2)

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E10-8 On January 1, 2017, Klosterman Company issued \$500,000, 10%, 10-year bonds at face value. Interest is payable annually on January 1.

Prepare entries for issuance of bonds, and payment and accrual of bond interest.

(LO 3)

Instructions

Prepare journal entries to record the following.

- (a) The issuance of the bonds.
- (b) The accrual of interest on December 31, 2017.
- (c) The payment of interest on January 1, 2018.

E10-9 On January 1, 2017, Forrester Company issued \$400,000, 8%, 5-year bonds at face value. Interest is payable annually on January 1.

Prepare entries for bonds issued at face value.

(LO 3)

Instructions

Prepare journal entries to record the following.

- (a) The issuance of the bonds.
- (b) The accrual of interest on December 31, 2017.
- (c) The payment of interest on January 1, 2018.

E10-10 Whitmore Company issued \$500,000 of 5-year, 8% bonds at 97 on January 1, 2017. The bonds pay interest annually.

Prepare entries to record issuance of bonds at discount and premium.

(LO 3)

Instructions

- (a) (1) Prepare the journal entry to record the issuance of the bonds.
(2) Compute the total cost of borrowing for these bonds.
- (b) Repeat the requirements from part (a), assuming the bonds were issued at 105.

E10-11 The following section is taken from Ohlman Corp.'s balance sheet at December 31, 2016.

Current liabilities	
Interest payable	\$ 112,000
Long-term liabilities	
Bonds payable, 7%, due January 1, 2021	1,600,000

Prepare entries for bond interest and redemption.

(LO 3)

Bond interest is payable annually on January 1. The bonds are callable on any interest date.

Instructions

- (a) Journalize the payment of the bond interest on January 1, 2017.
- (b) Assume that on January 1, 2017, after paying interest, Ohlman calls bonds having a face value of \$600,000. The call price is 103. Record the redemption of the bonds.
- (c) Prepare the entry to record the accrual of interest on December 31, 2017.

E10-12 Presented below and on page 486 are three independent situations.

1. Longbine Corporation redeemed \$130,000 face value, 12% bonds on June 30, 2017, at 102. The carrying value of the bonds at the redemption date was \$117,500. The bonds pay annual interest, and the interest payment due on June 30, 2017, has been made and recorded.

Prepare entries for redemption of bonds and conversion of bonds into common stock.

(LO 3)

- Tastove Inc. redeemed \$150,000 face value, 12.5% bonds on June 30, 2017, at 98. The carrying value of the bonds at the redemption date was \$151,000. The bonds pay annual interest, and the interest payment due on June 30, 2017, has been made and recorded.
- Precision Company has \$80,000, 8%, 12-year convertible bonds outstanding. These bonds were sold at face value and pay annual interest on December 31 of each year. The bonds are convertible into 30 shares of Precision \$5 par value common stock for each \$1,000 worth of bonds. On December 31, 2017, after the bond interest has been paid, \$20,000 face value bonds were converted. The market price of Precision common stock was \$44 per share on December 31, 2017.

Instructions

For each independent situation above, prepare the appropriate journal entry for the redemption or conversion of the bonds.

Prepare entries to record mortgage note and payments.

(LO 4)

E10-13 Jernigan Co. receives \$300,000 when it issues a \$300,000, 10%, mortgage note payable to finance the construction of a building at December 31, 2017. The terms provide for annual installment payments of \$50,000 on December 31.

Instructions

Prepare the journal entries to record the mortgage loan and the first two payments.

Prepare long-term liabilities section.

(LO 5)

E10-14 The adjusted trial balance for Karr Farm Corporation at the end of the current year contained the following accounts.

Interest Payable	\$ 9,000
Bonds Payable, due 2021	180,000
Premium on Bonds Payable	32,000

Instructions

Prepare the long-term liabilities section of the balance sheet.

Compare two alternatives of financing—issuance of common stock vs. issuance of bonds.

(LO 5)

E10-15 Gilliland Airlines is considering two alternatives for the financing of a purchase of a fleet of airplanes. These two alternatives are:

- Issue 90,000 shares of common stock at \$30 per share. (Cash dividends have not been paid nor is the payment of any contemplated.)
- Issue 10%, 10-year bonds at face value for \$2,700,000.

It is estimated that the company will earn \$800,000 before interest and taxes as a result of this purchase. The company has an estimated tax rate of 30% and has 120,000 shares of common stock outstanding prior to the new financing.

Instructions

Determine the effect on net income and earnings per share for these two methods of financing.

Calculate current ratio and working capital before and after paying accounts payable.

(LO 5)

E10-16 Suppose the following financial data were reported by **3M Company** for 2016 and 2017 (dollars in millions).

3M COMPANY
Balance Sheets (partial)

	<u>2017</u>	<u>2016</u>
Current assets		
Cash and cash equivalents	\$ 3,040	\$1,849
Accounts receivable, net	3,250	3,195
Inventories	2,639	3,013
Other current assets	1,866	1,541
Total current assets	<u>\$10,795</u>	<u>\$9,598</u>
Current liabilities	\$ 4,897	\$5,839

Instructions

- Calculate the current ratio and working capital for 3M for 2016 and 2017.
- Suppose that at the end of 2017, 3M management used \$200 million cash to pay off \$200 million of accounts payable. How would its current ratio and working capital have changed?

***E10-17** Adcock Company issued \$600,000, 9%, 20-year bonds on January 1, 2017, at 103. Interest is payable annually on January 1. Adcock uses straight-line amortization for bond premium or discount.

Prepare entries to record issuance of bonds, payment of interest, amortization of premium, and redemption at maturity.

(LO 6)

Instructions

Prepare the journal entries to record the following.

- The issuance of the bonds.
- The accrual of interest and the premium amortization on December 31, 2017.
- The payment of interest on January 1, 2018.
- The redemption of the bonds at maturity, assuming interest for the last interest period has been paid and recorded.

***E10-18** Gridley Company issued \$800,000, 11%, 10-year bonds on December 31, 2016, for \$730,000. Interest is payable annually on December 31. Gridley Company uses the straight-line method to amortize bond premium or discount.

Prepare entries to record issuance of bonds, payment of interest, amortization of discount, and redemption at maturity.

(LO 6)

Instructions

Prepare the journal entries to record the following.

- The issuance of the bonds.
- The payment of interest and the discount amortization on December 31, 2017.
- The redemption of the bonds at maturity, assuming interest for the last interest period has been paid and recorded.

***E10-19** Lorance Corporation issued \$400,000, 7%, 20-year bonds on January 1, 2017, for \$360,727. This price resulted in an effective-interest rate of 8% on the bonds. Interest is payable annually on January 1. Lorance uses the effective-interest method to amortize bond premium or discount.

Prepare entries for issuance of bonds, payment of interest, and amortization of discount using effective-interest method.

(LO 7)

Instructions

Prepare the journal entries to record the following. (Round to the nearest dollar.)

- The issuance of the bonds.
- The accrual of interest and the discount amortization on December 31, 2017.
- The payment of interest on January 1, 2018.

***E10-20** LRNA Company issued \$380,000, 7%, 10-year bonds on January 1, 2017, for \$407,968. This price resulted in an effective-interest rate of 6% on the bonds. Interest is payable annually on January 1. LRNA uses the effective-interest method to amortize bond premium or discount.

Prepare entries of issuance of bonds, payment of interest, and amortization of discount using effective-interest method.

(LO 7)

Instructions

Prepare the journal entries to record the following. (Round to the nearest dollar.)

- The issuance of the bonds.
- The accrual of interest and the premium amortization on December 31, 2017.
- The payment of interest on January 1, 2018.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Prepare current liability entries, adjusting entries, and current liabilities section.

(LO 1, 5)

P10-1A On January 1, 2017, the ledger of Accardo Company contains the following liability accounts.

Accounts Payable	\$52,000
Sales Taxes Payable	7,700
Unearned Service Revenue	16,000

During January, the following selected transactions occurred.

- Jan. 5 Sold merchandise for cash totaling \$20,520, which includes 8% sales taxes.
 12 Performed services for customers who had made advance payments of \$10,000. (Credit Service Revenue.)
 14 Paid state revenue department for sales taxes collected in December 2016 (\$7,700).
 20 Sold 900 units of a new product on credit at \$50 per unit, plus 8% sales tax.
 21 Borrowed \$27,000 from Girard Bank on a 3-month, 8%, \$27,000 note.
 25 Sold merchandise for cash totaling \$12,420, which includes 8% sales taxes.

Instructions

- (a) Journalize the January transactions.
 (b) Journalize the adjusting entry at January 31 for the outstanding note payable. (*Hint:* Use one-third of a month for the Girard Bank note.)
 (c) Prepare the current liabilities section of the balance sheet at January 31, 2017. Assume no change in accounts payable.

(c) Current liability total
\$91,100

Journalize and post note transactions; show balance sheet presentation.

(LO 1, 5)

P10-2A The following are selected transactions of Blanco Company. Blanco prepares financial statements **quarterly**.

- Jan. 2 Purchased merchandise on account from Nunez Company, \$30,000, terms 2/10, n/30. (Blanco uses the perpetual inventory system.)
 Feb. 1 Issued a 9%, 2-month, \$30,000 note to Nunez in payment of account.
 Mar. 31 Accrued interest for 2 months on Nunez note.
 Apr. 1 Paid face value and interest on Nunez note.
 July 1 Purchased equipment from Marson Equipment paying \$11,000 in cash and signing a 10%, 3-month, \$60,000 note.
 Sept. 30 Accrued interest for 3 months on Marson note.
 Oct. 1 Paid face value and interest on Marson note.
 Dec. 1 Borrowed \$24,000 from the Paola Bank by issuing a 3-month, 8% note with a face value of \$24,000.
 Dec. 31 Recognized interest expense for 1 month on Paola Bank note.

Instructions

- (a) Prepare journal entries for the listed transactions and events.
 (b) Post to the accounts Notes Payable, Interest Payable, and Interest Expense.
 (c) Show the balance sheet presentation of notes and interest payable at December 31.
 (d) What is total interest expense for the year?

(d) \$2,110

Prepare entries to record issuance of bonds, interest accrual, and bond redemption.

(LO 3, 5)

P10-3A On May 1, 2017, Herron Corp. issued \$600,000, 9%, 5-year bonds at face value. The bonds were dated May 1, 2017, and pay interest annually on May 1. Financial statements are prepared annually on December 31.

Instructions

- (a) Prepare the journal entry to record the issuance of the bonds.
 (b) Prepare the adjusting entry to record the accrual of interest on December 31, 2017.
 (c) Show the balance sheet presentation on December 31, 2017.
 (d) Prepare the journal entry to record payment of interest on May 1, 2018.
 (e) Prepare the adjusting entry to record the accrual of interest on December 31, 2018.
 (f) Assume that on January 1, 2019, Herron pays the accrued bond interest and calls the bonds at 102. Record the payment of interest and redemption of the bonds.

(d) Int. exp. \$18,000

(f) Loss \$12,000

Prepare entries to record issuance of bonds, interest accrual, and bond redemption.

(LO 3, 5)

P10-4A Kershaw Electric sold \$6,000,000, 10%, 15-year bonds on January 1, 2017. The bonds were dated January 1, 2017, and paid interest on January 1. The bonds were sold at 98.

Instructions

- (a) Prepare the journal entry to record the issuance of the bonds on January 1, 2017.
- (b) At December 31, 2017, \$8,000 of the Discount on Bonds Payable account has been amortized. Show the balance sheet presentation of the long-term liability at December 31, 2017.
- (c) On January 1, 2019, when the carrying value of the bonds was \$5,896,000, the company redeemed the bonds at 102. Record the redemption of the bonds assuming that interest for the period has already been paid.

(c) Loss \$224,000

P10-5A Talkington Electronics issues a \$400,000, 8%, 10-year mortgage note on December 31, 2016. The proceeds from the note are to be used in financing a new research laboratory. The terms of the note provide for annual installment payments, exclusive of real estate taxes and insurance, of \$59,612. Payments are due on December 31.

Prepare installment payments schedule and journal entries for a mortgage note payable.

(LO 4, 5)

Instructions

- (a) Prepare an installment payments schedule for the first 4 years.
- (b) Prepare the entries for (1) the loan and (2) the first installment payment.
- (c) Show how the total mortgage liability should be reported on the balance sheet at December 31, 2017.

(b) December 31 debit
Mortgage Payable
\$27,612

(c) Current liability—2017
\$29,821

***P10-6A** Paris Electric sold \$3,000,000, 10%, 10-year bonds on January 1, 2017. The bonds were dated January 1 and pay interest annually on January 1. Paris Electric uses the straight-line method to amortize bond premium or discount. The bonds were sold at 104.

Prepare entries to record issuance of bonds, interest accrual, and straight-line amortization for 2 years.

(LO 5, 6)

Instructions

- (a) Prepare the journal entry to record the issuance of the bonds on January 1, 2017.
- (b) Prepare a bond premium amortization schedule for the first 4 interest periods.
- (c) Prepare the journal entries for interest and the amortization of the premium in 2017 and 2018.
- (d) Show the balance sheet presentation of the bond liability at December 31, 2018.

(b) Amortization \$12,000

(d) Premium on bonds payable \$96,000

***P10-7A** Saberhagen Company sold \$3,500,000, 8%, 10-year bonds on January 1, 2017. The bonds were dated January 1, 2017, and pay interest annually on January 1. Saberhagen Company uses the straight-line method to amortize bond premium or discount.

Prepare entries to record issuance of bonds, interest, and straight-line amortization of bond premium and discount.

(LO 5, 6)

Instructions

- (a) Prepare all the necessary journal entries to record the issuance of the bonds and bond interest expense for 2017, assuming that the bonds sold at 104.
- (b) Prepare journal entries as in part (a) assuming that the bonds sold at 98.
- (c) Show balance sheet presentation for the bonds at December 31, 2017, for both the requirements in (a) and (b).

(a) Amortization \$14,000
(b) Amortization \$7,000
(c) Premium on bonds payable \$126,000
Discount on bonds payable \$63,000

***P10-8A** The following is taken from the Colaw Company balance sheet.

COLAW COMPANY
Balance Sheet (partial)
December 31, 2017

Current liabilities		
Interest payable (for 12 months from January 1 to December 31)		\$ 210,000
Long-term liabilities		
Bonds payable, 7% due January 1, 2028	\$3,000,000	
Add: Premium on bonds payable	<u>200,000</u>	3,200,000

Interest is payable annually on January 1. The bonds are callable on any annual interest date. Colaw uses straight-line amortization for any bond premium or discount. From December 31, 2017, the bonds will be outstanding for an additional 10 years (120 months).

Instructions

- (a) Journalize the payment of bond interest on January 1, 2018.
- (b) Prepare the entry to amortize bond premium and to accrue the interest due on December 31, 2018.

(b) Amortization \$20,000

(c) Gain \$60,000

(d) Amortization \$12,000

Prepare journal entries to record issuance of bonds, payment of interest, and amortization of bond discount using effective-interest method.

(LO 7)

(c) Interest Expense \$100,051

Prepare journal entries to record issuance of bonds, payment of interest, and effective-interest amortization, and balance sheet presentation.

(LO 5, 7)

(a) (4) Interest Expense \$128,162

- (c) Assume that on January 1, 2019, after paying interest, Colaw Company calls bonds having a face value of \$1,200,000. The call price is 101. Record the redemption of the bonds.
- (d) Prepare the adjusting entry at December 31, 2019, to amortize bond premium and to accrue interest on the remaining bonds.

***P10-9A** On January 1, 2017, Lock Corporation issued \$1,800,000 face value, 5%, 10-year bonds at \$1,667,518. This price resulted in an effective-interest rate of 6% on the bonds. Lock uses the effective-interest method to amortize bond premium or discount. The bonds pay annual interest January 1.

Instructions

(Round all computations to the nearest dollar.)

- Prepare the journal entry to record the issuance of the bonds on January 1, 2017.
- Prepare an amortization table through December 31, 2019 (three interest periods) for this bond issue.
- Prepare the journal entry to record the accrual of interest and the amortization of the discount on December 31, 2017.
- Prepare the journal entry to record the payment of interest on January 1, 2018.
- Prepare the journal entry to record the accrual of interest and the amortization of the discount on December 31, 2018.

***P10-10A** On January 1, 2017, Jade Company issued \$2,000,000 face value, 7%, 10-year bonds at \$2,147,202. This price resulted in a 6% effective-interest rate on the bonds. Jade uses the effective-interest method to amortize bond premium or discount. The bonds pay annual interest on each January 1.

Instructions

- Prepare the journal entries to record the following transactions.
 - The issuance of the bonds on January 1, 2017.
 - Accrual of interest and amortization of the premium on December 31, 2017.
 - The payment of interest on January 1, 2018.
 - Accrual of interest and amortization of the premium on December 31, 2018.
- Show the proper long-term liabilities balance sheet presentation for the liability for bonds payable at December 31, 2018.
-  Provide the answers to the following questions in narrative form.
 - What amount of interest expense is reported for 2018?
 - Would the bond interest expense reported in 2018 be the same as, greater than, or less than the amount that would be reported if the straight-line method of amortization were used?

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEMS

CP10-1 James Corporation's balance sheet at December 31, 2016, is presented below.

JAMES CORPORATION
Balance Sheet
December 31, 2016

Cash	\$ 30,500	Accounts payable	\$ 13,750
Inventory	25,750	Interest payable	2,500
Prepaid insurance	5,600	Bonds payable	50,000
Equipment	43,000	Common stock	20,000
	<u>\$104,850</u>	Retained earnings	18,600
			<u>\$104,850</u>

During 2017, the following transactions occurred.

1. James paid \$2,500 interest on the bonds on January 1, 2017.
2. James purchased \$241,100 of inventory on account.
3. James sold for \$450,000 cash inventory which cost \$250,000. James also collected \$31,500 sales taxes.
4. James paid \$230,000 on accounts payable.
5. James paid \$2,500 interest on the bonds on July 1, 2017.
6. The prepaid insurance (\$5,600) expired on July 31.
7. On August 1, James paid \$12,000 for insurance coverage from August 1, 2017, through July 31, 2018.
8. James paid \$24,000 sales taxes to the state.
9. Paid other operating expenses, \$91,000.
10. Retired the bonds on December 31, 2017, by paying \$47,000 plus \$2,500 interest.
11. Issued \$90,000 of 8% bonds on December 31, 2017, at 104. The bonds pay interest every December 31.

Adjustment data:

1. Recorded the insurance expired from item 7.
2. The equipment was acquired on December 31, 2016, and will be depreciated on a straight-line basis over 5 years with a \$3,000 salvage value.
3. The income tax rate is 30%. (*Hint:* Prepare the income statement up to income before taxes and multiply by 30% to compute the amount.)

Instructions

(You may want to set up T-accounts to determine ending balances.)

- (a) Prepare journal entries for the transactions listed above and adjusting entries.
- (b) Prepare an adjusted trial balance at December 31, 2017. (b) Totals \$652,070
- (c) Prepare an income statement and a retained earnings statement for the year ending December 31, 2017, and a classified balance sheet as of December 31, 2017. (c) N.I. \$61,880

CP10-2 Eastland Company and Westside Company are competing businesses. Both began operations 6 years ago and are quite similar in most respects. The current balance sheet data for the two companies are shown below.

	Eastland Company	Westside Company
Cash	\$ 63,300	\$ 48,400
Accounts receivable	304,700	302,500
Allowance for doubtful accounts	(13,600)	-0-
Inventory	463,900	515,200
Plant and equipment	255,300	257,300
Accumulated depreciation—plant and equipment	(112,650)	(189,850)
Total assets	<u>\$960,950</u>	<u>\$933,550</u>
Current liabilities	\$440,200	\$431,500
Long-term liabilities	78,000	82,000
Total liabilities	<u>518,200</u>	<u>513,500</u>
Stockholders' equity	442,750	420,050
Total liabilities and stockholders' equity	<u>\$960,950</u>	<u>\$933,550</u>

You have been engaged as a consultant to conduct a review of the two companies. Your goal is to determine which of them is in the stronger financial position.

Your review of their financial statements quickly reveals that the two companies have not followed the same accounting practices. The differences and your conclusions regarding them are summarized below.

1. Eastland Company has used the allowance method of accounting for bad debts. A review shows that the amount of its write-offs each year has been quite close to the allowances that have been provided. It therefore seems reasonable to have confidence in its current estimate of bad debts.

Westside Company has used the direct write-off method for bad debts, and it has been somewhat slow to write off its uncollectible accounts. Based upon an aging analysis and review of its accounts receivable, it is estimated that \$18,000 of its existing accounts will probably prove to be uncollectible.

2. Eastland Company has determined the cost of its merchandise inventory on a LIFO basis. The result is that its inventory appears on the balance sheet at an amount that is below its current replacement cost. Based upon a detailed physical examination of its merchandise on hand, the current replacement cost of its inventory is estimated at \$513,000.

Westside Company has used the FIFO method of valuing its merchandise inventory. Its ending inventory appears on the balance sheet at an amount that quite closely approximates its current replacement cost.

3. Eastland Company estimated a useful life of 12 years and a salvage value of \$30,000 for its plant and equipment. It has been depreciating them on a straight-line basis.

Westside Company has the same type of plant and equipment. However, it estimated a useful life of 10 years and a salvage value of \$10,000. It has been depreciating its plant and equipment using the double-declining-balance method.

Based upon engineering studies of these types of plant and equipment, you conclude that Westside's estimates and method for calculating depreciation are the more appropriate.

4. Among its current liabilities, Eastland has included the portions of long-term liabilities that become due within the next year. Westside has not done so.

You find that \$16,000 of Westside's \$82,000 of long-term liabilities are due to be repaid in the current year.

Instructions

(a) Total assets:

Eastland \$934,325

Westside \$915,550

- (a) Revise the balance sheets presented above so that the data are comparable and reflect the current financial position for each of the two companies.
- (b)  Prepare a brief report to your client stating your conclusions.

CONTINUING PROBLEM

© leungchopan/
Shutterstock

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 9.)

CC10 Recall that Cookie Creations sells fine European mixers that it purchases from Kzinski Supply Co. Kzinski warrants the mixers to be free of defects in material and workmanship for a period of one year from the date of original purchase. If the mixer has such a defect, Kzinski will repair or replace the mixer free of charge for parts and labor.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE

FINANCIAL REPORTING AND ANALYSIS

Financial Reporting Problem: Apple Inc.

BYP10-1 The financial statements of **Apple Inc.** are presented in Appendix A. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

Refer to Apple's financial statements and answer the following questions about current and contingent liabilities and payroll costs.

- What were Apple's total current liabilities at September 28, 2013? What was the increase/decrease in Apple's total current liabilities from the prior year?
- In Apple's Note 10, the company explains the nature of its contingencies. Under what conditions does Apple recognize (record and report) liabilities for contingencies?
- What were the components of total current liabilities on September 28, 2013?
- What were Apple's total long-term liabilities at September 28, 2013? What was the increase/decrease in total long-term liabilities from the prior year?
- Determine whether Apple redeemed (bought back) any long-term liabilities during the fiscal year ended September 28, 2013.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP10-2 PepsiCo, Inc.'s financial statements are presented in Appendix B. Financial statements of The Coca-Cola Company are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- At December 28, 2013, what was PepsiCo's largest current liability account? What were its total current liabilities? At December 31, 2013, what was Coca-Cola's largest current liability account? What were its total current liabilities?
- Based on information contained in those financial statements, compute the following 2013 values for each company:
 - Working capital.
 - Current ratio.
- What conclusions concerning the relative liquidity of these companies can be drawn from these data?
- Based on the information contained in these financial statements, compute the following 2013 ratios for each company.
 - Debt to assets.
 - Times interest earned.
- What conclusions concerning the companies' long-run solvency can be drawn from these ratios?

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP10-3 Amazon.com, Inc.'s financial statements are presented in Appendix D. Financial statements of Wal-Mart Stores, Inc. are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- At December 31, 2013, what was Amazon's largest current liability account? What were its total current liabilities? At January 31, 2014, what was Wal-Mart's largest current liability account? What were its total current liabilities?
- Based on information in these financial statements, compute the following 2013 values for Amazon and 2014 values for Wal-Mart:
 - Working capital.
 - Current ratio.
- What conclusions concerning the relative liquidity of these companies can be drawn from these data?
- Based on the information contained in these financial statements, compute the following 2013 ratios for Amazon and 2014 ratios for Wal-Mart.
 - Debt to assets.
 - Times interest earned.
- What conclusions concerning the companies' long-run solvency can be drawn from these ratios?

Real-World Focus

BYP10-4 Bond or debt securities pay a stated rate of interest. This rate of interest is dependent on the risk associated with the investment. Also, bond prices change when the risks associated with those bonds change. **Standard & Poor's** provides ratings for companies that issue debt securities.

Address: www.img.en25.com/Web/StandardandPoors/GuidetoCreditRatingsCriteria.pdf, or go to www.wiley.com/college/weygandt

Instructions

Go to the website shown and answer the following questions.

- Explain the meaning of an “A” rating. Explain the meaning of a “C” rating.
- What types of things can cause a change in a company’s credit rating?
- Explain the relationship between a company’s credit rating and the merit of an investment in that company’s bonds.

CRITICAL THINKING

Decision-Making Across the Organization

***BYP10-5** On January 1, 2015, Glover Corporation issued \$2,400,000 of 5-year, 8% bonds at 95. The bonds pay interest annually on January 1. By January 1, 2017, the market rate of interest for bonds of risk similar to those of Glover Corporation had risen. As a result, the market value of these bonds was \$2,000,000 on January 1, 2017—below their carrying value. Joanna Glover, president of the company, suggests repurchasing all of these bonds in the open market at the \$2,000,000 price. To do so, the company will have to issue \$2,000,000 (face value) of new 10-year, 11% bonds at par. The president asks you, as controller, “What is the feasibility of my proposed repurchase plan?”

Instructions

With the class divided into groups, answer the following.

- What is the carrying value of the outstanding Glover Corporation 5-year bonds on January 1, 2017? (Assume straight-line amortization.)
- Prepare the journal entry to redeem the 5-year bonds on January 1, 2017. Prepare the journal entry to issue the new 10-year bonds.
- Prepare a short memo to the president in response to her request for advice. List the economic factors that you believe should be considered for her repurchase proposal.

Communication Activity

BYP10-6 Sam Masasi, president of Masasi Corporation, is considering the issuance of bonds to finance an expansion of his business. He has asked you to (1) discuss the advantages of bonds over common stock financing, (2) indicate the types of bonds he might issue, and (3) explain the issuing procedures used in bond transactions.

Instructions

Write a memo to the president, answering his request.

Ethics Case

BYP10-7 Ken Iwig is the president, founder, and majority owner of Olathe Medical Corporation, an emerging medical technology products company. Olathe is in dire need of additional capital to keep operating and to bring several promising products to final development, testing, and production. Ken, as owner of 51% of the outstanding stock, manages the company’s operations. He places heavy emphasis on research and development and on long-term growth. The other principal stockholder is Barb Lowery who, as a nonemployee investor, owns 40% of the stock. Barb would like to deemphasize the R&D functions and emphasize the marketing function, to maximize short-run sales and profits from existing products. She believes this strategy would raise the market price of Olathe’s stock.

All of Ken’s personal capital and borrowing power is tied up in his 51% stock ownership. He knows that any offering of additional shares of stock will dilute his controlling interest because he won’t be able to participate in such an issuance. But, Barb has money and would likely buy enough shares to gain control of Olathe. She then would dictate the company’s future direction, even if it meant replacing Ken as president and CEO.

The company already has considerable debt. Raising additional debt will be costly, will adversely affect Olathe’s credit rating, and will increase the company’s reported losses due to the growth in interest expense. Barb and the other minority stockholders express opposition to the assumption of additional debt, fearing the company will be pushed to the brink of bankruptcy. Wanting to maintain his control and to preserve the direction of “his” company, Ken is doing everything to avoid a stock issuance. He is contemplating a large issuance of bonds, even if it means the bonds are issued with a high effective-interest rate.

Instructions

- Who are the stakeholders in this situation?
- What are the ethical issues in this case?
- What would you do if you were Ken?

All About You

BYP10-8 Medical costs are substantial and rising. But will they be the most substantial expense over your lifetime? Not likely. Will it be housing or food? Again, not likely. The answer is taxes. On average, Americans work 107 days per year to afford their taxes. Companies, too, have large tax burdens. They look very hard at tax issues in deciding where to build their plants and where to locate their administrative headquarters.

Instructions

- Determine what your state income taxes are if your taxable income is \$60,000 and you file as a single taxpayer in the state in which you live.
- Assume that you own a home worth \$200,000 in your community and the tax rate is 2.1%. Compute the property taxes you would pay.
- Assume that the total gasoline bill for your automobile is \$1,200 a year (300 gallons at \$4 per gallon). What are the amounts of state and federal taxes that you pay on the \$1,200?
- Assume that your purchases for the year total \$9,000. Of this amount, \$5,000 was for food and prescription drugs. What is the amount of sales tax you would pay on these purchases? (Many states do not levy a sales tax on food or prescription drugs. Does yours?)
- Determine what your Social Security taxes are if your income is \$60,000.
- Determine what your federal income taxes are if your taxable income is \$60,000 and you file as a single taxpayer.
- Determine your total taxes paid based on the above calculations, and determine the percentage of income that you would pay in taxes based on the following formula: Total taxes paid \div Total income.

BYP10-9 Numerous articles have been written that identify early warning signs that you might be getting into trouble with your personal debt load. You can find many good articles on this topic on the Internet.

Instructions

Find an article that identifies early warning signs of personal debt trouble. Write a summary of the article and bring your summary and the article to class to share.

FASB Codification Activity

BYP10-10 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- What is the definition of current liabilities?
- What is the definition of long-term obligation?
- What guidance does the Codification provide for the disclosure of long-term liabilities?

**A Look at IFRS**LEARNING
OBJECTIVE**8****Compare the accounting for liabilities under GAAP and IFRS.**

IFRS and GAAP have similar definitions of liabilities but have a different approach for recording certain liabilities.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to accounting for liabilities.

Similarities

- The basic definition of a liability under GAAP and IFRS is very similar. In a more technical way, liabilities are defined by the IASB as a present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits.
- The accounting for current liabilities such as notes payable, unearned revenue, and payroll taxes payable are similar between GAAP and IFRS.
- IFRS requires that companies classify liabilities as current or noncurrent on the face of the statement of financial position (balance sheet), except in industries where a **presentation** based on liquidity would be considered to provide more useful information (such as financial institutions). When current liabilities (also called short-term liabilities) are presented, they are generally presented in order of liquidity.
- Under IFRS, liabilities are classified as current if they are expected to be paid within 12 months.
- Similar to GAAP, items are normally reported in order of liquidity. Companies sometimes show liabilities before assets. Also, they will sometimes show long-term liabilities before current liabilities.
- The basic calculation for bond valuation is the same under GAAP and IFRS. In addition, the accounting for bond liability transactions is essentially the same between GAAP and IFRS.
- IFRS requires use of the effective-interest method for amortization of bond discounts and premiums. GAAP also requires the effective-interest method, except that it allows use of the straight-line method where the difference is not material. Under IFRS, companies do not use a premium or discount account but instead show the bond at its net amount. For example, if a \$100,000 bond was issued at 97, under IFRS a company would record:

Cash	97,000	
Bonds Payable		97,000

Differences

- The accounting for convertible bonds differs between IFRS and GAAP. Unlike GAAP, IFRS splits the proceeds from the convertible bond between an equity component and a debt component. The equity conversion rights are reported in equity.

To illustrate, assume that Harris Corp. issues convertible 7% bonds with a face value of \$1,000,000 and receives \$1,000,000. Comparable bonds without a conversion feature would have required a 9% rate of interest. To determine how much of the proceeds would be allocated to debt and how much to equity, the promised payments of the bond obligation would be discounted at the market rate of 9%. Suppose that this results in a present value of \$850,000. The entry to record the issuance would be:

Cash	1,000,000	
Bonds Payable		850,000
Share Premium—Conversion Equity		150,000

- Under IFRS, companies sometimes will net current liabilities against current assets to show working capital on the face of the statement of financial position.

Looking to the Future

The FASB and IASB are currently involved in two projects, each of which has implications for the accounting for liabilities. One project is investigating approaches to differentiate between debt and equity instruments. The other project, the elements phase of the conceptual framework project, will evaluate the definitions of the fundamental building blocks of accounting. The results of these projects could change the classification of many debt and equity securities.

IFRS Practice

IFRS Self-Test Questions

1. Which of the following is **false**?
 - (a) Under IFRS, current liabilities must always be presented before noncurrent liabilities.
 - (b) Under IFRS, an item is a current liability if it will be paid within the next 12 months.
 - (c) Under IFRS, current liabilities are sometimes netted against current assets on the statement of financial position.
 - (d) Under IFRS, a liability is only recognized if it is a present obligation.

2. The accounting for bonds payable is:
 - (a) essentially the same under IFRS and GAAP.
 - (b) differs in that GAAP requires use of the straight-line method for amortization of bond premium and discount.
 - (c) the same except that market prices may be different because the present value calculations are different between IFRS and GAAP.
 - (d) not covered by IFRS.
3. Stevens Corporation issued 5% convertible bonds with a total face value of \$3,000,000 for \$3,000,000. If the bonds had not had a conversion feature, they would have sold for \$2,600,000. Under IFRS, the entry to record the transaction would require a credit to:
 - (a) Bonds Payable for \$3,000,000.
 - (b) Bonds Payable for \$400,000.
 - (c) Share Premium—Conversion Equity for \$400,000.
 - (d) Discount on Bonds Payable for \$400,000.
4. Which of the following is **true** regarding accounting for amortization of bond discount and premium?
 - (a) Both IFRS and GAAP must use the effective-interest method.
 - (b) GAAP must use the effective-interest method, but IFRS may use either the effective-interest method or the straight-line method.
 - (c) IFRS is required to use the effective-interest method.
 - (d) GAAP is required to use the straight-line method.
5. The joint projects of the FASB and IASB could potentially:
 - (a) change the definition of liabilities.
 - (b) change the definition of equity.
 - (c) change the definition of assets.
 - (d) All of the above.

IFRS Exercises

IFRS10-1 Briefly describe some of the similarities and differences between GAAP and IFRS with respect to the accounting for liabilities.

IFRS10-2 Ratzlaff Company issues (in euros) €2 million, 10-year, 8% bonds at 97, with interest payable annually on January 1.

Instructions

- (a) Prepare the journal entry to record the sale of these bonds on January 1, 2017.
- (b) Assuming instead that the above bonds sold for 104, prepare the journal entry to record the sale of these bonds on January 1, 2017.

IFRS10-3 Archer Company issued (in pounds) £4,000,000 par value, 7% convertible bonds at 99 for cash. The net present value of the debt without the conversion feature is £3,800,000. Prepare the journal entry to record the issuance of the convertible bonds.

International Financial Statement Analysis: Louis Vuitton

IFRS10-4 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Use the company's annual report to answer the following questions.

- (a) What were the total current liabilities for the company as of December 31, 2013? What portion of these current liabilities related to provisions?
- (b) According to the notes to the financial statements, what is the composition of long-term gross borrowings?
- (c) According to the accounting policy note to the financial statements, how are borrowings measured?
- (d) Determine the amount of fixed-rate and adjustable-rate (floating) borrowings (gross) that the company reports.

Answers to IFRS Self-Test Questions

Corporations: Organization, Stock Transactions, Dividends, and Retained Earnings

CHAPTER PREVIEW Corporations like **Nike** and **adidas** have substantial resources at their disposal. In fact, the corporation is the dominant form of business organization in the United States in terms of sales, earnings, and number of employees. All of the 500 largest companies in the United States are corporations. In this chapter, we will explain the essential features of a corporation and the accounting for a corporation's capital stock transactions.

FEATURE STORY

What's Cooking?

What major U.S. corporation got its start 41 years ago with a waffle iron? *Hint:* It doesn't sell food. *Second hint:* Swoosh. *Third hint:* "Just do it." That's right, **Nike**. In 1971, Nike co-founder Bill Bowerman put a piece of rubber into a kitchen waffle iron, and its trademark sole was born. It seems fair to say that at Nike, "They don't make 'em like they used to."

Nike was co-founded by Bowerman and Phil Knight, a member of Bowerman's University of Oregon track team. Each began in the shoe business independently during the early 1960s. Bowerman got his start by making hand-crafted running shoes for his University of Oregon track team. Knight, after completing graduate school, started a small business importing low-cost, high-quality shoes from Japan. In 1964, the two joined forces, each contributing \$500, and formed Blue Ribbon Sports, a partnership that marketed Japanese shoes.

It wasn't until 1971 that the company began manufacturing its own line of shoes. With the new shoes came a new corporate name—Nike—the Greek goddess of victory. It is hard to imagine that the company that now boasts a stable full of

world-class athletes as promoters at one time had part-time employees selling shoes out of car trunks at track meets. Nike has achieved its success through relentless innovation combined with unbridled promotion.

By 1980, Nike was sufficiently established and issued its first stock to the public. That same year, it created a stock ownership program for its employees, allowing them to share in the company's success. Since then, Nike has enjoyed phenomenal growth, with 2014 sales reaching \$27.8 billion and total dividends paid of \$799 million.

Nike is not alone in its quest for the top of the sport shoe world. **Reebok** used to be Nike's arch rival (get it? "arch"), but then Reebok was acquired by the German company **adidas**. Now **adidas** pushes Nike every step of the way.

The shoe market is fickle, with new styles becoming popular almost daily and vast international markets still lying untapped. Whether one of these two giants does eventually take control of the pedi-planet remains to be seen. Meanwhile, the shareholders sit anxiously in the stands as this Olympic-size drama unfolds.

LEARNING
OBJECTIVE**1****Discuss the major characteristics of a corporation.**

In 1819, Chief Justice John Marshall defined a corporation as “an artificial being, invisible, intangible, and existing only in contemplation of law.” This definition is the foundation for the prevailing legal interpretation that a **corporation** is an **entity separate and distinct from its owners**.

A corporation is created by law, and its continued existence depends upon the statutes of the state in which it is incorporated. As a legal entity, a corporation has most of the rights and privileges of a person. The major exceptions relate to privileges that only a living person can exercise, such as the right to vote or to hold public office. A corporation is subject to the same duties and responsibilities as a person. For example, it must abide by the laws, and it must pay taxes.

Two common ways to classify corporations are by **purpose** and by **ownership**. A corporation may be organized for the purpose of making a profit, or it may be not-for-profit. For-profit corporations include such well-known companies as **McDonald’s**, **Nike**, **PepsiCo**, and **Google**. Not-for-profit corporations are organized for charitable, medical, or educational purposes. Examples are the **Salvation Army** and the **American Cancer Society**.

Classification by ownership differentiates publicly held and privately held corporations. A **publicly held corporation** may have thousands of stockholders. Its stock is regularly traded on a national securities exchange such as the New York Stock Exchange or NASDAQ. Examples are **IBM**, **Caterpillar**, and **Apple**.

In contrast, a **privately held corporation** usually has only a few stockholders, and does not offer its stock for sale to the general public. Privately held companies are generally much smaller than publicly held companies, although some notable exceptions exist. **Cargill Inc.**, a private corporation that trades in grain and other commodities, is one of the largest companies in the United States.

Alternative Terminology

Privately held corporations are also referred to as *closely held corporations*.

**Characteristics of a Corporation**

In 1964, when **Nike’s** founders Phil Knight and Bill Bowerman were just getting started in the running shoe business, they formed their original organization as a partnership. In 1968, they reorganized the company as a corporation. A number of characteristics distinguish corporations from proprietorships and partnerships. We explain the most important of these characteristics below.

SEPARATE LEGAL EXISTENCE

As an entity separate and distinct from its owners, the corporation acts under its own name rather than in the name of its stockholders. Nike may buy, own, and sell property. It may borrow money, and it may enter into legally binding contracts in its own name. It may also sue or be sued, and it pays its own taxes.

In a partnership, the acts of the owners (partners) bind the partnership. In contrast, the acts of its owners (stockholders) do not bind the corporation unless such owners are **agents** of the corporation. For example, if you owned shares of Nike stock, you would not have the right to purchase inventory for the company unless you were designated as an agent of the corporation.

LIMITED LIABILITY OF STOCKHOLDERS

Since a corporation is a separate legal entity, creditors have recourse only to corporate assets to satisfy their claims. The liability of stockholders is normally limited to their investment in the corporation. Creditors have no legal claim on the personal assets of the owners unless fraud has occurred. Even in the event of

bankruptcy, stockholders' losses are generally limited to their capital investment in the corporation.

TRANSFERABLE OWNERSHIP RIGHTS

Shares of capital stock give ownership in a corporation. These shares are transferable units. Stockholders may dispose of part or all of their interest in a corporation simply by selling their stock. The transfer of an ownership interest in a partnership requires the consent of each owner. In contrast, the transfer of stock is entirely at the discretion of the stockholder. It does not require the approval of either the corporation or other stockholders.

The transfer of ownership rights between stockholders normally has no effect on the daily operating activities of the corporation. Nor does it affect the corporation's assets, liabilities, and total ownership equity. The transfer of these ownership rights is a transaction between individual owners. The company does not participate in the transfer of these ownership rights after the original sale of the capital stock.

ABILITY TO ACQUIRE CAPITAL

It is relatively easy for a corporation to obtain capital through the issuance of stock. Buying stock in a corporation is often attractive to an investor because a stockholder has limited liability and shares of stock are readily transferable. Also, numerous individuals can become stockholders by investing relatively small amounts of money.

CONTINUOUS LIFE

The life of a corporation is stated in its charter. The life may be perpetual, or it may be limited to a specific number of years. If it is limited, the company can extend the life through renewal of the charter. Since a corporation is a separate legal entity, its continuance as a going concern is not affected by the withdrawal, death, or incapacity of a stockholder, employee, or officer. As a result, a successful company can have a continuous and perpetual life.

CORPORATION MANAGEMENT

Stockholders legally own the corporation. However, they manage the corporation indirectly through a board of directors they elect. Philip Knight is the chairman of the board for **Nike**. The board, in turn, formulates the operating policies for the company. The board also selects officers, such as a president and one or more vice presidents, to execute policy and to perform daily management functions. As a result of the Sarbanes-Oxley Act, the board is now required to monitor management's actions more closely. Many feel that the failures of **Enron**, **WorldCom**, and more recently **MF Global** could have been avoided by more diligent boards.

Illustration 11-1 (page 502) presents a typical organization chart showing the delegation of responsibility. The chief executive officer (CEO) has overall responsibility for managing the business. As the organization chart shows, the CEO delegates responsibility to other officers. The chief accounting officer is the **controller**. The controller's responsibilities include (1) maintaining the accounting records, (2) ensuring an adequate system of internal control, and (3) preparing financial statements, tax returns, and internal reports. The **treasurer** has custody of the corporation's funds and is responsible for maintaining the company's cash position.

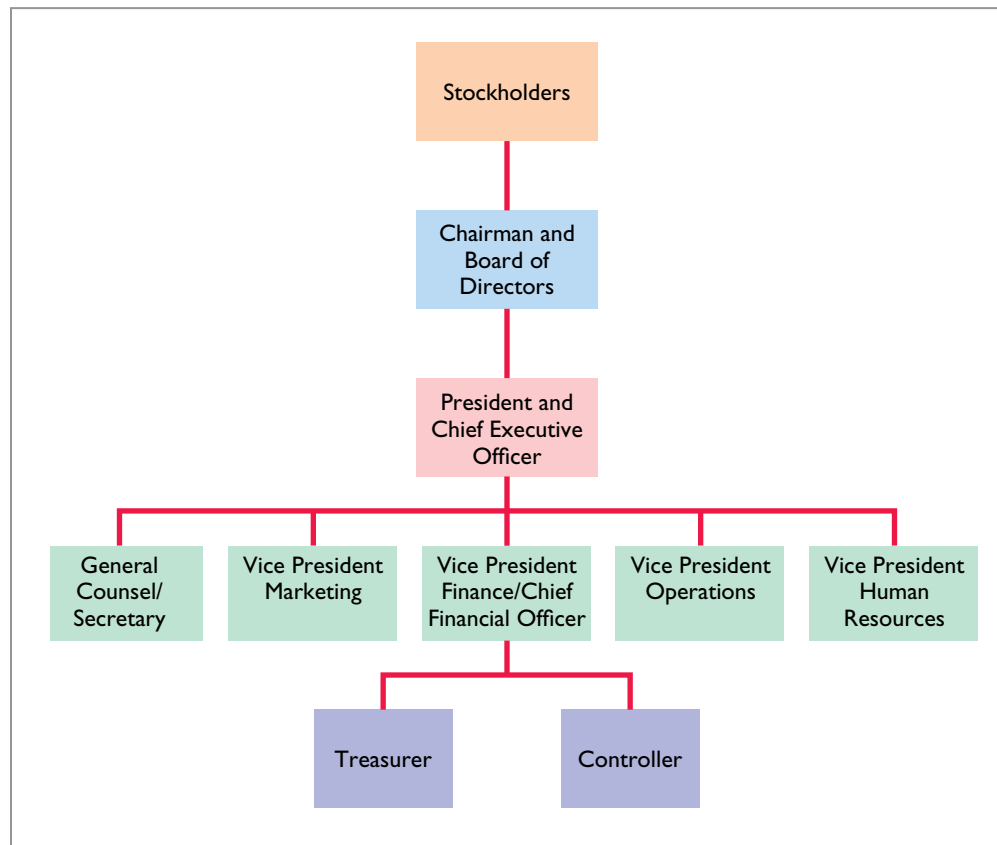

The organizational structure of a corporation enables a company to hire professional managers to run the business. On the other hand, the separation of ownership and management often reduces an owner's ability to actively manage the company.

ETHICS NOTE

Managers who are not owners are often compensated based on the performance of the firm. They thus may be tempted to exaggerate firm performance by inflating income figures.

Illustration 11-1
Corporation organization chart

GOVERNMENT REGULATIONS

A corporation is subject to numerous state and federal regulations. For example, state laws usually prescribe the requirements for issuing stock, the distributions of earnings permitted to stockholders, and the acceptable methods for buying back and retiring stock. Federal securities laws govern the sale of capital stock to the general public. Also, most publicly held corporations are required to make extensive disclosure of their financial affairs to the Securities and Exchange Commission (SEC) through quarterly and annual reports (Forms 10Q and 10K). In addition, when a corporation lists its stock on organized securities exchanges, it must comply with the reporting requirements of these exchanges. Government regulations are designed to protect the owners of the corporation.

ADDITIONAL TAXES

Owners of proprietorships and partnerships report their share of earnings on their personal income tax returns. The individual owner then pays taxes on this amount. Corporations, on the other hand, must pay federal and state income taxes **as a separate legal entity**. These taxes can be substantial. They can amount to as much as 40% of taxable income.

In addition, stockholders must pay taxes on cash dividends (pro rata distributions of net income). Thus, many argue that the government taxes corporate income **twice (double taxation)**—once at the corporate level and again at the individual level.

In summary, Illustration 11-2 shows the advantages and disadvantages of a corporation compared to a proprietorship and a partnership.

Forming a Corporation

A corporation is formed by grant of a state **charter**. The charter is a document that describes the name and purpose of the corporation, the types and number of shares of stock that are authorized to be issued, the names of the individuals that

Advantages

Separate legal existence
 Limited liability of stockholders
 Transferable ownership rights
 Ability to acquire capital
 Continuous life
 Corporation management—professional managers

Disadvantages

Corporation management—separation of ownership and management
 Government regulations
 Additional taxes

Illustration 11-2

Advantages and disadvantages of a corporation

formed the company, and the number of shares that these individuals agreed to purchase. Regardless of the number of states in which a corporation has operating divisions, it is incorporated in only one state.

It is to the company's advantage to incorporate in a state whose laws are favorable to the corporate form of business organization. For example, although **General Motors** has its headquarters in Michigan, it is incorporated in New Jersey. In fact, more and more corporations have been incorporating in states with rules that favor existing management. For example, **Gulf Oil** changed its state of incorporation to Delaware to thwart possible unfriendly takeovers. There, certain defensive tactics against takeovers can be approved by the board of directors alone, without a vote by shareholders.

Upon receipt of its charter from the state of incorporation, the corporation establishes **by-laws**. The by-laws establish the internal rules and procedures for conducting the affairs of the corporation. Corporations engaged in interstate commerce must also obtain a **license** from each state in which they do business. The license subjects the corporation's operating activities to the general corporation laws of the state.

Costs incurred in the formation of a corporation are called **organization costs**. These costs include legal and state fees, and promotional expenditures involved in the organization of the business. **Corporations expense organization costs as incurred.** Determining the amount and timing of future benefits is so difficult that it is standard procedure to take a conservative approach of expensing these costs immediately.

Alternative Terminology

The charter is often referred to as the *articles of incorporation*.

Accounting Across the Organization**Facebook**

Jeff Chiu/AP/Wide World Photos

A Thousand Millionaires!

Traveling to space or embarking on an expedition to excavate lost Mayan ruins are normally the stuff of adventure novels. But for employees of **Facebook**, these and other lavish dreams moved closer to reality when the world's No. 1 online social network went public through an initial public offering (IPO) that may have created at

least a thousand millionaires. The IPO was the largest in Internet history, valuing Facebook at over \$104 billion.

With all these riches to be had, why did Mark Zuckerberg, the founder of Facebook, delay taking his company public?

Consider that the main motivation for issuing shares to the public is to raise money so you can grow your business. However, unlike a manufacturer or even an online retailer, Facebook doesn't need major physical resources, it doesn't have inventory, and it doesn't really need much money for marketing. So in the past, the company hasn't had much need for additional cash beyond what it was already generating on its own. Finally, as head of a closely held, nonpublic company, Zuckerberg was subject to far fewer regulations than a public company.

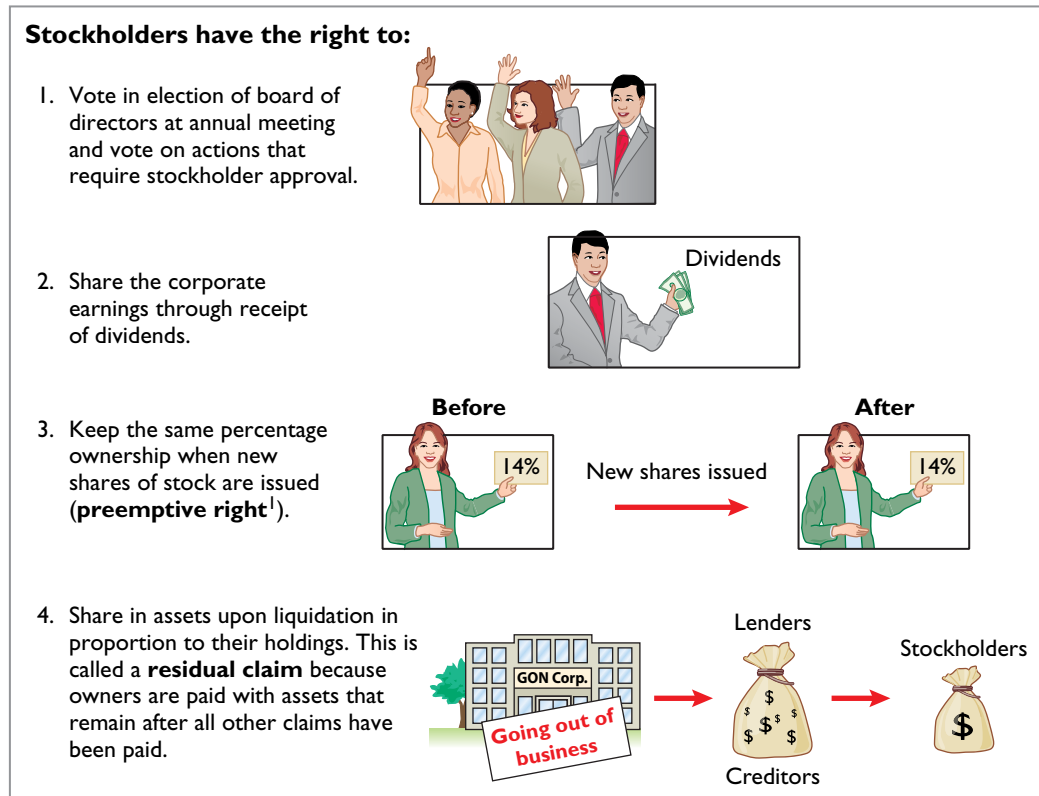

Source: "Status Update: I'm Rich! Facebook Flotation to Create 1,000 Millionaires Among Company's Rank and File," *Daily Mail Reporter* (February 1, 2012).

Why did Mark Zuckerberg, the CEO and founder of Facebook, delay taking his company's shares public through an initial public offering (IPO)? (Go to WileyPLUS for this answer and additional questions.)

Stockholder Rights

When chartered, the corporation may begin selling shares of stock. When a corporation has only one class of stock, it is **common stock**. Each share of common stock gives the stockholder the ownership rights pictured in Illustration 11-3. The articles of incorporation or the by-laws state the ownership rights of a share of stock.

Illustration 11-3
Ownership rights of stockholders

Proof of stock ownership is evidenced by a form known as a **stock certificate**. As Illustration 11-4 shows, the face of the certificate shows the name of the corporation, the stockholder's name, the class and special features of the stock, the number of shares owned, and the signatures of authorized corporate officials. Prenumbered certificates facilitate accountability. They may be issued for any quantity of shares.

Stock Issue Considerations

Although **Nike** incorporated in 1968, it did not sell stock to the public until 1980. At that time, Nike evidently decided it would benefit from the infusion of cash that a public sale would bring. When a corporation decides to issue stock, it must resolve a number of basic questions: How many shares should it authorize for sale? How should it issue the stock? What value should the corporation assign to the stock? We address these questions in the following sections.

¹A number of companies have eliminated the preemptive right because they believe it makes an unnecessary and cumbersome demand on management. For example, by stockholder approval, **IBM** has dropped its preemptive right for stockholders.

Illustration 11-4
A stock certificate

AUTHORIZED STOCK

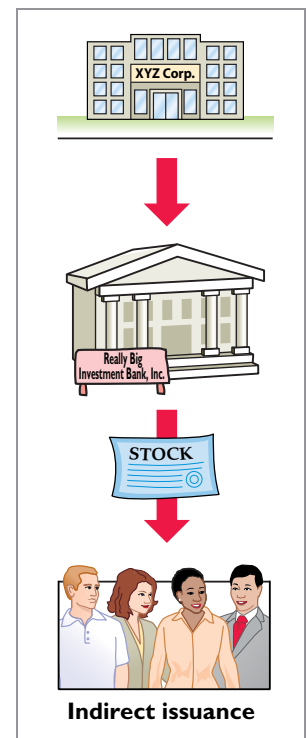

The charter indicates the amount of stock that a corporation is **authorized** to sell. The total amount of **authorized stock** at the time of incorporation normally anticipates both initial and subsequent capital needs. As a result, the number of shares authorized generally exceeds the number initially sold. If it sells all authorized stock, a corporation must obtain consent of the state to amend its charter before it can issue additional shares.

The authorization of capital stock does not result in a formal accounting entry. The reason is that the event has no immediate effect on either corporate assets or stockholders' equity. However, the number of authorized shares is often reported in the stockholders' equity section. It is then simple to determine the number of unissued shares that the corporation can issue without amending the charter: subtract the total shares issued from the total authorized. For example, if **Advanced Micro** was authorized to sell 100,000 shares of common stock and issued 80,000 shares, 20,000 shares would remain unissued.

ISSUANCE OF STOCK

A corporation can issue common stock **directly** to investors. Alternatively, it can issue the stock **indirectly** through an investment banking firm that specializes in bringing securities to the attention of prospective investors. Direct issue is typical in closely held companies. Indirect issue is customary for a publicly held corporation.

In an indirect issue, the investment banking firm may agree to **underwrite** the entire stock issue. In this arrangement, the investment banker buys the stock from the corporation at a stipulated price and resells the shares to investors. The corporation thus avoids any risk of being unable to sell the shares. Also, it obtains immediate use of the cash received from the underwriter. The investment banking firm, in turn, assumes the risk of reselling the shares, in return for an underwriting fee.² For example, **Google** (the world's number-one Internet search engine)

²Alternatively, the investment banking firm may agree only to enter into a **best-efforts contract** with the corporation. In such cases, the banker agrees to sell as many shares as possible at a specified price. The corporation bears the risk of unsold stock. Under a best-efforts arrangement, the banking firm is paid a fee or commission for its services.

used underwriters when it issued a highly successful initial public offering, raising \$1.67 billion. The underwriters charged a 3% underwriting fee (approximately \$50 million) on Google's stock offering.

How does a corporation set the price for a new issue of stock? Among the factors to be considered are (1) the company's anticipated future earnings, (2) its expected dividend rate per share, (3) its current financial position, (4) the current state of the economy, and (5) the current state of the securities market. The calculation can be complex and is properly the subject of a finance course.

MARKET PRICE OF STOCK

The stock of publicly held companies is traded on organized exchanges. The interaction between buyers and sellers determines the prices per share. In general, the prices set by the marketplace tend to follow the trend of a company's earnings and dividends. But, factors beyond a company's control, such as an oil embargo, changes in interest rates, or the outcome of a presidential election, may cause day-to-day fluctuations in market prices.

The trading of capital stock on securities exchanges involves the transfer of **already issued shares** from an existing stockholder to another investor. These transactions have **no impact** on a corporation's stockholders' equity.

Investor Insight Nike

Joe Robbins/Getty Images, Inc.

How to Read Stock Quotes

Organized exchanges trade the stock of publicly held companies at dollar prices per share established by the interaction between buyers and sellers. For each listed security, the financial press reports the high and low prices of the stock during the year, the total volume of stock traded on a given day, the high and low prices for the day, and the closing market price, with the net change for the day. Nike is listed on the New York Stock Exchange. Here is a listing for Nike:

Stock	52 Weeks		Volume	High	Low	Close	Net Change
	High	Low					
Nike	79.64	62.81	2,912,866	77.25	76.39	76.78	-0.35

These numbers indicate the following. The high and low market prices for the last 52 weeks have been \$79.64 and \$62.81. The trading volume for the day was 2,912,866 shares. The high, low, and closing prices for that date were \$77.25, \$76.39, and \$76.78, respectively. The net change for the day was a decrease of \$0.35 per share.

For stocks traded on organized exchanges, how are the dollar prices per share established? What factors might influence the price of shares in the marketplace? (Go to **WileyPLUS** for this answer and additional questions.)

PAR AND NO-PAR VALUE STOCKS

Par value stock is capital stock to which the charter has assigned a value per share. Years ago, par value determined the **legal capital** per share that a company must retain in the business for the protection of corporate creditors. That amount was not available for withdrawal by stockholders. Thus, in the past, most states required the corporation to sell its shares at par or above.

However, par value was often immaterial relative to the value of the company's stock—even at the time of issue. Thus, its usefulness as a protective device to creditors was questionable. For example, **Loews Corporation's** par

value is \$0.01 per share, yet a new issue in 2014 would have sold at a **market price** in the \$44 per share range. Thus, par has no relationship with market price. In the vast majority of cases, it is an immaterial amount. As a consequence, today many states do not require a par value. Instead, they use other means to protect creditors.

No-par value stock is capital stock to which the charter has not assigned a value. No-par value stock is fairly common today. For example, **Nike** and **Procter & Gamble** both have no-par stock. In many states, the board of directors assigns a **stated value** to no-par shares.

DO IT!**1a****Corporate Organization**

Indicate whether each of the following statements is true or false. If false, indicate how to correct the statement.

- _____ 1. Similar to partners in a partnership, stockholders of a corporation have unlimited liability.
- _____ 2. It is relatively easy for a corporation to obtain capital through the issuance of stock.
- _____ 3. The separation of ownership and management is an advantage of the corporate form of business.
- _____ 4. The journal entry to record the authorization of capital stock includes a credit to the appropriate capital stock account.
- _____ 5. All states require a par value per share for capital stock.

Solution

1. False. The liability of stockholders is normally limited to their investment in the corporation. 2. True. 3. False. The separation of ownership and management is a disadvantage of the corporate form of business. 4. False. The authorization of capital stock does not result in a formal accounting entry. 5. False. Many states do not require a par value.

Action Plan

- ✓ Review the characteristics of a corporation and understand which are advantages and which are disadvantages.
- ✓ Understand that corporations raise capital through the issuance of stock, which can be par or no-par.

Corporate Capital

Owners' equity is identified by various names: **stockholders' equity**, **shareholders' equity**, or **corporate capital**. The stockholders' equity section of a corporation's balance sheet consists of two parts: (1) paid-in (contributed) capital and (2) retained earnings (earned capital).

The distinction between **paid-in capital** and **retained earnings** is important from both a legal and a financial point of view. Legally, corporations can make distributions of earnings (declare dividends) out of retained earnings in all states. However, in many states they cannot declare dividends out of paid-in capital. Management, stockholders, and others often look to retained earnings for the continued existence and growth of the corporation.

PAID-IN CAPITAL

Paid-in capital is the total amount of cash and other assets paid in to the corporation by stockholders in exchange for capital stock. As noted earlier, when a corporation has only one class of stock, it is **common stock**.

RETAINED EARNINGS

Retained earnings is net income that a corporation retains for future use. Net income is recorded in Retained Earnings by a closing entry that debits Income

A	=	L	+	SE
				-130,000 Inc
				+130,000 RE

Cash Flows
no effect

Summary and credits Retained Earnings. For example, assuming that net income for Delta Robotics in its first year of operations is \$130,000, the closing entry is:

Income Summary	130,000	
Retained Earnings		130,000
(To close Income Summary and transfer net income to Retained Earnings)		

If Delta Robotics has a balance of \$800,000 in common stock at the end of its first year, its stockholders' equity section is as follows.

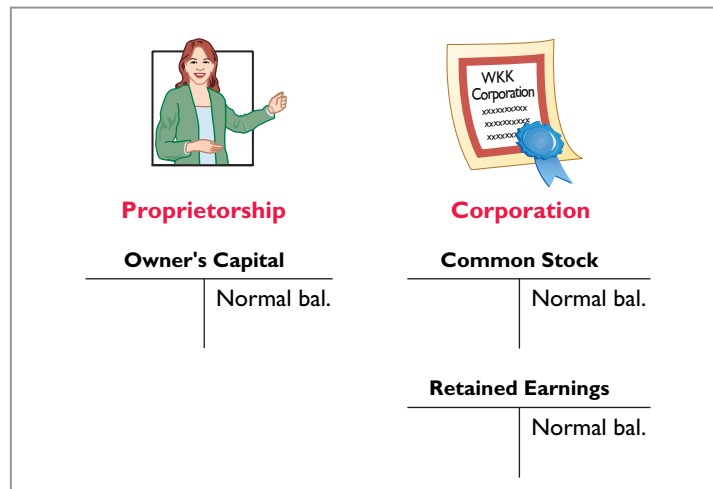

Illustration 11-5
Stockholders' equity section

DELTA ROBOTICS		
Balance Sheet (partial)		

Stockholders' equity		
Paid-in capital		
Common stock	\$800,000	
Retained earnings	<u>130,000</u>	
Total stockholders' equity		<u>\$930,000</u>

Illustration 11-6 compares the owners' equity (stockholders' equity) accounts reported on a balance sheet for a proprietorship and a corporation.

Illustration 11-6
Comparison of owners' equity accounts

DO IT! 1b **Corporate Capital**

At the end of its first year of operation, Doral Corporation has \$750,000 of common stock and net income of \$122,000. Prepare (a) the closing entry for net income and (b) the stockholders' equity section at year-end.

Solution

Action Plan

- ✓ Record net income in Retained Earnings by a closing entry in which Income Summary is debited and Retained Earnings is credited.
- ✓ In the stockholders' equity section, show (1) paid-in capital and (2) retained earnings.

(a) Income Summary	122,000	
Retained Earnings		122,000
(To close Income Summary and transfer net income to Retained Earnings)		
(b) Stockholders' equity		
Paid-in capital		
Common stock	\$750,000	
Retained earnings	<u>122,000</u>	
Total stockholders' equity		<u><u>\$872,000</u></u>

Related exercise material: **DO IT!** 11-1b.

LEARNING
OBJECTIVE

2

Explain how to account for the issuance of common and preferred stock.

Accounting for Common Stock

Let's now look at how to account for issues of common stock. The primary objectives in accounting for the issuance of common stock are (1) to identify the specific sources of paid-in capital, and (2) to maintain the distinction between paid-in capital and retained earnings. **The issuance of common stock affects only paid-in capital accounts.**

ISSUING PAR VALUE COMMON STOCK FOR CASH

As discussed earlier, par value does not indicate a stock's market price. Therefore, the cash proceeds from issuing par value stock may be equal to, greater than, or less than par value. When the company records issuance of common stock for cash, it credits the par value of the shares to Common Stock. It also records in a separate paid-in capital account the portion of the proceeds that is above or below par value.

To illustrate, assume that Hydro-Slide, Inc. issues 1,000 shares of \$1 par value common stock at par for cash. The entry to record this transaction is:

Cash	1,000	
Common Stock		1,000
(To record issuance of 1,000 shares of \$1 par common stock at par)		

Now assume that Hydro-Slide issues an additional 1,000 shares of the \$1 par value common stock for cash at \$5 per share. The amount received above the par value, in this case \$4 (\$5 – \$1), is credited to Paid-in Capital in Excess of Par—Common Stock. The entry is:

Cash	5,000	
Common Stock		1,000
Paid-in Capital in Excess of Par—Common Stock		4,000
(To record issuance of 1,000 shares of \$1 par common stock)		

The total paid-in capital from these two transactions is \$6,000, and the legal capital is \$2,000. Assuming Hydro-Slide, Inc. has retained earnings of \$27,000, Illustration 11-7 shows the company's stockholders' equity section.

HYDRO-SLIDE, INC.
Balance Sheet (partial)

Stockholders' equity	
Paid-in capital	
Common stock	\$ 2,000
Paid-in capital in excess of par— common stock	4,000
Total paid-in capital	6,000
Retained earnings	27,000
Total stockholders' equity	\$33,000

When a corporation issues stock for less than par value, it debits the account Paid-in Capital in Excess of Par—Common Stock if a credit balance exists in this account. If a credit balance does not exist, then the corporation debits to Retained Earnings the amount less than par. This situation occurs only rarely. Most states do not permit the sale of common stock below par value because stockholders may be held personally liable for the difference between the price paid upon original sale and par value.

A	=	L	+	SE
+1,000				+1,000 CS
Cash Flows				
+1,000				

A	=	L	+	SE
+5,000				+1,000 CS +4,000 CS
Cash Flows				
+5,000				

Illustration 11-7
Stockholders' equity—paid-in capital in excess of par

Alternative Terminology
Paid-in Capital in Excess of Par is also called *Premium on Stock*.

ISSUING NO-PAR COMMON STOCK FOR CASH

When no-par common stock has a stated value, the entries are similar to those illustrated for par value stock. The corporation credits the stated value to Common Stock. Also, when the selling price of no-par stock exceeds stated value, the corporation credits the excess to Paid-in Capital in Excess of Stated Value—Common Stock.

For example, assume that instead of \$1 par value stock, Hydro-Slide, Inc. has \$5 stated value no-par stock and the company issues 5,000 shares at \$8 per share for cash. The entry is:

A	=	L	+	SE
+40,000				+25,000 CS +15,000 CS
Cash Flows				
+40,000				

Cash	40,000	
Common Stock		25,000
Paid-in Capital in Excess of Stated Value—Common Stock (To record issue of 5,000 shares of \$5 stated value no-par stock)		15,000

Hydro-Slide, Inc. reports Paid-in Capital in Excess of Stated Value—Common Stock as part of paid-in capital in the stockholders' equity section.

What happens when no-par stock does not have a stated value? In that case, the corporation credits the entire proceeds to Common Stock. Thus, if Hydro-Slide does not assign a stated value to its no-par stock, it records the issuance of the 5,000 shares at \$8 per share for cash as follows.

A	=	L	+	SE
+40,000				+40,000 CS
Cash Flows				
+40,000				

Cash	40,000	
Common Stock (To record issue of 5,000 shares of no-par stock)		40,000

ISSUING COMMON STOCK FOR SERVICES OR NONCASH ASSETS

Corporations also may issue stock for services (compensation to attorneys or consultants) or for noncash assets (land, buildings, and equipment). In such cases, what cost should be recognized in the exchange transaction? To comply with the **historical cost principle**, in a noncash transaction **cost is the cash equivalent price**. Thus, **cost is either the fair value of the consideration given up or the fair value of the consideration received**, whichever is more clearly determinable.

To illustrate, assume that attorneys have helped Jordan Company incorporate. They have billed the company \$5,000 for their services. They agree to accept 4,000 shares of \$1 par value common stock in payment of their bill. At the time of the exchange, there is no established market price for the stock. In this case, the fair value of the consideration received, \$5,000, is more clearly evident. Accordingly, Jordan Company makes the following entry.

A	=	L	+	SE
		-5,000 Exp +4,000 CS +1,000 CS		
Cash Flows				
no effect				

Organization Expense	5,000	
Common Stock		4,000
Paid-in Capital in Excess of Par—Common Stock (To record issuance of 4,000 shares of \$1 par value stock to attorneys)		1,000

As explained on page 503, organization costs are expensed as incurred.

In contrast, assume that Athletic Research Inc. is an existing publicly held corporation. Its \$5 par value stock is actively traded at \$8 per share. The company issues 10,000 shares of stock to acquire land recently advertised for sale at \$90,000. The most clearly evident value in this noncash transaction is the market price of the consideration given, \$80,000. The company records the transaction as follows.

A	=	L	+	SE
+80,000		+50,000 CS +30,000 CS		
Cash Flows				
no effect				

Land	80,000	
Common Stock		50,000
Paid-in Capital in Excess of Par—Common Stock (To record issuance of 10,000 shares of \$5 par value stock for land)		30,000

As illustrated in these examples, **the par value of the stock is never a factor in determining the cost of the assets or services received in noncash transactions**. This is also true of the stated value of no-par stock.

Accounting for Preferred Stock

To appeal to a larger segment of potential investors, a corporation may issue an additional class of stock, called preferred stock. **Preferred stock** has contractual provisions that give it some preference or priority over common stock. Typically, preferred stockholders have a priority as to (1) distributions of earnings (dividends) and (2) assets in the event of liquidation. However, they generally do not have voting rights.

Like common stock, corporations may issue preferred stock for cash or for non-cash assets. The entries for these transactions are similar to the entries for common stock. When a corporation has more than one class of stock, each paid-in capital account title should identify the stock to which it relates. A company might have the following accounts: Preferred Stock, Common Stock, Paid-in Capital in Excess of Par—Preferred Stock, and Paid-in Capital in Excess of Par—Common Stock.

For example, if Stine Corporation issues 10,000 shares of \$10 par value preferred stock for \$12 cash per share, the entry to record the issuance is:

Cash	120,000	
Preferred Stock		100,000
Paid-in Capital in Excess of Par—Preferred Stock		20,000
(To record the issuance of 10,000 shares of \$10 par value preferred stock)		

A	=	L	+	SE
+120,000				+100,000 PS +20,000 PS
<hr/>				
Cash Flows				
+120,000				

Preferred stock may have either a par value or no-par value. In the stockholders' equity section of the balance sheet, companies list preferred stock first because of its dividend and liquidation preferences over common stock.

DO IT!

2

Issuance of Stock

Cayman Corporation begins operations on March 1 by issuing 100,000 shares of \$1 par value common stock for cash at \$12 per share. On March 15, it issues 5,000 shares of common stock to attorneys in settlement of their bill of \$50,000 for organization costs. On March 28, Cayman Corporation issues 1,500 shares of \$10 par value preferred stock for cash at \$30 per share. Journalize the issuance of the common and preferred shares, assuming the shares are not publicly traded.

Solution

Mar. 1	Cash	1,200,000	
	Common Stock (100,000 × \$1)		100,000
	Paid-in Capital in Excess of Par—Common Stock		1,100,000
	(To record issuance of 100,000 shares at \$12 per share)		
Mar. 15	Organization Expense	50,000	
	Common Stock (5,000 × \$1)		5,000
	Paid-in Capital in Excess of Par—Common Stock		45,000
	(To record issuance of 5,000 shares for attorneys' fees)		
Mar. 28	Cash	45,000	
	Preferred Stock (1,500 × \$10)		15,000
	Paid-in Capital in Excess of Par—Preferred Stock		30,000
	(To record issuance of 1,500 shares at \$30 per share)		

Action Plan

- ✓ In issuing shares for cash, credit Common Stock for par value per share.
- ✓ Credit any additional proceeds in excess of par to a separate paid-in capital account.
- ✓ When stock is issued for services, use the cash equivalent price.
- ✓ For the cash equivalent price, use either the fair value of what is given up or the fair value of what is received, whichever is more clearly determinable.

LEARNING
OBJECTIVE

3

Explain how to account for treasury stock.

Helpful Hint

Treasury shares do not have dividend rights or voting rights.

Treasury stock is a corporation's own stock that it has issued and subsequently reacquired from shareholders but not retired. A corporation may acquire treasury stock for various reasons:

1. To reissue the shares to officers and employees under bonus and stock compensation plans.
2. To increase trading of the company's stock in the securities market. Companies expect that buying their own stock will signal that management believes the stock is underpriced, which they hope will enhance its market price.
3. To have additional shares available for use in the acquisition of other companies.
4. To reduce the number of shares outstanding and thereby increase earnings per share.

Another infrequent reason for purchasing shares is that management may want to eliminate hostile shareholders by buying them out.

Many corporations have treasury stock. For example, approximately 65% of U.S. companies have treasury stock. In a recent year, **Nike** purchased more than 6 million treasury shares.

Purchase of Treasury Stock

Companies generally account for treasury stock by **the cost method**. This method uses the cost of the shares purchased to value the treasury stock. Under the cost method, the company debits **Treasury Stock** for the **price paid to reacquire the shares**. When the company disposes of the shares, it credits to Treasury Stock **the same amount** it paid to reacquire the shares.

To illustrate, assume that on January 1, 2017, the stockholders' equity section of Mead, Inc. has 400,000 shares authorized and 100,000 shares of \$5 par value common stock outstanding (all issued at par value) and Retained Earnings of \$200,000. The stockholders' equity section before purchase of treasury stock is as follows.

Illustration 11-8

Stockholders' equity with no treasury stock

MEAD, INC. Balance Sheet (partial)	
Stockholders' equity	
Paid-in capital	
Common stock, \$5 par value, 400,000 shares authorized, 100,000 shares issued and outstanding	\$500,000
Retained earnings	<u>200,000</u>
Total stockholders' equity	<u>\$700,000</u>

On February 1, 2017, Mead acquires 4,000 shares of its stock at \$8 per share. The entry is as follows.

A	=	L	+	SE
		-32,000 TS		
-32,000				
Cash Flows				
-32,000				

Feb. 1	Treasury Stock	32,000	
	Cash		32,000
	(To record purchase of 4,000 shares of treasury stock at \$8 per share)		

Mead debits Treasury Stock for the cost of the shares purchased (\$32,000). Is the original paid-in capital account, Common Stock, affected? No, because the number of issued shares does not change.

In the stockholders' equity section of the balance sheet, Mead deducts treasury stock from total paid-in capital and retained earnings. Treasury Stock is a **contra stockholders' equity account**. Thus, the acquisition of treasury stock reduces stockholders' equity. The stockholders' equity section of Mead, Inc. after purchase of treasury stock is as follows.

MEAD, INC. Balance Sheet (partial)	
Stockholders' equity	
Paid-in capital	
Common stock, \$5 par value, 400,000 shares authorized, 100,000 shares issued, and 96,000 shares outstanding	\$500,000
Retained earnings	200,000
Total paid-in capital and retained earnings	700,000
Less: Treasury stock (4,000 shares)	32,000
Total stockholders' equity	<u>\$668,000</u>

Illustration 11-9

Stockholders' equity with treasury stock

Mead discloses in the balance sheet both the number of shares issued (100,000) and the number in the treasury (4,000). The difference is the number of shares of stock outstanding (96,000). The term **outstanding stock** means the number of shares of issued stock that are being held by stockholders.

Some maintain that companies should report treasury stock as an asset because it can be sold for cash. But under this reasoning, companies would also show unissued stock as an asset, which is clearly incorrect. Rather than being an asset, treasury stock reduces stockholder claims on corporate assets. This effect is correctly shown by reporting treasury stock as a deduction from total paid-in capital and retained earnings.

ETHICS NOTE

The purchase of treasury stock reduces the cushion (cash available) for creditors and preferred stockholders. A restriction for the cost of treasury stock purchased is often required. The restriction is usually applied to retained earnings.

Disposal of Treasury Stock

Treasury stock is usually sold or retired. The accounting for its sale differs when treasury stock is sold above cost than when it is sold below cost.

SALE OF TREASURY STOCK ABOVE COST

If the selling price of the treasury shares is equal to their cost, the company records the sale of the shares by a debit to Cash and a credit to Treasury Stock. When the selling price of the shares is greater than their cost, the company credits the difference to Paid-in Capital from Treasury Stock.

To illustrate, assume that on July 1, Mead, Inc. sells for \$10 per share 1,000 of the 4,000 shares of its treasury stock previously acquired at \$8 per share. The entry is as follows.

July 1	Cash	10,000	
	Treasury Stock		8,000
	Paid-in Capital from Treasury Stock		2,000
	(To record sale of 1,000 shares of treasury stock above cost)		

Mead does not record a \$2,000 gain on sale of treasury stock because (1) gains on sales occur when **assets** are sold, and treasury stock is not an asset, and (2) a corporation does not realize a gain or suffer a loss from stock transactions with its own stockholders. Thus, companies should **not** include in net income any paid-in capital arising from the sale of treasury stock. Instead, they report Paid-in Capital from Treasury Stock separately on the balance sheet, as a part of paid-in capital.

Helpful Hint

Treasury stock transactions are classified as capital stock transactions. As in the case when stock is issued, the income statement is not involved.

A	=	L	+	SE
+10,000				+8,000 TS
				+2,000 TS

Cash Flows
+10,000

SALE OF TREASURY STOCK BELOW COST

When a company sells treasury stock below its cost, it usually debits to Paid-in Capital from Treasury Stock the excess of cost over selling price. Thus, if Mead, Inc. sells an additional 800 shares of treasury stock on October 1 at \$7 per share, it makes the following entry.

A	=	L	+	SE	
+5,600					
		-800 TS			
		+6,400 TS			
<hr/>					
Cash Flows					
+5,600					

Oct. 1	Cash Paid-in Capital from Treasury Stock Treasury Stock (To record sale of 800 shares of treasury stock below cost)	5,600 800	6,400
--------	--	--------------	-------

Observe the following from the two sales entries. (1) Mead credits Treasury Stock at cost in each entry. (2) Mead uses Paid-in Capital from Treasury Stock for the difference between cost and the resale price of the shares. (3) The original paid-in capital account, Common Stock, is not affected. **The sale of treasury stock increases both total assets and total stockholders' equity.**

After posting the foregoing entries, the treasury stock accounts will show the following balances on October 1.

Illustration 11-10
Treasury stock accounts

Treasury Stock				Paid-in Capital from Treasury Stock			
Feb. 1	32,000	July 1	8,000	Oct. 1	800	July 1	2,000
		Oct. 1	6,400			Oct. 1 Bal.	1,200
Oct. 1 Bal.	17,600						

When a company fully depletes the credit balance in Paid-in Capital from Treasury Stock, it debits to Retained Earnings any additional excess of cost over selling price. To illustrate, assume that Mead, Inc. sells its remaining 2,200 shares at \$7 per share on December 1. The excess of cost over selling price is \$2,200 [2,200 × (\$8 – \$7)]. In this case, Mead debits \$1,200 of the excess to Paid-in Capital from Treasury Stock. It debits the remainder to Retained Earnings. The entry is:

A	=	L	+	SE	
+15,400					
		-1,200 TS			
		-1,000 RE			
		+17,600 TS			
<hr/>					
Cash Flows					
+15,400					

Dec. 1	Cash Paid-in Capital from Treasury Stock Retained Earnings Treasury Stock (To record sale of 2,200 shares of treasury stock at \$7 per share)	15,400 1,200 1,000	17,600
--------	---	--------------------------	--------

Accounting Across the Organization **Reebok**

Han Myung-Gu/WireImage/Getty Images, Inc.

Why Did Reebok Buy Its Own Stock?

In a bold (and some would say risky) move, **Reebok** at one time bought back nearly a third of its shares. This repurchase of shares dramatically reduced Reebok's available cash. In fact, the company borrowed significant funds to accomplish the repurchase. In a press release, management stated that it was repurchasing the shares because it believed its stock was severely underpriced.

The repurchase of so many shares was meant to signal management's belief in good future earnings.

Skeptics, however, suggested that Reebok's management was repurchasing shares to make it less likely that another company would acquire Reebok (in which case Reebok's top managers would likely lose their jobs). By depleting its cash, Reebok became a less attractive acquisition target. Acquiring companies like to purchase companies with large cash balances so they can pay off debt used in the acquisition.

[What signal might a large stock repurchase send to investors regarding management's belief about the company's growth opportunities? \(Go to WileyPLUS for this answer and additional questions.\)](#)

DO IT!**3****Treasury Stock**

Santa Anita Inc. purchases 3,000 shares of its \$50 par value common stock for \$180,000 cash on July 1. It will hold the shares in the treasury until resold. On November 1, the corporation sells 1,000 shares of treasury stock for cash at \$70 per share. Journalize the treasury stock transactions.

Solution

July 1	Treasury Stock	180,000	
	Cash		180,000
	(To record the purchase of 3,000 shares at \$60 per share)		
Nov. 1	Cash	70,000	
	Treasury Stock		60,000
	Paid-in Capital from Treasury Stock		10,000
	(To record the sale of 1,000 shares at \$70 per share)		

Related exercise material: **BE11-6, E11-5, E11-7, E11-9, and DO IT! 11-3.**

Action Plan

- ✓ Record the purchase of treasury stock at cost.
- ✓ When treasury stock is sold above its cost, credit the excess of the selling price over cost to Paid-in Capital from Treasury Stock.
- ✓ When treasury stock is sold below its cost, debit the excess of cost over selling price to Paid-in Capital from Treasury Stock.

LEARNING OBJECTIVE**4****Explain how to account for cash dividends.**

A **dividend** is a corporation's distribution of cash or stock to its stockholders on a **pro rata (proportional to ownership) basis**. Pro rata means that if you own 10% of the common shares, you will receive 10% of the dividend. Dividends can take four forms: cash, property, scrip (a promissory note to pay cash), or stock. Cash dividends predominate in practice although companies also declare stock dividends with some frequency. These two forms of dividends are therefore the focus of our discussion.

Investors are very interested in a company's dividend practices. In the financial press, **dividends are generally reported quarterly as a dollar amount per share**. (Sometimes they are reported on an annual basis.) For example, **Nike's quarterly** dividend rate in the fourth quarter of 2013 was 24 cents per share. The dividend rate for the fourth quarter of 2013 for **GE** was 22 cents, and for **ConAgra Foods** it was 25 cents.

Cash Dividends

A **cash dividend** is a pro rata distribution of cash to stockholders. Cash dividends are not paid on treasury shares. For a corporation to pay a cash dividend, it must have the following.

- 1. Retained earnings.** The legality of a cash dividend depends on the laws of the state in which the company is incorporated. Payment of cash dividends from retained earnings is legal in all states. In general, cash dividend distributions from only the balance in common stock (legal capital) are illegal. A dividend declared out of paid-in capital is termed a **liquidating dividend**. Such a dividend reduces or "liquidates" the amount originally paid in by stockholders. Statutes vary considerably with respect to cash dividends based on paid-in capital in excess of par or stated value. Many states permit such dividends.
- 2. Adequate cash.** The legality of a dividend and the ability to pay a dividend are two different things. For example, **Nike**, with retained earnings of over

\$5.6 billion, could legally declare a dividend of at least \$5.6 billion. But Nike's cash balance is only \$3.3 billion.

Before declaring a cash dividend, a company's board of directors must carefully consider both current and future demands on the company's cash resources. In some cases, current liabilities may make a cash dividend inappropriate. In other cases, a major plant expansion program may warrant only a relatively small dividend.

- 3. Declared dividends.** A company does not pay dividends unless its board of directors decides to do so, at which point the board "declares" the dividend. The board of directors has full authority to determine the amount of income to distribute in the form of a dividend and the amount to retain in the business. Dividends do not accrue like interest on a note payable, and they are not a liability until declared.

The amount and timing of a dividend are important issues for management to consider. The payment of a large cash dividend could lead to liquidity problems for the company. On the other hand, a small dividend or a missed dividend may cause unhappiness among stockholders. Many stockholders expect to receive a reasonable cash payment from the company on a periodic basis. Many companies declare and pay cash dividends quarterly. On the other hand, a number of high-growth companies pay no dividends, preferring to conserve cash to finance future capital expenditures.

ENTRIES FOR CASH DIVIDENDS

Three dates are important in connection with dividends: (1) the declaration date, (2) the record date, and (3) the payment date. Normally, there are two to four weeks between each date. Companies make accounting entries on the declaration date and the payment date.

On the **declaration date**, the board of directors formally declares (authorizes) the cash dividend and announces it to stockholders. The declaration of a cash dividend **commits the corporation to a legal obligation**. The company must make an entry to recognize the increase in Cash Dividends and the increase in the liability Dividends Payable.

To illustrate, assume that on December 1, 2017, the directors of Media General declare a 50 cents per share cash dividend on 100,000 shares of \$10 par value common stock. The dividend is \$50,000 ($100,000 \times \0.50). The entry to record the declaration is:

A	=	L	+	SE
		-50,000 Div		
		+50,000		

Cash Flows
no effect

Declaration Date			
Dec. 1	Cash Dividends	50,000	
	Dividends Payable		50,000
	(To record declaration of cash dividend)		

Media General debits the account Cash Dividends. Cash dividends decrease retained earnings. We use the specific title Cash Dividends to differentiate it from other types of dividends, such as stock dividends. Dividends Payable is a current liability. It will normally be paid within the next several months. *For homework problems, you should use the Cash Dividends account for recording dividend declarations.*

At the **record date**, the company determines ownership of the outstanding shares for dividend purposes. The stockholders' records maintained by the corporation supply this information. In the interval between the declaration date and the record date, the corporation updates its stock ownership records. For Media General, the record date is December 22. No entry is required on this date because the corporation's liability recognized on the declaration date is unchanged.

Record Date			
Dec. 22	No entry		

Helpful Hint

The purpose of the record date is to identify the persons or entities that will receive the dividend, not to determine the amount of the dividend liability.

On the **payment date**, the company makes cash dividend payments to the stockholders of record (as of December 22) and records the payment of the dividend. If January 20 is the payment date for Media General, the entry on that date is as follows.

Payment Date			
Jan. 20	Dividends Payable Cash (To record payment of cash dividend)	50,000 50,000	50,000

A	=	L	+	SE	
		-50,000			
					-50,000
					Cash Flows -50,000

Note that payment of the dividend reduces both current assets and current liabilities. It has no effect on stockholders' equity. The cumulative effect of the declaration and payment of a cash dividend is to **decrease both stockholders' equity and total assets**. Illustration 11-11 summarizes the three important dates associated with dividends for Media General.

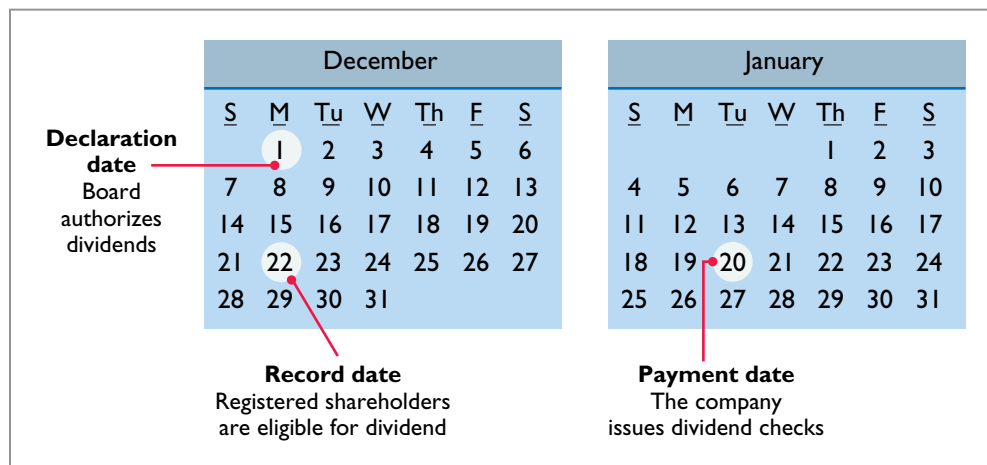

Illustration 11-11
Key dividend dates

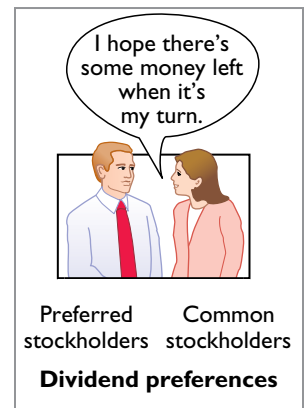

When using a Cash Dividends account, Media General should transfer the balance of that account to Retained Earnings at the end of the year by a closing entry. The entry for Media General at closing is as follows.

Retained Earnings Cash Dividends (To close Cash Dividends to Retained Earnings)	50,000	50,000
---	--------	--------

Dividend Preferences

Preferred stockholders have the right to receive dividends before common stockholders. For example, if the dividend rate on preferred stock is \$5 per share, common stockholders cannot receive any dividends in the current year until preferred stockholders have received \$5 per share. The first claim to dividends does not, however, **guarantee** the payment of dividends. Dividends depend on many factors, such as adequate retained earnings and availability of cash. If a company does not pay dividends to preferred stockholders, it cannot pay dividends to common stockholders.

For preferred stock, companies state the per share dividend amount as a percentage of the par value or as a specified amount. For example, **Earthlink** specifies a 3% dividend on its \$100 par value preferred. **PepsiCo** pays \$4.56 per share on its no-par value stock.

Most preferred stocks also have a preference on corporate assets if the corporation fails. This feature provides security for the preferred stockholder. The preference to assets may be for the par value of the shares or for a specified liquidating value. For example, **Commonwealth Edison**'s preferred stock entitles its holders to receive \$31.80 per share, plus accrued and unpaid dividends, in the event of liquidation. The liquidation preference establishes the respective claims of creditors and preferred stockholders in litigation involving bankruptcy lawsuits.

CUMULATIVE DIVIDEND

Preferred stock often contains a **cumulative dividend** feature. This feature stipulates that preferred stockholders must be paid both current-year dividends and any unpaid prior-year dividends before common stockholders are paid dividends. When preferred stock is cumulative, preferred dividends not declared in a given period are called **dividends in arrears**.

To illustrate, assume that Scientific Leasing has 5,000 shares of 7%, \$100 par value, cumulative preferred stock outstanding. Each \$100 share pays a \$7 dividend ($.07 \times \$100$). The annual dividend is \$35,000 ($5,000 \times \7 per share). If dividends are two years in arrears, preferred stockholders are entitled to receive the dividends shown in Illustration 11-12.

Illustration 11-12
Computation of total dividends to preferred stock

Dividends in arrears ($\$35,000 \times 2$)	\$ 70,000
Current-year dividends	35,000
Total preferred dividends	\$105,000

The company cannot pay dividends to common stockholders until it pays the entire preferred dividend. In other words, companies cannot pay dividends to common stockholders while any preferred dividends are in arrears.

Dividends in arrears are not considered a liability. **No payment obligation exists until the board of directors formally declares that the corporation will pay a dividend.** However, companies should disclose in the notes to the financial statements the amount of dividends in arrears. Doing so enables investors to assess the potential impact of this commitment on the corporation's financial position.

The investment community does not look favorably on companies that are unable to meet their dividend obligations. As a financial officer noted in discussing one company's failure to pay its cumulative preferred dividend for a period of time, "Not meeting your obligations on something like that is a major black mark on your record."

ALLOCATING CASH DIVIDENDS BETWEEN PREFERRED AND COMMON STOCK

As indicated, preferred stock has priority over common stock in regard to dividends. Holders of cumulative preferred stock must be paid any unpaid prior-year dividends and their current year's dividend before common stockholders receive dividends.

To illustrate, assume that at December 31, 2017, IBR Inc. has 1,000 shares of 8%, \$100 par value cumulative preferred stock. It also has 50,000 shares of \$10 par value common stock outstanding. The dividend per share for preferred stock is \$8 ($\100 par value \times 8%). The required annual dividend for preferred stock is therefore \$8,000 ($1,000$ shares \times \$8). At December 31, 2017, the directors declare a \$6,000 cash dividend. In this case, the entire dividend amount goes to preferred stockholders because of their dividend preference. The entry to record the declaration of the dividend is as follows.

A	=	L	+	SE
		-6,000 Div		
		+6,000		
Cash Flows				
no effect				

Dec. 31	Cash Dividends	6,000	
	Dividends Payable		6,000
	(To record \$6 per share cash dividend to preferred stockholders)		

Because of the cumulative feature, dividends of \$2 (\$8 – \$6) per share are in arrears on preferred stock for 2017. IBR must pay these dividends to preferred stockholders before it can pay any future dividends to common stockholders. IBR should disclose dividends in arrears in the financial statements.

At December 31, 2018, IBR declares a \$50,000 cash dividend. The allocation of the dividend to the two classes of stock is as follows.

Total dividend		\$50,000
Allocated to preferred stock		
Dividends in arrears, 2017 (1,000 × \$2)	\$2,000	
2018 dividend (1,000 × \$8)	8,000	10,000
Remainder allocated to common stock		<u>\$40,000</u>

Illustration 11-13

Allocating dividends to preferred and common stock

The entry to record the declaration of the dividend is as follows.

Dec. 31	Cash Dividends	50,000	
	Dividends Payable		50,000
	(To record declaration of cash dividends of \$10,000 to preferred stock and \$40,000 to common stock)		

If IBR's preferred stock is not cumulative, preferred stockholders receive only \$8,000 in dividends in 2018. Common stockholders receive \$42,000.

A	=	L	+	SE
				-50,000 Div
				+50,000

Cash Flows
no effect

DO IT!**4****Dividends on Preferred and Common Stock**

MasterMind Corporation has 2,000 shares of 6%, \$100 par value preferred stock outstanding at December 31, 2017. At December 31, 2017, the company declared a \$60,000 cash dividend. Determine the dividend paid to preferred stockholders and common stockholders under each of the following scenarios.

1. The preferred stock is noncumulative, and the company has not missed any dividends in previous years.
2. The preferred stock is noncumulative, and the company did not pay a dividend in each of the two previous years.
3. The preferred stock is cumulative, and the company did not pay a dividend in each of the two previous years.

Solution

1. The company has not missed past dividends and the preferred stock is noncumulative. Thus, the preferred stockholders are paid only this year's dividend. The dividend paid to preferred stockholders would be \$12,000 (2,000 × .06 × \$100). The dividend paid to common stockholders would be \$48,000 (\$60,000 – \$12,000).
2. The preferred stock is noncumulative. Thus, past unpaid dividends do not have to be paid. The dividend paid to preferred stockholders would be \$12,000 (2,000 × .06 × \$100). The dividend paid to common stockholders would be \$48,000 (\$60,000 – \$12,000).
3. The preferred stock is cumulative. Thus, dividends that have been missed (dividends in arrears) must be paid. The dividend paid to preferred stockholders would be \$36,000 (3 × 2,000 × .06 × \$100). Of the \$36,000, \$24,000 relates to dividends in arrears and \$12,000 relates to the current dividend on preferred stocks. The dividend paid to common stockholders would be \$24,000 (\$60,000 – \$36,000).

Action Plan

- ✓ Determine dividends on preferred shares by multiplying the dividend rate times the par value of the stock times the number of preferred shares.
- ✓ Understand the cumulative feature. If preferred stock is cumulative, then any missed dividends (dividends in arrears) and the current year's dividend must be paid to preferred stockholders before dividends are paid to common stockholders.

Related exercise material: **BE11-7, E11-6, E11-13, and DO IT! 11-4.**

Stock Dividends

A **stock dividend** is a pro rata (proportional to ownership) distribution of the corporation's own stock to stockholders. Whereas a company pays cash in a cash dividend, a company issues shares of stock in a stock dividend. **A stock dividend results in a decrease in retained earnings and an increase in paid-in capital.** Unlike a cash dividend, a stock dividend does not decrease total stockholders' equity or total assets.

To illustrate, assume that you have a 2% ownership interest in Cetus Inc. That is, you own 20 of its 1,000 shares of common stock. If Cetus declares a 10% stock dividend, it would issue 100 shares ($1,000 \times 10\%$) of stock. You would receive two shares ($2\% \times 100$). Would your ownership interest change? No, it would remain at 2% ($22 \div 1,100$). **You now own more shares of stock, but your ownership interest has not changed.**

Cetus has disbursed no cash and has assumed no liabilities. What, then, are the purposes and benefits of a stock dividend? Corporations issue stock dividends generally for one or more of the following reasons.

1. To satisfy stockholders' dividend expectations without spending cash.
2. To increase the marketability of the corporation's stock. When the number of shares outstanding increases, the market price per share decreases. Decreasing the market price of the stock makes it easier for smaller investors to purchase the shares.
3. To emphasize that a company has permanently reinvested in the business a portion of stockholders' equity, which therefore is unavailable for cash dividends.

When the dividend is declared, the board of directors determines the size of the stock dividend and the value assigned to each dividend.

Generally, if the company issues a **small stock dividend** (less than 20–25% of the corporation's issued stock), the value assigned to the dividend is the fair value (market price) per share. This treatment is based on the assumption that a small stock dividend will have little effect on the market price of the shares previously outstanding. Thus, many stockholders consider small stock dividends to be distributions of earnings equal to the market price of the shares distributed. If a company issues a **large stock dividend** (greater than 20–25%), the price assigned to the dividend is the par or stated value. Small stock dividends predominate in practice. Thus, we will illustrate only entries for small stock dividends.

ENTRIES FOR STOCK DIVIDENDS

To illustrate the accounting for small stock dividends, assume that Medland Corporation has a balance of \$300,000 in retained earnings. It declares a 10% stock dividend on its 50,000 shares of \$10 par value common stock. The current market price of its stock is \$15 per share. The number of shares to be issued is 5,000 ($10\% \times 50,000$). Therefore, the total amount to be debited to Stock Dividends is \$75,000 ($5,000 \times \15). The entry to record the declaration of the stock dividend is as follows.

A	=	L	+	SE
		-75,000 Div		
		+50,000 CS		
		+25,000 CS		

Cash Flows
no effect

Stock Dividends	75,000	
Common Stock Dividends Distributable		50,000
Paid-in Capital in Excess of Par—Common Stock		25,000
(To record declaration of 10% stock dividend)		

Medland debits Stock Dividends for the market price of the stock issued ($\$15 \times 5,000$). (Similar to Cash Dividends, Stock Dividends decrease retained earnings.) Medland also credits Common Stock Dividends Distributable for the par value of the dividend shares ($\$10 \times 5,000$) and credits Paid-in Capital in Excess of Par—Common Stock for the excess of the market price over par ($\$5 \times 5,000$).

Common Stock Dividends Distributable is a **stockholders' equity account**. It is not a liability because assets will not be used to pay the dividend. If the company prepares a balance sheet before it issues the dividend shares, it reports the distributable account under paid-in capital as shown in Illustration 11-14.

Paid-in capital	
Common stock	\$500,000
Common stock dividends distributable	50,000
Paid-in capital in excess of par—common stock	25,000
Total paid-in capital	<u>\$575,000</u>

Illustration 11-14
Statement presentation of common stock dividends distributable

When Medland issues the dividend shares, it debits Common Stock Dividends Distributable and credits Common Stock, as follows.

Common Stock Dividends Distributable	50,000	50,000
Common Stock		
(To record issuance of 5,000 shares in a stock dividend)		

A	=	L	+	SE
				-50,000 CS
				<u>+50,000 CS</u>

Cash Flows
no effect

EFFECTS OF STOCK DIVIDENDS

How do stock dividends affect stockholders' equity? They **change the composition of stockholders' equity** because they transfer a portion of retained earnings to paid-in capital. However, **total stockholders' equity remains the same**. Stock dividends also have no effect on the par or stated value per share, but the number of shares outstanding increases. Illustration 11-15 shows these effects for Medland.

	<u>Before Dividend</u>	<u>Change</u>	<u>After Dividend</u>
Stockholders' equity			
Paid-in capital			
Common stock, \$10 par	\$ 500,000	\$ 50,000	\$ 550,000
Paid-in capital in excess of par	—	25,000	25,000
Total paid-in capital	<u>500,000</u>	<u>+75,000</u>	<u>575,000</u>
Retained earnings	300,000	-75,000	225,000
Total stockholders' equity	<u>\$800,000</u>	<u>\$ 0</u>	<u>\$800,000</u>
Outstanding shares	<u>50,000</u>	<u>+5,000</u>	<u>55,000</u>
Par value per share	<u>\$10.00</u>	<u>\$0</u>	<u>\$10.00</u>

Illustration 11-15
Stock dividend effects

In this example, total paid-in capital increases by \$75,000 ($50,000 \text{ shares} \times 10\% \times \15) and retained earnings decreases by the same amount. Note also that total stockholders' equity remains unchanged at \$800,000. The number of shares increases by 5,000 ($50,000 \times 10\%$).

ANATOMY OF A FRAUD

The president, chief operating officer, and chief financial officer of **SafeNet**, a software encryption company, were each awarded employee stock options by the company's board of directors as part of their compensation package. Stock options enable an employee to buy a company's stock sometime in the future at the price that existed when the stock option was awarded. For example, suppose that you received stock options today, when the stock price of your company was \$30. Three years later, if the stock price rose to \$100, you could "exercise" your options and buy the stock for \$30 per share, thereby making \$70 per share. After being awarded their stock options, the three employees changed the award dates in the company's records to dates in the past, when the company's stock was trading at historical lows. For instance, using the previous example, they would choose a past date when the stock was selling for \$10 per share, rather than the \$30 price on the actual award date. This would increase the profit from exercising the options to \$90 per share.

Total take: \$1.7 million

THE MISSING CONTROL

Independent internal verification. The company's board of directors should have ensured that the awards were properly administered. For example, the date on the minutes from the board meeting could be compared to the dates that were recorded for the awards. In addition, the dates should again be confirmed upon exercise.

Stock Splits

Helpful Hint

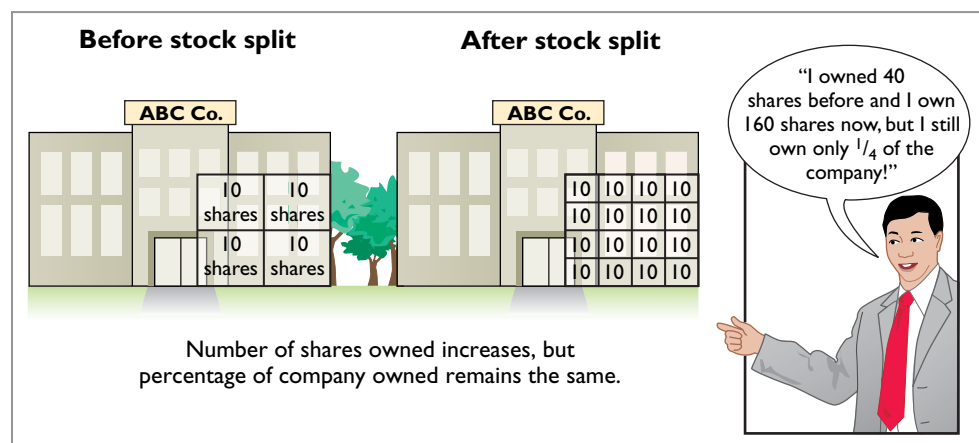

A stock split changes the par value per share but does not affect any balances in stockholders' equity.

A **stock split**, like a stock dividend, involves issuance of additional shares to stockholders according to their percentage ownership. **However, a stock split results in a reduction in the par or stated value per share.** The purpose of a stock split is to increase the marketability of the stock by lowering its market price per share. This, in turn, makes it easier for the corporation to issue additional stock.

The effect of a split on market price is generally **inversely proportional** to the size of the split. For example, after a 2-for-1 stock split, the market price of **Nike's** stock fell from \$111 to approximately \$55. The lower market price stimulated market activity. Within one year, the stock was trading above \$100 again. Illustration 11-16 shows the effect of a 4-for-1 stock split for stockholders.

Illustration 11-16

Effect of stock split for stockholders

In a stock split, the company increases the number of shares in the same proportion that par or stated value per share decreases. For example, in a 2-for-1 split, the company exchanges one share of \$10 par value stock for two shares of \$5 par value stock. **A stock split does not have any effect on total paid-in capital, retained earnings, or total stockholders' equity.** However, the number

of shares outstanding increases, and par value per share decreases. Illustration 11-17 shows these effects for Medland Corporation, assuming that it splits its 50,000 shares of common stock on a 2-for-1 basis.

	<u>Before Stock Split</u>	<u>Change</u>	<u>After Stock Split</u>
Stockholders' equity			
Paid-in capital			
Common stock,	\$ 500,000		\$ 500,000
Paid-in capital in excess of par— common stock	—0—		—0—
Total paid-in capital	500,000	\$ 0	500,000
Retained earnings	300,000	0	300,000
Total stockholders' equity	\$800,000	\$ 0	\$800,000
Outstanding shares	50,000	+50,000	100,000
Par value per share	\$10.00	−\$5.00	\$5.00

Illustration 11-17
Stock split effects

A stock split does not affect the balances in any stockholders' equity accounts. Therefore, **a company does not need to journalize a stock split.**

Illustration 11-18 summarizes the differences between stock dividends and stock splits.

<u>Item</u>	<u>Stock Dividend</u>	<u>Stock Split</u>
Total paid-in capital	Increase	No change
Total retained earnings	Decrease	No change
Total par value (common stock)	Increase	No change
Par value per share	No change	Decrease
Outstanding shares	Increase	Increase
Total stockholders' equity	No change	No change

Illustration 11-18
Differences between the effects of stock dividends and stock splits

Investor Insight Berkshire Hathaway

Dietmar Klement/
iStockphoto

A No-Split Philosophy

Warren Buffett's company, **Berkshire Hathaway**, has two classes of shares. Until recently, the company had never split either class of stock. As a result, the class A stock had a market price of \$97,000 and the class B sold for about \$3,200 per share. Because the price per share is so high, the stock does not trade as frequently as the stock of other companies. Buffett has always opposed stock splits because he feels that a lower stock price attracts short-term investors. He

appears to be correct. For example, while more than 6 million shares of **IBM** are exchanged on the average day, only about 1,000 class A shares of Berkshire are traded. Despite Buffett's aversion to splits, in order to accomplish a recent acquisition, Berkshire decided to split its class B shares 50 to 1.

Source: Scott Patterson, "Berkshire Nears Smaller Baby B's," *Wall Street Journal Online* (January 19, 2010).

Why does Warren Buffett usually oppose stock splits? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!

5

Stock Dividends and Stock Splits

Sing CD Company has had five years of record earnings. Due to this success, the market price of its 500,000 shares of \$2 par value common stock has tripled from \$15 per share to \$45. During this period, paid-in capital remained the same at \$2,000,000. Retained earnings increased from \$1,500,000 to \$10,000,000. President Joan Elbert is considering either a 10% stock dividend or a 2-for-1 stock split. She asks you to show the before-and-after effects of each option on retained earnings, total stockholders' equity, shares outstanding, and par value per share.

Action Plan

- ✓ Calculate the stock dividend's effect on retained earnings by multiplying the number of new shares times the market price of the stock (or par value for a large stock dividend).
- ✓ Recall that a stock dividend increases the number of shares without affecting total stockholders' equity.
- ✓ Recall that a stock split only increases the number of shares outstanding and decreases the par value per share.

Solution

The stock dividend amount is \$2,250,000 $[(500,000 \times 10\%) \times \$45]$. The new balance in retained earnings is \$7,750,000 $(\$10,000,000 - \$2,250,000)$. The retained earnings balance after the stock split is the same as it was before the split: \$10,000,000. Total stockholders' equity does not change. The effects on the stockholders' equity accounts are as follows.

	Original Balances	After Dividend	After Split
Paid-in capital	\$ 2,000,000	\$ 4,250,000	\$ 2,000,000
Retained earnings	10,000,000	7,750,000	10,000,000
Total stockholders' equity	<u>\$12,000,000</u>	<u>\$12,000,000</u>	<u>\$12,000,000</u>
Shares outstanding	<u>500,000</u>	<u>550,000</u>	<u>1,000,000</u>
Par value per share	\$2.00	\$2.00	\$1.00

LEARNING
OBJECTIVE

6

Discuss how stockholders' equity is reported and analyzed.

Retained Earnings

Recall that **retained earnings** is net income that a company retains in the business. The balance in retained earnings is part of the stockholders' claim on the total assets of the corporation. It does not, however, represent a claim on any specific asset. Nor can the amount of retained earnings be associated with the balance of any asset account. For example, a \$100,000 balance in retained earnings does not mean that there should be \$100,000 in cash. The reason is that the company may have used the cash resulting from the excess of revenues over expenses to purchase buildings, equipment, and other assets.

To demonstrate that retained earnings and cash may be quite different, Illustration 11-19 shows recent amounts of retained earnings and cash in selected companies.

Illustration 11-19

Retained earnings and cash balances

Company	(in millions)	
	Retained Earnings	Cash
Facebook	\$ 3,159	\$3,323
Google	61,262	8,989
Nike, Inc.	5,695	3,337
Starbucks	4,130	2,576
Amazon.com	2,190	8,658

Remember that when a company has net income, it closes net income to retained earnings. The closing entry is a debit to Income Summary and a credit to Retained Earnings.

When a company has a **net loss** (expenses exceed revenues), it also closes this amount to retained earnings. The closing entry is a debit to Retained Earnings and a credit to Income Summary. To illustrate, assume that Rendle Corporation has a net loss of \$400,000 in 2017. The closing entry to record this loss is as follows.

Retained Earnings	400,000	
Income Summary		400,000
(To close net loss to Retained Earnings)		

This closing entry is done even if it results in a debit balance in Retained Earnings. **Companies do not debit net losses to paid-in capital accounts.** To do so would destroy the distinction between paid-in and earned capital. If cumulative losses exceed cumulative income over a company's life, a debit balance in Retained Earnings results. A debit balance in Retained Earnings is identified as a **deficit**. A company reports a deficit as a deduction in the stockholders' equity section, as shown below.

Helpful Hint

Remember that Retained Earnings is a stockholders' equity account, whose normal balance is a credit.

Balance Sheet (partial)

Stockholders' equity	
Paid-in capital	
Common stock	\$800,000
Retained earnings (deficit)	(50,000)
Total stockholders' equity	<u><u>\$750,000</u></u>

Illustration 11-20

Stockholders' equity with deficit

RETAINED EARNINGS RESTRICTIONS

The balance in retained earnings is generally available for dividend declarations. In some cases, however, there may be **retained earnings restrictions**. These make a portion of the retained earnings balance currently unavailable for dividends. Restrictions result from one or more of the following causes.

- 1. Legal restrictions.** Many states require a corporation to restrict retained earnings for the cost of treasury stock purchased. The restriction keeps intact the corporation's legal capital that is being temporarily held as treasury stock. When the company sells the treasury stock, the restriction is lifted.
- 2. Contractual restrictions.** Long-term debt contracts may restrict retained earnings as a condition for the loan. The restriction limits the use of corporate assets for payment of dividends. Thus, it increases the likelihood that the corporation will be able to meet required loan payments.
- 3. Voluntary restrictions.** The board of directors may voluntarily create retained earnings restrictions for specific purposes. For example, the board may authorize a restriction for future plant expansion. By reducing the amount of retained earnings available for dividends, the company makes more cash available for the planned expansion.

Companies generally disclose **retained earnings restrictions** in the notes to the financial statements. For example, as shown in Illustration 11-21 (page 526), **Tektronix Inc.**, a manufacturer of electronic measurement devices, had total retained earnings of \$774 million, but the unrestricted portion was only \$223.8 million.

Illustration 11-21
Disclosure of restriction

Real World	TEKTRONIX INC. Notes to the Financial Statements
<p>Certain of the Company's debt agreements require compliance with debt covenants. Management believes that the Company is in compliance with such requirements. The Company had unrestricted retained earnings of \$223.8 million after meeting those requirements.</p>	

PRIOR PERIOD ADJUSTMENTS

Suppose that a corporation has closed its books and issued financial statements. The corporation then discovers that it made a material error in reporting net income of a prior year. How should the company record this situation in the accounts and report it in the financial statements?

The correction of an error in previously issued financial statements is known as a **prior period adjustment**. The company makes the correction directly to Retained Earnings because the effect of the error is now in this account. The net income for the prior period has been recorded in retained earnings through the journalizing and posting of closing entries.

To illustrate, assume that General Microwave discovers in 2017 that it understated depreciation expense on equipment in 2016 by \$300,000 due to computational errors. These errors overstated both net income for 2016 and the current balance in retained earnings. The entry for the prior period adjustment, ignoring all tax effects, is as follows.

A	=	L	+	SE
				- 300,000 RE
-300,000				
Cash Flows				
no effect				

Retained Earnings	300,000		
Accumulated Depreciation—Equipment			300,000
(To adjust for understatement of depreciation in a prior period)			

A debit to an income statement account in 2017 is incorrect because the error pertains to a prior year.

Companies report prior period adjustments in the retained earnings statement. They add (or deduct, as the case may be) these adjustments from the beginning retained earnings balance. This results in an adjusted beginning balance. For example, assuming a beginning balance of \$800,000 in retained earnings, General Microwave reports the prior period adjustment as follows.

Illustration 11-22
Statement presentation of prior period adjustments

GENERAL MICROWAVE Retained Earnings Statement (partial)	
Balance, January 1, as reported	\$ 800,000
Correction for overstatement of net income in prior period (depreciation error)	(300,000)
Balance, January 1, as adjusted	<u>\$ 500,000</u>

Again, reporting the correction in the current year's income statement would be incorrect because it applies to a prior year's income statement.

RETAINED EARNINGS STATEMENT

The **retained earnings statement** shows the changes in retained earnings during the year. The company prepares the statement from the Retained Earnings account. Illustration 11-23 shows (in T-account form) transactions that affect retained earnings.

Retained Earnings	
1. Net loss	1. Net income
2. Prior period adjustments for overstatement of net income	2. Prior period adjustments for understatement of net income
3. Cash dividends and stock dividends	
4. Some disposals of treasury stock	

Illustration 11-23
Debits and credits to retained earnings

As indicated, net income increases retained earnings, and a net loss decreases retained earnings. Prior period adjustments may either increase or decrease retained earnings. Both cash dividends and stock dividends decrease retained earnings. The circumstances under which treasury stock transactions decrease retained earnings are explained on page 514.

A complete retained earnings statement for Graber Inc., based on assumed data, is as follows.

GRABER INC.	
Retained Earnings Statement	
For the Year Ended December 31, 2017	
Balance, January 1, as reported	\$1,050,000
Correction for understatement of net income in prior period (inventory error)	50,000
Balance, January 1, as adjusted	1,100,000
Add: Net income	360,000
	1,460,000
Less: Cash dividends	\$100,000
Stock dividends	200,000
	300,000
Balance, December 31	<u>\$1,160,000</u>

Illustration 11-24

VEGA CORPORATION	
Retained Earnings Statement	
For the Year Ended December 31, 2017	
Balance, January 1, as reported	\$5,130,000
Correction for overstatement of net income in prior period (depreciation error)	(180,000)
Balance, January 1, as adjusted	4,950,000
Add: Net income	2,000,000
	6,950,000
Less: Cash dividends	250,000
Balance, December 31	<u>\$6,700,000</u>

Action Plan

- ✓ Recall that a retained earnings statement begins with retained earnings, as reported at the end of the previous year.
- ✓ Add or subtract any prior period adjustments to arrive at the adjusted beginning figure.
- ✓ Add net income and subtract dividends declared to arrive at the ending balance in retained earnings.

Statement Presentation and Analysis

In the stockholders' equity section of the balance sheet, paid-in capital and retained earnings are reported. The specific sources of paid-in capital are identified. Within paid-in capital, two classifications are recognized:

- 1. Capital stock.** This category consists of preferred and common stock. Preferred stock is shown before common stock because of its preferential rights. Par value, shares authorized, shares issued, and shares outstanding are reported for each class of stock.
- 2. Additional paid-in capital.** This includes the excess of amounts paid over par or stated value and paid-in capital from treasury stock.

PRESENTATION

Illustration 11-25 presents the stockholders' equity section of Graber Inc.'s balance sheet. Note the following: (1) "Common stock dividends distributable" is shown under "Capital stock" in "Paid-in capital" and (2) a note (Note R) discloses a retained earnings restriction.

Illustration 11-25
Comprehensive stockholders' equity section

GRABER INC. Balance Sheet (partial)			
Stockholders' equity			
Paid-in capital			
Capital stock			
9% Preferred stock, \$100 par value, cumulative, callable at \$120, 10,000 shares authorized, 6,000 shares issued and outstanding		\$ 600,000	
Common stock, no par, \$5 stated value, 500,000 shares authorized, 400,000 shares issued and 390,000 shares outstanding	\$2,000,000		
Common stock dividends distributable	50,000		2,050,000
Total capital stock			2,650,000
Additional paid-in capital			
In excess of par—preferred stock	30,000		
In excess of stated value—common stock	1,050,000		1,080,000
Total additional paid-in capital			1,080,000
Total paid-in capital			3,730,000
Retained earnings (see Note R)			1,160,000
Total paid-in capital and retained earnings			4,890,000
Less: Treasury stock (10,000 common shares)			80,000
Total stockholders' equity			\$4,810,000

Note R: Retained earnings is restricted for the cost of treasury stock, \$80,000.

The stockholders' equity section of Graber Inc. in Illustration 11-25 includes most of the accounts discussed in this chapter. The disclosures pertaining to Graber's common stock indicate that the company issued 400,000 shares; 100,000 shares are unissued (500,000 authorized less 400,000 issued), and 390,000 shares are outstanding (400,000 issued less 10,000 shares in treasury).

Published annual reports often combine and report as a single amount the individual sources of additional paid-in capital, as shown in Illustration 11-26. In addition, authorized shares are sometimes not reported.

KELLOGG COMPANY
Balance Sheet (partial)
(\$ in millions)

Stockholders' equity	
Common stock, \$0.25 par value, 1,000,000,000 shares authorized	
Issued: 418,669,193 shares	\$ 105
Capital in excess of par value	388
Retained earnings	4,217
Treasury stock, at cost 28,618,052 shares	(1,357)
Accumulated other comprehensive income (loss)	(827)
Total stockholders' equity	<u>\$ 2,526</u>

Illustration 11-26
Published stockholders' equity section

In practice, companies sometimes use the term "Capital surplus" in place of "Additional paid-in capital," and "Earned surplus" in place of "Retained earnings." The use of the term "surplus" suggests that the company has available an excess amount of funds. Such is not necessarily the case. Therefore, **the term "surplus" should not be employed in accounting.** Unfortunately, a number of companies still do use it.

Instead of presenting a detailed stockholders' equity section in the balance sheet and a retained earnings statement, many companies prepare a **stockholders' equity statement**. This statement shows the changes (1) in each stockholders' equity account and (2) in total that occurred during the year. Examples of stockholders' equity statements appear for **Apple** in Appendix A and for Hampton Corporation in an appendix to this chapter (Illustration 11A-1).

ANALYSIS

Investors and analysts can measure profitability from the viewpoint of the common stockholder by the **return on common stockholders' equity**. This ratio, as shown in Illustration 11-27, indicates how many dollars of net income the company earned for each dollar invested by the common stockholders. It is computed by dividing **net income available to common stockholders** (which is net income minus preferred dividends) by average common stockholders' equity.

To illustrate, **Walt Disney Company's** beginning-of-the-year and end-of-the-year common stockholders' equity were \$31,820 and \$30,753 million, respectively. Its net income was \$4,687 million, and no preferred stock was outstanding. The return on common stockholders' equity is computed as follows.

Net Income minus Preferred Dividends	÷	Average Common Stockholders' Equity	=	Return on Common Stockholders' Equity
(\$4,687 - \$0)	÷	$\frac{(\$31,820 + \$30,753)}{2}$	=	15.0%

Illustration 11-27
Return on common stockholders' equity and computation

As shown above, if a company has preferred stock, we would deduct the amount of **preferred dividends** from the company's net income to compute income available to common stockholders. Also, the par value of preferred stock is deducted from total stockholders' equity when computing the average common stockholders' equity.

The Impact of Corporate Social Responsibility

A recent survey conducted by **Institutional Shareholder Services**, a proxy advisory firm, shows that 83% of investors now believe environmental and social factors can significantly impact shareholder value over the long term. This belief is clearly visible in the rising level of support for shareholder proposals request-

ing action related to social and environmental issues.

The following table shows that the number of corporate social responsibility (CSR)-related shareholder proposals

rose from 150 in 2000 to 191 in 2010. Moreover, those proposals received average voting support of 18.4% of votes cast versus just 7.5% a decade earlier.

Trends in Shareholder Proposals on Corporate Responsibility

	2000	2005	2010
Number of proposals voted	150	155	191
Average voting support	7.5%	9.9%	18.4%
Percent proposals receiving >10% support	16.7%	31.2%	52.1%

Stockholders' Equity

On January 1, 2017, Siena Corporation purchased 2,000 shares of treasury stock. Other information regarding Siena Corporation is provided below.

	2016	2017
Net income	\$110,000	\$110,000
Dividends on preferred stock	\$10,000	\$10,000
Dividends on common stock	\$2,000	\$1,600
Common stockholders' equity, beginning of year	\$500,000	\$400,000*
Common stockholders' equity, end of year	\$500,000	\$400,000

*Adjusted for purchase of treasury stock.

Compute (a) return on common stockholders' equity for each year, and (b) discuss its change from 2016 to 2017.

Solution

Action Plan

- ✓ Determine return on common stockholders' equity by dividing net income available to common stockholders by average common stockholders' equity.

(a)

$$\text{Return on common stockholders' equity} = \frac{\text{Net income} - \text{Dividends on preferred stock}}{\frac{\text{Common stockholders' equity, beginning of year} + \text{Common stockholders' equity, end of year}}{2}}$$

$$= \frac{(\$110,000 - \$10,000)}{(\$500,000 + \$500,000)/2} = 20\% \quad \frac{(\$110,000 - \$10,000)}{(\$400,000 + \$400,000)/2} = 25\%$$

- (b) Between 2016 and 2017, return on common stockholders' equity improved from 20% to 25%. While this would appear to be good news for the company's common stockholders, this increase should be carefully evaluated. It is important to note that net income did not change during this period. The increase in the ratio was due to the purchase of treasury shares, which reduced the denominator of the ratio. As the company repurchases its own shares, it becomes more reliant on debt and thus increases its risk.

LEARNING *
OBJECTIVE **7****APPENDIX 11A: Describe the use and content of the stockholders' equity statement.**

When balance sheets and income statements are presented by a corporation, changes in the separate accounts comprising stockholders' equity should also be disclosed. Disclosure of such changes is necessary to make the financial statements sufficiently informative for users. The disclosures may be made in an additional statement or in the notes to the financial statements.

Many corporations make the disclosures in a **stockholders' equity statement**. The statement shows the changes in **each** stockholders' equity account and in **total** stockholders' equity during the year. As shown in Illustration 11A-1, the stockholders' equity statement is prepared in columnar form. It contains columns for each account and for total stockholders' equity. The transactions are then identified and their effects are shown in the appropriate columns.

Illustration 11A-1
Stockholders' equity statement

HAMPTON CORPORATION					
Stockholders' Equity Statement					
For the Year Ended December 31, 2017					
	Common Stock (\$5 Par)	Paid-in Capital in Excess of Par—Common Stock	Retained Earnings	Treasury Stock	Total
Balance January 1	\$300,000	\$200,000	\$650,000	\$(34,000)	\$1,116,000
Issued 5,000 shares of common stock at \$15	25,000	50,000			75,000
Declared a \$40,000 cash dividend			(40,000)		(40,000)
Purchased 2,000 shares for treasury at \$16				(32,000)	(32,000)
Net income for year			240,000		240,000
Balance December 31	<u>\$325,000</u>	<u>\$250,000</u>	<u>\$850,000</u>	<u>\$(66,000)</u>	<u>\$1,359,000</u>

In practice, additional columns are usually provided to show the number of shares of issued stock and treasury stock. The stockholders' equity statement for **PepsiCo** for a three-year period is shown in Appendix B. **When a stockholders' equity statement is presented, a retained earnings statement is not necessary** because the retained earnings column explains the changes in this account.

LEARNING *
OBJECTIVE **8****APPENDIX 11B: Compute book value per share.****Book Value per Share**

You have learned about a number of per share amounts in this chapter. Another per share amount of some importance is **book value per share**. It represents **the equity a common stockholder has in the net assets of the corporation** from owning one share of stock. Remember that the net assets (total assets minus total liabilities) of a corporation must be equal to total stockholders' equity. Therefore, the formula for computing book value per share when a company has only one class of stock outstanding is as follows.

Illustration 11B-1

Book value per share formula

Total Stockholders' Equity	÷	Number of Common Shares Outstanding	=	Book Value per Share
---	---	--	---	---------------------------------

Thus, if Marlo Corporation has total stockholders' equity of \$1,500,000 (common stock \$1,000,000 and retained earnings \$500,000) and 50,000 shares of common stock outstanding, book value per share is \$30 ($\$1,500,000 \div 50,000$).

When a company has both preferred and common stock, the computation of book value is more complex. Since preferred stockholders have a prior claim on net assets over common stockholders, their equity must be deducted from total stockholders' equity. Then, we can determine the stockholders' equity that applies to the common stock. The computation of book value per share involves the following steps.

- 1. Compute the preferred stock equity.** This equity is equal to the sum of the call price of preferred stock plus any cumulative dividends in arrears. If the preferred stock does not have a call price, the par value of the stock is used.
- 2. Determine the common stock equity.** Subtract the preferred stock equity from total stockholders' equity.
- 3. Determine book value per share.** Divide common stock equity by shares of common stock outstanding.

EXAMPLE

We will use the stockholders' equity section of Graber Inc. shown in Illustration 11-25 (page 528). Graber's preferred stock is callable at \$120 per share and is cumulative. Assume that dividends on Graber's preferred stock were in arrears for one year, \$54,000 ($6,000 \times \9). The computation of preferred stock equity (Step 1 in the preceding list) is shown below.

Illustration 11B-2

Computation of preferred stock equity—Step 1

Call price (6,000 shares × \$120)	\$ 720,000
Dividends in arrears (6,000 shares × \$9)	54,000
Preferred stock equity	<u><u>\$774,000</u></u>

The computation of book value (Steps 2 and 3) is as follows.

Illustration 11B-3

Computation of book value per share with preferred stock—Steps 2 and 3

Total stockholders' equity	\$4,810,000
Less: Preferred stock equity	774,000
Common stock equity	<u><u>\$4,036,000</u></u>
Shares of common stock outstanding	390,000
Book value per share ($\$4,036,000 \div 390,000$)	<u><u>\$10.35</u></u>

Note that we used the call price of \$120 instead of the par value of \$100. Note also that the paid-in capital in excess of par value of preferred stock, \$30,000, **is not assigned to the preferred stock equity**. Preferred stockholders ordinarily do not have a right to amounts paid-in in excess of par value. Therefore, such amounts are assigned to the common stock equity in computing book value.

Book Value versus Market Price

Be sure you understand that **book value per share may not equal market price per share**. Book value generally is based on recorded costs. Market price reflects the subjective judgments of thousands of stockholders and prospective investors about a company's potential for future earnings and dividends. Market price per

share may exceed book value per share, but that fact does not necessarily mean that the stock is overpriced. The correlation between book value and the annual range of a company's market price per share is often remote, as indicated by the following recent data.

<u>Company</u>	<u>Book Value (year-end)</u>	<u>Market Range (for the year)</u>
The Limited, Inc.	\$13.38	\$31.03–\$22.89
H. J. Heinz Company	\$ 7.48	\$40.61–\$34.53
Cisco Systems	\$ 3.66	\$21.24–\$17.01
Wal-Mart Stores, Inc.	\$12.79	\$50.87–\$42.31

Illustration 11B-4

Book value and market prices compared

Book value per share **is useful** in determining the trend of a stockholder's per share equity in a corporation. It is also significant in many contracts and in court cases where the rights of individual parties are based on cost information.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

1 Discuss the major characteristics of a corporation.

The major characteristics of a corporation are separate legal existence, limited liability of stockholders, transferable ownership rights, ability to acquire capital, continuous life, corporation management, government regulations, and additional taxes.

2 Explain how to account for the issuance of common and preferred stock.

When companies record the issuance of common stock for cash, they credit the par value of the shares to Common Stock. They record in a separate paid-in capital account the portion of the proceeds that is above or below par value. When no-par common stock has a stated value, the entries are similar to those for par value stock. When no-par stock does not have a stated value, companies credit the entire proceeds to Common Stock.

Preferred stock has contractual provisions that give it priority over common stock in certain areas. Typically, preferred stockholders have preferences (1) to dividends and (2) to assets in liquidation. They usually do not have voting rights.

3 Explain how to account for treasury stock.

The cost method is generally used in accounting for treasury stock. Under this approach, companies debit Treasury Stock at the price paid to reacquire the shares. They credit the same amount to Treasury Stock when they sell the shares. The difference between the sales price and cost is recorded in stockholders' equity accounts, not in income statement accounts.

4 Explain how to account for cash dividends.

Companies make entries for cash dividends at the declaration date and at the payment date. At the **declaration date**, the entry is debit Cash Dividends and credit

Dividends Payable. At the **payment date**, the entry is debit Dividends Payable and credit Cash.

5 Explain how to account for stock dividends and splits.

At the declaration date, the entry for a small stock dividend is debit Stock Dividends, credit Paid-in Capital in Excess of Par (or Stated Value)—Common Stock, and credit Common Stock Dividends Distributable. At the payment date, the entry for a small stock dividend is debit Common Stock Dividends Distributable and credit Common Stock. A stock split reduces the par or stated value per share and increases the number of shares but does not affect balances in stockholders' equity accounts.

6 Discuss how stockholders' equity is reported and analyzed.

Companies report each of the individual debits and credits to retained earnings in the retained earnings statement. Additions consist of net income and prior period adjustments to correct understatements of prior years' net income. Deductions consist of net loss, prior period adjustments to correct overstatements of prior years' net income, cash and stock dividends, and some disposals of treasury stock.

In the stockholders' equity section, paid-in capital and retained earnings are reported and specific sources of paid-in capital are identified. Within paid-in capital, two classifications are shown: capital stock and additional paid-in capital. If a corporation has treasury stock, the cost of treasury stock is deducted from total paid-in capital and retained earnings to obtain total stockholders' equity. One measure of profitability is the return on common stockholders' equity. It is calculated by dividing net income minus preferred dividends by average common stockholders' equity.

- * **7 Describe the use and content of the stockholders' equity statement.** Corporations must disclose changes in stockholders' equity accounts and may choose to do so by issuing a separate stockholders' equity statement. This statement, prepared in columnar form, shows changes in each stockholders' equity account and in total stockholders' equity during the accounting period. When this statement is presented, a retained earnings statement is not necessary.
- * **8 Compute book value per share.** Book value per share represents the equity a common stockholder has in the net assets of a corporation from owning one share of stock. When there is only common stock outstanding, the formula for computing book value is: $\text{Total stockholders' equity} \div \text{Number of common shares outstanding} = \text{Book value per share}$.

GLOSSARY REVIEW

Authorized stock The amount of stock that a corporation is authorized to sell as indicated in its charter. (p. 505).

* **Book value per share** The equity a common stockholder has in the net assets of the corporation from owning one share of stock. (p. 531).

Cash dividend A pro rata distribution of cash to stockholders. (p. 515).

Charter A document that is issued by the state to set forth important terms and features regarding the creation of a corporation. (p. 502).

Corporation A business organized as a legal entity separate and distinct from its owners under state corporation law. (p. 500).

Cumulative dividend A feature of preferred stock entitling the stockholder to receive current and unpaid prior-year dividends before common stockholders receive dividends. (p. 518).

Declaration date The date the board of directors formally declares (authorizes) a dividend and announces it to stockholders. (p. 516).

Deficit A debit balance in Retained Earnings. (p. 525).

Dividend A corporation's distribution of cash or stock to its stockholders on a pro rata (proportional) basis. (p. 515).

Liquidating dividend A dividend declared out of paid-in capital. (p. 515).

No-par value stock Capital stock that has not been assigned a value in the corporate charter. (p. 507).

Organization costs Costs incurred in the formation of a corporation. (p. 503).

Outstanding stock Capital stock that has been issued and is being held by stockholders. (p. 513).

Paid-in capital Total amount of cash and other assets paid in to the corporation by stockholders in exchange for capital stock. (p. 507).

Par value stock Capital stock that has been assigned a value per share in the corporate charter. (p. 506).

Payment date The date dividends are transferred to stockholders. (p. 517).

Preferred stock Capital stock that has some preferences over common stock. (p. 511).

Prior period adjustment The correction of an error in previously issued financial statements. (p. 526).

Privately held corporation A corporation that has only a few stockholders and whose stock is not available for sale to the general public. (p. 500).

Publicly held corporation A corporation that may have thousands of stockholders and whose stock is regularly traded on a national securities exchange. (p. 500).

Record date The date when ownership of outstanding shares is determined for dividend purposes. (p. 516).

Retained earnings Net income that the corporation retains for future use. (p. 507).

Retained earnings restrictions Circumstances that make a portion of retained earnings currently unavailable for dividends. (p. 525).

Retained earnings statement A financial statement that shows the changes in retained earnings during the year. (p. 526).

Return on common stockholders' equity A measure of profitability that shows how many dollars of net income were earned for each dollar invested by the owners; computed as net income minus preferred dividends divided by average common stockholders' equity. (p. 529).

Stated value The amount per share assigned by the board of directors to no-par value stock. (p. 507).

Stock dividend A pro rata distribution to stockholders of the corporation's own stock. (p. 520).

Stockholders' equity statement A statement that shows the changes in each stockholders' equity account and in total stockholders' equity during the year. (p. 529).

Stock split The issuance of additional shares of stock to stockholders according to their percentage ownership. It is accompanied by a reduction in the par or stated value per share. (p. 522).

Treasury stock A corporation's own stock that has been issued and subsequently reacquired from shareholders by the corporation but not retired. (p. 512).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following is **not** a major advantage of a corporate form of organization?
 (a) Separate legal existence.
 (b) Continuous life.
 (c) Government regulations.
 (d) Transferable ownership rights.
- (LO 1) 2. A major disadvantage of a corporation is:
 (a) limited liability of stockholders.
 (b) additional taxes.
 (c) transferable ownership rights.
 (d) separate legal existence.
- (LO 1) 3. Which of the following statements is **false**?
 (a) Ownership of common stock gives the owner a voting right.
 (b) The stockholders' equity section begins with a paid-in capital section.
 (c) The authorization of capital stock does not result in a formal accounting entry.
 (d) Par value and market price of a company's stock are always the same.
- (LO 2) 4. ABC Corporation issues 1,000 shares of \$10 par value common stock at \$12 per share. In recording the transaction, credits are made to:
 (a) Common Stock \$10,000 and Paid-in Capital in Excess of Stated Value \$2,000.
 (b) Common Stock \$12,000.
 (c) Common Stock \$10,000 and Paid-in Capital in Excess of Par \$2,000.
 (d) Common Stock \$10,000 and Retained Earnings \$2,000.
- (LO 2) 5. Preferred stock may have priority over common stock **except** in:
 (a) dividends.
 (b) assets in the event of liquidation.
 (c) cumulative dividend features.
 (d) voting.
- (LO 3) 6. XYZ, Inc. sells 100 shares of \$5 par value treasury stock at \$13 per share. If the cost of acquiring the shares was \$10 per share, the entry for the sale should include credits to:
 (a) Treasury Stock \$1,000 and Paid-in Capital from Treasury Stock \$300.
 (b) Treasury Stock \$500 and Paid-in Capital from Treasury Stock \$800.
 (c) Treasury Stock \$1,000 and Retained Earnings \$300.
 (d) Treasury Stock \$500 and Paid-in Capital in Excess of Par \$800.
- (LO 3) 7. In the stockholders' equity section, the cost of treasury stock is deducted from:
 (a) total paid-in capital and retained earnings.
 (b) retained earnings.
 (c) total stockholders' equity.
 (d) common stock in paid-in capital.
- (LO 4) 8. M-Bot Corporation has 10,000 shares of 8%, \$100 par value, cumulative preferred stock outstanding at December 31, 2017. No dividends were declared in 2015 or 2016. If M-Bot wants to pay \$375,000 of dividends in 2017, common stockholders will receive:
 (a) \$0. (c) \$215,000.
 (b) \$295,000. (d) \$135,000.
9. Entries for cash dividends are required on the:
 (a) declaration date and the payment date.
 (b) record date and the payment date.
 (c) declaration date, record date, and payment date.
 (d) declaration date and the record date.
10. Which of the following statements about small stock dividends is **true**? (LO 5)
 (a) A debit to Retained Earnings for the par value of the shares issued should be made.
 (b) A small stock dividend decreases total stockholders' equity.
 (c) Market price per share should be assigned to the dividend shares.
 (d) A small stock dividend ordinarily will have an effect on par value per share of stock.
11. All **but one** of the following is reported in a retained earnings statement. The **exception** is: (LO 6)
 (a) cash and stock dividends.
 (b) net income and net loss.
 (c) sales revenue.
 (d) prior period adjustments.
12. A prior period adjustment is: (LO 6)
 (a) reported in the income statement as a nontypical item.
 (b) a correction of an error that is recorded directly to retained earnings.
 (c) reported directly in the stockholders' equity section.
 (d) reported in the retained earnings statement as an adjustment of the ending balance of retained earnings.
13. In the stockholders' equity section of the balance sheet, common stock: (LO 6)
 (a) is listed before preferred stock.
 (b) is added to total capital stock.
 (c) is part of paid-in capital.
 (d) is part of additional paid-in capital.
14. Which of the following is **not** reported under additional paid-in capital? (LO 6)
 (a) Paid-in capital in excess of par.
 (b) Common stock.
 (c) Paid-in capital in excess of stated value.
 (d) Paid-in capital from treasury stock.
15. Katie Inc. reported net income of \$186,000 during 2017 and paid dividends of \$26,000 on common stock. It also has 10,000 shares of 6%, \$100 par value, noncumulative preferred stock outstanding and paid dividends of \$60,000 on preferred stock. Common stockholders' equity was \$1,200,000 on January 1, 2017, and \$1,600,000 on December 31, 2017. The company's return on common stockholders' equity for 2017 is: (LO 6)
 (a) 10.0%. (c) 7.1%.
 (b) 9.0%. (d) 13.3%.
- *16. When a stockholders' equity statement is presented, it is not necessary to prepare a (an): (LO 7)
 (a) retained earnings statement.
 (b) balance sheet.
 (c) income statement.
 (d) None of the above.

(LO 8)*17. The ledger of JFK, Inc. shows common stock, common treasury stock, and no preferred stock. For this company, the formula for computing book value per share is:

- (a) total paid-in capital and retained earnings divided by the number of shares of common stock issued.
- (b) common stock divided by the number of shares of common stock issued.
- (c) total stockholders' equity divided by the number of shares of common stock outstanding.
- (d) total stockholders' equity divided by the number of shares of common stock issued.

Solutions

- (c)** Government regulations are a disadvantage of a corporation. The other choices are advantages of a corporation.
 - (b)** Additional taxes are a disadvantage of a corporation. The other choices are advantages of a corporation.
 - (d)** Par value has no relationship with market price, and many states today do not require a par value. The other choices are true statements.
 - (c)** Common Stock should be credited for \$10,000 and Paid-in Capital in Excess of Par should be credited for \$2,000. The stock is par value stock, not stated value stock, and this excess is contributed, not earned, capital. The other choices are therefore incorrect.
 - (d)** Preferred stock usually does not have voting rights and therefore does not have priority over common stock on this issue. The other choices are true statements.
 - (a)** Treasury Stock should be credited for \$1,000 (100 shares \times \$10, the acquisition price). Paid-in Capital from Treasury Stock should be credited for the difference between the \$1,000 and the cash received of \$1,300 (100 shares \times \$13), or \$300. The other choices are therefore incorrect.
 - (a)** The cost of treasury stock is deducted from total paid-in capital and retained earnings. The other choices are therefore incorrect.
 - (d)** The preferred stockholders will receive a total of \$240,000 of dividends [dividends in arrears ($\$80,000 \times 2$ years) + current-year dividends ($\$80,000$)]. If M-Bot wants to pay a total of \$375,000 in 2017, then common stockholders will receive \$135,000 ($\$375,000 - \$240,000$), not (a) \$0, (b) \$295,000, or (c) \$215,000.
 - (a)** Entries are required for dividends on the declaration date and the payment date, but not the record date. The other choices are therefore incorrect.
 - (c)** Because the stock dividend is considered small, the fair value (market price), not the par value, is assigned to the shares. The other choices are incorrect because (a) a debit to Retained Earnings for the fair value of the shares issued should be made; (b) a small stock dividend changes the composition of total stockholders' equity, but does not change the total; and (d) a small stock dividend will have no effect on par value per share.
 - (c)** Sales revenue is not reported on the retained earnings statement. The other choices are true statements.
 - (b)** A prior period adjustment is a correction of an error that is recorded directly to retained earnings. The other choices are incorrect because a prior period adjustment is reported in the retained earnings statement, not in the (a) income statement or (c) stockholders' equity section of the balance sheet. Choice (d) is incorrect because the prior period adjustment is an adjustment of the beginning, not the ending, balance of retained earnings.
 - (c)** Common stock is part of part-in capital. The other choices are incorrect because common stock (a) is listed after preferred stock, (b) is not added to total capital stock but is part of capital stock, and (d) is part of capital stock, not additional paid-in capital.
 - (b)** Common stock is reported in the capital stock section of paid-in capital, not in the additional paid-in capital section. The other choices are true statements.
 - (b)** Return on common stockholders' equity is Net income available to common stockholders divided by Average common stockholders' equity. Net income available to common stockholders is Net income less Preferred dividends = $\$186,000 - (10,000 \times .06 \times \$100)$. The company's return on common stockholders' equity for the year is therefore $9.0\% [\$126,000 / (\$1,200,000 + \$1,600,000) / 2]$, not (a) 10.0%, (c) 7.1%, or (d) 13.3%.
- *16. (a)** When a stockholders' equity statement is presented a retained earnings statement is unnecessary as the information would be redundant. Choices (b) balance sheet and (c) income statement are required statements. Choice (d) is wrong because there is a correct answer given.
- *17. (c)** When a company has only one class of stock outstanding, Book value per share is Total stockholders' equity divided by Number of shares of common stock outstanding. The other choices are therefore incorrect.

PRACTICE EXERCISES

Journalize issuance of common and preferred stock and purchase of treasury stock.

(LO 2, 3)

- Maci Co. had the following transactions during the current period.

Mar. 2	Issued 5,000 shares of \$5 par value common stock to attorneys in payment of a bill for \$35,000 for services performed in helping the company to incorporate.
June 12	Issued 60,000 shares of \$5 par value common stock for cash of \$370,000.
July 11	Issued 1,000 shares of \$100 par value preferred stock for cash at \$112 per share.
Nov. 28	Purchased 2,000 shares of treasury stock for \$70,000.

Instructions

Journalize the transactions.

Solution

1. Mar. 2	Organization Expense	35,000	
	Common Stock (5,000 × \$5)		25,000
	Paid-in Capital in Excess of Par— Common Stock		10,000
June 12	Cash	370,000	
	Common Stock (60,000 × \$5)		300,000
	Paid-in Capital in Excess of Par— Common Stock		70,000
July 11	Cash (1,000 × \$112)	112,000	
	Preferred Stock (1,000 × \$100)		100,000
	Paid-in Capital in Excess of Par— Preferred Stock (1,000 × \$12)		12,000
Nov. 28	Treasury Stock	70,000	
	Cash		70,000

2. On January 1, Chong Corporation had 95,000 shares of no-par common stock issued and outstanding. The stock has a stated value of \$5 per share. During the year, the following occurred.

- Apr. 1 Issued 25,000 additional shares of common stock for \$17 per share.
 June 15 Declared a cash dividend of \$1 per share to stockholders of record on June 30.
 July 10 Paid the \$1 cash dividend.
 Dec. 1 Issued 2,000 additional shares of common stock for \$19 per share.
 15 Declared a cash dividend on outstanding shares of \$1.20 per share to stockholders of record on December 31.

Journalize cash dividends; indicate statement presentation.

(LO 4, 6)

Instructions

- (a) Prepare the entries, if any, on each of the three dividend dates.
 (b) How are dividends and dividends payable reported in the financial statements prepared at December 31?

Solution

2. (a) June 15	Cash Dividends (120,000 × \$1)	120,000	
	Dividends Payable		120,000
July 10	Dividends Payable	120,000	
	Cash		120,000
Dec. 15	Cash Dividends (122,000 × \$1.20)	146,400	
	Dividends Payable		146,400
(b) In the retained earnings statement, dividends of \$266,400 will be deducted. In the balance sheet, Dividends Payable of \$146,400 will be reported as a current liability.			

3. On January 1, 2017, Rabb Corporation had retained earnings of \$550,000. During the year, Rabb had the following selected transactions.

1. Declared cash dividends \$120,000.
2. Corrected overstatement of 2016 net income because of depreciation error \$30,000.
3. Earned net income \$320,000.
4. Declared stock dividends \$60,000.

Prepare a retained earnings statement.

(LO 6)

Instructions

Prepare a retained earnings statement for the year ended December 31, 2017.

Solution

3.

RABB CORPORATION		
Retained Earnings Statement		
For the Year Ended December 31, 2017		
Balance, January 1, as reported		\$550,000
Correction for overstatement of 2016 net income (depreciation error)		(30,000)
Balance, January 1, as adjusted		<u>520,000</u>
Add: Net income		<u>320,000</u>
		840,000
Less: Cash dividends	\$120,000	
Stock dividends	<u>60,000</u>	<u>180,000</u>
Balance, December 31		<u><u>\$660,000</u></u>

PRACTICE PROBLEM

Journalize transactions and prepare stockholders' equity section.

(LO 2, 3, 6)

Rolman Corporation is authorized to issue 1,000,000 shares of \$5 par value common stock. In its first year, the company has the following stock transactions.

- Jan. 10 Issued 400,000 shares of stock at \$8 per share.
 July 1 Issued 100,000 shares of stock for land. The land had an asking price of \$900,000. The stock is currently selling on a national exchange at \$8.25 per share.
 Sept. 1 Purchased 10,000 shares of common stock for the treasury at \$9 per share.
 Dec. 1 Sold 4,000 shares of the treasury stock at \$10 per share.

Instructions

- (a) Journalize the transactions.
 (b) Prepare the stockholders' equity section assuming the company had retained earnings of \$200,000 at December 31.

Solution

(a) Jan. 10	Cash	3,200,000	
	Common Stock		2,000,000
	Paid-in Capital in Excess of Par—Common Stock		1,200,000
	(To record issuance of 400,000 shares of \$5 par value stock)		
July 1	Land	825,000	
	Common Stock		500,000
	Paid-in Capital in Excess of Par—Common Stock		325,000
	(To record issuance of 100,000 shares of \$5 par value stock for land)		
Sept. 1	Treasury Stock	90,000	
	Cash		90,000
	(To record purchase of 10,000 shares of treasury stock at cost)		
Dec. 1	Cash	40,000	
	Treasury Stock		36,000
	Paid-in Capital from Treasury Stock		4,000
	(To record sale of 4,000 shares of treasury stock above cost)		

(b)

ROLMAN CORPORATION
Balance Sheet (partial)

Stockholders' equity		
Paid-in capital		
Capital stock		
Common stock, \$5 par value, 1,000,000 shares authorized, 500,000 shares issued, 494,000 shares outstanding		\$2,500,000
Additional paid-in capital		
In excess of par—common stock	\$1,525,000	
From treasury stock	4,000	
Total additional paid-in capital		1,529,000
Total paid-in capital		4,029,000
Retained earnings		200,000
Total paid-in capital and retained earnings		4,229,000
Less: Treasury stock (6,000 shares)		54,000
Total stockholders' equity		<u>\$4,175,000</u>

WileyPLUS

Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendices to the chapter.

QUESTIONS

- Mark Kemp, a student, asks your help in understanding the following characteristics of a corporation: (a) separate legal existence, (b) limited liability of stockholders, and (c) transferable ownership rights. Explain these characteristics to Mark.
- (a) Your friend Katie Fehr cannot understand how the characteristic of corporation management is both an advantage and a disadvantage. Clarify this problem for Katie.
(b) Identify and explain two other disadvantages of a corporation.
- (a) The following terms pertain to the forming of a corporation: (1) charter, (2) by-laws, and (3) organization costs. Explain the terms.
(b) Donna Fleming believes a corporation must be incorporated in the state in which its headquarters' office is located. Is Donna correct? Explain.
- What are the basic ownership rights of common stockholders in the absence of restrictive provisions?
- (a) What are the two principal components of stockholders' equity?
(b) What is paid-in capital? Give three examples.
- How does the balance sheet for a corporation differ from the balance sheet for a proprietorship?
- The corporate charter of Luney Corporation allows the issuance of a maximum of 100,000 shares of common stock. During its first two years of operations, Luney sold 70,000 shares to shareholders and reacquired 7,000 of these shares. After these transactions, how many shares are authorized, issued, and outstanding?
- Which is the better investment—common stock with a par value of \$5 per share, or common stock with a par value of \$20 per share? Why?
- What factors help determine the market price of stock?
- Why is common stock usually not issued at a price that is less than par value?
- Land appraised at \$80,000 is purchased by issuing 1,000 shares of \$20 par value common stock. The market price of the shares at the time of the exchange, based on active trading in the securities market, is \$95 per share. Should the land be recorded at \$20,000, \$80,000, or \$95,000? Explain.
- For what reasons might a company like IBM repurchase some of its stock (treasury stock)?
- Meng, Inc. purchases 1,000 shares of its own previously issued \$5 par common stock for \$12,000. Assuming the shares are held in the treasury, what effect does this transaction have on (a) net income, (b) total assets, (c) total paid-in capital, and (d) total stockholders' equity?

14. The treasury stock purchased in Question 13 is resold by Meng, Inc. for \$16,000. What effect does this transaction have on (a) net income, (b) total assets, (c) total paid-in capital, and (d) total stockholders' equity?
15. (a) What are the principal differences between common stock and preferred stock?
(b) Preferred stock may be cumulative. Discuss this feature.
(c) How are dividends in arrears presented in the financial statements?
16. Identify the events that result in credits and debits to retained earnings.
17. Indicate how each of the following accounts should be classified in the stockholders' equity section.
(a) Common stock.
(b) Paid-in capital in excess of par—common stock.
(c) Retained earnings.
(d) Treasury stock.
(e) Paid-in capital from treasury stock.
(f) Paid-in capital in excess of stated value—common stock.
(g) Preferred stock.
18. Jan Kimler maintains that adequate cash is the only requirement for the declaration of a cash dividend. Is Jan correct? Explain.
19. (a) Three dates are important in connection with cash dividends. Identify these dates, and explain their significance to the corporation and its stockholders.
(b) Identify the accounting entries that are made for a cash dividend and the date of each entry.
20. Contrast the effects of a cash dividend and a stock dividend on a corporation's balance sheet.
21. Rich Mordica asks, "Since stock dividends don't change anything, why declare them?" What is your answer to Rich?
22. Gorton Corporation has 30,000 shares of \$10 par value common stock outstanding when it announces a 2-for-1 stock split. Before the split, the stock had a market price of \$120 per share. After the split, how many shares of stock will be outstanding? What will be the approximate market price per share?
23. The board of directors is considering either a stock split or a stock dividend. They understand that total stockholders' equity will remain the same under either action. However, they are not sure of the different effects of the two types of actions on other aspects of stockholders' equity. Explain the differences to the directors.
24. What is a prior period adjustment, and how is it reported in the financial statements?
25. What is the purpose of a retained earnings restriction? Identify the possible causes of retained earnings restrictions.
- *26. What is the formula for computing book value per share when a corporation has only common stock?
- *27. Emko Inc.'s common stock has a par value of \$1, a book value of \$24, and a current market price of \$18. Explain why these amounts are all different.

BRIEF EXERCISES

List the advantages and disadvantages of a corporation.

(LO 1)

Prepare entries for issuance of par value common stock.

(LO 2)

Prepare entries for issuance of no-par value common stock.

(LO 2)

Prepare entries for issuance of stock in a noncash transaction.

(LO 2)

Prepare entries for issuance of preferred stock.

(LO 2)

Prepare entries for treasury stock transactions.

(LO 3)

Prepare entries for a cash dividend.

(LO 4)

BE11-1 Angie Baden is studying for her accounting midterm examination. Identify for Angie the advantages and disadvantages of the corporate form of business organization.

BE11-2 On May 10, Jack Corporation issues 2,000 shares of \$10 par value common stock for cash at \$18 per share. Journalize the issuance of the stock.

BE11-3 On June 1, Noonan Inc. issues 4,000 shares of no-par common stock at a cash price of \$6 per share. Journalize the issuance of the shares assuming the stock has a stated value of \$1 per share.

BE11-4 Lei Inc.'s \$10 par value common stock is actively traded at a market price of \$15 per share. Lei issues 5,000 shares to purchase land advertised for sale at \$85,000. Journalize the issuance of the stock in acquiring the land.

BE11-5 Garb Inc. issues 5,000 shares of \$100 par value preferred stock for cash at \$130 per share. Journalize the issuance of the preferred stock.

BE11-6 On July 1, Raney Corporation purchases 500 shares of its \$5 par value common stock for the treasury at a cash price of \$9 per share. On September 1, it sells 300 shares of the treasury stock for cash at \$11 per share. Journalize the two treasury stock transactions.

BE11-7 Greenwood Corporation has 80,000 shares of common stock outstanding. It declares a \$1 per share cash dividend on November 1 to stockholders of record on December 1. The dividend is paid on December 31. Prepare the entries on the appropriate dates to record the declaration and payment of the cash dividend.

BE11-8 Langley Corporation has 50,000 shares of \$10 par value common stock outstanding. It declares a 15% stock dividend on December 1 when the market price per share is \$16. The dividend shares are issued on December 31. Prepare the entries for the declaration and issuance of the stock dividend.

Prepare entries for a stock dividend.

(LO 5)

BE11-9 The stockholders' equity section of Pretzer Corporation consists of common stock (\$10 par) \$2,000,000 and retained earnings \$500,000. A 10% stock dividend (20,000 shares) is declared when the market price per share is \$14. Show the before-and-after effects of the dividend on the following.

Show before-and-after effects of a stock dividend.

(LO 5)

- The components of stockholders' equity.
- Shares outstanding.
- Par value per share.

BE11-10 For the year ending December 31, 2017, Soto Inc. reports net income \$170,000 and dividends \$85,000. Prepare the retained earnings statement for the year assuming the balance in retained earnings on January 1, 2017, was \$220,000.

Prepare a retained earnings statement.

(LO 6)

BE11-11 The balance in retained earnings on January 1, 2017, for Palmer Inc. was \$800,000. During the year, the corporation paid cash dividends of \$90,000 and distributed a stock dividend of \$8,000. In addition, the company determined that it had understated its depreciation expense in prior years by \$50,000. Net income for 2017 was \$120,000. Prepare the retained earnings statement for 2017.

Prepare a retained earnings statement.

(LO 6)

BE11-12 Pine Corporation has the following accounts at December 31: Common Stock, \$10 par, 5,000 shares issued, \$50,000; Paid-in Capital in Excess of Par—Common Stock \$30,000; Retained Earnings \$45,000; and Treasury Stock, 500 shares, \$11,000. Prepare the stockholders' equity section of the balance sheet.

Prepare stockholders' equity section.

(LO 6)

***BE11-13** The balance sheet for Lauren Inc. shows the following: total paid-in capital and retained earnings \$877,000, total stockholders' equity \$817,000, common stock issued 44,000 shares, and common stock outstanding 38,000 shares. Compute the book value per share. (No preferred stock is outstanding.)

Compute book value per share.

(LO 8)

DO IT! Exercises

DO IT! 11-1a Indicate whether each of the following statements is true or false. If false, indicate how to correct the statement.

Analyze statements about corporate organization.

- _____ 1. The corporation is an entity separate and distinct from its owners.
- _____ 2. The liability of stockholders is normally limited to their investment in the corporation.
- _____ 3. The relative lack of government regulation is an advantage of the corporate form of business.
- _____ 4. There is no journal entry to record the authorization of capital stock.
- _____ 5. No-par value stock is quite rare today.

(LO 1)

DO IT! 11-1b At the end of its first year of operation, Goss Corporation has \$1,000,000 of common stock and net income of \$236,000. Prepare (a) the closing entry for net income and (b) the stockholders' equity section at year-end.

Close net income and prepare stockholders' equity section.

(LO 1)

DO IT! 11-2 Beauty Island Corporation began operations on April 1 by issuing 60,000 shares of \$5 par value common stock for cash at \$13 per share. On April 19, it issued 2,000 shares of common stock to attorneys in settlement of their bill of \$27,500 for organization costs. In addition, Beauty Island issued 1,000 shares of \$1 par value preferred stock for \$6 cash per share. Journalize the issuance of the common and preferred shares, assuming the shares are not publicly traded.

Journalize issuance of stock.

(LO 2)

Journalize treasury stock transactions.

(LO 3)

DO IT! 11-3 Fouts Corporation purchased 2,000 shares of its \$10 par value common stock for \$130,000 on August 1. It will hold these shares in the treasury until resold. On December 1, the corporation sold 1,200 shares of treasury stock for cash at \$72 per share. Journalize the treasury stock transactions.

Determine dividends paid to preferred and common stockholders.

(LO 4)

DO IT! 11-4 Herr Corporation has 3,000 shares of 7%, \$100 par value preferred stock outstanding at December 31, 2017. At December 31, 2017, the company declared a \$105,000 cash dividend. Determine the dividend paid to preferred stockholders and common stockholders under each of the following scenarios.

1. The preferred stock is noncumulative, and the company has not missed any dividends in previous years.
2. The preferred stock is noncumulative, and the company did not pay a dividend in each of the two previous years.
3. The preferred stock is cumulative, and the company did not pay a dividend in each of the two previous years.

Determine effects of stock dividend and stock split.

(LO 5)

DO IT! 11-5 Jurgens Company has had 4 years of net income. Due to this success, the market price of its 400,000 shares of \$3 par value common stock has increased from \$12 per share to \$46. During this period, paid-in capital remained the same at \$4,800,000. Retained earnings increased from \$1,800,000 to \$12,000,000. President E. Rife is considering either a 15% stock dividend or a 2-for-1 stock split. He asks you to show the before-and-after effects of each option on (a) retained earnings and (b) total stockholders' equity.

Prepare a retained earnings statement.

(LO 6)

DO IT! 11-6a Foley Corporation has retained earnings of \$3,100,000 on January 1, 2017. During the year, Foley earned \$1,200,000 of net income. It declared and paid a \$150,000 cash dividend. In 2017, Foley recorded an adjustment of \$110,000 due to the overstatement (from mathematical error) of 2016 depreciation expense. Prepare a retained earnings statement for 2017.

Compute return on stockholders' equity and discuss changes.

(LO 6)

DO IT! 11-6b On January 1, 2017, Vahsholtz Corporation purchased 5,000 shares of treasury stock. Other information regarding Vahsholtz Corporation is provided as follows.

	2016	2017
Net income	\$100,000	\$110,000
Dividends on preferred stock	\$ 30,000	\$ 30,000
Dividends on common stock	\$ 20,000	\$ 25,000
Weighted-average number of common shares outstanding	50,000	45,000
Common stockholders' equity beginning of year	\$600,000	\$750,000
Common stockholders' equity end of year	\$750,000	\$830,000

Compute (a) return on common stockholders' equity for each year, and (b) discuss the changes in each.

EXERCISES

Identify characteristics of a corporation.

(LO 1)

E11-1 Andrea has prepared the following list of statements about corporations.

1. A corporation is an entity separate and distinct from its owners.
2. As a legal entity, a corporation has most of the rights and privileges of a person.
3. Most of the largest U.S. corporations are privately held corporations.
4. Corporations may buy, own, and sell property; borrow money; enter into legally binding contracts; and sue and be sued.
5. The net income of a corporation is not taxed as a separate entity.
6. Creditors have a legal claim on the personal assets of the owners of a corporation if the corporation does not pay its debts.
7. The transfer of stock from one owner to another requires the approval of either the corporation or other stockholders.
8. The board of directors of a corporation legally owns the corporation.
9. The chief accounting officer of a corporation is the controller.
10. Corporations are subject to fewer state and federal regulations than partnerships or proprietorships.

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E11-2 Andrea (see E11-1) has studied the information you gave her in that exercise and has come to you with more statements about corporations.

Identify characteristics of a corporation.

1. Corporation management is both an advantage and a disadvantage of a corporation compared to a proprietorship or a partnership.
2. Limited liability of stockholders, government regulations, and additional taxes are the major disadvantages of a corporation.
3. When a corporation is formed, organization costs are recorded as an asset.
4. Each share of common stock gives the stockholder the ownership rights to vote at stockholder meetings, share in corporate earnings, keep the same percentage ownership when new shares of stock are issued, and share in assets upon liquidation.
5. The number of issued shares is always greater than or equal to the number of authorized shares.
6. A journal entry is required for the authorization of capital stock.
7. Publicly held corporations usually issue stock directly to investors.
8. The trading of capital stock on a securities exchange involves the transfer of already issued shares from an existing stockholder to another investor.
9. The market price of common stock is usually the same as its par value.
10. Retained earnings is the total amount of cash and other assets paid in to the corporation by stockholders in exchange for capital stock.

(LO 1)

Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

E11-3 During its first year of operations, Foyle Corporation had the following transactions pertaining to its common stock.

Journalize issuance of common stock.

- Jan. 10 Issued 70,000 shares for cash at \$5 per share.
 July 1 Issued 40,000 shares for cash at \$7 per share.

(LO 2)

Instructions

- (a) Journalize the transactions, assuming that the common stock has a par value of \$5 per share.
- (b) Journalize the transactions, assuming that the common stock is no-par with a stated value of \$1 per share.

E11-4 Osage Corporation issued 2,000 shares of stock.

Journalize issuance of common stock.

Instructions

Prepare the entry for the issuance under the following assumptions.

- (a) The stock had a par value of \$5 per share and was issued for a total of \$52,000.
- (b) The stock had a stated value of \$5 per share and was issued for a total of \$52,000.
- (c) The stock had no par or stated value and was issued for a total of \$52,000.
- (d) The stock had a par value of \$5 per share and was issued to attorneys for services during incorporation valued at \$52,000.
- (e) The stock had a par value of \$5 per share and was issued for land worth \$52,000.

(LO 2)

E11-5 Hodge Corporation issued 100,000 shares of \$20 par value, cumulative, 6% preferred stock on January 1, 2016, for \$2,300,000. In December 2018, Hodge declared its first dividend of \$500,000.

Differentiate between preferred and common stock.

(LO 2, 4)

Instructions

- (a) Prepare Hodge's journal entry to record the issuance of the preferred stock.
- (b) If the preferred stock is **not** cumulative, how much of the \$500,000 would be paid to **common** stockholders?
- (c) If the preferred stock is cumulative, how much of the \$500,000 would be paid to **common** stockholders?

Journalize noncash common stock transactions.

(LO 2)

E11-6 As an auditor for the CPA firm of Hinkson and Calvert, you encounter the following situations in auditing different clients.

1. LR Corporation is a closely held corporation whose stock is not publicly traded. On December 5, the corporation acquired land by issuing 5,000 shares of its \$20 par value common stock. The owners' asking price for the land was \$120,000, and the fair value of the land was \$110,000.
2. Vera Corporation is a publicly held corporation whose common stock is traded on the securities markets. On June 1, it acquired land by issuing 20,000 shares of its \$10 par value stock. At the time of the exchange, the land was advertised for sale at \$250,000. The stock was selling at \$11 per share.

Instructions

Prepare the journal entries for each of the situations above.

Journalize treasury stock transactions.

(LO 3)

E11-7 Rinehart Corporation purchased from its stockholders 5,000 shares of its own previously issued stock for \$255,000. It later resold 2,000 shares for \$54 per share, then 2,000 more shares for \$49 per share, and finally 1,000 shares for \$43 per share.

Instructions

Prepare journal entries for the purchase of the treasury stock and the three sales of treasury stock.

Journalize issuance of common and preferred stock and purchase of treasury stock.

(LO 2, 3)

E11-8 Quay Co. had the following transactions during the current period.

- | | |
|---------|--|
| Mar. 2 | Issued 5,000 shares of \$5 par value common stock to attorneys in payment of a bill for \$30,000 for services performed in helping the company to incorporate. |
| June 12 | Issued 60,000 shares of \$5 par value common stock for cash of \$375,000. |
| July 11 | Issued 1,000 shares of \$100 par value preferred stock for cash at \$110 per share. |
| Nov. 28 | Purchased 2,000 shares of treasury stock for \$80,000. |

Instructions

Journalize the transactions.

Journalize treasury stock transactions.

(LO 3)

E11-9 On January 1, 2017, the stockholders' equity section of Newlin Corporation shows common stock (\$5 par value) \$1,500,000; paid-in capital in excess of par \$1,000,000; and retained earnings \$1,200,000. During the year, the following treasury stock transactions occurred.

- | | |
|---------|---|
| Mar. 1 | Purchased 50,000 shares for cash at \$15 per share. |
| July 1 | Sold 10,000 treasury shares for cash at \$17 per share. |
| Sept. 1 | Sold 8,000 treasury shares for cash at \$14 per share. |

Instructions

- (a) Journalize the treasury stock transactions.
- (b) Restate the entry for September 1, assuming the treasury shares were sold at \$12 per share.

Journalize preferred stock transactions and indicate statement presentation.

(LO 2, 6)

E11-10 Tran Corporation is authorized to issue both preferred and common stock. The par value of the preferred is \$50. During the first year of operations, the company had the following events and transactions pertaining to its preferred stock.

- | | |
|--------|--|
| Feb. 1 | Issued 20,000 shares for cash at \$53 per share. |
| July 1 | Issued 12,000 shares for cash at \$57 per share. |

Instructions

- (a) Journalize the transactions.
- (b) Post to the stockholders' equity accounts.
- (c) Indicate the financial statement presentation of the related accounts.

Answer questions about stockholders' equity section.

(LO 2, 3, 6)

E11-11 The stockholders' equity section of Haley Corporation at December 31 is as follows.

HALEY CORPORATION
Balance Sheet (partial)

Paid-in capital		
Preferred stock, cumulative, 10,000 shares authorized, 6,000 shares issued and outstanding	\$ 300,000	
Common stock, no par, 750,000 shares authorized, 600,000 shares issued	1,200,000	
Total paid-in capital	1,500,000	
Retained earnings	1,858,000	
Total paid-in capital and retained earnings	3,358,000	
Less: Treasury stock (10,000 common shares)	64,000	
Total stockholders' equity	\$3,294,000	

Instructions

From a review of the stockholders' equity section, as chief accountant, write a memo to the president of the company answering the following questions.

- (a) How many shares of common stock are outstanding?
- (b) Assuming there is a stated value, what is the stated value of the common stock?
- (c) What is the par value of the preferred stock?
- (d) If the annual dividend on preferred stock is \$30,000, what is the dividend rate on preferred stock?
- (e) If dividends of \$60,000 were in arrears on preferred stock, what would be the balance in Retained Earnings?

E11-12 Gilliam Corporation recently hired a new accountant with extensive experience in accounting for partnerships. Because of the pressure of the new job, the accountant was unable to review his textbooks on the topic of corporation accounting. During the first month, the accountant made the following entries for the corporation's capital stock.

Prepare correct entries for capital stock transactions.
(LO 2, 3)

May 2	Cash	130,000	
	Capital Stock		130,000
	(Issued 10,000 shares of \$10 par value common stock at \$13 per share)		
10	Cash	600,000	
	Capital Stock		600,000
	(Issued 10,000 shares of \$50 par value preferred stock at \$60 per share)		
15	Capital Stock	15,000	
	Cash		15,000
	(Purchased 1,000 shares of common stock for the treasury at \$15 per share)		
31	Cash	8,000	
	Capital Stock		5,000
	Gain on Sale of Stock		3,000
	(Sold 500 shares of treasury stock at \$16 per share)		

Instructions

On the basis of the explanation for each entry, prepare the entry that should have been made for the capital stock transactions.

E11-13 On January 1, Guillen Corporation had 95,000 shares of no-par common stock issued and outstanding. The stock has a stated value of \$5 per share. During the year, the following occurred.

Journalize cash dividends; indicate statement presentation.

- Apr. 1 Issued 25,000 additional shares of common stock for \$17 per share.
- June 15 Declared a cash dividend of \$1 per share to stockholders of record on June 30.
- July 10 Paid the \$1 cash dividend.
- Dec. 1 Issued 2,000 additional shares of common stock for \$19 per share.
- 15 Declared a cash dividend on outstanding shares of \$1.20 per share to stockholders of record on December 31.

(LO 4)

Instructions

- Prepare the entries, if any, on each of the three dividend dates.
- How are dividends and dividends payable reported in the financial statements prepared at December 31?

Journalize stock dividends.

(LO 5)

E11-14 On January 1, 2017, Frontier Corporation had \$1,000,000 of common stock outstanding that was issued at par. It also had retained earnings of \$750,000. The company issued 40,000 shares of common stock at par on July 1 and earned net income of \$400,000 for the year.

Instructions

Journalize the declaration of a 15% stock dividend on December 10, 2017, for the following independent assumptions.

- Par value is \$10, and market price is \$18.
- Par value is \$5, and market price is \$20.

Compare effects of a stock dividend and a stock split.

(LO 5)

E11-15 On October 31, the stockholders' equity section of Heins Company consists of common stock \$500,000 and retained earnings \$900,000. Heins is considering the following two courses of action: (1) declaring a 5% stock dividend on the 50,000, \$10 par value shares outstanding, or (2) effecting a 2-for-1 stock split that will reduce par value to \$5 per share. The current market price is \$14 per share.

Instructions

Prepare a tabular summary of the effects of the alternative actions on the components of stockholders' equity, outstanding shares, and par value per share. Use the following column headings: Before Action, After Stock Dividend, and After Stock Split.

Prepare correcting entries for dividends and a stock split.

(LO 4, 5)

E11-16 Before preparing financial statements for the current year, the chief accountant for Toso Company discovered the following errors in the accounts.

- The declaration and payment of \$50,000 cash dividend was recorded as a debit to Interest Expense \$50,000 and a credit to Cash \$50,000.
- A 10% stock dividend (1,000 shares) was declared on the \$10 par value stock when the market price per share was \$18. The only entry made was Stock Dividends (Dr.) \$10,000 and Dividend Payable (Cr.) \$10,000. The shares have not been issued.
- A 4-for-1 stock split involving the issue of 400,000 shares of \$5 par value common stock for 100,000 shares of \$20 par value common stock was recorded as a debit to Retained Earnings \$2,000,000 and a credit to Common Stock \$2,000,000.

Instructions

Prepare the correcting entries at December 31.

Prepare a retained earnings statement.

(LO 6)

E11-17 On January 1, 2017, Eddy Corporation had retained earnings of \$650,000. During the year, Eddy had the following selected transactions.

- Declared cash dividends \$120,000.
- Corrected overstatement of 2016 net income because of depreciation error \$40,000.
- Earned net income \$350,000.
- Declared stock dividends \$90,000.

Instructions

Prepare a retained earnings statement for the year.

Prepare a retained earnings statement.

(LO 6)

E11-18 Newland Company reported retained earnings at December 31, 2016, of \$310,000. Newland had 200,000 shares of common stock outstanding at the beginning of 2017.

The following transactions occurred during 2017.

- An error was discovered. In 2015, depreciation expense was recorded at \$70,000, but the correct amount was \$50,000.
- A cash dividend of \$0.50 per share was declared and paid.
- A 5% stock dividend was declared and distributed when the market price per share was \$15 per share.
- Net income was \$285,000.

Instructions

Prepare a retained earnings statement for 2017.

E11-19 The ledger of Rolling Hills Corporation contains the following accounts: Common Stock, Preferred Stock, Treasury Stock, Paid-in Capital in Excess of Par—Preferred Stock, Paid-in Capital in Excess of Stated Value—Common Stock, Paid-in Capital from Treasury Stock, and Retained Earnings.

Classify stockholders' equity accounts.

(LO 6)

Instructions

Classify each account using the following table headings.

<u>Account</u>	<u>Paid-in Capital</u>		<u>Retained Earnings</u>	<u>Other</u>
	<u>Capital Stock</u>	<u>Additional</u>		

E11-20 The following accounts appear in the ledger of Horner Inc. after the books are closed at December 31.

Prepare a stockholders' equity section.

(LO 6)

Common Stock, no par, \$1 stated value, 400,000 shares authorized; 300,000 shares issued	\$ 300,000
Common Stock Dividends Distributable	30,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,200,000
Preferred Stock, \$5 par value, 8%, 40,000 shares authorized; 30,000 shares issued	150,000
Retained Earnings	800,000
Treasury Stock (10,000 common shares)	74,000
Paid-in Capital in Excess of Par—Preferred Stock	344,000

Instructions

Prepare the stockholders' equity section at December 31, assuming retained earnings is restricted for plant expansion in the amount of \$100,000.

E11-21 Dirk Company reported the following balances at December 31, 2016: common stock \$500,000, paid-in capital in excess of par value—common stock \$100,000, and retained earnings \$250,000. During 2017, the following transactions affected stockholders' equity.

Prepare a stockholders' equity section.

(LO 6)

1. Issued preferred stock with a par value of \$125,000 for \$200,000.
2. Purchased treasury stock (common) for \$40,000.
3. Earned net income of \$180,000.
4. Declared and paid cash dividends of \$56,000.

Instructions

Prepare the stockholders' equity section of Dirk Company's December 31, 2017, balance sheet.

E11-22 In 2017, Pennington Corporation had net sales of \$600,000 and cost of goods sold of \$360,000. Operating expenses were \$153,000, and interest expense was \$7,500. The corporation's tax rate is 30%. The corporation declared preferred dividends of \$15,000 in 2017, and its average common stockholders' equity during the year was \$200,000.

Prepare an income statement and compute return on equity.

(LO 6)

Instructions

- (a) Prepare an income statement for Pennington Corporation.
- (b) Compute Pennington Corporation's return on common stockholders' equity for 2017.

***E11-23** A recent stockholders' equity section of **Aluminum Company of America (Alcoa)** showed the following (in alphabetical order): additional paid-in capital \$6,101, common stock \$925, preferred stock \$56, retained earnings \$7,428, and treasury stock \$2,828. (All dollar data are in millions.)

Prepare a stockholders' equity section.

(LO 6, 8)

The preferred stock has 557,740 shares authorized, with a par value of \$100 and an annual \$3.75 per share cumulative dividend preference. At December 31 of the current year, 557,649 shares of preferred are issued and 546,024 shares are outstanding. There are 1.8 billion shares of \$1 par value common stock authorized, of which 924.6 million are issued and 844.8 million are outstanding at December 31.

Instructions

- Prepare the stockholders' equity section of the current year, including disclosure of all relevant data.
- Compute the book value per share of common stock, assuming there are no preferred dividends in arrears. (Round to two decimals.)

Compute book value per share with preferred stock.

(LO 8)

***E11-24** At December 31, Gorden Corporation has total stockholders' equity of \$3,200,000. Included in this total are preferred stock \$500,000 and paid-in capital in excess of par—preferred stock \$50,000. There are 10,000 shares of \$50 par value, 8% cumulative preferred stock outstanding. At year-end, 200,000 shares of common stock are outstanding.

Instructions

Compute the book value per share of common stock under each of the following assumptions.

- There are no preferred dividends in arrears, and the preferred stock does not have a call price.
- Preferred dividends are one year in arrears, and the preferred stock has a call price of \$60 per share.

Visit the book's companion website, at www.wiley.com/college/wegandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

Journalize stock transactions, post, and prepare paid-in capital section.

(LO 2, 6)

P11-1A DeLong Corporation was organized on January 1, 2017. It is authorized to issue 10,000 shares of 8%, \$100 par value preferred stock, and 500,000 shares of no-par common stock with a stated value of \$2 per share. The following stock transactions were completed during the first year.

- Jan. 10 Issued 80,000 shares of common stock for cash at \$4 per share.
- Mar. 1 Issued 5,000 shares of preferred stock for cash at \$105 per share.
- Apr. 1 Issued 24,000 shares of common stock for land. The asking price of the land was \$90,000. The fair value of the land was \$85,000.
- May 1 Issued 80,000 shares of common stock for cash at \$4.50 per share.
- Aug. 1 Issued 10,000 shares of common stock to attorneys in payment of their bill of \$30,000 for services performed in helping the company organize.
- Sept. 1 Issued 10,000 shares of common stock for cash at \$5 per share.
- Nov. 1 Issued 1,000 shares of preferred stock for cash at \$109 per share.

Instructions

- Journalize the transactions.
- Post to the stockholders' equity accounts. (Use J5 as the posting reference.)
- Prepare the paid-in capital section of stockholders' equity at December 31, 2017.

(c) Total paid-in capital
\$1,479,000

Journalize and post treasury stock transactions, and prepare stockholders' equity section.

(LO 3, 6)

P11-2A Fechter Corporation had the following stockholders' equity accounts on January 1, 2017: Common Stock (\$5 par) \$500,000, Paid-in Capital in Excess of Par—Common Stock \$200,000, and Retained Earnings \$100,000. In 2017, the company had the following treasury stock transactions.

- Mar. 1 Purchased 5,000 shares at \$8 per share.
- June 1 Sold 1,000 shares at \$12 per share.
- Sept. 1 Sold 2,000 shares at \$10 per share.
- Dec. 1 Sold 1,000 shares at \$7 per share.

Fechter Corporation uses the cost method of accounting for treasury stock. In 2017, the company reported net income of \$30,000.

Instructions

- (a) Journalize the treasury stock transactions, and prepare the closing entry at December 31, 2017, for net income.
- (b) Open accounts for (1) Paid-in Capital from Treasury Stock, (2) Treasury Stock, and (3) Retained Earnings. Post to these accounts using J10 as the posting reference.
- (c) Prepare the stockholders' equity section for Fechter Corporation at December 31, 2017.

(b) Treasury Stock \$8,000
(c) Total stockholders' equity \$829,000

P11-3A The stockholders' equity accounts of Castle Corporation on January 1, 2017, were as follows.

Preferred Stock (8%, \$50 par, cumulative, 10,000 shares authorized)	\$ 400,000
Common Stock (\$1 stated value, 2,000,000 shares authorized)	1,000,000
Paid-in Capital in Excess of Par—Preferred Stock	100,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,450,000
Retained Earnings	1,816,000
Treasury Stock (10,000 common shares)	50,000

Journalize and post transactions, and prepare stockholders' equity section.

(LO 2, 3, 6)

During 2017, the corporation had the following transactions and events pertaining to its stockholders' equity.

- Feb. 1 Issued 25,000 shares of common stock for \$120,000.
- Apr. 14 Sold 6,000 shares of treasury stock—common for \$33,000.
- Sept. 3 Issued 5,000 shares of common stock for a patent valued at \$35,000.
- Nov. 10 Purchased 1,000 shares of common stock for the treasury at a cost of \$6,000.
- Dec. 31 Determined that net income for the year was \$452,000.

No dividends were declared during the year.

Instructions

- (a) Journalize the transactions and the closing entry for net income.
- (b) Enter the beginning balances in the accounts, and post the journal entries to the stockholders' equity accounts. (Use J5 for the posting reference.)
- (c) Prepare a stockholders' equity section at December 31, 2017, including the disclosure of the preferred dividends in arrears.

(c) Total stockholders' equity \$5,350,000

P11-4A On January 1, 2017, Geoffrey Corporation had the following stockholders' equity accounts.

Common Stock (\$20 par value, 60,000 shares issued and outstanding)	\$1,200,000
Paid-in Capital in Excess of Par—Common Stock	200,000
Retained Earnings	600,000

Prepare dividend entries and stockholders' equity section.

(LO 4, 5, 6)

During the year, the following transactions occurred.

- Feb. 1 Declared a \$1 cash dividend per share to stockholders of record on February 15, payable March 1.
- Mar. 1 Paid the dividend declared in February.
- Apr. 1 Announced a 2-for-1 stock split. Prior to the split, the market price per share was \$36.
- July 1 Declared a 10% stock dividend to stockholders of record on July 15, distributable July 31. On July 1, the market price of the stock was \$13 per share.
- 31 Issued the shares for the stock dividend.
- Dec. 1 Declared a \$0.50 per share dividend to stockholders of record on December 15, payable January 5, 2018.
- 31 Determined that net income for the year was \$350,000.

Instructions

- (a) Journalize the transactions and the closing entries for net income and dividends.
- (b) Enter the beginning balances, and post the entries to the stockholders' equity accounts. (Note: Open additional stockholders' equity accounts as needed.)
- (c) Prepare a stockholders' equity section at December 31.

(c) Total stockholders' equity \$2,224,000

Prepare retained earnings statement and stockholders' equity section, and compute allocation of dividends.

(LO 4, 5, 6)

P11-5A The post-closing trial balance of Storey Corporation at December 31, 2017, contains the following stockholders' equity accounts.

Preferred Stock (15,000 shares issued)	\$ 750,000
Common Stock (250,000 shares issued)	2,500,000
Paid-in Capital in Excess of Par—Preferred Stock	250,000
Paid-in Capital in Excess of Par—Common Stock	400,000
Common Stock Dividends Distributable	250,000
Retained Earnings	1,042,000

A review of the accounting records reveals the following.

- No errors have been made in recording 2017 transactions or in preparing the closing entry for net income.
- Preferred stock is \$50 par, 6%, and cumulative; 15,000 shares have been outstanding since January 1, 2016.
- Authorized stock is 20,000 shares of preferred, 500,000 shares of common with a \$10 par value.
- The January 1 balance in Retained Earnings was \$1,170,000.
- On July 1, 20,000 shares of common stock were issued for cash at \$16 per share.
- On September 1, the company discovered an understatement error of \$90,000 in computing depreciation in 2016, which overstated net income. The net of tax effect of \$63,000 was properly debited directly to Retained Earnings.
- A cash dividend of \$250,000 was declared and properly allocated to preferred and common stock on October 1. No dividends were paid to preferred stockholders in 2016.
- On December 31, a 10% common stock dividend was declared out of retained earnings on common stock when the market price per share was \$16.
- Net income for the year was \$585,000.
- On December 31, 2017, the directors authorized disclosure of a \$200,000 restriction of retained earnings for plant expansion. (Use Note X.)

Instructions

- Reproduce the Retained Earnings account (T-account) for 2017.
- Prepare a retained earnings statement for 2017.
- Prepare a stockholders' equity section at December 31, 2017.
- Compute the allocation of the cash dividend to preferred and common stock.

(c) Total stockholders' equity
\$5,192,000

Prepare entries for stock transactions and prepare stockholders' equity section.

(LO 2, 3, 4, 5, 6)

P11-6A Irwin Corporation has been authorized to issue 20,000 shares of \$100 par value, 10%, noncumulative preferred stock and 1,000,000 shares of no-par common stock. The corporation assigned a \$2.50 stated value to the common stock. At December 31, 2017, the ledger contained the following balances pertaining to stockholders' equity.

Preferred Stock	\$ 120,000
Paid-in Capital in Excess of Par—Preferred Stock	20,000
Common Stock	1,000,000
Paid-in Capital in Excess of Stated Value—Common Stock	1,800,000
Treasury Stock (1,000 common shares)	11,000
Paid-in Capital from Treasury Stock	1,500
Retained Earnings	82,000

The preferred stock was issued for land having a fair value of \$140,000. All common stock issued was for cash. In November, 1,500 shares of common stock were purchased for the treasury at a per share cost of \$11. In December, 500 shares of treasury stock were sold for \$14 per share. No dividends were declared in 2017.

Instructions

- Prepare the journal entries for the:
 - Issuance of preferred stock for land.
 - Issuance of common stock for cash.
 - Purchase of common treasury stock for cash.
 - Sale of treasury stock for cash.
- Prepare the stockholders' equity section at December 31, 2017.

(b) Total stockholders' equity
\$3,012,500

P11-7A On January 1, 2017, Primo Corporation had the following stockholders' equity accounts. *Prepare dividend entries and stockholders' equity section.*

Common Stock (\$10 par value, 75,000 shares issued and outstanding)	\$750,000	(LO 4, 5, 6)
Paid-in Capital in Excess of Par—Common Stock	200,000	
Retained Earnings	540,000	

During the year, the following transactions occurred.

- Jan. 15 Declared a \$1 cash dividend per share to stockholders of record on January 31, payable February 15.
- Feb. 15 Paid the dividend declared in January.
- Apr. 15 Declared a 10% stock dividend to stockholders of record on April 30, distributable May 15. On April 15, the market price of the stock was \$14 per share.
- May 15 Issued the shares for the stock dividend.
- July 1 Announced a 2-for-1 stock split. The market price per share prior to the announcement was \$15. (The new par value is \$5.)
- Dec. 1 Declared a \$0.60 per share cash dividend to stockholders of record on December 15, payable January 10, 2018.
- 31 Determined that net income for the year was \$250,000.

Instructions

- (a) Journalize the transactions and the closing entries for net income and dividends.
- (b) Enter the beginning balances, and post the entries to the stockholders' equity accounts. *(Note: Open additional stockholders' equity accounts as needed.)*
- (c) Prepare a stockholders' equity section at December 31. **(c) Total stockholders' equity \$1,566,000**

***P11-8A** The following stockholders' equity accounts arranged alphabetically are in the ledger of Westin Corporation at December 31, 2017. *Prepare stockholders' equity section; compute book value per share.*

Common Stock (\$10 stated value)	\$1,500,000	(LO 6, 8)
Paid-in Capital from Treasury Stock	6,000	
Paid-in Capital in Excess of Par—Preferred Stock	42,400	
Paid-in Capital in Excess of Stated Value—Common Stock	690,000	
Preferred Stock (8%, \$100 par, noncumulative)	360,000	
Retained Earnings	776,000	
Treasury Stock—Common (7,000 shares)	92,000	

Instructions

- (a) Prepare a stockholders' equity section at December 31, 2017. **(a) Total stockholders' equity \$3,282,400**
- (b) Compute the book value per share of the common stock, assuming the preferred stock has a call price of \$110 per share.

***P11-9A** On January 1, 2017, Goodhue Inc. had the following stockholders' equity balances. *Prepare stockholders' equity statement.*

Common Stock (400,000 shares issued)	\$800,000	(LO 6, 7)
Paid-in Capital in Excess of Par—Common Stock	500,000	
Common Stock Dividends Distributable	120,000	
Retained Earnings	600,000	

During 2017, the following transactions and events occurred.

- Issued 60,000 shares of \$2 par value common stock as a result of 15% stock dividend declared on December 15, 2016.
- Issued 30,000 shares of common stock for cash at \$4 per share.
- Purchased 25,000 shares of common stock for the treasury at \$5 per share.
- Declared and paid a cash dividend of \$111,000.
- Sold 8,000 shares of treasury stock for cash at \$5 per share.
- Earned net income of \$360,000.

Instructions

Prepare a stockholders' equity statement for the year. **Total stockholders' equity \$2,304,000**

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 10.)

CC11 After establishing their company's fiscal year-end to be October 31, Natalie and Curtis began operating Cookie & Coffee Creations Inc. on November 1, 2017. On that date, they issued both preferred and common stock. After the first year of operations, Natalie and Curtis want to prepare financial information for the year.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE**FINANCIAL REPORTING AND ANALYSIS****Financial Reporting Problem: Apple Inc.**

BYP11-1 The stockholders' equity section for **Apple Inc.** is shown in Appendix A. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

- What is the par or stated value per share of Apple's common stock?
- What percentage of Apple's authorized common stock was issued at September 28, 2013?
- What amount, if any, did Apple declare in dividends on common stock in the year ended September 28, 2013?

**Comparative Analysis Problem:
PepsiCo, Inc. vs. The Coca-Cola Company**

BYP11-2 **PepsiCo, Inc.**'s financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- What percentage of authorized shares was issued by Coca-Cola at December 31, 2013, and by PepsiCo at December 28, 2013?
- How many shares are held as treasury stock by Coca-Cola at December 31, 2013, and by PepsiCo at December 28, 2013?
- How many Coca-Cola common shares are outstanding at December 31, 2013? How many PepsiCo shares of common stock are outstanding at December 28, 2013?
- Compute earnings per share and return on common stockholders' equity for both companies for 2013. Assume PepsiCo's weighted-average shares were 1,541 million and Coca-Cola's weighted-average shares were 4,568 million. Can these measures be used to compare the profitability of the two companies? Why or why not?
- What was the total amount of dividends paid by each company in 2013?

**Comparative Analysis Problem:
Amazon.com, Inc. vs. Wal-Mart Stores, Inc.**

BYP11-3 **Amazon.com, Inc.**'s financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively. Wal-Mart has 11,000 million shares authorized.

Instructions

- What percentage of authorized shares was issued by Amazon at December 31, 2013, and by Wal-Mart at January 31, 2014?
- How many shares are held as treasury stock by Amazon at December 31, 2013, and by Wal-Mart at January 31, 2014?
- How many Amazon common shares are outstanding at December 31, 2013? How many Wal-Mart shares of common stock are outstanding at January 31, 2014?
- What are the basic earnings per share for both Amazon and Wal-Mart as of December 31, 2013, and January 31, 2014, respectively?
- What was the total amount of dividends, if any, paid by Amazon for the year ending December 31, 2013? What was the total dividends paid by Wal-Mart for the year ending January 31, 2014?

Real-World Focus

BYP11-4 Use the stockholders' equity section of an annual report and identify the major components.

Address: www.annualreports.com, or go to www.wiley.com/college/weygandt

Steps

- From the Annual Reports Homepage, choose **Search by Alphabet**, and choose a letter.
- Select a particular company.
- Choose Annual Report.
- Follow instructions below.

Instructions

Answer the following questions.

- What is the company's name?
- What classes of capital stock has the company issued?
- For each class of stock:
 - How many shares are authorized, issued, and/or outstanding?
 - What is the par value?
- What are the company's retained earnings?
- Has the company acquired treasury stock? How many shares?

CRITICAL THINKING**Decision-Making Across the Organization**

BYP11-5 The stockholders' meeting for Percival Corporation has been in progress for some time. The chief financial officer for Percival is presently reviewing the company's financial statements and is explaining the items that comprise the stockholders' equity section of the balance sheet for the current year. The stockholders' equity section of Percival Corporation at December 31, 2017, is as follows.

PERCIVAL CORPORATION
Balance Sheet (partial)
December 31, 2017

Paid-in capital			
Capital stock			
Preferred stock, authorized 1,000,000 shares cumulative, \$100 par value, \$8 per share, 6,000 shares issued and outstanding		\$	600,000
Common stock, authorized 5,000,000 shares, \$1 par value, 3,000,000 shares issued, and 2,700,000 outstanding			3,000,000
Total capital stock			3,600,000
Additional paid-in capital			
In excess of par—preferred stock	\$	50,000	
In excess of par—common stock		25,000,000	
Total additional paid-in capital			25,050,000
Total paid-in capital			28,650,000
Retained earnings			
Total paid-in capital and retained earnings			29,550,000
Less: Treasury stock (300,000 common shares)			9,300,000
Total stockholders' equity			\$20,250,000

At the meeting, stockholders have raised a number of questions regarding the stockholders' equity section.

Instructions

With the class divided into groups, answer the following questions as if you were the chief financial officer for Percival Corporation.

- “What does the cumulative provision related to the preferred stock mean?”
- “I thought the common stock was presently selling at \$29.75, but the company has the stock stated at \$1 per share. How can that be?”
- “Why is the company buying back its common stock? Furthermore, the treasury stock has a debit balance because it is subtracted from stockholders' equity. Why is treasury stock not reported as an asset if it has a debit balance?”

Communication Activity

BYP11-6 Joe Moyer, your uncle, is an inventor who has decided to incorporate. Uncle Joe knows that you are an accounting major at U.N.O. In a recent letter to you, he ends with the question, “I'm filling out a state incorporation application. Can you tell me the difference in the following terms: (1) authorized stock, (2) issued stock, (3) outstanding stock, and (4) preferred stock?”

Instructions

In a brief note, differentiate for Uncle Joe among the four different stock terms. Write the letter to be friendly, yet professional.

Ethics Case

BYP11-7 The R&D division of Piqua Chemical Corp. has just developed a chemical for sterilizing the vicious Brazilian “killer bees” which are invading Mexico and the southern United States. The president of the company is anxious to get the chemical on the market to boost the company's profits. He believes his job is in jeopardy because of decreasing sales and profits. The company has an opportunity to sell this chemical in Central American countries, where the laws are much more relaxed than in the United States.

The director of Piqua's R&D division strongly recommends further testing in the laboratory for side-effects of this chemical on other insects, birds, animals, plants, and even humans. He cautions the president, “We could be sued from all sides if the chemical has tragic side-effects that we didn't even test for in the labs.” The president answers, “We can't wait an additional year for your lab tests. We can avoid losses from such lawsuits by establishing a separate wholly owned corporation to shield Piqua Corp. from such lawsuits. We can't lose any more than our investment in the new corporation, and we'll invest in just the patent covering this chemical. We'll reap the benefits if the chemical works and is safe, and avoid the losses from lawsuits if it's a disaster.” The following week, Piqua creates a new wholly owned corporation called Finlay Inc., sells the chemical patent to it for \$10, and watches the spraying begin.

Instructions

- Who are the stakeholders in this situation?
- Are the president's motives and actions ethical?
- Can Piqua shield itself against losses of Finlay Inc.?

All About You

BYP11-8 A high percentage of Americans own stock in corporations. As a shareholder in a corporation, you will receive an annual report. One of the goals of this course is for you to learn how to navigate your way around an annual report.

Instructions

Use **Apple's** 2013 annual report (see Appendix A) to answer the following questions.

- What CPA firm performed the audit of Apple's financial statements?
- What was the amount of Apple's earnings per share in 2013?
- What were net sales in 2013?
- How much cash did Apple spend on capital expenditures in 2013?
- Over what life does the company depreciate its buildings?
- What were the proceeds from issuance of common stock in 2013?

FASB Codification Activity

BYP11-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- What is the stock dividend?
- What is a stock split?
- At what percentage point does the issuance of additional shares qualify as a stock dividend, as opposed to a stock split?

A Look at IFRS

LEARNING
OBJECTIVE

9

Compare the accounting for stockholders' equity under GAAP and IFRS.

The accounting for transactions related to stockholders' equity, such as issuance of shares and purchase of treasury stock, are similar under both IFRS and GAAP. Major differences relate to terminology used, introduction of items such as revaluation surplus, and presentation of stockholders' equity information.

Key Points

Following are the key similarities and differences between GAAP and IFRS as related to stockholders' equity, dividends, retained earnings, and income reporting.

Similarities

- Aside from the terminology used, the accounting transactions for the issuance of shares and the purchase of treasury stock are similar.
- Like GAAP, IFRS does not allow a company to record gains or losses on purchases of its own shares.
- The accounting related to prior period adjustment is essentially the same under IFRS and GAAP.
- The income statement using IFRS is called the **statement of comprehensive income**. A statement of comprehensive income is presented in a one- or two-statement format. The single-statement approach includes all items of income and expense, as well as each component of other comprehensive income or loss by its individual characteristic. In the two-statement approach, a traditional income statement is prepared. It is then followed by a statement of comprehensive income, which starts with net income or loss and then adds other comprehensive income or loss items. Regardless of which approach is reported, income tax expense is required to be reported.
- The computations related to earnings per share are essentially the same under IFRS and GAAP.

Differences

- Under IFRS, the term **reserves** is used to describe all equity accounts other than those arising from contributed (paid-in) capital. This would include, for example, reserves related to retained earnings, asset revaluations, and fair value differences.
- Many countries have a different mix of investor groups than in the United States. For example, in Germany, financial institutions like banks are not only major creditors of corporations but often are the largest corporate stockholders as well. In the United States, Asia, and the United Kingdom, many companies rely on substantial investment from private investors.
- There are often terminology differences for equity accounts. The following summarizes some of the common differences in terminology.

GAAP	IFRS
Common stock	Share capital—ordinary
Stockholders	Shareholders
Par value	Nominal or face value
Authorized stock	Authorized share capital
Preferred stock	Share capital—preference
Paid-in capital	Issued/allocated share capital
Paid-in capital in excess of par—common stock	Share premium—ordinary
Paid-in capital in excess of par—preferred stock	Share premium—preference
Retained earnings	Retained earnings or Retained profits
Retained earnings deficit	Accumulated losses
Accumulated other comprehensive income	General reserve and other reserve accounts

As an example of how similar transactions use different terminology under IFRS, consider the accounting for the issuance of 1,000 shares of \$1 par value common stock for \$5 per share. Under IFRS, the entry is as follows.

Cash	5,000	
Share Capital—Ordinary		1,000
Share Premium—Ordinary		4,000

- A major difference between IFRS and GAAP relates to the account Revaluation Surplus. Revaluation surplus arises under IFRS because companies are permitted to revalue their property, plant, and equipment to fair value under certain circumstances. This account is part of general reserves under IFRS and is not considered contributed capital.
- IFRS often uses terms such as **retained profits** or **accumulated profit or loss** to describe retained earnings. The term retained earnings is also often used.
- Equity is given various descriptions under IFRS, such as shareholders' equity, owners' equity, capital and reserves, and shareholders' funds.

Looking to the Future

The IASB and the FASB are currently working on a project related to financial statement presentation. An important part of this study is to determine whether certain line items, subtotals, and totals should be clearly defined and required to be displayed in the financial statements. For example, it is likely that the statement of stockholders' equity and its presentation will be examined closely.

Both the IASB and FASB are working toward convergence of any remaining differences related to earnings per share computations. This convergence will deal with highly technical changes beyond the scope of this textbook.

IFRS Practice

IFRS Self-Test Questions

- Which of the following is **true**?
 - In the United States, the primary corporate stockholders are financial institutions.
 - Share capital means total assets under IFRS.
 - The IASB and FASB are presently studying how financial statement information should be presented.
 - The accounting for treasury stock differs extensively between GAAP and IFRS.
- Under IFRS, the amount of capital received in excess of par value would be credited to:
 - Retained Earnings.
 - Contributed Capital.
 - Share Premium.
 - Par value is not used under IFRS.
- Which of the following is **false**?
 - Under GAAP, companies cannot record gains on transactions involving their own shares.
 - Under IFRS, companies cannot record gains on transactions involving their own shares.
 - Under IFRS, the statement of stockholders' equity is a required statement.
 - Under IFRS, a company records a revaluation surplus when it experiences an increase in the price of its common stock.
- Which of the following does **not** represent a pair of GAAP/IFRS-comparable terms?
 - Additional paid-in capital/Share premium.
 - Treasury stock/Repurchase reserve.
 - Common stock/Share capital.
 - Preferred stock/Preference shares.

5. The basic accounting for cash dividends and stock dividends:
 - (a) is different under IFRS versus GAAP.
 - (b) is the same under IFRS and GAAP.
 - (c) differs only for the accounting for cash dividends between GAAP and IFRS.
 - (d) differs only for the accounting for stock dividends between GAAP and IFRS.
6. Which item is **not** considered part of reserves?
 - (a) Unrealized loss on available-for-sale investments.
 - (b) Revaluation surplus.
 - (c) Retained earnings.
 - (d) Issued shares.
7. Under IFRS, a statement of comprehensive income must include:
 - (a) accounts payable.
 - (b) retained earnings.
 - (c) income tax expense.
 - (d) preference stock.
8. Which set of terms can be used to describe total stockholders' equity under IFRS?
 - (a) Shareholders' equity, capital and reserves, other comprehensive income.
 - (b) Capital and reserves, shareholders' equity, shareholders' funds.
 - (c) Capital and reserves, retained earnings, shareholders' equity.
 - (d) All of the answer choices are correct.
9. Earnings per share computations related to IFRS and GAAP:
 - (a) are essentially similar.
 - (b) result in an amount referred to as earnings per share.
 - (c) must deduct preferred (preference) dividends when computing earnings per share.
 - (d) All of the answer choices are correct.

IFRS Exercises

IFRS11-1 On May 10, Jaurez Corporation issues 1,000 shares of \$10 par value ordinary shares for cash at \$18 per share. Journalize the issuance of the shares.

IFRS11-2 Meenen Corporation has the following accounts at December 31 (in euros): Share Capital—Ordinary, €10 par, 5,000 shares issued, €50,000; Share Premium—Ordinary €10,000; Retained Earnings €45,000; and Treasury Shares—Ordinary, 500 shares, €11,000. Prepare the equity section of the statement of financial position (balance sheet).

IFRS11-3 Overton Co. had the following transactions during the current period.

- Mar. 2 Issued 5,000 shares of \$1 par value ordinary shares to attorneys in payment of a bill for \$30,000 for services performed in helping the company to incorporate.
- June 12 Issued 60,000 shares of \$1 par value ordinary shares for cash of \$375,000.
- July 11 Issued 1,000 shares of \$100 par value preference shares for cash at \$110 per share.
- Nov. 28 Purchased 2,000 treasury shares for \$80,000.

Instructions

Journalize the above transactions.

International Financial Reporting Problem: Louis Vuitton

IFRS11-4 The financial statements of **Louis Vuitton** are presented in Appendix F. Instructions for accessing and using the company's complete annual report, including the notes to its financial statements, are also provided in Appendix F.

Instructions

Use the company's annual report to answer the following questions.

- (a) Determine the following amounts at December 31, 2013: (1) total equity, (2) total revaluation reserve, and (3) number of treasury shares.
- (b) Examine the equity section of the company's balance sheet. For each of the following, provide the comparable label that would be used under GAAP: (1) share capital, (2) share premium, and (3) net profit, group share.
- (c) Did the company declare and pay any dividends for the year ended December 31, 2013?
- (d) Compute the company's return on ordinary shareholders' equity for the year ended December 31, 2013.
- (e) What was Louis Vuitton's earnings per share for the year ended December 31, 2013?

Investments

CHAPTER PREVIEW Time Warner's management, as the Feature Story below indicates, believes in aggressive growth through investing in the stock of existing companies. Besides purchasing stock, companies also purchase other securities such as bonds issued by corporations or by governments. Companies can make investments for a short or long period of time, as a passive investment, or with the intent to control another company. As you will see in this chapter, the way in which a company accounts for its investments is determined by a number of factors.

FEATURE STORY

"Is There Anything Else We Can Buy?"

In a rapidly changing world, you must keep up or suffer the consequences. In business, change requires investment.

A case in point is found in the entertainment industry. Technology is bringing about innovations so quickly that it is nearly impossible to guess which will last and which will soon fade away. For example, will both satellite TV and cable TV survive? Or, will both be replaced by something else?

Consider the publishing industry as well. Will paper newspapers and magazines be replaced completely by online news? If you are a publisher, you have to make your best guess about what the future holds and invest accordingly.

Time Warner Inc. lives at the center of this arena. It is not an environment for the timid, and Time Warner's philosophy is anything but that. Instead, it might be characterized as, "If we can't beat you, we will buy you." Its mantra is "invest, invest, invest." A partial list of Time Warner's holdings gives an idea of its reach:

Magazines: *People, Time, Life, Sports Illustrated, and Fortune.*

Book publishers: Time-Life Books; Book-of-the-Month Club; Little, Brown & Co; and Sunset Books.

Television and movies: Warner Bros. ("The Big Bang Theory" and "The Mentalist"), HBO, and movies like *The Hobbit: The Battle of the Five Armies* and *Into the Storm*.

Broadcasting: TNT, CNN news, and Turner's library of thousands of classic movies.

Internet: America Online and AOL Anywhere.

Time Warner owns more information and entertainment copyrights and brands than any other company in the world.

Recently, Rupert Murdoch, chairman and CEO of **21st Century Fox**, made an unsolicited \$80 billion offer to buy the major media conglomerate. Murdoch's bid put "a positive light on Time Warner's assets," says one analyst. Murdoch eventually withdrew his bid, which resulted in driving down Time Warner's stock price. However, analysts expect the stock to eventually rebound as the long-term institutional investors start taking advantage of the lower price.

Source: Gene Marcial, "Why Time Warner Will Deliver Superb Growth and Valuation Despite Murdoch's Surrender," *Forbes* (August 6, 2014).

Visit **WILEYPLUS with ORION** for additional tutorials and practice opportunities.

Why Corporations Invest

Corporations purchase investments in debt or stock securities generally for one of three reasons. First, a corporation may **have excess cash** that it does not need for the immediate purchase of operating assets. For example, many companies experience seasonal fluctuations in sales. A Cape Cod marina has more sales in the spring and summer than in the fall and winter. The reverse is true for an Aspen ski shop. Thus, at the end of an operating cycle, many companies may have cash on hand that is temporarily idle until the start of another operating cycle. These companies may invest the excess funds to earn—through interest and dividends—a greater return than they would get by just holding the funds in the bank. Illustration 12-1 shows the role that such temporary investments play in the operating cycle.

Illustration 12-1

Temporary investments and the operating cycle

A second reason some companies such as banks purchase investments is to generate **earnings from investment income**. Although banks make most of their earnings by lending money, they also generate earnings by investing primarily in debt securities. Banks purchase investment securities because loan demand varies both seasonally and with changes in the economic climate. Thus, when loan demand is low, a bank must find other uses for its cash.

Some companies attempt to generate investment income through speculative investments. That is, they are speculating that the investment will increase in value and thus result in positive returns. Therefore, they invest mostly in the common stock of other corporations.

Third, companies also invest for **strategic reasons**. A company may purchase a noncontrolling interest in another company in a related industry in which it wishes to establish a presence. Or, a company can exercise some influence over one of its customers or suppliers by purchasing a significant, but not controlling, interest in that company. Another option is for a corporation to purchase a controlling interest in another company in order to enter a new industry without incurring the costs and risks associated with starting from scratch.

In summary, businesses invest in other companies for the reasons shown in Illustration 12-2.

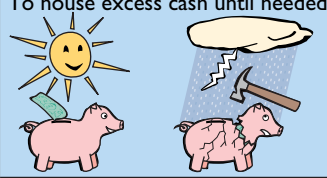

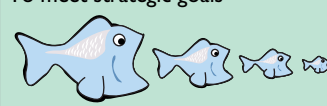

Reason	Typical Investment
To house excess cash until needed 	Low-risk, highly liquid, short-term securities such as government-issued securities
To generate earnings 	Debt securities (banks and other financial institutions) and stock securities (mutual funds and pension funds)
To meet strategic goals 	Stocks of companies in a related industry or in an unrelated industry that the company wishes to enter

Illustration 12-2
Why corporations invest

Accounting for Debt Investments

Debt investments are investments in government and corporation bonds. In accounting for debt investments, companies make entries to record (1) the acquisition, (2) the interest revenue, and (3) the sale.

RECORDING ACQUISITION OF BONDS

At acquisition, debt investments are recorded at cost. Cost includes all expenditures necessary to acquire these investments, such as the price paid plus brokerage fees (commissions), if any.

For example, assume that Kuhl Corporation acquires 50 Doan Inc. 8%, 10-year, \$1,000 bonds on January 1, 2017, for \$50,000. Kuhl records the investment as:

Jan. 1	Debt Investments (50 × \$1,000)	50,000	
	Cash		50,000
	(To record purchase of 50 Doan Inc. bonds)		

A	=	L	+	SE
+50,000				
-50,000				
<hr/>				
Cash Flows				
-50,000				

RECORDING BOND INTEREST

The Doan Inc. bonds pay interest of \$4,000 annually on January 1 (\$50,000 × 8%). If Kuhl Corporation's fiscal year ends on December 31, it accrues the interest of \$4,000 earned since January 1. The adjusting entry is:

Dec. 31	Interest Receivable	4,000	
	Interest Revenue		4,000
	(To accrue interest on Doan Inc. bonds)		

A	=	L	+	SE
+4,000				
				+4,000 Rev
<hr/>				
Cash Flows				
no effect				

Kuhl reports Interest Receivable as a current asset in the balance sheet. It reports Interest Revenue under "Other revenues and gains" in the income statement.

Kuhl reports receipt of the interest on January 1 as follows.

Jan. 1	Cash	4,000	
	Interest Receivable		4,000
	(To record receipt of accrued interest)		

A	=	L	+	SE
+4,000				
-4,000				
<hr/>				
Cash Flows				
+4,000				

A credit to Interest Revenue at this time is incorrect because the company earned and accrued interest revenue in the **preceding** accounting period.

RECORDING SALE OF BONDS

When Kuhl sells the bonds, it credits the investment account for the cost of the bonds. Kuhl records as a gain or loss any difference between the net proceeds from the sale (sales price less brokerage fees) and the cost of the bonds.

Assume, for example, that Kuhl Corporation receives net proceeds of \$54,000 on the sale of the Doan Inc. bonds on January 1, 2018, after receiving the interest due. Since the securities cost \$50,000, the company realizes a gain of \$4,000. It records the sale as:

A	=	L	+	SE	
+54,000					
-50,000					
				+4,000 Rev	
Cash Flows					
+54,000					

Jan. 1	Cash	54,000	
	Debt Investments		50,000
	Gain on Sale of Debt Investments		4,000
	(To record sale of Doan Inc. bonds)		

Kuhl reports the gain on sale of debt investments under “Other revenues and gains” in the income statement and reports losses under “Other expenses and losses.”

Investor Insight

© Jane0606/Shutterstock

Hey, I Thought It Was Safe!

It is often stated that bond investments are safer than stock investments. After all, with an investment in bonds, you are guaranteed return of principal and interest payments over

the life of the bonds. However, here are some other factors you may want to consider:

- In 2013, the value of bonds fell by 2% due to interest rate risk. That is, when interest rates rise, it makes the yields paid on existing bonds less attractive. As a result, the price of the existing bond you are holding falls.
- While interest rates are currently low, it is likely that they will increase in the future. If you hold bonds,

there is a real possibility that the value of your bonds will be reduced.

- Credit risk also must be considered. Credit risk means that a company may not be able to pay back what it borrowed. Former bondholders in companies like **General Motors**, **United Air Lines**, and **Eastman Kodak** saw their bond values drop substantially when these companies declared bankruptcy.

An advantage of a bond investment over stock is that if you hold it to maturity, you will receive your principal and also interest payments over the life of the bond. But if you have to sell your bond investment before maturity, you may be facing a roller coaster regarding its value.

Why is the fluctuating value of bonds of concern if a company intends to hold them until maturity? (Go to **WileyPLUS** for this answer and additional questions.)

DO IT!

1

Debt Investments

Waldo Corporation had the following transactions pertaining to debt investments.

- Jan. 1, 2017 Purchased 30, \$1,000 Hillary Co. 10% bonds for \$30,000. Interest is payable annually on January 1.
- Dec. 31, 2017 Accrued interest on Hillary Co. bonds in 2017.
- Jan. 1, 2018 Received interest on Hillary Co. bonds.
- Jan. 1, 2018 Sold 15 Hillary Co. bonds for \$14,600.
- Dec. 31, 2018 Accrued interest on Hillary Co. bonds in 2018.

Journalize the transactions.

Solution

Jan. 1 (2017)	Debt Investments Cash (To record purchase of 30 Hillary Co. bonds)	30,000	30,000
Dec. 31 (2017)	Interest Receivable Interest Revenue (\$30,000 × 10%) (To accrue interest on Hillary Co. bonds)	3,000	3,000

Jan. 1 (2018)	Cash Interest Receivable (To record receipt of interest on Hillary Co. bonds)	3,000	3,000
Jan. 1 (2018)	Cash Loss on Sale of Debt Investments Debt Investments ($\$30,000 \times 15/30$) (To record sale of 15 Hillary Co. bonds)	14,600 400	15,000
Dec. 31 (2018)	Interest Receivable Interest Revenue ($\$15,000 \times 10\%$) (To accrue interest on Hillary Co. bonds)	1,500	1,500

Action Plan

- ✓ Record bond investments at cost.
- ✓ Record interest when accrued.
- ✓ When bonds are sold, credit the investment account for the cost of the bonds.
- ✓ Record any difference between the cost and the net proceeds as a gain or loss.

Related exercise material: **BE12-1, E12-2, E12-3, and DOB 12-1.**

LEARNING OBJECTIVE

2

Explain how to account for stock investments.

Stock investments are investments in the capital stock of other corporations. When a company holds stock (and/or debt) of several different corporations, the group of securities is identified as an **investment portfolio**.

The accounting for investments in common stock depends on the extent of the investor's influence over the operating and financial affairs of the issuing corporation (the **investee**). Illustration 12-3 shows the general guidelines.

Investor's Ownership Interest in Investee's Common Stock	Presumed Influence on Investee	Accounting Guidelines
 Less than 20%	Insignificant	Cost method
 Between 20% and 50%	Significant	Equity method
 More than 50%	Controlling	Consolidated financial statements

Illustration 12-3

Accounting guidelines for stock investments

Companies are required to use judgment instead of blindly following the guidelines.¹ We explain the application of each guideline next.

Holdings of Less than 20%

In accounting for stock investments of less than 20%, companies use the cost method. Under the **cost method**, companies record the investment at cost and recognize revenue only when cash dividends are received.

Helpful Hint

The entries for investments in common stock also apply to investments in preferred stock.

¹Among the questions that are considered in determining an investor's influence are these: (1) Does the investor have representation on the investee's board? (2) Does the investor participate in the investee's policy-making process? (3) Are there material transactions between the investor and investee? (4) Is the common stock held by other stockholders concentrated or dispersed?

RECORDING ACQUISITION OF STOCK INVESTMENTS

At acquisition, stock investments are recorded at cost. Cost includes all expenditures necessary to acquire these investments, such as the price paid plus any brokerage fees (commissions), if any.

For example, assume that on July 1, 2017, Sanchez Corporation acquires 1,000 shares (10% ownership) of Beal Corporation common stock. Sanchez pays \$40 per share. The entry for the purchase is:

A	=	L	+	SE
+40,000				
-40,000				
Cash Flows				
-40,000				

July 1	Stock Investments (1,000 × \$40)	40,000	40,000
	Cash		
	(To record purchase of 1,000 shares of Beal Corporation common stock)		

RECORDING DIVIDENDS

During the time Sanchez owns the stock, it makes entries for any cash dividends received. If Sanchez receives a \$2 per share dividend on December 31, the entry is:

A	=	L	+	SE
+2,000				
				+2,000 Rev
Cash Flows				
+2,000				

Dec. 31	Cash (1,000 × \$2)	2,000	2,000
	Dividend Revenue		
	(To record receipt of a cash dividend)		

Sanchez reports Dividend Revenue under “Other revenues and gains” in the income statement. Unlike interest on notes and bonds, dividends do not accrue. Therefore, companies do not make adjusting entries to accrue dividends.

RECORDING SALE OF STOCK

When a company sells a stock investment, it recognizes as a gain or a loss the difference between the net proceeds from the sale (sales price less brokerage fees) and the cost of the stock.

Assume that Sanchez Corporation receives net proceeds of \$39,000 on the sale of its Beal stock on February 10, 2018. Because the stock cost \$40,000, Sanchez incurred a loss of \$1,000. The entry to record the sale is:

A	=	L	+	SE
+39,000				
				-1,000 Exp
-40,000				
Cash Flows				
+39,000				

Feb. 10	Cash	39,000	40,000
	Loss on Sale of Stock Investments	1,000	
	Stock Investments		
	(To record sale of Beal common stock)		

Sanchez reports the loss under “Other expenses and losses” in the income statement. It would show a gain on sale under “Other revenues and gains.”

Holdings Between 20% and 50%

When an investor company owns only a small portion of the shares of stock of another company, the investor cannot exercise control over the investee. But, when an investor owns between 20% and 50% of the common stock of a corporation, it is presumed that the investor has significant influence over the financial and operating activities of the investee. The investor probably has a representative on the investee’s board of directors. Through that representative, the investor may exercise some control over the investee. The investee company in some sense becomes part of the investor company.

For example, even prior to purchasing all of **Turner Broadcasting, Time Warner** owned 20% of Turner. Because it exercised significant control over major decisions made by Turner, Time Warner used an approach called the equity

method. Under the **equity method**, the investor records its share of the net income of the investee in the year when it is earned. An alternative might be to delay recognizing the investor's share of net income until the investee declares a cash dividend. But, that approach would ignore the fact that the investor and investee are, in some sense, one company, making the investor better off by the investee's earned income.

Under the equity method, the investor company initially records the investment in common stock at cost. After that, it **adjusts** the investment account annually to show the investor's equity in the investee. Each year, the investor does the following. (1) It increases (debits) the investment account and increases (credits) revenue for its share of the investee's net income.² (2) The investor also decreases (credits) the investment account for the amount of dividends received. The investment account is reduced for dividends received because payment of a dividend decreases the net assets of the investee.

RECORDING ACQUISITION OF STOCK

Assume that Milar Corporation acquires 30% of the common stock of Beck Company for \$120,000 on January 1, 2017. The entry to record this transaction is:

Jan. 1	Stock Investments	120,000	
	Cash		120,000
	(To record purchase of Beck common stock)		

Helpful Hint

Under the equity method, the investor recognizes revenue on the accrual basis, i.e., when it is earned by the investee.

A	=	L	+	SE
+120,000				
-120,000				
<hr/>				
Cash Flows				
-120,000				

RECORDING REVENUE AND DIVIDENDS

For 2017, Beck reports net income of \$100,000. It declares and pays a \$40,000 cash dividend. Milar records (1) its share of Beck's income, \$30,000 (30% × \$100,000), and (2) the reduction in the investment account for the dividends received, \$12,000 (\$40,000 × 30%). The entries are:

(1)			
Dec. 31	Stock Investments	30,000	
	Revenue from Stock Investments		30,000
	(To record 30% equity in Beck's 2017 net income)		

A	=	L	+	SE
+30,000				
				+30,000 Rev
<hr/>				
Cash Flows				
no effect				

(2)			
Dec. 31	Cash	12,000	
	Stock Investments		12,000
	(To record dividends received)		

A	=	L	+	SE
+12,000				
-12,000				
<hr/>				
Cash Flows				
+12,000				

After Milar posts the transactions for the year, its investment and revenue accounts will show the following.

Stock Investments		Revenue from Stock Investments	
Jan. 1	120,000	Dec. 31	12,000
Dec. 31	30,000	Dec. 31	30,000
Dec. 31 Bal.	138,000		

Illustration 12-4

Investment and revenue accounts after posting

During the year, the investment account increased \$18,000. This increase of \$18,000 is explained as follows: (1) Milar records a \$30,000 increase in revenue from its stock investment in Beck, and (2) Milar records a \$12,000 decrease due to dividends received from its stock investment in Beck.

²Conversely, the investor increases (debits) a loss account and decreases (credits) the investment account for its share of the investee's net loss.

Note that the difference between reported revenue under the cost method and reported revenue under the equity method can be significant. For example, Milar would report only \$12,000 of dividend revenue ($30\% \times \$40,000$) if it used the cost method.

Holdings of More than 50%

A company that owns more than 50% of the common stock of another entity is known as the **parent company**. The entity whose stock the parent company owns is called the **subsidiary (affiliated) company**. Because of its stock ownership, the parent company has a **controlling interest** in the subsidiary.

When a company owns more than 50% of the common stock of another company, it usually prepares **consolidated financial statements**. These statements present the total assets and liabilities controlled by the parent company. They also present the total revenues and expenses of the subsidiary companies. Companies prepare consolidated statements **in addition to** the financial statements for the parent and individual subsidiary companies.

As noted earlier, when Time Warner had a 20% investment in Turner, it reported this investment in a single line item—Other Investments. After the merger, Time Warner instead consolidated Turner's results with its own. Under this approach, Time Warner included Turner's individual assets and liabilities with its own. Its plant and equipment were added to Time Warner's plant and equipment, its receivables were added to Time Warner's receivables, and so on.

Helpful Hint

If parent (A) has three wholly owned subsidiaries (B, C, and D), there are four separate legal entities. From the viewpoint of the shareholders of the parent company, there is only one economic entity.

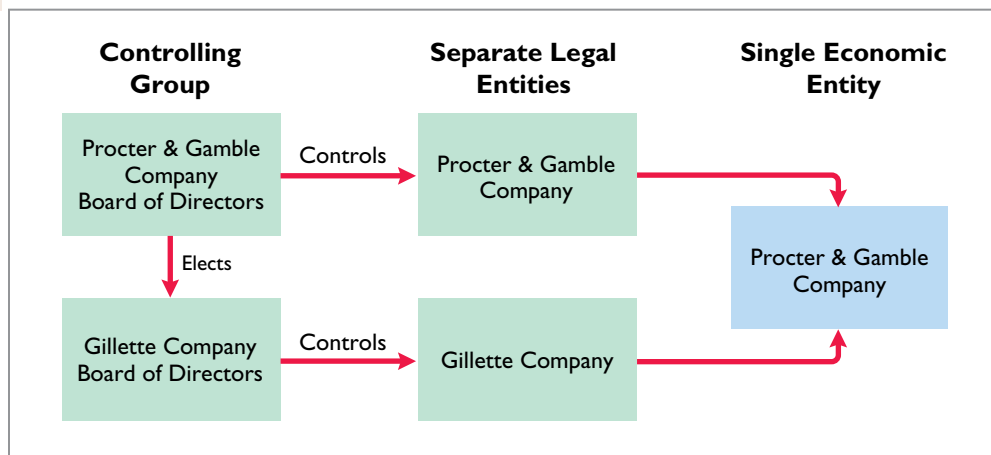

Accounting Across the Organization Procter & Gamble Company

© Stigur Karlsson/iStockphoto

How Procter & Gamble Accounts for Gillette

Several years ago, Procter & Gamble Company acquired Gillette Company for \$53.4 billion. The common stockholders of Procter & Gamble elect the board of directors of the company, who in turn select the officers and managers of the company. Procter & Gamble's board of directors controls the property owned by the corporation, which includes the common stock of Gillette. Thus, they are in a position to elect the board of directors of Gillette and, in effect, control its operations. These relationships are graphically illustrated here.

Where on Procter & Gamble's balance sheet will you find its investment in Gillette Company? (Go to [WileyPLUS](#) for this answer and additional questions.)

Consolidated statements are useful to the stockholders, board of directors, and management of the parent company. These statements indicate the magnitude and scope of operations of the companies under common control. For example, regulators and the courts undoubtedly used the consolidated statements of **AT&T** to determine whether a breakup of the company was in the public interest. Illustration 12-5 lists three companies that prepare consolidated statements and some of the companies they have owned.

PepsiCo	Cendant	The Disney Company
Frito-Lay	Howard Johnson	Capital Cities/ABC, Inc.
Tropicana	Ramada Inn	Disneyland, Disney World
Quaker Oats	Century 21	Mighty Ducks
Pepsi-Cola	Coldwell Banker	Anaheim Angels
Gatorade	Avis	ESPN

Illustration 12-5

Examples of consolidated companies and their subsidiaries

DO IT!**2****Stock Investments**

Presented below are two independent situations.

- Rho Jean Inc. acquired 5% of the 400,000 shares of common stock of Stillwater Corp. at a total cost of \$6 per share on May 18, 2017. On August 30, Stillwater declared and paid a \$75,000 dividend. On December 31, Stillwater reported net income of \$244,000 for the year.
- Debbie, Inc. obtained significant influence over North Sails by buying 40% of North Sails' 60,000 outstanding shares of common stock at a cost of \$12 per share on January 1, 2017. On April 15, North Sails declared and paid a cash dividend of \$45,000. On December 31, North Sails reported net income of \$120,000 for the year.

Prepare all necessary journal entries for 2017 for (1) Rho Jean Inc. and (2) Debbie, Inc.

Solution

(1) May 18	Stock Investments (400,000 × 5% × \$6)	120,000	
	Cash (To record purchase of 20,000 shares of Stillwater Co. stock)		120,000
Aug. 30	Cash	3,750	
	Dividend Revenue (\$75,000 × 5%) (To record receipt of cash dividend)		3,750
(2) Jan. 1	Stock Investments (60,000 × 40% × \$12)	288,000	
	Cash (To record purchase of 24,000 shares of North Sails' stock)		288,000
Apr. 15	Cash	18,000	
	Stock Investments (\$45,000 × 40%) (To record receipt of cash dividend)		18,000
Dec. 31	Stock Investments (\$120,000 × 40%) Revenue from Stock Investments (To record 40% equity in North Sails' net income)	48,000	48,000

Action Plan

- ✓ Presume that the investor has relatively little influence over the investee when an investor owns less than 20% of the common stock of another corporation. In this case, net income earned by the investee is not considered a proper basis for recognizing income from the investment by the investor.
- ✓ Presume significant influence for investments of 20%–50%. Therefore, record the investor's share of the net income of the investee.

Discuss how debt and stock investments are reported in financial statements.

The value of debt and stock investments may fluctuate greatly during the time they are held. For example, in one 12-month period, the stock price of **Time Warner** hit a high of \$58.50 and a low of \$9. In light of such price fluctuations, how should companies value investments at the balance sheet date? Valuation could be at cost, at fair value, or at the lower-of-cost-or-market value.

Many people argue that fair value offers the best approach because it represents the expected cash realizable value of securities. **Fair value** is the amount for which a security could be sold in a normal market. Others counter that unless a security is going to be sold soon, the fair value is not relevant because the price of the security will likely change again.

Categories of Securities

For purposes of valuation and reporting at a financial statement date, companies classify **debt investments** into three categories:

1. **Trading securities** are bought and held primarily for sale in the near term to generate income on short-term price differences.
2. **Available-for-sale securities** are held with the intent of selling them sometime in the future.
3. **Held-to-maturity securities** are debt securities that the investor has the intent and ability to hold to maturity.³

Stock investments are classified into two categories:

1. **Trading securities** (as defined above).
2. **Available-for-sale securities** (as defined above).

Stock investments have no maturity date. Therefore, they are never classified as held-to-maturity securities.

Illustration 12-6 shows the valuation guidelines for these securities. **These guidelines apply to all debt securities and all stock investments in which the holdings are less than 20%.**

Illustration 12-6

Valuation guidelines for securities

³This category is provided for completeness. The accounting and valuation issues related to held-to-maturity securities are discussed in more advanced accounting courses.

TRADING SECURITIES

Companies hold trading securities with the intention of selling them in a short period (generally less than a month). **Trading** means frequent buying and selling. As indicated in Illustration 12-7, companies adjust trading securities to fair value at the end of each period (an approach referred to as mark-to-market accounting). They report changes from cost as part of net income. The changes are reported as **unrealized gains or losses** because the securities have not been sold. The unrealized gain or loss is the difference between the **total cost** of trading securities and their **total fair value**. Companies classify trading securities as current assets.

Illustration 12-7 shows the cost and fair values for investments Pace Corporation classified as trading securities on December 31, 2017. Pace has an unrealized gain of \$7,000 because total fair value of \$147,000 is \$7,000 greater than total cost of \$140,000.

Trading Securities, December 31, 2017			
Investments	Cost	Fair Value	Unrealized Gain (Loss)
Yorkville Company bonds	\$ 50,000	\$ 48,000	\$(2,000)
Kodak Company stock	90,000	99,000	9,000
Total	<u>\$140,000</u>	<u>\$147,000</u>	<u>\$ 7,000</u>

Illustration 12-7
Valuation of trading securities

Pace records fair value and unrealized gain or loss through an adjusting entry at the time it prepares financial statements. In this entry, the company uses a valuation allowance account, Fair Value Adjustment—Trading, to record the difference between the total cost and the total fair value of the securities. The adjusting entry for Pace Corporation is:

Dec. 31	Fair Value Adjustment—Trading Unrealized Gain—Income (To record unrealized gain on trading securities)	7,000	7,000
---------	--	-------	-------

A	=	L	+	SE
+7,000				+7,000 Rev
Cash Flows				
no effect				

The use of a Fair Value Adjustment—Trading account enables Pace to maintain a record of the investment cost. It needs actual cost to determine the gain or loss realized when it sells the securities. Pace adds the debit balance (or subtracts a credit balance) of the Fair Value Adjustment—Trading account to the cost of the investments to arrive at a fair value for the trading securities.

The fair value of the securities is the amount Pace reports on its balance sheet. It reports the unrealized gain in the income statement in the “Other revenues and gains” section. The term “Income” in the account title indicates that the gain affects net income.

If the total cost of the trading securities is greater than total fair value, an unrealized loss has occurred. In such a case, the adjusting entry is a debit to Unrealized Loss—Income and a credit to Fair Value Adjustment—Trading. Companies report the unrealized loss under “Other expenses and losses” in the income statement.

The Fair Value Adjustment—Trading account is carried forward into future accounting periods. The company does not make any entry to the account until the end of each reporting period. At that time, the company adjusts the balance in the account to the difference between cost and fair value. For trading securities, it closes the Unrealized Gain (Loss)—Income account at the end of the reporting period.

AVAILABLE-FOR-SALE SECURITIES

As indicated earlier, companies hold available-for-sale securities with the intent of selling these investments sometime in the future. If the intent is to sell the securities within the next year or operating cycle, the investor classifies the securities as current assets in the balance sheet. Otherwise, it classifies them as long-term assets in the investments section of the balance sheet.

ETHICS NOTE

At one time, the SEC accused investment bank **Morgan Stanley** of overstating the value of certain bond investments by \$75 million. The SEC stated that, in applying market value accounting, Morgan Stanley used its own more-optimistic assumptions rather than relying on external pricing sources.

ETHICS NOTE

Some managers seem to hold their available-for-sale securities that have experienced losses, while selling those that have gains, thus increasing income. Do you think this is ethical?

Companies report available-for-sale securities at fair value. The procedure for determining fair value and the unrealized gain or loss for these securities is the same as for trading securities. To illustrate, assume that Ingrao Corporation has two securities that it classifies as available-for-sale. Illustration 12-8 provides information on the cost, fair value, and amount of the unrealized gain or loss on December 31, 2017. There is an unrealized loss of \$9,537 because total cost of \$293,537 is \$9,537 more than total fair value of \$284,000.

Illustration 12-8

Valuation of available-for-sale securities

Available-for-Sale Securities, December 31, 2017			
Investments	Cost	Fair Value	Unrealized Gain (Loss)
Campbell Soup Corporation			
8% bonds	\$ 93,537	\$103,600	\$10,063
Hershey Company stock	200,000	180,400	(19,600)
Total	\$293,537	\$284,000	\$(9,537)

Both the adjusting entry and the reporting of the unrealized gain or loss for Ingrao's available-for-sale securities differ from those illustrated for trading securities. The differences result because Ingrao does not expect to sell these securities in the near term. Thus, prior to actual sale it is more likely that changes in fair value may change either unrealized gains or losses. Therefore, Ingrao does not report an unrealized gain or loss in the income statement. Instead, it reports it as a **separate component of stockholders' equity**.

In the adjusting entry, Ingrao identifies the fair value adjustment account with available-for-sale securities, and it identifies the unrealized gain or loss account with stockholders' equity. Ingrao records the unrealized loss of \$9,537 as follows.

A	=	L	+	SE
-9,537				-9,537 Exp
<hr/>				
Cash Flows				
no effect				

Dec. 31	Unrealized Gain or Loss—Equity Fair Value Adjustment—Available-for-Sale (To record unrealized loss on available-for-sale securities)	9,537	9,537
---------	--	-------	-------

If total fair value exceeds total cost, Ingrao debits Fair Value Adjustment—Available-for-Sale and credits Unrealized Gain or Loss—Equity.

For available-for-sale securities, the company carries forward the Unrealized Gain or Loss—Equity account to future periods. At each future balance sheet date, Ingrao adjusts the Fair Value Adjustment—Available-for-Sale account and the Unrealized Gain or Loss—Equity account to show the difference between cost and fair value at that time.

Investor Insight

enciktepstudio/Shutterstock

Can Fair Value Be Unfair?

The FASB is considering proposals for how to account for financial instruments. The FASB at one time proposed that loans and receivables be accounted for at their fair value (the amount they could currently be sold for), as are most investments. The FASB believes that this would provide a more accurate view of

a company's financial position. It might be especially useful as an early warning when a bank is in trouble because of poor-quality loans. But, banks argue that fair values are difficult to estimate accurately. They are also concerned that volatile fair values could cause large swings in a bank's reported net income.

Source: David Reilly, "Bank Face a Mark-to-Market Challenge," *Wall Street Journal Online* (March 15, 2010).

What are the arguments in favor of and against fair value accounting for loans and receivables? (Go to WileyPLUS for this answer and additional questions.)

DO IT! 3a Trading and Available-for-Sale Securities

Some of Powderhorn Corporation's investment securities are classified as trading securities and some are classified as available-for-sale. The cost and fair value of each category at December 31, 2017, are shown below.

	<u>Cost</u>	<u>Fair Value</u>	<u>Unrealized Gain (Loss)</u>
Trading securities	\$93,600	\$94,900	\$1,300
Available-for-sale securities	\$48,800	\$51,400	\$2,600

At December 31, 2016, the Fair Value Adjustment—Trading account had a debit balance of \$9,200, and the Fair Value Adjustment—Available-for-Sale account had a credit balance of \$5,750. Prepare the required journal entries for each group of securities for December 31, 2017.

Solution

<i>Trading securities:</i>		
Unrealized Loss—Income	7,900*	7,900
Fair Value Adjustment—Trading (To record unrealized loss on trading securities)		
*\$9,200 – \$1,300		
<i>Available-for-sale securities:</i>		
Fair Value Adjustment—Available-for-Sale	8,350**	8,350
Unrealized Gain or Loss—Equity (To record unrealized gain on available-for-sale securities)		
**\$5,750 + \$2,600		

Related exercise material: **BE12-4, BE12-6, E12-8, E12-10, E12-11, E12-12, and DO IT! 12-3a.**

Action Plan

- ✓ Mark trading securities to fair value and report the adjustment in current-period income.
- ✓ Mark available-for-sale securities to fair value and report the adjustment as a separate component of stockholders' equity.

Balance Sheet Presentation

In the balance sheet, companies classify investments as either short-term or long-term.

SHORT-TERM INVESTMENTS

Short-term investments (also called **marketable securities**) are securities held by a company that are (1) **readily marketable** and (2) **intended to be converted into cash** within the next year or operating cycle, whichever is longer. Investments that do not meet **both criteria** are classified as **long-term investments**.

READILY MARKETABLE An investment is readily marketable when it can be sold easily whenever the need for cash arises. Short-term paper⁴ meets this criterion. It can be readily sold to other investors. Stocks and bonds traded on organized securities exchanges, such as the New York Stock Exchange, are readily marketable. They can be bought and sold daily. In contrast, there may be only a limited market for the securities issued by small corporations, and no market for the securities of a privately held company.

INTENT TO CONVERT Intent to convert means that management intends to sell the investment within the next year or operating cycle, whichever is longer. Generally, this criterion is satisfied when the investment is considered a resource

Helpful Hint

Trading securities are always classified as short-term. Available-for-sale securities can be either short-term or long-term.

⁴Short-term paper includes (1) certificates of deposit (CDs) issued by banks, (2) money market certificates issued by banks and savings and loan associations, (3) Treasury bills issued by the U.S. government, and (4) commercial paper (notes) issued by corporations with good credit ratings.

that the investor will use whenever the need for cash arises. For example, a ski resort may invest idle cash during the summer months with the intent to sell the securities to buy supplies and equipment shortly before the winter season. This investment is considered short-term even if lack of snow cancels the next ski season and eliminates the need to convert the securities into cash as intended.

Because of their high liquidity, short-term investments appear immediately below Cash in the “Current assets” section of the balance sheet. They are reported at fair value. For example, Pace Corporation would report its trading securities as shown in Illustration 12-9.

Illustration 12-9
Presentation of short-term investments

PACE CORPORATION	
Balance Sheet (partial)	
Current assets	
Cash	\$ 21,000
Short-term investments, at fair value	147,000

LONG-TERM INVESTMENTS

Companies generally report long-term investments in a separate section of the balance sheet immediately below “Current assets,” as shown later in Illustration 12-12 (page 574). Long-term investments in available-for-sale securities are reported at fair value. Investments in common stock accounted for under the equity method are reported at equity.

Presentation of Realized and Unrealized Gain or Loss

Companies must present in the financial statements gains and losses on investments, whether realized or unrealized. In the income statement, companies report gains and losses in the nonoperating activities section under the categories listed in Illustration 12-10. Interest and dividend revenue are also reported in that section.

Illustration 12-10
Nonoperating items related to investments

<u>Other Revenues and Gains</u>	<u>Other Expenses and Losses</u>
Interest Revenue	Loss on Sale of Investments
Dividend Revenue	Unrealized Loss—Income
Gain on Sale of Investments	
Unrealized Gain—Income	

As indicated earlier, companies report an unrealized gain or loss on available-for-sale securities as a separate component of stockholders’ equity. To illustrate, assume that Dawson Inc. has common stock of \$3,000,000, retained earnings of \$1,500,000, and an unrealized loss on available-for-sale securities of \$100,000. Illustration 12-11 shows the balance sheet presentation of the unrealized loss.

Illustration 12-11
Unrealized loss in stockholders’ equity section

DAWSON INC.	
Balance Sheet (partial)	
Stockholders’ equity	
Common stock	\$3,000,000
Retained earnings	1,500,000
Total paid-in capital and retained earnings	4,500,000
Less: Unrealized loss on available-for-sale securities	100,000
Total stockholders’ equity	<u>\$4,400,000</u>

Note that the presentation of the loss is similar to the presentation of the cost of treasury stock in the stockholders' equity section (it decreases stockholders' equity). An unrealized gain would be added to this section. Reporting the unrealized gain or loss in the stockholders' equity section serves two purposes. (1) It reduces the volatility of net income due to fluctuations in fair value. (2) It informs the financial statement user of the gain or loss that would occur if the securities were sold at fair value.

Companies must report items such as unrealized gains or losses on available-for-sale securities as part of a more inclusive measure called comprehensive income. Unrealized gains and losses on available-for-sale securities therefore affect comprehensive income (and stockholders' equity) but are not included in the computation of net income. We discuss comprehensive income more fully in Chapter 14.

Classified Balance Sheet

We have presented many sections of classified balance sheets in this and preceding chapters. The classified balance sheet in Illustration 12-12 (page 574) includes, in one place, key topics from previous chapters: the issuance of par value common stock, restrictions of retained earnings, and issuance of long-term bonds. From this chapter, the statement includes (highlighted in red) short-term and long-term investments. The investments in short-term securities are considered trading securities. The long-term investments in stock of less than 20%-owned companies are considered available-for-sale securities. Illustration 12-12 also includes a long-term investment reported at equity and descriptive notations within the statement, such as the cost flow method for valuing inventory and one note to the statement.

DO IT!

3b

Financial Statement Presentation of Investments

Identify where each of the following items would be reported in the financial statements.

1. Interest earned on investments in bonds.
2. Fair value adjustment—available-for-sale.
3. Unrealized loss on available-for-sale securities.
4. Gain on sale of investments in stock.
5. Unrealized gain on trading securities.

Use the following possible categories:

Balance sheet:

Current assets	Current liabilities
Investments	Long-term liabilities
Property, plant, and equipment	Stockholders' equity
Intangible assets	

Income statement:

Other revenues and gains	Other expenses and losses
--------------------------	---------------------------

Action Plan

- ✓ Classify investments as current assets if they will be held for less than one year.
- ✓ Report unrealized gains or losses on trading securities in income.
- ✓ Report unrealized gains or losses on available-for-sale securities in equity.
- ✓ Report realized gains or losses on investments in the income statement as "Other revenues and gains" or as "Other expenses and losses."

Solution

Item	Financial Statement	Category
1. Interest earned on investments in bonds	Income statement	Other revenues and gains

LEARNING
OBJECTIVE

4

APPENDIX 12A: Describe the form and content of consolidated financial statements as well as how to prepare them.

Most of the large U.S. corporations are holding companies that own other corporations. They therefore prepare **consolidated** financial statements that combine the separate companies.

Consolidated Balance Sheet

Companies prepare consolidated balance sheets from the individual balance sheets of their affiliated companies. They do not prepare consolidated statements from ledger accounts kept by the consolidated entity because only the separate legal entities maintain accounting records.

All items in the individual balance sheets are included in the consolidated balance sheet except amounts that pertain to transactions between the affiliated companies. Transactions between the affiliated companies are identified as **intercompany transactions**. The process of excluding these transactions in preparing consolidated statements is referred to as **intercompany eliminations**. These eliminations are necessary to avoid overstating assets, liabilities, and stockholders' equity in the consolidated balance sheet. For example, amounts owed by a subsidiary to a parent company and the related receivable reported by the parent company would be eliminated. The objective in a consolidated balance sheet is to show only obligations to and receivables from parties who are not part of the affiliated group of companies.

To illustrate, assume that on January 1, 2017, Powers Company pays \$150,000 in cash for 100% of Serto Company's common stock. Powers Company records the investment at cost, as required by the historical cost principle. Illustration 12A-1 presents the separate balance sheets of the two companies immediately after the purchase, together with combined and consolidated data.⁵ Powers Company obtains the balances in the "combined" column by adding the items in the separate balance sheets of the affiliated companies. The combined totals do not represent a consolidated balance sheet because there has been a double-counting of assets and stockholders' equity in the amount of \$150,000.

Helpful Hint

Eliminations are aptly named because they eliminate duplicate data. They are not adjustments.

POWERS COMPANY AND SERTO COMPANY

Balance Sheet
January 1, 2017

Assets	Powers Company	Serto Company	Combined Data	Consolidated Data
Current assets	\$ 50,000	\$ 80,000	\$130,000	\$130,000
Investment in Serto Company common stock	150,000		150,000	-0-
Plant and equipment (net)	325,000	145,000	470,000	470,000
Total assets	<u>\$525,000</u>	<u>\$225,000</u>	<u>\$750,000</u>	<u>\$600,000</u>
Liabilities and Stockholders' Equity				
Current liabilities	\$ 50,000	\$ 75,000	\$125,000	\$125,000
Common stock	300,000	100,000	400,000	300,000
Retained earnings	175,000	50,000	225,000	175,000
Total liabilities and stockholders' equity	<u>\$525,000</u>	<u>\$225,000</u>	<u>\$750,000</u>	<u>\$600,000</u>

Illustration 12A-1

Combined and consolidated data

⁵We use condensed data throughout this material to keep details at a minimum.

The Investment in Serto Company common stock that appears on the balance sheet of Powers Company represents an interest in the net assets of Serto. As a result, there has been a double-counting of assets. Similarly, there has been a double-counting in stockholders' equity because the common stock of Serto Company is completely owned by the stockholders of Powers Company.

The balances in the consolidated data column are the amounts that should appear in the consolidated balance sheet. The double-counting has been eliminated by showing Investment in Serto Company at zero and by reporting only the common stock and retained earnings of Powers Company as stockholders' equity.

USE OF A WORKSHEET—COST EQUAL TO BOOK VALUE

The preparation of consolidated balance sheets is usually facilitated by the use of a worksheet. As shown in Illustration 12A-2, the worksheet for a consolidated balance sheet contains columns for (1) the balance sheet data for the separate legal entities, (2) intercompany eliminations, and (3) consolidated data. All data in the worksheet relate to the preceding example in which Powers Company acquires 100% ownership of Serto Company for \$150,000. In this case, the cost of the investment, \$150,000, is equal to the book value [\$150,000 (\$225,000 – \$75,000)] of the subsidiary's net assets. The intercompany elimination results in a credit to the investment account maintained by Powers Company for its balance, \$150,000, and debits to the Common Stock and Retained Earnings accounts of Serto Company for their respective balances, \$100,000 and \$50,000.

20						

Helpful Hint

As is the case of the worksheets explained earlier in this textbook, consolidated worksheets are also optional.

It is important to recognize that companies make intercompany eliminations solely on the worksheet to present correct consolidated data. Neither of the affiliated companies journalizes or posts the eliminations. Therefore, eliminations do not affect the ledger accounts. Powers Company's investment account and Serto Company's common stock and retained earnings accounts are reported by the separate entities in preparing their own financial statements.

USE OF A WORKSHEET—COST ABOVE BOOK VALUE

The cost of acquiring the common stock of another company may be above or below its book value. The management of the parent company may pay more than book value for the stock. Why? Because it believes the fair values of identifiable assets such as land, buildings, and equipment are higher than their recorded book values. Or, it may believe the subsidiary's future earnings prospects warrant a payment for goodwill.

To illustrate, assume the same data used above, except that Powers Company pays \$165,000 in cash for 100% of Serto's common stock. The excess of cost over book value is \$15,000 (\$165,000 – \$150,000). Powers recognizes this amount separately in eliminating the parent company's investment account, as shown in Illustration 12A-3. Total assets and total liabilities and stockholders' equity are the same as in the preceding example (\$600,000). However, in this case, total assets include \$15,000 of excess of cost over book value of subsidiary. The disposition of the excess is explained in the next section.

Helpful Hint

The consolidated worksheet is another useful spreadsheet application. This is an easier worksheet to attempt since the required instructions are very straightforward.

Worksheet—Cost above book value

CONTENT OF A CONSOLIDATED BALANCE SHEET

To illustrate a consolidated balance sheet, we will use the worksheet shown in Illustration 12A-3. This worksheet shows an excess of cost over book value of \$15,000. In the consolidated balance sheet, Powers Company first allocates this amount to specific assets, such as plant and equipment and inventory, if their fair values on the acquisition date exceed their book values. Any remainder is considered to be goodwill. For Serto Company, assume that the fair value of the plant and equipment is \$155,000. Thus, Powers allocates \$10,000 of the excess of cost over book value to plant and equipment, and the remainder, \$5,000, to goodwill. Illustration 12A-4 (page 578) shows the condensed consolidated balance sheet of Powers Company.

	Retained earnings	175,000	475,000
	Total liabilities and stockholders' equity		\$600,000
	*(\$470,000 + \$10,000)		

Through innovative financial restructuring, **The Coca-Cola Company** at one time eliminated a substantial amount of non-intercompany debt. It sold to the public 51% of two bottling companies. The “49% solution,” as insiders call the strategy, enabled Coca-Cola to keep effective control over the businesses, and it swept \$3 billion of debt from its consolidated balance sheet. (It no longer consolidated the two bottling companies.) At the same time, the new companies obtained independent access to equity markets to satisfy their own large appetites for capital.

Consolidated Income Statement

Affiliated companies also prepare a consolidated income statement. This statement shows the results of operations of affiliated companies as though they are one economic unit. This means that the statement shows only revenue and expense transactions between the consolidated entity and companies and individuals who are outside the affiliated group.

Consequently, all intercompany revenue and expense transactions must be eliminated. Intercompany transactions such as sales between affiliates and interest on loans charged by one affiliate to another must be eliminated. A worksheet facilitates the preparation of consolidated income statements in the same manner as it does for the balance sheet.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 **Explain how to account for debt investments.** Companies record investments in debt securities when they purchase bonds, receive or accrue interest, and sell the bonds. They report gains or losses on the sale of bonds in the “Other revenues and gains” or “Other expenses and losses” sections of the income statement.
- 2 **Explain how to account for stock investments.** Companies record investments in common stock when they purchase the stock, receive dividends, and sell the stock. When ownership is less than 20%, the cost method is used. When ownership is between 20% and 50%, the equity method should be used. When ownership is more than 50%, companies prepare consolidated financial statements. Consolidated financial statements indicate the magnitude and scope of operations of the companies under common control.
- 3 **Discuss how debt and stock investments are reported in financial statements.** Investments in debt securities are classified as trading, available-for-sale, or held-to-maturity securities for valuation and reporting purposes. Stock investments are classified either as trading or available-for-sale securities. Stock investments

have no maturity date and therefore are never classified as held-to-maturity securities. Trading securities are reported as current assets at fair value, with changes from cost reported in net income. Available-for-sale securities are also reported at fair value, with the changes from cost reported in stockholders' equity. Available-for-sale securities are classified as short-term or long-term, depending on their expected future sale date.

Short-term investments are securities that are (a) readily marketable and (b) intended to be converted to cash within the next year or operating cycle, whichever is longer. Investments that do not meet both criteria are classified as long-term investments.

***4 Describe the form and content of consolidated financial statements as well as how to prepare them.** Consolidated financial statements are similar in form and content to the financial statements of an individual corporation. A consolidated balance sheet shows the assets and liabilities controlled by the parent company. A consolidated income statement shows the results of operations of affiliated companies as though they are one economic unit. The worksheet for a consolidated balance sheet contains columns for (a) the balance sheet data for the separate entities, (b) intercompany eliminations, and (c) consolidated data.

GLOSSARY REVIEW

Available-for-sale securities Securities that are held with the intent of selling them sometime in the future. (p. 568).

Consolidated financial statements Financial statements that present the assets and liabilities controlled by the parent company and the total revenues and expenses of the subsidiary companies. (p. 566).

Controlling interest Ownership of more than 50% of the common stock of another entity. (p. 566).

Cost method An accounting method in which the investment in common stock is recorded at cost, and revenue is recognized only when cash dividends are received. (p. 563).

Debt investments Investments in government and corporation bonds. (p. 561).

Equity method An accounting method in which the investment in common stock is initially recorded at cost, and the investment account is then adjusted annually to show the investor's equity in the investee. (p. 565).

Fair value Amount for which a security could be sold in a normal market. (p. 568).

Held-to-maturity securities Debt securities that the investor has the intent and ability to hold to their maturity date. (p. 568).

***Intercompany eliminations** Eliminations made to exclude the effects of intercompany transactions in preparing consolidated statements. (p. 575).

***Intercompany transactions** Transactions between affiliated companies. (p. 575).

Investment portfolio A group of stocks and/or debt securities in different corporations held for investment purposes. (p. 563).

Long-term investments Investments that are not readily marketable or that management does not intend to convert into cash within the next year or operating cycle, whichever is longer. (p. 571).

Parent company A company that owns more than 50% of the common stock of another entity. (p. 566).

Short-term investments Investments that are readily marketable and intended to be converted into cash within the next year or operating cycle, whichever is longer. (p. 571).

Stock investments Investments in the capital stock of other corporations. (p. 563).

Subsidiary (affiliated) company A company in which more than 50% of its stock is owned by another company. (p. 566).

Trading securities Securities bought and held primarily for sale in the near term to generate income on short-term price differences. (p. 568).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following is **not** a primary reason why corporations invest in debt and equity securities?
- They wish to gain control of a competitor.
 - They have excess cash.
 - They wish to move into a new line of business.
 - They are required to by law.

- (LO 1) 2. Debt investments are initially recorded at:
- cost.
 - cost plus accrued interest.

- fair value.
- face value.

3. Hanes Company sells debt investments costing (LO 1) \$26,000 for \$28,000. In journalizing the sale, credits are to:
- Debt Investments and Loss on Sale of Debt Investments.
 - Debt Investments and Gain on Sale of Debt Investments.

- (c) Stock Investments and Gain on Sale of Stock Investments.
 (d) No correct answer is given.
- (LO 2) 4. Pryor Company receives net proceeds of \$42,000 on the sale of stock investments that cost \$39,500. This transaction will result in reporting in the income statement a:
 (a) loss of \$2,500 under "Other expenses and losses."
 (b) loss of \$2,500 under "Operating expenses."
 (c) gain of \$2,500 under "Other revenues and gains."
 (d) gain of \$2,500 under "Operating revenues."
- (LO 2) 5. The equity method of accounting for long-term investments in stock should be used when the investor has significant influence over an investee and owns:
 (a) between 20% and 50% of the investee's common stock.
 (b) 20% or more of the investee's common stock.
 (c) more than 50% of the investee's common stock.
 (d) less than 20% of the investee's common stock.
- (LO 2) 6. Assume that Horicon Corp. acquired 25% of the common stock of Sheboygan Corp. on January 1, 2017, for \$300,000. During 2017, Sheboygan Corp. reported net income of \$160,000 and paid total dividends of \$60,000. If Horicon uses the equity method to account for its investment, the balance in the investment account on December 31, 2017, will be:
 (a) \$300,000. (c) \$400,000.
 (b) \$325,000. (d) \$340,000.
- (LO 2) 7. Using the information in Question 6, what entry would Horicon make to record the receipt of the dividend from Sheboygan?
 (a) Debit Cash and credit Revenue from Stock Investments.
 (b) Debit Cash Dividends and credit Revenue from Stock Investments.
 (c) Debit Cash and credit Stock Investments.
 (d) Debit Cash and credit Dividend Revenue.
- (LO 2) 8. You have a controlling interest if:
 (a) you own more than 20% of a company's stock.
 (b) you are the president of the company.
 (c) you use the equity method.
 (d) you own more than 50% of a company's stock.
- (LO 2) 9. Which of the following statements is **false**? Consolidated financial statements are useful to:
 (a) determine the profitability of specific subsidiaries.
 (b) determine the total profitability of companies under common control.
 (c) determine the breadth of a parent company's operations.
 (d) determine the full extent of total obligations of companies under common control.
- (LO 3) 10. At the end of the first year of operations, the total cost of the trading securities portfolio is \$120,000. Total fair value is \$115,000. The financial statements should show:
 (a) a reduction of an asset of \$5,000 and a realized loss of \$5,000.
 (b) a reduction of an asset of \$5,000 and an unrealized loss of \$5,000 in the stockholders' equity section.
 (c) a reduction of an asset of \$5,000 in the current assets section and an unrealized loss of \$5,000 in "Other expenses and losses."
 (d) a reduction of an asset of \$5,000 in the current assets section and a realized loss of \$5,000 in "Other expenses and losses."
11. At December 31, 2017, the fair value of available-for-sale securities is \$41,300 and the cost is \$39,800. At January 1, 2017, there was a credit balance of \$900 in the Fair Value Adjustment—Available-for-Sale account. The required adjusting entry would be:
 (a) Debit Fair Value Adjustment—Available-for-Sale for \$1,500 and credit Unrealized Gain or Loss—Equity for \$1,500.
 (b) Debit Fair Value Adjustment—Available-for-Sale for \$600 and credit Unrealized Gain or Loss—Equity for \$600.
 (c) Debit Fair Value Adjustment—Available-for-Sale for \$2,400 and credit Unrealized Gain or Loss—Equity for \$2,400.
 (d) Debit Unrealized Gain or Loss—Equity for \$2,400 and credit Fair Value Adjustment—Available-for-Sale for \$2,400.
12. If a company wants to increase its reported income by manipulating its investment accounts, which should it do? (LO 3)
 (a) Sell its "winner" trading securities and hold its "loser" trading securities.
 (b) Hold its "winner" trading securities and sell its "loser" trading securities.
 (c) Sell its "winner" available-for-sale securities and hold its "loser" available-for-sale securities.
 (d) Hold its "winner" available-for-sale securities and sell its "loser" available-for-sale securities.
13. In the balance sheet, a debit balance in Unrealized Gain or Loss—Equity is reported as a(n): (LO 3)
 (a) increase to stockholders' equity.
 (b) decrease to stockholders' equity.
 (c) loss in the income statement.
 (d) loss in the retained earnings statement.
14. Short-term debt investments must be readily marketable and expected to be sold within: (LO 3)
 (a) 3 months from the date of purchase.
 (b) the next year or operating cycle, whichever is shorter.
 (c) the next year or operating cycle, whichever is longer.
 (d) the operating cycle.
- *15. Pate Company pays \$175,000 for 100% of Sinko's common stock when Sinko's stockholders' equity consists of Common Stock \$100,000 and Retained Earnings \$60,000. In the worksheet for the consolidated balance sheet, the eliminations will include a: (LO 4)
 (a) credit to Investment in Sinko Common Stock \$160,000.
 (b) credit to Excess of Book Value over Cost of Subsidiary \$15,000.
 (c) debit to Retained Earnings \$75,000.
 (d) debit to Excess of Cost over Book Value of Subsidiary \$15,000.
- *16. Which of the following statements about intercompany eliminations is **true**? (LO 4)
 (a) They are not journalized or posted by any of the subsidiaries.
 (b) They do not affect the ledger accounts of any of the subsidiaries.
 (c) They are made solely on the worksheet to arrive at correct consolidated data.
 (d) All of these statements are true.

- (LO 4) *17. Which one of the following statements about consolidated income statements is **false**?
- (a) A worksheet facilitates the preparation of the statement.
 - (b) The consolidated income statement shows the results of operations of affiliated companies as a single economic unit.
 - (c) All revenue and expense transactions between parent and subsidiary companies are eliminated.
 - (d) When a subsidiary is wholly owned, the form and content of the statement will differ from the income statement of an individual corporation.

Solutions

1. (d) Corporations are not required to by law to invest in debt and equity securities. The other choices are reasons why corporations invest in debt and equity securities.
 2. (a) When debt investments are purchased, they are recorded at cost, not (b) cost plus accrued interest, (c) fair value, or (d) face value.
 3. (b) Credits are made to Debt Investments \$26,000 and Gain on Sale of Debt Investments \$2,000 (\$28,000 – \$26,000). The other choices are therefore incorrect.
 4. (c) Because the cash received (\$42,000) is greater than the cost (\$39,500), this sale results in a gain, not a loss, which will be reported under “Other revenues and gains” in the income statement. The other choices are therefore incorrect.
 5. (a) The equity method is used when the investor can exercise significant influence and owns between 20% and 50% of the investee’s common stock. The other choices are therefore incorrect.
 6. (b) Horicon records the acquisition of the stock investment by debiting Stock Investments \$300,000 and crediting Cash \$300,000. Then, Horicon records (1) its share in Sheboygan Corp.’s net income (\$160,000 × .25) by debiting Stock Investments \$40,000 and crediting Revenue from Stock Investments \$40,000 and (2) the reduction in the investment account for the dividends received (\$60,000 × .25) by debiting Cash \$15,000 and crediting Stock Investments \$15,000. Thus, the balance in the investment account on December 31 will be \$325,000 (\$300,000 + \$40,000 – \$15,000), not (a) \$300,000, (C) \$400,000, or (d) \$340,000.
 7. (c) Horicon records the receipt of the dividend from Sheboygan by debiting Cash and crediting Stock Investments. The other choices are therefore incorrect.
 8. (d) You have a controlling interest if you own more than 50% of a company’s stock, not (a) 20% of a company’s stock, (b) are president of the company, or (c) use the equity method.
 9. (a) Consolidated financial statements are not useful in determining the profitability of specific subsidiaries (legal entities) because consolidated financial statements represent the result of the single economic entity. The other choices are true statements.
 10. (c) The difference between the fair value (\$115,000) and total cost (\$120,000) of trading securities at the end of the first year would result in a reduction of an asset of \$5,000 through the valuation allowance account in the current assets section and an unrealized loss of \$5,000 in “Other expenses and losses.” The other choices are therefore incorrect.
 11. (c) In this case, there is an unrealized gain of \$1,500 because total fair value of \$41,300 is \$1,500 greater than the total cost of \$39,800. The desired balance in the market adjustment account is \$1,500 debit. The required adjusting entry considers the existing credit balance of \$900 and is a debit to Fair Value Adjustment—Available-for-Sale for \$2,400 (\$1,500 + \$900) and a credit to Unrealized Gain or Loss—Equity for \$2,400 (\$1,500 + \$900). The other choices are therefore incorrect.
 12. (c) When a company sells its winners as related to available-for-sale securities, it has a realized gain that increases net income. Selling the winners will affect the balance in Unrealized Holding Gain or Loss—Equity, but any change in this balance does not affect net income. Choices (a) and (b) are incorrect because trading securities’ gains and losses related to changes in valuation are reported in net income. Thus, when a company sells a trading security, it should have no effect on net income because the value change was recognized in net income previously. Choice (d) is incorrect because selling the losing available-for-sale securities will decrease net income.
 13. (b) A debit balance in Unrealized Gain or Loss—Equity is reported on the balance sheet as a separate component of stockholders’ equity, decreasing stockholders’ equity. The other choices are therefore incorrect.
 14. (c) Short-term investments are current assets that are expected to be consumed, sold, or converted to cash within one year or the operating cycle, whichever is longer. The other choices are therefore incorrect.
- *15. (d) The eliminations will include a debit to Excess of Cost over Book Value of Subsidiary \$15,000 (\$175,000 – \$160,000). The other choices are therefore incorrect.
- *16. (d) All of the statements in choices (a), (b), and (c) are correct, so (d) is the best answer.
- *17. (d) When a subsidiary is wholly owned, the form and content of the statement will be the same as, not different from, the income statement of an individual corporation. The other choices are true statements.

PRACTICE EXERCISES

1. Bach Company purchased 70 Lester Company 6%, 10-year, \$1,000 bonds on January 1, 2017, for \$70,000. The bonds pay interest annually on January 1. On January 1, 2018, after receipt of interest, Bach Company sold 42 of the bonds for \$39,100.

Journalize debt investment transactions, accrue interest, and record sale.

(LO 1)

Instructions

Prepare the journal entries to record the transactions described above.

Solution

1.	January 1, 2017		
Debt Investments	70,000		70,000
Cash			
	December 31, 2017		
Interest Receivable	4,200		4,200
Interest Revenue ($\$70,000 \times 6\%$)			
	January 1, 2018		
Cash	4,200		4,200
Interest Receivable			
	January 1, 2018		
Cash	39,100		
Loss On Sale of Debt Investments	2,900		
Debt Investments ($42/70 \times \$70,000$)			42,000

Journalize stock investment transactions.

(LO 2)

2. Cannon Company had the following transactions in 2017 pertaining to stock investments.

Feb. 1 Purchased 600 shares of Ronin common stock (2%) for \$6,000 cash.

July 1 Received cash dividends of \$1 per share on Ronin common stock.

Sept. 1 Sold 300 shares of Ronin common stock for \$4,200.

Dec. 1 Received cash dividends of \$1 per share on Ronin common stock.

Instructions

Journalize the transactions.

Solution

2.	February 1, 2017		
Stock Investments ($600 \times \$10$)	6,000		6,000
Cash			
	July 1, 2017		
Cash ($600 \times \$1$)	600		600
Dividend Revenue			
	September 1, 2017		
Cash	4,200		3,000

Gain on Sale of Stock Investments			1,200
	December 1, 2017		
Cash ($300 \times \$1$)	300		300
Dividend Revenue			

Prepare adjusting entries for fair value, and indicate statement presentation for two classes of securities.

(LO 3)

3. Sunshine Company started business on January 1, 2017, and has the following data at December 31, 2017.

<u>Securities</u>	<u>Cost</u>	<u>Fair Value</u>
Trading	\$120,000	\$125,000
Available-for-sale	100,000	96,000

The available-for-sale securities are held as a long-term investment.

Instructions

(a) Prepare the adjusting entries to report each class of securities at fair value.

(b) Indicate the statement presentation of each class of securities and the related unrealized gain (loss) accounts.

Solution

3. (a)		December 31, 2017	
Fair Value Adjustment—Trading (\$125,000 – \$120,000)	5,000		5,000
Unrealized Gain—Income			5,000
Unrealized Gain or Loss—Equity (\$100,000 – \$96,000)	4,000		
Fair Value Adjustment—Available-for-Sale			4,000
(b)		Balance Sheet	
Current assets			
Short-term investments, at fair value	\$125,000		
Investments			
Investments in stock of less than 20% owned companies, at fair value	96,000		
Stockholders' equity			
Less: Unrealized loss on available-for-sale securities	\$ 4,000		
		Income Statement	
Other revenues and gains			
Unrealized gain on trading securities	\$ 5,000		

PRACTICE PROBLEM

In its first year of operations, DeMarco Company had the following selected transactions in stock investments that are considered trading securities.

- June 1 Purchased for cash 600 shares of Sanburg common stock at \$24 per share.
 July 1 Purchased for cash 800 shares of Cey Corporation common stock at \$33 per share.
 Sept. 1 Received a \$1 per share cash dividend from Cey Corporation.
 Nov. 1 Sold 200 shares of Sanburg common stock for cash at \$27 per share.
 Dec. 15 Received a \$0.50 per share cash dividend on Sanburg common stock.

Journalize transactions and prepare adjusting entry to record fair value.

(LO 2, 3)

At December 31, the fair values per share were Sanburg \$25 and Cey \$30.

Instructions

- (a) Journalize the transactions.
 (b) Prepare the adjusting entry at December 31 to report the securities at fair value.

Solution

(a) June 1	Stock Investments	14,400	
	Cash (600 × \$24)		14,400
	(To record purchase of 600 shares of Sanburg common stock)		
July 1	Stock Investments	26,400	
	Cash (800 × \$33)		26,400
	(To record purchase of 800 shares of Cey common stock)		
Sept. 1	Cash (800 × \$1.00)	800	
	Dividend Revenue		800
	(To record receipt of \$1 per share cash dividend from Cey Corporation)		
Nov. 1	Cash (200 × \$27)	5,400	
	Stock Investments (200 × \$24)		4,800
	Gain on Sale of Stock Investments		600
	(To record sale of 200 shares of Sanburg common stock)		

Dec. 15	Cash [(600 – 200) × \$0.50] Dividend Revenue (To record receipt of \$0.50 per share dividend from Sanburg)	200	200
(b) Dec. 31	Unrealized Loss—Income Fair Value Adjustment—Trading (To record unrealized loss on trading securities)	2,000	2,000

Investment	Cost	Fair Value	Unrealized Gain (Loss)
Sanburg common stock	\$ 9,600 ^a	\$10,000 ^b	\$ 400
Cey common stock	26,400 ^c	24,000 ^d	(2,400)
Total	<u>\$36,000</u>	<u>\$34,000</u>	<u>\$(2,000)</u>

^a400 × \$24; ^b400 × \$25; ^c800 × \$33; ^d800 × \$30

WileyPLUS

Brief Exercises, Exercises, **DO IT!** Exercises, and Problems and many additional resources are available for practice in WileyPLUS

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

QUESTIONS

- What are the reasons that corporations invest in securities?
- (a) What is the cost of an investment in bonds?
(b) When is interest on bonds recorded?
- Alex Ramirez is confused about losses and gains on the sale of debt investments. Explain to Alex (a) how the gain or loss is computed, and (b) the statement presentation of the gains and losses.
- Seibel Company sells Mayo's bonds costing \$40,000 for \$45,000. Seibel records a \$5,000 gain on this sale. Is this correct? Explain.
- What is the cost of an investment in stock?
- To acquire Peoples Corporation stock, J. Rich pays \$62,000 in cash. What entry should be made for this investment?
- (a) When should a long-term investment in common stock be accounted for by the equity method?
(b) When is revenue recognized under this method?
- Ling Corporation uses the equity method to account for its ownership of 35% of the common stock of Gorman Packing. During 2017, Gorman reported a net income of \$80,000 and declares and pays cash dividends of \$10,000. What recognition should Ling Corporation give to these events?
- What constitutes "significant influence" when an investor's financial interest is below the 50% level?
- Distinguish between the cost and equity methods of accounting for investments in stocks.
- What are consolidated financial statements?
- What are the classification guidelines for investments at a balance sheet date?
- Jill Hollern is the controller of Chavez Inc. At December 31, the company's investments in trading securities cost \$74,000. They have a fair value of \$72,000. Indicate how Jill would report these data in the financial statements prepared on December 31.
- Using the data in Question 13, how would Jill report the data if the investments were long-term and the securities were classified as available-for-sale?
- Culver Company's investments in available-for-sale securities at December 31 show total cost of \$195,000 and total fair value of \$205,000. Prepare the adjusting entry.
- Using the data in Question 15, prepare the adjusting entry assuming the securities are classified as trading securities.
- What is the proper statement presentation of the account Unrealized Loss—Equity?
- What purposes are served by reporting Unrealized Gain or Loss—Equity in the stockholders' equity section?
- Deering Wholesale Supply owns stock in Orr Corporation. Deering intends to hold the stock indefinitely because of some negative tax consequences if sold. Should the investment in Orr be classified as a short-term investment? Why or why not?
- What does **Apple** state regarding its accounting policy involving consolidated financial statements?
- (a) What asset and stockholders' equity balances are eliminated in preparing a consolidated balance sheet for a parent and a wholly owned subsidiary? (b) Why are they eliminated?
- Roscoe Company pays \$318,000 to purchase all the outstanding common stock of Lia Corporation. At the date of purchase, the net assets of Lia have a book value of \$290,000. Roscoe's management allocates \$20,000 of the excess cost to undervalued land on the books of Lia. What should be done with the rest of the excess?

BRIEF EXERCISES

- BE12-1** Ownbey Corporation purchased debt investments for \$52,000 on January 1, 2017. On July 1, 2017, Ownbey received cash interest of \$2,340. Journalize the purchase and the receipt of interest. Assume that no interest has been accrued. *Journalize entries for debt investments.*
(LO 1)
- BE12-2** On August 1, Shaw Company buys 1,000 shares of Estrada common stock for \$37,000 cash. On December 1, Shaw sells the stock investments for \$40,000 in cash. Journalize the purchase and sale of the common stock. *Journalize entries for stock investments.*
(LO 2)
- BE12-3** Noler Company owns 25% of Lauer Company. For the current year, Lauer reports net income of \$180,000 and declares and pays a \$50,000 cash dividend. Record Noler's equity in Lauer's net income and the receipt of dividends from Lauer. *Record transactions under the equity method of accounting.*
(LO 2)
- BE12-4** The cost of the trading securities of Munoz Company at December 31, 2017, is \$64,000. At December 31, 2017, the fair value of the securities is \$59,000. Prepare the adjusting entry to record the securities at fair value. *Prepare adjusting entry using fair value.*
(LO 3)
- BE12-5** For the data presented in BE12-4, show the financial statement presentation of the trading securities and related accounts. *Indicate statement presentation using fair value.*
(LO 3)
- BE12-6** Godfrey Corporation holds, as a long-term investment, available-for-sale securities costing \$72,000. At December 31, 2017, the fair value of the securities is \$68,000. Prepare the adjusting entry to record the securities at fair value. *Prepare adjusting entry using fair value.*
(LO 3)
- BE12-7** For the data presented in BE12-6, show the financial statement presentation of the available-for-sale securities and related accounts. Assume the available-for-sale securities are noncurrent. *Indicate statement presentation using fair value.*
(LO 3)
- BE12-8** Kruger Corporation has the following long-term investments. (1) Common stock of Eidman Co. (10% ownership) held as available-for-sale securities, cost \$108,000, fair value \$115,000. (2) Common stock of Pickerill Inc. (30% ownership), cost \$210,000, equity \$260,000. Prepare the investments section of the balance sheet. *Prepare investments section of balance sheet.*
(LO 3)
- *BE12-9** Paula Company acquires 100% of the common stock of Shannon Company for \$190,000 cash. On the acquisition date, Shannon's ledger shows Common Stock \$120,000 and Retained Earnings \$70,000. Complete the worksheet for the following accounts: Paula—Investment in Shannon Common Stock, Shannon—Common Stock, and Shannon—Retained Earnings. *Prepare partial consolidated worksheet when cost equals book value.*
(LO 4)
- *BE12-10** Data for the Paula and Shannon companies are given in BE12-9. Instead of paying \$190,000, assume that Paula pays \$200,000 to acquire the 100% interest in Shannon Company. Complete the worksheet for the accounts identified in BE12-9 and for the excess of cost over book value. *Prepare partial consolidated worksheet when cost exceeds book value.*
(LO 4)

DO IT! Exercises

DO IT! 12-1 Kurtyka Corporation had the following transactions relating to debt investments:

- Jan. 1, 2017 Purchased 50 \$1,000, 10% Spiller Company bonds for \$50,000. Interest is payable annually on January 1.
- Dec. 31, 2017 Accrued interest on Spiller Company bonds.
- Jan. 1, 2018 Received interest from Spiller Company bonds.
- Jan. 1, 2018 Sold 30 Spiller Company bonds for \$29,000.

(a) Journalize the transactions, and (b) prepare the adjusting entry for the accrual of interest on December 31, 2017.

Make journal entry for bond purchase and adjusting entry for interest accrual.

(LO 1)

Make journal entries for stock investments.

(LO 2)

DO IT! 12-2 Presented below are two independent situations:

1. Edelman Inc. acquired 10% of the 500,000 shares of common stock of Schuburger Corporation at a total cost of \$11 per share on June 17, 2017. On September 3, Schuburger declared and paid a \$160,000 dividend. On December 31, Schuburger reported net income of \$550,000 for the year.
2. Wen Corporation obtained significant influence over Hunsaker Company by buying 30% of Hunsaker's 100,000 outstanding shares of common stock at a cost of \$18 per share on January 1, 2017. On May 15, Hunsaker declared and paid a cash dividend of \$150,000. On December 31, Hunsaker reported net income of \$270,000 for the year.

Prepare all necessary journal entries for 2017 for (a) Edelman and (b) Wen.

Make journal entries for trading and available-for-sale securities.

(LO 3)

DO IT! 12-3a Some of Tollakson Corporation's investment securities are classified as trading securities and some are classified as available-for-sale. The cost and fair value of each category at December 31, 2017, were as follows.

	<u>Cost</u>	<u>Fair Value</u>	<u>Unrealized Gain (Loss)</u>
Trading securities	\$96,300	\$84,900	\$(11,400)
Available-for-sale securities	\$59,000	\$63,200	\$ 4,200

At December 31, 2016, the Fair Value Adjustment—Trading account had a debit balance of \$3,200, and the Fair Value Adjustment—Available-for-Sale account had a credit balance of \$5,750. Prepare the required journal entries for each group of securities for December 31, 2017.

Indicate financial statement presentation of investments.

(LO 3)

DO IT! 12-3b Identify where each of the following items would be reported in the financial statements.

1. Loss on sale of investments in stock.
2. Unrealized gain on available-for-sale securities.
3. Fair value adjustment—trading.
4. Interest earned on investments in bonds.
5. Unrealized loss on trading securities.

Use the following possible categories:

Balance sheet:

Current assets	Current liabilities
Investments	Long-term liabilities
Property, plant, and equipment	Stockholders' equity
Intangible assets	

Income statement:

Other revenues and gains	Other expenses and losses
--------------------------	---------------------------

EXERCISES

Understand debt and stock investments.

(LO 1)

E12-1 Mr. Taliaferro is studying for an accounting test and has developed the questions below about investments.

1. What are three reasons why companies purchase investments in debt or stock securities?
2. Why would a corporation have excess cash that it does not need for operations?
3. What is the typical investment when investing cash for short periods of time?
4. What are the typical investments when investing cash to generate earnings?
5. Why would a company invest in securities that provide no current cash flows?
6. What is the typical stock investment when investing cash for strategic reasons?

Instructions

Provide answers for Mr. Taliaferro.

Journalize debt investment transactions and accrue interest.

(LO 1)

E12-2 Jenek Corporation had the following transactions pertaining to debt investments.

1. Purchased 50 9%, \$1,000 Leeds Co. bonds for \$50,000 cash. Interest is payable annually on January 1, 2017.
2. Accrued interest on Leeds Co. bonds on December 31, 2017.
3. Received interest on Leeds Co. bonds on January 1, 2018.
4. Sold 30 Leeds Co. bonds for \$33,000 on January 1, 2018.

Instructions

Journalize the transactions.

E12-3 Flynn Company purchased 70 Rinehart Company 6%, 10-year, \$1,000 bonds on January 1, 2017 for \$70,000. The bonds pay interest annually on January 1. On January 1, 2018, after receipt of interest, Flynn Company sold 40 of the bonds for \$38,500.

Journalize debt investment transactions, accrue interest, and record sale.

(LO 1)

Instructions

Prepare the journal entries to record the transactions described above.

E12-4 Hulse Company had the following transactions pertaining to stock investments.

Journalize stock investment transactions.

Feb. 1 Purchased 600 shares of Wade common stock (2%) for \$7,200 cash.

July 1 Received cash dividends of \$1 per share on Wade common stock.

Sept. 1 Sold 300 shares of Wade common stock for \$4,300.

Dec. 1 Received cash dividends of \$1 per share on Wade common stock.

(LO 2)

Instructions

(a) Journalize the transactions.

(b) Explain how dividend revenue and the gain (loss) on sale should be reported in the income statement.

E12-5 Nosker Inc. had the following transactions pertaining to investments in common stock.

Journalize transactions for investments in stocks.

Jan. 1 Purchased 2,500 shares of Escalante Corporation common stock (5%) for \$152,000 cash.

July 1 Received a cash dividend of \$3 per share.

Dec. 1 Sold 500 shares of Escalante Corporation common stock for \$32,000 cash.

Dec. 31 Received a cash dividend of \$3 per share.

(LO 2)

Instructions

Journalize the transactions.

E12-6 On February 1, Rinehart Company purchased 500 shares (2% ownership) of Givens Company common stock for \$32 per share. On March 20, Rinehart Company sold 100 shares of Givens stock for \$2,900. Rinehart received a dividend of \$1.00 per share on April 25. On June 15, Rinehart sold 200 shares of Givens stock for \$7,600. On July 28, Rinehart received a dividend of \$1.25 per share.

Journalize transactions for investments in stocks.

(LO 2)

Instructions

Prepare the journal entries to record the transactions described above.

E12-7 On January 1, Zabel Corporation purchased a 25% equity in Helbert Corporation for \$180,000. At December 31, Helbert declared and paid a \$60,000 cash dividend and reported net income of \$200,000.

Journalize and post transactions, under the equity method.

(LO 2)

Instructions

(a) Journalize the transactions.

(b) Determine the amount to be reported as an investment in Helbert stock at December 31.

E12-8 Presented below are two independent situations.

Journalize entries under cost and equity methods.

1. Gambino Cosmetics acquired 10% of the 200,000 shares of common stock of Nevins Fashion at a total cost of \$13 per share on March 18, 2017. On June 30, Nevins declared and paid a \$60,000 dividend. On December 31, Nevins reported net income of \$122,000 for the year. At December 31, the market price of Nevins Fashion was \$15 per share. The stock is classified as available-for-sale.

(LO 2, 3)

2. Kanza, Inc., obtained significant influence over Rogan Corporation by buying 40% of Rogan's 30,000 outstanding shares of common stock at a total cost of \$9 per share on January 1, 2017. On June 15, Rogan declared and paid a cash dividend of \$30,000. On December 31, Rogan reported a net income of \$80,000 for the year.

Instructions

Prepare all the necessary journal entries for 2017 for (a) Gambino Cosmetics and (b) Kanza, Inc.

E12-9 Agee Company purchased 70% of the outstanding common stock of Himes Corporation.

Understand the usefulness of consolidated statements.

(LO 2)

Instructions

- (a) Explain the relationship between Agee Company and Himes Corporation.
 (b) How should Agee account for its investment in Himes?
 (c) Why is the accounting treatment described in (b) useful?

Prepare adjusting entry to record fair value, and indicate statement presentation.

(LO 3)

E12-10 At December 31, 2017, the trading securities for Storrer, Inc. are as follows.

Security	Cost	Fair Value
A	\$17,500	\$16,000
B	12,500	14,000
C	23,000	21,000
	\$53,000	\$51,000

Instructions

- (a) Prepare the adjusting entry at December 31, 2017, to report the securities at fair value.
 (b) Show the balance sheet and income statement presentation at December 31, 2017, after adjustment to fair value.

Prepare adjusting entry to record fair value, and indicate statement presentation.

(LO 3)

E12-11 Data for investments in stock classified as trading securities are presented in E12-10. Assume instead that the investments are classified as available-for-sale securities. They have the same cost and fair value. The securities are considered to be a long-term investment.

Instructions

- (a) Prepare the adjusting entry at December 31, 2017, to report the securities at fair value.
 (b) Show the statement presentation at December 31, 2017, after adjustment to fair value.
 (c) E. Kretsinger, a member of the board of directors, does not understand the reporting of the unrealized gains or losses. Write a letter to Ms. Kretsinger explaining the reporting and the purposes that it serves.

Prepare adjusting entries for fair value, and indicate statement presentation for two classes of securities.

(LO 3)

E12-12 Uttinger Company has the following data at December 31, 2017.

Securities	Cost	Fair Value
Trading	\$120,000	\$126,000
Available-for-sale	100,000	96,000

The available-for-sale securities are held as a long-term investment.

Instructions

- (a) Prepare the adjusting entries to report each class of securities at fair value.
 (b) Indicate the statement presentation of each class of securities and the related unrealized gain (loss) accounts.

Prepare consolidated worksheet when cost exceeds book value.

(LO 4)

***E12-13** On January 1, 2017, Lennon Corporation acquires 100% of Ono Inc. for \$220,000 in cash. The condensed balance sheets of the two corporations immediately following the acquisition are shown below.

	Lennon Corporation	Ono Inc.
Current assets	\$ 60,000	\$ 50,000
Investment in Ono Inc. common stock	220,000	
Plant and equipment (net)	300,000	220,000
	\$580,000	\$270,000
Current liabilities	\$180,000	\$ 50,000
Common stock	230,000	80,000
Retained earnings	170,000	140,000
	\$580,000	\$270,000

Instructions

Prepare a worksheet for a consolidated balance sheet.

***E12-14** Data for the Lennon and Ono corporations are presented in E12-13. Assume that instead of paying \$220,000 in cash for Ono Inc., Lennon Corporation pays \$225,000 in cash. Thus, at the acquisition date, the assets of Lennon Corporation are current assets \$55,000, investment in Ono Inc. common stock \$225,000, and plant and equipment (net) \$300,000.

Prepare consolidated worksheet when cost exceeds book value.

(LO 4)

Instructions

Prepare a worksheet for a consolidated balance sheet.

EXERCISES: SET B AND CHALLENGE EXERCISES

Visit the book's companion website, at www.wiley.com/college/veygandt, and choose the Student Companion site to access Exercises: Set B and Challenge Exercises.

PROBLEMS: SET A

P12-1A Vilander Carecenters Inc. provides financing and capital to the healthcare industry, with a particular focus on nursing homes for the elderly. The following selected transactions relate to bonds acquired as an investment by Vilander, whose fiscal year ends on December 31.

Journalize debt investment transactions and show financial statement presentation.

(LO 1, 3)

2017

- Jan. 1 Purchased at face value \$2,000,000 of Javier Nursing Centers, Inc., 10-year, 8% bonds dated January 1, 2017, directly from Javier.
Dec. 31 Accrual of interest at year-end on the Javier bonds.

(Assume that all intervening transactions and adjustments have been properly recorded and that the number of bonds owned has not changed from December 31, 2017, to December 31, 2019.)

2020

- Jan. 1 Received the annual interest on the Javier bonds.
Jan. 1 Sold \$1,000,000 Javier bonds at 106.
Dec. 31 Accrual of interest at year-end on the Javier bonds.

Instructions

- (a) Journalize the listed transactions for the years 2017 and 2020.
(b) Assume that the fair value of the bonds at December 31, 2017, was \$2,200,000. These bonds are classified as available-for-sale securities. Prepare the adjusting entry to record these bonds at fair value.
(c) Based on your analysis in part (b), show the balance sheet presentation of the bonds and interest receivable at December 31, 2017. Assume the investments are considered long-term. Indicate where any unrealized gain or loss is reported in the financial statements.

(a) Gain on sale of debt investment \$60,000

P12-2A In January 2017, the management of Kinzie Company concludes that it has sufficient cash to permit some short-term investments in debt and stock securities. During the year, the following transactions occurred.

Journalize investment transactions, prepare adjusting entry, and show statement presentation.

(LO 1, 2, 3)

- Feb. 1 Purchased 600 shares of Muninger common stock for \$32,400.
Mar. 1 Purchased 800 shares of Tatman common stock for \$20,000.
Apr. 1 Purchased 50 \$1,000, 7% Yoakem bonds for \$50,000. Interest is payable semiannually on April 1 and October 1.
July 1 Received a cash dividend of \$0.60 per share on the Muninger common stock.
Aug. 1 Sold 200 shares of Muninger common stock at \$58 per share.
Sept. 1 Received a \$1 per share cash dividend on the Tatman common stock.
Oct. 1 Received the semiannual interest on the Yoakem bonds.
Oct. 1 Sold the Yoakem bonds for \$49,000.

At December 31, the fair value of the Muninger common stock was \$55 per share. The fair value of the Tatman common stock was \$24 per share.

(a) Gain on sale of stock investment \$800

Instructions

- Journalize the transactions and post to the accounts Debt Investments and Stock Investments. (Post in T-account form.)
- Prepare the adjusting entry at December 31, 2017, to report the investments at fair value. All securities are considered to be trading securities.
- Show the balance sheet presentation of investments at December 31, 2017.
- Identify the income statement accounts and give the statement classification of each account.

Journalize transactions and adjusting entry for stock investments

(LO 2, 3)

P12-3A On December 31, 2017, Turnball Associates owned the following securities, held as a long-term investment. The securities are not held for influence or control of the investee.

<u>Common Stock</u>	<u>Shares</u>	<u>Cost</u>
Gehring Co.	2,000	\$60,000
Wooderson Co.	5,000	45,000
Kitselton Co.	1,500	30,000

On December 31, 2017, the total fair value of the securities was equal to its cost. In 2018, the following transactions occurred.

- | | |
|---------|--|
| Aug. 1 | Received \$0.50 per share cash dividend on Gehring Co. common stock. |
| Sept. 1 | Sold 1,500 shares of Wooderson Co. common stock for cash at \$8 per share. |
| Oct. 1 | Sold 800 shares of Gehring Co. common stock for cash at \$33 per share. |
| Nov. 1 | Received \$1 per share cash dividend on Kitselton Co. common stock. |
| Dec. 15 | Received \$0.50 per share cash dividend on Gehring Co. common stock. |
| 31 | Received \$1 per share annual cash dividend on Wooderson Co. common stock. |

At December 31, the fair values per share of the common stocks were Gehring Co. \$32, Wooderson Co. \$8, and Kitselton Co. \$18.

Instructions

(b) Unrealized loss \$4,100

- Journalize the 2018 transactions and post to the account Stock Investments. (Post in T-account form.)
- Prepare the adjusting entry at December 31, 2018, to show the securities at fair value. The stock should be classified as available-for-sale securities.
- Show the balance sheet presentation of the investment-related accounts at December 31, 2018. At this date, Turnball Associates has common stock \$1,500,000 and retained earnings \$1,000,000.

Prepare entries under the cost and equity methods, and tabulate differences.

(LO 2)

P12-4A Heidebrecht Design acquired 20% of the outstanding common stock of Quayle Company on January 1, 2017, by paying \$800,000 for the 30,000 shares. Quayle declared and paid \$0.30 per share cash dividends on March 15, June 15, September 15, and December 15, 2017. Quayle reported net income of \$320,000 for the year. At December 31, 2017, the market price of Quayle common stock was \$34 per share.

Instructions

(a) Total dividend revenue \$36,000

(b) Revenue from stock investments \$64,000

- Prepare the journal entries for Heidebrecht Design for 2017 assuming Heidebrecht Design cannot exercise significant influence over Quayle. Use the cost method and assume that Quayle common stock should be classified as a trading security.
- Prepare the journal entries for Heidebrecht Design for 2017 assuming Heidebrecht Design can exercise significant influence over Quayle. Use the equity method.
- Indicate the balance sheet and income statement account balances at December 31, 2017, under each method of accounting.

Journalize stock investment transactions and show statement presentation.

(LO 2, 3)

P12-5A The following securities are in Frederick Company's portfolio of long-term available-for-sale securities at December 31, 2017.

	<u>Cost</u>
1,000 shares of Willhite Corporation common stock	\$52,000
1,400 shares of Hutcherson Corporation common stock	84,000
1,200 shares of Downing Corporation preferred stock	33,600

On December 31, 2017, the total cost of the portfolio equaled total fair value. Frederick had the following transactions related to the securities during 2018.

- Jan. 20 Sold all 1,000 shares of Willhite Corporation common stock at \$55 per share.
 28 Purchased 400 shares of \$70 par value common stock of Liggett Corporation at \$78 per share.
 30 Received a cash dividend of \$1.15 per share on Hutcherson Corporation common stock.
- Feb. 8 Received cash dividends of \$0.40 per share on Downing Corporation preferred stock.
 18 Sold all 1,200 shares of Downing Corp. preferred stock at \$27 per share.
- July 30 Received a cash dividend of \$1.00 per share on Hutcherson Corporation common stock.
- Sept. 6 Purchased an additional 900 shares of \$10 par value common stock of Liggett Corporation at \$82 per share.
- Dec. 1 Received a cash dividend of \$1.50 per share on Liggett Corporation common stock.

At December 31, 2018, the fair values of the securities were:

Hutcherson Corporation common stock	\$64 per share
Liggett Corporation common stock	\$72 per share

Instructions

- (a) Prepare journal entries to record the transactions.
 (b) Post to the investment accounts. (Use T-accounts.)
 (c) Prepare the adjusting entry at December 31, 2018 to report the portfolio at fair value.
 (d) Show the balance sheet presentation at December 31, 2018, for the investment-related accounts.

- (a) Loss on sale of stock investment \$1,200
 (c) Unrealized loss \$5,800

P12-6A The following data, presented in alphabetical order, are taken from the records of Nieto Corporation.

Accounts payable	\$ 260,000
Accounts receivable	140,000
Accumulated depreciation—buildings	180,000
Accumulated depreciation—equipment	52,000
Allowance for doubtful accounts	6,000
Bonds payable (10%, due 2025)	500,000
Buildings	950,000
Cash	62,000
Common stock (\$10 par value; 500,000 shares authorized, 150,000 shares issued)	1,500,000
Dividends payable	80,000
Equipment	275,000
Fair value adjustment—available-for-sale securities (Dr)	8,000
Goodwill	200,000
Income taxes payable	120,000
Inventory	170,000
Investment in Mara common stock (30% ownership), at equity	380,000
Investment in Sasse common stock (10% ownership), at cost	278,000
Land	390,000
Notes payable (due 2018)	70,000
Paid-in capital in excess of par—common stock	130,000
Premium on bonds payable	40,000
Prepaid insurance	16,000
Retained earnings	103,000
Short-term investments, at fair value (and cost)	180,000
Unrealized gain—available-for-sale securities	8,000

The investment in Sasse common stock is considered to be a long-term available-for-sale security.

Instructions

Prepare a classified balance sheet at December 31, 2017.

Prepare a balance sheet.

(LO 3)

Total assets \$2,811,000

Prepare consolidated worksheet and balance sheet when cost exceeds book value.

(LO 4)

***P12-7A** Robinson Corporation purchased all the outstanding common stock of Hoffman Plastics, Inc. on December 31, 2017. Just before the purchase, the condensed balance sheets of the two companies appeared as follows.

	<u>Robinson Corporation</u>	<u>Hoffman Plastics, Inc.</u>
Current assets	\$1,480,000	\$ 435,500
Plant and equipment (net)	2,100,000	676,000
	<u>\$3,580,000</u>	<u>\$1,111,500</u>
Current liabilities	\$ 578,000	\$ 92,500
Common stock	1,950,000	525,000
Retained earnings	1,052,000	494,000
	<u>\$3,580,000</u>	<u>\$1,111,500</u>

Robinson used current assets of \$1,225,000 to acquire the stock of Hoffman Plastics. The excess of this purchase price over the book value of Hoffman Plastics' net assets is determined to be attributable \$86,000 to Hoffman Plastics' plant and equipment and the remainder to goodwill.

Instructions

(b) Excess of cost over book value \$120,000

- Prepare the entry for Robinson's acquisition of Hoffman Plastics, Inc. stock.
- Prepare a consolidated worksheet at December 31, 2017.
- Prepare a consolidated balance sheet at December 31, 2017.

PROBLEMS: SET B AND SET C

Visit the book's companion website, at www.wiley.com/college/weygandt, and choose the Student Companion site to access Problems: Set B and Set C.

COMPREHENSIVE PROBLEM: CHAPTERS 11 TO 12

CP12 Part I Debby Kauffman and her two colleagues, Jamie Hiatt and Ella Rincon, are personal trainers at an upscale health spa/resort in Tampa, Florida. They want to start a health club that specializes in health plans for people in the 50+ age range. The growing population in this age range and strong consumer interest in the health benefits of physical activity have convinced them they can profitably operate their own club. In addition to many other decisions, they need to determine what type of business organization they want. Jamie believes there are more advantages to the corporate form than a partnership, but he hasn't yet convinced Debby and Ella. They have come to you, a small-business consulting specialist, seeking information and advice regarding the choice of starting a partnership versus a corporation.

Instructions

- Prepare a memo (dated May 26, 2016) that describes the advantages and disadvantages of both partnerships and corporations. Advise Debby, Jamie, and Ella regarding which organizational form you believe would better serve their purposes. Make sure to include reasons supporting your advice.

Part II After deciding to incorporate, each of the three investors receives 20,000 shares of \$2 par common stock on June 12, 2016, in exchange for their co-owned building (\$200,000 fair value) and \$100,000 total cash they contributed to the business. The next decision that Debby, Jamie, and Ella need to make is how to obtain financing for renovation and equipment. They understand the difference between equity securities and debt securities, but do not understand the tax, net income, and earnings per share consequences of equity versus debt financing on the future of their business.

Instructions

- Prepare notes for a discussion with the three entrepreneurs in which you will compare the consequences of using equity versus debt financing. As part of your notes, show the differences in interest and tax expense assuming \$1,400,000 is financed with common stock, and then alternatively with debt. Assume that when common stock is used, 140,000 shares will be issued. When debt is used, assume the interest rate on debt is 9%, the tax rate is 32%, and income before interest and taxes is \$300,000. (You may want to use a computer spreadsheet.)

Part III During the discussion about financing, Ella mentions that one of her clients, Timothy Hansen, has approached her about buying a significant interest in the new club. Having an interested investor

sways the three to issue equity securities to provide the financing they need. On July 21, 2016, Mr. Hansen buys 90,000 shares at a price of \$10 per share.

The club, LifePath Fitness, opens on January 12, 2017, and after a slow start begins to produce the revenue desired by the owners. The owners decide to pay themselves a stock dividend since cash has been less than abundant since they opened their doors. The 10% stock dividend is declared by the owners on July 27, 2017. The market price of the stock is \$3 on the declaration date. The date of record is July 31, 2017 (there have been no changes in stock ownership since the initial issuance), and the issue date is August 15, 2017. By the middle of the fourth quarter of 2017, the cash flow of LifePath Fitness has improved to the point that the owners feel ready to pay themselves a cash dividend. They declare a \$0.05 cash dividend on December 4, 2017. The record date is December 14, 2017, and the payment date is December 24, 2017.

Instructions

- (c) (1) Record all of the transactions related to the common stock of LifePath Fitness during the years 2016 and 2017. (2) Indicate how many shares are issued and outstanding after the stock dividend is issued.

Part IV Since the club opened, a major concern has been the pool facilities. Although the existing pool is adequate, Debby, Jamie, and Ella all desire to make LifePath a cutting-edge facility. Until the end of 2017, financing concerns prevented this improvement. However, because there has been steady growth in clientele, revenue, and income since the third quarter of 2017, the owners have explored possible financing options. They are hesitant to issue stock and change the ownership mix because they have been able to work together as a team with great effectiveness. They have formulated a plan to issue secured term bonds to raise the needed \$600,000 for the pool facilities. By the end of December 2017, everything was in place for the bond issue to go ahead. On January 1, 2018, the bonds were issued for \$548,000. The bonds pay annual interest of 6% on January 1 of each year. The bonds mature in 10 years, and amortization is computed using the straight-line method.

Instructions

- (d) Record (1) the issuance of the secured bonds, (2) the adjusting entry required at December 31, 2018, (3) the interest payment made on January 1, 2019 and (4) the interest accrual on December 31, 2019.

Part V Mr. Hansen's purchase of the stock of LifePath Fitness was done through his business. The stock investment has always been accounted for using the cost method on his firm's books. However, early in 2019 he decided to take his company public. He is preparing an IPO (initial public offering), and he needs to have the firm's financial statements audited. One of the issues to be resolved is to restate the stock investment in LifePath Fitness using the equity method since Mr. Hansen's ownership percentage is greater than 20%.

Instructions

- (e) (1) Give the entries that would have been made on Hansen's books if the equity method of accounting for investments had been used from the initial investment through 2018. Assume the following data for LifePath.

	<u>2016</u>	<u>2017</u>	<u>2018</u>
Net income	\$30,000	\$70,000	\$105,000
Total cash dividends	\$ 2,100	\$20,000	\$ 50,000

- (2) Compute the balance in the Stock Investments account (as it relates to LifePath Fitness) at the end of 2018.

CONTINUING PROBLEM

COOKIE CREATIONS

(Note: This is a continuation of the Cookie Creations problem from Chapters 1 through 11.)

CC12 Natalie has been approached by Ken Thornton, a shareholder of The Beanery Coffee Inc. Ken wants to retire and would like to sell his 1,000 shares in The Beanery, which represent 30% of all shares issued. The Beanery is currently operated by Ken's twin daughters, who each own 35% of the common shares. The Beanery not only operates a coffee shop but also roasts and sells beans to retailers under the name "Rocky Mountain Beanery."

Ken has met with Curtis and Natalie to discuss the business operation. All have concluded that there would be many advantages for Cookie & Coffee Creations Inc. to acquire an interest in The Beanery Coffee. Despite the apparent advantages, however, Natalie and Curtis are still not convinced that they should participate in this business venture.

Go to the book's companion website, www.wiley.com/college/weygandt, to see the completion of this problem.

BROADENING YOUR PERSPECTIVE**FINANCIAL REPORTING AND ANALYSIS****Financial Reporting Problem: Apple Inc.**

BYP12-1 The annual report of **Apple Inc.** is presented in Appendix A. Instructions for accessing and using the company's complete annual report, including the notes to the financial statements, are also provided in Appendix A.

Instructions

- (a) Determine the percentage increase for (1) short-term marketable securities from 2012 to 2013, and (2) long-term marketable securities from 2012 to 2013.
- (b) Using Apple's consolidated statement of cash flows, determine:
 - (1) Purchases of marketable securities during the current year.
 - (2) How much was spent for business acquisitions, net of cash acquired during the current year.

Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

BYP12-2 **PepsiCo's** financial statements are presented in Appendix B. Financial statements of **The Coca-Cola Company** are presented in Appendix C. Instructions for accessing and using the complete annual reports of PepsiCo and Coca-Cola, including the notes to the financial statements, are also provided in Appendices B and C, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine the following for each company.
 - (1) Net cash used in investing (investment) activities for the current year (from the statement of cash flows).
 - (2) Cash used for capital expenditures during the current year.
- (b) Each of PepsiCo's financial statements is labeled "consolidated." What has been consolidated? That is, from the contents of PepsiCo's annual report, identify by name the corporations that have been consolidated (parent and subsidiaries).

Comparative Analysis Problem: Amazon.com, Inc. vs. Wal-Mart Stores, Inc.

BYP12-3 **Amazon.com, Inc.'s** financial statements are presented in Appendix D. Financial statements of **Wal-Mart Stores, Inc.** are presented in Appendix E. Instructions for accessing and using the complete annual reports of Amazon and Wal-Mart, including the notes to the financial statements, are also provided in Appendices D and E, respectively.

Instructions

- (a) Based on the information contained in these financial statements, determine the following for each company.
 - (1) Net cash used for investing (investment) activities for the current year (from the statement of cash flows).
 - (2) Cash used for business acquisitions, net of cash acquired during the current year.
- (b) Each of Amazon's financial statements is labeled "consolidated." What has been consolidated? That is, from the contents of Amazon's annual report, identify by name the corporations that have been consolidated (parent and subsidiaries).

Real-World Focus

BYP12-4 Most publicly traded companies are examined by numerous analysts. These analysts often don't agree about a company's future prospects. In this exercise, you will find analysts' ratings about companies and make comparisons over time and across companies in the same industry. You will also see to what extent the analysts experienced "earnings surprises." Earnings surprises can cause changes in stock prices.

Address: biz.yahoo.com/i, or go to www.wiley.com/college/weygandt

Steps

1. Choose a company.
2. Use the index to find the company's name.
3. Choose **Research**.

Instructions

- (a) How many analysts rated the company?
- (b) What percentage rated it a strong buy?
- (c) What was the average rating for the week?
- (d) Did the average rating improve or decline relative to the previous week?

CRITICAL THINKING**Decision-Making Across the Organization**

BYP12-5 At the beginning of the question-and-answer portion of the annual stockholders' meeting of Neosho Corporation, stockholder John Linton asks, "Why did management sell the holdings in JMB Company at a loss when this company has been very profitable during the period Neosho held its stock?"

Since president Tony Cedenno has just concluded his speech on the recent success and bright future of Neosho, he is taken aback by this question and responds, "I remember we paid \$1,300,000 for that stock some years ago. I am sure we sold that stock at a much higher price. You must be mistaken."

Linton retorts, "Well, right here in footnote number 7 to the annual report it shows that 240,000 shares, a 30% interest in JMB, were sold on the last day of the year. Also, it states that JMB earned \$520,000 this year and paid out \$160,000 in cash dividends. Further, a summary statement indicates that in past years, while Neosho held JMB stock, JMB earned \$1,240,000 and paid out \$440,000 in dividends. Finally, the income statement for this year shows a loss on the sale of JMB stock of \$180,000. So, I doubt that I am mistaken."

Red-faced, president Cedenno turns to you.

Instructions

With the class divided into groups, answer the following.

- (a) What dollar amount did Neosho receive upon the sale of the JMB stock?
- (b) Explain why both stockholder Linton and president Cedenno are correct.

Communication Activity

BYP12-6 Fegan Corporation has purchased two securities for its portfolio. The first is a stock investment in Plummer Corporation, one of its suppliers. Fegan purchased 10% of Plummer with the intention of holding it for a number of years, but has no intention of purchasing more shares. The second investment was a purchase of debt securities. Fegan purchased the debt securities because its analysts believe that changes in market interest rates will cause these securities to increase in value in a short period of time. Fegan intends to sell the securities as soon as they have increased in value.

Instructions

Write a memo to Sam Nichols, the chief financial officer, explaining how to account for each of these investments. Explain what the implications for reported income are from this accounting treatment.

Ethics Case

BYP12-7 Harding Financial Services Company holds a large portfolio of debt and stock securities as an investment. The total fair value of the portfolio at December 31, 2017, is greater than total cost. Some securities have increased in value and others have decreased. Ann Bales, the financial vice president, and Kim Reeble, the controller, are in the process of classifying for the first time the securities in the portfolio.

Bales suggests classifying the securities that have increased in value as trading securities in order to increase net income for the year. She wants to classify the securities that have decreased in value as long-term available-for-sale securities, so that the decreases in value will not affect 2017 net income.

Reeble disagrees. She recommends classifying the securities that have decreased in value as trading securities and those that have increased in value as long-term available-for-sale securities. Reeble argues that the company is having a good earnings year and that recognizing the losses now will help to smooth income for this year. Moreover, for future years, when the company may not be as profitable, the company will have built-in gains.

Instructions

- (a) Will classifying the securities as Bales and Reeble suggest actually affect earnings as each says it will?
- (b) Is there anything unethical in what Bales and Reeble propose? Who are the stakeholders affected by their proposals?
- (c) Assume that Bales and Reeble properly classify the portfolio. At year-end, Bales proposes to sell the securities that will increase 2017 net income, and Reeble proposes to sell the securities that will decrease 2017 net income. Is this unethical?

All About You

BYP12-8 The **Securities and Exchange Commission** (SEC) is the primary regulatory agency of U.S. financial markets. Its job is to ensure that the markets remain fair for all investors. The following SEC sites provide useful information for investors.

Address: www.sec.gov/answers.shtml and <http://www.sec.gov/investor/tools/quiz.htm>, or go to www.wiley.com/college/weygandt.

Instructions

- (a) Go to the first SEC site and find the definition of the following terms.
 - (i) Ask price.
 - (ii) Margin.
 - (iii) Prospectus.
 - (iv) Index fund.
- (b) Go to the second SEC site and take the short quiz.

FASB Codification Activity

BYP12-9 If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- (a) What is the definition of a trading security?
- (b) What is the definition of an available-for-sale security?
- (c) What is the definition of a held-to-maturity security?

**A Look at IFRS**LEARNING
OBJECTIVE**5****Compare the accounting for investments under GAAP and IFRS.**

Until recently, when the IASB issued *IFRS 9*, the accounting and reporting for investments under IFRS and GAAP were for the most part very similar. However, *IFRS 9* introduces a new framework for classifying investments.

Key Points

Following are the similarities and differences between GAAP and IFRS as related to investments.

Similarities

- The basic accounting entries to record the acquisition of debt securities, the receipt of interest, and the sale of debt securities are the same under IFRS and GAAP.
- The basic accounting entries to record the acquisition of stock investments, the receipt of dividends, and the sale of stock securities are the same under IFRS and GAAP.
- Both IFRS and GAAP use the same criteria to determine whether the equity method of accounting should be used—that is, significant influence with a general guide of over 20% ownership, IFRS uses the term **associate investment** rather than equity investment to describe its investment under the equity method.

- Equity investments are generally recorded and reported at fair value under IFRS. Equity investments do not have a fixed interest or principal payment schedule and therefore cannot be accounted for at amortized cost. In general, equity investments are valued at fair value, with all gains and losses reported in income, similar to GAAP.
- Unrealized gains and losses related to available-for-sale securities are reported in other comprehensive income under GAAP and IFRS. These gains and losses that accumulate are then reported in the balance sheet.

Differences

- Under IFRS, both the investor and an associate company should follow the same accounting policies. As a result, in order to prepare financial information, adjustments are made to the associate's policies to conform to the investor's books. GAAP does not have that requirement.
- In general, IFRS requires that companies determine how to measure their financial assets based on two criteria:
 - ◆ The company's business model for managing their financial assets; and
 - ◆ The contractual cash flow characteristics of the financial asset.

If a company has (1) a business model whose objective is to hold assets in order to collect contractual cash flows and (2) the contractual terms of the financial asset gives specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, then the company should use cost (often referred to as amortized cost).

For example, assume that **Mitsubishi** purchases a bond investment that it intends to hold to maturity (held-for-collection). Its business model for this type of investment is to collect interest and then principal at maturity. The payment dates for the interest rate and principal are stated on the bond. In this case, Mitsubishi accounts for the investment at cost. If, on the other hand, Mitsubishi purchased the bonds as part of a trading strategy to speculate on interest rate changes (a trading investment), then the debt investment is reported at fair value. As a result, only debt investments such as receivables, loans, and bond investments that meet the two criteria above are recorded at amortized cost. All other debt investments are recorded and reported at fair value.

Looking to the Future

As indicated earlier, the IASB has issued a new revised IFRS which deals with the accounting issues related to investment securities. The FASB is now in the final process of issuing a new standard in this area. It is likely that some differences will continue to exist between the IFRS and the FASB regarding investments.

IFRS Practice

IFRS Self-Test Questions

1. The following asset is **not** considered a financial asset under IFRS:
 - (a) trading securities.
 - (b) equity securities.
 - (c) held-for-collection securities.
 - (d) inventories.
2. Under IFRS, the equity method of accounting for long-term investments in common stock should be used when the investor has significant influence over an investee and owns:
 - (a) between 20% and 50% of the investee's common stock.
 - (b) 30% or more of the investee's common stock.
 - (c) more than 50% of the investee's common stock.
 - (d) less than 20% of the investee's common stock.
3. Under IFRS, the unrealized loss on trading investments should be reported:
 - (a) as part of other comprehensive loss reducing net income.
 - (b) on the income statement reducing net income.
 - (c) as part of other comprehensive loss not affecting net income.
 - (d) directly to stockholders' equity bypassing the income statement.

Answers to IFRS Self-Test Questions

1. d 2. a 3. b

13

Statement of Cash Flows

CHAPTER PREVIEW The balance sheet, income statement, and retained earnings statement do not always show the whole picture of the financial condition of a company or institution. In fact, looking at the financial statements of some well-known companies, a thoughtful investor might ask questions like these: How did **Eastman Kodak** finance cash dividends of \$649 million in a year in which it earned only \$17 million? How could **United Air Lines** purchase new planes that cost \$1.9 billion in a year in which it reported a net loss of over \$2 billion? How did the companies that spent a combined fantastic \$3.4 trillion on mergers and acquisitions in a recent year finance those deals? Answers to these and similar questions can be found in this chapter, which presents the statement of cash flows.

FEATURE STORY

Got Cash?

Companies must be ready to respond to changes quickly in order to survive and thrive. This requires careful management of cash. One company that managed cash successfully in its early years was **Microsoft**. During those years, the company paid much of its payroll with stock options (rights to purchase company stock in the future at a given price) instead of cash. This conserved cash and turned more than a thousand of its employees into millionaires.

In recent years, Microsoft has had a different kind of cash problem. Now that it has reached a more “mature” stage in life, it generates so much cash—roughly \$1 billion per month—that it cannot always figure out what to do with it. At one time, Microsoft had accumulated \$60 billion.

The company said it was accumulating cash to invest in new opportunities, buy other companies, and pay off pending lawsuits. Microsoft’s stockholders complained that holding all this cash was putting a drag on the company’s profitability. Why? Because Microsoft had the cash invested in very low-yielding government securities. Stockholders felt that the company either should find new investment projects that would bring higher returns, or return some of the cash to stockholders.

Finally, Microsoft announced a plan to return cash to stockholders by paying a special one-time \$32 billion

dividend. This special dividend was so large that, according to the U.S. Commerce Department, it caused total personal income in the United States to rise by 3.7% in one month—the largest increase ever recorded by the agency. (It also made the holiday season brighter, especially for retailers in the Seattle area.) Microsoft also doubled its regular annual dividend to \$3.50 per share. Further, it announced that it would spend another \$30 billion buying treasury stock.

Apple also has encountered this cash “problem.” Recently, Apple had nearly \$100 billion in liquid assets (cash, cash equivalents, and investment securities). The company was generating \$37 billion of cash per year from its operating activities but spending only about \$7 billion on plant assets and purchases of patents. Shareholders pressured Apple to unload some of this cash. In response, Apple announced that it would begin to pay a quarterly dividend of \$2.65 per share and it would buy back up to \$10 billion of its stock. Analysts noted that the dividend consumes only \$10 billion of cash per year. This leaves Apple wallowing in cash. The rest of us should have such problems.

Discuss the usefulness and format of the statement of cash flows.

The balance sheet, income statement, and retained earnings statement provide only limited information about a company's cash flows (cash receipts and cash payments). For example, comparative balance sheets show the increase in property, plant, and equipment during the year. But, they do not show how the additions were financed or paid for. The income statement shows net income. But, it does not indicate the amount of cash generated by operating activities. The retained earnings statement shows cash dividends declared but not the cash dividends paid during the year. None of these statements presents a detailed summary of where cash came from and how it was used.

Usefulness of the Statement of Cash Flows

The **statement of cash flows** reports the cash receipts, cash payments, and net change in cash resulting from operating, investing, and financing activities during a period. The information in a statement of cash flows helps investors, creditors, and others assess the following.

- 1. The entity's ability to generate future cash flows.** By examining relationships between items in the statement of cash flows, investors can better predict the amounts, timing, and uncertainty of future cash flows than they can from accrual-basis data.
- 2. The entity's ability to pay dividends and meet obligations.** If a company does not have adequate cash, it cannot pay employees, settle debts, or pay dividends. Employees, creditors, and stockholders should be particularly interested in this statement because it alone shows the flows of cash in a business.
- 3. The reasons for the difference between net income and net cash provided (used) by operating activities.** Net income provides information on the success or failure of a business. However, some financial statement users are critical of accrual-basis net income because it requires many estimates. As a result, users often challenge the reliability of the number. Such is not the case with cash. Many readers of the statement of cash flows want to know the reasons for the difference between net income and net cash provided by operating activities. Then, they can assess for themselves the reliability of the income number.
- 4. The cash investing and financing transactions during the period.** By examining a company's investing and financing transactions, a financial statement reader can better understand why assets and liabilities changed during the period.

ETHICS NOTE

Though we discourage reliance on cash flows to the exclusion of accrual accounting, comparing net cash provided by operating activities to net income can reveal important information about the "quality" of reported net income. Such a comparison can reveal the extent to which net income provides a good measure of actual performance.

Classification of Cash Flows

The statement of cash flows classifies cash receipts and cash payments as operating, investing, and financing activities. Transactions and other events characteristic of each kind of activity are as follows.

- 1. Operating activities** include the cash effects of transactions that create revenues and expenses. They thus enter into the determination of net income.
- 2. Investing activities** include (a) acquiring and disposing of investments and property, plant, and equipment, and (b) lending money and collecting the loans.
- 3. Financing activities** include (a) obtaining cash from issuing debt and repaying the amounts borrowed, and (b) obtaining cash from stockholders, repurchasing shares, and paying dividends.

The operating activities category is the most important. It shows the cash provided by company operations. This source of cash is generally considered to be the best measure of a company's ability to generate sufficient cash to continue as a going concern.

Illustration 13-1 lists typical cash receipts and cash payments within each of the three classifications. **Study the list carefully.** It will prove very useful in solving homework exercises and problems.

TYPES OF CASH INFLOWS AND OUTFLOWS

Operating activities—Income statement items

Cash inflows:

- From sale of goods or services.
- From interest received and dividends received.

Cash outflows:

- To suppliers for inventory.
- To employees for wages.
- To government for taxes.
- To lenders for interest.
- To others for expenses.

Investing activities—Changes in investments and long-term assets

Cash inflows:

- From sale of property, plant, and equipment.
- From sale of investments in debt or equity securities of other entities.
- From collection of principal on loans to other entities.

Cash outflows:

- To purchase property, plant, and equipment.
- To purchase investments in debt or equity securities of other entities.
- To make loans to other entities.

Financing activities—Changes in long-term liabilities and stockholders' equity

Cash inflows:

- From sale of common stock.
- From issuance of debt (bonds and notes).

Cash outflows:

- To stockholders as dividends.
- To redeem long-term debt or reacquire capital stock (treasury stock).

Note the following general guidelines:

1. Operating activities involve income statement items.
2. Investing activities involve cash flows resulting from changes in investments and long-term asset items.
3. Financing activities involve cash flows resulting from changes in long-term liability and stockholders' equity items.

Companies classify as operating activities some cash flows related to investing or financing activities. For example, receipts of investment revenue (interest and dividends) are classified as operating activities. So are payments of interest to lenders. Why are these considered operating activities? **Because companies report these items in the income statement, where results of operations are shown.**

Significant Noncash Activities

Not all of a company's significant activities involve cash. Examples of significant noncash activities are as follows.

1. Direct issuance of common stock to purchase assets.
2. Conversion of bonds into common stock.
3. Direct issuance of debt to purchase assets.
4. Exchanges of plant assets.

Illustration 13-1
Typical receipt and payment
classifications

Helpful Hint

Do not include noncash investing and financing activities in the body of the statement of cash flows. Report this information in a separate schedule.

Companies do not report in the body of the statement of cash flows significant financing and investing activities that do not affect cash. Instead, they report these activities in either a **separate schedule** at the bottom of the statement of cash flows or in a **separate note or supplementary schedule** to the financial statements. The reporting of these noncash activities in a separate schedule satisfies the **full disclosure principle**.

In solving homework assignments, you should present significant noncash investing and financing activities in a separate schedule at the bottom of the statement of cash flows (see the last entry in Illustration 13-2 below).

Accounting Across the Organization**Target Corporation**

Darren McColleston/Getty Images, Inc.

Net What?

Net income is not the same as net cash provided by operating activities. Below are some results from recent annual reports (dollars in millions), including **Target Corporation**. Note how the numbers differ greatly across the list even though all these companies engage in retail merchandising.

<u>Company</u>	<u>Net Income</u>	<u>Net Cash Provided by Operating Activities</u>
Kohl's Corporation	\$ 889	\$ 1,884
Wal-Mart Stores, Inc.	16,669	25,591
J. C. Penney Company, Inc.	(1,388)	(1,814)
Costco Wholesale Corp.	20,391	3,437
Target Corporation	1,971	6,520

In general, why do differences exist between net income and net cash provided by operating activities? (Go to **WileyPLUS** for this answer and additional questions.)

Format of the Statement of Cash Flows

The general format of the statement of cash flows presents the results of the three activities discussed previously—operating, investing, and financing—plus the significant noncash investing and financing activities. Illustration 13-2 shows a widely used form of the statement of cash flows.

Illustration 13-2

Format of statement of cash flows

COMPANY NAME		
Statement of Cash Flows		
For the Period Covered		
Cash flows from operating activities		
(List of individual items)	<u>XX</u>	
Net cash provided (used) by operating activities		XXX
Cash flows from investing activities		
(List of individual inflows and outflows)	<u>XX</u>	
Net cash provided (used) by investing activities		XXX
Cash flows from financing activities		
(List of individual inflows and outflows)	<u>XX</u>	
Net cash provided (used) by financing activities		XXX
Net increase (decrease) in cash		XXX
Cash at beginning of period		XXX
Cash at end of period		XXX
Noncash investing and financing activities		
(List of individual noncash transactions)		XXX

The cash flows from operating activities section always appears first, followed by the investing activities section and then the financing activities section. The sum of the operating, investing, and financing sections equals the net increase or decrease in cash for the period. This amount is added to the beginning cash balance to arrive at the ending cash balance—the same amount reported on the balance sheet.

DO IT!**1****Classification of Cash Flows**

During its first week, Duffy & Stevenson Company had these transactions.

1. Issued 100,000 shares of \$5 par value common stock for \$800,000 cash.
2. Borrowed \$200,000 from Castle Bank, signing a 5-year note bearing 8% interest.
3. Purchased two semi-trailer trucks for \$170,000 cash.
4. Paid employees \$12,000 for salaries and wages.
5. Collected \$20,000 cash for services performed.

Classify each of these transactions by type of cash flow activity.

Solution

- | | |
|------------------------|------------------------|
| 1. Financing activity. | 4. Operating activity. |
| 2. Financing activity. | 5. Operating activity. |
| 3. Investing activity. | |

Action Plan

- ✓ Identify the three types of activities used to report all cash inflows and outflows.
- ✓ Report as operating activities the cash effects of transactions that create revenues and expenses and enter into the determination of net income.
- ✓ Report as investing activities transactions that (a) acquire and dispose of investments and long-term assets and (b) lend money and collect loans.
- ✓ Report as financing activities transactions that (a) obtain cash from issuing debt and repay the amounts borrowed and (b) obtain cash from stockholders and pay them dividends.

LEARNING OBJECTIVE**2****Prepare a statement of cash flows using the indirect method.**

Companies prepare the statement of cash flows differently from the three other basic financial statements. First, it is not prepared from an adjusted trial balance. It requires detailed information concerning the changes in account balances that occurred between two points in time. An adjusted trial balance will not provide the necessary data. Second, the statement of cash flows deals with cash receipts and payments. As a result, the company **adjusts** the effects of the use of accrual accounting **to determine cash flows**.

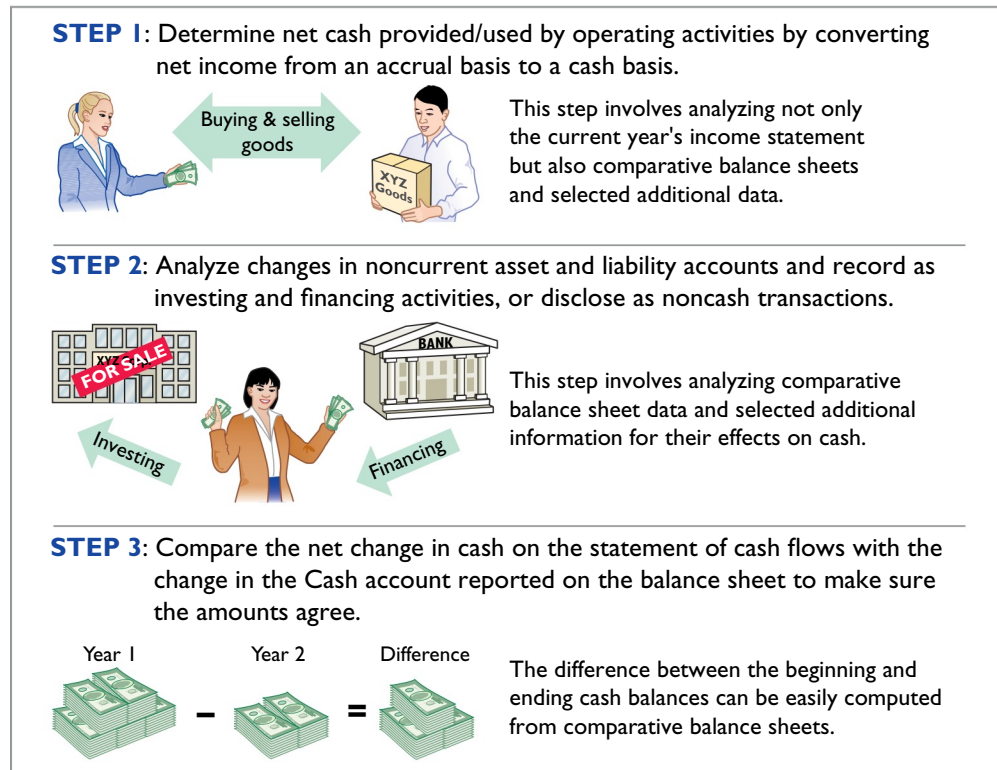

The information to prepare this statement usually comes from three sources:

- **Comparative balance sheets.** Information in the comparative balance sheets indicates the amount of the changes in assets, liabilities, and stockholders' equities from the beginning to the end of the period.
- **Current income statement.** Information in this statement helps determine the amount of net cash provided or used by operating activities during the period.
- **Additional information.** Such information includes transaction data that are needed to determine how cash was provided or used during the period.

Preparing the statement of cash flows from these data sources involves three major steps, explained in Illustration 13-3.

Illustration 13-3

Three major steps in preparing the statement of cash flows

Indirect and Direct Methods

In order to perform Step 1, a company **must convert net income from an accrual basis to a cash basis**. This conversion may be done by either of two methods: (1) the indirect method or (2) the direct method. **Both methods arrive at the same amount** for “Net cash provided by operating activities.” They differ in **how** they arrive at the amount.

The **indirect method** adjusts net income for items that do not affect cash. A great majority of companies use this method. Companies favor the indirect method for two reasons: (1) it is easier and less costly to prepare, and (2) it focuses on the differences between net income and net cash flow from operating activities.

The **direct method** shows operating cash receipts and payments. It is prepared by adjusting each item in the income statement from the accrual basis to the cash basis. The FASB has expressed a preference for the direct method but allows the use of either method.

The next section illustrates the more popular indirect method. Appendix 13A illustrates the direct method.

Indirect Method—Computer Services Company

To explain how to prepare a statement of cash flows using the indirect method, we use financial information from Computer Services Company. Illustration 13-4 presents Computer Services’ current- and previous-year balance sheets, its current-year income statement, and related financial information for the current year.

COMPUTER SERVICES COMPANY

Comparative Balance Sheets

December 31

Illustration 13-4

Comparative balance sheets, income statement, and additional information for Computer Services Company

<u>Assets</u>	<u>2017</u>	<u>2016</u>	<u>Change in Account Balance Increase/Decrease</u>
Current assets			
Cash	\$ 55,000	\$ 33,000	\$ 22,000 Increase
Accounts receivable	20,000	30,000	10,000 Decrease
Inventory	15,000	10,000	5,000 Increase
Prepaid expenses	5,000	1,000	4,000 Increase
Property, plant, and equipment			
Land	130,000	20,000	110,000 Increase
Buildings	160,000	40,000	120,000 Increase
Accumulated depreciation—buildings	(11,000)	(5,000)	6,000 Increase
Equipment	27,000	10,000	17,000 Increase
Accumulated depreciation—equipment	(3,000)	(1,000)	2,000 Increase
Total assets	<u>\$398,000</u>	<u>\$138,000</u>

Total liabilities and stockholders' equity	<u>\$398,000</u>	<u>\$138,000</u>	

COMPUTER SERVICES COMPANY

Income Statement

For the Year Ended December 31, 2017

Sales revenue		\$507,000
Cost of goods sold	\$150,000	
Operating expenses (excluding depreciation)	111,000	
Depreciation expense	9,000	
Loss on disposal of equipment	3,000	
Interest expense	<u>42,000</u>	<u>315,000</u>
Income before income tax		192,000
Income tax expense		<u>47,000</u>
Net income		<u>\$145,000</u>

Additional information for 2017:

1. Depreciation expense was comprised of \$6,000 for building and \$3,000 for equipment.
2. The company sold equipment with a book value of \$7,000 (cost \$8,000, less accumulated depreciation \$1,000) for \$4,000 cash.
3. Issued \$110,000 of long-term bonds in direct exchange for land.
4. A building costing \$120,000 was purchased for cash. Equipment costing \$25,000 was also purchased for cash.
5. Issued common stock for \$20,000 cash.
6. The company declared and paid a \$29,000 cash dividend.

We now apply the three steps for preparing a statement of cash flows to the information provided for Computer Services Company.

Step 1: Operating Activities

DETERMINE NET CASH PROVIDED/USED BY OPERATING ACTIVITIES BY CONVERTING NET INCOME FROM AN ACCRUAL BASIS TO A CASH BASIS

To determine net cash provided by operating activities under the indirect method, companies **adjust net income in numerous ways**. A useful starting point is to understand **why** net income must be converted to net cash provided by operating activities.

Under generally accepted accounting principles, most companies use the accrual basis of accounting. This basis requires that companies record revenue when their performance obligation is satisfied and record expenses when incurred. Revenues include credit sales for which the company has not yet collected cash. Expenses incurred include some items that it has not yet paid in cash. Thus, under the accrual basis, net income is not the same as net cash provided by operating activities.

Therefore, under the **indirect method**, companies must adjust net income to convert certain items to the cash basis. The indirect method (or reconciliation method) starts with net income and converts it to net cash provided by operating activities. Illustration 13-5 lists the three types of adjustments.

Illustration 13-5

Three types of adjustments to convert net income to net cash provided by operating activities

Net Income	+/-	Adjustments	=	Net Cash Provided/ Used by Operating Activities
		<ul style="list-style-type: none"> • Add back noncash expenses, such as depreciation expense and amortization expense. • Deduct gains and add losses that resulted from investing and financing activities. • Analyze changes to noncash current asset and current liability accounts. 		

Helpful Hint

Depreciation is similar to any other expense in that it reduces net income. It differs in that it does not involve a current cash outflow. That is why it must be *added back* to net income to arrive at net cash provided by operating activities.

We explain the three types of adjustments in the next three sections.

DEPRECIATION EXPENSE

Computer Services' income statement reports depreciation expense of \$9,000. Although depreciation expense reduces net income, it does not reduce cash. In other words, depreciation expense is a noncash charge. The company must add it back to net income to arrive at net cash provided by operating activities. Computer Services reports depreciation expense in the statement of cash flows as shown below.

Illustration 13-6

Adjustment for depreciation

Cash flows from operating activities	
Net income	\$145,000
Adjustments to reconcile net income to net cash provided by operating activities:	
Depreciation expense	9,000
Net cash provided by operating activities	<u>\$154,000</u>

As the first adjustment to net income in the statement of cash flows, companies frequently list depreciation and similar noncash charges such as amortization of intangible assets, depletion expense, and bad debt expense.

LOSS ON DISPOSAL OF EQUIPMENT

Illustration 13-1 states that cash received from the sale (disposal) of plant assets is reported in the investing activities section. Because of this, **companies eliminate**

from net income all gains and losses related to the disposal of plant assets, to arrive at net cash provided by operating activities.

In our example, Computer Services' income statement reports a \$3,000 loss on the disposal of equipment (book value \$7,000, less \$4,000 cash received from disposal of equipment). The company's loss of \$3,000 should not be included in the operating activities section of the statement of cash flows. Illustration 13-7 shows that the \$3,000 loss is eliminated by adding \$3,000 back to net income to arrive at net cash provided by operating activities.

Cash flows from operating activities		
Net income		\$145,000
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$9,000	
Loss on disposal of equipment	3,000	<u>12,000</u>
Net cash provided by operating activities		\$157,000

Illustration 13-7

Adjustment for loss on disposal of equipment

If a gain on disposal occurs, the company deducts the gain from net income in order to determine net cash provided by operating activities. **In the case of either a gain or a loss, companies report as a source of cash in the investing activities section of the statement of cash flows the actual amount of cash received from the sale.**

CHANGES TO NONCASH CURRENT ASSET AND CURRENT LIABILITY ACCOUNTS

A final adjustment in reconciling net income to net cash provided by operating activities involves examining all changes in current asset and current liability accounts. The accrual-accounting process records revenues in the period in which the performance obligation is satisfied and expenses are incurred. For example, Accounts Receivable reflects amounts owed to the company for sales that have been made but for which cash collections have not yet been received. Prepaid Insurance reflects insurance that has been paid for but which has not yet expired (therefore has not been expensed). Similarly, Salaries and Wages Payable reflects salaries and wages expense that has been incurred but has not been paid.

As a result, companies need to adjust net income for these accruals and prepayments to determine net cash provided by operating activities. Thus, they must analyze the change in each current asset and current liability account to determine its impact on net income and cash.

CHANGES IN NONCASH CURRENT ASSETS. The adjustments required for changes in noncash current asset accounts are as follows. **Deduct from net income increases in current asset accounts, and add to net income decreases in current asset accounts, to arrive at net cash provided by operating activities.** We observe these relationships by analyzing the accounts of Computer Services.

DECREASE IN ACCOUNTS RECEIVABLE Computer Services' accounts receivable decreased by \$10,000 (from \$30,000 to \$20,000) during the period. For Computer Services, this means that cash receipts were \$10,000 higher than sales revenue. The Accounts Receivable account in Illustration 13-8 shows that Computer Services had \$507,000 in sales revenue (as reported on the income statement), but it collected \$517,000 in cash.

		Accounts Receivable	
1/1/17	Balance	30,000	
	Sales revenue	507,000	Receipts from customers 517,000
12/31/17	Balance	20,000	

Illustration 13-8

Analysis of accounts receivable

As shown in Illustration 13-9 (below), to adjust net income to net cash provided by operating activities, the company adds to net income the decrease of \$10,000 in accounts receivable. When the Accounts Receivable balance increases, cash receipts are lower than sales revenue earned under the accrual basis. Therefore, the company deducts from net income the amount of the increase in accounts receivable, to arrive at net cash provided by operating activities.

INCREASE IN INVENTORY Computer Services' inventory increased \$5,000 (from \$10,000 to \$15,000) during the period. The change in the Inventory account reflects the difference between the amount of inventory purchased and the amount sold. For Computer Services, this means that the cost of merchandise purchased exceeded the cost of goods sold by \$5,000. As a result, cost of goods sold does not reflect \$5,000 of cash payments made for merchandise. The company deducts from net income this inventory increase of \$5,000 during the period, to arrive at net cash provided by operating activities (see Illustration 13-9). If inventory decreases, the company adds to net income the amount of the change, to arrive at net cash provided by operating activities.

INCREASE IN PREPAID EXPENSES Computer Services' prepaid expenses increased during the period by \$4,000. This means that cash paid for expenses is higher than expenses reported on an accrual basis. In other words, the company has made cash payments in the current period but will not charge expenses to income until future periods (as charges to the income statement). To adjust net income to net cash provided by operating activities, the company deducts from net income the \$4,000 increase in prepaid expenses (see Illustration 13-9).

Illustration 13-9

Adjustments for changes in current asset accounts

Cash flows from operating activities		
Net income		\$145,000
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$ 9,000	
Loss on disposal of equipment	3,000	
Decrease in accounts receivable	10,000	
Increase in inventory	(5,000)	
Increase in prepaid expenses	(4,000)	
		<u>13,000</u>
Net cash provided by operating activities		\$158,000

If prepaid expenses decrease, reported expenses are higher than the expenses paid. Therefore, the company adds to net income the decrease in prepaid expenses, to arrive at net cash provided by operating activities.

CHANGES IN CURRENT LIABILITIES. The adjustments required for changes in current liability accounts are as follows. **Add to net income increases in current liability accounts and deduct from net income decreases in current liability accounts, to arrive at net cash provided by operating activities.**

INCREASE IN ACCOUNTS PAYABLE For Computer Services, Accounts Payable increased by \$16,000 (from \$12,000 to \$28,000) during the period. That means the company received \$16,000 more in goods than it actually paid for. As shown in Illustration 13-10, to adjust net income to determine net cash provided by operating activities, the company adds to net income the \$16,000 increase in Accounts Payable.

DECREASE IN INCOME TAXES PAYABLE When a company incurs income tax expense but has not yet paid its taxes, it records income taxes payable. A change in the Income Taxes Payable account reflects the difference between income tax expense incurred and income tax actually paid. Computer Services' Income Taxes Payable account decreased by \$2,000. That means the \$47,000 of income tax expense reported on the income statement was \$2,000 less than the amount of

taxes paid during the period of \$49,000. As shown in Illustration 13-10, to adjust net income to a cash basis, the company must reduce net income by \$2,000.

Cash flows from operating activities		
Net income		\$145,000
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$ 9,000	
Loss on disposal of equipment	3,000	
Decrease in accounts receivable	10,000	
Increase in inventory	(5,000)	
Increase in prepaid expenses	(4,000)	
Increase in accounts payable	16,000	
Decrease in income taxes payable	(2,000)	
		<u>27,000</u>
Net cash provided by operating activities		\$172,000

Illustration 13-10

Adjustments for changes in current liability accounts

Illustration 13-10 shows that after starting with net income of \$145,000, the sum of all of the adjustments to net income was \$27,000. This resulted in net cash provided by operating activities of \$172,000.

Summary of Conversion to Net Cash Provided by Operating Activities—Indirect Method

As shown in the previous illustrations, the statement of cash flows prepared by the indirect method starts with net income. It then adds or deducts items to arrive at net cash provided by operating activities. The required adjustments are of three types:

1. Noncash charges such as depreciation and amortization.
2. Gains and losses on the disposal of plant assets.
3. Changes in noncash current asset and current liability accounts.

Illustration 13-11 provides a summary of these changes and required adjustments.

	Adjustments Required to Convert Net Income to Net Cash Provided by Operating Activities
Noncash Charges	Depreciation expense Add
	Amortization expense Add
Gains and Losses	Loss on disposal of plant assets Add
	Gain on disposal of plant assets Deduct
Changes in Current Assets and Current Liabilities	Increase in current asset account Deduct
	Decrease in current asset account Add
	Increase in current liability account Add
	Decrease in current liability account Deduct

Illustration 13-11

Adjustments required to convert net income to net cash provided by operating activities

DO IT! 2a Cash from Operating Activities

Josh's PhotoPlus reported net income of \$73,000 for 2017. Included in the income statement were depreciation expense of \$7,000 and a gain on disposal of equipment of \$2,500. Josh's comparative balance sheets show the following balances.

	<u>12/31/16</u>	<u>12/31/17</u>
Accounts receivable	\$17,000	\$21,000
Accounts payable	6,000	2,200

Calculate net cash provided by operating activities for Josh's PhotoPlus.

Action Plan

- ✓ Add noncash charges such as depreciation back to net income to compute net cash provided by operating activities.

Action Plan (cont.)

- ✓ Deduct from net income gains on the disposal of plant assets, or add losses back to net income, to compute net cash provided by operating activities.
- ✓ Use changes in noncash current asset and current liability accounts to compute net cash provided by operating activities.

Solution

Cash flows from operating activities			
Net income			\$73,000
Adjustments to reconcile net income to net cash provided by operating activities:			
Depreciation expense	\$ 7,000		
Gain on disposal of equipment	(2,500)		
Increase in accounts receivable	(4,000)		
Decrease in accounts payable	(3,800)	(3,300)	
Net cash provided by operating activities			<u>\$69,700</u>

Step 2: Investing and Financing Activities

ANALYZE CHANGES IN NONCURRENT ASSET AND LIABILITY ACCOUNTS AND RECORD AS INVESTING AND FINANCING ACTIVITIES, OR AS NONCASH INVESTING AND FINANCING ACTIVITIES

INCREASE IN LAND As indicated from the change in the Land account and the additional information, Computer Services purchased land of \$110,000 by directly exchanging bonds for land. The issuance of bonds payable for land has no effect on cash. But, it is a significant noncash investing and financing activity that merits disclosure in a separate schedule (see Illustration 13-13).

INCREASE IN BUILDINGS As the additional data indicate, Computer Services acquired an office building for \$120,000 cash. This is a cash outflow reported in the investing activities section (see Illustration 13-13).

INCREASE IN EQUIPMENT The Equipment account increased \$17,000. The additional information explains that this net increase resulted from two transactions: (1) a purchase of equipment of \$25,000, and (2) the sale for \$4,000 of equipment costing \$8,000. These transactions are investing activities. The company should report each transaction separately. Thus, it reports the purchase of equipment as an outflow of cash for \$25,000. It reports the sale as an inflow of cash for \$4,000. The T-account below shows the reasons for the change in this account during the year.

Illustration 13-12
Analysis of equipment

		Equipment	
1/1/17	Balance	10,000	Cost of equipment sold 8,000
	Purchase of equipment 25,000		
12/31/17	Balance	27,000	

The following entry shows the details of the equipment sale transaction.

Cash	4,000	
Accumulated Depreciation—Equipment	1,000	
Loss on Disposal of Equipment	3,000	
Equipment		8,000

INCREASE IN BONDS PAYABLE The Bonds Payable account increased \$110,000. As indicated in the additional information, the company acquired land from the issuance of these bonds. It reports this noncash transaction in a separate schedule at the bottom of the statement.

A	=	L	+	SE
+4,000				
+1,000				
-8,000				-3,000 Exp
<hr/>				
Cash Flows				
+4,000				

INCREASE IN COMMON STOCK The balance sheet reports an increase in Common Stock of \$20,000. The additional information section notes that this increase resulted from the issuance of new shares of stock. This is a cash inflow reported in the financing activities section.

INCREASE IN RETAINED EARNINGS Retained earnings increased \$116,000 during the year. This increase can be explained by two factors: (1) net income of \$145,000 increased retained earnings, and (2) dividends of \$29,000 decreased retained earnings. The company adjusts net income to net cash provided by operating activities in the operating activities section. Payment of the dividends (not the declaration) is a **cash outflow that the company reports as a financing activity**.

Helpful Hint

When companies issue stocks or bonds for cash, the actual proceeds will appear in the statement of cash flows as a financing inflow (rather than the par value of the stocks or face value of bonds).

STATEMENT OF CASH FLOWS—2017

Using the previous information, we can now prepare a statement of cash flows for 2017 for Computer Services Company as shown in Illustration 13-13.

COMPUTER SERVICES COMPANY		
Statement of Cash Flows—Indirect Method		
For the Year Ended December 31, 2017		
Cash flows from operating activities		
Net income		\$145,000
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$ 9,000	
Loss on disposal of equipment	3,000	
Decrease in accounts receivable	10,000	
Increase in inventory	(5,000)	
Increase in prepaid expenses	(4,000)	
Increase in accounts payable	16,000	
Decrease in income taxes payable	(2,000)	27,000
Net cash provided by operating activities		172,000
Cash flows from investing activities		
Purchase of building	(120,000)	
Purchase of equipment	(25,000)	
Sale of equipment	4,000	
Net cash used by investing activities		(141,000)
Cash flows from financing activities		
Issuance of common stock	20,000	
Payment of cash dividends	(29,000)	
Net cash used by financing activities		(9,000)
Net increase in cash		22,000
Cash at beginning of period		33,000
Cash at end of period		<u>\$ 55,000</u>
Noncash investing and financing activities		
Issuance of bonds payable to purchase land		<u>\$110,000</u>

Illustration 13-13

Statement of cash flows, 2017—indirect method

Helpful Hint

Note that in the investing and financing activities sections, positive numbers indicate cash inflows (receipts), and negative numbers indicate cash outflows (payments).

Step 3: Net Change in Cash

COMPARE THE NET CHANGE IN CASH ON THE STATEMENT OF CASH FLOWS WITH THE CHANGE IN THE CASH ACCOUNT REPORTED ON THE BALANCE SHEET TO MAKE SURE THE AMOUNTS AGREE

Illustration 13-13 indicates that the net change in cash during the period was an increase of \$22,000. This agrees with the change in Cash account reported on the balance sheet in Illustration 13-4 (page 605).

Accounting Across the Organization

Burning Through Our Cash

Box (cloud storage), Cyan (game creator), Fireeye (cyber security), and Mobile Iron (mobile security of data) are a few of the tech companies that recently have issued or are about to issue stock to the public. Investors now have to determine whether these tech companies have viable products and high chances for success.

An important consideration in evaluating a tech company is determining its financial flexibility—its ability to withstand adversity if an economic setback occurs. One

way to measure financial flexibility is to assess a company's cash burn rate, which determines how long its cash will hold out if the company is expending more cash than it is receiving.

Fireeye, for example, burned cash in excess of \$50 million in 2013. But the company also had over \$150 million as a cash cushion, so it would take over 30 months before it runs out of cash. And even though Box has a much lower cash burn rate than Fireeye, it still has over a year's cushion. Compare that to the tech companies in 2000, when over one-quarter of them were on track to run out of cash within a year. And many did. Fortunately, the tech companies of today seem to be better equipped to withstand an economic setback.

Source: Shira Ovide, "Tech Firms' Cash Hoards Cool Fears of a Meltdown," *Wall Street Journal* (May 14, 2014).

What implications does a company's cash burn rate have for its survival? (See **WileyPLUS** for this answer and additional questions.)

DO IT! 2b

Indirect Method

Use the information below and on page 613 to prepare a statement of cash flows using the indirect method.

REYNOLDS COMPANY Comparative Balance Sheets December 31

<u>Assets</u>	<u>2017</u>	<u>2016</u>	<u>Change</u> <u>Increase/Decrease</u>
Cash	\$ 54,000	\$ 37,000	\$ 17,000 Increase

REYNOLDS COMPANY
Income Statement
For the Year Ended December 31, 2017

Sales revenue		\$890,000
Cost of goods sold	\$465,000	
Operating expenses	221,000	
Interest expense	12,000	
Loss on disposal of equipment	<u>2,000</u>	<u>700,000</u>
Income before income taxes		190,000
Income tax expense		<u>65,000</u>
Net income		<u><u>\$125,000</u></u>

Additional information:

1. Operating expenses include depreciation expense of \$33,000 and charges from prepaid expenses of \$2,000.
2. Land was sold at its book value for cash.
3. Cash dividends of \$55,000 were declared and paid in 2017.
4. Interest expense of \$12,000 was paid in cash.
5. Equipment with a cost of \$166,000 was purchased for cash. Equipment with a cost of \$41,000 and a book value of \$36,000 was sold for \$34,000 cash.
6. Bonds of \$10,000 were redeemed at their face value for cash. Bonds of \$30,000 were converted into common stock.
7. Common stock (\$1 par) of \$130,000 was issued for cash.
8. Accounts payable pertain to merchandise suppliers.

Noncash investing and financing activities		
Conversion of bonds into common stock		<u><u>\$30,000</u></u>

Action Plan

- ✓ Determine net cash provided/used by operating activities by adjusting net income for items that did not affect cash.
- ✓ Determine net cash provided/used by investing activities and financing activities.
- ✓ Determine the net increase/decrease in cash.

LEARNING
OBJECTIVE

3

Analyze the statement of cash flows.

Traditionally, investors and creditors used ratios based on accrual accounting. These days, cash-based ratios are gaining increased acceptance among analysts.

Free Cash Flow

In the statement of cash flows, net cash provided by operating activities is intended to indicate the cash-generating capability of a company. Analysts have noted, however, that **net cash provided by operating activities fails to take into account that a company must invest in new fixed assets** just to maintain its current level of operations. Companies also must at least **maintain dividends at current levels** to satisfy investors. The measurement of free cash flow provides additional insight regarding a company's cash-generating ability. **Free cash flow** describes the net cash provided by operating activities after adjustment for capital expenditures and dividends.

Consider the following example. Suppose that MPC produced and sold 10,000 personal computers this year. It reported \$100,000 net cash provided by operating activities. In order to maintain production at 10,000 computers, MPC invested \$15,000 in equipment. It chose to pay \$5,000 in dividends. Its free cash flow was \$80,000 (\$100,000 – \$15,000 – \$5,000). The company could use this \$80,000 either to purchase new assets to expand the business or to pay an \$80,000 dividend and continue to produce 10,000 computers. In practice, free cash flow is often calculated with the formula in Illustration 13-14. (Alternative definitions also exist.)

Illustration 13-14
Free cash flow

$$\text{Free Cash Flow} = \text{Net Cash Provided by Operating Activities} - \text{Capital Expenditures} - \text{Cash Dividends}$$

Illustration 13-15 provides basic information (in millions) excerpted from the 2013 statement of cash flows of **Microsoft Corporation**.

Illustration 13-15
Microsoft's cash flow
information (\$ in millions)

MICROSOFT CORPORATION		
Statement of Cash Flows (partial)		
2013		
Cash provided by operating activities		\$21,863
Cash flows from investing activities		
Additions to property and equipment	\$ (4,257)	
Purchases of investments	(75,396)	
Sales of investments	52,464	
Acquisitions of companies	(1,584)	
Maturities of investments	5,130	
Other	(168)	
Cash used by investing activities		(23,811)
Cash paid for dividends		(7,455)

Microsoft's free cash flow is calculated as shown in Illustration 13-16.

Cash provided by operating activities	\$21,863
Less: Expenditures on property, plant, and equipment	4,257
Dividends paid	7,455
Free cash flow	<u>\$10,151</u>

Illustration 13-16

Calculation of Microsoft's free cash flow (\$ in millions)

Microsoft generated approximately \$10.15 billion of free cash flow. This is a tremendous amount of cash generated in a single year. It is available for the acquisition of new assets, the retirement of stock or debt, or the payment of dividends. Also note that Microsoft's cash from operations of \$21.8 billion is nearly identical to its 2013 net income of \$21.9 billion. This lends additional credibility to Microsoft's income number as an indicator of potential future performance.

DO IT!**3****Free Cash Flow**

Chicago Corporation issued the following statement of cash flows for 2017.

CHICAGO CORPORATION		
Statement of Cash Flows—Indirect Method		
For the Year Ended December 31, 2017		
Cash flows from operating activities		
Net income		\$ 19,000
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$ 8,100	
Loss on disposal of plant assets	1,300	
Decrease in accounts receivable	6,900	
Increase in inventory	(4,000)	
Decrease in accounts payable	(2,000)	<u>10,300</u>
Net cash provided by operating activities		29,300
Cash flows from investing activities		
Sale of investments	1,100	
Purchase of equipment	(19,000)	
Net cash used by investing activities		(17,900)
Cash flows from financing activities		
Issuance of stock	10,000	
Payment on long-term note payable	(5,000)	
Payment for dividends	(9,000)	
Net cash used by financing activities		<u>(4,000)</u>
Net increase in cash		7,400
Cash at beginning of year		10,000
Cash at end of year		<u>\$ 17,400</u>

(a) Compute free cash flow for Chicago Corporation. (b) Explain why free cash flow often provides better information than "Net cash provided by operating activities."

Action Plan

- ✓ Compute free cash flow as Net cash provided by operating activities – Capital expenditures – Cash dividends.

Solution

- (a) Free cash flow = \$29,300 – \$19,000 – \$9,000 = \$1,300
- (b) Net cash provided by operating activities fails to take into account that a company must invest in new plant assets just to maintain the current level of operations. Companies must also maintain dividends at current levels to satisfy investors. The measurement of free cash flow provides additional insight regarding a company's cash-generating ability.

APPENDIX 13A: Prepare a statement of cash flows using the direct method.

To explain and illustrate the direct method for preparing a statement of cash flows, we use the transactions of Computer Services Company for 2017. Illustration 13A-1 presents information related to 2017 for the company.

To prepare a statement of cash flows under the direct approach, we apply the three steps outlined in Illustration 13-3 (page 604).

Step 1: Operating Activities

DETERMINE NET CASH PROVIDED/USED BY OPERATING ACTIVITIES BY CONVERTING NET INCOME FROM AN ACCRUAL BASIS TO A CASH BASIS

Under the **direct method**, companies compute net cash provided by operating activities by **adjusting each item in the income statement** from the accrual basis to the cash basis. To simplify and condense the operating activities section, companies **report only major classes of operating cash receipts and cash payments**. For these major classes, the difference between cash receipts and cash payments is the net cash provided by operating activities. These relationships are as shown in Illustration 13A-2 (page 618).

An efficient way to apply the direct method is to analyze the items reported in the income statement in the order in which they are listed. We then determine cash receipts and cash payments related to these revenues and expenses. The following presents the adjustments required to prepare a statement of cash flows for Computer Services Company using the direct approach.

CASH RECEIPTS FROM CUSTOMERS The income statement for Computer Services reported sales revenue from customers of \$507,000. How much of that was cash receipts? To answer that, a company considers the change in accounts receivable during the year. When accounts receivable increase during the year, revenues on an accrual basis are higher than cash receipts from customers. Operations led to revenues, but not all of those revenues resulted in cash receipts.

To determine the amount of cash receipts, a company deducts from sales revenue the increase in accounts receivable. On the other hand, there may be a decrease in accounts receivable. That would occur if cash receipts from customers exceeded sales revenue. In that case, a company adds to sales revenue the decrease in accounts receivable. For Computer Services, accounts receivable decreased

COMPUTER SERVICES COMPANY

Comparative Balance Sheets

December 31

Illustration 13A-1

Comparative balance sheets, income statement, and additional information for Computer Services Company

<u>Assets</u>	<u>2017</u>	<u>2016</u>	<u>Change in Account Balance Increase/Decrease</u>
Current assets			
Cash	\$ 55,000	\$ 33,000	\$ 22,000 Increase

COMPUTER SERVICES COMPANY

Income Statement

For the Year Ended December 31, 2017

Sales revenue		\$507,000
Cost of goods sold	\$150,000	
Operating expenses (excluding depreciation)	111,000	
Depreciation expense	9,000	
Loss on disposal of equipment	3,000	
Interest expense	<u>42,000</u>	<u>315,000</u>
Income before income tax		192,000
Income tax expense		<u>47,000</u>
Net income		<u>\$145,000</u>

Additional information for 2017:

1. Depreciation expense was comprised of \$6,000 for building and \$3,000 for equipment.
2. The company sold equipment with a book value of \$7,000 (cost \$8,000, less accumulated depreciation \$1,000) for \$4,000 cash.
3. Issued \$110,000 of long-term bonds in direct exchange for land.
4. A building costing \$120,000 was purchased for cash. Equipment costing \$25,000 was also purchased for cash.
5. Issued common stock for \$20,000 cash.
6. The company declared and paid a \$29,000 cash dividend.

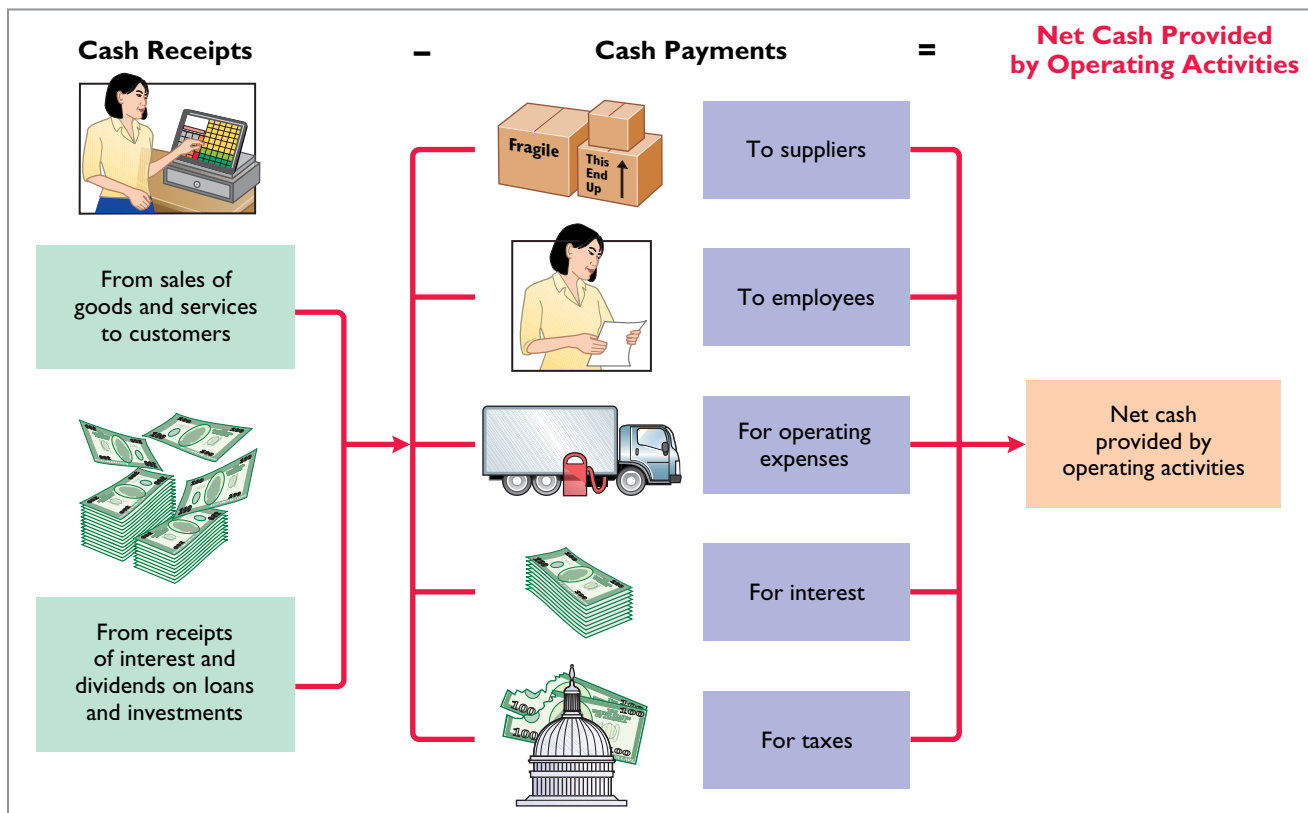

Illustration 13A-2
Major classes of cash receipts and payments

\$10,000. Thus, cash receipts from customers were \$517,000, computed as shown in Illustration 13A-3.

Illustration 13A-3
Computation of cash receipts from customers

Sales revenue	\$ 507,000
Add: Decrease in accounts receivable	<u>10,000</u>
Cash receipts from customers	<u>\$517,000</u>

Computer Services can also determine cash receipts from customers from an analysis of the Accounts Receivable account, as shown in Illustration 13A-4.

Illustration 13A-4
Analysis of accounts receivable

		Accounts Receivable	
1/1/17	Balance	30,000	Receipts from customers 517,000
	Sales revenue	507,000	
12/31/17	Balance	20,000	

Helpful Hint
The T-account shows that sales revenue plus decrease in accounts receivable equals cash receipts.

Illustration 13A-5 shows the relationships among cash receipts from customers, sales revenue, and changes in accounts receivable.

Illustration 13A-5
Formula to compute cash receipts from customers—direct method

<p>Cash Receipts from Customers</p>	<p>=</p>	<p>Sales Revenue</p>	}	<p>+ Decrease in Accounts Receivable or – Increase in Accounts Receivable</p>
--	----------	----------------------	---	---

CASH PAYMENTS TO SUPPLIERS Computer Services reported cost of goods sold of \$150,000 on its income statement. How much of that was cash payments to suppliers? To answer that, it is first necessary to find purchases for the year. To find purchases, a company adjusts cost of goods sold for the change in inventory. When inventory increases during the year, purchases for the year have exceeded cost of goods sold. As a result, to determine the amount of purchases, a company adds to cost of goods sold the increase in inventory.

In 2017, Computer Services' inventory increased \$5,000. It computes purchases as follows.

Cost of goods sold	\$ 150,000
Add: Increase in inventory	<u>5,000</u>
Purchases	<u>\$155,000</u>

Illustration 13A-6
Computation of purchases

Computer Services can also determine purchases from an analysis of the Inventory account, as shown in Illustration 13A-7.

Inventory			
1/1/17 Balance	10,000	Cost of goods sold	150,000
Purchases	155,000		
12/31/17 Balance	15,000		

Illustration 13A-7
Analysis of inventory

After computing purchases, a company can determine cash payments to suppliers. This is done by adjusting purchases for the change in accounts payable. When accounts payable increase during the year, purchases on an accrual basis are higher than they are on a cash basis. As a result, to determine cash payments to suppliers, a company deducts from purchases the increase in accounts payable. On the other hand, if cash payments to suppliers exceed purchases, there will be a decrease in accounts payable. In that case, a company adds to purchases the decrease in accounts payable. For Computer Services, cash payments to suppliers were \$139,000, computed as follows.

Purchases	\$ 155,000
Deduct: Increase in accounts payable	<u>16,000</u>
Cash payments to suppliers	<u>\$139,000</u>

Illustration 13A-8
Computation of cash payments to suppliers

Computer Services also can determine cash payments to suppliers from an analysis of the Accounts Payable account, as shown in Illustration 13A-9.

Accounts Payable			
Payments to suppliers	139,000	1/1/17 Balance	12,000
		Purchases	155,000
		12/31/17 Balance	28,000

Illustration 13A-9
Analysis of accounts payable

Helpful Hint

The T-account shows that purchases less increase in accounts payable equals payments to suppliers.

Illustration 13A-10 (page 620) shows the relationships among cash payments to suppliers, cost of goods sold, changes in inventory, and changes in accounts payable.

Illustration 13A-10

Formula to compute cash payments to suppliers—direct method

Cash Payments to Suppliers	=	Cost of Goods Sold	+ Increase in Inventory or - Decrease in Inventory	+ Decrease in Accounts Payable or - Increase in Accounts Payable
-----------------------------------	---	---------------------------	--	--

CASH PAYMENTS FOR OPERATING EXPENSES Computer Services reported on its income statement operating expenses of \$111,000. How much of that amount was cash paid for operating expenses? To answer that, we need to adjust this amount for any changes in prepaid expenses and accrued expenses payable. For example, if prepaid expenses increased during the year, cash paid for operating expenses is higher than operating expenses reported on the income statement. To convert operating expenses to cash payments for operating expenses, a company adds the increase in prepaid expenses to operating expenses. On the other hand, if prepaid expenses decrease during the year, it deducts the decrease from operating expenses.

Companies must also adjust operating expenses for changes in accrued expenses payable. When accrued expenses payable increase during the year, operating expenses on an accrual basis are higher than they are in a cash basis. As a result, to determine cash payments for operating expenses, a company deducts from operating expenses an increase in accrued expenses payable. On the other hand, a company adds to operating expenses a decrease in accrued expenses payable because cash payments exceed operating expenses.

Computer Services' cash payments for operating expenses were \$115,000, computed as follows.

Illustration 13A-11

Computation of cash payments for operating expenses

Operating expenses	\$ 111,000
Add: Increase in prepaid expenses	4,000
Cash payments for operating expenses	<u>\$115,000</u>

Illustration 13A-12 shows the relationships among cash payments for operating expenses, changes in prepaid expenses, and changes in accrued expenses payable.

Illustration 13A-12

Formula to compute cash payments for operating expenses—direct method

Cash Payments for Operating Expenses	=	Operating Expenses	+ Increase in Prepaid Expenses or - Decrease in Prepaid Expenses	+ Decrease in Accrued Expenses Payable or - Increase in Accrued Expenses Payable
---	---	---------------------------	--	--

DEPRECIATION EXPENSE AND LOSS ON DISPOSAL OF EQUIPMENT Computer Services' depreciation expense in 2017 was \$9,000. Depreciation expense is not shown on a statement of cash flows under the direct method because it is a non-cash charge. If the amount for operating expenses includes depreciation expense, operating expenses must be reduced by the amount of depreciation to determine cash payments for operating expenses.

The loss on disposal of equipment of \$3,000 is also a noncash charge. The loss on disposal of equipment reduces net income, but it does not reduce cash. Thus, the loss on disposal of equipment is not shown on the statement of cash flows under the direct method.

Other charges to expense that do not require the use of cash, such as the amortization of intangible assets, depletion expense, and bad debt expense, are treated in the same manner as depreciation.

CASH PAYMENTS FOR INTEREST Computer Services reported on the income statement interest expense of \$42,000. Since the balance sheet did not include an accrual for interest payable for 2016 or 2017, the amount reported as expense is the same as the amount of interest paid.

CASH PAYMENTS FOR INCOME TAXES Computer Services reported income tax expense of \$47,000 on the income statement. Income taxes payable, however, decreased \$2,000. This decrease means that income taxes paid were more than income taxes reported in the income statement. Cash payments for income taxes were therefore \$49,000 as shown below.

Income tax expense	\$ 47,000
Add: Decrease in income taxes payable	<u>2,000</u>
Cash payments for income taxes	<u>\$49,000</u>

Illustration 13A-13
Computation of cash payments for income taxes

Computer Services can also determine cash payments for income taxes from an analysis of the Income Taxes Payable account, as shown in Illustration 13A-14.

Income Taxes Payable			
Cash payments for income taxes	49,000	1/1/17 Balance	8,000
		Income tax expense	47,000
		12/31/17 Balance	6,000

Illustration 13A-14
Analysis of income taxes payable

Illustration 13A-15 shows the relationships among cash payments for income taxes, income tax expense, and changes in income taxes payable.

Cash Payments for Income Taxes	=	Income Tax Expense	}	+ Decrease in Income Taxes Payable or - Increase in Income Taxes Payable
---------------------------------------	---	---------------------------	---	--

Illustration 13A-15
Formula to compute cash payments for income taxes—direct method

The operating activities section of the statement of cash flows of Computer Services is shown in Illustration 13A-16.

Cash flows from operating activities		
Cash receipts from customers		\$517,000
Less: Cash payments:		
To suppliers	\$139,000	
For operating expenses	115,000	
For interest expense	42,000	
For income taxes	<u>49,000</u>	<u>345,000</u>
Net cash provided by operating activities		<u>\$172,000</u>

Illustration 13A-16
Operating activities section of the statement of cash flows

When a company uses the direct method, it must also provide in a **separate schedule** (not shown here) the net cash flows from operating activities as computed under the indirect method.

Step 2: Investing and Financing Activities

ANALYZE CHANGES IN NONCURRENT ASSET AND LIABILITY ACCOUNTS AND RECORD AS INVESTING AND FINANCING ACTIVITIES, OR DISCLOSE AS NONCASH TRANSACTIONS

Helpful Hint

The investing and financing activities are measured and reported the same under both the direct and indirect methods.

INCREASE IN LAND As indicated from the change in the Land account and the additional information, Computer Services purchased land of \$110,000 by directly exchanging bonds for land. The exchange of bonds payable for land has no effect on cash. But, it is a significant noncash investing and financing activity that merits disclosure in a separate schedule (see Illustration 13A-18).

INCREASE IN BUILDINGS As the additional data indicate, Computer Services acquired an office building for \$120,000 cash. This is a cash outflow reported in the investing activities section (see Illustration 13A-18).

INCREASE IN EQUIPMENT The Equipment account increased \$17,000. The additional information explains that this was a net increase that resulted from two transactions: (1) a purchase of equipment of \$25,000, and (2) the sale for \$4,000 of equipment costing \$8,000. These transactions are investing activities. The company should report each transaction separately. The statement in Illustration 13A-18 reports the purchase of equipment as an outflow of cash for \$25,000. It reports the sale as an inflow of cash for \$4,000. The T-account below shows the reasons for the change in this account during the year.

Illustration 13A-17
Analysis of equipment

Equipment			
1/1/17 Balance	10,000	Cost of equipment sold	8,000
	Purchase of equipment 25,000		
12/31/17 Balance	27,000		

The following entry shows the details of the equipment sale transaction.

A	=	L	+	SE	
+4,000					
+1,000					
					- 3,000 Exp
-8,000					
Cash Flows					
+4,000					

Cash		4,000		
Accumulated Depreciation—Equipment		1,000		
Loss on Disposal of Equipment		3,000		
Equipment				8,000

INCREASE IN BONDS PAYABLE The Bonds Payable account increased \$110,000. As indicated in the additional information, the company acquired land by directly exchanging bonds for land. Illustration 13A-18 reports this noncash transaction in a separate schedule at the bottom of the statement.

INCREASE IN COMMON STOCK The balance sheet reports an increase in Common Stock of \$20,000. The additional information section notes that this increase resulted from the issuance of new shares of stock. This is a cash inflow reported in the financing activities section in Illustration 13A-18.

INCREASE IN RETAINED EARNINGS Retained earnings increased \$116,000 during the year. This increase can be explained by two factors: (1) net income of \$145,000 increased retained earnings, and (2) dividends of \$29,000 decreased retained earnings. The company adjusts net income to net cash provided by operating activities in the operating activities section. **Payment** of the dividends (not the declaration) is a **cash outflow that the company reports as a financing activity in Illustration 13A-18**.

Helpful Hint

When companies issue stocks or bonds for cash, the actual proceeds will appear in the statement of cash flows as a financing inflow (rather than the par value of the stocks or face value of bonds).

STATEMENT OF CASH FLOWS—2017

Illustration 13A-18 shows the statement of cash flows for Computer Services Company.

COMPUTER SERVICES COMPANY
Statement of Cash Flows—Direct Method
For the Year Ended December 31, 2017

Illustration 13A-18
Statement of cash flows,
2017—direct method

Cash flows from operating activities		
Cash receipts from customers		\$ 517,000
Less: Cash payments:		
To suppliers	\$ 139,000	
For operating expenses	115,000	
For income taxes	49,000	
For interest expense	42,000	345,000
Net cash provided by operating activities		172,000
Cash flows from investing activities		
Sale of equipment	4,000	
Purchase of building	(120,000)	
Purchase of equipment	(25,000)	
Net cash used by investing activities		(141,000)
Cash flows from financing activities		
Issuance of common stock	20,000	
Payment of cash dividends	(29,000)	
Net cash used by financing activities		(9,000)
Net increase in cash		22,000
Cash at beginning of period		33,000
Cash at end of period		\$ 55,000
Noncash investing and financing activities		
Issuance of bonds payable to purchase land		\$ 110,000

Step 3: Net Change in Cash

COMPARE THE NET CHANGE IN CASH ON THE STATEMENT OF CASH FLOWS WITH THE CHANGE IN THE CASH ACCOUNT REPORTED ON THE BALANCE SHEET TO MAKE SURE THE AMOUNTS AGREE

Illustration 13A-18 indicates that the net change in cash during the period was an increase of \$22,000. This agrees with the change in balances in the Cash account reported on the balance sheets in Illustration 13A-1 (page 617).

LEARNING
OBJECTIVE

5

APPENDIX 13B: Use a worksheet to prepare the statement of cash flows using the indirect method.

When preparing a statement of cash flows, companies may need to make numerous adjustments of net income. In such cases, they often use **a worksheet to assemble and classify the data that will appear on the statement**. The worksheet is merely an aid in preparing the statement. Its use is optional. Illustration 13B-1 (page 624) shows the skeleton format of the worksheet for preparation of the statement of cash flows.

The following guidelines are important in preparing a worksheet.

1. In the balance sheet accounts section, **list accounts with debit balances separately from those with credit balances**. This means, for example, that Accumulated Depreciation appears under credit balances and not as a contra account under debit balances. Enter the beginning and ending balances of each account in the appropriate columns. Enter as reconciling items in the two middle columns the transactions that caused the change in the account balance during the year.

Illustration 13B-1
Format of worksheet

XYZ Company.xls					
Home Insert Page Layout Formulas Data Review View					
P18 fx					
	A	B	C	D	E
1	XYZ COMPANY				
2	Worksheet				
3	Statement of Cash Flows For the Year Ended . . .				
4					
5		End of	Reconciling Items		End of
6		Last Year			Current Year
7		Balances	Debit	Credit	Balances
8	<u>Balance Sheet Accounts</u>				
9	Debit balance accounts	XX	XX	XX	XX
10		XX	XX	XX	XX
11	Totals	XXX			XXX
12	Credit balance accounts	XX	XX	XX	XX
13		XX	XX	XX	XX
14	Totals	XXX			XXX
15					
16	Statement of Cash				
17	Flows Effects				
18	Operating activities				
19	Net income		XX		
20	Adjustments to net income		XX	XX	
21	Investing activities				
22	Receipts and payments		XX	XX	
23	Financing activities				
24	Receipts and payments		XX	XX	
25	Totals		XXX	XXX	
26	Increase (decrease) in cash		(XX)	XX	
27	Totals		XXX	XXX	
28					

After all reconciling items have been entered, each line pertaining to a balance sheet account should “foot across.” That is, the beginning balance plus or minus the reconciling item(s) must equal the ending balance. When this agreement exists for all balance sheet accounts, all changes in account balances have been reconciled.

- The bottom portion of the worksheet consists of the operating, investing, and financing activities sections. It provides the information necessary to prepare the formal statement of cash flows. **Enter inflows of cash as debits in the reconciling columns. Enter outflows of cash as credits in the reconciling columns.** Thus, in this section, the sale of equipment for cash at book value appears as a debit under investing activities. Similarly, the purchase of land for cash appears as a credit under investing activities.
- The reconciling items shown in the worksheet are not entered in any journal or posted to any account.** They do not represent either adjustments or corrections of the balance sheet accounts. They are used only to facilitate the preparation of the statement of cash flows.

Preparing the Worksheet

As in the case of worksheets illustrated in earlier chapters, preparing a worksheet involves a series of prescribed steps. The steps in this case are:

- Enter in the balance sheet accounts section the balance sheet accounts and their beginning and ending balances.
- Enter in the reconciling columns of the worksheet the data that explain the changes in the balance sheet accounts other than cash and their effects on the statement of cash flows.
- Enter on the cash line and at the bottom of the worksheet the increase or decrease in cash. This entry should enable the totals of the reconciling columns to be in agreement.

To illustrate the preparation of a worksheet, we will use the 2017 data for Computer Services Company. Your familiarity with these data (from the chapter) should help you understand the use of a worksheet. For ease of reference, the comparative balance sheets, income statement, and selected data for 2017 are presented in Illustration 13B-2.

Illustration 13B-2
Comparative balance sheets, income statement, and additional information for Computer Services Company

COMPUTER SERVICES COMPANY			
Income Statement			
For the Year Ended December 31, 2017			
Sales revenue			\$507,000
Cost of goods sold		\$150,000	
Operating expenses (excluding depreciation)		111,000	
Depreciation expense		9,000	
Loss on disposal of equipment		3,000	
Interest expense		42,000	315,000
Income before income tax			192,000
Income tax expense			47,000
Net income			<u>\$145,000</u>

Additional information for 2017:

1. Depreciation expense was comprised of \$6,000 for building and \$3,000 for equipment.
2. The company sold equipment with a book value of \$7,000 (cost \$8,000, less accumulated depreciation \$1,000) for \$4,000 cash.
3. Issued \$110,000 of long-term bonds in direct exchange for land.
4. A building costing \$120,000 was purchased for cash. Equipment costing \$25,000 was also purchased for cash.
5. Issued common stock for \$20,000 cash.
6. The company declared and paid a \$29,000 cash dividend.

DETERMINING THE RECONCILING ITEMS

Companies can use one of several approaches to determine the reconciling items. For example, they can first complete the changes affecting net cash provided by operating activities, and then can determine the effects of financing and investing transactions. Or, they can analyze the balance sheet accounts in the order in which they are listed on the worksheet. We will follow this latter approach for Computer Services, except for cash. As indicated in Step 3, **cash is handled last**.

ACCOUNTS RECEIVABLE The decrease of \$10,000 in accounts receivable means that cash collections from sales revenue are higher than the sales revenue reported in the income statement. To convert net income to net cash provided by operating activities, we add the decrease of \$10,000 to net income. The entry in the reconciling columns of the worksheet is:

(a)	Operating—Decrease in Accounts Receivable	10,000	10,000
	Accounts Receivable		

INVENTORY Computer Services Company's inventory balance increases \$5,000 during the period. The Inventory account reflects the difference between the amount of inventory that the company purchased and the amount that it sold. For Computer Services, this means that the cost of merchandise purchased exceeds the cost of goods sold by \$5,000. As a result, cost of goods sold does not reflect \$5,000 of cash payments made for merchandise. We deduct this inventory increase of \$5,000 during the period from net income to arrive at net cash provided by operating activities. The worksheet entry is:

(b)	Inventory	5,000	5,000
	Operating—Increase in Inventory		

PREPAID EXPENSES An increase of \$4,000 in prepaid expenses means that expenses deducted in determining net income are less than expenses that were paid in cash. We deduct the increase of \$4,000 from net income in determining net cash provided by operating activities. The worksheet entry is:

(c)	Prepaid Expenses	4,000	4,000
	Operating—Increase in Prepaid Expenses		

Helpful Hint

These amounts are asterisked in the worksheet to indicate that they result from a significant noncash transaction.

LAND The increase in land of \$110,000 resulted from a purchase through the issuance of long-term bonds. The company should report this transaction as a significant noncash investing and financing activity. The worksheet entry is:

(d)	Land	110,000	110,000
	Bonds Payable		

BUILDINGS The cash purchase of a building for \$120,000 is an investing activity cash outflow. The entry in the reconciling columns of the worksheet is:

(e)	Buildings	120,000	120,000
	Investing—Purchase of Building		

EQUIPMENT The increase in equipment of \$17,000 resulted from a cash purchase of \$25,000 and the disposal of equipment costing \$8,000. The book value of the equipment was \$7,000, the cash proceeds were \$4,000, and a loss of \$3,000 was recorded. The worksheet entries are:

(f)	Equipment	25,000	25,000
	Investing—Purchase of Equipment		

(g)	Investing—Sale of Equipment	4,000	
	Operating—Loss on Disposal of Equipment	3,000	
	Accumulated Depreciation—Equipment	1,000	
	Equipment		8,000

ACCOUNTS PAYABLE We must add the increase of \$16,000 in accounts payable to net income to determine net cash provided by operating activities. The worksheet entry is:

(h)	Operating—Increase in Accounts Payable	16,000	
	Accounts Payable		16,000

INCOME TAXES PAYABLE When a company incurs income tax expense but has not yet paid its taxes, it records income taxes payable. A change in the Income Taxes Payable account reflects the difference between income tax expense incurred and income tax actually paid. Computer Services' Income Taxes Payable account decreases by \$2,000. That means the \$47,000 of income tax expense reported on the income statement was \$2,000 less than the amount of taxes paid during the period of \$49,000. To adjust net income to a cash basis, we must reduce net income by \$2,000. The worksheet entry is:

(i)	Income Taxes Payable	2,000	
	Operating—Decrease in Income Taxes Payable		2,000

BONDS PAYABLE The increase of \$110,000 in this account resulted from the issuance of bonds for land. This is a significant noncash investing and financing activity. Worksheet entry (d) above is the only entry necessary.

COMMON STOCK The balance sheet reports an increase in Common Stock of \$20,000. The additional information section notes that this increase resulted from the issuance of new shares of stock. This is a cash inflow reported in the financing section. The worksheet entry is:

(j)	Financing—Issuance of Common Stock	20,000	
	Common Stock		20,000

ACCUMULATED DEPRECIATION—BUILDINGS, AND ACCUMULATED DEPRECIATION—EQUIPMENT Increases in these accounts of \$6,000 and \$3,000, respectively, resulted from depreciation expense. Depreciation expense is a **noncash charge that we must add to net income** to determine net cash provided by operating activities. The worksheet entries are:

(k)	Operating—Depreciation Expense	6,000	
	Accumulated Depreciation—Buildings		6,000
(l)	Operating—Depreciation Expense	3,000	
	Accumulated Depreciation—Equipment		3,000

RETAINED EARNINGS The \$116,000 increase in retained earnings resulted from net income of \$145,000 and the declaration and payment of a \$29,000 cash dividend. Net income is included in net cash provided by operating activities, and the dividends are a financing activity cash outflow. The entries in the reconciling columns of the worksheet are:

(m)	Operating—Net Income	145,000	
	Retained Earnings		145,000
(n)	Retained Earnings	29,000	
	Financing—Payment of Dividends		29,000

DISPOSITION OF CHANGE IN CASH The firm's cash increased \$22,000 in 2017. The final entry on the worksheet, therefore, is:

(o)	Cash	22,000	22,000
	Increase in Cash		

As shown in the worksheet, we enter the increase in cash in the reconciling credit column as a **balancing** amount. This entry should complete the reconciliation of the changes in the balance sheet accounts. Also, it should permit the totals of the reconciling columns to be in agreement. When all changes have been explained and the reconciling columns are in agreement, the reconciling columns are ruled to complete the worksheet. The completed worksheet for Computer Services Company is shown in Illustration 13B-3.

APPENDIX 13C: Use the T-account approach to prepare a statement of cash flows.

Many people like to use T-accounts to provide structure to the preparation of a statement of cash flows. The use of T-accounts is based on the accounting equation that you learned in Chapter 1. The basic equation is:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

Now, let's rewrite the left-hand side as:

$$\text{Cash} + \text{Noncash Assets} = \text{Liabilities} + \text{Equity}$$

Next, rewrite the equation by subtracting Noncash Assets from each side to isolate Cash on the left-hand side:

$$\text{Cash} = \text{Liabilities} + \text{Equity} - \text{Noncash Assets}$$

Finally, if we insert the Δ symbol (which means "change in"), we have:

$$\Delta \text{ Cash} = \Delta \text{ Liabilities} + \Delta \text{ Equity} - \Delta \text{ Noncash Assets}$$

What this means is that the change in cash is equal to the change in all of the other balance sheet accounts. Another way to think about this is that if we analyze the changes in all of the noncash balance sheet accounts, we will explain the change in the Cash account. This, of course, is exactly what we are trying to do with the statement of cash flows.

To implement this approach, first prepare a large Cash T-account with sections for operating, investing, and financing activities. Then, prepare smaller T-accounts for all of the other noncash balance sheet accounts. Insert the beginning and ending balances for each of these accounts. Once you have done this, then walk through the steps outlined in Illustration 13-3 (page 604). As you walk through the steps, enter debit and credit amounts into the affected accounts. When all of the changes in the T-accounts have been explained, you are done. To demonstrate, we apply this approach to the example of Computer Services Company that is presented in the chapter. Each of the adjustments in Illustration 13C-1 (page 630) is numbered so you can follow them through the T-accounts.

1. Post net income as a debit to the operating section of the Cash T-account and a credit to Retained Earnings. Make sure to label all adjustments to the Cash T-account. It also helps to number each adjustment so you can trace all of them if you make an error.
2. Post depreciation expense as a debit to the operating section of Cash and a credit to each of the appropriate accumulated depreciation accounts.
3. Post any gains or losses on the sale of property, plant, and equipment. To do this, it is best to first prepare the journal entry that was recorded at the time of the sale and then post each element of the journal entry. For example, for Computer Services the entry was as follows.

Cash	4,000	
Accumulated Depreciation—Equipment	1,000	
Loss on Disposal of Equipment	3,000	
Equipment		8,000

Cash			
Operating			
(1) Net income	145,000	5,000	Inventory (5)
(2) Depreciation expense	9,000	4,000	Prepaid expenses (6)
(3) Loss on equipment	3,000	2,000	Income taxes payable (8)
(4) Accounts receivable	10,000

	28,000		6,000		130,000		70,000	(13) 29,000	
									164,000

Illustration 13C-1
T-account approach

The \$4,000 cash entry is a source of cash in the investing section of the Cash account. Accumulated Depreciation—Equipment is debited for \$1,000. The Loss on Disposal of Equipment is a debit to the operating section of the Cash T-account. Finally, Equipment is credited for \$8,000.

- 4–8. Next, post each of the changes to the noncash current asset and current liability accounts. For example, to explain the \$10,000 decline in Computer Services' accounts receivable, credit Accounts Receivable for \$10,000 and debit the operating section of the Cash T-account for \$10,000.
9. Analyze the changes in the noncurrent accounts. Land was purchased by issuing bonds payable. This requires a debit to Land for \$110,000 and a credit to Bonds Payable for \$110,000. Note that this is a significant noncash event that requires disclosure at the bottom of the statement of cash flows.
10. Buildings is debited for \$120,000, and the investing section of the Cash T-account is credited for \$120,000 as a use of cash from investing.
11. Equipment is debited for \$25,000 and the investing section of the Cash T-account is credited for \$25,000 as a use of cash from investing.
12. Common Stock is credited for \$20,000 for the issuance of shares of stock, and the financing section of the Cash T-account is debited for \$20,000.

13. Retained Earnings is debited to reflect the payment of the \$29,000 dividend, and the financing section of the Cash T-account is credited to reflect the use of Cash.

At this point, all of the changes in the noncash accounts have been explained. All that remains is to subtotal each section of the Cash T-account and compare the total change in cash with the change shown on the balance sheet. Once this is done, the information in the Cash T-account can be used to prepare a statement of cash flows.

REVIEW AND PRACTICE

LEARNING OBJECTIVES REVIEW

- 1 **Discuss the usefulness and format of the statement of cash flows.** The statement of cash flows provides information about the cash receipts, cash payments, and net change in cash resulting from the operating, investing, and financing activities of a company during the period. Operating activities include the cash effects of transactions that enter into the determination of net income. Investing activities involve cash flows resulting from changes in investments and long-term asset items. Financing activities involve cash flows resulting from changes in long-term liability and stockholders' equity items.
- 2 **Prepare a statement of cash flows using the indirect method.** The preparation of a statement of cash flows involves three major steps. (1) Determine net cash provided/used by operating activities by converting net income from an accrual basis to a cash basis. (2) Analyze changes in noncurrent asset and liability accounts and record as investing and financing activities, or disclose as noncash transactions. (3) Compare the net change in cash on the statement of cash flows with the change in the Cash account reported on the balance sheet to make sure the amounts agree.
- 3 **Analyze the statement of cash flows.** Free cash flow indicates the amount of cash a company generated during the current year that is available for the payment of additional dividends or for expansion.
- * 4 **Prepare a statement of cash flows using the direct method.** The preparation of the statement of cash flows involves three major steps. (1) Determine net cash provided/used by operating activities by converting net income from an accrual basis to a cash basis. (2) Analyze changes in noncurrent asset and liability accounts and record as investing and financing activities, or disclose as noncash transactions. (3) Compare the net change in cash on the statement of cash flows with the change in the Cash account reported on the balance sheet to make sure the amounts agree. The direct method reports cash receipts less cash payments to arrive at net cash provided by operating activities.
- * 5 **Use a worksheet to prepare the statement of cash flows using the indirect method.** When there are numerous adjustments, a worksheet can be a helpful tool in preparing the statement of cash flows. Key guidelines for using a worksheet are as follows. (1) List accounts with debit balances separately from those with credit balances. (2) In the reconciling columns in the bottom portion of the worksheet, show cash inflows as debits and cash outflows as credits. (3) Do not enter reconciling items in any journal or account, but use them only to help prepare the statement of cash flows.
The steps in preparing the worksheet are as follows. (1) Enter beginning and ending balances of balance sheet accounts. (2) Enter debits and credits in reconciling columns. (3) Enter the increase or decrease in cash in two places as a balancing amount.
- * 6 **Use the T-account approach to prepare a statement of cash flows.** To use T-accounts to prepare the statement of cash flows: (1) prepare a large Cash T-account with sections for operating, investing, and financing activities; (2) prepare smaller T-accounts for all other noncash accounts; (3) insert beginning and ending balances for all accounts; and (4) follows the steps in Illustration 13-3 (page 604), entering debit and credit amounts as needed.

GLOSSARY REVIEW

***Direct method** A method of preparing a statement of cash flows that shows operating cash receipts and payments, making it more consistent with the objective of the statement of cash flows. (pp. 604, 616).

Financing activities Cash flow activities that include (a) obtaining cash from issuing debt and repaying the amounts borrowed and (b) obtaining cash from stockholders, repurchasing shares, and paying dividends. (p. 600).

Free cash flow Net cash provided by operating activities adjusted for capital expenditures and dividends paid. (p. 614).

Indirect method A method of preparing a statement of cash flows in which net income is adjusted for items that do not affect cash, to determine net cash provided by operating activities. (pp. 604, 606).

Investing activities Cash flow activities that include (a) purchasing and disposing of investments and property, plant, and equipment using cash and (b) lending money and collecting the loans. (p. 600).

Operating activities Cash flow activities that include the cash effects of transactions that create revenues and expenses and thus enter into the determination of net income. (p. 600).

Statement of cash flows A basic financial statement that provides information about the cash receipts, cash payments, and net change in cash during a period, resulting from operating, investing, and financing activities. (p. 600).

PRACTICE MULTIPLE-CHOICE QUESTIONS

- (LO 1) 1. Which of the following is **incorrect** about the statement of cash flows?
- It is a fourth basic financial statement.
 - It provides information about cash receipts and cash payments of an entity during a period.
 - It reconciles the ending Cash account balance to the balance per the bank statement.
 - It provides information about the operating, investing, and financing activities of the business.
- (LO 1) 2. Which of the following is **not** reported in the statement of cash flows?
- The net change in stockholders' equity during the year.
 - Cash payments for plant assets during the year.
 - Cash receipts from sales of plant assets during the year.
 - How acquisitions of plant assets during the year were financed.
- (LO 1) 3. The statement of cash flows classifies cash receipts and cash payments by these activities:
- operating and nonoperating.
 - investing, financing, and operating.
 - financing, operating, and nonoperating.
 - investing, financing, and nonoperating.
- (LO 1) 4. Which is an example of a cash flow from an operating activity?
- Payment of cash to lenders for interest.
 - Receipt of cash from the sale of common stock.
 - Payment of cash dividends to the company's stockholders.
 - None of the above.
- (LO 1) 5. Which is an example of a cash flow from an investing activity?
- Receipt of cash from the issuance of bonds payable.
 - Payment of cash to repurchase outstanding common stock.
 - Receipt of cash from the sale of equipment.
 - Payment of cash to suppliers for inventory.
6. Cash dividends paid to stockholders are classified on the statement of cash flows as:
- an operating activity.
 - an investing activity.
 - a combination of (a) and (b).
 - a financing activity.
7. Which is an example of a cash flow from a financing activity?
- Receipt of cash from sale of land.
 - Issuance of debt for cash.
 - Purchase of equipment for cash.
 - None of the above.
8. Which of the following is **incorrect** about the statement of cash flows?
- The direct method may be used to report net cash provided by operating activities.
 - The statement shows the net cash provided (used) for three categories of activity.
 - The operating section is the last section of the statement.
 - The indirect method may be used to report net cash provided by operating activities.
- Use the indirect method to solve Questions 9 through 11.**
9. Net income is \$132,000, accounts payable increased \$10,000 during the year, inventory decreased \$6,000 during the year, and accounts receivable increased \$12,000 during the year. Under the indirect method, what is net cash provided by operating activities?
- \$102,000.
 - \$112,000.
 - \$124,000.
 - \$136,000.
10. Items that are added back to net income in determining net cash provided by operating activities under the indirect method do **not** include:
- depreciation expense.
 - an increase in inventory.
 - amortization expense.
 - loss on disposal of equipment.

- (LO 2) 11. The following data are available for Allen Clapp Corporation.
- | | |
|---------------------------------|-----------|
| Net income | \$200,000 |
| Depreciation expense | 40,000 |
| Dividends paid | 60,000 |
| Gain on disposal of land | 10,000 |
| Decrease in accounts receivable | 20,000 |
| Decrease in accounts payable | 30,000 |
- Net cash provided by operating activities is:
 (a) \$160,000. (c) \$240,000.
 (b) \$220,000. (d) \$280,000.
- (LO 2) 12. The following data are available for Orange Peels Corporation.
- | | |
|---------------------------------|-----------|
| Proceeds from sale of land | \$100,000 |
| Proceeds from sale of equipment | 50,000 |
| Issuance of common stock | 70,000 |
| Purchase of equipment | 30,000 |
| Payment of cash dividends | 60,000 |
- Net cash provided by investing activities is:
 (a) \$120,000. (c) \$150,000.
 (b) \$130,000. (d) \$190,000.
- (LO 2) 13. The following data are available for Something Strange!
- | | |
|------------------------------|-----------|
| Increase in accounts payable | \$ 40,000 |
| Increase in bonds payable | 100,000 |
| Sale of investment | 50,000 |
| Issuance of common stock | 60,000 |
| Payment of cash dividends | 30,000 |
- Net cash provided by financing activities is:
 (a) \$90,000. (c) \$160,000.
 (b) \$130,000. (d) \$170,000.
- (LO 3) 14. The statement of cash flows should **not** be used to evaluate an entity's ability to:
- earn net income.
 - generate future cash flows.
 - pay dividends.
 - meet obligations.
15. Free cash flow provides an indication of a company's ability to:
- generate net income.
 - generate cash to pay dividends.
 - generate cash to invest in new capital expenditures.
 - Both (b) and (c).

Use the direct method to solve Questions 16 and 17.

- *16. The beginning balance in accounts receivable is \$44,000, the ending balance is \$42,000, and sales during the period are \$129,000. What are cash receipts from customers? (LO 4)
- \$127,000. (c) \$131,000.
 - \$129,000. (d) \$141,000.
- *17. Which of the following items is reported on a statement of cash flows prepared by the direct method? (LO 4)
- Loss on disposal of building.
 - Increase in accounts receivable.
 - Depreciation expense.
 - Cash payments to suppliers.
- *18. In a worksheet for the statement of cash flows, a decrease in accounts receivable is entered in the reconciling columns as a credit to Accounts Receivable and a debit in the: (LO 5)
- investing activities section.
 - operating activities section.
 - financing activities section.
 - None of the above.
- *19. In a worksheet for the statement of cash flows, a worksheet entry that includes a credit to accumulated depreciation will also include a: (LO 5)
- credit in the operating activities section and a debit in another section.
 - debit in the operating activities section.
 - debit in the investing activities section.
 - debit in the financing activities section.

Solutions

- (c) The statement of cash flows does not reconcile the ending cash balance to the balance per the bank statement. The other choices are true statements.
- (a) The net change in stockholders' equity during the year is not reported in the statement of cash flows. The other choices are true statements.
- (b) Operating, investing, and financing activities are the three classifications of cash receipts and cash payments used in the statement of cash flows. The other choices are therefore incorrect.
- (a) Payment of cash to lenders for interest is an operating activity. The other choices are incorrect because (b) receipt of cash from the sale of common stock is a financing activity, (c) payment of cash dividends to the company's stockholders is a financing activity, and (d) there is a correct answer.
- (c) Receipt of cash from the sale of equipment is an investing activity. The other choices are incorrect because (a) the receipt of cash from the issuance of bonds payable is a financing activity, (b) payment of cash to repurchase outstanding common stock is a financing activity, and (d) payment of cash to suppliers for inventory is an operating activity.
- (d) Cash dividends paid to stockholders are classified as a financing activity, not (a) an operating activity, (b) an investing activity, or (c) a combination of (a) and (b).
- (b) Issuance of debt for cash is a financing activity. The other choices are incorrect because (a) the receipt of cash for the sale of land is an investing activity, (c) the purchase of equipment for cash is an investing activity, and (d) there is a correct answer.

8. (c) The operating section of the statement of cash flows is the first, not the last, section of the statement. The other choices are true statements.

9. (d) Net cash provided by operating activities is computed by adjusting net income for the changes in the three current asset/current liability accounts listed. An increase in accounts payable (\$10,000) and a decrease in inventory (\$6,000) are added to net income (\$132,000), while an increase in accounts receivable (\$12,000) is subtracted from net income, or $\$132,000 + \$10,000 + \$6,000 - \$12,000 = \$136,000$, not (a) \$102,000, (b) \$112,000, or (c) \$124,000.

10. (b) An increase in inventory is subtracted, not added, to net income in determining net cash provided by operating activities. The other choices are incorrect because (a) depreciation expense, (c) amortization expense, and (d) loss on disposal of equipment are all added back to net income in determining net cash provided by operating activities.

11. (b) Net cash provided by operating activities is \$220,000 (Net income \$200,000 + Depreciation expense \$40,000 – Gain on disposal of land \$10,000 + Decrease in accounts receivable \$20,000 – Decrease in accounts payable \$30,000), not (a) \$160,000, (c) \$240,000, or (d) \$280,000.

12. (a) Net cash provided by investing activities is \$120,000 (Sale of land \$100,000 + Sale of equipment \$50,000 – Purchase of equipment \$30,000), not (b) \$130,000, (c) \$150,000, or (d) \$190,000. Issuance of common stock and payment of cash dividends are financing activities.

13. (b) Net cash provided by financing activities is \$130,000 (Increase in bonds payable \$100,000 + Issuance of common stock \$60,000 – Payment of cash dividends \$30,000), not (a) \$90,000, (c) \$160,000, or (d) \$170,000. Increase in accounts payable is an operating activity and sale of investment is an investing activity.

14. (a) The statement of cash flows is not used to evaluate an entity's ability to earn net income. The other choices are true statements.

15. (d) Free cash flow provides an indication of a company's ability to generate cash to pay dividends and to invest in new capital expenditures. Choice (a) is incorrect because other measures besides free cash flow provide the best measure of a company's ability to earn net income. Choices (b) and (c) are true statements, but (d) is the better answer.

***16. (c)** Cash collections from customers amount to \$131,000 ($\$129,000 + \$2,000$). The other choices are therefore incorrect.

***17. (d)** Cash payments to suppliers are reported on a statement of cash flows prepared by the direct method. The other choices are incorrect because (a) loss on disposal of building, (b) increase in accounts receivable, and (c) depreciation expense are reported in the operating activities section of the statement of cash flows when the indirect, not direct, method is used.

***18. (b)** Because accounts receivable is a current asset, the debit belongs in the operating activities section of the worksheet, not in the (a) investing activities or (c) financing activities section. Choice (d) is incorrect as there is a right answer.

***19. (b)** A worksheet entry that includes a credit to accumulated depreciation will also include a debit depreciation expense. This debit in the operating activities section of the statement of cash flows will be added to the net income to determine net cash provided by operating activities. The other choices are therefore incorrect.

PRACTICE EXERCISES

Prepare journal entries to determine effect on statement of cash flows.

(LO 2)

1. Furst Corporation had the following transactions.

1. Paid salaries of \$14,000.
2. Issued 1,000 shares of \$1 par value common stock for equipment worth \$16,000.
3. Sold equipment (cost \$10,000, accumulated depreciation \$6,000) for \$3,000.
4. Sold land (cost \$12,000) for \$16,000.
5. Issued another 1,000 shares of \$1 par value common stock for \$18,000.
6. Recorded depreciation of \$20,000.

Instructions

For each transaction above, (a) prepare the journal entry, and (b) indicate how it would affect the statement of cash flows. Assume the indirect method.

Solution

1. 1. (a) Salaries and Wages Expense	14,000	
Cash		14,000

(b) Salaries and wages expense is not reported separately on the statement of cash flows. It is part of the computation of net income in the income statement and is included in the net income amount on the statement of cash flows.

- | | | |
|---|--------|--------|
| 2. (a) Equipment | 16,000 | |
| Common Stock | | 1,000 |
| Paid-in Capital in Excess of Par—Common Stock | | 15,000 |
- (b) The issuance of common stock for equipment (\$16,000) is reported as a noncash financing and investing activity at the bottom of the statement of cash flows.
- | | | |
|------------------------------------|-------|--------|
| 3. (a) Cash | 3,000 | |
| Loss on Disposal of Plant Assets | 1,000 | |
| Accumulated Depreciation—Equipment | 6,000 | |
| Equipment | | 10,000 |
- (b) The cash receipt (\$3,000) is reported in the investing section. The loss (\$1,000) is added to net income in the operating section.
- | | | |
|----------------------------------|--------|--------|
| 4. (a) Cash | 16,000 | |
| Land | | 12,000 |
| Gain on Disposal of Plant Assets | | 4,000 |
- (b) The cash receipt (\$16,000) is reported in the investing section. The gain (\$4,000) is deducted from net income in the operating section.
- | | | |
|---|--------|--------|
| 5. (a) Cash | 18,000 | |
| Common Stock | | 1,000 |
| Paid-in Capital in Excess of Par—Common Stock | | 17,000 |
- (b) The cash receipt (\$18,000) is reported in the financing section.
- | | | |
|------------------------------------|--------|--------|
| 6. (a) Depreciation Expense | 20,000 | |
| Accumulated Depreciation—Equipment | | 20,000 |
- (b) Depreciation expense (\$20,000) is added to net income in the operating section.

2. Strong Corporation's comparative balance sheets are presented below.

Prepare statement of cash flows and compute free cash flow.

(LO 2, 3)

STRONG CORPORATION
Comparative Balance Sheets
December 31

	<u>2017</u>	<u>2016</u>
Cash	\$ 28,200	\$ 17,700
Accounts receivable	24,200	22,300
Investments	23,000	16,000
Equipment	60,000	70,000
Accumulated depreciation—equipment	(14,000)	(10,000)
Total	<u>\$121,400</u>	<u>\$116,000</u>
Accounts payable	\$ 19,600	\$ 11,100
Bonds payable	10,000	30,000
Common stock	60,000	45,000
Retained earnings	31,800	29,900
Total	<u>\$121,400</u>	<u>\$116,000</u>

Additional information:

- Net income was \$28,300. Dividends declared and paid were \$26,400.
- Equipment which cost \$10,000 and had accumulated depreciation of \$1,200 was sold for \$4,300.
- All other changes in noncurrent account balances had a direct effect on cash flows, except the change in accumulated depreciation.

Instructions

- Prepare a statement of cash flows for 2017 using the indirect method.
- Compute free cash flow.

Solution

2. (a) STRONG CORPORATION Statement of Cash Flows For the Year Ended December 31, 2017		
Cash flows from operating activities		
Net income		\$ 28,300
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$ 5,200*	
Loss on sale of equipment	4,500**	
Increase in accounts payable	8,500	
Increase in accounts receivable	(1,900)	16,300
Net cash provided by operating activities		<u>44,600</u>
Cash flows from investing activities		
Sale of equipment	4,300	
Purchase of investments	(7,000)	
Net cash used by investing activities		(2,700)
Cash flows from financing activities		
Issuance of common stock	15,000	
Retirement of bonds	(20,000)	
Payment of dividends	(26,400)	
Net cash used by financing activities		<u>(31,400)</u>
Net increase in cash		10,500
Cash at beginning of period		17,700
Cash at end of period		<u>\$ 28,200</u>
*[\$14,000 - (\$10,000 - \$1,200)]; **[\$4,300 - (\$10,000 - \$1,200)]		
(b) \$44,600 - \$0 - \$26,400 = \$18,200		

PRACTICE PROBLEMS

Prepare statement of cash flows using indirect method.

(LO 2)

1. The income statement for the year ended December 31, 2017, for Kosinski Manufacturing Company contains the following condensed information.

KOSINSKI MANUFACTURING COMPANY Income Statement For the Year Ended December 31, 2017		
Sales revenue		\$6,583,000
Operating expenses (excluding depreciation)	\$4,920,000	
Depreciation expense	880,000	5,800,000
Income before income taxes		783,000
Income tax expense		353,000
Net income		<u>\$ 430,000</u>

Included in operating expenses is a \$24,000 loss resulting from the sale of equipment for \$270,000 cash. Equipment was purchased at a cost of \$750,000.

The following balances are reported on Kosinski's comparative balance sheets at December 31.

KOSINSKI MANUFACTURING COMPANY
Comparative Balance Sheets (partial)

	2017	2016
Cash	\$672,000	\$130,000
Accounts receivable	775,000	610,000
Inventory	834,000	867,000
Accounts payable	521,000	501,000

Income tax expense of \$353,000 represents the amount paid in 2017. Dividends declared and paid in 2017 totaled \$200,000.

Instructions

Prepare the statement of cash flows using the indirect method.

Solution

1.

KOSINSKI MANUFACTURING COMPANY
Statement of Cash Flows—Indirect Method
For the Year Ended December 31, 2017

Cash flows from operating activities		
Net income		\$ 430,000
Adjustments to reconcile net income to net cash provided by operating activities:		
Depreciation expense	\$ 880,000	
Loss on disposal of equipment	24,000	
Increase in accounts receivable	(165,000)	
Decrease in inventory	33,000	
Increase in accounts payable	20,000	792,000
Net cash provided by operating activities		1,222,000
Cash flows from investing activities		
Sale of equipment	270,000	
Purchase of equipment	(750,000)	
Net cash used by investing activities		(480,000)
Cash flows from financing activities		
Payment of cash dividends		(200,000)
Net increase in cash		542,000
Cash at beginning of period		130,000
Cash at end of period		\$ 672,000

*2. The income statement for Kosinski Manufacturing Company contains the following condensed information.

Prepare statement of cash flows using direct method.

(LO 4)

KOSINSKI MANUFACTURING COMPANY
Income Statement
For the Year Ended December 31, 2017

Sales revenue		\$6,583,000
Operating expenses, excluding depreciation	\$4,920,000	
Depreciation expense	880,000	5,800,000
Income before income taxes		783,000
Income tax expense		353,000
Net income		\$ 430,000

Included in operating expenses is a \$24,000 loss resulting from the sale of equipment for \$270,000 cash. Equipment was purchased at a cost of \$750,000. The following balances are reported on Kosinski's comparative balance sheet at December 31.

KOSINSKI MANUFACTURING COMPANY
Comparative Balance Sheets (partial)

	<u>2017</u>	<u>2016</u>
Cash	\$672,000	\$130,000
Accounts receivable	775,000	610,000
Inventory	834,000	867,000
Accounts payable	521,000	501,000

Income tax expense of \$353,000 represents the amount paid in 2017. Dividends declared and paid in 2017 totaled \$200,000.

Instructions

Prepare the statement of cash flows using the direct method.

Solution

2.

KOSINSKI MANUFACTURING COMPANY
Statement of Cash Flows—Direct Method
For the Year Ended December 31, 2017

Cash flows from operating activities		
Cash collections from customers		\$6,418,000*
Cash payments:		
For operating expenses	\$4,843,000**	
For income taxes	353,000	5,196,000
Net cash provided by operating activities		1,222,000
Cash flows from investing activities		
Sale of equipment	270,000	
Purchase of equipment	(750,000)	
Net cash used by investing activities		(480,000)
Cash flows from financing activities		
Payment of cash dividends	(200,000)	
Net cash used by financing activities		(200,000)
Net increase in cash		542,000
Cash at beginning of period		130,000
Cash at end of period		\$ 672,000

Direct-Method Computations:

*Computation of cash collections from customers:

Sales revenue	\$6,583,000
Deduct: Increase in accounts receivable	(165,000)
Cash collections from customers	\$6,418,000

**Computation of cash payments for operating expenses:

Operating expenses	\$4,920,000
Deduct: Loss on disposal of equipment	(24,000)
Deduct: Decrease in inventories	(33,000)
Deduct: Increase in accounts payable	(20,000)
Cash payments for operating expenses	\$4,843,000

NOTE: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

QUESTIONS

1. (a) What is a statement of cash flows?
(b) Mark Paxson maintains that the statement of cash flows is an optional financial statement. Do you agree? Explain.
2. What questions about cash are answered by the statement of cash flows?
3. Distinguish among the three types of activities reported in the statement of cash flows.
4. (a) What are the major sources (inflows) of cash in a statement of cash flows?
(b) What are the major uses (outflows) of cash?
5. Why is it important to disclose certain noncash transactions? How should they be disclosed?
6. Diane Hollowell and Terry Parmenter were discussing the format of the statement of cash flows of Snow Candy Co. At the bottom of Snow Candy's statement of cash flows was a separate section entitled "Noncash investing and financing activities." Give three examples of significant noncash transactions that would be reported in this section.
7. Why is it necessary to use comparative balance sheets, a current income statement, and certain transaction data in preparing a statement of cash flows?
8. Contrast the advantages and disadvantages of the direct and indirect methods of preparing the statement of cash flows. Are both methods acceptable? Which method is preferred by the FASB? Which method is more popular?
9. When the total cash inflows exceed the total cash outflows in the statement of cash flows, how and where is this excess identified?
10. Describe the indirect method for determining net cash provided (used) by operating activities.
11. Why is it necessary to convert accrual-basis net income to cash-basis income when preparing a statement of cash flows?
12. The president of Merando Company is puzzled. During the last year, the company experienced a net loss of \$800,000, yet its cash increased \$300,000 during the same period of time. Explain to the president how this could occur.
13. Identify five items that are adjustments to convert net income to net cash provided by operating activities under the indirect method.
14. Why and how is depreciation expense reported in a statement of cash flows prepared using the indirect method?
15. Why is the statement of cash flows useful?
